## NEWS RELEASE

### Enbridge Acquires 24.9% Interest in UK Offshore Wind Project

**CALGARY, ALBERTA November 5, 2015** Enbridge Inc. (TSX:ENB) (NYSE:ENB) (the Company) today announced the acquisition of a 24.9 percent interest in the 400 megawatt (MW) Rampion Offshore Wind Project (the project) in the UK. The Company's total investment in the project is expected to be CAD \$750 million (£370 million) inclusive of all interest during construction, transaction costs and a development fee. The project was developed and is being constructed by E.ON Climate & Renewables UK Limited, a subsidiary of E.ON SE (E.ON), one of the world's largest utilities and a leading developer of wind energy projects.

Located 13 kilometres off the UK Sussex coast, at its nearest point, the project is backed by revenues from the UK's fixed price Renewable Obligation Certificates program and a 15-year power purchase agreement. Comprised of 116 Vestas V112-3.45 MW turbines, construction of the wind farm began in September 2015 and is expected to be fully operational in 2018.

Offshore wind is a natural next step for Enbridge's significant wind business, said Enbridge President and Chief Executive Officer Al Monaco. "We have a well-established renewables business and growing expertise in wind power technology, construction and operations and this project provides an attractive opportunity to partner with E.ON, an industry leading constructor and operator of offshore wind projects, and Green Investment Bank with its experience of supporting offshore wind ventures. Further developing our expertise in this business will position Enbridge to participate in future offshore developments.

Our investment in Rampion Offshore Wind is a strong fit with our investor value proposition and advances a number of key corporate priorities," added Mr. Monaco. "Rampion provides a timely and effective entry point to the European offshore wind business and it supports our objective of developing new platforms that extend and diversify our industry leading growth beyond 2019. The European offshore wind business comes with strong market fundamentals, sound commercial underpinnings and attractive returns. Once the project goes into service in 2018, we expect it to be immediately accretive to available cash flow from operations and earnings per share.

Over the next decade, some 100 billion of investment is forecast in the European offshore wind industry. The UK is a European leader in the implementation of measures to reduce carbon emissions, including the promotion of renewable technologies, and leads all other European countries in the adoption of offshore wind technology. There are presently 32 operating offshore wind farms in the UK, representing 4.4 gigawatts (GW) or 56 percent of the European offshore wind market with another 13 farms under construction.

Under the terms of the agreement Enbridge will become one of three shareholders in Rampion Offshore Wind Limited which owns the project. The UK Green Investment Bank plc holds a 25 percent interest, and E.ON will retain the balance of 50.1 percent.

E.ON will manage construction of the project under a Construction Management Agreement. Rampion Offshore Wind Project is E.ON's tenth offshore wind project worldwide and its sixth in the UK. It will be operated by E.ON under a 25-year Management and Operations Management Agreement.

E.ON currently operates a four GW wind portfolio across the globe. Enbridge and E.ON are partners in the 200 MW Magic Valley Wind Project in Texas and the 200 MW Wildcat Wind Project located in Indiana. Enbridge holds an 80 percent interest in both projects; both are operated by E.ON.

Enterprise wide, Enbridge has invested over CAD \$4 billion in renewable power generation and transmission in the past decade. The Company's portfolio comprises 1,800 MW net generating capacity across North America from 14 wind farms, four solar farms, one geothermal project and the Montana-Alberta transmission line.

Enbridge's financial advisor for this transaction was Access Corporate Finance Partners LLP and its legal advisor was Dentons UKMEA LLP.

### **Rampion Offshore Wind Project At-A-Glance:**

<b>Location:</b>	13-20 km off the Sussex coast, near to Brighton, UK
<b>Installed Capacity:</b>	400 MW
<b>Turbine:</b>	116 Vestas V122-3.45 MW turbines
<b>Water Depth:</b>	19-40 meters
<b>Area:</b>	72 km <sup>2</sup>
<b>Developer:</b>	E.ON

#### ***About Enbridge Inc.***

*Enbridge Inc., a Canadian company, exists to fuel people's quality of life, and has done so for more than 65 years. A North American leader in delivering energy, Enbridge has been ranked on the Global 100 Most Sustainable Corporations index for the past seven years. Enbridge operates the world's longest crude oil and liquids transportation system across Canada and the U.S., and has a significant and growing involvement in natural gas gathering, transmission and midstream business, as well as an increasing involvement in power transmission. Enbridge owns and operates Canada's largest natural gas distribution company, serving residential, commercial, and industrial customers in Ontario, Quebec, New Brunswick and New York State. Enbridge has interests in 1,800 megawatts of net renewable and alternative generating capacity, and continues to expand into wind, solar and geothermal power. Enbridge employs more than 11,000 people, primarily in Canada and the U.S., and is ranked as one of Canada's Top Employers for 2015.*

## NEWS RELEASE

### Enbridge Acquires 103-Megawatt West Virginia Wind Project

**CALGARY, ALBERTA November 25, 2015** Enbridge Inc. (TSX:ENB) (NYSE:ENB) today announced the acquisition of a 100 percent interest in the 103-megawatt (MW) New Creek Wind Project, from EverPower Wind Holdings, LLC. Enbridge's total investment is approximately US\$0.2 billion.

Located in Grant County, West Virginia, New Creek Wind will comprise 49 Gamesa G97/G90 turbines and is targeted to be in service in December 2016. The project was developed by EverPower Wind Holdings LLC., an independent U.S. renewable energy developer.

With strong fundamentals and commercial underpinnings, the New Creek Wind Project is a strong fit within our low-risk value proposition, and advances a key corporate priority of growing our renewable generation platform, said Vern Yu, Senior Vice President, Corporate Planning and Chief Development Officer, Enbridge Inc. We welcome the relationship with EverPower, a safe and community-focused developer, owner and operator of U.S. wind projects.

The project is backed by renewable energy credit (REC) sales and off take agreements with fixed pricing through mid-and-long-term contracts.

New Creek will be constructed under a fixed-price engineering, procurement and construction (EPC) agreement with White Construction Inc. Gamesa will provide turbine operations and maintenance (O&M) services under a five-year fixed price contract, following which Enbridge will operate.

Including this acquisition, Enbridge has invested approximately CAD \$5 billion in renewable power generation and transmission since 2002. Enterprise-wide, the Company now has interests in nearly 2,000 MW of net renewable generating capacity operating, secured or under construction.

#### **New Creek Wind Project At-A-Glance:**

**Location:** Grant County, West Virginia  
**Installed Capacity:** 103 MW  
**Turbine** 49 Gamesa G97/G90  
**Technology:**  
**Developer:** EverPower Wind Holdings, LLC
