ADR - American Depositary Receipt

Written options activity for the fiscal year to date ended January 31, 2016 was as follows:

	Number of Contracts	Premiums Received
Outstanding, beginning of period	4,135	\$ 7,580,439
Options written	13,110	26,659,887
Options terminated in closing purchase transactions	(4,570)	(8,575,112)
Options expired	(8,600)	(15,747,831)
Outstanding, end of period	4,075	\$ 9,917,383

All of the assets of the Fund are subject to segregation to satisfy the requirements of the escrow agent. At January 31, 2016, the Fund had sufficient cash and/or securities to cover commitments under open derivative contracts.

The Fund is subject to equity price risk in the normal course of pursuing its investment objectives. The Fund writes index call options above the current value of the index to generate premium income. In writing index call options, the Fund in effect, sells potential appreciation in the value of the applicable index above the exercise price in exchange for the option premium received. The Fund retains the risk of loss, minus the premium received, should the price of the underlying index decline.

At January 31, 2016, the aggregate fair value of open derivative instruments (not considered to be hedging instruments for accounting disclosure purposes) in a liability position and whose primary underlying risk exposure is equity price risk was \$9,920,000.

The cost and unrealized appreciation (depreciation) of investments of the Fund at January 31, 2016, as determined on a federal income tax basis, were as follows:

Aggregate cost	\$ 1,657,463,577
Gross unrealized appreciation	\$ 148,267,374
Gross unrealized depreciation	(111,152,470)
Net unrealized appreciation	\$ 37,114,904

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund s own assumptions in determining the fair value of investments)

In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

At January 31, 2016, the hierarchy of inputs used in valuing the Fund s investments and open derivative instruments, which are carried at value, were as follows:
