

## MATTHEWS INTERNATIONAL FUNDS

Form 497K

April 30, 2018

Matthews Asia Focus Fund

## SUMMARY PROSPECTUS INVESTOR CLASS

April 30, 2018

TICKER: MAFSX

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus and other information about the Fund online at [matthewsasiasia.com/prospectus](http://matthewsasiasia.com/prospectus). You may also obtain this information at no additional cost by calling 800.789.ASIA (2742) or by sending an e-mail request to [prospectus@matthewsasiasia.com](mailto:prospectus@matthewsasiasia.com). The Fund's Prospectus and Statement of Additional Information, both dated April 30, 2018, are incorporated by reference into this Summary Prospectus.

*Investment Objective*

Long-term capital appreciation.

*Fees and Expenses of the Fund*

This table describes the fees and expenses that you may pay if you buy and hold shares of this Fund.

## SHAREHOLDER FEES

*(fees paid directly from your investment)*

Maximum Account Fee on Redemptions (for wire redemptions only)	\$9
--	-----

## ANNUAL OPERATING EXPENSES

*(expenses that you pay each year as a percentage of the value of your investment)*

Management Fees	0.66%
Distribution (12b-1) Fees	0.00%
Other Expenses	1.79%
Administration and Shareholder Servicing Fees	0.14%
Total Annual Fund Operating Expenses	2.45%
Fee Waiver and Expense Reimbursement <sup>1</sup>	(0.95%)
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement	1.50%

<sup>1</sup> Matthews has contractually agreed (i) to waive fees and reimburse expenses to the extent needed to limit Total Annual Fund Operating Expenses (excluding Rule 12b-1 fees, taxes, interest, brokerage commissions, short sale dividend expenses, expenses incurred in connection with any merger or reorganization or extraordinary expenses

such as litigation) of the Institutional Class (which is offered through a separate prospectus to eligible investors) to 1.25%, first by waiving class specific expenses (i.e., shareholder service fees specific to a particular class) of the Institutional Class and then, to the extent necessary, by waiving non-class specific expenses of the Institutional Class, and (ii) if any Fund-wide expenses (i.e., expenses that apply to both the Institutional Class and the Investor Class) are waived for the Institutional Class to maintain the 1.25% expense limitation, to waive an equal amount (in annual percentage terms) of those same expenses for the Investor Class. The Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement for the Investor Class may vary from year to year and will in some years exceed 1.25%. If the operating expenses fall below the expense limitation in a year within three years after Matthews has made a waiver or reimbursement, the Fund may reimburse Matthews up to an amount that does not cause the expenses for that year to exceed the lesser of (i) the expense limitation applicable at the time of that fee waiver and/or expense reimbursement or (ii) the expense limitation in effect at the time of recoupment. This agreement will remain in place until April 30, 2019 and may be terminated at any time by the Board of Trustees on behalf of the Fund on 60 days written notice to Matthews. Matthews may decline to renew this agreement by written notice to the Trust at least 30 days before its annual expiration date.

#### EXAMPLE OF FUND EXPENSES

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The example reflects the expense limitation for the one year period only. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

One year: \$153

Three years: \$673

Five years: \$1,220

Ten years: \$2,714

#### PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or turns over its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account.

PS-MAFSX-0418

These costs, which are not reflected in annual fund operating expenses or in the example of fund expenses, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 28% of the average value of its portfolio.

### *Principal Investment Strategy*

Under normal market conditions, the Matthews Asia Focus Fund seeks to achieve its investment objective by investing at least 80% of its net assets, which include borrowings for investment purposes, in the common and preferred stocks of companies located in Asia ex Japan, which consists of all countries and markets in Asia excluding Japan but including all other developed, emerging, and frontier countries and markets in the Asian region. A company or other issuer is considered to be located in a country or a region, and a security or instrument will be deemed to be an Asian (or specific country) security or instrument, if it has substantial ties to that country or region. Matthews currently makes that determination based primarily on one or more of the following criteria: (A) with respect to a company or issuer, whether (i) it is organized under the laws of that country or any country in that region; (ii) it derives at least 50% of its revenues or profits from goods produced or sold, investments made, or services performed, or has at least 50% of its assets located, within that country or region; (iii) it has the primary trading markets for its securities in that country or region; (iv) it has its principal place of business in or is otherwise headquartered in that country or region; or (v) it is a governmental entity or an agency, instrumentality or a political subdivision of that country or any country in that region; and (B) with respect to an instrument or issue, whether (i) its issuer is headquartered or organized in that country or region; (ii) it is issued to finance a project with significant assets or operations in that country or region; (iii) it is secured or backed by assets located in that country or region; (iv) it is a component or its issuer is included in a recognized securities index for the country or region; or (v) it is denominated in the currency of an Asian country and addresses at least one of the other above criteria. The term "located" and the associated criteria listed above have been defined in such a way that Matthews has latitude in determining whether an issuer should be included within a region or country. The Fund may also invest in depositary receipts, including American, European and Global Depositary Receipts.

The Fund seeks to invest in companies capable of sustainable growth based on fundamental characteristics. Companies in which the Fund invests typically possess, in the portfolio managers' judgment, such attributes as a high quality management team, strong corporate governance standards, sustainable return on capital over an extended period, strong free cash flow generation and an attractive valuation in relation to growth prospects and intrinsic value. Although the Fund is unconstrained by sector, geographic area or market capitalization, companies in which the Fund invests are typically expected to be medium capitalization companies or large capitalization companies. The Fund is currently expected to hold stocks of between 25 and 35 companies under normal market conditions.

### *Principal Risks of Investment*

There is no guarantee that your investment in the Fund will increase in value. The value of your investment in the Fund could go down, meaning you could lose money. The principal risks of investing in the Fund are:

**Political, Social and Economic Risks of Investing in Asia:** The value of the Fund's assets may be adversely affected by political, economic, social and religious instability; inadequate investor protection; changes in laws or regulations of countries within the Asian region (including countries in which the Fund invests, as well as the broader region); international relations with other nations; natural disasters; corruption and military activity. The Asian region, and particularly China,

Japan and South Korea, may be adversely affected by political, military, economic and other factors related to North Korea. In addition, China's long-running conflict over Taiwan, border disputes with many of its neighbors and historically strained relations with Japan could adversely impact economies in the region. The economies of many Asian countries differ from the economies of more developed countries in many respects, such as rate of growth,

inflation, capital reinvestment, resource self-sufficiency, financial system stability, the national balance of payments position and sensitivity to changes in global trade. Deflationary factors could also reemerge in certain Asian markets, the potential effects of which are difficult to forecast. While certain Asian governments will have the ability to offset deflationary conditions through fiscal or budgetary measures, others will lack the capacity to do so. Certain Asian countries are highly dependent upon and may be affected by developments in the United States, Europe and other Asian economies. Global economic conditions, and international trade, affecting Asian economies and companies could deteriorate as a result of political instability and uncertainty, and politically motivated actions, in the United States and Europe, as well as increased tensions with certain nations such as Russia.

**Currency Risks:** When the Fund conducts securities transactions in a foreign currency, there is the risk of the value of the foreign currency increasing or decreasing against the value of the U.S. dollar. The value of an investment denominated in a foreign currency will decline in dollar terms if that currency weakens against the dollar. While the Fund is permitted to hedge currency risks, Matthews does not anticipate doing so at this time. Additionally, Asian countries may utilize formal or informal currency-exchange controls or capital controls. Capital controls may impose restrictions on the Fund's ability to repatriate investments or income. Such controls may also affect the value of the Fund's holdings.

**Risks Associated with Emerging and Frontier Markets:** Many Asian countries are considered emerging or frontier markets (newer or less developed emerging markets are also sometimes referred to as frontier markets). Such markets are often less stable politically and economically than developed markets such as the United States, and investing in these markets involves different and greater risks. There may be less publicly available information about companies in many Asian countries, and the stock exchanges and brokerage industries in many Asian countries typically do not have the level of government oversight as do those in the United States. Securities markets of many Asian countries are also substantially smaller, less liquid and more volatile than securities markets in the United States.

**Depository Receipts:** Although depository receipts have risks similar to the securities that they represent, they may also involve higher expenses and may trade at a discount (or premium) to the underlying security. In addition, depository receipts may not pass through voting and other shareholder rights, and may be less liquid than the underlying securities listed on an exchange.

**Volatility:** The smaller size and lower levels of liquidity in emerging markets, as well as other factors, may result in changes in the prices of Asian securities that are more volatile than those of companies in more developed regions. This volatility can cause the price of the Fund's shares (NAV) to go up or down dramatically. Because of this volatility, it is recommended that you invest in the Fund only for the long term (typically five years or longer).

**Focused Investment Risk:** The Fund is a focused fund and is currently expected to hold stocks of between only 25 and 35 companies. Focused funds may invest a larger portion of their assets in the securities of a single issuer compared to a more

*Past Performance*

The bar chart below shows the Fund's performance for each full calendar year since its inception and how it has varied from year to year, reflective of the Fund's volatility and some indication of risk. Also shown are the best and worst quarters for this time period. The table below shows the Fund's performance over certain periods of time, along with performance of its benchmark index. The information presented below is past performance, before and after taxes, and is not a prediction of future results. Both the bar chart and performance table assume reinvestment of all dividends and distributions. For the Fund's most recent month-end performance, please visit [matthewsasia.com](http://matthewsasia.com) or call 800.789.ASIA (2742).

## ANNUAL RETURNS FOR YEARS ENDED 12/31

## AVERAGE ANNUAL TOTAL RETURNS FOR PERIODS ENDED DECEMBER 31, 2017

		Since Inception
	1 year	(4/30/13)
Matthews Asia Focus Fund		
Return before taxes	36.98%	5.48%
Return after taxes on distributions <sup>1</sup>	36.72%	5.25%
Return after taxes on distributions and sale of Fund shares <sup>1</sup>	21.24%	4.27%
MSCI All Country Asia ex Japan Index		
(reflects no deduction for fees, expenses or taxes)	42.08%	8.55%

<sup>1</sup> After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

*Investment Advisor*

Matthews International Capital Management, LLC ( Matthews )

*Portfolio Managers*

Lead Manager: Kenneth Lowe, CFA, has been a Portfolio Manager of the Matthews Asia Focus Fund since its inception in 2013.

Co-Manager: S. Joyce Li, CFA, has been a Portfolio Manager of the Matthews Asia Focus Fund since 2017.

diversified fund. Focusing investments in a small number of companies may subject the Fund to greater share price volatility and therefore a greater risk of loss because a single security's increase or decrease in value may have a greater impact on the Fund's value and total return. Economic, political or regulatory developments may have a greater impact on the value of the Fund's portfolio than would be the case if the portfolio were diversified among more issuers, and events affecting a small number of companies may have a significant and potentially adverse impact on the performance of the Fund.

In addition, investors may buy or sell substantial amounts of Fund shares in response to factors affecting or expected to affect a small number of companies, resulting in extreme inflows and outflows of cash into or out of the Fund. To the extent such inflows or outflows of cash cause the Fund's cash position or cash requirements to exceed normal levels, management of the Fund's portfolio may be negatively affected.

**Risks Associated with Medium-Size Companies:** Medium-size companies may be subject to a number of risks not associated with larger, more established companies, potentially making their stock prices more volatile and increasing the risk of loss.

#### Risks Associated with China, Hong Kong and Taiwan

**China:** The Chinese government exercises significant control over China's economy through its industrial policies (e.g., allocation of resources and other preferential treatment), monetary policy, management of currency exchange rates, and management of the payment of foreign currency-denominated obligations. Changes in these policies could adversely impact affected industries or companies. China's economy, particularly its export-oriented industries, may be adversely impacted by trade or political disputes with China's major trading partners, including the U.S. In addition, as its consumer class emerges, China's domestically oriented industries may be especially sensitive to changes in government policy and investment cycles. China's currency, which historically has been managed in a tight range relative to the U.S. dollar, may in the future be subject to greater uncertainty as Chinese authorities change the policies that determine the exchange rate mechanism.

**Hong Kong:** If China were to exert its authority so as to alter the economic, political or legal structures or the existing social policy of Hong Kong, investor and business confidence in Hong Kong could be negatively affected, which in turn could negatively affect markets and business performance and have an adverse effect on the Fund's investments.

**Taiwan:** Although the relationship between China and Taiwan has been improving, there is the potential for future political or economic disturbances that may have an adverse impact on the values of investments in either China or Taiwan, or make investments in China and Taiwan impractical or impossible.

#### *Purchase and Sale of Fund Shares*

You may purchase and sell Fund shares directly through the Fund's transfer agent by calling 800.789.ASIA (2742) or online at matthewsasia.com. Fund shares may also be purchased and sold through various securities brokers and benefit plan administrators or their sub-agents. You may purchase and redeem Fund shares by electronic bank transfer, check, or wire. The minimum initial and subsequent investment amounts for various types of accounts offered by the Fund are shown below.

Type of Account	Minimum Initial Investment	Subsequent Investments
Non-retirement	\$2,500	\$100
Retirement and Coverdell	\$500	\$50

The minimum investment requirements do not apply to Trustees, officers and employees of the Fund and Matthews, and their immediate family members.

*Tax Information*

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Tax-deferred arrangements may be taxed later upon withdrawal from those accounts.

*Payments to Broker-Dealers and Other Financial Intermediaries*

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), Matthews may pay the intermediary for the sale of Fund shares and related services. Shareholders who purchase or hold Fund shares through an intermediary may inquire about such payments from that intermediary. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
