Last Reported Sale Price of

Common Stock

on the NYSE on July 10, 2018: \$117.30 per share

Public Offering Price: \$113.75 per share

Forward Sale Agreements: Sempra Energy will agree to sell an aggregate of 9,750,000 shares (subject to adjustment) of Common Stock to the forward purchasers pursuant to forward sale agreements between Sempra Energy and the respective forward purchasers. See the Common Stock Preliminary Prospectus Supplement for additional information concerning the forward sale agreements, including provisions for adjustment to the foregoing number of shares and the forward sale price and for net share settlement and cash settlement.

Initial Forward Sale Price: \$111.873125 per share, which is the public offering price per share of the shares of Common Stock in the Common Stock Offering less the underwriting discount. The forward sale agreements provide that the initial forward sale price will be subject to adjustment based on a floating interest rate factor equal to the overnight bank funding rate less a spread, and will be subject to decrease on each of certain dates specified in the forward sale agreements.

Net Proceeds: Sempra Energy will not initially receive any proceeds from the sale of shares of its Common Stock offered in the Common Stock Offering, unless (i) an event occurs that requires Sempra Energy to sell such shares to the underwriters in lieu of the forward sellers selling such shares to the underwriters, or (ii) the underwriters exercise their over-allotment option to purchase additional shares of its Common Stock, in which case Sempra Energy will sell all of the additional shares of its Common Stock covered by such option to the underwriters rather than requiring the forward sellers to borrow and sell such additional shares to the underwriters.

Sempra Energy estimates that the net proceeds to it from the sale of shares of its Common Stock in connection with the Common Stock Offering and pursuant to the forward sale agreements will be approximately \$1.091 billion (or approximately \$1.254 billion if the underwriters for the Common Stock Offering exercise their over-allotment option to purchase additional shares of its Common Stock directly from Sempra Energy in full), in each case after deducting discounts but before deducting expenses payable by Sempra Energy, subject to certain adjustments pursuant to the forward sale agreements and assuming full physical settlement of the forward sale agreements at the initial forward sale price per share set forth above. As discussed above and in the Common Stock Preliminary Prospectus Supplement, the forward sale price is subject to adjustment pursuant to the forward sale agreements and Sempra Energy may elect net share settlement or cash settlement under the forward sale agreements. Sempra Energy will not receive any proceeds under the forward sale agreements on the closing date of the Common Stock Offering. Sempra Energy expects that the forward sale agreements will settle in one or more settlements on or prior to December 15, 2019.

The fundamental change conversion rate will be determined based on the effective date of the fundamental change and the price (the share price) paid or deemed paid per share of Common Stock in such fundamental change (see table below). Holders who convert their

Mandatory Convertible Preferred Stock within the fundamental change conversion period will also receive: (1) a fundamental change dividend make-whole amount, in cash or in shares of Common Stock or any combination thereof, equal to the present value (computed using a discount rate of 6.75% per annum) of all remaining dividend payments on their shares of the Mandatory Convertible Preferred Stock (excluding any accumulated dividend amount) from such effective date to, but excluding, July 15, 2021; and (2) to the extent that the accumulated dividend amount exists as of the effective date, such accumulated dividend amount, in cash or in shares of Common Stock or any combination thereof, as described in the Mandatory Convertible Preferred Stock Preliminary Prospectus Supplement.

Fundamental Change

Conversion Rate:

The fundamental change conversion rate will be determined by reference to the table below and is based on the effective date and the share price. If the holders of Common Stock receive only cash in the fundamental change, the share price shall be the cash amount paid per share. Otherwise, the share price shall be the average VWAP per share of Common Stock over the 10 consecutive trading day period ending on, and including, the trading day preceding the effective date.

The share prices set forth in the first row of the table (*i.e.*, the column headers), and each fundamental change conversion rate in the table, will be adjusted as of any date on which the fixed conversion rates of the Mandatory Convertible Preferred Stock are adjusted, as described in the Mandatory Convertible Preferred Stock Preliminary Prospectus Supplement.

The following table sets forth the fundamental change conversion rate per share of the Mandatory Convertible Preferred Stock for each share price and effective date set forth below.

	Share price

The exact share price and effective date may not be set forth in the table, in which case:

if the share price is between two share price amounts on the table or the effective date is between two dates on the table, the fundamental change conversion rate will be determined by straight-line interpolation between the fundamental change conversion rates set forth for the higher and lower share price amounts and the two dates, as applicable, based on a 365- or 366-day year, as applicable;

if the share price is in excess of \$400.00 per share (subject to adjustment as described in the Mandatory Convertible Preferred Stock Preliminary Prospectus Supplement), then the fundamental change conversion rate will be the minimum conversion rate; and

if the share price is less than \$30.00 per share (subject to adjustment as described in the Mandatory Convertible Preferred Stock Preliminary Prospectus Supplement), then the fundamental change conversion rate will be the maximum conversion rate.
