Enclosure:

ANGLOGOLD ASHANTI REPORT FOR THE QUARTER AND SIX MONTHS ENDED JUNE 30, 2006 PREPARED IN ACCORDANCE WITH INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS)

**Quarter 2 2006**

**Report**

**for the quarter and six months ended 30 June 2006**

**Group results for the quarter**

&#183 Gold production up 6% to 1.415Moz, primarily due to strong performances from South African, Malian, South American and Australian operations

&#183 Price received 10% higher to \$600/oz

&#183 Total cash costs down 1% to \$305/oz

&#183 Adjusted headline earnings up 63% to \$140m

&#183 Interim dividend of 210 South African cents (29.89 US cents)/share declared

&#183 Net debt level reduced from \$1.66bn to \$1.03bn

Financial and **operating review**

**OVERVIEW FOR THE QUARTER**

The quarter produced a modest improvement in lost-time injury rates (6.6 compared to 6.8) and a more significant improvement in fatal accidents (5 compared to 11), with fatality rates reducing from 0.28 to 0.12. Three operations were lost-time accident free, namely Cripple Creek & Victor, Bibiani and Yatela. A further seven operations recorded a single lost-time injury during the quarter.

Improved production, higher received prices and lower costs resulted in an improved financial performance for the June quarter, with adjusted headline earnings up 63% to \$140m. The price received, at \$600/oz, was 10% higher than that of the previous quarter.

Operational performance was also solid, as particularly strong results from the South Africa region and several of the international assets resulted in a 6% improvement in production to 1.415Moz and slightly lower total cash costs, at \$305/oz.

Four of the seven South African operations posted higher production and lower total cash costs, with production for the region 6% higher quarter-on-quarter and total cash costs 4% better at R59,200/kg.

Kopanang, Mponeng and TauTona reported particularly strong results, with production increases of 11%, 14% and 9% and total cash cost improvements of 5%, 8% and 5%, respectively. At Great Noligwa, lower volumes resulted in a 5% production decline as well as a 10% increase in total cash costs.

In respect of the other African assets, the Malian operations had a strong quarter, with production 24% higher at Sadiola, 21% higher at Yatela and steady at Morila. Production at Siguri in Guinea also improved by 4%, while all three of the Ghanaian assets reported both lower production and higher cash costs.

As previously forecast, Geita, in Tanzania, continued to suffer the effects of the first quarter's adverse weather conditions and the related delay in the Nyankanga pit push-back. Production consequently declined 15% and total cash costs increased 38%. In addition, the recent application of a more appropriate grade evaluation model has resulted in a lower in situ grade and an increase in ore tonnage. This has reduced the feed grade to the plant and in turn, gold output, as the plant is currently running at full capacity. In light of these issues, the 2006 production outlook for Geita has been revised to approximately 350,000oz, with the potential to double this in 2007, as the pit push-back is completed and higher grades are accessed.

Importantly, this near-term revising down of production at Geita does not impact the view of the significant long-term potential of this orebody.

Turning to the international assets, Sunrise Dam, in Australia, reported excellent operating results, with production up 24% due to higher grades. Total cash costs were consequently 4% lower quarter-on-quarter.

In South America, both Cerro Vanguardia in Argentina and AngloGold Ashanti Mineração in Brazil reported solid results, with production 23% and 16% higher, respectively, with total cash costs stable.

At Cripple Creek & Victor, in the United States, both production and total cash costs improved 2% due to an increase in recoverable ounces placed on the heap leach pad. Notwithstanding this improvement, however, the 2006 production outlook for Cripple Creek & Victor has been reduced to approximately 300,000oz. This revision is due to the effect of the quarter's reduced rainfall on the irrigation of the heap leach, after higher volumes were placed on the pad to mitigate the effect of the lower grades mined from the bottom of the Altman pit late last year and into the first quarter of 2006. The release of the lock-up on the leach pad is expected to improve the production outlook in 2007.

A dividend of 210 South African cents (29.89 US cents) per share has been declared for the six months ended 30 June 2006.

Looking ahead, production for the third quarter is estimated to be around 1.4Moz at an average total cash cost of \$306/oz, assuming the following exchange rates: R7.00/\$, A\$/0.75, BRL2.18/\$ and Argentinean peso 3.07/\$. Capital expenditure is estimated at \$273m and will be managed in line with profitability and cash flow.

In light of the company's year-to-date performance and the downward revision of the annual forecast ounces for Geita and Cripple Creek & Victor, the group production outlook for the year currently stands at around 5.7Moz. The total cash costs for the year are estimated at \$301/oz. Capital expenditure is forecast at \$851m based on the following exchange rates: R6.65/\$, A\$/0.75, BRL2.20/\$ and Argentinean peso 3.09/\$.

The proceeds of the recently completed equity raising and improved cash generation have enabled the company to reduce its net debt level from \$1.66bn to \$1.03bn during the quarter. The

annual rolling net debt to EBITDA ratio improved from 2.27 times at the end of 2005 to 1.1 times as at 30 June 2006.

## **OPERATING RESULTS FOR THE QUARTER SOUTH AFRICA**

At **Great Noligwa**, volume mined declined 3% this quarter as complex geology resulted in lower face length. Yield decreased 5% due to temporary maintenance work that required waste development to be passed through the reef ore system, resulting in dilution. As a result, production declined 5% to 4,767kg (153,000oz). Combined with higher expenditures on public holiday overtime shifts and additional temporary support, the lower production led to a 10% increase in total cash costs to R57,253/kg (\$277/oz). Gross profit adjusted for the effect of unrealised non-hedge derivatives increased 32% to R295m (\$45m), primarily as a result of a higher price received.

The Lost-Time Injury Frequency Rate (LTIFR) was 9.48 lost-time injuries per million hours worked (10.60 for the previous quarter). Regrettably, one employee died in a fall of ground accident.

At **Kopanang**, the release of previously locked-up material led to a 5% volume improvement and yield also increased 5%. Production consequently rose 11% to 3,561kg (114,000oz) and total cash costs declined 5% to R60,958/kg (\$295/oz), although higher labour expenditure partially offset the effect of improved production. Gross profit adjusted for the effect of unrealised non-hedge derivatives, at R222m (\$34m), increased 90% quarter-on-quarter, due to both an improved price received and a better cost performance.

The LTIFR was 11.59 (15.45).

Gold production at **Moab Khotsong** rose 16% to 338kg (11,000oz) as a result of higher face values mined and as part of the planned general build-up of the operation. Total cash costs consequently improved 18% to R137,630/kg (\$666/oz). Gross loss adjusted for the effect of unrealised non-hedge derivatives improved 28% to R29m (\$5m).

As noted last quarter, Moab Khotsong is a new production unit and currently mining low volumes within the context of a relatively high fixed cost structure. Production is expected to increase by approximately 75% in 2007 and total cash costs are anticipated to decline.

The LTIFR was 16.02 (17.61).

At **Tau Lekoa**, volume mined declined 17% in line with the ongoing plan to downsize the operation, and production accordingly decreased 10% to 1,289kg (41,000oz). Total cash costs improved 9% to R92,719/kg (\$447/oz). Gross profit adjusted for the

effect of unrealised non-hedge derivatives increased to R16m (\$2m) from a loss of R32m (\$5m) in the previous quarter, as a higher price received more than offset the effect of the lower volume mined. The LTIFR was 26.32 (18.55). Regrettably, one employee died as a result of a fall of ground accident.

At **Mponeng**, volume mined and yield improved by 10% and 6%, respectively. As a result, production was 14% higher to 4,853kg (156,000oz) and total cash costs, at R47,250/kg (\$229/oz), improved 8% on the previous quarter. Gross profit adjusted for the effect of unrealised non-hedge derivatives increased 64% to R324m (\$50m), due to a significantly higher price received and lower cash costs.

The LTIFR was 7.32 (7.53). Regrettably, one fatality occurred after a sudden ore rush caused an employee to lose his footing. He was inundated by broken rock.

Production at **Savuka**, at 653kg (21,000oz), was on par with that of the previous quarter. Total cash costs, however, rose 3% to R73,967/kg (\$359/oz) due to additional maintenance work and reef development, both related to the decision to postpone closure of the operation. Gross profit adjusted for the effect of unrealised non-hedge derivatives increased 48% to R34m (\$5m), primarily due to an improved price received. The LTIFR was 20.58 (15.32).

At **TauTona**, gold production increased 9% to 3,718kg (120,000oz) due to a reduction in gold lock-up. Total cash costs decreased 5% to R55,276/kg (\$267/oz). Gross profit adjusted for the effect of unrealised non-hedge derivatives improved 94% to R213m (\$32m) as a consequence of an improved price received. The LTIFR was 14.71 (14.99). Regrettably, two employees died this quarter in two separate fall of ground accidents.

#### **ARGENTINA**

At **Cerro Vanguardia** (92.5% attributable), gold production increased 23% to 64,000oz, primarily due to higher feed grade. Total cash costs, at \$188/oz, were nearly on par with those of the previous quarter, as the effects of higher production and a better silver by-product credit were partially off-set by the higher labour, fuel and maintenance costs related to on-site labour action, which has since been resolved. Gross profit adjusted for the effect of unrealised non-hedge

derivatives, at \$18m, was 125% higher than that of the previous quarter, mainly due to a higher price received.

The LTIFR was 2.04 (0.00).

## AUSTRALIA

Production at **Sunrise Dam** increased 24% this quarter to 113,000oz as a result of increased tonnes treated and higher-than-anticipated grades. Total cash costs consequently declined 4% to A\$366/oz (\$273/oz).

Gross profit adjusted for the effect of unrealised non-hedge derivatives rose 72% to A\$50m (\$37m), mainly due to improved grade and associated higher production.

The underground project, where mining is currently accessing high-grade Western Shear ore, continues to supplement production. During the quarter, 505m of underground capital development and 1,374m of operational development were completed.

The LTIFR was 2.37 (0.00).

## BRAZIL

At **AngloGold Ashanti Mineração**, gold production increased 16% to 57,000oz, following last quarter's production halt during an upgrade of the shaft and crusher at the Cuiabá mine. Total cash costs, at \$190/oz, were slightly higher than those of the previous quarter due to a lower sulphuric acid by-product credit and marginally higher ore transport costs. Gross profit adjusted for the effect of unrealised non-hedge derivatives increased 91% to \$21m as a consequence of the increased production and a higher price received.

The LTIFR was 2.30 (2.12).

At **Serra Grande** (50% attributable), gold production remained at 24,000oz. Total cash costs rose 10% to \$206/oz, primarily as a result of slightly lower grades. Gross profit adjusted for the effect of unrealised non-hedge derivatives nevertheless increased 20% to \$6m due to a 10% increase in price received.

The LTIFR was 2.40 (2.38).

## GHANA

At **Bibiani**, production was 40% lower at 9,000oz. This decline was in part the result of the operation's continued downscale to tailings-only status, although lower recovery rates resulting from a circuit tank breakdown and frequent power outages on the main electricity grid also contributed. Total cash costs, at \$412/oz, consequently rose 47%. Looking ahead, the second half of the year should see an operational improvement at Bibiani, as the production problems experienced in the second quarter are resolved. Gross profit adjusted for the effect of unrealised non-hedge derivatives fell by 50% to \$1m, as the benefit of an improved price received was negated by the higher total cash costs.

The LTIFR was 0.00 (0.00).

At **Iduapriem** (85% attributable), production declined 5% to 41,000oz as a result of an 8% decrease in tonnage treated due to mill and crusher problems. These issues are being addressed and for the rest of the year, Iduapriem should see a production level closer to that of the first quarter. Total cash costs increased 13% to \$408/oz, primarily as a consequence of the lower tonnages and a backdated wage increase after wage negotiations were completed in June. Gross profit adjusted for the effect of unrealised non-hedge derivatives declined by \$2m to a break-even position, due to a lower price received, lower production and higher total cash costs.

The LTIFR was 1.14 (2.39).

Gold production at **Obuasi** decreased marginally to 97,000oz this quarter, mainly due to a 5% underground yield decline resulting from the treatment of lower-grade ore. Although improved processing availability led to a 6% increase in total tonnage treated, which partially offset the effect of the lower yield, total cash costs increased 16% to \$406/oz. Gross loss adjusted for the effect of unrealised non-hedge derivatives was \$9m, compared with a \$1m profit in the previous quarter, mainly due to a lower price received and lower grades.

The LTIFR was 2.46 (2.02).

#### **REPUBLIC OF GUINEA**

At **Siguiri** (85% attributable), production increased 4% to 59,000oz primarily as a result of a 15% yield improvement. Tonnage treated declined 8% as a result of maintenance shut-downs and a short period of industrial action, which was addressed. Total cash costs consequently rose 6% to \$403/oz. Gross profit adjusted for the effect of unrealised non-hedge derivatives declined 50% to \$2m due to royalty payments.

LTIFR was 0.59 (1.30).

#### **MALI**

At **Morila** (40% attributable), production was consistent with that of the previous quarter at 54,000oz. An increase in recovered grade compensated for lower tonnage throughput, which was affected by major mill re-lining and maintenance. Total cash costs improved 5% to \$249/oz as a result of higher recovered grade, while gross profit adjusted for the effect of unrealised non-hedge derivatives increased 36% to \$15m due to an improved price received.

The LTIFR was 1.11 (1.15).

At **Sadiola** (38% attributable), gold production increased 24% to 52,000oz due to the combination of higher tonnage throughput and higher recovered grade. This resulted in a 6% decline in total cash costs to \$255/oz, while gross profit adjusted for the effect of unrealised non-hedge derivatives, at \$14m, was 56% higher than that of the previous quarter, as a result of a better price received and higher production.

The LTIFR was 1.01 (2.07).

At **Yatela** (40% attributable), production increased 21% to 40,000oz, primarily as a result of improved grade. Total cash costs, however, were 5% higher at \$232/oz, due to increased cement consumption associated with stabilising the pad during periods of bottom lift stacking. Higher production and a significantly improved price received more than offset the increase in total cash costs, leading to a 20% increase in gross profit adjusted for the effect of unrealised non-hedge derivatives to \$12m.

The LTIFR was 0.00 (0.00).

#### **NAMIBIA**

Gold production at **Navachab**, at 22,000oz, was consistent with that of the previous quarter, with both tonnage throughput and recovered grade maintained at last quarter's levels. Total cash costs, however, returned to more ordinary levels of \$279/oz after an abnormal stockpile adjustment in the previous quarter reduced total cash costs to \$227/oz. Gross profit adjusted for the effect of unrealised non-hedge derivatives improved 20% to \$6m, as the higher price received offset the effect of increased total cash costs.

The LTIFR was 7.90 (0.00).

#### **TANZANIA**

As forecast last quarter, the consequence of both heavy rains and the slower-than-anticipated cut-back of the Nyankanga pit resulted in a 15% production decline at **Geita** to 71,000oz. This decrease was primarily due to a 29% drop in recovered grade, partially offset by a 19% increase in tonnage throughput. Total cash costs consequently increased 38% to \$507/oz. Gross profit adjusted for the effect of unrealised non-hedge derivatives nevertheless increased 50% to \$3m, with the higher price received offsetting the production decline.

The LTIFR was 1.10 (0.40).

#### **USA**

At **Cripple Creek & Victor** (67% ownership with 100% interest in production until initial loans are repaid), gold production increased 2% to 65,000oz and total cash costs decreased 2% to \$242/oz,

both due to an increase in recoverable ounces placed on the leach pad.

Gross loss adjusted for the effect of unrealised non-hedge derivatives was \$5m, compared with a \$2m profit in the first quarter, as a consequence of a lower price received on hedged production.

The LTIFR was 0.00 (0.00). In June, CC&V achieved 31 months without a lost-time accident.

Notes:

&#183 All references to price received includes realised non-hedge derivatives.

&#183 In the case of joint venture operations, all production and financial results are attributable to AngloGold Ashanti.

&#183 Adjusted headline earnings is headline earnings before unrealised non-hedge derivatives, fair value gain (loss) on convertible

bond and interest rate swaps and deferred tax thereon.

&#183 Rounding of figures may result in computational discrepancies.

### Review of the **gold market**

The second quarter of 2006 was characterised by a break in the unabated rise of the gold price since late 2005. At its peak the price reached \$730/oz in mid-May and then retraced to \$543/oz. This movement represents the highest spot price and the largest move within a single quarter in the last twenty five years. The gold price subsequently recovered to trade above \$600/oz towards the end of the quarter, having rallied strongly through the 200-day moving average (US\$547/oz) to regain its upward momentum. The average price for the quarter of \$629/oz represents a \$75/oz increase over the first quarter. As the dollar gold price declined in the second half of the quarter, the rand weakened against the dollar, thus mitigating the impact on the rand gold price. This has resulted in an average rand gold price of R130,053/kg for the period under review, which represents a 19% or R20,000/kg increase over the previous quarter.

### **PHYSICAL MARKET**

As with the first quarter of 2006, the sharp price moves in the gold market experienced during the second quarter, has seen some weakness in key consumer markets such as Turkey and India, together with a shift by manufacturers to lower gold content in manufactured products.

In addition, gold manufacturers have been adversely affected by higher price levels and particularly greater price volatility, as banks make margin calls to cover the higher value of gold inventory loans. Manufacturers therefore have typically had to increase their loan collateral, or to repay loans, by cutting production or liquidating stock.

Higher metal prices have also been accompanied by an influx of gold scrap into refineries, with the new secondary refineries in Dubai being the major beneficiaries.

While participants in the jewellery wholesale, manufacturing and retail trade are adopting various strategies to deal with gold's price appreciation and volatility, those who analyse demand indicators in key markets are cautious regarding potential further softening in the gold jewellery market through the next six months.

### **INVESTMENT MARKET**

In contrast to a slightly weaker jewellery market, the investment market for gold has remained strong, notwithstanding a general pull-back in

commodities and precious metals investing in mid-May.

Gold Exchange Traded Funds (ETFs) again grew by some 45t during the second quarter, with the increase year-to-date some 149t. Despite the sharp fall in the gold price during the quarter, gold ETFs only reduced modestly and recovered quickly to pre-sell off levels. See Graph A.

Central Bank selling appears to have been low since January, 2006. Sales have amounted to be between 30t-35t for the second quarter.

Reported sales for the current year of the Washington Agreement are between 315t to 320t, which means that signatories to the agreement may sell up to a further 180t before the year-end of 26 September if they are to utilise, in full, the agreed quota for 2006.

More generally, commodity prices continue to be supported, in part, by investor demand.

Investment in indexed commodity funds continues to grow (see Graph B) and is estimated to be as much as \$90 billion currently, much of it coming from long-only funds such as pension funds that are allocating a portion of funds under management to commodities. The expectation amongst market commentators is for this trend to continue, with the potential for significant further investment flows into the sector.

#### **CURRENCIES**

During the quarter, the US dollar continued to trade in a range of \$1.20 to \$1.30 against the euro despite continued concerns over the trade and current account deficits in that country. Of

significance during the quarter were the comments and testimony made by the US FED Chairman Dr Ben S Bernanke, including raising US interest rates by 25 basis points for the 17<sup>th</sup>

consecutive time and signalling to the market that the cycle of interest rate increases may not yet be complete.

The remarks were influential in causing investors to withdraw funds from a number of markets, particularly the more liquid emerging markets where there was a realisation that the risk premium being offered in these markets may not be sufficient to merit the investment. Coupled with local interest rate changes, this had the effect of causing, amongst other currencies, the South African rand, the Brazilian real and the Australian dollar to trade some 10% lower.

Since then the real has recovered to trade at BRL2.2/\$ from its lows of BRL2.4/\$ and the Australian dollar has strengthened to \$0.755/A\$ from its lows of \$0.72/A\$. In the case of the rand, the release in June of a large current account deficit for the first quarter of 2006 saw the rand weaken further to lows of R7.40/\$ despite the South African Monetary Policy Committee raising interest rates by 50 basis points. It is unlikely that the rand will recover much of its recent weakness unless the dollar itself weakens, hence going forward South African producers should continue receiving the high rand gold prices that they have been receiving of late.

#### **HEDGING**

As at 30 June 2006, the net delta hedge position of AngloGold Ashanti was 10.14Moz or 315t, valued at the spot gold price at the quarter end of \$620/oz. This net delta position reflects a decrease of some 1.1Moz or 34t. This decrease was due to maturing positions and hedge reducing strategies that resulted in the hedge reducing by some 1.37Moz, offset by an increase in delta due to the quarter end gold price of \$620/oz which was \$38/oz higher than the first quarter's closing gold price of \$582/oz.

The marked-to-market value of the hedge position as at 30 June 2006 was negative \$3.17bn. The increase in the marked-to-market value was mostly due to the \$38/oz increase in the gold price over the previous quarter, combined with the effects of higher US interest rates and gold volatilities. Had the spot price of gold at the end of June remained unchanged from the price of \$582/oz at the end of the previous quarter, the hedge would have reduced in size to 9.86Moz or 307t, with a marked-to-market value of negative \$2.8bn.

The price received by the company for the quarter was \$600/oz, compared to a spot price for the period of \$629/oz. The company continues to

manage its hedge position actively, and to reduce overall levels of pricing commitments in respect of future gold production.

**Hedge position**

As at 30 June 2006, the group had outstanding the following forward-pricing commitments against future production. The total net delta tonnage of the hedge of the company on this date was 10.14Moz or 315t (at 31 March 2006: 11.23Moz or 349t).

The marked-to-market value of all hedge transactions making up the hedge positions was a negative \$3.167bn (negative R22.45bn) as at 30 June 2006 (as at 31 March 2006: negative \$2.707bn or R16.65bn). This value at 30 June 2006 was based on a gold price of \$619.80/oz, exchange rates of R7.088/\$ and A\$/0.7438 and the prevailing market interest rates and volatilities at that date.

As at 26 July 2006, the marked-to-market value of the hedge book was a negative \$3.115bn (negative R21.93bn), based on a gold price of \$618.95/oz and exchange rates of R7.04/\$ and A\$/0.758 and the prevailing market interest rates and volatilities at the time.

These marked-to-market valuations are not predictive of the future value of the hedge position, nor of future impact on the revenue of the company. The valuation represents the cost of buying all hedge contracts at the time of valuation, at market prices and rates available at the time.

## **Exploration**

Total exploration expenditure amounted to \$27m (\$18m expensed, \$9m capitalised) during the second quarter, compared to \$18m (\$12m expensed, \$6m capitalised) in the first quarter of 2006.

### **BROWNFIELDS EXPLORATION**

At Siguiri, in **Guinea**, infill and extension drilling continued at the Kintinian prospect. A ground gravity programme is in progress to define additional drill targets to the south of the existing pits.

At Geita, in **Tanzania**, drilling confirmed the connection between the south and central orebodies of Lone Cone. Drilling indicated the potential for a second mineralised zone in Nyankanga South and drilling at Area 3 West (located approximately 1km south-east of the Matandani pit) showed encouraging results.

In the regional drill programme on the Morila grant in **Mali**, 50 holes (26,146m) have been completed.

Drilling continues to the south of the main pit in the Tonalite extension area, and results indicate a wide, low-grade mineralised zone. Also in Mali, at Sadiola, drilling in the gap between FE3 and FE4 indicated open-ended mineralisation to the north and east.

These intersections will be followed up with further drilling.

Surface drilling continued at Obuasi, in **Ghana**, with UDSDD 2 reaching a depth of 876m and USDD 3 reaching 1,500m. Reef intersections are expected in the first quarter of 2007.

In South America, good progress has been made converting Inferred Resources to Indicated Resources, which can be used for mine planning. Noteworthy additions have been made at Cuiabá and Serra Grande in **Brazil**, and Cerro Vanguardia in **Argentina**.

At Cripple Creek & Victor in the **United States**, drill programme efforts primarily focused on Resource expansion. Results from ongoing, step-out drilling are being modelled to determine the impact of new drilling results and updated cost assumptions on expanding the orebody. Infill and step-out development drilling in the South Cresson Deposit continued.

### **GREENFIELDS EXPLORATION**

Greenfields exploration activities continued during the second quarter in Alaska, Australia, China, Colombia, Laos, the Philippines, Russia and the DRC.

A Letter of Intent was signed with International Tower Hill Mines Ltd on 15 June for the sale and option of all of AngloGold Ashanti's **Alaskan** mineral exploration properties and associated databases. Final Toronto Stock Exchange approval for the transaction is expected early in the third quarter.

In **Australia**, drilling continued at the Tropicana joint venture on both the original Tropicana zone and the newly-discovered Havana zone.

Significant new intercepts obtained from infill drilling at the Tropicana zone included 29m at 4.4g/t from 219m in TPRC021D, 34m at 4.0g/t from 42m in TPD013 (TPRC031 twin), 13m at 5.0g/t from 71m in TPD024, and 25m at 2.0g/t from 160m in TPRC079D. Gold mineralisation at the Tropicana zone has now been confirmed to extend 1,400m along strike, with current drilling testing the down-dip extent of mineralisation.

Initial drilling on the new Havana zone, located 1.1km south of the Tropicana zone, has also returned encouraging results.

Regional exploration programmes continued at an accelerated pace in **Colombia** during the second quarter. First-pass drill programmes were completed on two projects; where highly encouraging results were obtained and follow-up drilling is envisaged. Regional exploration joint ventures were also signed with both Bema Gold Corporation and Antofagasta PLC, on 1 June and 14 July, respectively.

In the **DRC**, a second diamond drill rig commenced operation and allowed for further drill testing of the priority Adidi/D7 Kanga and Nzebi/Senzere corridors. Significant new intercepts included 14m at 6.40g/t from 57m in DD051. Resource delineation drilling will continue in the DRC during both the third and fourth quarters of 2006.

In

**China**, generative exploration activities continued and select business development opportunities were reviewed. A 5,000m diamond drill programme commenced at Dynasty Gold's Red Valley project in the Qinghai Province.

In the **Philippines**, exploration activities continued 20km north of the Siana Gold Project. The project area contains potential for both epithermal and porphyry style gold and copper mineralisation.

In **Laos**, regional exploration under the joint venture with Oxiana Limited was undertaken in five main areas. Widespread stream sediment gold anomalies were identified in one target area with encouraging geology and alteration identified in another. Additional new targets have also been delineated for follow-up.

In **Russia**, generative exploration activities remain underway in the Far East and AngloGold Ashanti

continued to provide technical assistance to Trans-Siberian Gold's Asacha and Veduga Projects.

**Notes**

**for the quarter and six months ended 30 June 2006**

**1.**

**Basis of preparation**

The financial statements in this quarterly report have been prepared in accordance with the historic cost convention except for certain financial instruments which are stated at fair value. The group's accounting policies used in the preparation of these financial statements are consistent with those used in the annual financial statements for the year ended 31 December 2005 and revised International Financial Reporting Standards (IFRS) which are effective 1 January 2006, where applicable.

The financial statements of AngloGold Ashanti Limited have been prepared in compliance with IAS34, JSE Listings Requirements and in the manner required by the South African Companies Act, 1973 for the preparation of financial information of the group for the quarter and six months ended 30 June 2006.

Where the preparation or classification of an item has been amended, comparative information has been reclassified to ensure comparability with the current period as disclosed in the previous annual report. Such amendments have been made to provide the users of the financial statements with additional information.

**Liquidity and capital resources:**

*To service the above capital commitments and other operational requirements, the group is dependant upon cash generated from the*

*South African operations, borrowing facilities and cash distributions from offshore operations.*

*Cash generated from the South African operations fund to a large extent the capital expenditure to maintain and expand those operations*

*in South Africa. Consequently other funding requirements are serviced from borrowing facilities and offshore distributions which are*

*subject to market and other risks. The credit facilities and other financing arrangements contain financial covenants and other similar undertakings.*

*The distributions from offshore operations are subject to foreign investment and exchange control laws and regulations and the quantity*

*of foreign exchange available in offshore countries. In addition offshore distributions from joint venture partners are subject to consent*

*and co-operation from those joint venture partners.*

*The group's current covenant performance, cash and liquidity funds from the various resources available are within the required limits which will meet its obligations and capital commitments.  
Rounding of figures may result in computational discrepancies.*

**15.****Contingent liabilities**

AngloGold Ashanti's contingent liabilities at 30 June 2006 are detailed below:

*Water pumping cost – South Africa* – The South African Department of Water Affairs and Forestry (DWAF) issued a directive on 1 November 2005 ordering the four mining groups, Simmer and Jack Investments (Proprietary) Limited, Simmer and Jack Mines Limited (collectively known as Simmers who have purchased Buffelsfontein shafts from DRDGold Limited), Harmony Gold Mining Company Limited, AngloGold Ashanti and Stilfontein Gold Mining Company to share equally, the costs of pumping water at Stilfontein's Margaret Shaft. This follows an interdict application made by AngloGold Ashanti in response to DRDGold's threat to cease funding the pumping of water at the Margaret and Buffelsfontein shafts, after placing Buffelsfontein, its subsidiary that operated the North West operations, into liquidation on 22 March 2005. Simmers have purchased the Buffelsfontein shafts and have assumed the water management liabilities associated with the Buffelsfontein shafts. The directive also orders the mining companies to submit an agreement and a joint proposal towards the long-term sustainable management of water arising from the mining activities in the area.

The mining companies have signed and submitted Settlement and Shareholders' Agreements to DWAF. The mining companies and government are in the process of discussing the fulfilment of the conditions precedent in the Agreements. The Settlement Agreement describes the formation of a "New Water Company", which will take over the running of the Margaret Shaft from the Stilfontein Gold Mining Company. The state has requested that the new company be a Section 21 "not for profit company" in order for it to qualify for reduced water tariffs. The new company will be responsible for the operation of the shaft and the operation of all pumping equipment at the shaft in order to transfer all fissure water to surface on a daily basis. Each of the three companies has agreed to provide one third of the start up capital required on loan account to the New Water Company. The mining companies will each contribute a maximum of R18 million capital in the aggregate over a 3-year period. Any additional working or other capital costs required by the New Water Company will be borrowed or otherwise obtained from outside sources. In other words the mining companies are not obliged to contribute more than the R18 million capital. Each of the mining companies must agree with the contents of a business plan for the New Water Company. The mining companies will not have any obligation whatsoever to approve of the Business Plan unless they are satisfied that the New Water Company will be able to conduct and continue conducting business on a viable and sustainable basis without any funding being required from the mining companies other than the R18 million capital provided for in the agreement. At present it is estimated that a total finance of R54 million is required for the Margaret Shaft over a three-year period. The Shareholders Agreement provides for the formation of the New Water Company, with each mining company nominating two directors each.

Stilfontein, the owner of the Margaret and Scott Shafts has been placed in provisional liquidation on the application of a creditor, Mining Reclamation Services (Pty) Limited. The Master of the High Court has appointed 4 (four) liquidators. During a meeting held on 21 July the mining companies were advised that Stilfontein was deregistered as a company at the Company Registrar's office after it was placed in provisional liquidation. It is uncertain whether the deregistration takes precedence over the provisional liquidation. Should deregistration of Stilfontein be valid then ownership in the assets of the company vest in the State. If this is the case then the State is free to grant the New Water Company access to Margaret and Scott Shafts. However should the liquidation take precedence over the deregistration then the mining companies will consider purchasing the Margaret and Scott Shafts from the liquidators at a nominal cost or the cost may be defrayed by the claims that the mining companies have as creditors of Stilfontein.

AngloGold Ashanti believes that it is not liable to fund these pumping costs but cannot provide any assurances regarding the ultimate result until the matter has been settled.

*Groundwater pollution – South Africa* – AngloGold Ashanti has identified a number of groundwater pollution sites at its current operations in South Africa, and has investigated a number of different technologies and methodologies that could possibly be used to remediate the pollution plumes. The viability of the suggested remediation techniques in the local geological formation in South Africa is however unknown. No sites have been remediated and present research and development work is focused on several pilot projects to find a solution that will in fact yield satisfactory results in South African conditions. Subject to the technology being developed as a remediation technique, no reliable estimate can be made for the obligation.

*Retrenchment costs – South Africa* – Following the decision to discontinue operations at Ergo in 2005, employees surplus to requirements have had their service contracts terminated and retrenchment packages settled. Ergo continues to retain various staff members to complete the discontinuance and the attendant environmental obligations which are expected to be completed by 2012. The retained employees may resign, be transferred within the Group, attain retirement age or be retrenched as their current position is made redundant. AngloGold Ashanti is currently unable to determine the effect, if any, of any potential retrenchment costs.

*Provision of surety – South Africa* – AngloGold Ashanti has provided sureties in favour of a lender on a Gold loan facility with its affiliate Oro Africa (Pty) Ltd and one of its subsidiaries to a maximum value of R100m (\$14m). The suretyship agreements have a termination notice period of 90 days.

*Sales tax on gold deliveries – Brazil* – Mineração Serra Grande S.A., the operator of the Crixas mine in Brazil, has received assessments from the State of Goiás Tax Inspection related to payments of sales taxes on gold deliveries for export. The Serra Grande Joint Venture is co-owned with Kinross Gold Corporation. The company manages the operation and its attributable share of the assessment is approximately \$29 million. The company believes the assessments are in violation of Federal legislation on sales taxes and that there is a remote chance of success for the State of Goiás. The assessment has been appealed.

*Litigation with mining contractor and non-payment of receivable – Ghana*

&#183; A group of employees of Mining and Building Contractors (MBC), the Obuasi underground developer, are claiming to be employees of the group. If successful, there is a risk of some employees claiming rights to share options;

&#183; Bayswater Construction and Mining Limited (BCM) have instituted court proceedings against the Bibiani mine (AGBL), claiming \$5m pertaining to a contractual dispute. This matter is currently stayed on technical grounds to the effect that the litigation cannot commence until arbitration has been concluded. A provision of \$2m has been made;

&#183; BCM has instituted a claim against the Bibiani mine relating to a wall slip to which BCM considered that they had an exclusive right under their contract to repair. AGBL awarded the repair to a third party. The potential liability amounts to \$1m.

*Capital cost of water pipelines and electricity supply – Namibia* – A potential liability of approximately \$1m exists at Navachab in Namibia to pay the outstanding capital cost of the water pipeline and electricity supply in the event of mine closure prior to 2019.

## 16.

### **Concentration of risk**

There is a concentration of risk in respect of reimbursable value added tax and fuel duties from the Malian government:

&#183; Reimbursable value added tax due from the Malian government, for the company amount to an attributable \$30m at 30 June 2006 (31 March 2006: attributable \$27m). The last audited value added tax return was for the period ended 30 June 2005 and at that date an attributable \$20m was still outstanding and an attributable \$10m is still subject to audit. The accounting processes for the unaudited amount are in accordance with the processes advised by the Malian government in terms of the previous audits.

&#183; Reimbursable fuel duties from the Malian government, for the company amount to an attributable \$14m at 30 June 2006 (31 March 2006: attributable \$14m). Fuel duties are required to be submitted before 31 January of the following year and are subject to authorisation by firstly the Department of Mining and secondly the Custom and Excise authorities. The Customs and Excise authorities have approved an attributable \$7m which is still outstanding, whilst an attributable \$7m is still subject to authorisation. The accounting processes for the unauthorised amount are in accordance with the processes advised by the Malian government in terms of the previous authorisations.

The government of Mali is a shareholder in all the Malian entities and has provided a repayment plan for the amounts due.

**17. Attributable interest**

Although AngloGold Ashanti holds a 66.7% interest in Cripple Creek & Victor Gold Mining Company Limited, it is currently entitled to receive 100% of the cash flows from the operation until the loan, extended to the joint venture by AngloGold Ashanti USA Inc., is repaid.

**18. Borrowings**

AngloGold Ashanti's borrowings are interest bearing.

**19. Announcements**

On 10 May 2006, AngloGold Ashanti announced that Kelvin Williams retired from the board effective 6 May 2006.

On 1 June 2006, AngloGold Ashanti and Bema Gold Corporation announced that they are to form a new company which will jointly explore a select group of AngloGold Ashanti's mineral opportunities located in Northern Colombia, with initial work focused on the La Mina and El Pino targets. As part of the agreement, AngloGold Ashanti has initially agreed to provide a minimum of eight exploration properties while Bema will provide a minimum of \$5m in exploration funding.

On 15 June 2006, AngloGold Ashanti announced the signature of a Letter of Intent with International Tower Hill Mines Ltd. (ITH), for the sale and option of AngloGold Ashanti's 100% interest in six Alaskan mineral exploration properties and associated databases to ITH. ITH will issue to AngloGold Ashanti, 19.99% of its issued shares following the acquisition and the completion of equity financing to raise a minimum of \$10m for future exploration activities. ITH will be required to raise an additional approximate \$6m either prior to or concurrently with the closing of the deal with AngloGold Ashanti. AngloGold Ashanti will also grant to ITH, the exclusive option to acquire a 60% interest in each of its LMS and Terra projects by incurring \$3m of exploration expenditure on each project within four years of the grant date of the option, following which AngloGold Ashanti will have the option to increase or dilute its stake in these projects, subject to certain conditions.

On 14 July 2006, AngloGold Ashanti announced the signing of a Heads of Agreement with Antofagasta PLC to jointly explore a highly prospective belt in Southern Colombia for new gold and copper deposits. AngloGold Ashanti will include all of its mineral applications, contracts and third party contracts within the area of interest in the new joint venture, while Antofagasta will commit to fund a minimum of \$1.3m of exploration within 12 months of the signing of the agreement, with an option to invest an additional \$6.7m within four years in order to earn-in to 50% of the joint venture. Both AngloGold Ashanti and Antofagasta will have the right to increase their interests by 20% in copper-dominant and gold-dominant properties subject to certain conditions.

**20. Dividend**

The directors have today declared Interim Dividend No. 100 of 210 (Interim Dividend No. 98: 170) South African cents per ordinary share for the six months ended 30 June 2006. In compliance with the requirements of STRATE, given the company's primary listing on the JSE Limited, the salient dates for payment of the dividend are as follows:

**To holders of ordinary shares and to holders of CHESS Depository Interests (CDIs)**

Each CDI represents one-fifth of an ordinary share.

**2006**

Currency conversion date for UK pounds, Australian dollars and Ghanaian cedis

Thursday, 10 August

Last date to trade ordinary shares cum dividend

Friday, 11 August

Last date to register transfers of certificated securities cum dividend

Friday, 11 August

Ordinary shares trade ex dividend

Monday, 14 August

Record date

Friday, 18 August

Payment date

Friday, 25 August

27

On the payment date, dividends due to holders of certificated securities on the South African share register will either be electronically transferred to shareholders' bank accounts or, in the absence of suitable mandates, dividend cheques will be posted to such shareholders.

Dividends in respect of dematerialised shareholdings will be credited to shareholders' accounts with the relevant CSDP or broker.

To comply with the further requirements of STRATE, between Monday, 14 August 2006 and Friday, 18 August 2006, both days inclusive, no transfers between the South African, United Kingdom, Australian and Ghana share registers will be permitted and no ordinary shares pertaining to the South African share register may be dematerialised or rematerialised.

**To holders of American Depositary Shares**

Each American Depositary Share (ADS) represents one ordinary share.

**2006**

Ex dividend on New York Stock Exchange

Wednesday, 16 August

Record date

Friday, 18 August

Approximate date for currency conversion

Friday, 25 August

Approximate payment date of dividend

Monday, 4 September

Assuming an exchange rate of R7.025/\$1, the dividend payable on an ADS is equivalent to 29.89 US cents. This compares with the interim dividend of 26.095 US cents per ADS paid on 6 September 2005. However, the actual rate of payment will depend on the exchange rate on the date for currency conversion.

**To holders of Ghanaian Depositary Shares (GhDSs)**

100 GhDSs represent one ordinary share.

**2006**

Last date to trade and to register GhDSs cum dividend

Friday, 11 August

GhDSs trade ex dividend

Monday, 14 August

Record date

Friday, 18 August

Approximate payment date of dividend

Monday, 28 August

Assuming an exchange rate of R1/¢1,308.19 the dividend payable per GhDS is equivalent to 27.47 cedis. This compares with the interim dividend of 23.818cedis per GhDS paid on 29 August 2005. However, the actual rate of payment will depend on the exchange rate on the date for currency conversion. In Ghana, the authorities have determined that dividends payable to residents on the Ghana share register be subject to a final withholding tax at a rate of 10%, similar to the rate applicable to dividend payments made by resident companies which is currently at 10%.

Gross profit (loss) adjusted for the effect of unrealised non-hedge derivatives plus amortisation of tangible and intangible assets, less non-cash revenues. Refer to note F of "Non-GAAP disclosure" for the definition *Rounding of figures may result in computational discrepancies.*

Based on risks and returns the directors consider that the primary reporting format is by business segment. The directors consider that there is only one business segment being mining, extraction and production of gold. Therefore the disclosures for the primary segment have already been given in the abbreviated financial statements. The secondary reporting format is by geographical analysis by origin.

(1)

*Calculated on the basic weighted average number of ordinary shares.*

(2)

*Non-hedge derivatives in the income statement comprise the change in fair value of all non-hedge derivatives as follows:*

- Open positions: The change in fair value from the previous reporting date or date of recognition (if later) through to the current reporting date; and*
- Settled positions: The change in fair value from the previous reporting date or date of recognition (if later) through to the date of settlement.*

*Headline earnings adjusted for the effect of unrealised non-hedge derivatives, fair value gain (loss) on convertible bond and interest rate swaps, is intended to illustrate earnings after adjusting for:*

- positions settled in the period; and*
- Investment in hedge restructure transaction: During the hedge restructure in the quarters ended 31 December 2004 and 31 Mar, 2005, \$83m and \$69m in cash was injected into the hedge book to increase the value of long-dated contracts. This investment in long-dated derivatives (all of which have not yet matured), for the purposes of the adjustment to earnings, will only be taken into account when the long-dated contracts are settled.*

From time to time AngolGold Ashanti may publicly disclose certain "non-GAAP" financial measures in the course of our financial presentations, earnings releases, earnings conference calls and otherwise.

The group utilises certain non-GAAP performance measures and ratios in managing our business and may provide users of this financial information with additional meaningful comparisons between current results and results in prior operating periods. Non-GAAP financial measures should be viewed in addition to, and not as

an alternative for, our reported operating results or cash flow from operations or any other measure of performance prepared in accordance with GAAP. In addition,

our presentation of these measures may not be comparable to similarly titled measures other companies use.

1  
 The yield is calculated on gold placed into leach pad inventory / tonnes placed on to leach pad.

3  
 The yield of Sunrise Dam, Iduapriem and Siguiriri represents open-pit operations.

2  
 The yield of TauTona, AngloGold Ashanti Mineração and Obuasi represents

4  
 Yatela and Cripple Creek & Victor Joint Venture operations yield reflects gold underground operations.  
 placed/tonnes placed.

5  
 The yield of Bibiani represents surface and dump reclamation.  
*Rounding of figures may result in computational discrepancies.*

1

The yield is calculated on gold placed into leach pad inventory / tons placed on to leach pad.

3

The yield of Sunrise Dam, Iduapriem and Siguirí represents open-pit operations.

2

The yield of TauTona, AngloGold Ashanti Mineração and Obuasi represents

4

Yatela and Cripple Creek & Victor Joint Venture operations yield reflects gold underground operations.

placed/tons placed.

5

The yield of Bibiani represents surface and dump reclamation.

*Rounding of figures may result in computational discrepancies.*

*Rounding of figures may result in computational discrepancies.*

Certain statements contained in this document, including, without limitation, those concerning the economic outlook for the gold mining industry, expectations regarding gold prices and production, the completion and commencement of commercial operations of certain of AngloGold Ashanti's exploration and production projects, and its liquidity and capital resources and expenditure, contain certain forward-looking statements regarding AngloGold Ashanti's operations, economic performance and financial condition. Although AngloGold Ashanti believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, changes in economic and market conditions, success of business and operating initiatives, changes in the regulatory environment and other government actions, fluctuations in gold prices and exchange rates, and business and operational risk management. AngloGold Ashanti undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date of the annual report on Form 20-F or to reflect the occurrence of unanticipated events. All subsequent written or oral forward-looking statements attributable to AngloGold Ashanti or any person acting on its behalf are qualified by the cautionary statements herein. For a discussion on such risk factors, refer to AngloGold Ashanti's annual report on Form 20-F for the year ended 31 December 2005 dated 17 March 2006, which was filed with the Securities and Exchange Commission (SEC) on 20 March 2006.
