WESTERN ALLIANCE BANCORPORATION AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of operation

WAL, incorporated under the laws of the state of Delaware, is a bank holding company headquartered in Phoenix, Arizona. WAL provides full service banking and related services to locally owned businesses, professional firms, real estate developers and investors, local non-profit organizations, high net worth individuals and other consumers through its wholly-owned subsidiary bank: WAB, doing business as ABA in Arizona, as FIB in Northern Nevada, as BON in Southern Nevada, as TPB in California, and as AAB throughout the U.S. In addition, the Company has two non-bank subsidiaries: WAEF, which offers equipment finance services nationwide, and LVSP, which holds and manages certain non-performing loans and OREO.

Effective July 1, 2014, WAEF was contributed to WAB by the Parent.

Basis of presentation

The accounting and reporting policies of the Company are in accordance with GAAP and conform to practices within the financial services industry. The accounts of the Company and its consolidated subsidiaries are included in the unaudited Consolidated Financial Statements.

Use of estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant changes in the near term relate to the determination of the allowance for credit losses; estimated cash flows related to PCI loans; fair value determinations related to acquisitions; and determination of the valuation allowance related to deferred tax assets. Although management believes these estimates to be reasonably accurate, actual amounts may differ. In the opinion of management, all adjustments considered necessary have been reflected in the unaudited Consolidated Financial Statements.

Principles of consolidation

On December 31, 2013, the Company consolidated its three bank subsidiaries under one bank charter, WAB. As the subsidiary bank mergers did not meet the definition of a business combination under the guidance of ASC 805, Business Combinations, the entities were combined in a method similar to a pooling of interests.

As of June 30, 2014, WAL has nine wholly-owned subsidiaries: WAB, WAEF, LVSP and six unconsolidated subsidiaries used as business trusts in connection with issuance of trust-preferred securities.

WAB has the following wholly-owned subsidiaries: WAB Investments, Inc., BON Investments, Inc., and TPB Investments, Inc., which hold certain investment securities, municipal loans and leases; BW Real Estate, Inc., which operates as a real estate investment trust and holds certain of WAB's real estate loans and related securities; and BW Nevada Holdings, LLC, which owns the Company's 2700 West Sahara Avenue, Las Vegas, Nevada office building. As described above, WAEF was contributed to WAB by WAL on July 1, 2014.

The Company does not have any other significant entities that should be considered for consolidation. All significant intercompany balances and transactions have been eliminated in consolidation.

Reclassifications

Certain amounts in the consolidated financial statements as of December 31, 2013 and for the three and six months ended June 30, 2013 have been reclassified to conform to the current presentation. The reclassifications have no effect on net income or stockholders' equity as previously reported.

Table of Contents

Interim financial information

The accompanying unaudited Consolidated Financial Statements as of and for the three and six months ended June 30, 2014 and 2013 have been prepared in condensed format and, therefore, do not include all of the information and footnotes required by GAAP for complete financial statements. These statements have been prepared on a basis that is substantially consistent with the accounting principles applied to the Company's audited Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

The information furnished in these interim statements reflects all adjustments which are, in the opinion of management, necessary for a fair statement of the results for each respective period presented. Such adjustments are of a normal, recurring nature. The results of operations in the interim statements are not necessarily indicative of the results that may be expected for any other quarter or for the full year. The interim financial information should be read in conjunction with the Company's audited Consolidated Financial Statements.

Business combinations

Business combinations are accounted for under the acquisition method of accounting in accordance with ASC 805. Under the acquisition method, the acquiring entity in a business combination recognizes all of the acquired assets and assumed liabilities at their estimated fair values as of the date of acquisition. Any excess of the purchase price over the fair value of net assets and other identifiable intangible assets acquired is recorded as goodwill. To the extent the fair value of net assets acquired, including identified intangible assets, exceeds the purchase price, a bargain purchase gain is recognized. Assets acquired and liabilities assumed from contingencies are also recognized at fair value, if the fair value can be determined during the measurement period. Results of operations of an acquired business are included in the income statement from the date of acquisition. Acquisition-related costs, including conversion and restructuring charges, are expensed as incurred.

Investment securities

Investment securities may be classified as HTM, AFS or trading. The appropriate classification is initially decided at the time of purchase. Securities classified as HTM are those debt securities that the Company has both the intent and ability to hold to maturity regardless of changes in market conditions, liquidity needs or general economic conditions. These securities are carried at amortized cost. The sale of a security within three months of its maturity date or after the majority of the principal outstanding has been collected is considered a maturity for purposes of classification and disclosure. See "Note 2. Investment Securities" of these Notes to Unaudited Consolidated Financial Statements for further discussion regarding the Company's HTM portfolio as of June 30, 2014.

Securities classified as AFS or trading are reported as an asset on the Consolidated Balance Sheets at their estimated fair value. As the fair value of AFS securities changes, the changes are reported net of income tax as an element of OCI, except for impaired securities. When AFS securities are sold, the unrealized gain or loss is reclassified from OCI to non-interest income. The changes in the fair values of trading securities are reported in non-interest income.

Securities classified as AFS are both equity and debt securities that the Company intends to hold for an indefinite period of time, but not necessarily to maturity. Any decision to sell a security classified as AFS would be based on various factors, including significant movements in interest rates, changes in the maturity mix of the Company's assets and liabilities, liquidity needs, decline in credit quality, and regulatory capital considerations.

Interest income is recognized based on the coupon rate and increased by accretion of discounts earned or decreased by the amortization of premiums paid over the contractual life of the security using the interest method. For mortgage-backed securities, estimates of prepayments are considered in the constant yield calculations.

In estimating whether there are any OTTI losses, management considers the 1) length of time and the extent to which the fair value has been less than amortized cost; 2) financial condition and near term prospects of the issuer; 3) impact of changes in market interest rates; and 4) intent and ability of the Company to retain its investment for a period of time sufficient to allow for any anticipated recovery in fair value and it is not more likely than not the Company would be required to sell the security.

Declines in the fair value of individual AFS debt securities that are deemed to be other than temporary are reflected in earnings when identified. The fair value of the debt security then becomes the new cost basis. For individual debt securities where the Company does not intend to sell the security and it is not more likely than not that the Company will be required to sell the security before recovery of its amortized cost basis, the other than temporary decline in fair

value of the debt security related to 1) credit loss is recognized in earnings; and 2) market or other factors is recognized in other comprehensive income or loss. A credit loss is recorded if the present value of cash flows is less than amortized cost.

Table of Contents

For individual debt securities where the Company intends to sell the security or more likely than not will not recover all of its amortized cost, the OTTI is recognized in earnings equal to the entire difference between the securities cost basis and its fair value at the balance sheet date. For individual debt securities for which a credit loss has been recognized in earnings, interest accruals and amortization and accretion of premiums and discounts are suspended when the credit loss is recognized. Interest received after accruals have been suspended is recognized on a cash basis. Loans, interest and fees from loans

The Company generally holds loans for investment and has the intent and ability to hold loans until their maturity. Therefore, they are reported at book value. Net loans are stated at the amount of unpaid principal, reduced by unearned loan fees and allowance for credit losses. In addition, the book value of loans that are subject to a fair value hedge is adjusted for changes in value attributable to the hedge benchmark interest rate risk. Purchased loans are recorded at estimated fair value on the date of purchase.

The Company may acquire loans through a business combination or in a purchase for which differences may exist between the contractual cash flows and the cash flows expected to be collected which is due, at least in part, to credit quality. Loans are evaluated individually to determine if there has been credit deterioration since origination. Such loans may then be aggregated and accounted for as a pool of loans based on common characteristics. When the Company acquires such loans, the yield that may be accreted (accretable yield) is limited to the excess of the Company's estimate of undiscounted cash flows expected to be collected over the Company's initial investment in the loan. The excess of contractual cash flows over the cash flows expected to be collected may not be recognized as an adjustment to yield, loss, or a valuation allowance. Subsequent increases in cash flows expected to be collected generally are recognized prospectively through adjustment of the loan's yield over the remaining life. Subsequent decreases to cash flows expected to be collected are recognized as impairment. The Company may not "carry over" or create a valuation allowance in the initial accounting for loans acquired under these circumstances. For additional information, see "Note 3. Loans, Leases and Allowance for Credit Losses" of these Notes to Unaudited Consolidated Financial Statements.

Interest income on loans is accrued daily using the effective interest method and recognized over the terms of the loans. Loan fees collected for the origination of loans less direct loan origination costs (net deferred loan fees) are amortized over the contractual life of the loan through interest income. If the loan has scheduled payments, the amortization of the net deferred loan fee is calculated using the interest method over the contractual life of the loan. If the loan does not have scheduled payments, such as a line of credit, the net deferred loan fee is recognized as interest income on a straight-line basis over the contractual life of the loan commitment. Commitment fees based on a percentage of a customer's unused line of credit and fees related to standby letters of credit are recognized over the commitment period.

When loans are repaid, any remaining unamortized balances of unearned fees, deferred fees and costs and premiums and discounts paid on purchased loans are accounted for through interest income.

Nonaccrual loans: For all loan types except credit cards, when a borrower discontinues making payments as contractually required by the note, the Company must determine whether it is appropriate to continue to accrue interest. Generally, the Company places loans in nonaccrual status and ceases recognizing interest income when the loan has become delinquent by more than 90 days or when management determines that the full repayment of principal and collection of interest is unlikely. The Company may decide to continue to accrue interest on certain loans more than 90 days delinquent if the loans are well secured by collateral and in the process of collection. Credit card loans and other personal loans are typically charged-off no later than 180 days delinquent.

For all loan types, when a loan is placed on nonaccrual status, all interest accrued but uncollected is reversed against interest income in the period in which the status is changed. Subsequent payments received from the customer are applied to principal and no further interest income is recognized until the principal has been paid in full or until circumstances have changed such that payments are again consistently received as contractually required. The Company occasionally recognizes income on a cash basis for non-accrual loans in which the collection of the remaining principal balance is not in doubt.

Impaired loans: A loan is identified as impaired when it is probable that interest and principal will not be collected according to the contractual terms of the original loan agreement. Generally, impaired loans are classified as

nonaccrual. However, in certain instances, impaired loans may continue on an accrual basis, such as loans classified as impaired due to doubt regarding collectability according to contractual terms, that are both fully secured by collateral and are current in their interest and principal payments. Impaired loans are measured for reserve requirements in accordance with ASC 310, Receivables, based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of the collateral less applicable disposition costs if the loan is collateral dependent. The amount of an impairment reserve, if any, and any subsequent changes are charged against the allowance for

Table of Contents

credit losses. In addition to our own internal loan review process, the FDIC may from time to time direct the Company to modify loan grades, loan impairment calculations or loan impairment methodology.

Troubled Debt Restructured Loans: A TDR loan is a loan on which the Company, for reasons related to a borrower's financial difficulties, grants a concession to the borrower that the Company would not otherwise consider. The loan terms that have been modified or restructured due to a borrower's financial situation include, but are not limited to, a reduction in the stated interest rate, an extension of the maturity or renewal of the loan at an interest rate below current market, a reduction in the face amount of the debt, a reduction in the accrued interest, extensions, deferrals, renewals and rewrites. A TDR loan is also considered impaired. Generally, a loan that is modified at an effective market rate of interest may no longer be disclosed as a TDR in years subsequent to the restructuring if it is performing based on the terms specified by the restructuring agreement. However, such loans continue to be considered impaired.

Allowance for credit losses

Credit risk is inherent in the business of extending loans and leases to borrowers. Like other financial institutions, the Company must maintain an adequate allowance for credit losses. The allowance for credit losses is established through a provision for credit losses charged to expense. Loans are charged against the allowance for credit losses when management believes that the contractual principal or interest will not be collected. Subsequent recoveries, if any, are credited to the allowance. The allowance is an amount believed adequate to absorb estimated probable losses on existing loans that may become uncollectable, based on evaluation of the collectability of loans and prior credit loss experience, together with other factors. The Company formally re-evaluates and establishes the appropriate level of the allowance for credit losses on a quarterly basis.

The Company's allowance for credit loss methodology incorporates several quantitative and qualitative risk factors used to establish the appropriate allowance for credit losses at each reporting date. Quantitative factors include our historical loss experience, delinquency and charge-off trends, collateral values, changes in the level of nonperforming loans and other factors. Qualitative factors include the economic condition of our operating markets and the state of certain industries. Specific changes in the risk factors are based on actual loss experience, as well as perceived risk of similar groups of loans classified by collateral type, purpose and term. An internal five-year loss history is also incorporated into the allowance calculation model. Due to the credit concentration of our loan portfolio in real estate secured loans, the value of collateral is heavily dependent on real estate values in Nevada, Arizona and California, which, in some cases, have declined substantially from their peak. While management uses the best information available to make its evaluation, future adjustments to the allowance may be necessary if there are significant changes in economic or other conditions. In addition, the FDIC and state bank regulatory agency, as an integral part of their examination processes, periodically review the Bank's allowances for credit losses, and may require us to make additions to our allowance based on their judgment about information available to them at the time of their examination. Management regularly reviews the assumptions and formulae used in determining the allowance and makes adjustments if required to reflect the current risk profile of the portfolio.

The allowance consists of specific and general components. The specific allowance relates to impaired loans. In general, impaired loans include those where interest recognition has been suspended, loans that are more than 90 days delinquent but because of adequate collateral coverage, income continues to be recognized, and other criticized and classified loans not paying substantially according to the original contract terms. For such loans, an allowance is established when the discounted cash flows, collateral value or observable market price of the impaired loan are lower than the carrying value of that loan, pursuant to ASC 310. Loans not collateral dependent are evaluated based on the expected future cash flows discounted at the original contractual interest rate. The amount to which the present value falls short of the current loan obligation will be set up as a reserve for that account or charged-off.

The Company uses an appraised value method to determine the need for a reserve on impaired, collateral dependent loans and further discounts the appraisal for disposition costs. Generally, the Company obtains independent collateral valuation analysis for each loan every twelve months.

The general allowance covers all non-impaired loans and is based on historical loss experience adjusted for the various qualitative and quantitative factors listed above.

Other assets acquired through foreclosure

Other assets acquired through foreclosure consist primarily of properties acquired as a result of, or in-lieu-of, foreclosure. Properties or other assets (primarily repossessed assets formerly leased) are classified as OREO and other repossessed property and are initially reported at fair value of the asset less estimated selling costs. Subsequent adjustments are based on the lower of carrying value or fair value, less estimated costs to sell the property. Costs related to the development or improvement of the assets are capitalized and costs related to holding the assets are charged to non-interest expense. Property is evaluated regularly to ensure the recorded amount is supported by its current fair value and valuation allowances.

Table of Contents

Derivative financial instruments

The Company uses interest-rate swaps to mitigate interest-rate risk associated with changes to 1) the fair value of certain fixed-rate financial instruments (fair value hedges) and 2) certain cash flows related to future interest payments on variable rate financial instruments (cash flow hedges).

The Company recognizes derivatives as assets or liabilities in the consolidated balance sheet at their fair value in accordance with ASC 815, Derivatives and Hedging. The accounting for changes in the fair value of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and, further, on the type of hedging relationship. On the date the derivative contract is entered into, the Company designates the derivative as a fair value hedge or cash flow hedge. Derivative instruments designated in a hedge relationship to mitigate exposure to changes in the fair value of an asset or liability attributable to a particular risk, such as interest rate risk, are considered fair value hedges. Derivative instruments designated in a hedge relationship to mitigate exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges.

For a fair value hedge, the effective portion of a change in the fair value of an instrument is recorded as a basis adjustment to the underlying hedged asset or liability. For a cash flow hedge, the effective portion of the change in the fair value of the derivative is recorded in AOCI and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. Any ineffective portion of the change in fair value of a cash flow hedge is recognized immediately in non-interest income in the consolidated income statement. Under both the fair value and cash flow hedge scenarios, changes in the fair value of derivatives not considered to be highly effective in hedging the change in fair value or the expected cash flows of the hedged item are recognized in earnings as non-interest income during the period of the change.

The Company documents its hedge relationships, including identification of the hedging instruments and the hedged items, as well as its risk management objectives and strategies for undertaking the hedge transaction at the time the derivative contract is executed. Both at inception and at least quarterly thereafter, the Company assesses whether the derivatives used in hedging transactions are highly effective (as defined in the guidance) in offsetting changes in either the fair value or cash flows of the hedged item. Retroactive effectiveness is assessed, as well as the continued expectation that the hedge will remain effective prospectively. The Company discontinues hedge accounting prospectively when it is determined that a hedge is no longer highly effective. When hedge accounting is discontinued on a fair value hedge that no longer qualifies as an effective hedge, the derivative continues to be reported at fair value on the consolidated balance sheet, but the carrying amount of the hedged item is no longer adjusted for future changes in fair value. The adjustment to the carrying amount of the hedged item that existed at the date hedge accounting is discontinued is amortized over the remaining life of the hedged item into earnings.

Derivative instruments that are not designated as hedges, so called free-standing derivatives, are reported in the consolidated balance sheet at fair value and the changes in fair value are recognized in earnings as non-interest income during the period of change.

The Company occasionally purchases a financial instrument or originates a loan that contains an embedded derivative instrument. Upon purchasing the instrument or originating the loan, the Company assesses whether the economic characteristics of the embedded derivative are clearly and closely related to the economic characteristics of the remaining component of the financial instrument (i.e., the host contract) and whether a separate instrument with the same terms as the embedded instrument would meet the definition of a derivative instrument. When it is determined that 1) the embedded derivative possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract, and 2) a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is separated from the host contract and carried at fair value. However, in cases where 1) the host contract is measured at fair value, with changes in fair value reported in current earnings, or 2) the Company is unable to reliably identify and measure an embedded derivative for separation from its host contract, the entire contract is carried on the consolidated balance sheet at fair value and is not designated as a hedging instrument.

Income taxes

The Company and its subsidiaries, other than BW Real Estate, Inc., file a consolidated federal tax return. Due to tax regulations, several items of income and expense are recognized in different periods for tax return purposes than for financial reporting purposes. These items represent temporary differences. Deferred taxes are provided on an asset and liability method, whereby deferred tax assets are recognized for deductible temporary differences and tax credit carryovers and deferred tax liabilities are recognized for taxable temporary differences. A temporary difference is the difference between the reported amount of an asset or liability and its tax basis. A deferred tax asset is reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effect of changes in tax laws and rates on the date of enactment.

Table of Contents

Off-balance sheet instruments

In the ordinary course of business, the Company has entered into off-balance sheet financial instrument arrangements consisting of commitments to extend credit and standby letters of credit. Such financial instruments are recorded in the consolidated financial statements when they are funded. They involve, to varying degrees, elements of credit risk in excess of amounts recognized in the consolidated balance sheets. Losses would be experienced when the Company is contractually obligated to make a payment under these instruments and must seek repayment from the borrower, which may not be as financially sound in the current period as they were when the commitment was originally made. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The Company enters into credit arrangements that generally provide for the termination of advances in the event of a covenant violation or other event of default. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the party. The commitments are collateralized by the same types of assets used as loan collateral. As with outstanding loans, the Company applies qualitative factors and utilization rates to its off-balance sheet obligations in determining an estimate of losses inherent in these contractual obligations. The estimate for credit losses on off-balance sheet instruments is included within other liabilities and the charge to income that establishes this liability is included in non-interest expense.

Fair values of financial instruments

The Company uses fair value measurements to record fair value adjustments to certain assets and liabilities. ASC 820, Fair Value Measurement, establishes a framework for measuring fair value and a three-level valuation hierarchy for disclosure of fair value measurement as well as enhances disclosure requirements for fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. The Company uses various valuation approaches, including market, income and/or cost approaches. ASC 820 establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions about the factors market participants would consider in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the reliability of inputs, as follows:

Level 1 - Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, prepayment speeds, volatilities, etc.) or model-based valuation techniques where all significant assumptions are observable, either directly or indirectly, in the market.

Level 3 - Valuation is generated from model-based techniques where one or more significant inputs are not observable, either directly or indirectly, in the market. These unobservable assumptions reflect the Company's own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques may include use of matrix pricing, discounted cash flow models and similar techniques.

The availability of observable inputs varies based on the nature of the specific financial instrument. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for instruments categorized in Level 3. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input

that is significant to the fair value measurement in its entirety.

Fair value is a market-based measure considered from the perspective of a market participant who holds the asset or owes the liability, rather than an entity-specific measure. When market assumptions are available, ASC 820 requires the Company to

Table of Contents

make assumptions regarding the assumptions that market participants would use to estimate the fair value of the financial instrument at the measurement date.

ASC 825, Financial Instruments, requires disclosure of fair value information about financial instruments, whether or not recognized in the balance sheet, for which it is practicable to estimate that value.

Management uses its best judgment in estimating the fair value of the Company's financial instruments; however, there are inherent limitations in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates presented herein are not necessarily indicative of the amounts the Company could have realized in a sales transaction at June 30, 2014 and December 31, 2013. The estimated fair value amounts for June 30, 2014 and December 31, 2013 have been measured as of period-end, and have not been reevaluated or updated for purposes of these Consolidated Financial Statements subsequent to those dates. As such, the estimated fair values of these financial instruments subsequent to the reporting date may be different than the amounts reported at the period-end. The information in "Note 12. Fair Value Accounting" in these Notes to Unaudited Consolidated Financial Statements should not be interpreted as an estimate of the fair value of the entire Company since a fair value calculation is only required for a limited portion of the Company's assets and liabilities.

Due to the wide range of valuation techniques and the degree of subjectivity used in making the estimate, comparisons between the Company's disclosures and those of other companies or banks may not be meaningful.

The following methods and assumptions were used by the Company in estimating the fair value of its financial instruments:

Cash and cash equivalents

The carrying amounts reported in the consolidated balance sheets for cash and due from banks approximate their fair value.

Money market and certificates of deposit investments

The carrying amounts reported in the consolidated balance sheets for money market investments approximate their fair value.

Investment securities

The fair values of U.S. Treasuries, corporate debt securities, mutual funds, and exchange-listed preferred stock are based on quoted market prices and are categorized as Level 1 in the fair value hierarchy.

The fair values of other investment securities were determined based on matrix pricing. Matrix pricing is a mathematical technique that utilizes observable market inputs including, for example, yield curves, credit ratings and prepayment speeds. Fair values determined using matrix pricing are generally categorized as Level 2 in the fair value hierarchy.

The Company owns certain CDOs for which quoted prices are not available. Quoted prices for similar assets are also not available for these investment securities. In order to determine the fair value of these securities, the Company has estimated the future cash flows and discount rate using third party quotes adjusted based on assumptions regarding the adjustments a market participant would assume necessary for each specific security. As a result of the lack of an active market, the resulting fair values have been categorized as Level 3 in the fair value hierarchy.

Restricted stock

WAB is a member of the FHLB system and maintains an investment in capital stock of the FHLB. WAB also maintains an investment in its primary correspondent bank. These investments are carried at cost since no ready market exists for them, and they have no quoted market value. The Company conducts a periodic review and evaluation of its FHLB stock to determine if any impairment exists. The fair values of these investments have been categorized as Level 2 in the fair value hierarchy.

Loans

Fair value for loans is estimated based on discounted cash flows using interest rates currently being offered for loans with similar terms to borrowers with similar credit quality and adjustments that the Company believes a market participant would consider in determining fair value based on a third party independent valuation. As a result, the fair value for certain loans disclosed in "Note 12. Fair Value Accounting" of these Notes to Unaudited Consolidated Financial Statements is categorized as Level 2 in the fair value hierarchy, excluding impaired loans which are categorized as Level 3.

Table of Contents

Accrued interest receivable and payable

The carrying amounts reported in the Consolidated Balance Sheets for accrued interest receivable and payable approximate their fair value. Accrued interest receivable and payable fair value measurements are classified as Level 3 in the fair value hierarchy.

Derivative financial instruments

All derivatives are recognized in the Consolidated Balance Sheets at their fair value. The fair value for derivatives is determined based on market prices, broker-dealer quotations on similar products or other related input parameters. As a result, the fair values have been categorized as Level 2 in the fair value hierarchy.

Deposits

The fair value disclosed for demand and savings deposits is by definition equal to the amount payable on demand at their reporting date (that is, their carrying amount), which the Company believes a market participant would consider in determining fair value. The carrying amount for variable-rate deposit accounts approximates their fair value. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on these deposits. The fair value measurement of the deposit liabilities disclosed in "Note 12. Fair Value Accounting" of these Notes to Unaudited Consolidated Financial Statements is categorized as Level 2 in the fair value hierarchy.

FHLB advances and other borrowings

The fair values of the Company's borrowings are estimated using discounted cash flow analyses, based on the market rates for similar types of borrowing arrangements. FHLB advances have been categorized as Level 2 in the fair value hierarchy due to their short durations. Other borrowings have been categorized as Level 3 in the fair value hierarchy.

Junior subordinated debt

Junior subordinated debt and subordinated debt are valued by comparing interest rates and spreads to an index relative to the ten-year treasury rate and discounting the contractual cash flows on the Company's debt using these market rates. Junior subordinated debt has been categorized as Level 3 in the fair value hierarchy.

Off-balance sheet instruments

Fair values for the Company's off-balance sheet instruments (lending commitments and standby letters of credit) are based on quoted fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing.

Recent accounting pronouncements

In February 2013, the FASB issued guidance within ASU 2013-04, Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation is Fixed at the Reporting Date. The amendments in ASU 2013-04 to Topic 405, Liabilities, provide guidance for the recognition, measurement, and disclosure of obligations resulting from joint and several liability arrangements for which the total amount of the obligation within the scope of the Update is fixed at the reporting date, except for obligations addressed with existing GAAP. The guidance requires an entity to measure those obligations as the sum of the amount the reporting entity agreed to pay on behalf of its co-obligors. The guidance also requires an entity to disclose the nature and amount of the obligation, as well as other information about those obligations. The amendment is effective retrospectively for reporting periods beginning after December 15, 2013. The adoption of this guidance did not have a material impact on the Company's Consolidated Financial Statements.

In July 2013, the FASB issued guidance within ASU 2013-11, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists. The amendments in ASU 2013-11 to Topic 740, Income Taxes, provide guidance on the financial statement presentation of unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. The adoption of this guidance did not have a material impact on the Company's Consolidated Financial Statements.

In January 2014, the FASB issued guidance within ASU 2014-01, Accounting for Investments in Qualified Affordable Housing Projects. The amendments in ASU 2014-01 to Topic 323, Equity Investments and Joint Ventures, provide guidance on accounting for investments by a reporting entity in flow-through limited liability entities that manage or invest in affordable

Table of Contents

housing projects that qualify for the low-income housing tax credit. The amendments permit reporting entities to make an accounting policy election to account for their investments in qualified affordable housing projects using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense (benefit). The amendments are effective for fiscal years, and interim periods within those years, beginning after December 31, 2014 and should be applied retrospectively to all periods presented, with early adoption permitted. All of the Company's LIHTC investments are within the scope of this guidance and the Company has adopted this amended guidance beginning on January 1, 2014. As a result, prior period financial information has been adjusted to conform to the amended guidance. See "Note 10. Income Taxes" for the impact that adoption had on the Company's financial condition and results of operations as well as additional disclosures required under these amendments. The adoption of this amended guidance did not have a significant impact on the Company's cash flows.

In January 2014, the FASB issued guidance within ASU 2014-04, Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure. The objective of the amendments in ASU 2014-04 to Topic 310, Receivables - Troubled Debt Restructurings by Creditors, is to clarify when an in substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be derecognized and the real estate property recognized. The amendments are effective for fiscal years, and interim periods within those years, beginning after December 31, 2014. An entity can elect to adopt the amendments using either a modified retrospective transition method or a prospective transition method. Early adoption is permitted. The adoption of this guidance is not expected to have a material impact on the Company's Consolidated Financial Statements.

In June 2014, the FASB issued guidance within ASU 2014-11, Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures. The amendments in ASU 2014-11 to Topic 860, Transfers and Servicing, change the accounting for repurchase-to-maturity transactions to secured borrowing accounting and, for repurchase financing arrangements, the amendments require separate accounting for a transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty, which will result in secured borrowing accounting for the repurchase agreement. An entity is required to present changes in accounting for transactions outstanding on the effective date as a cumulative-effect adjustment to retained earnings as of the beginning of the period of adoption. The accounting changes are effective for the first interim or annual period beginning after December 15, 2014. The amendments also require disclosure of information about certain transactions accounted for as a sale in which the transferor retains substantially all of the exposure to the economic return on the transferred financial assets through an agreement with the same counterparty. An entity will also be required to disclose information about repurchase agreements, securities lending transactions, and repurchase-to-maturity transactions that are accounted for as secured borrowings. The disclosure for certain transactions accounted for as a sale is required to be presented for interim and annual periods beginning after December 15, 2014 and the disclosure for repurchase agreements, securities lending transactions, and repurchase-to-maturity transactions accounted for as secured borrowings is required to be presented for annual periods beginning after December 15, 2014, and for interim periods beginning after March 15, 2015. The Company is in the process of evaluating the impact that adoption of this guidance will have on its Consolidated Financial Statements.

In June 2014, the FASB issued guidance within ASU 2014-12, Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period. The amendments in ASU 2014-12 to Topic 718, Compensation - Stock Compensation, provide explicit guidance on whether to treat a performance target that could be achieved after the requisite service period as a performance condition that affects vesting or as a nonvesting condition that affects the grant-date fair value of an award. The amendments are effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. Early adoption is permitted. An entity may elect to apply the amendments either prospectively to all awards granted or modified after the effective date or retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented in the financial statements and to all new or modified awards thereafter. The Company is in the process of evaluating the impact that adoption of this guidance will

have on its Consolidated Financial Statements.

Private label residential MBS) 414
Total securities measured at fair value) \$2,793

In May 2014, the Company's investment committee reassessed the Company's holdings in CDOs, and gave management the discretion to sell CDOs and to reinvest in higher investment grade securities. This change in intent, prior to maturity or recovery, necessitated a reclassification of all HTM securities to AFS. At the date of transfer, the securities had a total amortized cost of \$275.3 million and fair value of \$289.6 million. The Company recognized an unrealized gain of \$9.0 million, net of tax, in AOCI at the date of the transfer.

For additional information on the fair value changes of the securities measured at fair value, see the trading securities table in "Note 12. Fair Value Accounting" of these Notes to Unaudited Consolidated Financial Statements.

The Company conducts an OTTI analysis on a quarterly basis. The initial indication of OTTI for both debt and equity securities is a decline in the market value below the amount recorded for an investment, taking into account the severity and duration of the decline. Another potential indication of OTTI is a downgrade below investment grade. In determining whether an impairment is OTTI, the Company considers the length of time and the extent to which the market value has been below cost, recent events specific to the issuer, including investment downgrades by rating agencies and economic conditions of its industry, and the Company's ability and intent to hold the investment for a period of time sufficient to allow for any anticipated recovery. For marketable equity securities, the Company also considers the issuer's financial condition, capital strength and near-term prospects.

For debt securities and for ARPS that are treated as debt securities for the purpose of OTTI analysis, the Company also considers the cause of the price decline (general level of interest rates and industry and issuer specific factors), the issuer's financial condition, near-term prospects and current ability to make future payments in a timely manner, as well as the issuer's ability to service debt, and any change in agencies' ratings at the evaluation date from the acquisition date and any likely imminent action. For ARPS with a fair value below cost that is not attributable to the credit deterioration of the issuer, such as a decline in cash flows from the security or a downgrade in the security's rating below investment grade, the Company does not recognize an OTTI charge where it is able to assert that it has the intent and ability to retain its investment for a period of time sufficient to allow for any anticipated recovery in fair value.

The Company has reviewed securities for which there is an unrealized loss in accordance with its accounting policy for OTTI described above and determined that there were no impairment charges for the three and six months ended June 30, 2014 and 2013.

The Company does not consider any securities to be other-than-temporarily impaired as of June 30, 2014 and December 31, 2013. No assurance can be made that additional OTTI will not occur in future periods.

Table of Contents

Information pertaining to securities with gross unrealized losses at June 30, 2014 and December 31, 2013, aggregated by investment category and length of time that individual securities have been in a continuous loss position follows:

At June 30, 2014 and December 31, 2013, the Company's unrealized losses relate primarily to interest rate fluctuations, credit spread widening and reduced liquidity in applicable markets. The total number of securities in an unrealized loss position at June 30, 2014 was 125, compared to 252 at December 31, 2013. In analyzing an issuer's financial condition, management considers whether the securities are issued by the federal government or its agencies,

whether downgrades by bond rating agencies have occurred and industry analysis reports. Since material downgrades have not occurred and management does not intend to sell the debt securities in an unrealized loss position in the foreseeable future, none of the securities described in the above table or in this paragraph were deemed to be other than temporarily impaired.

At June 30, 2014, the net unrealized loss on trust preferred securities classified as AFS was \$6.4 million, compared with \$8.2 million at December 31, 2013. The Company actively monitors its debt and other structured securities portfolios classified as

Table of Contents

AFS for declines in fair value. At December 31, 2013, the gross unrealized loss on the corporate bond portfolio classified as HTM was \$3.8 million. As discussed previously, corporate debt securities classified as HTM at December 31, 2013 are now classified as AFS at June 30, 2014. The gross unrealized loss on the corporate bond portfolio has decreased to \$2.7 million at June 30, 2014. The FRB continues to express its intention to keep interest rates, particularly the Federal Funds rate, at historically low levels into 2015. The yields of most of the bonds in the portfolio are floating rate instruments tied to LIBOR. LIBOR rate levels are highly correlated to the Federal Funds rate, thus, the corporate bonds have had low floating rate yields, which have negatively affected their near-term anticipated returns and price levels.

The amortized cost and fair value of securities as of June 30, 2014, by contractual maturities, are shown below. The actual maturities of the MBS may differ from their contractual maturities because the loans underlying the securities may be repaid without any penalties due to borrowers that have the right to call or prepay obligations with or without call or prepayment penalties. Therefore, these securities are listed separately in the maturity summary.

	June 30, 2014

The reduction in interest income associated with loans on nonaccrual status was approximately \$0.3 million and \$1.2 million for the three months ended June 30, 2014 and 2013, respectively. For the six months ended June 30, 2014 and 2013, the reduction in interest income associated with loans on nonaccrual status was approximately \$1.3 million and \$2.5 million, respectively.

The Company utilizes an internal asset classification system as a means of reporting problem and potential problem loans. Under the Company's risk rating system, the Company classifies problem and potential problem loans as "Special Mention," "Substandard," "Doubtful," and "Loss." Substandard loans include those characterized by well-defined weaknesses and carry the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. Loans classified as Doubtful, or risk rated eight, have all the weaknesses inherent in those classified as Substandard with the added characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The final rating of Loss covers loans considered uncollectible and having such little recoverable value that it is not practical to defer writing off the asset. Loans that do not currently expose the Company to sufficient risk to warrant classification in one of the aforementioned categories, but possess weaknesses that deserve management's close attention, are deemed to be Special Mention. Risk ratings are updated, at a minimum, quarterly.

The table below reflects the recorded investment in loans classified as impaired:

	June 30, 2014	December 31, 2013
	(in thousands)	
Impaired loans with a specific valuation allowance under ASC 310	\$19,584	\$25,754
Impaired loans without a specific valuation allowance under ASC 310	144,286	152,623
Total impaired loans	\$163,870	\$178,377
Valuation allowance related to impaired loans	\$(3,507)	\$(5,280)

The following table presents impaired loans by class:

	June 30, 2014	December 31, 2013
	(in thousands)	
Commercial real estate		
Owner occupied	\$32,025	\$37,902
Non-owner occupied	68,415	73,152
Multi-family	—	—
Commercial and industrial		
Commercial	15,672	16,892
Leases	416	449
Construction and land development		
Construction	—	—
Land	20,147	23,069
Residential real estate	26,593	26,376
Consumer	602	537
Total	\$163,870	\$178,377

A valuation allowance is established for an impaired loan when the fair value of the loan is less than the recorded investment. In certain cases, portions of impaired loans are charged-off to realizable value instead of establishing a valuation allowance and are included, when applicable in the table above as "Impaired loans without a specific valuation allowance under ASC 310." However, before concluding that an impaired loan needs no associated valuation allowance, an assessment is made to consider all available and relevant information for the method used to evaluate impairment and the type of loan being assessed. The valuation allowance disclosed above is included in the allowance for credit losses reported in the Consolidated Balance Sheets as of June 30, 2014 and December 31, 2013.

Table of Contents

The following table presents the average investment in impaired loans by loan class:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013

Total	\$1,435	\$1,191	\$2,821	\$2,437

The Company is not committed to lend significant additional funds on these impaired loans.

Table of Contents

The following table summarizes nonperforming assets:

	June 30, 2014	December 31, 2013
	(in thousands)	
Nonaccrual loans	\$64,345	\$75,680
Loans past due 90 days or more on accrual status	3,001	1,534
Troubled debt restructured loans	89,703	89,576
Total nonperforming loans	157,049	166,790
Other assets acquired through foreclosure, net	59,292	66,719
Total nonperforming assets	\$216,341	\$233,509

Loans Acquired with Deteriorated Credit Quality

Changes in the accretable yield for loans acquired with deteriorated credit quality are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
	(in thousands)			
Balance, at beginning of period	\$26,831	\$4,993	\$28,164	\$7,072
Addition due to acquisition	—	22,318	—	22,318
Reclassification from non-accretable to accretable yield	1,564	1,047	3,030	1,047
Accretion to interest income	(1,798) (2,285) (4,202) (4,364
Reversal of fair value adjustments upon disposition of loans	(3,414) —	(3,809) —
Balance, at end of period	\$23,183	\$26,073	\$23,183	\$26,073

The primary drivers of reclassification from non-accretable to accretable yield resulted from changes in estimated cash flows.

Allowance for Credit Losses

For the first three quarters of 2013, the baseline historical loss rates were computed using a weighted ratio of the 1-year and 5-year historical loss rates. As the market environment improved throughout 2013 and shorter-term loss rates compressed below longer-term levels, the Company determined during the fourth quarter of 2013 that the 5-year historical loss rates were a better representation of longer-term expectations for probable losses. Accordingly, the allowance calculation for the quarter ended June 30, 2014 continues to apply a 100% weight to the 5-year historical loss rate (per loan category).

Table of Contents

Troubled Debt Restructurings

A TDR loan is a loan on which the Company, for reasons related to a borrower's financial difficulties, grants a concession to the borrower that the Company would not otherwise consider. The loan terms that have been modified or restructured due to a borrower's financial situation include, but are not limited to, a reduction in the stated interest rate, an extension of the maturity or renewal of the loan at an interest rate below current market, a reduction in the face amount of the debt, a reduction in the accrued interest, extensions, deferrals, renewals and rewrites. The majority of the Company's modifications are extensions in terms or deferral of payments which result in no lost principal or interest followed by reductions in interest rates or accrued interest. A TDR loan is also considered impaired.

Generally, a loan that is modified at an effective market rate of interest may no longer be disclosed as a TDR in years subsequent to the restructuring if it is not impaired based on the terms specified by the restructuring agreement.

However, such loans continue to be considered impaired.

The following table presents information on the financial effects of TDR loans by class for the periods presented:

Consumer	—	—	—	—	—	—	—	—
Total	3	\$ 398	—	\$ —	6	\$ 966	10	\$ 4,433

A TDR loan is deemed to have a payment default when it becomes past due 90 days, goes on nonaccrual, or is restructured again. Payment defaults, along with other qualitative indicators, are considered by management in the determination of the allowance for credit losses.

At June 30, 2014 and December 31, 2013, there were no loan commitments outstanding on TDR loans.

Loan Purchases and Sales

For the three months ended June 30, 2014 and 2013, the Company had secondary market loan purchases of \$16.7 million and \$87.5 million, respectively. For the six months ended June 30, 2014 and 2013, secondary market loan purchases totaled \$32.3 million and \$130.5 million, respectively. In addition, the Company periodically acquires newly originated loans at closing through participations or loan syndications.

The Company had no significant loan sales during the three and six months ended June 30, 2014 and 2013.

(1) Includes gains related to initial transfers to other assets of zero and \$23 thousand during the three months ended June 30, 2014 and 2013, respectively, pursuant to accounting guidance.

(2) Includes gains related to initial transfers to other assets of zero and \$345 thousand during the six months ended June 30, 2014 and 2013, respectively, pursuant to accounting guidance.

At June 30, 2014 and December 31, 2013, the majority of the Company's repossessed assets consisted of properties located in Nevada. The Company held approximately 65 properties at June 30, 2014, compared to 70 at December 31, 2013.

Table of Contents

5. OTHER BORROWINGS

The following table summarizes the Company's borrowings as of June 30, 2014 and December 31, 2013:

	June 30, 2014	December 31, 2013
	(in thousands)	
Short-Term:		
Revolving line of credit	\$—	\$3,000
FHLB advances	61,941	25,906
Total short-term borrowings	\$61,941	\$28,906
Long-Term:		
FHLB advances	\$211,155	\$247,973
Other long term debt	64,436	64,217
Total long-term borrowings	\$275,591	\$312,190

WAL maintains other lines of credit totaling \$70.0 million, of which \$25.0 million is secured by pledged securities and \$45.0 million is unsecured. As of June 30, 2014, there were no amounts outstanding on these lines of credit. In addition, the Bank has entered into Federal Reserve Funds credit line agreements with other financial institutions under which it can borrow up to \$120.0 million on an unsecured basis. There were no amounts outstanding on these lines of credit as of June 30, 2014. The lending institutions will determine the interest rate charged on funds at the time of the borrowing.

The Company maintains lines of credit with the FHLB and FRB. The Company's borrowing capacity is determined based on collateral pledged, generally consisting of investment securities and loans, at the time of the borrowing. At June 30, 2014, there were \$61.9 million of FHLB advances classified as short-term, with a weighted average interest rate of 2.87%. At December 31, 2013, short-term FHLB advances of \$25.9 million had a weighted average interest rate of 2.90%.

At June 30, 2014, there was \$211.2 million of FHLB advances classified as long-term and \$64.9 million of outstanding Senior Note principal, whose carrying value of \$64.4 million reflects a discount of \$0.5 million. The weighted average rate on all long-term debt was 3.18% and 3.45% at June 30, 2014 and December 31, 2013, respectively.

As of June 30, 2014 and December 31, 2013, the Company had additional available credit with the FHLB of approximately \$1.00 billion and \$1.39 billion, respectively, and with the FRB of approximately \$1.05 billion and \$588.2 million, respectively.

6. STOCKHOLDERS' EQUITY

Restricted Stock and Stock Options

For the three and six months ended June 30, 2014, 5,700 and 381,875 shares of restricted stock were granted to Company employees, respectively, that vest over three years and 64,000 shares were granted to non-employee WAL and WAB directors that were fully vested at June 30, 2014. The Company estimates the compensation cost for restricted stock grants based upon the grant date fair value. The aggregate grant date fair value for the restricted stock issued in the three and six months ended June 30, 2014 was \$0.1 million and \$10.7 million, respectively.

There were approximately 1.1 million and 1.2 million restricted shares outstanding at June 30, 2014 and December 31, 2013, respectively. For the three and six months ended June 30, 2014, the Company recognized \$4.2 million and \$4.5 million, respectively, in stock-based compensation expense related to restricted stock grants, compared to \$1.8 million and \$2.8 million, respectively, in expense for the three and six months ended June 30, 2013.

As of June 30, 2014 and December 31, 2013, there were 0.7 million and 1.0 million, respectively, of stock options outstanding.

Common Stock Issuance Under ATM Distribution Agreement

On June 4, 2014, the Company entered into a distribution agency agreement with Credit Suisse Securities (USA) LLC, under which the Company may sell shares of its common stock up to an aggregate offering price of \$100.0 million on the New York Stock Exchange. The Company pays Credit Suisse a mutually agreed rate, not to exceed 2% of the gross offering proceeds of the shares. The common stock will be sold at prevailing market prices at the time of

the sale or at negotiated prices and, as a result, prices will vary.

38

Table of Contents

Sales in the ATM offering are being made pursuant to a prospectus dated May 14, 2012 and a prospectus supplement filed with the SEC on June 4, 2014, in connection with one or more offerings of shares from the Company's shelf registration statement on Form S-3 (No. 333-181128). For the three and six months ended June 30, 2014, the Company sold 115,866 shares under the ATM offering at a weighted-average selling price of \$24.44 per share for gross proceeds of \$2.8 million. Total offering costs under the ATM program for the three and six months ended June 30, 2014 were \$0.2 million, of which less than \$0.1 million relates to compensation costs paid to Credit Suisse Securities.

7. ACCUMULATED OTHER COMPREHENSIVE INCOME

The following table summarizes the changes in accumulated other comprehensive loss by component, net of tax, for the periods indicated:

	Three Months Ended June 30, 2014			2013		
	Unrealized holding gains (losses) on AFS (in thousands)	Impairment loss on securities	Total	Unrealized holding gains (losses) on AFS	Unrealized gain on cash flow hedge	Total

	(76) (54) Income tax benefit
	\$ 127	\$ 89	Net of tax

8. DERIVATIVES AND HEDGING ACTIVITIES

The Company is a party to various derivative instruments, mainly through our subsidiary, WAB. Derivative instruments are contracts between two or more parties that have a notional amount and an underlying variable, require a small or no initial investment, and allow for the net settlement of positions. A derivative's notional amount serves as the basis for the payment provision of the contract, and takes the form of units, such as shares or dollars. A derivative's underlying variable is a specified interest rate, security price, commodity price, foreign exchange rate, index, or other variable. The interaction between the notional amount and the underlying variable determines the number of units to be exchanged between the parties and influences the fair value of the derivative contract.

The primary type of derivatives that the Company uses are interest rate swaps. Generally, these instruments are used to help manage the Company's exposure to interest rate risk and meet client financing and hedging needs.

Derivative assets and liabilities are recorded at fair value on the balance sheet, after taking into account the effects of bilateral collateral and master netting agreements. These agreements allow us to settle all derivative contracts held with a single counterparty on a net basis, and to offset net derivative positions with related cash collateral, where applicable.

At June 30, 2014, after taking into account the effects of master netting agreements, we had zero derivative assets and \$29.2 million of derivative liabilities that relate to contracts entered into for hedging purposes. As of June 30, 2014, the Company does not have any outstanding cash flow hedges or free-standing derivatives. As of December 31, 2013 and June 30, 2013, cash flow hedges were not significant, therefore, activity related to cash flow hedges is not separately presented in this Note.

Derivatives Designated in Hedge Relationships

The Company utilizes derivatives that have been designated as part of a hedge relationship in accordance with the applicable accounting guidance to minimize the exposure to changes in benchmark interest rates and volatility of net interest income and economic value of equity to interest rate fluctuations. The primary derivative instruments used to manage interest rate risk are interest rate swaps, which convert the contractual interest rate index of agreed-upon amounts of assets and liabilities (i.e., notional amounts) to another interest rate index.

The Company designates its "pay fixed/receive variable" interest rate swaps as fair value hedges. These contracts convert certain fixed-rate long-term loan assets into variable-rate assets, thereby modifying the Company's exposure to

changes in interest rates. As a result, the Company receives variable-rate interest payments in exchange for making fixed-rate payments over the lives of the contracts without exchanging the notional amounts.

Table of Contents

Fair Values, Volume of Activity, and Gain/Loss Information Related to Derivative Instruments

The following table summarizes the fair values of the Company's derivative instruments on a gross and net basis as of June 30, 2014, December 31, 2013, and June 30, 2013. The change in the notional amounts of these derivatives from December 31, 2013, to June 30, 2014, indicates the volume of our derivative transaction activity during the first six months of 2014. The notional amounts are not affected by bilateral collateral and master netting agreements. The derivative asset and liability balances are presented on a gross basis, prior to the application of bilateral collateral and master netting agreements. Total derivative assets and liabilities are adjusted to take into account the impact of legally enforceable master netting agreements that allow us to settle all derivative contracts with a single counterparty on a net basis and to offset the net derivative position with the related collateral. Where master netting agreements are not in effect or are not enforceable under bankruptcy laws, we do not adjust those derivative assets and liabilities with counterparties. The fair value of derivative contracts are included in "other assets" or "other liabilities" on the balance sheet, as indicated in the following table:

	June 30, 2014			December 31, 2013			June 30, 2013		
	Notional Amount	Fair Value Derivative Assets	Derivative Liabilities	Notional Amount	Fair Value Derivative Assets	Derivative Liabilities	Notional Amount	Fair Value Derivative Assets	Derivative Liabilities
(in thousands)									
Derivatives designated as hedging instruments:									
Fair value hedges									
Interest rate swaps	\$568,006	\$2	\$29,219	\$294,997	\$2,386	\$788	\$12,509	\$78	\$559
Total	568,006	2	29,219	294,997	2,386	788	12,509	78	559
Netting adjustments (1)	—	2	2	—	384	384	—	5	5
Net derivatives in the balance sheet	\$568,006	\$—	\$29,217	\$294,997	\$2,002	\$404	\$12,509	\$73	\$554

(1) Netting adjustments represent the amounts recorded to convert our derivative assets and liabilities from a gross basis to a net basis in accordance with the applicable accounting guidance.

Fair value hedges

The effective portion of a change in the fair value of an instrument is recorded as a basis adjustment to the underlying hedged asset or liability. The ineffective portion of a fair value hedge is recognized in income and recorded in "unrealized gains (losses) on assets / liabilities measured at fair value, net." An assessment of effectiveness is performed at both initiation of a hedge and on a quarterly basis thereafter. All of our fair value hedges remained "highly effective" as of June 30, 2014, December 31, 2013 and June 30, 2013.

The following table summarizes the pre-tax net gains (losses) on our fair value hedges for the three and six months ended June 30, 2014 and 2013, and where they are recorded in the income statement.

Income Statement Classification	Three Months Ended June 30, 2014		2013	
	Net Losses on Swaps	Net Gains on Loans	Net Gains on Swaps	Net Losses on Loans
Unrealized gains (losses) on assets / liabilities measured at fair value, net	(16,635) 16,795	210	(180) (a)
	Six Months Ended June 30, 2014		2013	
Income Statement Classification	Net Losses on Swaps	Net Gains on Loans	Net Gains on Swaps	Net Losses on Loans
	(in thousands)			

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

Unrealized gains (losses) on assets / liabilities (31,774) 31,570 298 (266) (a)
measured at fair value, net

(a) Net gains (losses) on loans represent the change in fair value caused by fluctuations in interest rates.

41

Table of Contents

Counterparty Credit Risk

Like other financial instruments, derivatives contain an element of credit risk. This risk is measured as the expected positive replacement value of the contracts. Management uses several means to mitigate and manage exposure to credit risk on derivative contracts. Management enters into bilateral collateral and master netting agreements that provide for the net settlement of all contracts with a single counterparty in the event of default. Additionally, management monitors counterparty credit risk exposure on each contract to determine appropriate limits on our total credit exposure across all product types. In general, the Company has a zero credit threshold with regard to derivative exposure with counterparties. Management reviews the Company's collateral positions on a daily basis and exchanges collateral with counterparties in accordance with standard ISDA documentation and other related agreements. The Company generally holds collateral in the form of highly rated securities issued by the U.S. Treasury or government-sponsored enterprises, such as GNMA, FNMA and FHLMC. The total collateral netted against net derivative liabilities totaled \$29.2 million at June 30, 2014, \$0.3 million at December 31, 2013, and \$0.4 million at June 30, 2013.

The following table summarizes our largest exposure to an individual counterparty at the dates indicated:

	June 30, 2014	December 31, 2013	June 30, 2013
	(in thousands)		
Largest gross exposure (derivative asset) to an individual counterparty	\$2	\$2,378	\$53
Collateral posted by this counterparty	—	2,002	—
Derivative liability with this counterparty	28,874	376	—
Collateral pledged to this counterparty	28,872	—	—
Net exposure after netting adjustments and collateral	—	—	53

Credit Risk Contingent Features

Management has entered into certain derivative contracts that require the Company to post collateral to the counterparties when these contracts are in a net liability position. Conversely, the counterparties post collateral when these contracts are in a net asset position. The amount of collateral to be posted is based on the amount of the net liability and exposure thresholds. As of June 30, 2014, the aggregate fair value of all derivative contracts with credit risk contingent features (i.e., those containing collateral posting provisions) held by the Company that were in a net liability position totaled \$29.2 million. The Company was in an over-collateralized net position of \$17.5 million after considering \$46.7 million of collateral held in the form of securities.

9. EARNINGS PER SHARE

Diluted earnings per share is based on the weighted average outstanding common shares during each period, including common stock equivalents. Basic earnings per share is based on the weighted average outstanding common shares during the period.

The following table presents the calculation of basic and diluted earnings per share for the three and six months ended June 30, 2014 and 2013.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
	(in thousands, except per share amounts)			
Weighted average shares - basic	86,501	85,659	86,379	85,493
Dilutive effect of stock awards	832	865	850	761
Weighted average shares - diluted	87,333	86,524	87,229	86,254
Net income available to common stockholders	\$35,186	\$33,719	\$65,918	\$54,252
Earnings per share - basic	0.41	0.39	0.76	0.63
Earnings per share - diluted	0.40	0.39	0.76	0.63

The Company had 4,000 and 163,300 stock options outstanding as of June 30, 2014 and December 31, 2013, respectively, that were not included in the computation of diluted earnings per common share because their effect would be anti-dilutive.

Table of Contents

10. INCOME TAXES

Deferred tax assets and liabilities are included in the Consolidated Financial Statements at currently enacted income tax rates applicable to the period in which the deferred tax assets or liabilities are expected to be realized or settled. As changes in tax laws or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes.

For the six months ended June 30, 2014, the net deferred tax assets decreased \$12.4 million to \$68.3 million. This overall decrease in the net deferred tax asset was primarily the result of decreases to deferred tax assets from exercises and forfeitures of equity compensation, changes in the fair market value of AFS securities and fair market value adjustments related to acquired loans, which were partially offset by increases to deferred tax assets from AMT credit and LIHTC carryovers, the Centennial return to provision adjustment along with a release of valuation allowance. Although realization is not assured, the Company believes that the realization of the recognized deferred tax asset of \$68.3 million at June 30, 2014 is more likely than not based on expectations as to future taxable income and based on available tax planning strategies within the meaning of ASC 740, Income Taxes, that could be implemented if necessary to prevent a carryover from expiring.

At June 30, 2014 and December 31, 2013, the Company had a \$4.2 million and a \$5.6 million deferred tax valuation allowance, respectively. As of June 30, 2014, \$2.8 million relates to net capital loss carryovers from the sale of preferred stock investments and the remaining valuation allowance of \$1.4 million relates to Arizona state NOL carryovers and IRC Section 382 limitations associated with the Company's acquisition of Western Liberty Bancorp. The deferred tax asset related to federal and state NOL carryovers outstanding at June 30, 2014 available to reduce tax liability in future years totaled \$9.5 million. This is comprised of \$8.3 million of tax benefits from federal NOL carryovers (subject to an annual limitation imposed by Section 382 of the IRC as discussed below) and \$1.2 million of tax benefits from Arizona state NOL carryovers that began to expire in 2013. The Company's ability to use federal NOL carryovers, as well as its ability to use certain future tax deductions called NUBILs associated with the Company's acquisitions of Western Liberty Bancorp and Centennial Bank, will be subject to separate annual limitations of \$1.8 million and \$1.6 million of deductions from taxable income, respectively. In management's opinion, it is more likely than not that the results of future operations will generate sufficient taxable income to realize all but \$1.4 million of the deferred tax benefits related to these NOL carryovers and NUBILs.

The Company's effective tax rate was 22.90% and 18.28% for the three months ended June 30, 2014 and 2013, respectively. For the six months ended June 30, 2014 and 2013, the Company's effective tax rate was 23.94% and 21.90%, respectively. The increase in the effective tax rate for the six months ended June 30, 2014 compared to the six months ended June 30, 2013 is due primarily to the bargain purchase gain related to the Centennial acquisition recorded in the second quarter of 2013 with no similar benefit recorded in 2014. The full impact of this effective tax rate increase was offset by the increase in the projected tax-exempt income for the year compared to the prior year.

Table of Contents

Investments in LIHTC

The Company invests in LIHTC funds that are designed to generate a return primarily through the realization of federal tax credits.

The Company adopted the amendments to ASC 323-740, issued in ASU 2014-01, as of January 1, 2014, which revises the accounting for investments in qualified affordable housing projects. As a result, the Company has adjusted its prior period financial statements to apply the proportional amortization methodology in accounting for these investments. This impacted the balance of tax credit investments and related current and deferred tax items on the consolidated balance sheets. In accordance with ASC 323-740, the tax credit investment amortization is now presented as a component of income tax expense. Previously, the amortization expense was included as a component of non-interest income.

The following table summarizes the impact of the change in the Consolidated Financial Statements for the periods indicated:

	December 31, 2013 (in thousands)
Consolidated Balance Sheet:	
Deferred tax assets, net	
As previously reported	\$79,374
As reported under new guidance	80,688
Other assets	
As previously reported (1)	186,288
As reported under new guidance	185,221
Stockholders' Equity	
As previously reported	855,251
As reported under new guidance	855,498

(1) Includes a \$14.6 million reclassification from premises and equipment, net.

Table of Contents

	Three Months Ended June 30, 2013 (in thousands)	Six Months Ended June 30, 2013

As reported under new guidance	0.39	0.63
Earnings per share applicable to common stockholders--diluted		
As previously reported	0.39	0.63
As reported under new guidance	0.39	0.63

The cumulative effect of adoption of this guidance at December 31, 2013 was an increase to stockholders' equity of \$0.2 million and a decrease to stockholder's equity of \$0.2 million at December 31, 2012.

Investments in LIHTC and unfunded LIHTC obligations are included as part of other assets and other liabilities, respectively, in the Consolidated Balance Sheet and total \$125.9 million and \$61.7 million, respectively, as of June 30, 2014. For the three and six months ended June 30, 2014, \$3.3 million and \$6.3 million of amortization related to LIHTC investments was recognized as a component of income tax expense, respectively.

11. COMMITMENTS AND CONTINGENCIES

Unfunded Commitments and Letters of Credit

The Company is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. They involve, to varying degrees, elements of credit risk in excess of amounts recognized in the consolidated balance sheets.

Lines of credit are obligations to lend money to a borrower. Credit risk arises when the borrower's current financial condition may indicate less ability to pay than when the commitment was originally made. In the case of standby letters of credit, the risk arises from the potential failure of the customer to perform according to the terms of a contract. In such a situation, the third party might draw on the standby letter of credit to pay for completion of the contract and the Company would look to its customer to repay these funds with interest. To minimize the risk, the Company uses the same credit policies in making commitments and conditional obligations as it would for a loan to that customer.

Standby letters of credit and financial guarantees are commitments issued by the Company to guarantee the performance of a customer to a third party in borrowing arrangements. The Company generally has recourse to recover from the customer any amounts paid under the guarantees. Typically, letters of credit issued have expiration dates within one year.

Table of Contents

A summary of the contractual amounts for unfunded commitments and letters of credit are as follows:

	June 30, 2014	December 31, 2013
	(in thousands)	
Commitments to extend credit, including unsecured loan commitments of \$217,598 at June 30, 2014 and \$237,063 at December 31, 2013	\$1,872,851	\$1,878,340
Credit card commitments and financial guarantees	35,805	33,632
Standby letters of credit, including unsecured letters of credit of \$6,311 at June 30, 2014 and \$4,896 at December 31, 2013	40,181	31,271
Total	\$1,948,837	\$1,943,243

Commitments to extend credit are agreements to lend to a customer provided that there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The Company enters into credit arrangements that generally provide for the termination of advances in the event of a covenant violation or other event of default. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the party. The commitments are collateralized by the same types of assets used as loan collateral. The Company has exposure to credit losses from unfunded commitments and letters of credit. As funds have not been disbursed on these commitments, they are not reported as loans outstanding. Credit losses related to these commitments are not included in the allowance for credit losses reported in "Note 3. Loans, Leases and Allowance for Credit Losses" of the unaudited consolidated financial statements and are accounted for as a separate loss contingency. This loss contingency for unfunded loan commitments and letters of credit was \$2.1 million and \$2.0 million as of June 30, 2014 and December 31, 2013, respectively. Changes to this liability are adjusted through non-interest expense.

Concentrations of Lending Activities

The Company's lending activities are driven in large part by the customers served in the market areas where the Company has branch offices in the states of Arizona, Nevada and California. Despite the geographic concentration of lending activities, the Company does not have a single external customer from which it derives 10% or more of its revenues. The Company monitors concentrations within five broad categories: geography, industry, product, call code, and collateral. The Company grants commercial, construction, real estate and consumer loans to customers through branch offices located in the Company's primary markets. The Company's business is concentrated in these areas and the loan portfolio includes significant credit exposure to the CRE market of these areas. As of June 30, 2014 and December 31, 2013, CRE related loans accounted for approximately 55% and 58% of total loans, respectively, and approximately 1% and 2%, respectively, of CRE related loans are secured by undeveloped land. Substantially all of these loans are secured by first liens with an initial loan to value ratio of generally not more than 75%. Approximately 45% and 46% of these CRE loans, excluding construction and land loans, were owner occupied at June 30, 2014 and December 31, 2013, respectively. In addition, approximately 3% and 4% of total loans were unsecured as of June 30, 2014 and December 31, 2013, respectively.

Contingencies

The Company is involved in various lawsuits of a routine nature that are being handled and defended in the ordinary course of the Company's business. Expenses are being incurred in connection with these lawsuits, but in the opinion of management, based in part on consultation with outside legal counsel, the resolution of these lawsuits and associated defense costs will not have a material impact on the Company's financial position, results of operations, or cash flows.

Lease Commitments

The Company leases the majority of its office locations and many of these leases contain multiple renewal options and provisions for increased rents. Total rent expense of \$1.7 million and \$1.9 million was included in occupancy expenses for the three months ended June 30, 2014 and 2013, respectively. For the six months ended June 30, 2014 and 2013, total rent expense was \$3.3 million and \$3.7 million, respectively.

Table of Contents

12. FAIR VALUE ACCOUNTING

The fair value of an asset or liability is the price that would be received to sell that asset or paid to transfer that liability in an orderly transaction occurring in the principal market (or most advantageous market in the absence of a principal market) for such asset or liability. In estimating fair value, the Company utilizes valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. Such valuation techniques are consistently applied. Inputs to valuation techniques include the assumptions that market participants would use in pricing an asset or liability. ASC 825 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 825 are described in "Note 1. Summary of Significant Accounting Policies" of these Notes to Unaudited Consolidated Financial Statements.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality and the Company's creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. Furthermore, the reported fair value amounts have not been comprehensively revalued since the presentation dates, and therefore, estimates of fair value after the balance sheet date may differ significantly from the amounts presented herein. A more detailed description of the valuation methodologies used for assets and liabilities measured at fair value is set forth below. Transfers between levels in the fair value hierarchy are recognized at the end of the reporting period.

Under ASC 825, the Company elected the FVO treatment for the junior subordinated debt and certain investment securities. This election is generally irrevocable and unrealized gains and losses on these items must be reported in earnings at each reporting date. The Company continues to account for these items under the FVO. Since adoption, there were no financial instruments purchased by the Company which met the ASC 825 fair value election criteria, and therefore, no additional instruments have been added under the FVO election.

All securities for which the fair value measurement option had been elected are included in a separate line item on the consolidated balance sheet entitled "securities measured at fair value."

For the three and six months ended June 30, 2014 and 2013, gains and losses from fair value changes included in the consolidated income statements were as follows:

	Changes in Fair Values for Items Measured at Fair Value Pursuant to Election of the Fair Value Option

Less: net gains and (losses) recognized during the period on trading securities sold during the period	—	—	—	—
Change in unrealized gains or (losses) for the period included in earnings for trading securities held at the end of the reporting period	\$(2)	\$(52)	\$16	\$(54)

Interest income on securities measured at fair value is accounted for similarly to those classified as AFS and HTM. Any premiums or discounts are recognized in interest income over the term of the securities. For mortgage-backed securities, estimates of prepayments are considered in the constant yield calculations. Interest expense on junior subordinated debt is also determined under a constant yield calculation.

Fair value on a recurring basis

Financial assets and financial liabilities measured at fair value on a recurring basis include the following:

AFS securities: ARPS securities, trust preferred securities, corporate debt securities and CRA mutual fund investments are reported at fair value utilizing Level 1 inputs. Other securities classified as AFS are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things.

Securities measured at fair value: All of the Company's securities measured at fair value, the majority of which are mortgage-backed securities, are reported at fair value utilizing Level 2 inputs in the same manner as described above for AFS securities.

Independent pricing service: Our independent pricing service provides pricing information on Level 1, 2 and 3 securities, and represents the pricing source for the majority of the portfolio. Management independently evaluates fair value measurements received from our third-party pricing service through multiple review steps. First, management reviews what has transpired in the marketplace with respect to interest rates, credit spreads, volatility, mortgage rates, among other things, and develops an expectation on changes to the securities valuations from the previous quarter.

Then management obtains market values from additional sources. The pricing service provides management with observable market data, including interest rate curves and mortgage prepayment speed grids, as well as dealer quote sheets, new bond offering sheets, and historical trade documentation. Management reviews the assumptions and decides whether they are reasonable. Management may compare interest rates, credit spreads and prepayments speeds used as part of the assumptions to those that management believes are reasonable. Management may price securities using the provided assumptions to determine whether they can develop similar prices on like securities. Any discrepancies with management's review and the prices provided by the vendor are discussed with the vendor

Table of Contents

and the Company's other valuation advisors. Last, management selects a sample of investment securities and compares the values provided by our primary third-party pricing service to the market values obtained from secondary sources and evaluates those with notable variances.

Annually, the Company receives an SSAE 16 report from its independent pricing service attesting to the controls placed on the operations of the service from its auditor.

Interest rate swaps: Interest rate swaps are reported at fair value utilizing Level 2 inputs. The Company obtains dealer quotations to value its interest rate swaps.

Junior subordinated debt: The Company estimates the fair value of its junior subordinated debt using a discounted cash flow model, which incorporates the effect of the Company's own credit risk in the fair value of the liabilities (Level 3). The Company's cash flow assumptions were based on the contractual cash flows as the Company anticipates that it will pay the debt according to its contractual terms. During 2013, the Company established and continues to use the BB 20-Year Index adjusted for a credit risk spread. The Company estimated the discount rate at 5.743%, which is a 551 basis point spread over 3 month LIBOR (0.231% as of June 30, 2014). As of December 31, 2013, the Company estimated the discount rate at 5.861%, which was a 562 basis point spread over 3 month LIBOR 0.246%.

The fair value of assets and liabilities measured at fair value on a recurring basis were determined using the following inputs at the periods presented:

	Fair Value Measurements at the End of the Reporting Period			Fair Value

Derivative liabilities	\$—	\$4,168	\$—	\$4,168
For the three and six months ended June 30, 2014 and 2013, the change in Level 3 liabilities measured at fair value on a recurring basis was as follows:				
Fair Value Measurements Using Significant Unobservable Inputs (Level 3)				
	Junior Subordinated Debt			
	Three Months Ended June 30,	Three Months Ended June 30,	Six Months Ended June 30,	Six Months Ended June 30,
	2014	2013	2014	2013
	(in thousands)			
Opening balance	\$(42,836)	\$(36,687)	\$(41,858)	\$(36,218)
Total losses for the period				
Included in earnings (and changes in net assets) (1)	125	(3,238)	(853)	(3,707)
Closing balance	\$(42,711)	\$(39,925)	\$(42,711)	\$(39,925)
Change in unrealized gains (losses) for the three month period included in earnings (and changes in net assets)	\$125	\$(3,238)	\$(853)	\$(3,707)

(1) Total gains (losses) for the period are included in the non-interest income line, unrealized gains (losses) on assets / liabilities measured at fair value, net.

For Level 3 liabilities measured at fair value on a recurring basis as of June 30, 2014 and December 31, 2013, the significant unobservable inputs used in the fair value measurements were as follows:

June 30, 2014	Significant Unobservable Inputs	Input Value
---------------	---------------------------------	-------------

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

	(dollars in thousands)	Valuation Technique			
Junior subordinated debt	\$42,711	Discounted cash flow	BB Corporate Bond over Treasury Index with comparable credit spread	5.743	%

50

Table of Contents

	December 31, 2013 (dollars in thousands)	Valuation Technique	Significant Unobservable Inputs	Input Value
Junior subordinated debt	\$41,858	Discounted cash flow	BB Corporate Bond over Treasury Index with comparable credit spread	5.861 %

The significant unobservable inputs used in the fair value measurement of the Company's junior subordinated debt are the calculated or estimated credit spreads on comparable publicly traded company trust preferred issuances, which were non-investment grade and non-rated. Significant increases (decreases) in these inputs could result in a significantly higher (lower) fair value measurement.

Fair value on a nonrecurring basis

Certain assets are measured at fair value on a nonrecurring basis. That is, the instruments are not measured at fair value on an ongoing basis, but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The following table presents such assets carried on the balance sheet by caption and by level within the ASC 825 hierarchy:

	Fair Value Measurements at the End of the Reporting Period Using			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Active Markets for Similar Assets (Level 2)	Unobservable Inputs (Level 3)
	(in thousands)			
As of June 30, 2014:				
Impaired loans with a specific valuation allowance	\$16,077	\$—	\$—	\$16,077
Impaired loans without a specific valuation allowance	91,533	—	—	91,533
Other assets acquired through foreclosure	59,292	—	—	59,292
December 31, 2013				
Impaired loans with a specific valuation allowance	\$20,474	\$—	\$—	\$20,474
Impaired loans without a specific valuation allowance	95,695	—	—	95,695
Other assets acquired through foreclosure	66,719	—	—	66,719

Impaired loans: The specific reserves for collateral dependent impaired loans are based on the fair value of the collateral. The fair value of collateral is determined based on third-party appraisals. Appraisals may utilize a single valuation approach or a combination of approaches, including comparable sales and the income approach. Fair value is determined, where possible, using market prices derived from an appraisal or evaluation, which are considered to be Level 2. However, certain assumptions and unobservable inputs are often used by the appraiser, therefore qualifying the assets as Level 3 in the fair value hierarchy. In some cases, adjustments are made to the appraised values due to various factors, including age of the appraisal (which are generally obtained every twelve months), age of comparables included in the appraisal and known changes in the market and in the collateral. When significant adjustments are based on unobservable inputs, such as when a current appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the resulting fair value measurement has been categorized as a Level 3 measurement. These Level 3 impaired loans had an aggregate carrying amount of \$19.6 million and \$25.8 million, respectively, at June 30, 2014 and December 31, 2013. Specific reserves in the allowance for loan losses for these loans were \$3.5 million and \$5.3 million, respectively, at June 30, 2014 and December 31, 2013.

Other assets acquired through foreclosure: Other assets acquired through foreclosure consist of properties acquired as a result of, or in-lieu-of, foreclosure. Properties or other assets classified as other assets acquired through foreclosure and other repossessed property are initially reported at the fair value determined by independent appraisals using appraised value, less estimated costs to sell. Such properties are generally re-appraised every six to twelve months. There is risk for subsequent volatility. Costs relating to the development or improvement of the assets are capitalized and costs relating to holding the assets are charged to expense. The Company had \$59.3 million of such assets at June 30, 2014. Fair value is determined, where possible, using market prices derived from an appraisal or evaluation, which are considered to be Level 2. However, certain assumptions and unobservable inputs are often used by the appraisal, therefore qualifying the assets as Level 3 in the fair value hierarchy. When significant adjustments are based on unobservable inputs, such as when a current appraised value is not

Table of Contents

available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the resulting fair value measurement has been categorized as a Level 3 measurement.

Credit vs. non-credit losses

Under the provisions of ASC 320, Investments-Debt and Equity Securities, OTTI is separated into the amount of total impairment related to the credit loss and the amount of the total impairment related to all other factors. The amount of the total OTTI related to the credit loss is recognized in earnings. The amount of the total impairment related to all other factors is recognized in OCI.

For the three and six months ended June 30, 2014 and 2013, the Company determined that no securities experienced credit losses.

The following table presents a rollforward of the amount related to impairment credit losses recognized in earnings for the six months ended June 30, 2013. As a result of the sale of these securities during the second quarter of 2013, there is no OTTI balance recognized in comprehensive income as of June 30, 2014.

Private Label Mortgage- Backed Securities	Six Months Ended June 30, 2013 (in thousands)
Beginning balance of impairment losses held in other comprehensive income	\$(1,811)
Current period OTTI credit losses recognized through earnings	—
Reductions for securities sold during the period	1,811
Additions or reductions in credit losses due to change of intent to sell	—
Reductions for increases in cash flows to be collected on impaired securities	—
Ending balance of net unrealized losses held in other comprehensive income	\$—

FAIR VALUE OF FINANCIAL INSTRUMENTS

Derivative liabilities	4,168	—	4,168	—	4,168

Interest rate risk

The Company assumes interest rate risk (the risk to the Company's earnings and capital from changes in interest rate levels) as a result of its normal operations. As a result, the fair values of the Company's financial instruments as well as its future net interest income will change when interest rate levels change and that change may be either favorable or unfavorable to the Company.

Interest rate risk exposure is measured using interest rate sensitivity analysis to determine our change in net portfolio value and net interest income resulting from hypothetical changes in interest rates. If potential changes to net portfolio value and net interest income resulting from hypothetical interest rate changes are not within the limits established by the Board of Directors, the Board may direct management to adjust the asset and liability mix to bring interest rate risk within Board-approved limits. As of June 30, 2014, the Company's interest rate risk profile was within Board-approved limits.

WAB has an ALCO charged with managing interest rate risk within the Board of Directors approved limits. Limits are structured to prohibit an interest rate risk profile that is unacceptable to both management and Board of Directors risk tolerances. There is also ALCO reporting at the holding company level for reviewing interest rate risk for the Consolidated Company.

Fair value of commitments

The estimated fair value of standby letters of credit outstanding at June 30, 2014 and December 31, 2013 was insignificant. Loan commitments on which the committed interest rates were less than the current market rate are also insignificant at June 30, 2014 and December 31, 2013.

Table of Contents

13. DISPOSITIONS

Discontinued Operations

The Company has discontinued its affinity credit card business and has presented these activities as discontinued operations. The following table summarizes the operating results of the discontinued operations for the periods indicated:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
	(in thousands)			
Operating revenue	\$ (214) \$ 1,132	\$ (358) \$ 2,271
Non-interest expenses	(511) (1,424) (1,369) (2,498

Income tax benefit	(221) (123) (569) (96
Net loss	\$ (504) \$ (169) \$ (1,158) \$ (131

14. SEGMENTS

On December 31, 2013, the Company consolidated its three bank subsidiaries under one charter, WAB. As a result, the Company has redefined its operating segments to reflect the new organizational and internal reporting structure. The realignment of the Company's segments resulted in significant differences from the old segmentation methodology. Some of the more substantial changes, which are effective as of January 1, 2014, include the following: Loans previously participated between WAB, BON and TPB were repatriated to the originating region in Arizona, Nevada, and California.

Expansion in the number of cost centers used, which involved transfers of employees to new or different costs centers. Implementation of a funds transfer pricing process that matches assets and liabilities with similar interest rate sensitivity and maturity characteristics to correspond to the employee movements as well as the loan repatriations and other asset movements.

Implementation of a new expense allocation methodology to allocate indirect costs across all segments based on key metrics.

All of the aforementioned changes were made as of the end of 2013 and were not retrospective. Consequently, the Company determined that recasting prior year segment information to conform to the new segmentation methodology would be impracticable due to the substantial time and cost that would be involved in recasting this information. Also, given the incomparability of the reporting segments between periods, the Company determined that disclosure of the reportable segment information for the period ended June 30, 2014, as previously reported under the old basis, would not be beneficial to the reader as it does not assist the reader in better understanding the Company's performance, assessing its prospects for future net cash flows or making more informed judgments about the Company as a whole, which are the primary objectives of ASC 280-10.

The new operating segments are as follows: Arizona, Nevada, California, National Business Lines, and Corporate & Other.

The Company's reportable segments are aggregated primarily based on geographic location, services offered and markets served. The Arizona, Nevada and California segments provide full service banking and related services to their respective markets although operations may not be domiciled in these states. The Company's National Business Lines segment provides banking services to niche markets. These National Business Lines are broader in geographic scope and are managed centrally. Corporate & Other consists of corporate-related items, income and expense items not allocated to our other reportable segments and inter-segment eliminations.

The Company's segment reporting process begins with the assignment of all loan and deposit accounts directly to the segments where these products are originated and/or serviced. Equity capital is assigned to each segment based on the risk profile of their assets and liabilities, which ranged from 0% to 12% during the period, with a funds credit provided for the use of this equity as a funding source. Any excess collateral above the allocated capital is assigned to the Corporate & Other segment.

Net interest income, provision for credit losses and non-interest expense amounts are recorded in their respective segment to the extent that the amounts are directly attributable to those segments. Net interest income is recorded in

each segment on a TEB with a corresponding increase in income tax expense.

54

Table of Contents

Further, net interest income of a reportable segment includes a funds transfer pricing process that matches assets and liabilities with similar interest rate sensitivity and maturity characteristics. Using this funds transfer pricing methodology, liquidity is transferred between "users" and "providers." A net user of funds has lending/investing in excess of deposits/borrowings and a net provider of funds has deposits/borrowings in excess of lending/investing. A segment which is a user of funds is then charged for the use of funds while a provider of funds is credited through funds transfer pricing which is determined based on the average life of the assets or liabilities in the portfolio. Net income amounts for each reportable segment is further derived by the use of expense allocations. Certain expenses not directly attributable to a specific segment are allocated across all segments based on key metrics, such as number of employees, average loan balances and average deposit balances. These types of expenses include information technology, operations, human resources, finance, risk management, credit administration, legal and marketing. Income taxes are applied to each segment based on the effective tax rate for the geographic location of the segment. Any difference in the corporate tax rate and the aggregate effective tax rates in the segments are adjusted in the Corporate & Other segment.

The following is a summary of selected operating segment information as of and for the three and six months ended June 30, 2014:

Item 2. Management's Discussions and Analysis of Financial Condition and Results of Operations.

This discussion is designed to provide insight into management's assessment of significant trends related to the Company's consolidated financial condition, results of operations, liquidity, capital resources and interest rate sensitivity. This Quarterly Report on Form 10-Q should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2013 and the interim unaudited Consolidated Financial Statements and Notes to Unaudited Consolidated Financial Statements hereto and financial information appearing elsewhere in this report. Unless the context requires otherwise, the terms "Company," "we," and "our" refer to Western Alliance Bancorporation and its wholly-owned subsidiaries on a consolidated basis.

Forward-Looking Information

Certain statements contained in this Quarterly Report on Form 10-Q for the quarter ended June 30, 2014 are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. The Company intends such forward-looking statements be covered by the safe harbor provisions for forward-looking statements. All statements other than statements of historical fact are "forward-looking statements" for purposes of federal and state securities laws, including statements that are related to or are dependent on estimates or assumptions relating to expectations, beliefs, projections, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts.

The forward-looking statements contained in this Form 10-Q reflect our current views about future events and financial performance and involve certain risks, uncertainties, assumptions and changes in circumstances that may cause our actual results to differ significantly from historical results and those expressed in any forward-looking statement, including those risks discussed under the heading "Risk Factors" in this Form 10-Q. Risks and uncertainties include those set forth in our filings with the SEC and the following factors that could cause actual results to differ materially from those presented: 1) financial market and economic conditions adversely effecting financial performance; 2) dependency on real estate and events that negatively impact real estate; 3) high concentration of commercial real estate, construction and development and commercial and industrial loans; 4) actual credit losses may exceed expected losses in the loan portfolio; 5) the geographic concentrations of our assets increase the risks related to local economic conditions; 6) sovereign credit rating downgrades; 7) exposure of financial instruments to certain market risks may cause volatility in earnings; 8) dependence on low-cost deposits; 9) ability to borrow from the FHLB or the FRB; 10) events that further impair goodwill; 11) a change in the our creditworthiness; 12) expansion strategies may not be successful; 13) risk associated with the recent consolidation of our bank subsidiaries; 14) our ability to compete in a highly competitive market; 15) our ability to recruit and retain qualified employees, especially seasoned relationship bankers and senior management; 16) the effects of terrorist attacks or threats of war; 17) perpetration of internet fraud; 18) information security breaches; 19) reliance on other companies' infrastructure; 20) risk management policies not fully effective; 21) risks associated with new lines of businesses; 22) risk of operating in a highly regulated industry and our ability to remain in compliance; 23) failure to comply with state and federal banking agency laws and regulations; 24) changes in interest rates and increased rate competition; 25) exposure to environmental liabilities related to the properties to which we acquire title; and 26) risks related to ownership and price of our common stock.

For more information regarding risks that may cause our actual results to differ materially from any forward-looking statements, see "Risk Factors" in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2013.

Financial Overview and Highlights

WAL is a bank holding company headquartered in Phoenix, Arizona, originally incorporated under the laws of the state of Nevada. On May 29, 2014, WAL was re-incorporated under the laws of the state of Delaware. WAL provides comprehensive business banking and related financial services through its wholly-owned subsidiary bank: WAB, doing business as ABA in Arizona, as FIB in Northern Nevada, as BON in Southern Nevada, as TPB in California, and as AAB throughout the U.S. In addition, the Company has two non-bank subsidiaries, WAEF, which offers equipment finance services nationwide, and LVSP, which holds and manages certain non-performing loans and OREO. On July 1, 2014, WAEF was contributed to WAB by WAL and is now a subsidiary of the Bank.

Financial Result Highlights for the Second Quarter of 2014

Net income available to common stockholders for the Company of \$35.2 million, or \$0.40 per diluted share, for the second quarter of 2014, compared to \$33.7 million, or \$0.39 per diluted share, for the second quarter of 2013. For the six months ended June 30, 2014, net income available to common stockholders was \$65.9 million, or \$0.76 per diluted share, compared to \$54.3 million, or \$0.63 per diluted share, for the six months ended June 30, 2013.

The significant factors impacting earnings of the Company during the second quarter of 2014 were:

57

Table of Contents

Pre-tax, pre-provision operating earnings (see Non-GAAP Financial Measures beginning on page 60) for the second quarter of 2014 increased \$7.3 million to \$47.4 million, compared to \$40.1 million for the second quarter of 2013. For the comparable six month periods, pre-tax, pre-provision operating earnings increased \$16.6 million to \$91.8 million, compared to \$75.2 million for the six months ended June 30, 2013.

The Company experienced loan growth of \$743.2 million to \$7.54 billion at June 30, 2014 from \$6.80 billion at December 31, 2013.

Other assets acquired through foreclosure declined by \$7.4 million to \$59.3 million at June 30, 2014 from \$66.7 million at December 31, 2013.

The Company increased deposits by \$631.3 million to \$8.47 billion at June 30, 2014 from \$7.84 billion at December 31, 2013.

Provision for credit losses for the second quarter of 2014 decreased by \$3.0 million to \$0.5 million, compared to \$3.5 million for the second quarter of 2013, as net charge-offs also declined by \$4.2 million to net recoveries of \$1.5 million in the second quarter of 2014, compared to net charge-offs of \$2.7 million for the second quarter of 2013. For the comparable six month periods, provision for credit losses decreased by \$4.9 million to \$4.0 million, compared to \$8.9 million for the six months ended June 30, 2013 as net charge-offs declined by \$9.9 million to net recoveries of \$1.9 million, compared to net charge-offs of \$8.0 million for the six months ended June 30, 2013.

Net interest margin increased to 4.39%, compared to 4.36% for the second quarter of 2013. For the comparable six month periods, net interest margin increased to 4.40%, compared to 4.36% for the six months ended June 30, 2013.

Key asset quality ratios improved at June 30, 2014 compared to December 31, 2013. Nonaccrual loans and repossessed assets to total assets improved to 1.23% from 1.53% at December 31, 2013 and nonaccrual loans to gross loans improved to 0.85% at the end of the second quarter of 2014 compared to 1.11% at December 31, 2013.

Tangible book value per share, net of tax, at June 30, 2014 increased by \$1.12 to \$9.02, compared to \$7.90 at December 31, 2013.

The impact to the Company from these items and others, of both a positive and negative nature, are discussed in more detail below as they pertain to the Company's overall comparative performance for the three and six months ended June 30, 2014.

Results of Operations and Financial Condition

A summary of our results of operations, financial condition and select metrics are included in the following tables:

	Three Months Ended June 30,		Six Months Ended June 30,		
	2014	2013	2014	2013	
	(in thousands, except per share amounts)				
Net income available to common stockholders	\$35,186	\$33,719	\$65,918	\$54,252

Loans, net of deferred loan fees and costs			7,544,567	6,801,415	
Total deposits			8,469,505	7,838,205	

Table of Contents

As a bank holding company, management focuses on key ratios in evaluating the Company's financial condition and results of operations.

Asset Quality

For all banks and bank holding companies, asset quality plays a significant role in the overall financial condition of the institution and results of operations. The Company measures asset quality in terms of nonaccrual loans as a percentage of gross loans and net charge-offs as a percentage of average loans. Net charge-offs are calculated as the difference between charged-off loans and recovery payments received on previously charged-off loans. The following table summarizes asset quality metrics:

	June 30, 2014	December 31, 2013	
	(in thousands)		
Non-accrual loans	\$64,345	\$75,680	
Non-performing assets	216,341	233,509	
Non-accrual loans to gross loans	0.85	%	1.11 %
Net (recoveries) charge-offs to average loans - annualized	(0.09)	0.13

Asset and Deposit Growth

The Company's assets and liabilities are comprised primarily of loans and deposits; therefore, the ability to originate new loans and attract new deposits is fundamental to the Company's growth. Total assets increased to \$10.02 billion at June 30, 2014 from \$9.31 billion at December 31, 2013. Total loans, net of deferred loan fees and costs, increased by \$743.2 million, or 10.9%, to \$7.54 billion as of June 30, 2014, compared to \$6.80 billion as of December 31, 2013. Total deposits increased \$631.3 million, or 8.1%, to \$8.47 billion as of June 30, 2014 from \$7.84 billion as of December 31, 2013.

RESULTS OF OPERATIONS

The following table sets forth a summary financial overview for the comparable periods:

	Three Months Ended		Increase	Six Months Ended		Increase
	June 30,	June 30,	(Decrease)	June 30,	June 30,	(Decrease)
	2014	2013		2014	2013	
	(in thousands, except per share amounts)					
Consolidated Income Statement Data:						
Interest income	\$101,973	\$89,285	\$12,688	\$200,674	\$172,393	\$28,281
Interest expense	8,075	7,133	942	15,999	14,038	1,961

Earnings per share applicable to common stockholders--diluted	\$0.40	\$0.39	\$0.01	\$0.76	\$0.63	\$0.13

Table of Contents

Non-GAAP Financial Measures

The following discussion and analysis contains financial information determined by methods other than those prescribed by GAAP. The Company's management uses these non-GAAP financial measures in their analysis of the Company's performance. These measurements typically adjust GAAP performance measures to exclude the effects of unrealized gains (losses) on assets/liabilities measured at fair value as well as other items to adjust income available to common shareholders for certain significant activities or transactions that, in management's opinion, do not reflect recurring period-to-period comparisons of the Company's performance. Since the presentation of these non-GAAP performance measures and their impact differ between companies, management believes presentation of these non-GAAP financial measures provide useful supplemental information that is essential to a complete understanding of the operating results of the Company's core businesses. These non-GAAP disclosures should not be viewed as a substitute for operating results determined in accordance with GAAP, nor are they necessarily comparable to non-GAAP performance measures that may be presented by other companies.

Pre-Tax, Pre-Provision Operating Earnings

Pre-tax, pre-provision operating earnings adjusts the level of earnings to exclude the impact of income taxes, provision for credit losses and non-recurring or other items not considered part of the Company's core operations. Management believes that eliminating the effects of these items makes it easier to analyze underlying performance trends and enables investors to assess the Company's earnings power and ability to generate capital to cover credit losses.

The following table shows the components of pre-tax, pre-provision operating earnings for the three and six months ended June 30, 2014 and 2013:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
	(in thousands)			
Total non-interest income	\$5,773	\$11,762	\$10,608	\$16,561
Less:				
Unrealized gains (losses) on assets/liabilities measured at fair value, net	235	(3,290)	(1,041)	(3,761)
Bargain purchase gain from acquisition	—	10,044	—	10,044
(Loss) gain on sales of investment securities, net	(163)	(5)	203	143
Legal settlements	—	—	—	38
Total operating non-interest income	5,701	5,013	11,446	10,097
Add: net interest income	93,898	82,152	184,675	158,355
Net operating revenue	\$99,599	\$87,165	\$196,121	\$168,452
Total non-interest expense	\$52,416	\$48,531	\$102,165	\$95,460
Less:

Pre-tax, pre-provision operating earnings	\$47,393	\$40,130	\$91,776	\$75,202

Table of Contents

Tangible Common Equity

The following table presents financial measures related to tangible common equity. Tangible common equity represents total stockholders' equity less identifiable intangible assets, goodwill and preferred stock. Management believes that tangible common equity financial measures are useful in evaluating the Company's capital strength, financial condition, and ability to manage potential losses. In addition, management believes that these measures improve comparability to other institutions that have not engaged in acquisitions that resulted in recorded goodwill and other intangibles.

	June 30, 2014	December 31, 2013	
	(dollars and shares in thousands)		
Total stockholders' equity	\$957,664	\$855,498	
Less:

Tier 1 Common Equity

The following tables present certain financial measures related to Tier 1 common equity, which is a component of Tier 1 risk-based capital. The FRB and other banking regulators have used Tier 1 common equity as a basis for assessing a bank's capital adequacy; therefore, management believes it is useful to assess financial condition and capital adequacy using this same basis. In addition, management believes that the classified assets to Tier 1 capital plus allowance measure is a critical regulatory metric for assessing asset quality.

Table of Contents

Net Interest Margin

The net interest margin is reported on a TEB. A tax equivalent adjustment is added to reflect interest earned on certain municipal securities and loans that are exempt from Federal income tax. The following tables set forth the average balances and interest income on a fully tax equivalent basis and interest expense for the periods indicated:

	Three Months Ended June 30, 2014			2013				
	Average Balance	Interest	Average Yield / Cost	Average Balance	Interest	Average Yield / Cost		
	(dollars in thousands)							
Interest earning assets								
Loans (1) (2) (3)	\$7,178,255	\$90,583	5.29	% \$6,100,831	\$81,093	5.40	%

Net interest income and margin (4)		\$93,898	4.39	%	\$82,152	4.36	%	
Net interest spread (5)			4.26	%		4.22	%	

(1) Yields on loans and securities have been adjusted to a tax equivalent basis. The taxable-equivalent adjustment was \$6.0 million and \$2.9 million for the three months ended June 30, 2014 and 2013, respectively.

(2) Net loan fees of \$1.0 million and \$1.2 million are included in the yield computation for the three months ended June 30, 2014 and 2013, respectively.

(3) Includes nonaccrual loans.

(4) Net interest margin is computed by dividing net interest income by total average earning assets.

(5)

Net interest spread represents average yield earned on interest-earning assets less the average rate paid on interest bearing liabilities.

(1) Changes due to both volume and rate have been allocated to volume changes.

Comparison of interest income, interest expense and net interest margin

The Company's primary source of revenue is interest income. Interest income for the three months ended June 30, 2014 was \$102.0 million, an increase of 14.2%, compared to \$89.3 million for the three months ended June 30, 2013. For the six months ended June 30, 2014, interest income was \$200.7 million, compared to \$172.4 million for the six months ended June 30, 2013. This increase was primarily the result of interest income from loans, which increased by \$9.5 million and \$21.6 million for the three and six months ended June 30, 2014, respectively, compared to the same periods in 2013. Interest income on investment securities increased \$3.1 million and \$6.2 million for the three and six months ended June 30, 2014, respectively, compared to the same periods in 2013. Average yield on interest earning assets increased 2 and 3 basis points for three and six months ended June 30, 2014, respectively, compared to the same period in 2013, which was primarily the result of an increase in yields on securities.

Interest expense for the three months ended June 30, 2014 was \$8.1 million, compared to \$7.1 million for the three months ended June 30, 2013, an increase of \$1.0 million, or 13.2%. For the six months ended June 30, 2014, interest expense was \$16.0 million, compared to \$14.0 million for the six months ended June 30, 2013. This increase was primarily driven by the increase in average interest bearing deposits of approximately \$1.10 billion from the prior year in the three and six month averages. Despite this increase, the average cost of interest bearing deposits remained flat at 0.32% for the three and six months ended June 30, 2014, compared to the same periods in 2013. Interest paid on short-term borrowings decreased by 8 and 13 basis points for the three and six months ended June 30, 2014, respectively, compared to the same periods in 2013. Interest paid on long-term debt increased by 77 and 42 for the three and six months ended June 30, 2014, respectively, compared to the same periods in 2013. Interest paid on junior subordinated debt decreased by 82 and 97 basis points, respectively, for the three and six months ended June 30, 2014, compared to the same periods in 2013.

Net interest income was \$93.9 million for the three months ended June 30, 2014, compared to \$82.2 million for the three months ended June 30, 2013, an increase of \$11.7 million, or 14.3%. For the six months ended June 30, 2014, net interest income was \$184.7 million, compared to \$158.4 million for the six months ended June 30, 2013. The

increase in net interest margin of 3 and 4 basis points for the three and six months ended June 30, 2014, respectively, compared to the same periods in 2013 was mostly due to an increase in our average yield on interest earning assets, primarily in investment securities, and a decrease in the average cost of funds related to short-term borrowings and junior subordinated debt.

Table of Contents

Provision for Credit Losses

The provision for credit losses in each period is reflected as a charge against earnings in that period. The provision is equal to the amount required to maintain the allowance for credit losses at a level that is adequate to absorb probable credit losses inherent in the loan portfolio. The provision for credit losses decreased by \$3.0 million, to \$0.5 million for the three months ended June 30, 2014, compared with \$3.5 million for the three months ended June 30, 2013. For the six months ended June 30, 2014, the provision for credit losses was \$4.0 million, compared to \$8.9 million for the six months ended June 30, 2013. The provision decrease for the three and six months ended June 30, 2014 compared to the same periods in 2013, was primarily due to an improvement in credit quality and historical credit losses as well as recent favorable recovery trends. The Company may establish an additional allowance for credit losses for the PCI loans through a charge to provision for loan losses when impairment is determined as a result of lower than expected cash flows. As of June 30, 2014 and December 31, 2013, the allowance for credit losses on PCI loans was \$0.1 million and \$0.3 million, respectively.

Non-interest Income

The following tables present a summary of non-interest income for the periods presented:

	Three Months Ended June 30,			Six Months Ended June 30,		
	2014	2013	Increase (Decrease)	2014	2013	Increase (Decrease)
	(in thousands)					
Service charges and fees	\$2,737	\$2,449	\$288	\$5,267	\$4,983	\$284
Income from bank owned life insurance	959	1,036	(77)	1,908	2,072	(164)
(Loss) gain on sales of investment securities, net	(163)	(5)	(158)	203	143	60
Unrealized gains (losses) on assets / liabilities measured at fair value, net	235	(3,290)	3,525	(1,041)	(3,761)	2,720
Bargain purchase gain from acquisition	—	10,044	(10,044)	—	10,044	(10,044)
Other fee revenue	860	943	(83)	1,968	1,900	68
Other income	1,145	585	560	2,303	1,180	1,123
Total non-interest income	\$5,773	\$11,762	\$(5,989)	\$10,608	\$16,561	\$(5,953)

Total non-interest income for the three months ended June 30, 2014 compared to the same period in 2013 decreased by \$6.0 million, or 50.9%. The decrease primarily relates to the non-recurring bargain purchase gain from the acquisition of Centennial Bank of \$10.0 million recognized during the three months ended June 30, 2013. This decrease was offset by the movement in unrealized gains and losses on assets / liabilities measured at fair value, net, which for the three months ended June 30, 2014 was a net gain of \$0.2 million, compared to a net loss of \$3.3 million for the three months ended June 30, 2013. This \$3.5 million increase primarily relates to the junior subordinated debt fair value adjustment gain of \$0.1 million for the three months ended June 30, 2014, compared to a loss of \$3.2 million for the same period in 2013. The decrease in non-interest income was further offset by an increase in other income of \$0.6 million due to an increase in operating lease originations during the period.

Total non-interest income for the six months ended June 30, 2014 compared to the same period in 2013 decreased by \$6.0 million, or 35.9%. The decrease primarily relates to the non-recurring bargain purchase gain from the acquisition of Centennial Bank of \$10.0 million recognized during the six months ended June 30, 2013. This decrease was offset by the movement in unrealized gains and losses on assets / liabilities measured at fair value, net, which for the six months ended June 30, 2014 was a net loss of \$1.0 million, compared to a net loss of \$3.8 million for the six months ended June 30, 2013. The decrease in the net loss primarily relates to the junior subordinated debt fair value adjustment loss of \$0.9 million for the six months ended June 30, 2014, compared to a loss of \$3.7 million for the same period in 2013. The \$1.1 million increase in other income is primarily due to an increase in other operating lease income as the Company originated more operating leases during the period.

Table of Contents

Non-interest Expense

The following table presents a summary of non-interest expenses for the periods presented:

	Three Months Ended June 30,			Six Months Ended June 30,		
	2014	2013	Increase (Decrease)	2014	2013	Increase (Decrease)
	(in thousands)					
Salaries and employee benefits	\$31,751	\$28,100	\$3,651	\$61,306	\$54,675	\$6,631
Occupancy	4,328	4,753	(425)	9,010	9,599	(589)
Legal, professional and directors' fees	4,192	2,550	1,642	7,831	5,572	2,259
Data processing	2,401	2,175	226	5,075	4,040	1,035
Insurance	2,087	2,096	(9)	4,480	4,466	14
Loan and repossessed asset expenses	927	721	206	2,161	2,317	(156)
Customer service	708	717	(9)	1,328	1,360	(32)
Marketing	506	710	(204)	1,065	1,378	(313)
Net loss (gain) on sales / valuations of repossessed and other assets	184	(1,124)	1,308	(2,363)	(605)	(1,758)
Intangible amortization	302	597	(295)	899	1,194	(295)
Merger / restructure expenses	26	2,620	(2,594)	183	2,815	(2,632)
Other expense	5,004	4,616	388	11,190	8,649	2,541
Total non-interest expense	\$52,416	\$48,531	\$3,885	\$102,165	\$95,460	\$6,705

Total non-interest expense for the three months ended June 30, 2014 compared to the same period in 2013 increased \$3.9 million, or 8.0%. This increase is primarily caused by increases in salaries and employee benefits of \$3.7 million, legal, professional and directors' fees of \$1.6 million, and the change from a net gain to a net loss on sales / valuations of repossessed and other assets, which increased non-interest expense by \$1.3 million from the three months ended June 30, 2013. The increase in the salaries and employee benefits is due to employment growth to support continued asset growth and information technology initiatives. The increase in legal, professional and directors' fees relates primarily to information technology initiatives. These increases are offset by the decrease in merger / restructure expenses of \$2.6 million, which were associated with the acquisition of Centennial Bank during the three months ended June 30, 2013.

Total non-interest expense for the six months ended June 30, 2014 compared to the same period in 2013 increased \$6.7 million, or 7.0%. This increase is primarily caused by increases in salaries and employee benefits of \$6.6 million, legal, professional and directors' fees of \$2.3 million, data processing of \$1.0 million, and other expense of \$2.5 million. The reasons for the increases in salaries and employee benefits and legal, professional and directors' fees are the same as for the comparable three month periods discussed above. The increase in data processing fees also relates to information technology initiatives and the largest increase in other expense relates to operating lease depreciation as a result of the increase in operating lease originations from the same period in 2013. These increases are offset by the decrease in merger / restructure expenses of \$2.6 million related to the acquisition of Centennial Bank during the second quarter 2013 and the \$1.8 million decrease in net gain on sales / valuations of repossessed and other assets due to a decrease in OREO sales from the six months ended June 30, 2013.

Discontinued Operations

The Company has discontinued its affinity credit card business and has presented these activities as discontinued operations. The following table summarizes the operating results of the discontinued operations for the periods indicated:

Business Segment Results

On December 31, 2013, the Company consolidated its three bank subsidiaries under one charter, Western Alliance Bank. As a result, the Company has redefined its operating segments to reflect the new organizational and internal reporting structure. Prior year segment information has not been recast to conform to the new segmentation methodology due to the impracticability of restating segments because of the change in legal structure at December 31, 2013. The new operating segments are as follows: Arizona, Nevada, California, National Business Lines and Corporate & Other.

Arizona reported net income of \$10.5 million and \$18.2 million for the three and six months ended June 30, 2014, respectively. At June 30, 2014, total loans were \$2.13 billion, an increase of \$98.7 million during the quarter and an increase of \$106.3 million during the year. In addition, total deposits at June 30, 2014 were \$2.12 billion, an increase of \$53.0 million during the quarter and an increase of \$115.2 million during the year.

Nevada reported net income of \$11.5 million and \$22.2 million for the three and six months ended June 30, 2014, respectively. Total loans decreased \$41.2 million during the quarter and decreased \$71.8 million during the year to \$1.68 billion at June 30, 2014. In addition, during the same period, total deposits grew by \$135.7 million and \$265.2 million, respectively, to \$3.19 billion at June 30, 2014.

California reported net income of \$8.1 million and \$14.1 million for the three and six months ended June 30, 2014, respectively. At June 30, 2014, total loans were \$1.69 billion, an increase of \$31.7 million during the quarter and an increase of \$79.6 million during the year. In addition, second quarter total deposits were \$2.06 billion, an increase of \$145.4 million during the quarter and an increase of \$116.2 million during the year.

National Business Lines reported net income of \$4.2 million and \$7.6 million for the three and six months ended June 30, 2014, respectively. Total loans increased by \$330.3 million during the quarter and increased \$600.9 million during the year to \$1.95 billion at June 30, 2014. In addition, during the same period, total deposits increased by \$13.5 million and \$118.3 million, respectively, to \$886.3 million at June 30, 2014.

BALANCE SHEET ANALYSIS

Total assets increased \$716.2 million, or 7.7%, to \$10.02 billion at June 30, 2014, compared to \$9.31 billion at December 31, 2013. The increase in assets primarily relates to the increase in loans of \$743.2 million, or 10.9%, to \$7.54 billion.

Total liabilities increased \$614.1 million, or 7.3%, to \$9.07 billion at June 30, 2014, compared to \$8.45 billion at December 31, 2013. The increase in liabilities is due to the increase in total deposits of \$631.3 million, or 8.1%, to \$8.47 billion.

Total stockholders' equity increased by \$102.2 million, or 11.9%, to \$957.7 million at June 30, 2014, compared to \$855.5 million at December 31, 2013. The increase in stockholders' equity is the result of net income available to common stockholders of \$65.9 million for the six months ended June 30, 2014, the movement of AOCI due to the decrease in unrealized losses on AFS securities, and the transfer of all of the Company's HTM securities to AFS during the quarter, which resulted in an increase to AOCI of \$7.3 million at June 30, 2014. In addition, to support the Company's continued growth, we raised \$2.6 million in net proceeds from the issuance of 115,866 shares of common stock through our ATM public offering.

Investment securities

Investment securities are classified at the time of acquisition as either HTM, AFS, or trading based upon various factors, including asset/liability management strategies, liquidity and profitability objectives, and regulatory requirements. HTM securities are carried at amortized cost, adjusted for amortization of premiums or accretion of discounts. AFS securities are securities that may be sold prior to maturity based upon asset/liability management decisions. Investment securities identified as AFS are carried at fair value. Unrealized gains or losses on AFS securities are recorded as AOCI in stockholders' equity. Amortization of premiums or accretion of discounts on MBS is periodically adjusted for estimated prepayments. Investment securities measured at fair value are reported at fair value, with unrealized gains and losses included in current period earnings.

The investment securities portfolio of the Company is utilized as collateral for borrowings, required collateral for public deposits and customer repurchase agreements, and to manage liquidity, capital and interest rate risk.

Table of Contents

The following table summarizes the carrying value of the investment securities portfolio at June 30, 2014 and December 31, 2013:

	June 30, 2014	December 31, 2013
	(in thousands)	
U.S. government sponsored agency securities	\$17,911	\$46,975
Municipal obligations	305,282	299,244
Preferred stock	73,219	61,484
Mutual funds	38,054	36,532
Residential MBS issued by GSEs	950,062	1,024,457
Commercial MBS issued by GSEs	2,084	—
Private label residential MBS	35,250	36,099
Private label commercial MBS	5,395	5,433
Trust preferred securities	25,582	23,805
CRA investments	23,930	24,882
Collateralized debt obligations	7,356	50
Corporate debt securities	95,940	97,777
Total investment securities	\$1,580,065	\$1,656,738

In May 2014, the Company's investment committee reassessed the Company's holdings in CDOs, and gave management the discretion to sell CDOs and to reinvest in higher investment grade securities. This change in intent, prior to maturity or recovery, necessitated a reclassification of all HTM securities to AFS. At the date of transfer, the securities had a total amortized cost of \$275.3 million and fair value of \$289.6 million. The Company recognized an unrealized gain of \$9.0 million, net of tax, in AOCI at the date of the transfer.

Gross unrealized losses at June 30, 2014 are primarily caused by interest rate fluctuations, credit spread widening and reduced liquidity in applicable markets. The Company has reviewed securities on which there is an unrealized loss in accordance with its accounting policy for OTTI securities described in "Note 2. Investment Securities" to the Consolidated Financial Statements contained herein. There were no impairment charges recorded during the three and six months ended June 30, 2014 and 2013.

The Company does not consider any securities to be other-than-temporarily impaired as of June 30, 2014 and December 31, 2013. However, the Company cannot guarantee that additional OTTI will not occur in future periods.

Loans

The table below summarizes the distribution of the Company's loans at the end of each of the periods indicated:

	June 30, 2014	December 31, 2013
	(in thousands)	
Commercial and industrial	\$2,804,819	\$2,236,740
Commercial real estate - non-owner occupied	1,940,017	1,843,415
Commercial real estate - owner occupied	1,604,986	1,561,862
Construction and land development	612,415	537,231
Residential real estate	328,115	350,312
Commercial leases	222,887	235,968
Consumer	40,948	45,153
Net deferred loan fees and costs	(9,620)	(9,266)
Loans, net of deferred fees and costs	7,544,567	6,801,415
Allowance for credit losses	(105,937)	(100,050)
Total	\$7,438,630	\$6,701,365

Table of Contents

Concentrations of Lending Activities

The Company's lending activities, including those within its National Business Lines, are driven in large part by the customers served in the market areas where the Company has branch offices in the states of Arizona, Nevada and California. As of June 30, 2014 and December 31, 2013, approximately 63% and 60%, respectively, of the customers in the Company's National Business Lines are located in these markets. The Company monitors concentrations within five broad categories: geography, industry, product, call report classifications, and collateral. The Company grants commercial, construction, real estate and consumer loans to customers through branch offices located in the Company's primary markets. The Company's business is concentrated in these areas and the loan portfolio includes significant credit exposure to the CRE market of these areas. As of June 30, 2014 and December 31, 2013, CRE related loans accounted for approximately 55% and 58% of total loans and approximately 1% and 2%, respectively, of CRE related loans are secured by undeveloped land. Substantially all of these loans are secured by first liens with an initial loan to value ratio of generally not more than 75%. Approximately 45% and 46% of these CRE loans, excluding construction and land loans, were owner occupied at June 30, 2014 and December 31, 2013, respectively. In addition, approximately 3% and 4% of total loans were unsecured as of June 30, 2014 and December 31, 2013, respectively. The Company is a participant in certain Shared National Credit loans, which make up approximately 7% and 5% of total loans as of June 30, 2014 and December 31, 2013, respectively.

Impaired loans

A loan is identified as impaired when it is probable that interest and principal will not be collected according to the contractual terms of the original loan agreement. Generally, impaired loans are classified as nonaccrual. However, in certain instances, impaired loans may continue on an accrual basis, such as loans classified as impaired due to doubt regarding collectability according to contractual terms, that are both fully secured by collateral and are current in their interest and principal payments. Impaired loans are measured for reserve requirements in accordance with ASC 310 based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of the collateral less applicable disposition costs if the loan is collateral dependent. The amount of an impairment reserve, if any, and any subsequent changes are charged against the allowance for credit losses.

Total nonaccrual loans and loans past due 90 days or more and still accruing decreased by \$9.9 million, or 12.8%, at June 30, 2014 to \$67.3 million from \$77.2 million at December 31, 2013.

	June 30, 2014	December 31, 2013
	(dollars in thousands)	
Total nonaccrual loans	\$64,345	\$75,680
Loans past due 90 days or more on accrual status	3,001	1,534
Total nonperforming loans	67,346	77,214
Troubled debt restructured loans	89,703	89,576
Other impaired loans	6,821	11,587
Total impaired loans	\$163,870	\$178,377
Other assets acquired through foreclosure, net	\$59,292	\$66,719
Nonaccrual loans to gross loans	0.85	% 1.11
Loans past due 90 days or more on accrual status to total loans	0.04	0.02
Interest income received on nonaccrual loans	\$565	\$626
Interest income that would have been recorded under the original terms of nonaccrual loans	312	1,626

Table of Contents

The composition of nonaccrual loans was as follows as of the dates indicated:

	At June 30, 2014			At December 31, 2013			
	Nonaccrual Balance (dollars in thousands)	Percent	Percent of Total Loans	Nonaccrual Balance	Percent	Percent of Total Loans	
Commercial and industrial	\$2,634	4.09	% 0.03	% \$3,753	4.96	% 0.06	%
Commercial real estate	46,582	72.40	0.62	54,856	72.48	0.80	
Construction and land development	2,161	3.36	0.03	4,525	5.98	0.07	
Residential real estate	12,767	19.84	0.17	12,480	16.49	0.18	
Consumer	201	0.31	—	66	0.09	—	
Total nonaccrual loans	\$64,345	100.00	% 0.85	% \$75,680	100.00	% 1.11	%

As of June 30, 2014 and December 31, 2013, nonaccrual loans totaled \$64.3 million and \$75.7 million, respectively. Nonaccrual loans by segment at June 30, 2014 were \$27.8 million for Arizona, \$14.7 million for Nevada, \$3.9 million for California, \$0.2 million for National Business Lines and \$17.8 million for Corporate & Other. Nonaccrual loans as a percentage of total gross loans were 0.85% and 1.11% at June 30, 2014 and December 31, 2013, respectively.

Nonaccrual loans as a percentage of each segment's total gross loans at June 30, 2014 were 1.30% for Arizona, 0.88% for Nevada, 0.23% for California, 0.01% for National Business Lines and 21.00% for Corporate & Other.

Troubled Debt Restructured Loans

A TDR loan is a loan, for reasons related to a borrower's financial difficulties, that is granted a concession that the lender would not otherwise consider. The loan terms that have been modified or restructured due to a borrower's financial situation include, but are not limited to, a reduction in the stated interest rate, an extension of the maturity or renewal of the loan at an interest rate below current market, a reduction in the face amount of the debt, a reduction in accrued interest, extensions, deferrals, renewals and rewrites. A TDR loan is also considered impaired. Generally, a loan that is modified at an effective market rate of interest is no longer disclosed as a TDR in years subsequent to the restructuring if it is performing based on the terms specified by the restructuring agreement. However, such loans continue to be considered impaired.

As of June 30, 2014 and December 31, 2013, the aggregate amount of loans classified as impaired was \$163.9 million and \$178.4 million, respectively, a net decrease of 8.1%. The total specific allowance for loan losses related to these loans was \$3.5 million and \$5.3 million at June 30, 2014 and December 31, 2013, respectively. As of June 30, 2014 and December 31, 2013, the Company had \$89.7 million and \$89.6 million, respectively, in loans classified as accruing restructured loans. Impaired loans by segment at June 30, 2014 were \$47.0 million for Arizona, \$57.3 million for Nevada and \$13.4 million for California. Additionally, National Business Lines and Corporate & Other held \$0.2 million and \$46.0 million, respectively, of impaired loans at June 30, 2014.

Table of Contents

The following tables present a breakdown of total impaired loans and the related specific reserves for the periods indicated:

Construction and land development	(78)	(238)	(78)	(852)
Residential real estate	(523)	(2,010)	(929)	(4,503)
Consumer	(5)	(18)	(17)	(293)
Total charged-off	(1,974)	(5,722)	(4,041)	(13,761)
Net recoveries (charge-offs)	1,531	(2,652)	1,880	(8,024)
Balance at end of period	\$ 105,937	\$ 96,323	\$ 105,937	\$ 96,323
Net recoveries (charge-offs) to average loans outstanding-annualized	0.09	% (0.17)%	0.05	% (0.27)%
Allowance for credit losses to gross loans	1.40	1.50		

The following table summarizes the allocation of the allowance for credit losses by loan type. However, allocation of a portion of the allowance to one category of loans does not preclude its availability to absorb losses in other categories.

	June 30, 2014			December 31, 2013		
	Amount	% of Total Allowance for Credit Losses	% of Loans to Gross Loans	Amount	% of Total Allowance for Credit Losses	% of Loans to Gross Loans
	(dollars in thousands)					
Commercial and industrial	\$42,861	40.5	% 40.2	% \$39,657	39.7	% 36.3
Commercial real estate	34,349	32.4	46.9	% 32,064	32.0	50.0
Construction and land development	16,873	15.9	8.1	% 14,519	14.5	7.9
Residential real estate	10,227	9.7	4.3	% 11,640	11.6	5.1
Consumer	1,627	1.5	0.5	% 2,170	2.2	0.7
Total	\$ 105,937	100.0	% 100.0	% \$ 100,050	100.0	% 100.0

The allowance for credit losses as a percentage of total loans decreased to 1.40% at June 30, 2014 from 1.47% at December 31, 2013. The total balance of the allowance for credit losses has increased due to the increase in the size of its loan portfolio; however, the increase in the allowance is not proportional to the increase in the portfolio as the Company has experienced improved credit quality in its portfolio as well as a change in portfolio mix toward higher rated credits.

Table of Contents

Potential Problem Loans

The Company classifies loans consistent with federal banking regulations using a nine category grading system. These loan grades are described in further detail in "Item 1. Business" of the Company's Annual Report Form 10-K for the year ended December 31, 2013. The following table presents information regarding potential problem loans, consisting of loans graded special mention, substandard, doubtful, and loss, but still performing, and excluding acquired loans:

	At June 30, 2014					
	Number of Loans	Loan Balance	Percent		Percent of Total Loans	
	(dollars in thousands)					
Commercial and industrial	66	\$20,504	15.41	%	0.27	%
Commercial real estate	67	91,240	68.59		1.21	
Construction and land development	7	14,023	10.54		0.19	
Residential real estate	14	6,738	5.07		0.09	
Consumer	11	518	0.39		0.01	
Total	165	\$133,023	100.00	%	1.77	%

	At December 31, 2013					
	Number of Loans	Loan Balance	Percent		Percent of Total Loans	
	(dollars in thousands)					
Commercial and industrial	68	\$15,532	14.05	%	0.23	%
Commercial real estate	63	71,390	64.55		1.05	
Construction and land development	7	13,357	12.08		0.20	
Residential real estate	20	8,988	8.13		0.13	
Consumer	17	1,317	1.19		0.02	
Total	175	\$110,584	100.00	%	1.63	%

Total potential problem loans are primarily secured by real estate.

(1) Includes gains related to initial transfers to other assets of zero and \$23 thousand during the three months ended June 30, 2014 and 2013, respectively, pursuant to accounting guidance.

(2) Includes gains related to initial transfers to other assets of zero and \$345 thousand during the six months ended June 30, 2014 and 2013, respectively, pursuant to accounting guidance.

Other assets acquired through foreclosure consist primarily of properties acquired as a result of, or in-lieu-of, foreclosure. Properties or other assets (primarily repossessed assets formerly leased) are classified as OREO and other repossessed property and are reported at the lower of carrying value or fair value, less estimated costs to sell the property. Costs relating to the development or improvement of the assets are capitalized and costs relating to holding the assets are charged to expense. The Company had \$59.3 million and \$66.7 million of such assets at June 30, 2014 and December 31, 2013, respectively. At June 30, 2014, the Company held approximately 65 properties, compared to 70 at December 31, 2013. When significant adjustments were based on unobservable inputs, such as when a current appraised value is not available or management determines the fair value of the collateral is further impaired below appraised value and there is no observable market price, the resulting fair value measurement has been categorized as a Level 3 measurement.

Goodwill and Other Intangible Assets

Goodwill represents the excess consideration paid for net assets acquired in a business combination over their fair value and is subsequently evaluated for impairment at least annually. The Company has goodwill of \$23.2 million and other intangibles, which consist primarily of core deposit intangibles, of \$3.3 million as of June 30, 2014. The Company performs its annual goodwill and intangibles impairment tests as of October 1 each year, or more often if events or circumstances indicate that the carrying value may not be recoverable. During the three and six months ended June 30, 2014, there were no events or circumstances that indicated an interim impairment test of goodwill or other intangible assets was necessary.

Table of Contents

Deferred Tax Asset

Western Alliance Bancorporation and its subsidiaries, other than BW Real Estate, Inc., file a consolidated federal tax return. Due to tax regulations and GAAP, several items of income and expense are recognized in different periods for tax return purposes than for financial reporting purposes. These items represent temporary differences. Deferred taxes are provided on an asset and liability method whereby deferred tax assets are recognized for deductible temporary differences and tax credit carryovers and deferred tax liabilities are recognized for taxable temporary differences. A temporary difference is the difference between the reported amounts of an asset or liability and its tax basis. A deferred tax asset is reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax asset will not be realized. Deferred tax assets and liabilities are adjusted for the effect of changes in tax laws and rates on the date of enactment.

Although realization is not assured, the Company believes that the realization of the net deferred tax asset is more likely than not based on expectations as to future taxable income and based on available tax planning strategies within the meaning of ASC 740 that could be implemented if necessary to prevent a carryover from expiring.

See "Note 10. Income Taxes" to the Consolidated Financial Statements for further discussion on income taxes.

Deposits

Deposits are the primary source for funding the Company's asset growth. At June 30, 2014, total deposits were \$8.47 billion, compared to \$7.84 billion at December 31, 2013. Total deposit growth of \$631.3 million, or 8.1%, was primarily driven by an increase in savings and money market deposits of \$327.0 million. WAB is a member of CDARS and ICS, which provide mechanisms for obtaining FDIC insurance on large deposits. At June 30, 2014, the Company had \$662.8 million of CDARS deposits and \$381.3 million of ICS deposits. At December 31, 2013, the Company had \$518.0 million of CDARS deposits and \$355.3 million of ICS deposits. At June 30, 2014 and December 31, 2013, the Company had \$175.8 million and \$174.2 million of wholesale brokered deposits, respectively.

The average balances and weighted average rates paid on deposits are presented below:

	Three Months Ended June 30,		2014		2013

Table of Contents

Short-Term Borrowed Funds

The Company from time to time utilizes short-term borrowed funds to support short-term liquidity needs generally created by increased loan demand. The majority of these short-term borrowed funds consist of advances from the FHLB and/or FRB, federal funds purchased and customer repurchase agreements. The Company's borrowing capacity with the FHLB and FRB is determined based on collateral pledged, generally consisting of securities and loans. In addition, the Company has borrowing capacity from other sources, pledged by securities, including securities sold under agreements to repurchase, which are reflected at the amount of cash received in connection with the transaction, and may require additional collateral based on the fair value of the underlying securities. At June 30, 2014, total short-term borrowed funds consisted of \$53.7 million of customer repurchases and FHLB advances of \$61.9 million. At December 31, 2013, total short-term borrowed funds consisted of \$71.2 million of customer repurchases, a revolving line of credit of \$3.0 million and FHLB advances of \$25.9 million.

Long-Term Debt

At June 30, 2014, there was \$211.2 million of FHLB advances classified as long-term and \$64.9 million of outstanding Senior Note principal, whose carrying value of \$64.4 million reflects a discount of \$0.5 million. At December 31, 2013, long-term debt consisted of FHLB advances of \$248.0 million and \$64.9 million of outstanding Senior Note principal with a carrying value of \$64.2 million.

Junior Subordinated Debt

The Company measures the balance of junior subordinated debt at fair value, which was \$42.7 million at June 30, 2014 and \$41.9 million at December 31, 2013.

Critical Accounting Policies

Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties and could potentially result in materially different results under different assumptions and conditions. The critical accounting policies upon which the Company's financial condition and results of operations depend, and which involve the most complex subjective decisions or assessments, are included in the discussion entitled "Critical Accounting Policies" in "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2013, and all amendments thereto, as filed with the SEC. There were no material changes to the critical accounting policies disclosed in the Annual Report on Form 10-K.

Liquidity

Liquidity is the ongoing ability to accommodate liability maturities and deposit withdrawals, fund asset growth and business operations and meet contractual obligations through unconstrained access to funding at reasonable market rates. Liquidity management involves forecasting funding requirements and maintaining sufficient capacity to meet the needs and accommodate fluctuations in asset and liability levels due to changes in our business operations or unanticipated events.

The ability to have readily available funds sufficient to repay fully maturing liabilities is of primary importance to depositors, creditors and regulators. Our liquidity, represented by cash and amounts due from banks, federal funds sold and non-pledged marketable securities, is a result of our operating, investing and financing activities and related cash flows. In order to ensure funds are available when necessary, on at least a quarterly basis, we project the amount of funds that will be required, and we strive to maintain relationships with a diversified customer base. Liquidity requirements can also be met through short-term borrowings or the disposition of short-term assets. The Company has unsecured Federal Reserve Funds credit lines with correspondent banks totaling \$120.0 million and other lines of credit with correspondent banks totaling \$70.0 million, of which \$25.0 million is secured and \$45.0 million is unsecured. As of June 30, 2014, there were no amounts drawn on the secured line of credit or the Federal Reserve Funds credit lines. In addition, loans and securities are pledged to the FHLB, providing \$1.50 billion in borrowing capacity, with outstanding borrowings and letters of credit of \$272.2 million and \$226.1 million, respectively, leaving \$1.00 billion in available credit as of June 30, 2014. Loans and securities pledged to the FRB discount window provided \$1.05 billion in borrowing capacity. As of June 30, 2014, there were no outstanding borrowings from the FRB, thus our available credit totaled \$1.05 billion.

The Company has a formal liquidity policy and, in the opinion of management, our liquid assets are considered adequate to meet cash flow needs for loan funding and deposit cash withdrawals for the next 90-120 days. At June 30, 2014, there was \$1.13 billion in liquid assets, comprised of \$380.7 million in cash and cash equivalents and \$752.1 million in unpledged marketable securities. At December 31, 2013, the Company maintained \$1.25 billion in liquid assets, comprised of \$309.7 million of cash and cash equivalents and \$938.0 million of unpledged marketable securities.

Table of Contents

The holding company maintains additional liquidity that would be sufficient to fund its operations and certain non-bank affiliate operations for an extended period should funding from normal sources be disrupted. Since deposits are taken by the bank operating subsidiary and not by the parent company, parent company liquidity is not dependent on the bank operating subsidiary's deposit balances. In our analysis of parent company liquidity, we assume that the parent company is unable to generate funds from additional debt or equity issuances, receives no dividend income from subsidiaries and does not pay dividends to shareholders, while continuing to make nondiscretionary payments needed to maintain operations and repayment of contractual principal and interest payments owed by the parent company and affiliated companies. Under this scenario, the amount of time the parent company and its non-bank subsidiaries can operate and meet all obligations before the current liquid assets are exhausted is considered as part of the parent company liquidity analysis. Management believes the Parent maintains adequate liquidity capacity to operate without additional funding from new sources for over 12 months. WAB maintains sufficient funding capacity to address large increases in funding requirements, such as deposit outflows. This capacity is comprised of liquidity derived from a reduction in asset levels and various secured funding sources.

On a long-term basis, the Company's liquidity will be met by changing the relative distribution of our asset portfolios (for example, by reducing investment or loan volumes, or selling or encumbering assets). Further, the Company can increase liquidity by soliciting higher levels of deposit accounts through promotional activities and/or borrowing from correspondent banks, the FHLB of San Francisco and the FRB. At June 30, 2014, our long-term liquidity needs primarily relate to funds required to support loan originations and commitments and deposit withdrawals, which can be met by cash flows from investment payments and maturities, and investment sales, if necessary.

The Company's liquidity is comprised of three primary classifications: 1) cash flows provided by operating activities; 2) cash flows used in investing activities; and 3) cash flows provided by financing activities. Net cash provided by or used in operating activities consists primarily of net income, adjusted for changes in certain other asset and liability accounts and certain non-cash income and expense items, such as the provision for credit losses, investment and other amortization and depreciation. For the six months ended June 30, 2014 and 2013, net cash provided by operating activities was \$60.5 million and \$86.5 million, respectively.

Our primary investing activities are the origination of real estate and commercial loans and the purchase and sale of securities. Our net cash provided by and used in investing activities has been primarily influenced by our loan and securities activities. The net increase in loans for the six months ended June 30, 2014 and 2013, was \$719.7 million and \$336.7 million, respectively. The increase from purchases or pay downs of securities, net for the six months ended June 30, 2014 was \$119.5 million, compared to a decrease of \$52.2 million at June 30, 2013.

Net cash provided by financing activities has been impacted significantly by increased deposit levels. During the six months ended June 30, 2014 and 2013, deposits increased \$631.6 million and \$207.6 million, respectively.

Fluctuations in core deposit levels may increase our need for liquidity as certificates of deposit mature or are withdrawn before maturity, and as non-maturity deposits, such as checking and savings account balances, are withdrawn. Additionally, we are exposed to the risk that customers with large deposit balances will withdraw all or a portion of such deposits, due in part to the FDIC limitations on the amount of insurance coverage provided to depositors. To mitigate the uninsured deposit risk, we have joined the CDARS and ICS, a program that allows customers to invest up to \$50.0 million in certificates of deposit or money market accounts through one participating financial institution, with the entire amount being covered by FDIC insurance. As of June 30, 2014, we had \$662.8 million of CDARS and \$381.3 million of ICS deposits, compared to \$518.0 million of CDARS and \$355.3 million of ICS deposits at December 31, 2013.

As of June 30, 2014, we had \$175.8 million of wholesale brokered deposits outstanding. Brokered deposits are generally considered to be deposits that have been received from a third party that is acting on behalf of that party's customer. Often, a broker will direct a customer's deposits to the banking institution offering the highest interest rate available. Federal banking laws and regulations place restrictions on depository institutions regarding brokered deposits because of the general concern that these deposits are at a greater risk of being withdrawn and placed on deposit at another institution offering a higher interest rate, thus posing liquidity risk for institutions that gather brokered deposits in significant amounts. The Company does not anticipate using brokered deposits as a significant liquidity source in the near future.

Federal and state banking regulations place certain restrictions on dividends paid. The total amount of dividends which may be paid at any date is generally limited to the retained earnings of the bank. Dividends paid by WAB to the Parent would be prohibited if the effect thereof would cause the bank's capital to be reduced below applicable minimum capital requirements. WAB, LVSP and WAEF paid dividends to the Parent in the amount of \$32.0 million, \$2.5 million and \$1.5 million during the six months ended June 30, 2014, respectively.

Capital Resources

The Company and WAB are subject to various regulatory capital requirements administered by the Federal banking agencies. Failure to meet minimum capital requirements could trigger certain mandatory or discretionary actions that, if undertaken, could have a direct material effect on the Company's business and financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and WAB must meet specific capital guidelines that involve qualitative measures of their assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and WAB to maintain minimum amounts and ratios of total and Tier I capital to risk-weighted assets, and of Tier I leverage to average assets. As of June 30, 2014 and December 31, 2013, the Company and WAB met all capital adequacy requirements to which they are subject.

As of June 30, 2014 and December 31, 2013, the Company WAB met the minimum capital ratio requirements necessary to be classified as well-capitalized, as defined by the banking agencies. To be categorized as well-capitalized, an entity must maintain minimum total risk-based, Tier I risk-based and Tier I leverage ratios as set forth in the table below.

Federal banking regulators have proposed revisions to the bank capital requirement standards known as Basel III. Basel III strengthens bank capital requirements and introduces new regulatory requirements on bank liquidity and bank leverage. Based on the Company's assessment of these proposed regulations, as of June 30, 2014, the Company and WAB met the requirements necessary to be classified as well-capitalized under the proposed regulation. The actual capital amounts and ratios for the Company are presented in the following tables as of the periods indicated:

	Actual		Adequately-Capitalized Requirements		Minimum For Well-Capitalized Requirements			
	Amount	Ratio	Amount	Ratio	Amount	Ratio		
(dollars in thousands)								
June 30, 2014								
Total Capital (to Risk Weighted Assets)	\$1,081,087	12.5	% \$691,896	8.0	% \$864,870	10.0	%	
Tier 1 Capital (to Risk Weighted Assets)	973,027	11.2	347,510	4.0	521,264	6.0		
Leverage Ratio (to Average Assets)	973,027	10.0	389,211	4.0	486,514	5.0		
December 31, 2013								
Total Capital (to Risk Weighted Assets)	\$991,461	12.4	% \$639,652	8.0	% \$799,565	10.0	%	
Tier 1 Capital (to Risk Weighted Assets)	891,479	11.1	321,254	4.0	481,881	6.0		
Leverage Ratio (to Average Assets)	891,479	9.8	363,869	4.0	454,836	5.0		

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Market risk is the risk of loss in a financial instrument arising from adverse changes in market prices and rates, foreign currency exchange rates, commodity prices and equity prices. Our market risk arises primarily from interest rate risk inherent in our lending, investing and deposit taking activities. To that end, management actively monitors and manages our interest rate risk exposure. We generally manage our interest rate sensitivity by evaluating re-pricing opportunities on our earning assets to match those on our funding liabilities.

Management uses various asset/liability strategies to manage the re-pricing characteristics of our assets and liabilities, all of which are designed to ensure that exposure to interest rate fluctuations is limited to within our guidelines of

acceptable levels of risk-taking. Hedging strategies, including the terms and pricing of loans and deposits and management of the deployment of our securities, are used to reduce mismatches in interest rate re-pricing opportunities of portfolio assets and their funding sources.

Interest rate risk is addressed by the ALCO (or its equivalent), which includes members of executive management, senior finance and operations. ALCO monitors interest rate risk by analyzing the potential impact on the net economic value of equity and net interest income from potential changes in interest rates and considers the impact of alternative strategies or changes in balance sheet structure. We manage our balance sheet in part to maintain the potential impact on economic value of equity and net interest income within acceptable ranges despite changes in interest rates.

Table of Contents

Our exposure to interest rate risk is reviewed on at least a quarterly basis by the ALCO. Interest rate risk exposure is measured using interest rate sensitivity analysis to determine our change in economic value of equity in the event of hypothetical changes in interest rates. If potential changes to net economic value of equity and net interest income resulting from hypothetical interest rate changes are not within the limits established by the bank's Board of Directors, the Board of Directors may direct management to adjust the asset and liability mix to bring interest rate risk within Board-approved limits.

Net Interest Income Simulation. In order to measure interest rate risk at June 30, 2014, we used a simulation model to project changes in net interest income that result from forecasted changes in interest rates. This analysis calculates the difference between net interest income forecasted using an immediate increase and decrease in interest rates and a net interest income forecast using a flat market interest rate environment derived from spot yield curves typically used to price our assets and liabilities. The income simulation model includes various assumptions regarding the re-pricing relationships for each of our products. Many of our assets are floating rate loans, which are assumed to re-price immediately and, proportional to the change in market rates, depending on their contracted index. Some loans and investments include the opportunity of prepayment (embedded options) and, accordingly, the simulation model uses estimated market speeds to derive prepayments and reinvests proceeds at modeled yields. Our non-term deposit products re-price more slowly, usually changing less than the change in market rates and at our discretion.

This analysis indicates the impact of changes in net interest income for the given set of rate changes and assumptions. It assumes the balance sheet remains static and that its structure does not change over the course of the year. It does not account for all factors that could impact our results, including actions taken by management to mitigate interest rate changes or secondary factors such as changes to our credit risk profile as interest rates change.

Furthermore, loan prepayment rate estimates and spread relationships change regularly. Interest rate changes create changes in actual loan prepayment speeds that will differ from the market estimates incorporated in this analysis. Changes that vary significantly from the modeled assumptions may have significant effects on our actual net interest income.

This simulation model assesses the changes in net interest income that would occur in response to an instantaneous and sustained increase or decrease (shock) in market interest rates. At June 30, 2014, our net interest income exposure for the next twelve months related to these hypothetical changes in market interest rates was within our current guidelines.

Sensitivity of Net Interest Income

	Interest Rate Scenario (change in basis points from Base)						
	Down 100	Base	Up 100	Up 200	Up 300	Up 400	
	(dollars in thousands)						
Interest Income	\$399,988	\$407,747	\$440,903	\$480,923	\$522,782	\$565,405	
Interest Expense	27,589	27,843	55,445	83,202	110,940	138,615	
Net Interest Income	372,399	379,904	385,458	397,721	411,842	426,790	
Percent Change	(2.0)%	1.5	% 4.7	% 8.4	% 12.3	%

Economic Value of Equity. We measure the impact of market interest rate changes on the net present value of estimated cash flows from our assets, liabilities and off-balance sheet items, defined as economic value of equity, using a simulation model. This simulation model assesses the changes in the market value of interest rate sensitive financial instruments that would occur in response to an instantaneous and sustained increase or decrease (shock) in market interest rates.

At June 30, 2014, our economic value of equity exposure related to these hypothetical changes in market interest rates was within the current guidelines established by us. The following table shows our projected change in economic value of equity for this set of rate shocks at June 30, 2014:

Table of Contents

Economic Value of Equity

	Interest Rate Scenario (change in basis points from Base)						
	Down 100	Base	Up 100	Up 200	Up 300	Up 400	
Present Value	(dollars in thousands)						
Assets	\$ 10,281,092	\$ 10,182,650	\$ 9,983,005	\$ 9,795,919	\$ 9,618,074	\$ 9,451,351	
Liabilities	8,850,439	8,697,143	8,472,490	8,288,917	8,107,293	7,925,792	
Net Present Value	1,430,653	1,485,507	1,510,515	1,507,002	1,510,781	1,525,559	
Percent Change	(3.7)%	1.7	% 1.4	% 1.7	% 2.7	%

The computation of prospective effects of hypothetical interest rate changes are based on numerous assumptions, including relative levels of market interest rates, asset prepayments and deposit decay and, should not be relied upon as indicative of actual results. Further, the computations do not contemplate any actions we may undertake in response to changes in interest rates. Actual amounts may differ from the projections set forth above should market conditions vary from the underlying assumptions.

Derivative Contracts. In the normal course of business, the Company uses derivative instruments to meet the needs of its customers and manage exposure to fluctuations in interest rates. The following table summarizes the aggregate notional amounts, market values and terms of the Company's derivative positions with derivative market makers as of June 30, 2014 and December 31, 2013:

Outstanding Derivatives Positions

June 30, 2014			December 31, 2013		
Notional	Net Value	Weighted Average Term (Years)	Notional	Net Value	Weighted Average Term (Years)
(dollars in thousands)					
\$ 568,006	\$(29,217) 17.7	\$ 294,997	\$ 1,598	16.8

Table of Contents

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls

Based on their evaluation as of the end of the period covered by this Quarterly Report on Form 10-Q, the Chief Executive Officer and Chief Financial Officer have concluded that the disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended) are effective to ensure that information required to be disclosed by the Company in reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms. Additionally, our disclosure controls and procedures were also effective in ensuring that information required to be disclosed by the Company in the reports we file or subject under the Securities Exchange Act of 1934 is accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures.

Changes in Internal Control over Financial Reporting

There have not been any changes in the Company's internal control over financial reporting during the quarter ended June 30, 2014, which have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

There are no material pending legal proceedings to which the Company is a party or to which any of our properties are subject. There are no material proceedings known to us to be contemplated by any governmental authority. From time to time, we are involved in a variety of litigation matters in the ordinary course of our business and anticipate that we will become involved in new litigation matters in the future.

Item 1A. Risk Factors.

There have not been any material changes to the risk factors previously disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

Item 6. Exhibits.

EXHIBITS

- 2.1 Plan of Conversion, dated May 29, 2014 (incorporated by reference to Exhibit 2.1 of Western Alliance Bancorporation's Form 8-K filed with the SEC on June 3, 2014).
- 3.1 Articles of Conversion, as filed with the Nevada Secretary of State on May 29, 2014 (incorporated by reference to Exhibit 3.1 of Western Alliance Bancorporation's Form 8-K filed with the SEC on June 3, 2014).
- 3.2 Certificate of Conversion, as filed with the Delaware Secretary of State on May 29, 2014 (incorporated by reference to Exhibit 3.2 of Western Alliance Bancorporation's Form 8-K filed with the SEC on June 3, 2014).
- 3.3 Certificate of Incorporation, as filed with the Delaware Secretary of State on May 29, 2014 (incorporated by reference to Exhibit 3.3 of Western Alliance Bancorporation's Form 8-K filed with the SEC on June 3, 2014).
- 3.4 Certificate of Designation of Non-Cumulative Perpetual Preferred Stock, Series B, as filed with the Delaware Secretary of State on May 29, 2014 (incorporated by reference to Exhibit 3.4 of Western Alliance Bancorporation's Form 8-K filed with the SEC on June 3, 2014).
- 3.5 Bylaws, effective May 29, 2014 (incorporated by reference to Exhibit 3.5 of Western Alliance Bancorporation's Form 8-K filed with the SEC on June 3, 2014).
- 4.1 Form of Common Stock Certificate (incorporated by reference to Exhibit 4.1 of Western Alliance Bancorporation's Form 8-K filed with the SEC on June 3, 2014).
- 10.1 Distribution Agency Agreement, dated June 4, 2014, by and among the Company and the Manager (incorporated by reference to Exhibit 1.1 of Western Alliance Bancorporation's Form 8-K filed with the SEC on June 5, 2014).
- 31.1* CEO Certification Pursuant Rule 13a-14(a)/15d-14(a).
- 31.2* CFO Certification Pursuant Rule 13a-14(a)/15d-14(a).
- 32** CEO and CFO Certification Pursuant to 18 U.S.C. Section 1350, as adopted pursuant to section 906 of the Sarbanes Oxley Act of 2002.
