The MicroSectors™ FANG+™ Index ETNs are linked to the performance of the NYSE FANG+™ Index. Each ETN offers investors the total return of the NYSE FANG+™ Index on a daily compounded basis, before taking into account fees. Each ETN has a specified leverage factor that is reset daily. This term sheet relates to separate ETN offerings. Each issue of the ETNs is linked to one, and only one, ETN below.

What is the NYSE FANG+™ Index? The NYSE FANG+™ Index includes 10 highly liquid stocks that represent a segment of the technology and consumer discretionary sectors consisting of highly-traded growth stocks of technology and tech-enabled companies. The index's underlying composition is equally weighted across all stocks, providing a performance benchmark that allows for a more value-driven approach to investing. While the performance of indices weighted by market capitalization can be dominated by a few of the largest stocks, an equal-weighting allows for a more representative portfolio. More information about the index can be found here: <https://www.theice.com/fangplus>.

MicroSectors™ MicroSectors™ provide concentrated exposure to investable market segments that heavily influence many investor portfolios. Developed as high-impact trading and hedging instruments, MicroSectors™ ETNs give investors precise exposure to popular niches of the market.

Hypothetical and Historical Index Performance Source: Bloomberg L.P. Data from 9/19/2014 to 9/30/2018. Past performance does not guarantee future results. The NYSE FANG+™ Index, an equal-dollar weighted index, was created by NYSE in 2017 to provide exposure to a select group of highly-traded growth stocks of technology and tech-enabled companies. The NYSE FANG+™ Index was launched on 9/26/2017. NYSE FANG+™ Index data prior to that date is hypothetical and reflects the application of the Index methodology in hindsight. The hypothetical data cannot completely account for the impact of financial risk in actual trading. Past historical or hypothetical data is not a guarantee of future Index performance. See "Use of Hypothetical Back-Tested Data" in this document.

As of 9/30/2018\*

VALUECall Us 877-369-5412 Email Us us.etn@bmo.com Visit Us www.bmoetn.comBank of Montreal, the issuer of  
the ETNs, has filed a registration statement (including a pricing supplement, prospectus supplement and prospectus)  
with the SEC aboutthe offerings to which this free writing prospectus relates. Please read those documents and the  
other documents relating to these offerings that Bank of Montreal hasfiled with the SEC for more complete  
information about Bank of Montreal and these offerings. These documents may be obtained without cost by visiting  
EDGAR ontheSEC website at www.sec.gov. Alternatively, Bank of Montreal, any agent or any dealer participating in  
these offerings will arrange to send the pricing supplement, theprospectus supplement and the prospectus if so  
requested by calling toll-free at 1-877-369-5412.The ETNs are senior, unsecured debt obligations of Bank of  
Montreal, and are subject to Bank of Montreal's credit risk.The ETNs are intended to be daily trading tools for  
sophisticated investors to manage daily trading risks as part of an overall diversified portfolio. They are designedto  
achieve their stated investment objectives on a daily basis. You should proceed with extreme caution in considering an  
investment in the ETNs.The ETNs do not guarantee the return of your investment. If the Intraday Indicative Value for  
the ETNs is equal to or less than \$0 at any time during an Exchange BusinessDay or the Indicative Note Value is  
equal to or less than \$0, you will lose all of your investment in the ETNs. Even if the Index Closing Level has  
increased from the InitialIndex Level, you may receive less than the principal amount of your ETNs upon a call,  
redemption, at maturity, or if you sell your ETNs, as described in more detail in theapplicable pricing  
supplement.Leverage (if applicable) increases the sensitivity of your ETNs to changes in the level of the Index.  
Investment suitability must be determined individually for each investor,and the ETNs are not suitable for all  
investors. The ETNs are not suitable for investors with longer-term investment objectives. In particular, the ETNs  
should be purchasedonly by sophisticated investors who do not intend to hold the ETNs as a buy and hold investment,  
who are willing to actively and continuously monitor their investmentand who understand the consequences of  
investing in and of seeking daily resetting investment results, which are leveraged as to some of the ETNs. Due to the  
effectof compounding, if the Indicative Note Value increases, any subsequent adverse change in the Index level will  
result in a larger dollar reduction from the Indicative NoteValue than if the Indicative Note Value remained constant;  
the converse is also true. The ETNs are subject to intraday purchase risk. The Indicative Note Value is reset daily,and  
the leverage of the ETNs during any given Exchange Business Day may be greater than or less than that contemplated  
by the name of a particular leveraged ETN.The ETNs are subject to a call right, which may adversely affect the value  
of, or your ability to sell, your ETNs. The ETNs do not pay any interest, and you will not haveany ownership rights in  
the Index constituents. The Index Closing Level used to calculate any payment by the Issuer of the ETNs may be less  
than the Index ClosingLevel at other times during the term of the ETNs. There are restrictions on your ability to  
request a redemption of the ETNs, and you will not know the amount due uponredemption at the time you elect to  
request that the ETNs be redeemed. The Issuer may sell additional ETNs but is under no obligation to do so.Market  
disruptions may adversely affect your return. Significant aspects of the tax treatment of the ETNs are uncertain.The  
Intraday Indicative Value and the Indicative Note Value are not the same as the closing price or any other trading  
price of the ETNs in the secondary market. There isno assurance that your ETNs will be listed or continue to be listed  
on a securities exchange, and they may not have an active trading market. The value of the ETNs in thesecondary  
market may be influenced by many unpredictable factors.The Issuer or its affiliates may have economic interests that  
are adverse to those of the holders of the ETNs as a result of our business, hedging and trading activities, or as  
Calculation Agent of the ETNs, and may have published research, expressed opinions or provided recommendations  
that are inconsistent with investing in or holdingthe ETNs, and may do so in the future.The Index has limited actual  
historical information. The Index Calculation Agent may adjust the Index in a way that may affect its level, and may,  
in its sole discretion,discontinue the public disclosure of the intraday Index value and the end-of-day closing value of  
the Index. The Index lacks diversification and is vulnerable to fluctuationsin the technology and consumer  
discretionary industries. A limited number of Index constituents may affect the Index Closing Level, and the Index is  
not necessarilyrepresentative of the technology industry. The Index uses a proprietary selection methodology, which  
may not select the constituent issuers in the same manner as wouldother index providers or market participants.Use of  
Hypothetical Back-Tested Data — The historical data of the Index shown herein is from September 26, 2017. Any Index  
data shown prior to that date is hypotheticaland a result of the application of the Index methodology to historical data,  
and has inherent limitations. The creation of hypothetical data necessarily involves assumptionsand cannot take into

account the impact of financial risk in actual trading. Alternative modeling techniques or assumptions may produce different hypothetical back-tested information that might be more appropriate and that might differ significantly from the information presented herein. The hypothetical back-tested data herein should not be considered indicative of actual results that might be obtained from an investment in a financial instrument referencing the Index. Historical and hypothetical back-tested results are neither an indicator nor a guarantee of future Index performance or the return of the ETNs. Please see the "Risk Factors" section in the pricing supplement relating to the applicable offering. This information is not intended to provide and should not be relied upon as providing accounting, legal, regulatory or tax advice. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the ETNs. MicroSectors™ and REX™ are registered trademarks of REX Shares, LLC ("REX").
