UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, DC 20549

FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended October 1, 2010

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 000-51928

CPI International, Inc.
(Exact Name of Registrant as Specified in Its Charter)

Delaware
(State or Other Jurisdiction of
Incorporation or Organization)

75-3142681
(I.R.S. Employer Identification No.)

811 Hansen Way, Palo Alto, California 94303
(Address of Principal Executive Offices and Zip Code)

(650) 846-2900
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each Class	Name of Each Exchange on Which Registered
Common Stock, par value \$0.01 per share	The Nasdaq Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Yes No

Rule 405 of the Securities Act.

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and Yes No (2) has been subject to such filing requirements for the past 90 days.

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "small reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input checked="" type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of common stock held by non-affiliates of the registrant as of April 1, 2010 (the last business day of the registrant's most recently completed second fiscal quarter) was approximately \$96 million, based on the closing sale price of \$13.09 per share of common stock as reported on the Nasdaq Stock Market.

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date: 16,820,741 shares of the registrant's common stock, par value \$0.01 per share, were outstanding at December 1, 2010.

DOCUMENTS INCORPORATED BY REFERENCE:

Portions of the registrant's definitive 2011 proxy statement, anticipated to be filed with the Securities and Exchange Commission within 120 days after the close of the registrant's fiscal year, are incorporated by reference into Part III of this Form 10-K.

CPI INTERNATIONAL, INC.

Cautionary Statements Regarding Forward-Looking Statements

This document contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that relate to future events or our future financial performance. In some cases, readers can identify forward-looking statements by terminology such as “may,” “will,” “should,” “expect,” “plan,” “anticipate,” “believe,” “estimate,” “predict,” “potential” or “continue,” the negative or other comparable terminology. These statements are only predictions. Actual events or results may differ materially.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Moreover, neither we nor any other person assumes responsibility for the accuracy and completeness of the forward-looking statements. Forward-looking statements are subject to known and unknown risks and uncertainties, which could cause actual results to differ materially from the results projected, expected or implied by the forward-looking statements. These risk factors include, without limitation, risks associated with our pending merger agreement with an affiliate of The Veritas Capital Fund IV (including the risk that the merger may not be consummated); competition in our end markets; our significant amount of debt and our ability to refinance our debt; changes or reductions in the United States defense budget; currency fluctuations; goodwill impairment considerations; customer cancellations of sales contracts; U.S. Government contracts; export restrictions and other laws and regulations; international laws; changes in technology; the impact of unexpected costs; the impact of a general slowdown in the global economy; the impact of environmental laws and regulations; and inability to obtain raw materials and components. All written and oral forward-looking statements made in connection with this report that are attributable to us or persons acting on our behalf are expressly qualified in their entirety by the foregoing risk factors and other cautionary statements included herein and in our other filings with the Securities and Exchange Commission (“SEC”). We are under no duty to update any of the forward-looking statements after the date of this report to conform such statements to actual results or to changes in our expectations.

The information in this report is not a complete description of our business or the risks and uncertainties associated with an investment in our securities. You should carefully consider the various risks and uncertainties that impact our business and the other information in this report and in our other filings with the SEC before you decide to invest in our securities or to maintain or increase your investment.

Table of Contents

PART I

Item 1. Business

Background

We are a provider of microwave, radio frequency (“RF”), power and control products for critical defense, communications, medical, scientific and other applications. We develop, manufacture and distribute products used to generate, amplify, transmit and receive high-power/high-frequency microwave and RF signals and/or provide power and control for various applications.

Approximately half of our product sales for fiscal year 2010 were for United States and foreign government and military end use, particularly for radar, electronic warfare and communications applications. We are one of three companies in the U.S. that have the facilities and expertise to produce a broad range of high-power microwave products to the demanding specifications required for advanced military applications. Our products are critical elements of high-priority U.S. and foreign military programs and platforms, including numerous planes, ships and ground-based platforms. Defense applications of our products include transmitting and receiving radar signals for locating and tracking threats, weapons guidance and navigation, as well as transmitting decoy and jamming signals for electronic warfare, transmitting and receiving command and control data between airborne platforms and ground-based or ship-based terminals, and transmitting signals for satellite communications. The U.S. Government is our only customer that accounted for more than 10% of our sales in the last three fiscal years.

In addition to our strong presence in defense applications, we have successfully applied our key technologies to commercial end markets, including communications, medical, industrial and scientific applications, which provide us with a diversified base of sales. Approximately half of our product sales for fiscal year 2010 were for commercial applications.

We continue to develop higher-power, wider-bandwidth and higher-frequency microwave products that enable technological advances for our defense and commercial customers. In fiscal year 2010, we generated approximately 58% of our total sales from products for which we believe that we are the sole provider to our customers, enhancing our reputation and the stability of our business.

Having average lives of between three and seven years, many of our products “wear out” and require replacement. We estimate that approximately 36% of our total sales for fiscal year 2010 were generated from recurring sales of replacements, spares and repairs, including upgraded replacements for existing products, providing us with a stable, predictable business that is partially insulated from dramatic shifts in market conditions. We regularly work with our customers to create upgraded products with enhanced bandwidth, power and reliability. We estimate that our products are installed on more than 125 U.S. defense systems and more than 180 commercial systems. This installed base and our sole-provider position on high-profile U.S. military and commercial programs provide us with a reputation and market visibility that we believe will help us generate profitable future sales growth.

Russell and Sigurd Varian, the historical founders of our business, invented and introduced the klystron as their first commercial product in 1948. The klystron is still a foundation of modern high-power microwave applications and makes possible the generation, amplification and transmission of high-fidelity electronic signals at high-power levels and high frequencies. These first products became the progenitors of our current product lines. Over time, through internal development and acquisition, we developed new devices and new uses for these products, including applications for the radar and electronic warfare, communications, medical, industrial and scientific markets.

Table of Contents

Unless otherwise noted or dictated by context, (1) "CPI International" means CPI International, Inc., (2) "Communications & Power Industries" means Communications & Power Industries, Inc., the direct, wholly owned operating subsidiary of CPI International and (3) the terms "we," "us" and "our" refer to CPI International and its direct and indirect subsidiaries on a consolidated basis.

We are organized into six operating divisions: Microwave Power Products Division (Palo Alto, California), Beverly Microwave Division (Beverly, Massachusetts), Satcom Division (Ontario, Canada), Communications & Medical Products Division (Ontario, Canada), Econco Division (Woodland, California) and Malibu Division (Camarillo, California).

Merger Agreement

We entered into an Agreement and Plan of Merger dated as of November 24, 2010 ("Merger Agreement") with Catalyst Holdings, Inc., a Delaware corporation ("Parent") and Catalyst Acquisition, Inc., a wholly-owned subsidiary of Parent ("Merger Sub"). Parent and Merger Sub are affiliates of The Veritas Capital Fund IV ("Veritas").

The Merger Agreement contemplates that Merger Sub will be merged with and into CPI International, Inc., with CPI International, Inc. surviving as a wholly-owned subsidiary of Parent (the "Merger"), and each outstanding share of our common stock will be converted in the Merger into the right to receive \$19.50 per share in cash.

We have made customary representations, warranties and covenants in the Merger Agreement, including (i) our agreement, subject to certain exceptions, to conduct business in the ordinary course and not to engage in certain activities between the execution of the Merger Agreement and the consummation of the merger and (ii) our agreement to not solicit or knowingly encourage alternative transactions or, subject to certain exceptions, enter into discussions concerning, or provide information in connection with, alternative transactions.

The completion of the Merger is subject to certain conditions, including, among others, (i) the adoption of the Merger Agreement by our stockholders, (ii) the absence of certain legal impediments to the consummation of the merger, (iii) the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, and certain approvals under foreign anti-competition laws, (iv) subject to certain materiality exceptions, the accuracy of the representations and warranties made by Parent and us, respectively, and (v) compliance by Parent and us with the respective obligations under the Merger Agreement. The completion of the Merger is not subject to a financing condition. However, generally, Parent will not be required to close the merger until completion of a marketing period set forth in the Merger Agreement.

The Merger Agreement contains typical mutual termination rights, including termination by mutual agreement of the parties, for any final and nonappealable order or law enjoining or prohibiting or making illegal the Merger or for failure to obtain our stockholder approval. In addition, either party may terminate the Merger Agreement if the Merger is not consummated by April 15, 2011. In addition, the Merger Agreement may be terminated by Parent in the event that our board of directors changes its recommendation. We may terminate the Merger Agreement in order to enter into a superior acquisition proposal. We may also terminate the Merger agreement if all of the conditions precedent to Parent's obligation to close have been satisfied or waived (other than conditions that by their terms are to be satisfied at the closing) and Parent does not complete the closing by the required date.

Table of Contents

We have agreed to pay a termination fee upon termination of the merger agreement if, among other things, (i) Parent terminates the merger agreement due to a recommendation change by our board of directors, (ii) either party terminates the merger agreement because of the failure to obtain stockholder approval and before termination, our board of directors changes its recommendation, or (iii) we terminate the merger agreement to enter into a superior acquisition proposal. If the merger agreement is terminated in connection with a superior acquisition proposal, then the termination fee payable by us is \$13 million. A termination by Parent following a change of recommendation resulting from certain events, circumstances or developments unknown or not understood as of the date of the merger agreement results in a termination fee of \$15 million. In addition, if the termination by Parent following a change in recommendation resulting from certain events, circumstances or developments unknown or not understood as of the date of the merger agreement occurs after the stockholder meeting to approve the merger agreement and the stockholders fail to approve the merger agreement, we will also be required to reimburse up to \$2.5 million of Parent's fees and expenses.

If we terminate the merger agreement under certain circumstances (including Parent's failure to consummate the merger by the required date following satisfaction or waiver of all conditions precedent to Parent's obligation to close (other than conditions that by their terms are to be satisfied at the closing)), Parent must pay us a termination fee of \$22.5 million; provided that this termination fee will be increased to \$27.5 million if Parent has committed willful breach of the merger agreement.

In connection with the proposed transaction, we will file a proxy statement with the Securities and Exchange Commission ("SEC"). Before making any voting or investment decision, investors and security holders are urged to carefully read the entire proxy statement and any other relevant documents filed with the SEC, as well as any amendments or supplements to those documents, because they will contain important information about the proposed transaction.

Our stockholders will be mailed copies of the proxy statement. Stockholders will also be able to obtain the proxy statement, as well as other filings containing information about CPI International, at no cost on our Web site at www.cpii.com as soon as reasonably practicable after they are filed or furnished to the Securities and Exchange Commission (the "SEC"). They will also be available at no cost by contacting our Investor Relations Department at investor.relations@cpii.com and are also accessible on the SEC's Web site at www.sec.gov.

Markets

We develop, manufacture and distribute products used to generate, amplify, transmit and receive high-power/high-frequency microwave and RF signals and/or provide power and control for various applications in defense and commercial markets. We serve five end markets: the radar and electronic warfare (or defense), communications, medical, industrial and scientific markets. Certain of our products are sold in more than one end market depending on the specific power and frequency requirements of the application and the physical operating conditions of the end product. End-use applications of these systems include:

- the transmission of radar signals for navigation and location;
- the transmission of deception signals for electronic countermeasures;
- the transmission, reception and amplification of voice, data and video signals for broadcasting, data links, Internet, flight testing and other types of commercial and military communications;

Table of Contents

- providing power and control for medical diagnostic imaging;
- generating microwave energy for radiation therapy in the treatment of cancer; and
- generating microwave energy for various industrial and scientific applications.

Our end markets are described below.

Radar and Electronic Warfare Market

We supply products used in various types of military radar systems, including search, fire control, tracking and weather radar systems. In radar systems, our products are used to generate or amplify electromagnetic energy pulses, which are transmitted via the radar system's antenna through the air until they strike a target. The return "echo" is read and analyzed by the receiving portion of the radar system, which then enables the user to locate and identify the target. Our products have been an integral element of radar systems for more than five decades.

We supply microwave power amplifiers for electronic warfare programs. Electronic warfare systems provide protection for ships, aircraft and high-value land targets against radar-guided weapons by interfering with, deceiving or disabling the threats. Electronic warfare systems include onboard electronic equipment, pods that attach under aircraft wings and expendable decoys. Within an electronic warfare system, our components amplify low-level incoming signals received from enemy radar or enemy communications systems and amplify or modify those signals to enable the electronic warfare system either to jam or deceive the threat. We believe that we are a leading provider of microwave power sources for electronic warfare systems, having sold thousands of devices for those systems and having a sole provider position in products for certain high-power phased array systems and expendable decoys. Electronic warfare programs also include devices and subsystems being developed or supplied for high-power microwave applications, such as systems to disable and destroy improvised explosive devices ("IEDs") and Active Denial (a system that uses microwave energy to deter unfriendly personnel). Many of the electronic warfare programs on which we are a qualified supplier are well-entrenched current programs for which we believe that there is ongoing demand.

Our radar and electronic warfare products include microwave and power grid sources, microwave amplifiers, receiver protectors and multifunction integrated microwave assemblies, as well as complete transmitter subsystems consisting of the microwave amplifier, power supply and control system. Our product offering in the radar and electronic warfare market also includes advanced antenna systems for radar and radar simulators. Our products are used in airborne, unmanned aerial vehicles ("UAVs"), ground and shipboard radar systems. We believe that we are a leading provider of power grid and microwave power sources for government radar and electronic warfare applications, with an installed base of products on more than 125 systems and a sole provider position in numerous landmark programs.

Our sales in the radar and electronic warfare market, which we also call our defense market, were \$131.6 million, \$135.9 million and \$151.8 million in fiscal years 2010, 2009 and 2008, respectively. On average, approximately 56% of our sales in the radar and electronic warfare market are generated from recurring sales of replacements, spares and repairs, including upgraded replacements for existing products.

Table of Contents

Medical Market

Within the medical market, we focus on diagnostic and treatment applications. For diagnostic applications, we provide products for medical imaging applications, such as x-ray imaging, magnetic resonance imaging (“MRI”) and positron emission tomography (“PET”). For these applications, we provide x-ray generators, subsystems, software and user interfaces, including state-of-the-art, high-efficiency, compact power supplies and modern microprocessor-based controls and operator consoles for diagnostic imaging. We also provide power grid devices for PET Isotope production systems. These systems are linac-based proton accelerators used in the detection of cancer and other diseases.

X-ray generators are used to generate and control the electrical energy being supplied to an x-ray vacuum electron device (“VED”) and, therefore, control the dose of radiation delivered to the patient during an x-ray imaging procedure. In addition, these x-ray generators include a user interface to control the operation of the equipment, including exposure times and the selection of the anatomic region of the body to be examined. These generators are interfaced with, and often power and control, auxiliary devices, such as patient positioners, cameras and automatic exposure controls, to synchronize the x-ray examination with this other equipment.

For treatment applications, we provide klystron VEDs and electron guns for high-end radiation therapy machines. Klystrons provide the microwave energy to accelerate a beam of energy toward a cancerous tumor.

Sales in the medical market were \$70.2 million, \$61.2 million and \$65.8 million in fiscal years 2010, 2009 and 2008, respectively.

For many years, we have been the sole provider of klystron high-power microwave devices to Varian Medical Systems Inc.’s oncology systems division for use in its High Energy Clinac® radiation therapy machines for the treatment of cancer, and we expect this relationship to continue. We also provide x-ray generators for use on the On-Board Imager accessory for the Clinac and Trilogy™ medical linear accelerators. This automated system for image-guided radiation therapy uses high-resolution x-ray images to pinpoint tumor sites. Recently, we have also begun providing x-ray generators for use on the TrueBeam™ radiotherapy systems for the treatment of cancer. More than 5,900 of Varian Medical Systems’ medical linear accelerators for cancer radiotherapy are in service around the world, delivering more than 30 million cancer treatments each year.

The market for our x-ray generators and associated products is broad, ranging from dealers who buy only a few generators per year, up to large original equipment manufacturers (“OEMs”) who buy hundreds per year. We sell our x-ray generators and associated equipment worldwide and have been growing both our geographic presence and our product portfolio. We have introduced new products, including x-ray generators with image processing systems, to assist customers in their migration from film-based radiology systems to digital radiology systems. We believe that we are one of the leading independent supplier of x-ray generators in the world, and we believe that this market provides continued long-term growth opportunities for us.

We have traditionally focused on hospital, or “mid- to high-end,” applications, and have become a premier supplier to this part of the market. There also exists substantial demand for “lower-end” applications, and, in recent years, we have introduced families of products that allow us to participate more fully in this part of the market.

Table of Contents

Communications Market

In the communications market, we provide microwave and millimeter-wave amplifiers for commercial and military communications links for broadcast, video, voice and data transmission. Our sales in the communications market were \$124.0 million, \$106.4 million and \$117.8 million in fiscal years 2010, 2009 and 2008, respectively. The communications market is the most dynamic of our end markets, and sales can vary significantly from quarter to quarter due, in part, to the timing and size of our shipments for specific programs during a particular quarter, including, for example, infrastructure programs for commercial direct-to-home or broadband satellite communications applications and military satellite communications programs. Historically, we have focused primarily on commercial communications applications, but in recent years, we have expanded our focus to include military communications applications, as we believe that there is a significant and growing market for our products for these applications. Military communications applications now make up a growing portion of our total communications business, and approximately one-third of our total communications sales in fiscal year 2010 were for military communications applications.

Our commercial communications programs include satellite, terrestrial broadcast and over-the-horizon applications. Our military communications programs include satellite, data link and over-the-horizon communications applications. For satellite, terrestrial broadcast, data link and over-the-horizon communications applications, our products amplify and transmit signals within an overall communications system:

- Ground-based satellite communications transmission systems use our products to enable the transmission of microwave signals, carrying either analog or digital information, from a ground-based station to the transponders on an orbiting satellite by boosting the power of the low-level original signal to desired power levels for transmission over hundreds or thousands of miles to the satellite. The signal is received by the satellite transponder, converted to the downlink frequency and retransmitted to a ground-based receiving station.

The majority of our communications products are sold into the satellite communications market. We estimate that we have a worldwide installed base of more than 27,000 amplifiers. We believe that we are a leading producer of power amplifiers, amplifier subsystems and high-power microwave devices for satellite uplinks, and that we offer one of the industry's most comprehensive lines of satellite communications amplifiers, with offerings for virtually every currently applicable frequency and power requirement for both fixed and mobile satellite communications applications in the military and commercial arena. We believe our technological expertise, our well-established worldwide service network and our ability to design and manufacture both the fully integrated amplifier and either the associated high-power microwave device or the solid-state RF device allow us to provide a superior overall service to our customers.

We are participating in satellite communications growth areas, including: amplifiers for the 30 gigahertz (GHz) band (Ka-band), which is one of the major satellite communications growth areas for both commercial and military applications; the growing application worldwide of conventional and high-definition television for direct-to-home satellite broadcast; the use of satellite communications for broadband data communications; and specialized amplifiers for the military communications market.

Table of Contents

- Terrestrial broadcast systems use our products to amplify and transmit signals, including television and radio signals at very high (“VHF”) and ultra high (“UHF”) frequencies, or other signals at a variety of frequencies. Through the years, we have established a customer base of several thousand customers in the broadcast market, providing us with opportunities for replacement, spares, upgrade and rebuilding business.
- Data link communications systems use our products to transmit and receive real-time command and control, intelligence, surveillance and reconnaissance (“ISR”) data between airborne platforms, including UAVs and manned airborne platforms, and their associated ground-based and ship-based terminals via high-bandwidth digital data links. Our products are on the airborne and ground nodes of the tactical common data link (“TCDL”) network for various platforms.
- Over-the-horizon (also referred to as “troposcatter”) systems use our high-power amplifiers and traveling wave tubes to send a signal through the atmosphere, bouncing the signal off the troposphere, the lowest atmospheric layer, and enabling receipt of the signal tens of miles to hundreds of miles away. These systems transmit voice, video and data signals without requiring the use of a satellite, providing an easy-to-install, relocatable and cost-efficient alternative to satellite-based communications.

Industrial Market

The industrial market includes applications for a wide range of systems used for material processing, instrumentation and voltage generation. We offer a number of specialized product lines to address this diverse market. We produce fully integrated amplifiers that include the associated high-power microwave devices used in instrumentation applications for electromagnetic interference and compatibility testing. Our products are also installed in the power supply modules of industrial equipment using RF energy to perform pipe and plastic welding, textile drying and semiconductor wafer fabrication. We have a line of industrial RF generators that use high-power microwave technology for various industrial heating and material processing applications. Our sales in the industrial market were \$23.6 million, \$20.2 million and \$25.1 million in fiscal years 2010, 2009 and 2008, respectively.

Scientific Market

The scientific market consists primarily of equipment used in reactor fusion programs and accelerators for the study of high-energy particle physics, referred to as “Big Science.” Generally, in scientific applications, our products are used to generate high levels of microwave or RF energy to accelerate a beam of electrons in order to study the atom and its elementary particles. Our products are also used in research related to the generation of electricity from fusion reactions. Our sales in the scientific market were \$11.0 million, \$9.2 million and \$9.5 million in fiscal years 2010, 2009 and 2008, respectively.

Geographic Markets

We sell our products in approximately 90 countries. In fiscal year 2010, sales to customers in the U.S., Europe and Asia accounted for approximately 64%, 16% and 16% of our total sales, respectively. No country other than the U.S. accounted for more than 10% of our sales in fiscal year 2010. See “Sales, Marketing and Service.” For financial information about geographic areas, see Note 13 to the accompanying audited consolidated financial statements.

Table of Contents

Products

We have an extensive portfolio of over 4,500 products that includes a wide range of microwave and power grid VEDs, in addition to products such as:

- satellite communications amplifier subsystems;
- radar and electronic warfare subsystems;
- specialized antenna subsystems;
- solid-state integrated microwave assemblies;
- medical x-ray generators and control systems;
- modulators and transmitters; and
- various electronic power supply and control equipment and devices.

Additionally, we have developed complementary, more highly integrated, subsystems that contain additional integrated components for medical imaging and for satellite communications applications. These integrated subsystems generally sell for higher prices.

Generally, our products are used to:

- generate or amplify (multiply) various forms of electromagnetic energy (these products are generally referred to as VEDs, vacuum electron devices, or simply as devices);
- transmit, direct, measure and control electromagnetic energy;
- provide the voltages and currents to power and control devices that generate electromagnetic energy; or
- provide some combination of the above functions.

VEDs were initially developed for defense applications but have since been applied to many commercial markets. We use tailored variations of this key technology to address the different frequency and power requirements in each of our target markets. Generally our VED products derive from, or are enhancements to, the original VED technology on which our company was founded. Most of our other products were natural offshoots of the original VED technology and were developed in response to the opportunities and requirements in the market for more fully integrated products and services. The type of device selected for a specific application is based on the operating parameters required by the system. Our products generally have selling prices ranging from \$2,000 to \$200,000, with certain, limited products priced up to \$1,000,000.

Table of Contents

We sell several categories of VEDs, including:

- Klystrons and gyrotrons: Klystrons are typically high-power VEDs that operate over a narrow range of frequencies, with power output ranges from hundreds of watts to megawatts and frequencies from 500 kilohertz (KHz) to over 30 GHz. We produce and manufacture klystrons for a variety of radar, communications, medical, industrial and scientific applications. Gyrotron oscillators and amplifiers operate at very high power and very high frequencies. Power output of one megawatt has been achieved at frequencies greater than 100 GHz. These devices are used in areas such as fusion research, electronic warfare and high-resolution radar.
- Helix traveling wave tubes: Helix traveling wave tubes are VEDs that operate over a wide range of frequencies at moderate output power levels (tens of watts to thousands of watts). These devices are ideal for terrestrial and satellite communications and electronic warfare applications.
- Coupled cavity traveling wave tubes: Coupled cavity traveling wave tubes are VEDs that combine some of the power generating capability of a klystron with some of the increased bandwidth (wider frequency range) properties of a helix traveling wave tube. These amplifiers are medium bandwidth, high-power devices, with power output levels that can be as high as one megawatt. These devices are used primarily for high-power and multi-function radars, including frontline radar systems.
- Magnetrons: Magnetron oscillators are VEDs capable of generating high-power output at relatively low cost. Magnetrons generate power levels as high as 20 megawatts and cover frequencies up to the 40 GHz range. We design and manufacture magnetrons for radar, electronic warfare and missile programs within the defense market. Shipboard platforms include search and air traffic control radar on most aircraft carriers, cruisers and destroyers of NATO-country naval fleets. Ground-based installations include various military and civil search and air traffic control radar systems. We are also a supplier of magnetrons for use in commercial weather radar. Potential new uses for magnetrons include high-power microwave systems for disruption of enemy electronic equipment and the disabling or destruction of roadside bombs and other IEDs.
- Cross-field amplifiers: Cross-field amplifiers are VEDs used for high-power radar applications because they have power output capability as high as 10 megawatts. Our cross-field amplifiers are primarily used to support radar systems on the Aegis weapons used by the U.S. Navy and select foreign naval vessels. We supply units both for new ships and for replacements.
- Power grid devices: Power grid devices are lower frequency VEDs that are used to generate, amplify and control electromagnetic energy. These devices are used in commercial and military communications systems and radio and television broadcasting. We also supply power grid devices for the shortwave broadcast market and for MRI and PET applications for the medical market. Our products are also widely used in equipment that serves the industrial markets such as textile drying, pipe welding and semiconductor wafer fabrication.

Table of Contents

In addition to VEDs, we also sell:

- **Microwave transmitter subsystems:** Our microwave transmitter subsystems are integrated assemblies generally built around our VED products. These subsystems incorporate specialized high-voltage power supplies to power the VED, plus cooling and control systems that are uniquely designed to work in conjunction with our devices to maximize life, performance and reliability. Microwave transmitter subsystems are used in a variety of defense and commercial applications. Our transmitter subsystems are available at frequencies ranging from one GHz all the way up to 100 GHz and beyond.
- **Satellite communications amplifiers:** Satellite communications amplifiers provide integrated power amplification for the transmission of voice, broadcast, data, Internet and other communications signals from ground stations to satellites in all frequency bands. We provide a broad line of complete, integrated satellite communications amplifiers that consist of a VED or solid-state microwave amplifier, a power supply to power the device, radio frequency conditioning circuitry, cooling equipment, electronics to control the amplifier and enable it to interface with the satellite ground station, and a cabinet. These amplifiers are often combined in sub-system configurations with other components to meet specific customer requirements. We offer amplifiers both for defense and for commercial applications. Our products include amplifiers based on helix and coupled cavity traveling wave tubes, klystrons, solid-state devices and millimeter-wave devices.
- **Receiver protectors and control components:** Receiver protectors are used in the defense market in radar systems to protect sensitive receivers from extraneous high-power signals, thereby preventing damage to the receiver. We have been designing and manufacturing receiver protector products for more than 50 years. We believe that we are the world's largest manufacturer of receiver protectors and the only manufacturer offering the full range of available technologies. We also manufacture a wide range of other components used to control the RF energy in the customer's system. Our receiver protectors and control components are integrated into prominent fielded military programs. As radar systems have evolved to improve performance and reduce size and weight, we have invested in solid-state technology to develop the microwave control components to allow us to offer more fully integrated products, referred to as multifunction assemblies, as required by modern radar systems.
- **Medical x-ray imaging systems:** We design and manufacture x-ray generators for medical imaging applications. These consist of power supplies, cooling, control and display subsystems that drive the x-ray equipment used by healthcare providers for medical imaging. The energy in an x-ray imaging system is generated by an x-ray tube which is another version of a VED operating in a different region of the electromagnetic spectrum. These generators use the high-voltage and control systems expertise originally developed by us while designing power systems to drive our other VEDs. We also provide the electronics and software subsystems that control and tie together much of the other ancillary equipment in a typical x-ray imaging system. We have recently introduced x-ray generators with imaging processing systems to assist our customers in their migration from film-based radiology systems to digital radiology systems.

Table of Contents

- **Antenna systems:** We design and manufacture antenna systems for a variety of applications, including, radar, electronic warfare, communications and telemetry. Along with a variety of antenna types, including phased array, edge and tilt scanning antennas, conformal electronic scanning antennas, stabilized shipboard tracking antennas and our trademark FLAPS (“Flat Parabolic Surface”) antennas, the antenna systems also include the highly efficient harmonic drive pedestals used to support them. The antenna systems used on airborne, shipboard and ground-based platforms are designed to enable high performance, high data rate transmission at frequencies ranging from one GHz to 100GHz.

Backlog

As of October 1, 2010, we had an order backlog of \$241.9 million compared to an order backlog of \$226.0 million as of October 2, 2009. Backlog represents the cumulative balance, at a given point in time, of recorded customer sales orders that have not yet been shipped or recognized as sales. Backlog is increased when an order is received, and backlog is reduced when we recognize sales. We believe that backlog and orders information is helpful to investors because this information may be indicative of future sales results. Although backlog consists of firm orders for which goods and services are yet to be provided, customers can, and sometimes do, terminate or modify these orders. Historically, however, the amount of modifications and terminations has not been material compared to total contract volume. Approximately 85% of our backlog as of October 1, 2010 is expected to be filled within fiscal year 2011.

Sales, Marketing and Service

Our global distribution system provides us with the capability to introduce, sell and service our products worldwide. Our distribution system primarily uses our direct sales professionals throughout the world. We have direct sales offices throughout North America and Europe, as well as in India, Singapore, China and Australia. As of October 1, 2010, we had 145 direct sales, marketing and technical support individuals on staff. Our wide-ranging distribution capabilities enable us to serve our growing international markets, which accounted for approximately 36% of our sales in fiscal year 2010.

Our sales professionals receive extensive technical training and focus exclusively on our products. As a result, they are able to provide knowledgeable assistance to our customers regarding product applications and the introduction and implementation of new technology, and, at the same time, provide local technical support.

In addition to our direct sales force, we use approximately 64 external sales organizations and one significant stocking distributor, Richardson Electronics, Ltd., to service the needs of customers in certain markets. The majority of the third-party sales organizations that we use are located outside the U.S. and Europe and focus primarily on customers in South America, Southeast Asia, the Middle East, Africa and Eastern Europe. Through the use of third-party sales organizations, we are better able to meet the needs of our foreign customers by establishing a local presence in lower volume markets. Using both our direct sales force and our largest distributor, Richardson Electronics, we are able to market our products to both end users and system integrators around the world and to deliver our products with short turn-around times.

Table of Contents

Given the complexity of our products, their critical function in customers' systems and the unacceptably high costs to our customers of system failure and downtime, we believe that our customers view our product breadth, reliability and superior responsive service as key points of differentiation. We offer comprehensive customer support, with direct technical support provided by 17 strategically located service centers, primarily serving satellite communications customers. These service centers are located in the U.S. (California and New Jersey), Canada (Georgetown, Ontario), Brazil, China (four), India (two), Japan, Peru, Russia, Singapore, South Africa, Taiwan and The Netherlands. The service centers enable us to provide extensive technical support and rapid response to customers' critical spare parts and service requirements throughout the world. In addition, we offer on-site installation assistance, on-site service contracts, a 24-hour technical support hotline and complete product training at our facilities, our service centers or customer sites. We believe that many of our customers specify our products in competitive bids due to our responsive global support and product quality.

Competition

The industries and markets in which we operate are competitive. We encounter competition in most of our business areas from numerous other companies, including units of L-3 Communications Corporation, Thales Electron Devices SA, e2v technologies plc, Teledyne Technologies, Inc. and Comtech Xicom Technology, Inc., a subsidiary of Comtech Telecommunications Corporation ("Comtech"). Some of our competitors have parent entities that have resources substantially greater than ours. In certain markets, some of these competitors are also our customers and/or our suppliers, particularly for products for satellite communications applications. Our ability to compete in our markets depends to a significant extent on our ability to provide high-quality products with shorter lead times at competitive prices and our readiness in facilities, equipment and personnel.

We also continually engage in research and development efforts in order to introduce innovative new products for technologically sophisticated customers and markets. There is an inherent risk that advances in existing technology, or the development of new technology, could adversely affect our market position and financial condition. We provide both VED and solid-state alternatives to our customers, and invest in research and development efforts across a wide range of power and frequency levels in both VED and solid-state technologies. We believe that for the foreseeable future, solid-state devices are well suited for specific lower-power applications but will be unable to compete on a cost-effective basis in the high-power/high-frequency markets that represent the majority of our business. We believe that VED and solid-state technologies currently serve their own specialized markets without significant overlap in most applications.

Research and Development

Total research and development spending was \$28.5 million, \$28.0 million and \$22.8 million during fiscal years 2010, 2009 and 2008, respectively. Total research and development spending consisted of company-sponsored research and development expense of \$12.4 million, \$10.5 million and \$10.8 million during fiscal years 2010, 2009 and 2008, respectively, and customer-sponsored research and development of \$16.1 million, \$17.5 million and \$12.0 million during fiscal years 2010, 2009 and 2008, respectively. Customer-sponsored research and development costs are charged to cost of sales to correspond with revenue recognized.

Table of Contents

Manufacturing

We manufacture our products at six manufacturing facilities in five locations in North America. We have implemented modern manufacturing methodologies based upon a continuous improvement philosophy, including just-in-time materials handling, demand flow technology, statistical process control and value-managed relationships with suppliers and customers. We obtain certain materials necessary for the manufacture of our products, such as molybdenum, cupronickel, oxygen-free high conductivity (“OFHC”) copper and some cathodes, from a limited group of, or occasionally sole, suppliers. Five of our facilities have achieved the ISO 9001 international certification standard.

Generally, each of our manufacturing divisions uses similar manufacturing processes consisting of product development, procurement of components and/or sub-assemblies, high-level assembly and testing. For satellite communications equipment, the process is primarily one of integration, and we use contract manufacturers to provide sub-assemblies whenever possible. Satellite communications equipment uses both VED and solid-state technology, and the Satcom Division procures certain of the critical components that it incorporates into its subsystems from our other manufacturing divisions.

Intellectual Property

Our business is dependent, in part, on our intellectual property rights, including trade secrets, patents and trademarks. We rely on a combination of nondisclosure and other contractual arrangements as well as trade secret, patent, trademark and copyright laws to protect our intellectual property rights. We do not believe that any single patent or other intellectual property right or license is material to our success as a whole.

On occasion, we have entered into agreements pursuant to which we license intellectual property from third parties for use in our business, and we also license intellectual property to third parties. As a result of contracts with the U.S. Government, some of which contain patent and/or data rights clauses, the U.S. Government has acquired royalty-free licenses or other rights in inventions and technology resulting from certain work done by us on behalf of the U.S. Government.

U.S. Government Contracts and Regulations

We deal with numerous U.S. Government agencies and entities, including the Department of Defense, and, accordingly, we must comply with and are affected by laws and regulations relating to the formation, administration and performance of U.S. Government contracts. We are affected by government, regulatory and industry approvals/oversight. We are affected by similar government authorities and approvals/oversight with respect to our international business.

U.S. Government contracts are conditioned upon the continuing availability of Congressional appropriations. Congress usually appropriates funds on a fiscal-year basis even though contract performance may extend over many years. Therefore, long-term government contracts and related orders are subject to cancellation if appropriations for subsequent performance periods are not approved.

Table of Contents

In addition, our U.S. Government contracts may span one or more base years and multiple option years. The U.S. Government generally has the right not to exercise option periods and may not exercise an option period if the applicable U.S. Government agency does not receive funding or is not satisfied with our performance of the contract. All of our government contracts and most of our government subcontracts can be terminated by the U.S. Government, or another relevant government, either for its convenience or if we default by failing to perform under the contract. Upon termination for convenience of a fixed-price contract, we normally are entitled to receive the purchase price for delivered items, reimbursement for allowable costs for work-in-process and an allowance for profit on the work performed. Upon termination for convenience of a cost-reimbursement contract, we normally are entitled to reimbursement of allowable costs plus a portion of the fee. The amount of the fee recovered, if any, is related to the portion of the work accomplished prior to termination.

Environmental Matters

We are subject to a variety of U.S. federal, state and local, as well as foreign, environmental laws and regulations relating to, among other things, wastewater discharge, air emissions, storage and handling of hazardous materials, disposal of hazardous wastes and remediation of soil and groundwater contamination. We use a number of chemicals or similar substances and generate wastes that are classified as hazardous, and we require environmental permits to conduct certain of our operations. Violation of such laws and regulations can result in fines, penalties and other sanctions.

We were formerly the electron device business of Varian Associates, Inc. In connection with the sale of that business to us in 1995, Varian Medical Systems, Inc. (as successor to Varian Associates) generally agreed to indemnify us for various environmental liabilities relating to Varian Associates' electron devices business prior to August 1995. We are generally not indemnified by Varian Medical Systems with respect to liabilities resulting from our operations after August 1995. Pursuant to this agreement, Varian Medical Systems is undertaking environmental investigation and remedial work at our manufacturing facilities in Palo Alto, California and Beverly, Massachusetts, that are known to require remediation.

To date, Varian Medical Systems has, generally at its expense, conducted required investigation and remediation work at our facilities and responded to environmental claims arising from Varian Medical Systems' (or its predecessor's) prior operations of the electron device business.

In connection with the agreement for the sale of our former facility located in San Carlos, California in September 2006, the buyer of the facility obtained insurance to cover the expected environmental remediation costs and other potential environmental liabilities at that facility. In addition, in connection with the sale, we released Varian Medical Systems from certain of its indemnification obligations with respect to that facility. If the proceeds of the environmental insurance are insufficient to cover the required remediation costs and potential other environmental liabilities at that facility, we could be required to bear a portion of those liabilities.

We believe that we have been and are in substantial compliance with environmental laws and regulations, and we do not expect to incur material costs relating to environmental compliance.

Table of Contents

Employees

As of October 1, 2010, we had approximately 1,580 employees, of which 450 are located outside the United States (including approximately 420 in Canada). None of our employees is subject to a collective bargaining agreement, although a limited number of our sales force members located in Europe are members of work councils or unions. We have not experienced any work stoppages, and we believe that we have good relations with our employees.

Financial Information About Segments

For financial information about our segments, see Note 13 to the accompanying audited consolidated financial statements.

Available Information

Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports are accessible at no cost on our Web site at www.cpii.com as soon as reasonably practicable after they are filed or furnished to the Securities and Exchange Commission (the "SEC"). They are also available by contacting our Investor Relations Department at investor.relations@cpii.com and are accessible on the SEC's Web site at www.sec.gov.

Our Web site and the information contained therein or incorporated therein are not intended to be incorporated into this Annual Report on Form 10-K or our other filings with the SEC.

Table of Contents

Item 1A. Risk Factors

Investors should carefully consider the following risks and other information in this report and our other filings with the SEC before deciding to invest in us or to maintain or increase any investment. The risks and uncertainties described below are not the only ones facing us. Additional risks and uncertainties may also adversely impact and impair our business. If any of the following risks actually occur, our business, results of operations or financial condition would likely suffer. In such case, the trading price of our securities could decline and investors might lose all or part of their investment.

RISKS RELATING TO OUR BUSINESS

Risks related to our merger agreement with an affiliate of The Veritas Capital Fund IV

The Merger is subject to satisfaction or waiver of certain customary conditions, including the approval of the Merger by our stockholders.

Completion of the Merger is subject to the satisfaction or waiver of certain customary conditions, including the adoption of the Merger Agreement by our stockholders, receipt of required antitrust approvals (or termination or expiration of applicable waiting periods), the accuracy of the representations and warranties of the parties and compliance by the parties with their respective obligations under the Merger Agreement and no court or other governmental entity of competent jurisdiction shall have enacted, issued, promulgated, enforced or entered any law (including any injunction) that restrains, enjoins or otherwise prohibits consummation of the Merger or otherwise makes the consummation of the Merger illegal. The transaction is expected to close in the first quarter of calendar year 2011. However, no assurances can be given that the transaction contemplated by the Merger Agreement will be consummated or, if not consummated, that we will enter into a comparable or superior transaction with another party.

The Merger may not be completed if sufficient financing is not funded.

Parent has obtained equity and debt financing commitments. The funding under those commitments is subject to conditions. We believe the committed amounts will be sufficient to complete the Merger, but we cannot assure you of that. Those amounts might be insufficient if, among other things, we have substantially less cash on hand or Parent has substantially less net proceeds from the equity and debt financings than we currently expect. Although obtaining the equity or debt financing is not a condition to the completion of the Merger, the failure of Parent and Merger Sub to obtain sufficient financing is likely to result in the failure of the Merger to be completed. We believe the committed amounts will be sufficient to complete the transaction, but cannot provide any assurance to that effect.

Although the debt financing described herein is not subject to due diligence or “market out” provisions, which allows lenders not to fund their commitments if certain conditions in the financial markets prevail, there is still a risk that such financing may not be funded when required. As of the date of this Annual Report on Form 10-K, no alternative financing arrangements or alternative financing plans have been made in the event the debt financing described herein is not available as anticipated. Even though obtaining the equity or debt financing is not a condition to the completion of the Merger, the failure of Parent and Merger Sub to obtain sufficient financing is likely to result in the failure of the Merger to be completed. In that case, Parent may be obligated to pay us a termination fee, which obligation is guaranteed under the Limited Guarantee by Veritas.

Table of Contents

Our future business and financial position may be adversely affected if the Merger is not completed.

If the Merger Agreement is terminated and the Merger is not consummated, we will have incurred substantial expenses without realizing the expected benefits of the Merger. In addition, we may also be subject to additional risks including, without limitation:

- upon termination of the Merger Agreement under specified circumstances, we may be required to pay Parent a termination fee of up to \$15 million and in certain cases to reimburse up to \$2.5 million of transaction expenses incurred by Parent and Merger Sub;
- substantial costs related to the Merger, such as legal, accounting and financial advisory fees, must be paid regardless of whether the Merger is completed; and
- potential disruption to the current plan, operations, businesses and distraction of our workforce and management team.

Litigation related to the Merger could adversely affect our financial results.

A putative stockholder class action complaint was filed against CPI International, the members of the CPI International board of directors, and Comtech Telecommunications Corp. in the California Superior Court for the County of Santa Clara in connection with the previously proposed merger between us and Comtech Telecommunications Corp. The plaintiff in this litigation has filed a motion for leave to amend this complaint to state claims against CPI International, the members of the CPI International board of directors, Cypress Associates II LLC, and Veritas and its affiliates in connection with the currently proposed Merger. It is also possible that additional lawsuits will be filed against us and our directors in connection with the currently proposed Merger. The cost of defending such lawsuits and paying any judgment or settlement in connection therewith could have an adverse impact on our financial results.

The Merger creates unique risks in the time leading up to closing, and there are also risks of completing the conditions to closing.

The Merger Agreement generally requires us to operate our business in the ordinary course pending consummation of the proposed combination, but restricts us, without Parent's consent, from taking certain specified actions until the Merger is complete or the Merger Agreement is terminated. Further, the pending Merger might increase our risk of loss of key employees due to, among other things, uncertainty concerning our post-Merger operation.

Until all conditions to the Merger are satisfied, we cannot be certain that the Merger will close. We will incur significant transaction costs relating to the proposed Merger, whether or not the proposed Merger is completed. Additionally, matters relating to the Merger may require substantial commitments of time and resources, which could otherwise have been devoted to other beneficial opportunities and there may be potential difficulties in employee retention as a result of the Merger.

Any loss of business opportunities or key personnel could have an adverse impact on future business, and, as a result, result in lower future sales and earnings.

Table of Contents

If we are unable to complete our proposed Merger our stock price could suffer.

The termination of the Merger Agreement would likely result in a decline in our stock price to the extent that our stock price reflects a market assumption that we will complete the Merger and our stockholders will receive the merger consideration specified in the Merger Agreement.

We face competition in the markets in which we sell our products.

The U.S. and foreign markets in which we sell our products are competitive. Our ability to compete in these markets depends on our ability to provide high-quality products with short lead times at competitive prices, as well our ability to create innovative new products. In addition, our competitors could introduce new products with greater capabilities, which could have a material adverse effect on our business. Certain of our competitors are owned by companies that have substantially greater financial resources than we do. Also, our foreign competitors may not be subject to U.S. Government export restrictions, which may make it easier in certain circumstances for them to sell to foreign customers. If we are unable to compete successfully against our current or future competitors, our business and sales will be harmed.

Fluctuations in our operating results, including quarterly net orders and sales, may result in volatility in our stock price, which could cause losses to our stockholders.

We have experienced and, in the future, expect to experience fluctuations in our quarterly operating results, including net orders and sales. The timing of customers' order placement and customers' willingness to commit to purchase products at any particular time are inherently difficult to predict or forecast. Once orders are received, factors that may affect whether these orders become sales and translate into revenues in a particular quarter include:

- delay in shipments due to various factors, including cancellations by a customer, delays in a customer's own production schedules, natural disasters or manufacturing difficulties;
- delay in a customer's acceptance of a product; or
- a change in a customer's financial condition or ability to obtain financing.

Our quarterly operating results may also be affected by a number of other factors, including:

- changes or anticipated changes in third-party reimbursement amounts or policies applicable to treatments using our products;
- revenues becoming affected by seasonal influences;
- changes in foreign currency exchange rates;
- changes in the relative portion of our revenues represented by our various products;
- timing of the announcement, introduction and delivery of new products or product enhancements by us and by our competitors;
- disruptions in the supply or changes in the costs of raw materials, labor, product components or transportation services;

Table of Contents

- the impact of changing levels of sales to sole purchasers of certain of our products; and
- the unfavorable outcome of any litigation.

A significant portion of our sales is, and is expected to continue to be, from contracts with the U.S. Government, and any significant reduction in the U.S. defense budget or any disruption or decline in U.S. Government expenditures could negatively affect our results of operations and cash flows.

Approximately 34%, 33% and 35% of our sales in our 2010, 2009 and 2008 fiscal years, respectively, were made to the U.S. Government, either directly or indirectly through prime contractors or subcontractors. Because U.S. Government contracts are dependent on the U.S. defense budget, any significant disruption or decline in U.S. Government expenditures in the future, changes in U.S. Government spending priorities, other legislative changes or changes in our relationship with the U.S. Government could result in the loss of some or all of our government contracts, which, in turn, could result in a decrease in our sales and cash flow.

In addition, U.S. Government contracts are also conditioned upon continuing congressional approval and the appropriation of necessary funds. Congress usually appropriates funds for a given program each fiscal year even though contract periods of performance may exceed one year. Consequently, at the outset of a major program, multi-year contracts are usually funded for only the first year, and additional monies are normally committed to the contract by the procuring agency only as Congress makes appropriations for future fiscal years. We cannot ensure that any of our government contracts will continue to be funded from year to year. If such contracts are not funded, our sales may decline, which could negatively affect our results of operations and result in decreased cash flows.

We are subject to risks particular to companies supplying defense-related equipment and services to the U.S. Government. The realization of any of these risks could cause a loss of or decline in our sales to the U.S. Government.

U.S. Government contracts contain termination provisions and are subject to audit and modification

The U.S. Government has the ability to:

- terminate existing contracts, including for the convenience of the government or because of a default in our performance of the contract;
- reduce the value of existing contracts;
- change the terms of performance of existing contracts;
- cancel multi-year contracts or programs;
- audit our contract-related costs and fees, including allocated indirect costs;
- suspend or debar us from receiving new contracts pending resolution of alleged violations of procurement laws or regulations or other laws that apply to the performance of government contracts; and
- control and potentially prohibit the export of our products, technology or other data.

Table of Contents

Each of our U.S. Government contracts can be terminated by the U.S. Government either for its convenience or if we default by failing to perform under the contract. If such contracts are terminated or reduced in scope, our sales may decline, which would negatively affect our results of operations and result in decreased cash flow.

Termination-for-convenience provisions provide only for our recovery of costs incurred or committed, settlement expenses and profit on the work completed prior to termination. Termination-for-default provisions may provide for the contractor to be liable for excess costs incurred by the U.S. Government in procuring undelivered items from another source. Our contracts with foreign governments generally contain similar provisions relating to termination at the convenience of the customer.

The U.S. Government may review or audit our direct and indirect costs and performance on certain contracts, as well as our accounting and general business practices, for compliance with complex statutes and regulations, including the Truth in Negotiations Act, Federal Acquisition Regulations, Cost Accounting Standards and other administrative regulations. Like most government contractors, the U.S. Government audits our costs and performance on a continual basis, and we have outstanding audits. Based on the results of these audits, the U.S. Government may reduce our contract-related costs and fees, including allocated indirect costs. In addition, under U.S. Government regulations, some of our costs, including certain financing costs, research and development costs and marketing expenses, may not be reimbursable under U.S. Government contracts.

We are subject to laws and regulations related to our U.S. Government contracts business which may impose additional costs on our business.

As a U.S. Government contractor, we must comply with, and are affected by, laws and regulations related to our performance of our government contracts and our business. These laws and regulations may impose additional costs on our business. In addition, we are subject to audits, reviews and investigations of our compliance with these laws and regulations. In the event that we are found to have failed to comply with these laws and regulations, we may be fined, we may not be reimbursed for costs incurred in performing the contracts, our contracts may be terminated and we may be unable to obtain new contracts. If a government review, audit or investigation uncovers improper or illegal activities, we may be subject to civil or criminal penalties and administrative sanctions, including forfeiture of claims and profits, suspension of payments, statutory penalties, damages related to the illegal activity, fines and suspension or debarment.

In addition, many of our U.S. Government contracts require our employees to maintain various levels of security clearances, and we are required to maintain certain facility clearances. Complex regulations and requirements apply to obtaining and maintaining personnel and facility security clearances, and obtaining such clearances can be a lengthy process. To the extent we are not able to obtain or maintain personnel or facility security clearances, we also may not be able to seek or perform future classified contracts. If we are unable to do any of the foregoing, we will not be able to maintain or grow our business, and our revenue may decline.

Table of Contents

As a result of our U.S. Government business, we may be subject to false claim suits, and a judgment against us in any of these suits could cause us to be liable for substantial damages.

Our business with the U.S. Government, subjects us to “qui tam,” or “whistle blower,” suits brought by private plaintiffs in the name of the U.S. Government upon the allegation that we submitted a false claim to the U.S. Government, as well as to false claim suits brought by the U.S. Government. A judgment against us in a qui tam or false claim suit could cause us to be liable for substantial damages (including treble damages and monetary penalties) and could carry penalties of suspension or debarment, which would make us ineligible to receive any U.S. Government contracts for a period of up to three years. Any material judgment, or any suspension or debarment, could result in increased costs and a loss of revenue, which could negatively affect our results of operations. In addition, any of the foregoing could cause a loss of customer confidence and could negatively harm our business and our future prospects.

Some of our sole-provider business from the U.S. Government in the future may be subject to competitive bidding.

Some of the business that we will seek from the U.S. Government in the future may be awarded through a competitive bidding process. The competitive bidding process may reduce the price at which we sell our products to the U.S.

Government and reduce our net income. Competitive bidding on government contracts presents risks such as:

- the need to bid on programs in advance of contract performance, which may result in unforeseen performance issues and costs; and
- the expense and delay that may arise if our competitors protest or challenge the award made to us, which could result in a reprocurement, modified contract, or reduced work.

If we fail to win competitively bid contracts or fail to perform under these contracts in a profitable manner, our sales and results of operations could suffer.

Our business and operating results could be adversely affected by losses under fixed-price contracts.

Most of our governmental and commercial contracts are fixed-price contracts. Fixed-price contracts require us to perform all work under the contract for a specified lump-sum price. Fixed-price contracts expose us to a number of risks, including underestimation of costs, ambiguities in specifications, unforeseen costs or difficulties, problems with new technologies, delays beyond our control, failure of subcontractors to perform and economic or other changes that may occur during the contract period. In addition, some of our fixed-price contracts contain termination provisions that permit our customer to terminate the contract if we are unsuccessful in fulfilling our obligations under the contract. In that event, we could be liable for the excess costs incurred by our customer in completing the contract.

Table of Contents

The end markets in which we operate are subject to technological change, and changes in technology could adversely affect our sales.

Our defense and commercial end markets are subject to technological change. Advances in existing technology, or the development of new technology, could adversely affect our business and results of operations. Historically, we have relied on a combination of internal research and development and customer-funded research and development activities. To succeed in the future, we must continually engage in effective and timely research and development efforts in order to introduce innovative new products for technologically sophisticated customers and end markets and to benefit from the activities of our customers. If we fail to adapt successfully to technological changes or fail to obtain access to important technologies, our sales could suffer.

Goodwill and other intangibles resulting from our acquisitions could become impaired.

As of October 1, 2010, our goodwill, developed and core technology and other intangibles amounted to \$234.7 million, net of accumulated amortization. We will amortize approximately \$3.0 million in each of fiscal years 2011 and 2012, \$2.9 million in each of fiscal years 2013 and 2014, and \$57.5 million thereafter. To the extent we do not generate sufficient cash flows to recover the net amount of any investment in goodwill and other intangibles recorded, the investment could be considered impaired and subject to write off. We expect to record further goodwill and other intangible assets as a result of any future acquisitions we may complete. Future amortization of such other intangible assets or impairments, if any, of goodwill would adversely affect our results of operations in any given period.

Laws and regulations governing the export of our products could adversely impact our business.

Licenses or other authorizations are required from U.S. Government agencies for the export of many of our products in accordance with various regulations, including the United States Export Administration Regulations (for commercial products, including "dual use" products with military applications) and the International Traffic in Arms Regulations (for defense articles and defense services). Under these regulations, a license or other authorization may be required before transferring certain export-controlled articles or technical data, or providing defense services, to foreign persons, whether in the United States or abroad; before exporting certain of our products, services, and technical data outside the United States; before engaging in brokering activities involving export-controlled defense articles; and for the temporary import of certain defense articles and technical data. In addition, regulations administered by the Office of Foreign Assets Control ("OFAC") of the U.S. Department of the Treasury govern transactions with countries and persons subject to U.S. trade sanctions, including import as well as export transactions. We are also subject to U.S. Government restrictions on transactions with specific entities and individuals, including, without limitation, those set forth on the Entity List, the Specially Designated Nationals List, the Denied Persons List, the Unverified List, and the U.S. State Department's lists of debarred parties. We are also subject to U.S. customs laws and regulations, including customs duties, when applicable. Additionally, we are subject to the Anti-Boycott Regulations administered by the U.S. Department of Commerce and the Boycott Provisions of the Internal Revenue Code (Section 999) administered by the Internal Revenue Service. These laws and regulations could materially adversely impact our sales and business in the following scenarios:

- In order to obtain the license for the sale of such a product, we are required to obtain information from the potential customer and provide it to the U.S. Government. If the U.S. Government determines that the sale presents national security risks or is otherwise contrary to U.S. policy, it may not approve the sale.

Table of Contents

- Delays caused by the requirement to obtain a required license or other authorization may cause delays in our production, sales and export activities, and may cause us to lose potential sales.
- If we violate these laws and regulations, we could be subject to fines or penalties, including debarment as an exporter and/or a government contractor.

Our internal compliance program has identified, and we have made a voluntary self-disclosure to OFAC regarding, a potential compliance issue involving assistance provided by the Swiss branch office of one of our U.S. subsidiaries with respect to sales of medical x-ray equipment by our Canadian subsidiary to distributors for resale to end-users in Iran, a country that is subject to U.S. trade sanctions. We believe the end-users were health care providers. While it is not possible to predict the response of the U.S. authorities, the Company could be assessed fines or other penalties as a result of this matter.

In addition to U.S. laws and regulations, foreign countries may also have laws and regulations governing imports and exports.

We generate sales from contracts with foreign governments, and significant changes in government policies or to appropriations of those governments could have an adverse effect on our business, results of operations and financial condition.

We estimate that approximately 13%, 15% and 12% of our sales in fiscal years 2010, 2009 and 2008, respectively, were made directly or indirectly to foreign governments. Significant changes to appropriations or national defense policies, disruptions of our relationships with foreign governments or terminations of our foreign government contracts could have an adverse effect on our business, results of operations and financial condition. Our contracts with foreign governments also subject us to U.S. and international anti-corruption laws, including the U.S. Foreign Corrupt Practices Act and the U.K. Bribery Act (which also reaches commercial bribery). A judgment or settlement under the provisions of these acts could subject us to substantial monetary penalties and damages, as well as suspension and/or debarment. Suspension or debarment could deny us the ability to retain or obtain U.S. government contracts or restrict our exporting activity. In addition, any material judgment in this area could result in increased costs, which could negatively affect our result of operations, and could cause a loss of customer confidence, thus adversely affecting our business and future prospects.

Our international operations subject us to the social, political and economic risks of doing business in foreign countries.

We conduct a substantial portion of our business, employ a substantial number of employees and use external sales organizations in Canada and in other countries outside of the United States. As a result, we are subject to certain risks of doing business internationally. Direct sales to customers located outside the United States were approximately 36%, 37% and 36% in fiscal years 2010, 2009 and 2008, respectively. Circumstances and developments related to international operations that could negatively affect our business, results of operations and financial condition include the following:

- changes in currency rates with respect to the U.S. dollar;
- changes in regulatory requirements;
- potentially adverse tax consequences;
- U.S. and foreign government policies;

- currency restrictions, which may prevent the transfer of capital and profits to the United States;
- restrictions imposed by the U.S. Government on the export of certain products and technology;

- 26 -

Table of Contents

- the responsibility of complying with multiple and potentially conflicting laws;
- difficulties and costs of staffing and managing international operations;
- the impact of regional or country specific business cycles and economic instability; and
- geopolitical developments and conditions, including international hostilities, acts of terrorism and governmental reactions, trade relationships and military and political alliances.

Limitations on imports, currency exchange control regulations, transfer pricing regulations and tax laws and regulations could adversely affect our international operations, including the ability of our non-U.S. subsidiaries to declare dividends or otherwise transfer cash among our subsidiaries to pay interest and principal on our debt.

We are subject to risks of currency fluctuations and related hedging operations.

A portion of our business is conducted in currencies other than the U.S. dollar. In particular, we incur significant expenses in Canadian dollars in connection with our Canadian operations, but do not receive significant revenues in Canadian dollars. Changes in exchange rates among certain currencies, such as the Canadian dollar and the U.S. dollar, will affect our cost of sales, operating margins and revenues. Specifically, if the Canadian dollar strengthens relative to the U.S. dollar, our expenses will increase, and our results of operations will suffer. We use financial instruments, primarily Canadian dollar forward contracts, to hedge a portion of the Canadian dollar denominated costs for our manufacturing operation in Canada. If these hedging activities are not successful or we change or reduce these hedging activities in the future, we may experience significant unexpected expenses from fluctuations in exchange rates.

Our business, results of operations and financial condition may be adversely affected by increased or unexpected costs incurred by us on our contracts and sales orders.

The terms of virtually all of our contracts and sales orders require us to perform the work under the contract or sales order for a predetermined fixed price. As a result, we bear the risk of increased or unexpected costs associated with a contract or sales order, which may reduce our profit or cause us to sustain losses. Future increased or unexpected costs on a significant number of our contracts and sales orders could adversely affect our business, results of operations and financial condition.

Table of Contents

Environmental and zoning laws and regulations and other obligations relating to environmental matters could subject us to liability for fines, clean-ups and other damages, require us to incur significant costs to modify our operations and/or increase our manufacturing costs.

Environmental and zoning laws and regulations could limit our ability to operate as we are currently operating and could result in additional costs.

We are subject to a variety of U.S. federal, state and local, as well as foreign, environmental and zoning laws and regulations relating, among other things, to wastewater discharge, air emissions, storage and handling of hazardous materials, disposal of hazardous wastes and remediation of soil and groundwater contamination. We use a number of chemicals or similar substances and generate wastes that are classified as hazardous. We require permits to conduct many of our operations. Violations of environmental and zoning laws and regulations could result in substantial fines, penalties and other sanctions. Changes in environmental and zoning laws or regulations (or in their enforcement) affecting or limiting, for example, our chemical uses, certain of our manufacturing processes or our disposal practices, could restrict our ability to operate as we are currently operating or could impose additional costs. In addition, we may experience releases of certain chemicals or discover existing contamination, which could cause us to incur material cleanup costs or other damages.

We could be subject to significant liabilities if the obligations associated with existing environmental contamination are not satisfied by Varian Medical Systems or by insurance proceeds.

When we purchased our electron devices business in 1995, Varian Medical Systems generally agreed to indemnify us for various environmental liabilities relating to the business prior to the purchase, with certain exceptions and limitations. Varian Medical Systems is undertaking the environmental investigation and remedial work at our manufacturing facilities that are known to require environmental remediation. In addition, Varian Medical Systems has been sued or threatened with suit with respect to environmental obligations related to these manufacturing facilities. If Varian Medical Systems does not comply fully with its indemnification obligations to us or does not continue to have the financial resources to comply fully with those obligations, we could be subject to significant liabilities.

In connection with the sale of our former facility in San Carlos, California, the buyer of the facility obtained insurance to cover the expected environmental remediation costs and other potential environmental liabilities at that facility, and we released Varian Medical Systems from certain of its indemnification obligations with respect to that facility. If the proceeds of the environmental insurance are insufficient to cover the required remediation costs and potential other environmental liabilities at that facility, we could be required to bear a portion of those liabilities.

We have only a limited ability to protect our intellectual property rights, which are important to our success.

Our success depends, in part, upon our ability to protect our proprietary technology and other intellectual property. We rely on a combination of trade secrets, confidentiality policies, nondisclosure and other contractual arrangements and patent, copyright and trademark laws to protect our intellectual property rights. The steps we take to protect our intellectual property may not be adequate to prevent or deter infringement or other violations of our intellectual property, and we may not be able to detect unauthorized use or to take appropriate and timely steps to enforce our intellectual property rights. In addition, we cannot be certain that our processes and products do not or will not infringe or otherwise violate the intellectual property rights of others. Infringement or other violations of intellectual property rights could cause us to incur significant costs, prevent us from selling our products and have a material adverse effect on our business, results of operations and financial condition.

Table of Contents

Our inability to obtain certain necessary raw materials and key components could disrupt the manufacture of our products and cause our sales and results of operations to suffer.

We obtain certain raw materials and key components necessary for the manufacture of our products, such as molybdenum, cupronickel, OFHC copper and some cathodes, from a limited group of, or occasionally sole, suppliers. If any of our suppliers fails to meet our needs, we may not have readily available alternatives. Delays in component deliveries could cause delays in product shipments and require the redesign of certain products. If we are unable to obtain necessary raw materials and key components from our suppliers under favorable purchase terms and/or on a timely basis or to develop alternative sources, our ability to manufacture products could be disrupted or delayed, and our sales and results of operations could suffer.

If we are unable to retain key management and other personnel, our business and results of operations could be adversely affected.

Our business and future performance depends on the continued contributions of key management personnel. Our current management team has an average of more than 25 years experience with us in various capacities. Since assuming their current leadership roles in 2002, this team has increased our sales, reduced our costs and grown our business. The unanticipated departure of any key member of our management team could have an adverse effect on our business and our results of operations. In addition, some of our technical personnel, such as our key engineers, could be difficult to replace.

We may not be successful in implementing part of our growth strategy if we are unable to identify and acquire suitable acquisition targets or integrate acquired companies successfully.

Finding and consummating acquisitions is one of the components of our growth strategy. Our ability to grow by acquisition depends on the availability of acquisition candidates at reasonable prices and our ability to obtain additional acquisition financing on acceptable terms. In making acquisitions, we may experience competition from larger companies with significantly greater resources. We are likely to use significant amounts of cash, issue additional equity securities and/or incur additional debt in connection with future acquisitions, each of which could have a material adverse effect on our business. There can be no assurance that we will be able to obtain the necessary funds to carry out acquisitions on commercially reasonable terms, or at all.

In addition, acquisitions could place demands on our management and/or our operational and financial resources and could cause or result in the following:

- difficulties in assimilating and integrating the operations, technologies and products acquired;
- the diversion of our management's attention from other business concerns;
- our operating and financial systems and controls being inadequate to deal with our growth; and
- the potential loss of key employees.

Future acquisitions of companies may also provide us with challenges in implementing the required processes, procedures and controls in our acquired operations. Acquired companies may not have disclosure controls and procedures or internal control over financial reporting that are as thorough or effective as those required by securities law in the United States.

Table of Contents

Our backlog is subject to modifications and terminations of orders, which could negatively impact our sales.

Backlog represents firm orders for which goods and services are yet to be provided, including with respect to government contracts that are cancelable at will. As of October 1, 2010, we had an order backlog of \$241.9 million. Although historically the amount of modifications and terminations of our orders has not been material compared to our total contract volume, customers can, and sometimes do, terminate or modify these orders. Cancellations of purchase orders or reductions of product quantities in existing contracts could substantially and materially reduce our backlog and, consequently, our future sales. Our failure to replace canceled or reduced backlog could negatively impact our sales and results of operations.

Changes in our effective tax rate may have an adverse effect on our results of operations.

Our future effective tax rates may be adversely affected by a number of factors including:

- the jurisdictions in which profits are determined to be earned and taxed;
- the resolution of issues arising from tax audits with various tax authorities;
- changes in the valuation of our deferred tax assets and liabilities;
- adjustments to estimated taxes upon finalization of various tax returns;
- increases in expenses not deductible for tax purposes;
- changes in available tax credits;
- changes in share-based compensation expense;
- changes in tax laws, or the interpretation of such tax laws, and changes in generally accepted accounting principles; and/or
- the repatriation of non-U.S. earnings for which we have not previously provided for U.S. taxes.

Any significant increase in our future effective tax rates could adversely impact net income for future periods.

Table of Contents

RISKS RELATED TO OUR INDEBTEDNESS

We may not be able to refinance our indebtedness.

Our existing senior credit facilities, which include a term loan with a \$66.0 million principal balance on October 1, 2010, a revolving credit facility which is currently undrawn and a letters of credit facility which includes \$4.5 million of outstanding letters of credit as of October 1, 2010, will mature and come due on August 1, 2011 if we, prior to that date, do not repay or refinance our 8% Senior Subordinated Notes, with a principal balance of \$117.0 million as of October 1, 2010. There is a risk that we may not be able to complete this refinancing or that the terms of any refinancing may not be as favorable as the terms of our existing debt. Furthermore, if prevailing interest rates or other factors at the time of refinancing result in higher interest rates upon refinancing, then the interest expense relating to that refinanced indebtedness would increase. These risks could adversely affect our financial condition and results of operations.

If we are unable to refinance our debt facility, we may need to implement other alternatives which might include issuing common stock or securities convertible into common stock to repay our indebtedness. If implemented, these actions could negatively impact our business or dilute our existing stockholders. If we are unable to obtain replacement refinancing or access the capital markets, that failure could have a material adverse effect on our financial condition and results of operations.

We have a substantial amount of debt, and we may incur substantial additional debt in the future, which could adversely affect our financial health, our ability to obtain financing in the future and our ability to react to changes in our business.

We have a substantial amount of debt and may incur additional debt in the future. As of October 1, 2010, our total consolidated indebtedness was \$194.9 million and we had \$55.5 million of additional borrowings available under the revolver under our senior credit facilities. Our substantial amount of debt could have important consequences to us and our stockholders, including, without limitation, the following:

- it will require us to dedicate a substantial portion of our cash flow from operations to make interest payments on our indebtedness and to repay the outstanding principal amount of our indebtedness, each of which will reduce the funds available for working capital, capital expenditures and other general corporate expenses;
- it could limit our flexibility in planning for or reacting to changes in our business, the markets in which we compete and the economy at large;
- it could limit our ability to borrow additional funds in the future, if needed, because of applicable financial and restrictive covenants of our indebtedness; and
- it could make us more vulnerable to interest rate increases because a portion of our borrowings is, and will continue to be, at variable rates of interest.

A default under our debt obligations could result in the acceleration of those obligations. We may not have the ability to fund our debt obligations in the event of such a default. This may adversely affect our ability to operate our business and therefore could adversely affect our results of operations and financial condition and, consequently, the price of our common stock. In addition, we may incur additional debt in the future. If debt levels increase, the related risks that we and our stockholders face could intensify.

Table of Contents

The agreements and instruments governing our debt contain restrictions and limitations that could limit our flexibility in operating our business.

Our senior credit facilities and the indentures governing our outstanding notes have a number of customary covenants that, among other things, restrict our ability to:

- incur additional indebtedness;
- sell assets or consolidate or merge with or into other companies;
- pay dividends or repurchase or redeem capital stock;
- make certain investments;
- issue capital stock of our subsidiaries;
- incur liens; and
- enter into certain types of transactions with our affiliates.

These covenants could have the effect of limiting our flexibility in planning for or reacting to changes in our business and the markets in which we compete.

Under our senior credit facilities, we are required to satisfy and maintain specified financial ratios and tests. Events beyond our control may affect our ability to comply with those provisions, and we may not be able to meet those ratios and tests, which would result in a default under our senior credit facilities. In addition, our senior credit facilities and the indenture governing Communications & Power Industries' 8% senior subordinated notes restrict Communications & Power Industries' ability to make distributions to CPI International. Because we are a holding company with no operations of our own, we rely on distributions from Communications & Power Industries, our wholly owned subsidiary, to satisfy our obligations under our floating rate senior notes. If Communications & Power Industries is unable make distributions to us, and we cannot obtain other funds to satisfy our obligations under our floating rate senior notes, a default under our floating rate senior notes could result.

The breach of any covenants or obligations in our senior credit facilities and the indentures governing our outstanding notes could result in a default under the applicable debt agreement or instrument and could trigger acceleration of (or the right to accelerate) the related debt. Because of cross-default provisions in the agreements and instruments governing our indebtedness, a default under one agreement or instrument could result in a default under, and the acceleration of, our other indebtedness. In addition, the lenders under our senior credit facilities could proceed against the collateral securing that indebtedness. If any of our indebtedness were to be accelerated, it could adversely affect our ability to operate our business or we may be unable to repay such debt, and, therefore, such acceleration could adversely affect our results of operations, financial condition and, consequently, the price of our common stock.

Table of Contents

Our outstanding notes and our senior credit facilities are subject to change-of-control provisions. We may not have the ability to raise the funds necessary to fulfill our obligations under our debt following a change of control, which could place us in default.

We may not have the ability to raise the funds necessary to fulfill our obligations under our outstanding notes and our senior credit facilities following a change of control. Under the indentures governing our notes, upon the occurrence of specified change-of-control events, we are required to offer to repurchase the notes. However, we may not have sufficient funds at the time of the change-of-control event to make the required repurchase of our notes. In addition, a change of control under our senior credit facilities would result in an event of default thereunder and permit the acceleration of the outstanding obligations under the senior credit facilities.

RISKS RELATED TO OUR COMMON STOCK

The price of our common stock may fluctuate, which could negatively affect the value of stockholders' investments.

The market price of our common stock may fluctuate widely as a result of various factors, such as period-to-period fluctuations in our actual or anticipated operating results, sales of our common stock by our existing equity investors, developments in our industry, the failure of securities analysts to cover our common stock or changes in financial estimates by analysts, failure to meet financial estimates by analysts, competitive factors, general economic and securities market conditions and other external factors. Also, securities markets worldwide experience significant price and volume fluctuations. This market volatility, as well as general economic or market conditions and market conditions affecting the common stock of companies in our industry in particular, could reduce the market price of our common stock in spite of our operating performance. Stockholders may be unable to resell their shares of our common stock at or above the purchase price for their shares or at all.

We may be the target of securities litigation, which is costly and time-consuming to defend.

In the past, following periods of market volatility in the price of a company's securities, securityholders have sometimes instituted class action litigation. If the market value of our common stock experiences adverse fluctuations and we become involved in this type of litigation, regardless of the outcome, we could incur substantial legal costs and our management's attention could be diverted from the operation of our business, causing our business to suffer.

We are subject to a class action lawsuit, which, regardless of the outcome could result in substantial legal costs and our management's attention could be diverted from the operation of our business, causing our business to suffer.

Future sales of shares of our common stock in the public market could depress our stock price and make it difficult for stockholders to recover the full value of their investment.

We cannot predict the effect, if any, that market sales of shares of common stock or the availability of shares of common stock for sale will have on the market price of our common stock from time to time. Future sales, or the perception or availability for sale in the public market, of substantial amounts of our common stock could adversely affect the market price of our common stock.

Table of Contents

In addition, we may issue a substantial number of shares of our common stock under our stock incentive and stock purchase plans. As of October 1, 2010, we had options outstanding to purchase 3,347,192 shares of our common stock under our 2000 Stock Option Plan, our 2004 Stock Incentive Plan and our 2006 Equity and Performance Incentive Plan, of which 2,915,483 were exercisable as of such date. In addition, as of October 1, 2010, our 2006 Equity and Performance Incentive Plan and 2006 Employee Stock Purchase Plan provide for the issuance of up to an additional 1,761,219 shares of our common stock to employees, directors and consultants. The issuance of significant additional shares of our common stock upon the exercise of outstanding options or otherwise pursuant to these stock plans could have a material adverse effect on the market price of our common stock and could significantly dilute the interests of other stockholders.

The controlling position of Cypress will limit other stockholders' ability to influence corporate matters.

As of November 19, 2010, entities affiliated with Cypress collectively own approximately 53% of our outstanding shares of common stock. Accordingly, the entities affiliated with Cypress have significant influence over our management, affairs and most matters requiring stockholder approval, including the election of directors and the approval of significant corporate transactions. The entities affiliated with Cypress will also be able to deter any attempted change of control. This concentrated control will limit other stockholders' ability to influence corporate matters and, as a result, we may take actions that some of our stockholders may not view as beneficial. Accordingly, the market price of our common stock could be adversely affected.

Our anti-takeover provisions could prevent or delay a change in control of our company, even if such change of control would be beneficial to our stockholders.

Provisions of our amended and restated certificate of incorporation and amended and restated bylaws, as well as provisions of Delaware law, could discourage, delay or prevent a merger, acquisition or other change in control of our company. These provisions include:

- a board of directors that is classified such that only one-third (33.3%) of directors are elected each year;
- "blank check" preferred stock that could be issued by our board of directors to increase the number of outstanding shares and thwart a takeover attempt;
- limitations on the ability of stockholders to call special meetings of stockholders;
- prohibiting stockholder action by written consent and requiring all stockholder actions to be taken at a meeting of our stockholders;
- establishing advance notice requirements for nominations for election to the board of directors or for proposing matters that can be acted upon by stockholders at stockholder meetings; and
- requiring that the affirmative vote of the holders of at least two-thirds (66.7%) of the voting power of our issued and outstanding capital stock entitled to vote in the election of directors be obtained to amend certain provisions of our amended and restated certificate of incorporation.

Table of Contents

In addition, Section 203 of the Delaware General Corporation Law, which will apply to us after affiliates of Cypress collectively cease to own at least 15% of the total voting power of our common stock, limits business combination transactions with 15% stockholders that have not been approved by the board of directors. These provisions and other similar provisions make it more difficult for a third party to acquire us without negotiation. These provisions may apply even if the transaction may be considered beneficial by some stockholders.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We own, lease or sublease manufacturing, assembly, warehouse, service and office properties having an aggregate floor space of approximately 957,000 square feet, of which approximately 1,080 square feet are leased or subleased to a third party. The table that follows provides summary information regarding principal properties owned or leased by us:

Location	Square Footage		Segment Using the Property
	Owned	Leased/ Subleased	
Beverly, Massachusetts	174,000(a)		VED VED and satcom equipment
Georgetown, Ontario, Canada	193,000	22,000	VED
Woodland, California	36,900	9,900	VED VED and satcom equipment
Palo Alto, California		418,300(b)	VED
Mountain View, California		42,500	VED
Camarillo, California		37,700	Other VED and satcom equipment
Various other locations		23,000 (c)	

(a) The Beverly, Massachusetts square footage also includes approximately 1,080 square feet leased to a tenant.

(b) Includes approximately 49,000 square feet that are subleased from Varian Medical Systems, Inc., which leases the land from Stanford University.

(c) Leased facilities occupied by our field sales and service organizations.

The lenders under our senior credit facilities have a security interest in certain of our interests in the real property that we own and lease. Our headquarters and one principal complex, including one of our manufacturing facilities, located in Palo Alto, California, are subleased from Varian Medical Systems or one of its affiliates or former affiliates.

Therefore, our occupancy rights are dependent on our sublessor's fulfillment of its responsibilities to the master lessor, including its obligation to continue environmental remediation activities under a consent order with the California Environmental Protection Agency. The consequences of the loss by us of such occupancy rights could include the loss of valuable improvements and favorable lease terms, the incurrence of substantial relocation expenses and the disruption of our business operations.

Table of Contents

Item 3. Legal Proceedings

We are not presently involved in any legal proceedings that we believe would have a material adverse effect on our consolidated financial statements. However, we are, from time to time, threatened with, or may become a party to, legal actions and other proceedings, including the matter discussed below.

On July 1, 2010, a putative stockholder class action complaint was filed against CPI International, the members of the CPI International board of directors, and Comtech Telecommunications Corp. in the California Superior Court for the County of Santa Clara, entitled *Continuum Capital v. Michael Targoff, et al.* (Case No. 110CV175940). The lawsuit concerns the proposed merger between us and Comtech, and generally asserts claims alleging, among other things, that each member of our board of directors breached his fiduciary duties by agreeing to the terms of the previously proposed merger and by failing to provide stockholders with allegedly material information related to the proposed merger, and that Comtech aided and abetted the breaches of fiduciary duty allegedly committed by the members of our board of directors. The lawsuit seeks, among other things, class action certification and monetary relief. On July 28, 2010, the plaintiff filed an amended complaint, making generally the same claims against the same defendants, and seeking the same relief. In addition, the amended complaint generally alleges that the consideration that would have been paid to CPI International's stockholders under the terms of the proposed merger was inadequate. On September 7, 2010, we terminated the Comtech sale agreement. On November 24, 2010, we entered in an agreement and plan of merger with Catalyst Holdings, Inc. and Catalyst Acquisition, Inc. which are affiliates of The Veritas Capital Fund IV, L.P. ("Veritas"). On December 9, 2010, the plaintiff filed a motion for leave to file a second amended complaint which, among other things, amends its breach of fiduciary duty claims to allege that we and our board of directors, as well as Cypress Associates II LLC, breached fiduciary duties in connection with our proposed merger with a Veritas affiliate, adds a claim for attorneys' fees for the benefit the plaintiff purportedly obtained as a result of its previous prosecution of this action, and adds claims against Veritas and its affiliates for aiding and abetting the aforementioned breaches of fiduciary duties. The action continues to seek, among other things, class action certification and monetary relief. We believe that all claims asserted in the lawsuit to be without merit.

Item 4. (Removed and Reserved)

PART II

ItemMarket For Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities
5.

Our common stock, par value \$0.01 per share, is traded on the Nasdaq Stock Market LLC under the symbol “CPII.” The following table sets forth the high and low closing sale prices for our common stock as reported by The Nasdaq Stock Market from October 4, 2008, through October 1, 2010.

	High	Low
Fiscal year 2009		
First fiscal quarter (October 4, 2008 to January 2, 2009)	\$ 10.97	\$ 5.67
Second fiscal quarter (January 3, 2009 to April 3, 2009)	\$ 9.66	\$ 5.75
Third fiscal quarter (April 4, 2009 to July 3, 2009)	\$ 12.87	\$ 7.80
Fourth fiscal quarter (July 4, 2009 to October 2, 2009)	\$ 12.00	\$ 8.75
Fiscal year 2010		
First fiscal quarter (October 3, 2009 to January 1, 2010)	\$ 14.05	\$ 9.55
Second fiscal quarter (January 2, 2010 to April 2, 2010)	\$ 13.99	\$ 10.83
Third fiscal quarter (April 3, 2010 to July 2, 2010)	\$ 15.96	\$ 13.05
Fourth fiscal quarter (July 3, 2010 to October 1, 2010)	\$ 16.18	\$ 13.66

As of December 1, 2010, there were 94 stockholders of record of our common stock and 16,820,741 shares of common stock outstanding.

No dividends were paid in fiscal years 2010 and 2009. We currently expect to retain any future earnings for use in the operation and expansion of our business and do not anticipate paying any cash dividends on our common stock in the foreseeable future. Any payment of cash dividends on our common stock will be dependent upon the ability of Communications & Power Industries, our wholly owned subsidiary, to pay dividends or make cash payments or advances to us. The indenture governing Communications & Power Industries’ 8% senior subordinated notes imposes restrictions on Communications & Power Industries’ ability to make distributions to us, and the agreements governing our senior credit facilities generally do not permit Communications & Power Industries to make distributions to us for the purpose of paying dividends to our stockholders. In addition, the indenture governing our floating rate senior notes due 2015 also imposes restrictions on our ability to pay dividends or make distributions to our stockholders. Our future dividend policy will also depend on the requirements of any future financing agreements to which we may be a party and other factors considered relevant by our board of directors, including the Delaware General Corporation Law, which provides that dividends are only payable out of surplus or current net profits.

The disclosure required by Item 201(d) of Regulation S-K is incorporated by reference to the definitive proxy statement for our 2011 Annual Meeting of Stockholders anticipated to be filed with the SEC within 120 days after the end of the fiscal year covered by this Annual Report under the heading “Equity Compensation Plan Information.”

Item 6. Selected Financial Data

The selected consolidated financial and other data for CPI International and subsidiaries as of October 1, 2010 and October 2, 2009, and for the fiscal years ended October 1, 2010, October 2, 2009, and October 3, 2008 have been derived from our audited consolidated financial statements included elsewhere in this Annual Report. The selected consolidated financial and other data for CPI International and subsidiaries as of October 3, 2008, September 28, 2007 and September 29, 2006 and for the fiscal years ended September 28, 2007 and September 29, 2006 have been derived from our audited consolidated financial statements not included elsewhere in this Annual Report. The audited consolidated financial statements as of the dates and periods noted above have been audited by KPMG LLP, an independent registered public accounting firm.

All fiscal years presented comprised 52 weeks each, except for fiscal year 2008, which comprised 53 weeks ended October 3, 2008.

You should read the following data in conjunction with “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and the consolidated financial statements and the related notes included elsewhere in this Annual Report.

Table of Contents

- (1) Fiscal year 2010 includes \$19,913 for a termination fee and transaction expenses relating to a recently terminated merger agreement between CPI International and Comtech.
- (2) The repurchase of \$8,000 of our 8% senior subordinated notes during fiscal year 2009 resulted in a gain on debt extinguishment of \$248 which was comprised of a discount of \$392, partially offset by a non-cash write-off of \$144 unamortized debt issue costs. The redemption of \$10,000 of our floating rate senior notes in fiscal year 2008 resulted in a loss on debt extinguishment of approximately \$633, including non-cash write-offs of \$420 of unamortized debt issue costs and issue discount costs and \$213 in cash payments primarily for call premiums. The debt refinancing during fiscal year 2007 resulted in a loss on debt extinguishment of approximately \$6,331, including non-cash write-offs of \$4,659 of unamortized debt issue costs and issue discount costs and \$1,953 in cash payments for call premiums, partially offset by \$281 of cash proceeds from the early termination of the related interest rate swap agreement.
- (3) Net income for fiscal year 2010 includes strategic alternative transaction expenses, after taxes, of \$15.2 million, or \$0.84 per diluted share. Net income for fiscal year 2009 includes discrete tax benefits, in aggregate, of \$7.9 million, or \$0.45 per diluted share.
- (4) Basic and diluted earnings per share and shares used to calculate net earnings per share have been retroactively adjusted to reflect the adoption of Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 260, “Earnings Per Share,” on October 3, 2009, for participating securities which represent unvested restricted common stock which contain nonforfeitable rights to dividends or dividend equivalents.
- (5) Basic earnings per share represents net income available to common stockholders divided by weighted average common shares outstanding, and diluted earnings per share represents net income available to common stockholders divided by weighted average common and common equivalent shares outstanding that are increased for additional shares that would be outstanding if potentially dilutive non-participating securities were converted to common shares.
- (6) On April 7, 2006, in connection with the amendment and restatement of the certificate of incorporation of CPI International, we effected a 3.059-to-1 stock split of the outstanding shares of common stock of CPI International as of such date. All share and per share amounts for periods presented herein have been retroactively restated to reflect the stock split.
- (7) In December 2005, we paid special cash dividends of \$17,000 to stockholders of CPI International. Cash dividend per share is calculated by dividing the dollar amount of the dividend by weighted average common shares outstanding.

(8) EBITDA represents earnings before net interest expense, provision for income taxes and depreciation and amortization. For the reasons listed below, we believe that GAAP-based (based on Generally Accepted Accounting Principles) financial information for leveraged businesses such as ours should be supplemented by EBITDA so that investors better understand our financial performance in connection with their analysis of our business:

- EBITDA is a component of the measures used by our board of directors and management team to evaluate our operating performance;
- our senior credit facilities contain a covenant that requires us to maintain a senior secured leverage ratio that contains EBITDA as a component, and our management team uses EBITDA to monitor compliance with this covenant; see “Management’s discussion and analysis of financial condition and results of operations-Liquidity and Capital Resources-Covenant compliance;”
- EBITDA is a component of the measures used by our management team to make day-to-day operating decisions;
- EBITDA facilitates comparisons between our operating results and those of competitors with different capital structures and, therefore, is a component of the measures used by the management to facilitate internal comparisons to competitors’ results and our industry in general; and
- the payment of management bonuses is contingent upon, among other things, the satisfaction by us of certain targets that contain EBITDA as a component.

Other companies may define EBITDA differently and, as a result, our measure of EBITDA may not be directly comparable to EBITDA of other companies. Although we use EBITDA as a financial measure to assess the performance of our business, the use of EBITDA is limited because it does not include certain material costs, such as interest and taxes, necessary to operate our business. When analyzing our performance, EBITDA should be considered in addition to, and not as a substitute for or superior to, net income, cash flows from operating activities or other statements of income or statements of cash flows data prepared in accordance with GAAP.

Table of Contents

The following table reconciles net income to EBITDA:

	Year Ended				
	October 1, 2010	October 2, 2009	October 3, 2008	September 28 2007	September 29 2006
Net income	\$ 6,739	\$ 23,466	\$ 20,449	\$ 22,503	\$ 17,219
Depreciation and amortization(11)	11,072	10,794	10,963	9,098	9,013
Interest expense, net	15,213	16,979	19,055	20,939	23,806
Income tax expense (benefit)	5,622	(218)	10,804	11,748	9,058
EBITDA	\$ 38,646	\$ 51,021	\$ 61,271	\$ 64,288	\$ 59,096

- (9) EBITDA margin represents EBITDA divided by sales.
- (10) Operating income margin represents operating income divided by sales.
- (11) Net income margin represents net income divided by sales.
- (12) Depreciation and amortization excludes amortization of deferred debt issuance costs, which are included in interest expense, net.
- (13) Fiscal years 2007 and 2006 include approximately \$4,100 and \$2,300, respectively, of capital expenditures for the expansion of our building in Georgetown, Ontario, Canada. Fiscal year 2006 includes capital expenditures of approximately \$4,700 resulting from the relocation of our former San Carlos, California facility to Palo Alto, California and Mountain View, California.
- (14) For purposes of computing the ratio of earnings to fixed charges, earnings consist of income from continuing operations before income taxes and fixed charges less capitalized interest. Fixed charges consist of interest expense, including amortization of debt issuance costs and that portion of rental expenses that management considers to be a reasonable approximation of interest.
- (15) Fiscal year 2007 includes approximately \$22,200 of cash outflow for the acquisition of Malibu Research Associates, Inc., as a result of which the Malibu Division was formed.

Item Management's Discussion and Analysis of Financial Condition and Results of Operations

7.

Our fiscal years are the 52- or 53-week periods that end on the Friday nearest September 30. Fiscal years 2010 and 2009 comprised the 52-week period ending October 1, 2010 and October 2, 2009, respectively. Fiscal year 2008 comprised the 53-week period ended October 3, 2008. The following discussion should be read in conjunction with our consolidated financial statements, and the notes thereto, included elsewhere in this Annual Report.

Overview

CPI International, headquartered in Palo Alto, California, is the parent company of Communications & Power Industries, a provider of microwave, radio frequency, power and control solutions for critical defense, communications, medical, scientific and other applications. Communications & Power Industries develops, manufactures and distributes products used to generate, amplify, transmit and receive high-power/high-frequency microwave and radio frequency signals and/or provide power and control for various applications. End-use applications of these systems include the transmission of radar signals for navigation and location; transmission of deception signals for electronic countermeasures; transmission and amplification of voice, data and video signals for broadcasting, Internet and other types of commercial and military communications; providing power and control for medical diagnostic imaging; and generating microwave energy for radiation therapy in the treatment of cancer and for various industrial and scientific applications.

Orders

We sell our products into five end markets: defense (radar and electronic warfare), medical, communications, industrial and scientific.

Our customer sales contracts are recorded as orders when we accept written customer purchase orders or contracts. Customer purchase orders with an undefined delivery schedule, or blanket purchase orders, are not reported as orders until the delivery date is determined. Our government sales contracts are not reported as orders until we have been notified that the contract has been funded. Total orders for a fiscal period represent the total dollar amount of customer orders recorded by us during the fiscal period, reduced by the dollar amount of any order cancellations or terminations during the fiscal period.

Our orders by market for fiscal years 2010 and 2009 are summarized as follows (dollars in millions):

	Year Ended				(Decrease)	
	October 1, 2010	October 2, 2009			Increase	
	% of	% of				
	Amount	Orders	Amount	Orders	Amount	Percent
Radar and Electronic Warfare	\$ 129.7	34 %	\$ 142.2	40 %	\$(12.5)	(9) %
Medical	70.1	19	66.9	19	3.2	5
Communications	131.0	35	119.2	33	11.8	10
Industrial	26.1	7	21.2	6	4.9	23
Scientific	18.0	5	6.5	2	11.5	177
Total	\$ 374.9	100 %	\$ 356.0	100 %	\$ 18.9	5 %

Table of Contents

Orders of \$374.9 million for fiscal year 2010 were \$18.9 million, or 5%, higher than orders of \$356.0 million for fiscal year 2009. Explanations for the order increase or decrease by market for fiscal year 2010 compared to fiscal year 2009 are as follows:

Radar and Electronic Warfare: The majority of our products in the radar and electronic warfare markets are for

- domestic and international defense and government end uses. Orders in these markets are characterized by many smaller orders in the \$0.5 million to \$3.0 million range by product or program, and the timing of these orders may vary from year to year. On a combined basis, orders for the radar and electronic warfare markets decreased approximately 9% from \$142.2 million in fiscal year 2009 to \$129.7 million in fiscal year 2010. In fiscal year 2010, the decrease in orders for these combined markets was primarily due to the timing of orders to support certain radar and electronic warfare systems, including a foreign radar program, several airborne electronic countermeasure systems and the HAWK missile system. In fiscal year 2009, we received \$4.1 million in orders for a foreign radar program; this large order was not expected to, and did not, repeat in fiscal year 2010.

Medical: Orders for our medical products consist of orders for medical imaging applications, such as x-ray

- imaging, MRI and PET applications, and for radiation therapy applications for the treatment of cancer. The 5% increase in medical orders was due primarily to an increase in demand for products to support x-ray imaging and MRI applications.

Communications: Orders for our communications products consist of orders for commercial communications

- applications and military communications applications. The 10% increase in communications orders was primarily due to increases in orders to support commercial communications applications, such as fixed satellite broadcast and terrestrial broadcast applications.

Excluding the Warfighter Information Network – Tactical (“WIN-T”) program, demand for products to support military communications programs also increased during fiscal year 2010. Military communications is a relatively new sector of the overall communications market for us, and over the long term, we expect our participation in military communications programs to continue to grow. With the exception of the WIN-T program, military communications is characterized by numerous programs that are relatively modest in size and for which the timing may vary from year to year. Because of the atypically large size and frequency of the orders we received to support the WIN-T program in fiscal year 2009, orders for this program decreased approximately \$21 million in fiscal year 2010. As expected, the size and frequency of those large WIN-T orders were not repeated in fiscal year 2010.

Industrial: Orders in the industrial market are cyclical and are generally tied to the state of the economy. The \$4.9

- million increase in industrial orders was primarily due to an increase in demand for products used in semiconductor and liquid crystal display (“LCD”) screen manufacturing applications, new advanced nuclear magnetic resonance applications and industrial heating applications.

Scientific: Orders in the scientific market are historically one-time projects and can fluctuate significantly from

- period to period. The \$11.5 million increase in scientific orders was primarily the result of the receipt of orders for products to support fusion research and other “Big Science” programs at domestic and European laboratories.

Table of Contents

Incoming order levels can fluctuate significantly on a quarterly or annual basis, and a particular quarter's or year's order rate may not be indicative of future order levels. In addition, our sales are highly dependent upon manufacturing scheduling and performance and, accordingly, it is not possible to accurately predict when orders will be recognized as sales.

Backlog

As of October 1, 2010, we had an order backlog of \$241.9 million compared to an order backlog of \$226.0 million as of October 2, 2009. Because our orders for government end-use products generally have much longer delivery terms than our orders for commercial business (which require quicker turn-around), our backlog is primarily composed of government orders.

Backlog represents the cumulative balance, at a given point in time, of recorded customer sales orders that have not yet been shipped or recognized as sales. Backlog is increased when an order is received, and backlog is decreased when we recognize sales. We believe that backlog and orders information is helpful to investors because this information may be indicative of future sales results. Although backlog consists of firm orders for which goods and services are yet to be provided, customers can, and sometimes do, terminate or modify these orders. However, historically the amount of modifications and terminations has not been material compared to total contract volume.

Results of Operations

We derive our revenue primarily from the sale of microwave and radio frequency products, including high-power microwave amplifiers, satellite communications amplifiers, medical x-ray imaging subsystems and other related products. Our products generally have selling prices ranging from \$2,000 to \$200,000, with certain limited products priced up to \$1,000,000.

Cost of goods sold generally includes costs for raw materials, manufacturing costs, including allocation of overhead and other indirect costs, charges for reserves for excess and obsolete inventory, warranty claims and losses on fixed price contracts. Operating expenses generally consist of research and development, selling and marketing and general and administrative expenses.

Table of Contents

The following table sets forth our historical results of operations for each of the periods indicated (dollars in millions):

	October 1, 2010		Year Ended October 2, 2009		October 3, 2008	
	Amount	% of	Amount	% of	Amount	% of
		Sales		Sales		Sales
Sales	\$ 360.4	100.0 %	\$ 332.9	100.0 %	\$ 370.0	100.0 %
Cost of sales	252.0	69.9	239.4	71.9	261.1	70.6
Gross profit	108.4	30.1	93.5	28.1	108.9	29.4
Research and development	12.4	3.4	10.5	3.2	10.8	2.9
Selling and marketing	20.8	5.8	19.5	5.9	21.1	5.7
General and administrative	25.0	6.9	20.8	6.2	22.9	6.2
Amortization of acquisition-related intangibles	2.7	0.7	2.8	0.8	3.1	0.8
Strategic alternative transaction expenses	19.9	5.5	-	-	-	-
Operating income	27.6	7.7	40.0	12.0	50.9	13.8
Interest expense, net	15.2	4.2	17.0	5.1	19.1	5.2
(Gain) loss on debt extinguishment	-	-	(0.2)	(0.1)	0.6	0.2
Income before taxes	12.4	3.4	23.2	7.0	31.3	8.5
Income tax expense (benefit)	5.6	1.6	(0.2)	(0.1)	10.8	2.9
Net income	\$ 6.7	1.9 %	\$ 23.5	7.1 %	\$ 20.4	5.5 %
Other Data:						
EBITDA (1)	\$ 38.6	10.7 %	\$ 51.0	15.3 %	\$ 61.3	16.6 %

Note: Totals may not equal the sum of the components due to independent rounding. Percentages are calculated based on rounded dollar amounts presented.

(1) EBITDA represents earnings before net interest expense, provision for income taxes and depreciation and amortization. For the reasons listed below, we believe that GAAP-based (based on Generally Accepted Accounting Principles) financial information for leveraged businesses such as ours should be supplemented by EBITDA so that investors better understand our financial performance in connection with their analysis of our business:

EBITDA is a component of the measures used by our board of directors and management team to evaluate our operating performance;

Our senior credit facilities contain a covenant that requires us to maintain a senior secured leverage ratio that contains EBITDA as a component, and our management team uses EBITDA to monitor compliance with this covenant;

EBITDA is a component of the measures used by our management team to make day-to-day operating decisions;

EBITDA facilitates comparisons between our operating results and those of competitors with different capital structures and, therefore, is a component of the measures used by the management to facilitate internal comparisons to competitors' results and our industry in general; and

the payment of management bonuses is contingent upon, among other things, the satisfaction by us of certain targets that contain EBITDA as a component.

Other companies may define EBITDA differently and, as a result, our measure of EBITDA may not be directly comparable to EBITDA of other companies.

Although we use EBITDA as a financial measure to assess the performance of our business, the use of EBITDA is limited because it does not include certain material costs, such as interest and taxes, necessary to operate our business. When analyzing our performance, EBITDA should be considered in addition to, and not as a substitute for or superior to, net income, cash flows from operating activities or other statements of income or statements of cash flows data prepared in accordance with GAAP.

For a reconciliation of Net Income to EBITDA, see footnote 8 under Selected Financial Data above.

Table of Contents

Our results for fiscal year 2010 compared to our results for fiscal year 2009

Sales: Our sales by market for fiscal years 2010 and 2009 are summarized as follows (dollars millions):

	Year Ended				Decrease	
	October 1, 2010		October 2, 2009		(Increase)	
	Amount	% of Sales	Amount	% of Sales	Amount	Percent
Radar and Electronic Warfare	\$ 131.6	37 %	\$ 135.9	41 %	\$ (4.3)	(3) %
Medical	70.2	19	61.2	18	9.0	15
Communications	124.0	34	106.4	32	17.6	17
Industrial	23.6	7	20.2	6	3.4	17
Scientific	11.0	3	9.2	3	1.8	20
Total	\$ 360.4	100 %	\$ 332.9	100 %	\$ 27.5	8 %

Sales of \$360.4 million for fiscal year 2010 were \$27.5 million, or approximately 8%, higher than sales of \$332.9 million for fiscal year 2009. Explanations for the sales increase or decrease by market are as follows:

- **Radar and Electronic Warfare:** The majority of our products in the radar and electronic warfare markets are for domestic and international defense and government end uses. The timing of order receipts and subsequent shipments in these markets may vary from year to year. On a combined basis, sales for these two markets decreased approximately 3% from \$135.9 million in fiscal year 2009 to \$131.6 million in fiscal year 2010. This decrease was primarily due to a decrease in sales to support the HAWK missile system and foreign radar systems, and was partially offset by an increase in sales to support electronic warfare systems and the Aegis weapons system.
- **Medical:** Sales of our medical products consist of sales for medical imaging applications, such as x-ray imaging, MRI and PET applications, and for radiation therapy applications for the treatment of cancer. The 15% increase in sales of our medical products was primarily due to increased sales to support MRI and x-ray imaging applications.
- **Communications:** Sales of our communications products consist of sales for commercial communications applications and military communications applications. The 17% increase in sales in the communications market was primarily due to increases in sales to support commercial communications applications, particularly fixed satellite broadcast applications. Sales of products to support military communications applications, including the WIN-T program, also increased. Military communications is a relatively new sector of the overall communications market for us, and, with the exception of the WIN-T program, is characterized by numerous programs that are relatively modest in size and for which the timing may vary from year to year. Over the long term, we expect our participation in military communications programs to continue to grow.
- **Industrial:** Sales in the industrial market are cyclical and are generally tied to the state of the economy. The \$3.4 million increase in industrial sales was due to an increase in sales of products used in semiconductor and LCD screen manufacturing applications and in cargo screening.
- **Scientific:** Sales in the scientific market are historically one-time projects and can fluctuate significantly from period to period. The \$1.8 million increase in scientific sales was primarily the result of increased sales for a fusion research program.

Table of Contents

Gross Profit. Gross profit was \$108.4 million, or 30.1% of sales, for fiscal year 2010 as compared to \$93.5 million, or 28.1% of sales, for fiscal year 2009. Gross profit is influenced by numerous factors including sales volume and mix, pricing, raw material and manufacturing costs, and warranty costs. The primary reason for the increase in gross profit in fiscal year 2010 as compared to fiscal year 2009 was higher shipments and improved operating efficiencies from the higher shipment volume and the favorable impact from translation of Canadian costs, net of currency hedge contracts, partially offset by lower margins due to manufacturing start-up costs for new advanced antenna products and on a foreign telemetry program.

Research and Development. Company-sponsored research and development expenses were \$12.4 million, or 3.4% of sales, for fiscal year 2010 and \$10.5 million, or 3.2% of sales for fiscal year 2009. The \$1.9 million increase in research and development was primarily due to development efforts on broadband communication products and solid state devices for commercial and military applications.

Total spending on research and development, including customer-sponsored research and development, was as follows (in millions):

	Year Ended	
	October	October
	1,	2,
	2010	2009
Company sponsored	\$ 12.4	\$ 10.5
Customer sponsored, charged to cost of sales	16.1	17.5
	\$ 28.5	\$ 28.0

The reduction to customer-sponsored research and development to \$16.1 million for fiscal year 2010 from \$17.5 million for fiscal year 2009 is primarily due to the reduction of development programs for advanced antenna and telemetry products at the Malibu Division as these products are transitioning to production.

Selling and Marketing. Selling and marketing expenses were \$20.8 million, or 5.8% of sales, for fiscal year 2010, a \$1.3 million increase from the \$19.5 million, or 5.9% of sales, for fiscal year 2009. The increase in selling and marketing expenses in fiscal year 2010 as compared to fiscal year 2009 was primarily due to higher sales incentive expenses from improved operating performance and additional expenses to support growth in the commercial communications market.

General and Administrative. General and administrative expenses were \$25.0 million, or 6.9% of sales, for fiscal year 2010, a \$4.2 million increase from the \$20.8 million, or 6.2% of sales, for fiscal year 2009. The increase in general and administrative expenses in fiscal year 2010 as compared to fiscal year 2009 was primarily due to the elimination of certain cost reduction measures and higher management bonuses as a result of improved operating performance, unfavorable currency translation expense and an increase in expenses for income tax planning services.

Amortization of Acquisition-related Intangibles. Amortization of acquisition-related intangibles consists of purchase accounting charges for technology and other intangible assets. Amortization of acquisition-related intangibles was \$2.7 million for fiscal year 2010 and \$2.8 million for fiscal year 2009. Amortizable acquisition-related intangible assets are amortized over periods of up to 50 years.

Strategic Alternative Transaction Expenses. Strategic alternative transaction expenses of \$19.9 million for fiscal year 2010 were incurred in connection with the Comtech merger agreement that was terminated on September 7, 2010. Strategic alternative transaction expenses primarily comprise a \$15 million termination fee and fees for investment

bankers, attorneys and other professional services.

- 48 -

Table of Contents

Interest Expense, net (“Interest Expense”). Interest Expense of \$15.2 million for fiscal year 2010 was \$1.8 million lower than interest expense of \$17.0 million for fiscal year 2009. The reduction in interest expense in fiscal year 2010 as compared to fiscal year 2009 was primarily due to repayments of debt in fiscal year 2009.

(Gain) Loss on Debt Extinguishment. The gain on debt extinguishment of \$0.2 million in fiscal year 2009 resulted from the repurchase of \$8.0 million of our 8% senior subordinated notes at a discount of \$0.4 million, partially offset by a \$0.2 million non-cash write-off of deferred debt issue costs.

Income Tax Expense (Benefit). We recorded an income tax expense of \$5.6 million for fiscal year 2010 and an income tax benefit of \$0.2 million for fiscal year 2009. Our effective tax rates were 45% for fiscal year 2010 and a negative 0.9% for fiscal year 2009.

Income tax expense for fiscal year 2010 includes discrete tax expense of \$2.2 million, net of discrete tax benefits, which comprises the following: (1) \$3.1 million tax expense related to the uncertainty of obtaining a tax deduction for all of the expenses incurred in connection with the terminated Comtech merger, (2) \$0.3 million tax benefit true-up related to the filing of fiscal year 2009 income tax returns, (3) \$0.3 million tax benefit to adjust deferred tax accounts for a reduction to future Canadian income tax rates, and (4) \$0.3 million for research and development tax credit benefits claimed on prior year income tax returns.

The following illustrates the impact the strategic alternative transaction expenses had on our income taxes in fiscal year 2010 (dollars in millions):

	Total	Strategic alternative transaction expenses	All other
Income (loss) before taxes	12.4	(19.9)	32.3
Income tax expense (benefit), excluding discrete items	3.4	(7.8)	11.2
% of income before taxes	27 %	39 %	35 %
Discrete tax expense (benefit):			
Reserve for uncertainty of tax deduction for the terminated Comtech merger	3.1	3.1	
True-up related to fiscal year 2009 tax filings	(0.3)		(0.3)
Adjust deferred tax accounts for reduction to future Canadian income tax rates	(0.3)		(0.3)
R&D tax benefit credits claimed on prior year income tax returns	(0.3)		(0.3)
Total discrete tax expense (benefit)	2.2	3.1	(0.9)
Total income tax expense (benefit)	5.6	(4.7)	10.3
% of income before taxes	45 %	24 %	32 %

Table of Contents

The income tax benefit for fiscal year 2009 included several significant discrete tax benefits: (1) \$4.9 million relating to our position with regard to an outstanding audit by the Canada Revenue Agency (“CRA”), (2) \$1.7 million for the correction of immaterial errors to tax accounts that should have been recorded in prior year’s financial statements, (3) \$0.7 million related to certain provisions of the California Budget Act of 2008 signed on February 20, 2009, which will allow a taxpayer to elect an alternative method to apportion taxable income to California for tax years beginning on or after January 1, 2011, and (4) \$0.6 million for refunds claimed on prior year income tax returns based on the results of a foreign nexus study. In fiscal year 2009, we also recorded a \$0.4 million U.S. research and development tax credit.

In December 2008, a new tax treaty protocol between Canada and the U.S. became effective. The new treaty requires mandatory arbitration for the resolution of double taxation disputes not settled through the competent authority process. As a result of this new treaty, our tax position on an outstanding audit by the CRA became more favorable, and we reduced our tax contingency reserve in Canada by \$2.8 million, and established an income tax receivable and recognized an income tax benefit in the U.S for \$2.8 million; this tax benefit was partially offset by a related increase in deferred tax liabilities of \$0.7 million.

The \$1.7 million correction to prior year’s financial statements in fiscal year 2009 comprises \$0.9 million for changes in foreign income tax rates that were not updated in a timely manner and \$0.8 million recorded in the fourth quarter of fiscal year 2009 to true-up the 2008 income tax provision. We believe that the impact of this correction was not material to our consolidated financial statements in fiscal year 2009 or in any of the prior year consolidated financial statements.

Net Income. Net income was \$6.7 million, or 1.9% of sales, for fiscal year 2010 as compared to \$23.5 million, or 7.1% of sales, for fiscal year 2009. Net income for both fiscal years 2009 and 2010 was greatly impacted by (1) for fiscal year 2009, the discrete tax benefits discussed above under the heading “Income Tax Expense (Benefit),” aggregating to a \$7.9 million benefit, (2) for fiscal year 2010, the \$0.9 million of discrete tax benefits in the “All other” column of the table above under the heading “Income Tax Expense (Benefit),” and (3) for fiscal year 2010, the after-tax expense from strategic alternative transaction expenses of \$15.2 million. Excluding these items, fiscal year 2010 net income was approximately \$5.4 million higher than fiscal year 2009 primarily due to higher shipment volume and improved operating efficiency from the higher shipment volume, and lower interest expense, in fiscal year 2010, partially offset by higher operating expense in fiscal year 2010. The higher operating expense in fiscal year 2010 is primarily due to higher management bonuses and sales incentive expenses because of improved operating performance and from the elimination of certain cost reduction initiatives in fiscal year 2010.

EBITDA. EBITDA was \$38.6 million, or 10.7% of sales, for fiscal year 2010 as compared to \$51.0 million, or 15.3% of sales, in fiscal year 2009. The \$12.4 million decrease in EBITDA in fiscal year 2010 as compared to fiscal year 2009 was due primarily to strategic alternative transaction expenses of \$19.9 million and higher operating expense in fiscal year 2010, partially offset by higher shipment volume and improved operating efficiency from the higher shipment volume in fiscal year 2010

Table of Contents

Calculation of Management Bonuses. Management bonuses were \$3.3 million in fiscal year 2010 compared to \$1.2 million in fiscal year 2009. Management bonuses for fiscal years 2010 and 2009 were calculated pursuant to our MIP and were based on three factors: (1) EBITDA as adjusted for purposes of calculating management bonuses; (2) a measure of cash generated by operations; and (3) individual goals that were customized for certain participating members of management. The weight given to each of these factors varied for each person. Generally, for our officers, equal weight was given to the first two factors, and the third factor was not applicable. For our other members of management, equal weight was given to each of the three factors described above. Management bonuses are paid in cash approximately three months after the end of the fiscal year. EBITDA as adjusted for purposes of calculating management bonuses is equal to EBITDA for the fiscal year adjusted to exclude the impact of certain non-recurring or non-cash charges as pre-determined in our MIP for the fiscal year. EBITDA for purposes of calculating management bonuses for fiscal year 2010 was \$61.6 million compared to \$53.5 million in fiscal year 2009. The non-recurring and non-cash charges that were excluded from EBITDA in calculating management bonuses were (a) for fiscal year 2010, strategic alternative transaction expenses of \$19.9 million and stock-based compensation expense of \$3.0 million, and (b) for fiscal year 2009, gain on debt extinguishment of \$0.2 million and stock-based compensation expense of \$2.7 million. We are presenting EBITDA as adjusted for purposes of calculating management bonuses here to help investors understand how our management bonuses were calculated, and not as a measure to be used by investors to evaluate our operating results or liquidity.

Our results for fiscal year 2009 compared to our results for fiscal year 2008

Sales: Our sales by market for fiscal years 2009 and 2008 are summarized as follows (dollars millions):

	Year Ended		Year Ended		Decrease	
	October 2, 2009		October 3, 2008		Decrease	
	Amount	% of Sales	Amount	% of Sales	Amount	Percent
Radar and Electronic Warfare	\$ 135.9	41 %	\$ 151.8	40 %	\$ (15.9)	(10) %
Medical	61.2	18	65.8	18	(4.6)	(7)
Communications	106.4	32	117.8	32	(11.4)	(10)
Industrial	20.2	6	25.1	7	(4.9)	(20)
Scientific	9.2	3	9.5	3	(0.3)	(3)
Total	\$ 332.9	100 %	\$ 370.0	100 %	\$ (37.1)	(10) %

In the first six months of fiscal year 2009, product shipments in our defense markets, which include our radar and electronic warfare markets, were delayed due to delays in the receipt of orders, having a negative effect on our defense sales. In the last six months of fiscal year 2009, the order levels in our defense markets stabilized, but certain defense programs experienced delays in orders and subsequent sales.

Our commercial markets, which include our medical, commercial communications, industrial and scientific markets, were negatively impacted in fiscal year 2009 by the weakening of the U.S. and foreign economy. Many of the commercial programs in which we participate depend on customers upgrading their current equipment or expanding their infrastructures. With the softening of global economy, many of our customers delayed, reduced or cancelled their upgrade or expansion plans. We believe that the weak global economy resulted in a decrease in demand for our products to support commercial programs in fiscal year 2009.

Table of Contents

Sales of \$332.9 million for fiscal year 2009 were \$37.1 million, or approximately 10%, lower than sales of \$370.0 million for fiscal year 2008. Explanations for the sales decrease by market are as follows:

- **Radar and Electronic Warfare:** The majority of our sales in the radar and electronic warfare markets are products for domestic and international defense and government end uses. The timing of the receipt of orders and subsequent shipments in these markets may vary from year to year. On a combined basis, sales for these two markets decreased approximately 10% from \$151.8 million in fiscal year 2008 to \$135.9 million in fiscal year 2009, primarily due to an expected \$8.7 million decrease in shipments of products to support the Aegis weapons system and decreases in sales for several other radar and electronic warfare programs due to the timing of order receipts for those programs. These decreases were partially offset by the shipment of products from development programs to support radar applications.
- **Medical:** Sales of our medical products consist of sales for medical imaging applications, such as x-ray imaging, MRI and PET applications, and for radiation therapy applications for the treatment of cancer. The 7% decrease in medical product sales was due to decreased sales of x-ray imaging products to international customers as a result of the weakness of global economies. Our sales of products to support MRI and radiation therapy applications remained stable in fiscal year 2009.
- **Communications:** Sales of our communications products consist of sales for commercial communications applications and military communications applications. The 10% decrease in sales in the communications market was primarily attributable to decreases in sales to support certain commercial communications applications, including satellite news gathering and direct-to-home broadcast applications. We believe that the decreases were largely due to the weakness of global economies. These decreases were partially offset by an increase in sales of products for military communications programs, which was a relatively new sector of the overall communications market for us.
- **Industrial:** Sales in the industrial market are cyclical and are generally tied to the state of the economy. The \$4.9 million decrease in industrial sales was attributable to decreases in sales of products used in a wide variety of industrial applications.
- **Scientific:** Sales in the scientific market are historically one-time projects and can fluctuate significantly from period to period. The \$0.3 million decrease in scientific sales was primarily the result of the timing of certain scientific programs.

Cost-reduction Initiatives in Fiscal Year 2009. In fiscal year 2009, we implemented a number of temporary and permanent cost-saving measures to counter the impact of lower sales due to the worldwide economic slowdown, including reducing our worldwide workforce by approximately 7%, or 120 people. In addition, we implemented a salary freeze and salary reductions, temporary shutdowns of facilities, increased employees' mandatory time off, initiated work-share programs and reduced our contributions to certain employee retirement plans.

Gross Profit. Gross profit was \$93.5 million, or 28.1% of sales, for fiscal year 2009 as compared to \$108.9 million, or 29.4% of sales, for fiscal year 2008. The primary reason for the reduction in gross profit in fiscal year 2009 as compared to fiscal year 2008 was lower sales volume and, therefore, lower manufacturing cost absorption due to the reduction in sales volume. This decrease was partially offset by improved gross margins at our Malibu Division and lower expenses from cost-reduction initiatives in fiscal year 2009.

Table of Contents

Research and Development. Company-sponsored research and development expenses were \$10.5 million, or 3.2% of sales, for fiscal year 2009 and \$10.8 million, or 2.9% of sales for fiscal year 2008. Customer-sponsored research and development expenses were \$17.5 million in fiscal year 2009, an increase of \$5.5 million as compared to fiscal year 2008, representing an increase of approximately 46%. This increase was primarily in advanced antenna system products used for telemetry and tactical common data link (“TCDL”) applications.

Total spending on research and development, including customer-sponsored research and development, was as follows (in millions):

	Year Ended	
	October	October
	2,	3,
	2009	2008
Company sponsored	\$ 10.5	\$ 10.8
Customer sponsored, charged to cost of sales	17.5	12.0
	\$ 28.0	\$ 22.8

Selling and Marketing. Selling and marketing expenses were \$19.5 million, or 5.9% of sales, for fiscal year 2009, a \$1.6 million decrease from the \$21.1 million in fiscal year 2008. The reduction in selling and marketing expenses in fiscal year 2009 as compared to fiscal year 2008 was primarily due to lower expenses from cost-reduction initiatives and the favorable impact from currency translation of our foreign-based expenses in fiscal year 2009.

General and Administrative. General and administrative expenses were \$20.8 million, or 6.2% of sales, for fiscal year 2009, a \$2.1 million decrease from the \$22.9 million, or 6.2% of sales, for fiscal year 2008. The decrease in general and administrative expenses in fiscal year 2009 as compared to fiscal year 2008 was primarily due to lower expenses related to the implementation of cost-reduction initiatives during fiscal year 2009.

Amortization of Acquisition-related Intangibles. Amortization of acquisition-related intangibles consists of purchase accounting charges for technology and other intangible assets. Amortization of acquisition-related intangibles was \$2.8 million for fiscal year 2009 and \$3.1 million for fiscal year 2008. The \$0.3 million decrease in amortization of acquisition-related intangibles in fiscal year 2009 was primarily due to completed amortization of customer backlog in fiscal year 2008 for our Malibu Division, which was acquired in August 2007. Amortizable acquisition-related intangible assets are amortized over periods of up to 50 years.

Interest Expense, net (“Interest Expense”). Interest Expense of \$17.0 million for fiscal year 2009 was \$2.1 million lower than interest expense of \$19.1 million for fiscal year 2008. The reduction in interest expense in fiscal year 2009 as compared to fiscal year 2008 was primarily due to repayments of debt.

(Gain) Loss on Debt Extinguishment. The gain on debt extinguishment of \$0.2 million in fiscal year 2009 resulted from the repurchase of \$8.0 million of our 8% senior subordinated notes at a discount of \$0.4 million, partially offset by a \$0.2 million non-cash write-off of deferred debt issue costs. The loss on debt extinguishment of \$0.6 million in fiscal year 2008 resulted from the early redemption of \$10.0 million of our floating rate senior notes, consisting of \$0.4 million in non-cash write-off of deferred debt issue costs and issue discount costs and \$0.2 million in cash payments for call premiums.

Table of Contents

Income Tax (Benefit) Expense. We recorded an income tax benefit of \$0.2 million for fiscal year 2009 and an income tax expense of \$10.8 million for fiscal year 2008. Our effective tax rates were a negative 0.9% for fiscal year 2009 and 34.6% for fiscal year 2008.

The income tax benefit for fiscal year 2009 included several significant discrete tax benefits: (1) \$4.9 million relating to our position with regard to an outstanding audit by the CRA, (2) \$1.7 million for the correction of immaterial errors to tax accounts that should have been recorded in prior year's financial statements, (3) \$0.7 million related to certain provisions of the California Budget Act of 2008 signed on February 20, 2009, which will allow a taxpayer to elect an alternative method to apportion taxable income to California for tax years beginning on or after January 1, 2011, and (4) \$0.6 million for refunds claimed on prior year income tax returns based on the results of a foreign nexus study. In fiscal year 2009, we also recorded a \$0.4 million U.S. research and development tax credit.

In December 2008, a new tax treaty protocol between Canada and the U.S. became effective. The new treaty requires mandatory arbitration for the resolution of double taxation disputes not settled through the competent authority process. As a result of this new treaty, our tax position on an outstanding audit by the CRA became more favorable, and we reduced our tax contingency reserve in Canada by \$2.8 million, and established an income tax receivable and recognized an income tax benefit in the U.S for \$2.8 million; this tax benefit was partially offset by a related increase in deferred tax liabilities of \$0.7 million.

The \$1.7 million correction to prior year's financial statements in fiscal year 2009 comprises \$0.9 million for changes in foreign income tax rates that were not updated in a timely manner and \$0.8 million recorded in the fourth quarter to true-up the 2008 income tax provision. Fiscal year 2008 included a discrete tax benefit of \$0.4 million that is attributable to fiscal year 2007 related to the correction of an immaterial error in the computation of the deferred taxes for warranty expenses in a foreign tax jurisdiction. We believe that the impact of these corrections was not material to our fiscal year 2009 consolidated financial statements or in any of the prior year consolidated financial statements.

Net Income. Net income was \$23.5 million, or 7.1% of sales, for fiscal year 2009 as compared to \$20.4 million, or 5.5% of sales, for fiscal year 2008. The \$3.1 million increase in net income in fiscal year 2009 as compared to fiscal year 2008 was primarily due to discrete income tax benefits, lower expenses from the implementation of cost-reduction initiatives and lower interest expense in fiscal year 2009, partially offset by lower gross profit from the reduction in sales volume in fiscal year 2009.

EBITDA. EBITDA was \$51.0 million, or 15.3% of sales, for fiscal year 2009 as compared to \$61.3 million, or 16.6% of sales, in fiscal year 2008. The \$10.3 million decrease in EBITDA in fiscal year 2009 as compared to fiscal year 2008 was due primarily to lower gross profit from the reduction in sales volume, partially offset by lower expenses from the implementation of cost-reduction initiatives in fiscal year 2009.

Table of Contents

Calculation of Management Bonuses. Management bonuses were \$1.2 million in fiscal year 2009 compared to \$1.9 million in fiscal year 2008. Management bonuses for fiscal years 2009 and 2008 were calculated pursuant to our Management Incentive Plan (“MIP”) and were based on three factors: (1) EBITDA as adjusted for purposes of calculating management bonuses; (2) a measure of cash generated by operations; and (3) individual goals that were customized for certain participating members of management. The weight given to each of these factors varied for each person. Generally, for our officers, equal weight was given to the first two factors, and the third factor was not applicable. For our other members of management, equal weight was given to each of the three factors described above. Management bonuses are paid in cash approximately three months after the end of the fiscal year. EBITDA as adjusted for purposes of calculating management bonuses is equal to EBITDA for the fiscal year adjusted to exclude the impact of certain non-recurring or non-cash charges as pre-determined in our MIP for the fiscal year. EBITDA for purposes of calculating management bonuses for fiscal year 2009 was \$53.5 million compared to \$64.0 million in fiscal year 2008. The non-recurring and non-cash charges that were excluded from EBITDA in calculating management bonuses were (a) for fiscal year 2009, gain on debt extinguishment of \$0.2 million and stock-based compensation expense of \$2.7 million, and (b) for fiscal year 2008, loss on debt extinguishment of \$0.6 million and stock-based compensation expense of \$2.1 million. We are presenting EBITDA as adjusted for purposes of calculating management bonuses here to help investors understand how our management bonuses were calculated, and not as a measure to be used by investors to evaluate our operating results or liquidity.

Liquidity and Capital Resources

Overview

Our liquidity is affected by many factors, some of which are based on normal ongoing operations of our business and others that are related to uncertainties in the markets in which we compete and other global economic factors. We have historically financed, and intend to continue to finance, our capital and working capital requirements including debt service and internal growth, through a combination of cash flows from our operations and borrowings under our senior credit facilities. Our primary uses of cash are cost of sales, operating expenses, debt service and capital expenditures.

Cash and Working Capital

The following summarizes our cash and cash equivalents and working capital (in millions):

	October 1, 2010	October 2, 2009	October 3, 2008
Cash and cash equivalents	\$ 42.8	\$ 26.2	\$ 28.7
Working capital	\$ 44.8	\$ 92.4	\$ 88.1

Our senior credit facility is scheduled to come due on August 1, 2011 unless we refinance our outstanding 8% senior subordinated notes prior to such date. As of October 1, 2010, the principal balance of the senior credit facility term loan and the 8% senior subordinated notes was \$66.0 million and \$117.0 million, respectively. We intend to seek replacement refinancing and repay the respective loans within fiscal year 2011 prior to their scheduled maturity dates. While we believe that, based on our cash flow from operations and past history, we will be successful in obtaining the replacement financing necessary to repay our debt scheduled to mature in 2011, there are no assurances that such refinancing will be successful. If we are unable to refinance our senior credit facility, we will need to seek to implement other alternatives such as issuing common stock or securities convertible into common stock to repay our

indebtedness. If implemented, these actions could negatively impact our business or dilute our existing stockholders.

- 55 -

Table of Contents

We invest cash balances in excess of operating requirements in overnight U.S. Government securities and money market accounts. In addition to the above cash and cash equivalents, we have restricted cash of \$1.8 million as of October 1, 2010, consisting primarily of bank guarantees from customer advance payments to our international subsidiaries. The bank guarantees become unrestricted cash when performance under the sales contract is complete.

The significant factors underlying the \$16.7 million net increase in cash and cash equivalents during fiscal year 2010 were the net cash provided by our operating activities of \$19.8 million and proceeds and tax benefits of \$1.4 million from employee stock purchases and exercise of stock options, partially offset by capital expenditures of \$4.5 million.

We had total principal amount of debt outstanding of \$195.0 million as of October 1, 2010 and October 2, 2009. As of October 1, 2010, we had borrowing availability of \$55.5 million under the revolver under our senior credit facilities.

As more fully described below, our most significant debt covenant compliance requirement is maintaining a secured leverage ratio of less than 3.75:1. Our current secured leverage ratio is approximately 0.38:1.

Historical Operating, Investing and Financing Activities

In summary, our cash flows were as follows (in millions):

	Year Ended		
	October 1, 2010	October 2, 2009	October 3, 2008
Net cash provided by operating activities	\$ 19.8	\$ 30.1	\$ 33.9
Net cash used in investing activities	(4.5)	(3.3)	(2.8)
Net cash provided by (used) in financing activities	1.4	(29.3)	(22.9)
Net increase (decrease) in cash and cash equivalents	\$ 16.7	\$ (2.5)	\$ 8.2

Operating Activities

In fiscal years 2010, 2009 and 2008, we funded our operating activities through cash generated internally. Cash provided by operating activities is net income adjusted for certain non-cash items and changes to working capital items.

Net cash provided by operating activities of \$19.8 million in fiscal year 2010 was attributable to net income of \$6.7 million, depreciation, amortization and other non-cash charges of \$11.1 million, and net cash provided by working capital of \$2.0 million. The primary working capital sources of cash in fiscal year 2010 were an increase in accrued liabilities, income tax payable, net, and accounts payable, partially offset by an increase in inventories. The increase in accrued liabilities reflects increased payroll and paid-time off accruals, as well as incentive compensation as a result of improved operating results. The expenses incurred in connection with the terminated Comtech merger agreement that remained unpaid as of October 1, 2010 also contributed to the increase in accrued liabilities. The increase in income tax payable, net, primarily reflects tax expense accruals related to the uncertainty of obtaining a tax deduction for all

of the expenses incurred in connection with the Comtech merger agreement. The increase in accounts payable was primarily due to higher inventory levels, which resulted primarily from increased inventory purchases to support increased orders and the sales level anticipated for the first half of fiscal year 2011.

- 56 -

Table of Contents

Net cash provided by operating activities of \$30.1 million in fiscal year 2009 was attributable to net income of \$23.5 million, depreciation, amortization and other non-cash charges of \$13.9 million, partially offset by \$7.3 million net cash used for working capital. The primary working capital uses of cash in fiscal year 2009 were the change in income tax payable primarily attributable to discrete tax benefits related to an outstanding audit by the CRA, a decrease in accrued expenses and an increase in inventories. The decrease in accrued expenses related primarily to the timing of payroll and employee vacations and to lower incentive compensation accruals. The increase in inventories was due mainly to more work in process for fiscal year 2010 sales. These uses of cash were slightly offset by decreases in receivables and an increase in accounts payable. Accounts receivables decreased as a result primarily by decreased sales. The increase in accounts payable was attributable primarily to the timing of vendor payments.

Net cash provided by operating activities of \$33.9 million in fiscal year 2008 was attributable to net income of \$20.4 million and depreciation, amortization and other non-cash charges of \$13.7 million, slightly offset by \$0.2 million net cash used for working capital. The primary working capital uses of cash in fiscal year 2008 were decreases in accrued expenses, product warranty and income taxes payable. The decrease in accrued expenses related primarily to the timing of payroll and employee vacations, combined with lower incentive compensation and a decrease in consulting and professional costs. These uses of cash were significantly offset by decreases in receivables and inventories and release of restricted cash. Accounts receivables decreased due to timing and improved collection of trade receivables. Inventories decreased due to an effort to reduce inventory carrying levels.

Investing Activities

Investing activities for fiscal years 2010 and 2009 consisted of \$4.5 million and \$3.3 million capital expenditures, respectively.

Investing activities for fiscal year 2008 consisted primarily of \$4.3 million capital expenditures and \$0.1 million payment of patent application fees. The amount of cash used in investing activities was partially offset by a \$1.6 million escrow refund related to the August 2007 acquisition of Malibu Research, Inc.

Financing Activities

Net cash provided by financing activities for fiscal year 2010 consisted of proceeds and tax benefits of \$1.4 million from employee stock purchases and exercise of stock options.

Net cash used in financing activities for fiscal year 2009 consisted primarily of senior term loan repayment of \$22.7 million and senior subordinated notes repurchase of \$7.6 million, net of \$0.4 million discount, partially offset by \$1.0 million in proceeds from employee stock purchases and stock option exercises.

Net cash used in financing activities for fiscal year 2008 consisted primarily of \$2.8 million of treasury stock purchases under the stock repurchase program discussed below, redemption of \$10.0 million in principal amount of our floating rate senior notes and term loan repayments aggregating \$11.0 million. The cash used in financing activities for fiscal year 2008 was partially offset by \$0.9 million in proceeds from employee stock purchases.

Table of Contents

If the leverage ratio under our amended and restated senior credit facilities exceeds 3.5:1 at the end of any fiscal year, then we are required to make an annual prepayment within 90 days after the end of the fiscal year based on a calculation of excess cash flow, as defined in the senior credit facilities, multiplied by a factor of 50%, less any optional prepayments made during the fiscal year. Based on the calculation of excess cash flow for fiscal year 2010, no excess cash flow payment is expected to be made in fiscal year 2011. There was no excess cash flow payment due for fiscal years 2009 and 2008, and, therefore, no excess cash flow payment was made in fiscal years 2010 and 2009.

Contractual Obligations

The following table summarizes our significant contractual obligations as of October 1, 2010 and the effect that such obligations are expected to have on our liquidity and cash flows in future periods (in thousands):

	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Operating leases	\$6,320	\$1,409	\$1,128	\$699	\$3,084
Purchase commitments	28,850	28,519	326	5	-
Debt obligations	195,000	66,000	117,000	12,000	-
Interest on debt obligations	17,760	12,203	4,547	1,010	-
Uncertain tax positions, including interest	7,750	3,848	3,902	-	-
Total cash obligations	\$255,680	\$111,979	\$126,903	\$13,714	\$3,084
Standby letters of credit	\$4,544	\$4,544			

The amounts for debt obligations and interest on debt obligations assume (1) that the respective debt instruments will be outstanding until their scheduled maturity dates, except for the term loan under the senior credit facilities, which is assumed to mature on the earlier date of August 1, 2011 as described below under "Senior Credit Facilities," (2) that interest rates in effect on October 1, 2010 remain constant for future periods, and (3) a debt level based on mandatory repayments according to the contractual amortization schedule.

The expected timing of payment amounts of the obligations in the above table is estimated based on current information; timing of payments and actual amounts paid may be different.

Leases: We are committed to minimum rentals under non-cancelable operating lease agreements, primarily for land and facility space, that expire on various dates through 2050. Certain of our leases provide for escalating lease payments. Assets subject to capital leases as of October 1, 2010 were not material.

Purchase Commitments: As of October 1, 2010, we had known purchase commitments of \$28.9 million, which include primarily future purchases for inventory-related items under various purchase arrangements as well as other obligations in the ordinary course of business that we cannot cancel or for which we would be required to pay a termination fee in the event of cancellation.

Table of Contents

Debt Obligations: Long-term debt comprises the following (in thousands):

	October 1, 2010	October 2, 2009
Term loan	\$ 66,000	\$ 66,000
8% Senior subordinated notes due 2012	117,000	117,000
Floating rate senior notes due 2015, net of issue discount of \$66 and \$78	11,934	11,922
	194,934	194,922
Less: Current portion	66,000	-
Long-term portion	\$ 128,934	\$ 194,922
Standby letters of credit	\$ 4,544	\$ 5,544

Senior Credit Facilities: The senior credit facilities of Communications & Power Industries (“Senior Credit Facilities”) provide for borrowings of up to an aggregate principal amount of \$160 million, consisting of a \$100 million term loan facility (“Term Loan”) and a \$60 million revolving credit facility (“Revolver”), with a sub-facility of \$15 million for letters of credit and \$5 million for swing line loans. Upon certain specified conditions, including maintaining a senior secured leverage ratio of 3.75:1 or less on a pro forma basis, Communications & Power Industries may seek commitments for a new class of term loans, not to exceed \$125 million in the aggregate. The Senior Credit Facilities are guaranteed by CPI International and all of Communications & Power Industries’ domestic subsidiaries and are secured by substantially all of the assets of CPI International, Communications & Power Industries and Communications & Power Industries’ domestic subsidiaries.

Both the Term Loan and the Revolver will mature on August 1, 2011 if, prior to August 1, 2011, Communications & Power Industries has not repaid or refinanced its 8% Senior Subordinated Notes due 2012. If Communications & Power Industries repays or refinances its 8% Senior Subordinated Notes due 2012 prior to August 1, 2011, then the Term Loan would mature on August 1, 2014 and the Revolver would mature on August 1, 2013.

In August 2007, Communications & Power Industries borrowed \$100 million under the Term Loan. Borrowings under the Senior Credit Facilities bear interest at a rate equal to, at Communications & Power Industries’ option, LIBOR or the ABR plus the applicable margin. The ABR is the greater of the (a) the prime rate and (b) the federal funds rate plus 0.50%. For term loans, the applicable margin is 2.00% for LIBOR borrowings and 1.00% for ABR borrowings. The applicable margins under the revolver vary depending on Communications & Power Industries’ leverage ratio, as defined in the Senior Credit Facilities, and range from 1.25% to 2.00% for LIBOR borrowings and from 0.25% to 1.00% for ABR borrowings.

In addition to customary fronting and administrative fees under the Senior Credit Facilities, Communications & Power Industries will pay letter of credit participation fees equal to the applicable LIBOR margin per annum on the average daily amount of the letter of credit exposure and a commitment fee on the average daily unused commitments under the Revolver. The commitment fee varies depending on Communications & Power Industries’ leverage ratio, as defined in the Senior Credit Facilities, and ranges from 0.25% to 0.50%.

Table of Contents

The Senior Credit Facilities require that Communications & Power Industries repay \$250,000 of the Term Loan at the end of each fiscal quarter prior to the maturity date of the Term Loan, with the remainder due on the maturity date. Communications & Power Industries is required to prepay its outstanding loans under the Senior Credit Facilities, subject to certain exceptions and limitations, with net cash proceeds received from certain events, including, without limitation, (1) all such proceeds received from certain asset sales by CPI International, Communications & Power Industries or any of Communications & Power Industries' subsidiaries, (2) all such proceeds received from issuances of debt (other than certain specified permitted debt) or preferred stock by CPI International, Communications & Power Industries or any of Communications & Power Industries' subsidiaries, and (3) all such proceeds paid to CPI International, Communications & Power Industries or any of Communications & Power Industries' subsidiaries from casualty and condemnation events in excess of amounts applied to replace, restore or reinvest in any properties for which proceeds were paid within a specified period.

If Communications & Power Industries' leverage ratio, as defined in the Senior Credit Facilities, exceeds 3.5:1 at the end of any fiscal year, Communications & Power Industries will also be required to make an annual prepayment within 90 days after the end of such fiscal year equal to 50% of excess cash flow, as defined in the Senior Credit Facilities, less optional prepayments made during the fiscal year. Communications & Power Industries can make optional prepayments on the outstanding loans at any time without premium or penalty, except for customary "breakage" costs with respect to LIBOR loans.

The Senior Credit Facilities contain a number of covenants that, among other things, restrict, subject to certain exceptions, the ability of CPI International, Communications & Power Industries or any of Communications & Power Industries' subsidiaries to: sell assets; engage in mergers and acquisitions; pay dividends and distributions or repurchase their capital stock; incur additional indebtedness or issue equity interests; make investments and loans; create liens or further negative pledges on assets; engage in certain transactions with affiliates; enter into sale and leaseback transactions; amend agreements or make prepayments relating to subordinated indebtedness; and amend or waive provisions of charter documents in a manner materially adverse to the lenders. Communications & Power Industries and its subsidiaries must comply with a maximum capital expenditure limitation and a maximum total secured leverage ratio, each calculated on a consolidated basis for Communications & Power Industries.

Communications & Power Industries made no payments on the Term Loan during fiscal year 2010. During fiscal years 2009 and 2008, Communications & Power Industries made repayments on the Term Loan of \$22.8 million and \$11.0, respectively. As of October 1, 2010, the principal balance of the Term Loan was \$66.0 million.

At October 1, 2010, the amount available for borrowing under the Revolver, after taking into account Communications & Power Industries' outstanding letters of credit of \$4.5 million, was approximately \$55.5 million.

Table of Contents

8% Senior Subordinated Notes due 2012 of Communications & Power Industries: As of October 1, 2010, Communications & Power Industries had \$117.0 million in aggregate principal amount of its 8% Senior Subordinated Notes due 2012 (the "8% Notes"). Communications & Power Industries made no repurchase of any of the outstanding 8% Notes during fiscal year 2010. During fiscal year 2009, Communications & Power Industries repurchased a total of \$8.0 million. Communications & Power Industries repurchased \$3.0 million aggregate principal amount of the 8% Notes in January 2009 at a discount of 8.5% to par value. Communications & Power Industries paid approximately \$2.9 million, including accrued interest of \$0.1 million, for the repurchase and realized a net gain of approximately \$0.2 million. Communications & Power Industries also repurchased \$5.0 million aggregate principal amount of the 8% Notes in June 2009 at a discount of 2.75% to par value. Communications & Power Industries paid approximately \$5.0 million, including accrued interest of \$0.2 million, for the repurchase and realized a net gain of approximately \$0.1 million. The 8% Notes have no sinking fund requirements.

The 8% Notes bear interest at the rate of 8.0% per year, payable on February 1 and August 1 of each year. The 8% Notes will mature on February 1, 2012. The 8% Notes are unsecured obligations, jointly and severally guaranteed by CPI International and each of Communications & Power Industries' domestic subsidiaries. The payment of all obligations relating to the 8% Notes are subordinated in right of payment to the prior payment in full in cash or cash equivalents of all senior debt (as defined in the indenture governing the 8% Notes) of Communications & Power Industries, including debt under the Senior Credit Facilities. Each guarantee of the 8% Notes is and will be subordinated to guarantor senior debt (as defined in the indenture governing the 8% Notes) on the same basis as the 8% Notes are subordinated to Communications & Power Industries' senior debt.

At any time or from time to time, Communications & Power Industries, at its option, may redeem the 8% Notes, in whole or in part, at the redemption prices (expressed as percentages of principal amount) thereof, together with accrued and unpaid interest thereon, if any, to the redemption date, if redeemed during the 12-month period beginning on February 1 of any given year. For year 2010 and thereafter, the optional redemption price is 100% of the principal amount of the 8% Notes.

Upon a change of control, Communications & Power Industries may be required to purchase all or any part of the 8% Notes for a cash price equal to 101% of the principal amount, plus accrued and unpaid interest thereon, if any, to the date of purchase.

The indenture governing the 8% Notes contains a number of covenants that, among other things, restrict, subject to certain exceptions, the ability of Communications & Power Industries and its restricted subsidiaries (as defined in the indenture governing the 8% Notes) to incur additional indebtedness, sell assets, consolidate or merge with or into other companies, pay dividends or repurchase or redeem capital stock or subordinated indebtedness, make certain investments, issue capital stock of their subsidiaries, incur liens and enter into certain types of transactions with their affiliates.

Events of default under the indenture governing the 8% Notes include: failure to make payments on the 8% Notes when due; failure to comply with covenants in the indenture governing the 8% Notes; a default under certain other indebtedness of Communications & Power Industries or any of its restricted subsidiaries that is caused by a failure to make payments on such indebtedness or that results in the acceleration of the maturity of such indebtedness; the existence of certain final judgments or orders against Communications & Power Industries or any of the restricted subsidiaries; and the occurrence of certain insolvency or bankruptcy events.

Table of Contents

Floating Rate Senior Notes due 2015 of CPI International: As of October 1, 2010, \$12.0 million of aggregate principal amount remained outstanding under CPI International's Floating Rate Senior Notes due 2015 (the "FR Notes"). CPI International redeemed none of its outstanding FR Notes during fiscal years 2010 and 2009. During fiscal year 2008, CPI International redeemed \$10.0 million aggregate principal amount of the FR Notes. The FR Notes were originally issued at a 1% discount and have no sinking fund requirements.

The FR Notes require interest payments at an annual interest rate, reset at the beginning of each semi-annual period, equal to the then six-month LIBOR plus 5.75%, payable semiannually on February 1 and August 1 of each year. The interest rate on the semi-annual interest payment due February 1, 2011 is 6.43% per annum. The FR Notes will mature on February 1, 2015.

The FR Notes are general unsecured obligations of CPI International. The FR Notes are not guaranteed by any of CPI International's subsidiaries but are structurally subordinated to all existing and future indebtedness and other liabilities of CPI International's subsidiaries. The FR Notes are senior in right of payment to CPI International's existing and future indebtedness that is expressly subordinated to the FR Notes.

Because CPI International is a holding company with no operations of its own, CPI International relies on distributions from Communications & Power Industries to satisfy its obligations under the FR Notes. The Senior Credit Facilities and the indenture governing the 8% Notes restrict Communications & Power Industries' ability to make distributions to CPI International. The Senior Credit Facilities prohibit Communications & Power Industries from making distributions to CPI International unless there is no default under the Senior Credit Facilities and Communications & Power Industries satisfies a senior secured leverage ratio of 3.75:1 and, in the case of distributions to pay amounts other than interest on the FR Notes, the amount of the distribution and all prior such distributions do not exceed a specified amount. The indenture governing the 8% Notes prohibits Communications & Power Industries from making distributions to CPI International unless, among other things, there is no default under the indenture and the amount of the proposed dividend plus all previous Restricted Payments (as defined in the indenture governing the 8% Notes) does not exceed a specified amount.

At any time or from time to time, CPI International, at its option, may redeem the FR Notes, in whole or in part, at the redemption prices (expressed as percentages of principal amount) thereof, together with accrued and unpaid interest thereon, if any, to the redemption date, if redeemed during the 12-month period beginning on February 1 of any given year. For year 2010 and thereafter, the optional redemption price is 100% of the principal amount of the FR Notes.

Upon a change of control, as defined in the indenture governing the FR Notes, CPI International may be required to purchase all or any part of the outstanding FR Notes for a cash price equal to 101% of the principal amount, plus accrued and unpaid interest thereon, if any, to the date of purchase.

The indenture governing the FR Notes contains certain covenants that, among other things, limit the ability of CPI International and its restricted subsidiaries (as defined in the indenture governing the FR Notes) to incur additional indebtedness, sell assets, consolidate or merge with or into other companies, pay dividends or repurchase or redeem capital stock or subordinated indebtedness, make certain investments, issue capital stock of their subsidiaries, incur liens and enter into certain types of transactions with their affiliates.

Events of default under the indenture governing the FR Notes include: failure to make payments on the FR Notes when due; failure to comply with covenants in the indenture governing the FR Notes; a default under certain other indebtedness of CPI International or any of its restricted subsidiaries that is caused by a failure to make payments on such indebtedness or that results in the acceleration of the maturity of such indebtedness; the existence of certain final judgments or orders against CPI International or any of the restricted subsidiaries; and the occurrence of certain insolvency or bankruptcy events.

Table of Contents

Interest Rate Swaps: To hedge the interest rate exposure associated with the term loan under our Senior Credit Facilities, in fiscal year 2007, we entered into an interest rate swap contract to receive three-month USD-LIBOR-BBA (British Bankers' Association) interest and pay 4.77% fixed rate interest. Net interest positions are settled quarterly. We have structured this interest rate swap with decreasing notional amounts such that it is less than the balance of our Term Loan under the Senior Credit Facilities. The notional value of the interest rate swap was \$30.0 million at October 1, 2010 and represented approximately 45% of the aggregate term loan balance. The interest rate swap agreement is effective through June 30, 2011. There are no collateral requirements under the interest rate swap.

Covenant Compliance: Our ability to continue to operate depends, among other things, on our continued access to capital, including credit under our Senior Credit Facilities. These credit facilities, along with the indentures governing the floating rate senior notes and the 8% Notes, contain certain restrictive covenants. Continued access to our Senior Credit Facilities is subject to remaining in compliance with the covenants thereunder.

Our Senior Credit Facilities contain a maximum total secured leverage ratio covenant of 3.75:1 for Communications & Power Industries. As of October 1, 2010, the secured leverage ratio for Communications & Power Industries was 0.38:1. The secured leverage ratio is the ratio of Consolidated Secured Indebtedness (as defined for purposes of our Senior Credit Facilities, which generally includes total secured debt less cash and cash equivalents, of Communications & Power Industries) to Consolidated EBITDA (as computed pursuant to the formulas set forth in our Senior Credit Facilities). For fiscal year 2010, Consolidated Secured Indebtedness was \$23.2 million and Consolidated EBITDA was \$61.6 million.

Consolidated EBITDA is used to determine compliance with many of the covenants contained in our Senior Credit Facilities. Consolidated EBITDA and all of its component elements are defined in our debt agreements and include non-GAAP measures. Consolidated EBITDA is defined as EBITDA further adjusted to exclude unusual items, non-cash items and other adjustments permitted in calculating covenant compliance under our Senior Credit Facilities, as shown in the table below.

Consolidated EBITDA as calculated under our Senior Credit Facilities for fiscal year 2010 is as follows (in millions):

EBITDA(a)	\$38.6
Stock compensation expense(b)	3.1
Strategic alternative transaction costs(c)	19.9
Consolidated EBITDA	\$61.6

For a reconciliation of net income to EBITDA for (a) fiscal year 2010, see footnote 8 in "Selected Financial Data."

(b) Represents a non-cash charge for stock compensation related to stock options, restricted stock and the discount on our employee stock purchases.

(c) Includes termination fee of \$15.0 and transaction expenses of \$4.9 relating to a recently terminated merger agreement between CPI International and Comtech.

Table of Contents

Events beyond our control may affect our ability to comply with the covenant ratios described above as well as the other covenants in our Senior Credit Facilities. Any breach of the covenants in our Senior Credit Facilities could result in a default and could trigger acceleration of (or the right to accelerate) the amounts owing under our Senior Credit Facilities. Because of cross-default provisions in the agreements and instruments governing our indebtedness, a default under our Senior Credit Facilities could result in a default under, and the acceleration of, our other indebtedness. In addition, the lenders under our Senior Credit Facilities could proceed against the collateral securing that indebtedness. If the indebtedness under our Senior Credit Facilities were to be accelerated, our ability to operate our business would be materially impaired.

As of October 1, 2010, we are in compliance with the covenants under the indentures governing our FR Notes, 8% Notes and the agreements governing our Senior Credit Facilities, and we expect to remain in compliance with those covenants throughout fiscal year 2011.

Contingent Income Tax Obligations

As of October 1, 2010, our total unrecognized tax benefits, including any related interest accrual, were \$3.8 million and \$3.9 million reported as income taxes payable (current liability) and other long-term liabilities, respectively, in our consolidated balance sheet. See Note 11 to the accompanying consolidated financial statements for more information.

Dividends from Communications & Power Industries to CPI International

For fiscal years 2010, 2009 and 2008, respectively, Communications & Power Industries paid \$15.7 million, \$0.8 million and \$13.6 million of cash dividends to CPI International. In fiscal year 2010, CPI International used \$15.0 million of the cash dividends to pay expenses incurred in connection with the recently terminated Comtech merger agreement and \$0.7 million to make cash interest payments on the FR Notes. In fiscal year 2009, CPI International used \$0.8 million of the cash dividends to make cash interest payments on the FR Notes. In fiscal year 2008, CPI International used \$10.0 million of the cash dividends to repurchase and redeem FR Notes, \$2.8 million to repurchase approximately 206,000 shares of our stock, \$0.5 million to make cash interest payments on the FR Notes and \$0.2 million for redemption premiums and other fees and expenses related to the repurchase and redemption of the FR Notes. Our future ability to make semi-annual cash interest payments on our FR Notes and pay any principal and related obligations will depend on Communications & Power Industries' ability to make dividends to CPI International in the amounts necessary for such payments. Our Senior Credit Facilities prohibit Communications & Power Industries from making distributions to CPI International unless there is no default under our Senior Credit Facilities and we and Communications & Power Industries satisfy the secured leverage ratio test described above.

The indenture governing Communications & Power Industries' 8% Notes prohibits Communications & Power Industries from making distributions to us unless:

- There is no default under the indenture.
- The ratio of Communications & Power Industries' Consolidated Cash Flow (as defined in the indenture) for the most recent four quarters to Communications & Power Industries' Consolidated Interest Expense (as defined in the indenture) for the same period is at least 2:1. As of October 1, 2010, the ratio of Communications & Power Industries' Consolidated Cash Flow for the most recent four quarters to Communications & Power Industries' Consolidated Interest Expense was 4.71:1.

Table of Contents

- The amount of the proposed dividend plus all previous Restricted Payments (as defined in the indenture) does not exceed the aggregate contractual limit on Restricted Payments, which is based on one-half of the aggregate Consolidated Net Income of Communications & Power Industries since the date of the issuance of the 8% Notes, the amount of certain capital contributions and certain other items. In addition, the indenture permits up to \$10 million of additional Restricted Payments outside of the contractual limit described in the preceding sentence.

Capital Expenditures

Our continuing operations typically do not have large recurring capital expenditure requirements. Capital expenditures are generally made to replace existing assets, increase productivity, facilitate cost reductions or meet regulatory requirements. Total capital expenditures for fiscal year 2010 were \$4.5 million. In fiscal year 2011, ongoing capital expenditures are expected to be approximately \$5.0 to \$6.0 million and to be funded by cash flows from operating activities.

Recent Accounting Pronouncements

See Note 2 to the accompanying audited consolidated financial statements for information regarding the effect of new accounting pronouncements on our financial statements.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with generally accepted accounting principles, or GAAP, in the United States of America, which require us to make certain estimates, judgments and assumptions. We believe that the estimates, judgments and assumptions upon which we rely are reasonable based upon various factors and information available to us at the time that these estimates, judgments and assumptions are made. These factors and information may include, but are not limited to, history and prior experience, experience of other enterprises in the same industry, new related events, current economic conditions and information from third-party professionals. The estimates, judgments and assumptions we make can affect the reported amounts of assets and liabilities as of the date of the financial statements, as well as the reported amounts of revenues and expenses during the periods presented. To the extent there are material differences between these estimates, judgments or assumptions and actual results, our financial statements will be affected.

We believe that the following critical accounting policies are the most significant to the presentation of our financial statements and require the most subjective and complex judgments. These matters, and the judgments and uncertainties affecting them, are also essential to understanding our reported and future operating results. See Note 1 to our audited consolidated financial statements for a more comprehensive discussion of our significant accounting policies.

Table of Contents

Revenue recognition

We generally recognize revenue upon shipment of product, following receipt of written purchase orders, when the price is fixed or determinable, title has transferred and collectability is reasonably assured. Revenue recognized under the percentage-of-completion method of accounting is determined on the basis of costs incurred and estimates of costs at completion, which require management estimates of future costs. Changes in estimated costs at completion over time could have a material impact on our operating results.

Revenue from contracts that contain multiple elements, through October 1, 2010, was allocated to each respective element or unit of accounting, based on each element's relative fair value using vendor-specific objective evidence ("VSOE") or third-party evidence ("TPE"), if determinable, and was recognized when the respective revenue recognition criteria for each element was met. Effective October 2, 2010, we are required to adopt the provisions of the Financial Accounting Standards Board ("FASB") Accounting Standards Update 2009-13, "Revenue Recognition (Topic 605): Multiple Deliverable Revenue Arrangements – A Consensus of the FASB Emerging Issues Task Force," which, among other things, requires revenue to be allocated to each element based on the relative selling price method in the absence of VSOE or TPE. See Note 2 to the accompanying audited consolidated financial statements. Changes in assumptions or judgments or changes to the elements in a contract could cause a material impact on our operating results.

Inventory valuation

We assess the valuation of inventory and periodically write down the value for estimated excess and obsolete inventory based upon actual usage and estimates about future demand. The excess balance determined by this analysis becomes the basis for our excess inventory charge. Management personnel play a key role in our excess inventory review process by providing updated sales forecasts, managing product rollovers and working with manufacturing to maximize recovery of excess inventory. If our estimates regarding demand are inaccurate or changes in technology affect demand for certain products in an unforeseen manner, we may incur losses or gains in excess of our established markdown amounts that could be material.

Management also reviews the carrying value of inventory for lower of cost or market on an individual product or contract basis. A loss is charged to cost of sales if the estimated product cost or the contract cost at completion is in excess of net realizable value (selling price less estimated cost of disposal). If the actual contract cost at completion is different than originally estimated, then a loss or gain provision adjustment would be recorded that could have a material impact on our operating results.

Recoverability of long-lived assets

We account for goodwill and other intangible assets in accordance with the FASB Accounting Standards Codification ("ASC") Topic 350, "Intangibles-Goodwill and Other." ASC 350 requires that goodwill and identifiable intangible assets with indefinite useful lives be tested for impairment at least annually. ASC 350 and ASC 360, "Property, Plant and Equipment," also require that intangible assets subject to amortization be amortized over their respective estimated useful lives and reviewed for impairment. We amortize identifiable intangible assets on a straight-line basis over their useful lives of up to 50 years.

Table of Contents

We assess the recoverability of the carrying value of goodwill and other intangible assets with indefinite useful lives at least annually or whenever events or changes in circumstances indicate that the carrying amount of any of these assets may not be fully recoverable. Recoverability of goodwill is measured at the reporting unit level (our six divisions) based on a two-step approach. First, the carrying amount of the reporting unit is compared to the fair value as estimated by the future net discounted cash flows expected to be generated by the reporting unit. To the extent that the carrying value of the reporting unit exceeds the fair value of the reporting unit, a second step is performed, wherein the reporting unit's assets and liabilities are valued. The implied fair value of goodwill is calculated as the fair value of the reporting unit in excess of the fair value of all non-goodwill assets and liabilities allocated to the reporting unit. To the extent the reporting unit's carrying value of goodwill exceeds its implied fair value, impairment exists and must be recognized. This process requires the use of discounted cash flow models that utilize estimates of future revenue and expenses as well as the selection of appropriate discount rates. There is inherent uncertainty in these estimates, and changes in these factors over time could result in an impairment charge.

At October 1, 2010 and October 2, 2009, the carrying amount of goodwill and other intangible assets with indefinite useful lives was \$165.5 million. Based on our test for impairment performed in the fourth quarter of fiscal year 2010, goodwill and other intangible assets with indefinite useful lives were determined not to be impaired. We will continue to evaluate the need for impairment at least annually in the fourth quarter or in other fiscal quarters if changes in circumstances or available information indicate that impairment may have occurred.

At October 1, 2010 and October 2, 2009, the carrying amount of property, plant and equipment and finite-lived intangible assets was \$123.5 million and \$130.1 million, respectively. In accordance with ASC 360 and ASC 350, we review the carrying values of long-lived assets and finite-lived intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of any of these assets may not be recoverable. We assess the recoverability of property, plant and equipment to be held and used and finite-lived intangible assets by a comparison of the carrying amount of an asset or group of assets to the future net undiscounted cash flows expected to be generated by the asset or group of assets. If such assets are considered impaired, then the impairment recognized is measured as the amount by which the carrying amount of the assets exceeds the fair value of the assets. This process requires the use of cash flow models that utilize estimates of future revenue and expenses. There is inherent uncertainty in these estimates, and changes in these factors over time could result in an impairment charge.

A prolonged general economic downturn and, specifically, a prolonged downturn in the defense, communications or medical markets, or technological changes, as well as other market factors, could intensify competitive pricing pressure, create an imbalance of industry supply and demand, or otherwise diminish volumes or profits. Such events, combined with changes in interest rates, could adversely affect our estimates of future net cash flows to be generated by our long-lived assets. Consequently, it is possible that our future operating results could be materially and adversely affected by any impairment charges related to the recoverability of our long-lived assets.

Table of Contents

Malibu's Goodwill Impairment Analysis. As mentioned above, the impairment analysis performed in the fourth quarter of fiscal year 2010 indicated no impairment existed as of July 2, 2010. The Malibu Division ("Malibu"), one of our reporting units, passed the goodwill impairment test with a fair value that exceeded its carrying value by approximately 7%. Goodwill allocated to Malibu as of July 2, 2010 was \$15.9 million. We utilize a discounted cash flow approach in estimating the fair value of Malibu, where the discount reflects a weighted average cost of capital rate. The key assumptions driving the fair value of Malibu are principally future sales growth and the discount rate. Malibu's future sales growth assumptions were based on current product performance, customer input and long-term industry expectations. However, actual performance in the near and longer-term could be materially different from these expectations. This could be caused by events such as strategic decisions made in response to economic and competitive conditions, the impact of the economic environment on Malibu's customer base, or a material negative change in Malibu's relationships with its significant customers. If Malibu does not meet its projected sales growth, or its sales growth expectations are reduced in the future, then Malibu's goodwill could become impaired and a non-cash impairment charge to earnings would be recorded.

Accounting for stock-based compensation

We account for stock-based compensation in accordance with FASB ASC 718, "Compensation-Stock Compensation." Under the fair value recognition provisions of this accounting standard, stock-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense over the requisite service period, which is generally the vesting period.

The fair value of each time-based option award is estimated on the date of grant using the Black-Scholes model. The fair value of each market performance-based (or combination of market performance- and time-based) option, restricted stock and restricted stock unit award is estimated on the date of grant using the Monte Carlo simulation technique in a risk-neutral framework. The Black-Scholes and the Monte Carlo simulation valuation models were developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable and require the input of subjective assumptions, including the expected stock price volatility and estimated option life. For purposes of these valuation models, no dividends have been assumed.

The estimated fair value of our stock-based awards, less expected forfeitures, is amortized over the awards' vesting period on a straight-line basis. Since our common stock has not been publicly traded for a sufficient time period, the expected volatility is based on a blend of our expected volatility based on available historical data and the expected volatilities of similar companies that have a longer history of being publicly traded. The risk-free rates are based on the U.S. Treasury yield in effect at the time of the grant. Since our historical data is limited, the expected life of options granted is based on integrating historical data with the simplified method for plain vanilla options in accordance with ASC 718. The integration of historical data with the simplified method is done by using the actual life for options that have been settled, and a uniform distribution assumption for the options still outstanding. We will continue to use historical data with the simplified method until we have enough historical experience to provide a reasonable estimate of expected term. In fiscal years 2010, 2009 and 2008, we recognized \$3.0 million, \$2.7 million and \$2.1 million, respectively, in stock-based compensation expense.

Table of Contents

Income taxes

We must make certain estimates and judgments in determining income tax expense for financial statement purposes. These estimates and judgments occur in the calculation of tax credits, tax benefits and deductions and in the calculation of certain tax assets and liabilities, which arise from differences in the timing of recognition of revenue and expense for tax and financial statement purposes. Significant changes to these estimates may result in an increase or decrease to our tax provision in a subsequent period.

We must assess the likelihood that we will be able to recover our deferred tax assets. If recovery is not more likely than not, we must increase our provision for taxes by recording a valuation allowance against the deferred tax assets that we estimate will not ultimately be recoverable. We believe that all of the deferred tax assets recorded on our consolidated balance sheets will ultimately be recovered. However, should there be a change in our ability to recover our deferred tax assets, our tax provision would increase in the period in which we determined that the recovery was not more likely than not.

In addition, the calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax regulations. In accordance with FASB ASC 740, "Income Taxes," we recognize liabilities for uncertain tax positions based on the two-step process. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step requires us to estimate and measure the tax benefit as the largest amount that is more than 50% likely of being realized upon ultimate settlement. It is inherently difficult and subjective to estimate such amounts, as this requires us to determine the probability of various possible outcomes. We reevaluate these uncertain tax positions on a quarterly basis. This evaluation is based on factors including, but not limited to, changes in facts or circumstances, changes in tax law, effectively settled issues under audit and new audit activity. Such a change in recognition or measurement would result in the recognition of a tax benefit or an additional charge to the tax provision.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We do not use market risk sensitive instruments for trading or speculative purposes.

Interest rate risk

Our exposure to market risk for changes in interest rates relates primarily to our long-term debt. As of October 1, 2010, we had fixed rate senior subordinated notes of \$117.0 million due in 2012, bearing interest at 8% per year, variable rate debt consisting of \$12.0 million floating rate senior notes due in 2015, and a \$66.0 million term loan under our amended and restated senior credit facilities due in 2014. Our variable rate debt is subject to changes in the prime rate and the LIBOR rate. As of October 1, 2010, the variable interest rate on the floating rate senior notes and on the term loan under the senior credit facilities, including the impact of our interest rate swap contract described below, was 6.43% and 6.77%, respectively.

Table of Contents

We use derivative instruments from time to time in order to manage interest costs and risk associated with our long-term debt. In September 2007, we entered into an interest rate swap contract to receive three-month USD-LIBOR-BBA interest and pay 4.77% fixed rate interest. Net interest positions are settled quarterly. We have structured the swap with decreasing notional amounts such that it is less than the balance of the term loan. The notional value of the swap was \$30.0 million at October 1, 2010 and represented approximately 45% of the aggregate term loan balance. The swap agreement is effective through June 30, 2011. Under the provisions of FASB ASC 815, "Derivatives and Hedging," this arrangement was initially designated and qualified as an effective cash flow hedge of interest rate risk related to the term loan under our senior credit facilities which permitted recording the fair value of the swap and corresponding unrealized gain or loss to accumulated other comprehensive (loss) income in the consolidated balance sheets. The interest rate swap gain or loss is included in the assessment of hedge effectiveness. At October 1, 2010, the fair value of the swap was a short-term liability of \$0.8 million (accrued expenses).

We performed a sensitivity analysis to assess the potential loss in future earnings that a 10% increase in the variable portion of interest rates over a one-year period would have on our floating rate senior notes and term loan under our senior credit facilities. The impact was determined based on the hypothetical change from the end of period market rates over a period of one year and would result in an immaterial increase in future interest expense.

Foreign currency exchange risk

Although the majority of our revenue and expense activities are transacted in U.S. dollars, we do transact business in foreign countries. Our primary foreign currency cash flows are in Canada and several European countries. In an effort to reduce our foreign currency exposure to Canadian dollar denominated expenses, we enter into Canadian dollar forward contracts to hedge the Canadian dollar denominated costs for our manufacturing operation in Canada. Our Canadian dollar forward contracts are designated as a cash flow hedge and are considered highly effective, as defined by FASB ASC 815. The unrealized gains and losses from foreign exchange forward contracts are included in accumulated other comprehensive (loss) income in the consolidated balance sheets. If the transaction being hedged fails to occur, or if a portion of any derivative is ineffective, then we promptly recognize the gain or loss on the associated financial instrument in general and administrative in the consolidated statements of income. The gain recognized in general and administrative due to hedge ineffectiveness for fiscal year 2010 was \$0.1 million. No ineffective amounts were recognized due to anticipated transactions failing to occur in fiscal years 2009 and 2008.

As of October 19, 2010, we had entered into Canadian dollar forward contracts for approximately \$23.9 million (Canadian dollars), or approximately 50% of our estimated Canadian dollar denominated expenses for October 2010 through September 2011, at an average rate of approximately \$0.95 U.S. dollar to Canadian dollar. We estimate the impact of a one cent change in the U.S. dollar to Canadian dollar exchange rate (without giving effect to our Canadian dollar forward contracts) to be approximately \$0.3 million annually to our net income or approximately two cents annually to basic and diluted earnings per share.

At October 1, 2010, the fair value of foreign currency forward contracts was a short-term asset of \$0.4 million (prepaid and other current assets).

Table of Contents

Item 8. Financial Statements and Supplementary Data

The consolidated financial statements required by this item are hereby incorporated by reference to Part IV of this Annual Report on Form 10-K, and the supplementary data required by this item are included in Note 14 to the consolidated financial statements.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

An evaluation was performed under the supervision and with the participation of our management, including our chief executive officer and our chief financial officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of the end of the period covered by this report. Based on that evaluation, our chief executive officer and our chief financial officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures are effective.

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that:

- (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;
- (ii) provide reasonable assurance that the transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with the authorization of management and/or our board of directors; and
- (iii) provide reasonable assurance regarding the prevention or timely detection of any unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

Due to its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate due to changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our management, including our chief executive officer and our chief financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting using the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework. Based on its evaluation, our management concluded that our internal control over financial reporting was effective as of October 1, 2010.

Table of Contents

KPMG LLP, an independent registered public accounting firm, has audited the consolidated financial statements included in this Annual Report on Form 10-K and, as part of their audit, has issued its attestation report, included herein, on the effectiveness of our internal control over financial reporting as of October 1, 2010. See “Report of Independent Registered Public Accounting Firm” on page 75.

Changes in Internal Control over Financial Reporting

There has been no change in our internal control over financial reporting that occurred during the fourth quarter of fiscal year 2010 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting as of October 1, 2010.

Item 9B. Other Information

None.

PART IV

Item 15. Exhibits, Financial Statement Schedules

(a) (1) Financial Statements:

The following consolidated financial statements and schedules are filed as a part of this report:

- Report of Independent Registered Public Accounting Firm
- Consolidated Balance Sheets
- Consolidated Statements of Income
- Consolidated Statements of Stockholders' Equity and Comprehensive Income
- Consolidated Statements of Cash Flows
- Notes to Consolidated Financial Statements

(2) Consolidated Financial Statement Schedules

All schedules are omitted because they are not applicable, or because the required information is included in the consolidated financial statements or notes thereto.

(3) The Exhibit Index beginning on page 135 of this annual report is hereby incorporated by reference herein.

(b) Exhibits:

See Item 15(a)(3) above.

(c) Financial Statement Schedules:

See Item 15(a)(2) above.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
CPI International, Inc.:

We have audited the accompanying consolidated balance sheets of CPI International, Inc. and subsidiaries (the Company) as of October 1, 2010 and October 2, 2009, and the related consolidated statements of income, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended October 1, 2010. We also have audited the Company's internal control over financial reporting as of October 1, 2010, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting (Item 9A). Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Table of Contents

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of CPI International, Inc. and subsidiaries as of October 1, 2010 and October 2, 2009, and the results of its operations and its cash flows for each of the years in the three-year period ended October 1, 2010, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of October 1, 2010, based on criteria established in Internal Control – Integrated Framework issued by the COSO.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(All tabular amounts in thousands except share and per share amounts)

1. Organization and Summary of Significant Accounting Policies

Organization and Basis of Presentation: Unless the context otherwise requires, “CPI International” means CPI International, Inc. and “CPI” means Communications & Power Industries, Inc. CPI is a direct subsidiary of CPI International. CPI International is a holding company with no operations of its own. The term the “Company” refers to CPI International and its direct and indirect subsidiaries on a consolidated basis.

The accompanying consolidated financial statements represent the consolidated results and financial position of CPI International, which is controlled by affiliates of The Cypress Group L.L.C. (“Cypress”). CPI International, through its wholly owned subsidiary, CPI, develops, manufactures, and distributes microwave and power grid Vacuum Electron Devices (“VEDs”), microwave amplifiers, modulators, antenna systems and various other power supply equipment and devices. The Company has two reportable segments, VED and satcom equipment.

The consolidated financial statements include those of the Company and its subsidiaries. Significant intercompany balances, transactions, and stockholdings have been eliminated in consolidation. Certain prior year amounts have been reclassified to conform to current year presentation.

The Company’s fiscal year is the 52- or 53-week period that ends on the Friday nearest September 30. Fiscal years 2010 and 2009 comprised the 52-week periods ending October 1, 2010 and October 2, 2009, respectively. Fiscal year 2008 comprised the 53-week period ended October 3, 2008. All period references are to the Company’s fiscal periods unless otherwise indicated.

Liquidity: The Company’s cash and cash equivalents as of October 1, 2010 of approximately \$42.8 million is not sufficient to repay certain long-term debt totaling \$66.0 million currently scheduled to mature in August 2011. The Company intends to obtain replacement financing to repay the respective loan within fiscal year 2011 prior to its scheduled maturity date. The Company has historically financed, and intends to continue to finance, its capital and working capital requirements including debt service and internal growth, through a combination of cash flows from its operations and borrowings under its senior credit facilities.

While the Company believes that, based on its cash flow from operations and its past history, it will be successful in obtaining the replacement financing with reasonable terms to repay its maturing debt, there are no assurances that such additional refinancing will be successful. If the Company is unable to refinance its debt facility, the Company may need to implement other alternatives such as issuing common stock or securities convertible into common stock to repay its indebtedness. If implemented, these actions could negatively impact its business or dilute its existing stockholders.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

Foreign Currency Translation: The functional currency of the Company's foreign subsidiaries is the U.S. dollar. Gains or losses resulting from the translation into U.S. dollars of amounts denominated in foreign currencies are included in the determination of net income or loss. Foreign currency translation gains and losses are generally reported on a net basis in the caption "general and administrative" in the consolidated statements of income, except for translation gains or losses on income tax-related assets and liabilities, which are reported in "income tax expense" in the consolidated statements of income.

Use of Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of sales and costs and expenses during the reporting period. On an ongoing basis, the Company evaluates its estimates, including those related to revenue recognition; inventory valuation; provision for product warranty; business combinations; recoverability and valuation of recorded amounts of long-lived assets and identifiable intangible assets, including goodwill; recognition and measurement of share-based compensation; and recognition and measurement of current and deferred income tax assets and liabilities. The Company bases its estimates on various factors and information, which may include, but are not limited to, history and prior experience, experience of other enterprises in the same industry, new related events, current economic conditions and information from third-party professionals that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Revenue Recognition: Sales are recognized when persuasive evidence of an arrangement exists, delivery has occurred, the price is fixed or determinable, and collectibility is reasonably assured. The Company's products are generally subject to warranties, and the Company provides for the estimated future costs of repair, replacement or customer accommodation in cost of sales.

Revenues from contracts that contain multiple elements are accounted for in accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic FASB ASC 605-25 "Revenue Recognition — Multiple Element Arrangements." Through October 1, 2010, revenue from these contracts was allocated to each respective element or unit of accounting, based on each element's relative fair value using vendor-specific objective evidence ("VSOE") or third-party evidence ("TPE"), if determinable, and was recognized when the respective revenue recognition criteria for each element was met. Effective October 2, 2010, the Company is required to adopt the provisions of FASB Accounting Standards Update ("ASU") 2009-13, "Revenue Recognition (Topic 605): Multiple Deliverable Revenue Arrangements – A Consensus of the FASB Emerging Issues Task Force," which, among other things, requires revenue to be allocated to each element based on the relative selling price method in the absence of VSOE or TPE. See Note 2.

CPI INTERNATIONAL, INC.
and subsidiaries

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

The Company has commercial and U.S. Government fixed-price contracts that are accounted for under FASB ASC 605, "Revenue Recognition," Subtopic 35, "Construction-Type and Production-Type Contracts." These contracts have represented not more than 4% of the Company's sales during fiscal years 2010, 2009 and 2008, and are for contracts that generally are greater than one year in duration and that include a significant amount of product development. The Company uses the percentage-of-completion method when reasonably dependable estimates of the extent of progress toward completion, contract revenues and contract costs can be made. The portion of revenue earned or the amount of gross profit earned for a period is determined by measuring the extent of progress toward completion using total cost incurred to date and estimated costs at contract completion.

Sales under cost-reimbursement contracts, which are primarily for research and development, are recorded as costs are incurred and include estimated earned fees in the proportion that costs incurred to date bear to total estimated costs. The fees under certain commercial and U.S. Government contracts may be increased or decreased in accordance with cost or performance incentive provisions that measure actual performance against established targets or other criteria. Such incentive fee awards or penalties are included in revenue at the time the amounts can be reasonably determined.

Revenue is recorded net of taxes collected from customers that are remitted to governmental authorities, with the collected taxes recorded as current liabilities until remitted to the relevant government authority.

Cash and Cash Equivalents: The Company considers all highly liquid short-term investments with original maturities of three months or less, readily convertible to known amounts of cash to be cash equivalents.

Restricted Cash: Restricted cash consists primarily of bank guarantees from customer advance payments to the Company's international subsidiaries. The bank guarantees become unrestricted cash when performance under the sales or supply contract is complete.

Inventories: Inventories are stated at the lower of average cost or market value, primarily using the average cost method. Costs include labor, material and overhead costs. Overhead costs are based on indirect costs allocated among cost of sales, work-in-process inventory and finished goods inventory. Inventories also include costs and earnings in excess of progress billings for contracts using the percentage-of-completion method of accounting. Progress billings in excess of costs and earnings for contracts using the percentage-of-completion method of accounting are reported in Advance Payments from Customers.

The Company assesses the valuation of inventory and periodically writes down the value for estimated excess and obsolete inventory based upon actual usage and estimates about future demand. The excess balance determined by this analysis becomes the basis for the Company's excess inventory charge. Management personnel play a key role in the excess inventory review process by providing updated sales forecasts, managing product rollovers and working with manufacturing to maximize recovery of excess inventory. If actual market conditions are less favorable than those projected by management, additional write-downs may be required. If actual market conditions are more favorable than anticipated, inventory previously written down may be sold, resulting in lower cost of sales and higher income from operations than expected in that period.

Table of Contents

CPI INTERNATIONAL, INC.
and subsidiaries

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

Management also reviews the carrying value of inventory for lower of cost or market on an individual product or contract basis. A loss is charged to cost of sales when known if estimated product or contract cost at completion is in excess of net realizable value (selling price less estimated cost of disposal). If actual product or contract cost at completion is different than originally estimated, then a loss or gain provision adjustment is recorded that would have an impact on the Company's operating results.

Property, Plant and Equipment: Property, plant and equipment are stated at cost. Major improvements are capitalized, while maintenance and repairs are expensed as incurred. Plant and equipment are depreciated over their estimated useful lives using the straight-line method. Building, land improvements and process equipment are depreciated generally over 25, 20 and 12 years, respectively. Machinery and equipment are depreciated generally over 7 to 12 years. Office furniture and equipment are depreciated generally over 5 to 10 years. Leasehold improvements are amortized using the straight-line method over their estimated useful lives, or the remaining term of the lease, whichever is shorter.

Goodwill and Other Intangible Assets: The Company accounts for business combinations using the purchase method of accounting in which intangible assets acquired are recognized and reported apart from goodwill.

The values assigned to acquired identifiable intangible assets for technology were determined based on the excess earnings method of the income approach. This method determines fair market value using estimates and judgments regarding the expectations of future after-tax cash flows from those assets over their lives, including the probability of expected future contract renewals and sales, all of which are discounted to their present value.

The Company accounts for goodwill and other intangible assets in accordance with FASB ASC 350, "Intangibles-Goodwill and Other." ASC 350 requires that goodwill and identifiable intangible assets with indefinite useful lives be tested for impairment at least annually. ASC 350 also requires that intangible assets subject to amortization be amortized over their respective estimated useful lives and reviewed for impairment. Identifiable intangible assets are amortized on a straight-line basis over their useful lives of up to 50 years. The Company tests goodwill for impairment annually or more frequently if events and circumstances warrant. The Company's annual testing resulted in no impairment of goodwill in fiscal years 2010, 2009 and 2008.

Long-Lived Assets: The Company accounts for long-lived assets in accordance with FASB ASC 360, "Property, Plant and Equipment," and ASC 350, which requires that long-lived and finite-lived intangible assets, including property, equipment and leasehold improvements, be evaluated for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. An impairment loss would be recognized when the sum of the undiscounted future net cash flows expected to result from the use of the asset and its eventual disposition is less than its carrying amount. Such impairment loss would be measured as the difference between the carrying amount of the asset and its fair value.

There were no triggering events identified that would indicate a need to review for impairment of long-lived assets during fiscal years 2010, 2009 and 2008.

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

Deferred Debt Issue Costs: Costs incurred related to the issuance of the Company's long-term debt and other credit facilities are capitalized and amortized over the estimated time the obligations are expected to be outstanding using the effective interest method. Deferred debt issue costs for CPI's revolving credit facility and term loan, CPI's 8% Senior Subordinated Notes due 2012 and CPI International's Floating Rate Senior Notes due 2015 are amortized over the term to maturity of the respective debt of four years, eight years and ten years, respectively. As a result of the Company's debt repurchase or prepayment as discussed in Note 5, \$0.2 million and \$0.3 million of unamortized deferred debt issue costs were written off and charged to (gain) loss on debt extinguishment in the consolidated statement of income for fiscal years 2009 and 2008, respectively. As the outstanding balance of CPI's term loan is expected to be repaid within the next 12 months, the Company has classified \$0.7 million of the related unamortized deferred debt issue costs as current (prepaid and other current assets) in the consolidated balance sheet as of October 1, 2010. As of October 1, 2010, and October 2, 2009, gross long-term deferred debt issue costs were \$6.4 million and \$7.9 million and related accumulated amortization was \$4.8 million and \$4.3 million, respectively.

Product Warranty: The Company's products typically carry warranty periods of one to three years or warranties over a predetermined product usage life. The Company estimates the costs that may be incurred under its warranty plans and records a liability in the amount of such estimated costs at the time revenue is recognized. The determination of product warranty reserves requires the Company to make estimates of product return rates and expected cost to repair or replace the products under warranty. The Company assesses the adequacy of its preexisting warranty liabilities and adjusts the balance based on actual experience and changes in future expectations.

Business Risks and Credit Concentrations: Defense-related applications, such as certain radar, electronic countermeasures and military communications applications, constitute a significant portion of the Company's sales. Companies engaged in supplying defense-related equipment and services to government agencies are subject to certain business risks unique to that industry. Sales to the government may be affected by changes in procurement policies, budget considerations, changing concepts of national defense, political developments abroad and other factors.

Research and Development: Company-sponsored research and development costs related to both present and future products are expensed as incurred. Customer-sponsored research and development costs are charged to cost of sales to match revenue recognized. Total expenditures incurred by the Company on research and development are summarized as follows:

	Year Ended		
	October 1, 2010	October 2, 2009	October 3, 2008
CPI Sponsored	\$ 12,429	\$ 10,520	\$ 10,789
Customer Sponsored	16,106	17,526	12,028
	\$ 28,535	\$ 28,046	\$ 22,817

Advertising Expenses: Costs related to advertising are recognized in selling and marketing expenses as incurred. Advertising expenses were not material in any of the periods presented.

Table of Contents

CPI INTERNATIONAL, INC.
and subsidiaries

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

Income Taxes: The Company records income taxes using the asset and liability method. Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

In addition, the calculation of the Company's tax liabilities involves dealing with uncertainties in the application of complex tax regulations. In accordance with FASB ASC 740, "Income Taxes," the Company recognizes liabilities for uncertain tax positions based on the two-step process. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step requires the Company to estimate and measure the tax benefit as the largest amount that is more than 50% likely of being realized upon ultimate settlement. It is inherently difficult and subjective to estimate such amounts, as this requires the Company to determine the probability of various possible outcomes. The Company reevaluates these uncertain tax positions on a quarterly basis. This evaluation is based on factors including, but not limited to, changes in facts or circumstances, changes in tax law, effectively settled issues under audit and new audit activity. Such a change in recognition or measurement would result in the recognition of a tax benefit or an additional charge to the tax provision.

Income tax-related interest expense and income tax-related penalties are reported as a component of the provision for income taxes in the consolidated statement of income.

See Note 11 for further discussion on income taxes.

Comprehensive Income: The Company follows the accounting treatment prescribed by FASB ASC 220, "Comprehensive Income." Comprehensive income is defined as a change in equity of a company during a period from transactions and other events and circumstances, excluding transactions resulting from investments by owners and distributions to owners. The difference between net income and comprehensive income for the Company arises from unrealized gains and losses on cash flow hedge contracts, net of tax, and unrealized actuarial loss and prior service credit for pension liability, net of tax.

2. Recently Issued Accounting Standards

In the first quarter of fiscal year 2010, the Company adopted provisions of FASB ASC 820, "Fair Value Measurements and Disclosures," that specified the way in which fair value measurements should be made for non-financial assets and non-financial liabilities that are not measured and recorded at fair value on a recurring basis, and specified additional disclosures related to these fair value measurements. The adoption of this new standard did not have an impact on the Company's consolidated results of operations, financial position or cash flows.

CPI INTERNATIONAL, INC.
and subsidiaries

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

In June 2008, the FASB issued an update to ASC 260, “Earnings Per Share,” which addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and, therefore, need to be included in the earnings allocation in computing earnings per share under the two-class method. The update to ASC 260 requires unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents (whether paid or unpaid) to be treated as participating securities and to be included in the computation of earnings per share pursuant to the two-class method. This guidance under ASC 260 was effective for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. All prior-period earnings per share data presented shall be adjusted retrospectively. The Company adopted the provisions of this guidance under ASC 260 effective October 3, 2009 and has included the required disclosures in Note 12 to the consolidated financial statements. The adoption of this guidance did not have a material impact on the Company’s computation of earnings per share.

In October 2008, the FASB issued guidance codified under ASC 715, “Compensation—Retirement Benefits,” which requires that an employer disclose the following information about the fair value of plan assets: (1) the level within the fair value hierarchy in which fair value measurements of plan assets fall; (2) information about the inputs and valuation techniques used to measure the fair value of plan assets; and (3) a reconciliation of beginning and ending balances for fair value measurements of plan assets using significant unobservable inputs. At initial adoption, application of this guidance would not be required for earlier periods that are presented for comparative purposes. The Company adopted the provisions of this guidance under ASC 715 effective October 3, 2009. The adoption did not have an impact on the Company’s consolidated results of operations, financial position or cash flows.

In April 2009, the FASB released an amendment to ASC 805, “Business Combinations,” which requires an acquirer to recognize at fair value, at the acquisition date, an asset acquired or a liability assumed that arises from a contingency if the acquisition date fair value of that asset or liability can be determined during the measurement period. If the acquisition date fair value cannot be determined during the measurement period, an asset or liability shall be recognized at the acquisition date if (1) information available before the end of the measurement period indicates that it is probable that an asset existed or that a liability had been incurred at the acquisition date, and (2) the amount of the asset or liability can be reasonably estimated. The Company adopted the provisions of the guidance under ASC 805 and its amendment effective October 3, 2009. The impact of the adoption will depend on the nature of acquisitions completed in the future.

In August 2009, the FASB issued ASU 2009-05, “Measuring Liabilities at Fair Value,” an update to ASC 820. This update provides amendments to reduce potential ambiguity in financial reporting when measuring the fair value of liabilities. Among other provisions, this update provides clarification that in circumstances in which a quoted price in an active market for the identical liability is not available, a reporting entity is required to measure fair value using one or more of the valuation techniques described in ASU 2009-05. The Company adopted the provisions of this guidance under ASU 2009-05 effective October 3, 2009. The adoption did not have an impact on the Company’s consolidated results of operations, financial position or cash flows.

and subsidiaries

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

In October 2009, the FASB issued ASU 2009-13, "Revenue Recognition (Topic 605): Multiple Deliverable Revenue Arrangements – A Consensus of the FASB Emerging Issues Task Force." This update provides application guidance on whether multiple deliverables exist, how the deliverables should be separated and how the consideration should be allocated to one or more units of accounting. This update eliminates the residual method of allocation for multiple-deliverable revenue arrangements, and requires that arrangement consideration be allocated at the inception of an arrangement to all deliverables using the relative selling price method. The selling price used for each deliverable will be based on VSOE, if available, TPE if VSOE is not available, or estimated selling price if neither VSOE or TPE is available. Additionally, ASU 2009-13 expands the disclosure requirements related to a vendor's multiple-deliverable revenue arrangements. ASU 2009-13 is effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010 and early adoption is permitted. The Company will adopt the provisions of this update under ASU 2009-13 effective October 2, 2010. The Company does not expect ASU 2009-13 to have a material impact on its consolidated results of operations, financial position or cash flows.

In September 2009, the FASB issued ASU 2009-14, "Certain Revenue Arrangements That Include Software Elements," which is included in the ASC 985, "Software." ASU 2009-14 amends previous software revenue recognition to exclude (a) non-software components of tangible products and (b) software components of tangible products that are sold, licensed, or leased with tangible products when the software components and non-software components of the tangible product function together to deliver the tangible product's essential functionality. ASU 2009-14 is effective for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010 and shall be applied on a prospective basis. Earlier application is permitted as of the beginning of an entity's fiscal year. The Company will adopt the provisions of this update under ASU 2009-14 effective October 2, 2010. The Company does not expect ASU 2009-14 to have a material impact on its consolidated results of operations, financial position or cash flows.

In December 2009, the FASB issued ASU 2009-17, "Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities," as a further clarification to ASC 810-10, "Consolidation of Variable Interest Entities." ASU 2009-17, upon adoption, requires the use of a qualitative analysis to determine the primary beneficiary of a variable interest entity ("VIE"), amends the guidance for determining if an entity is a VIE and enhances the disclosure requirements regarding an enterprise's involvement with a VIE. ASU 2009-17 is effective as of the beginning of a company's first fiscal year beginning after November 15, 2009. The Company will adopt the provisions of this update under ASU 2009-17 effective October 2, 2010. Since the Company does not currently have variable interest entities, this update is expected to have no impact on its consolidated results of operations, financial position or cash flows.

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

In January 2010, the FASB issued ASU 2010-06, "Fair Value Measurements and Disclosures: Improving Disclosures About Fair Value Measurements." This update requires reporting entities to make new disclosures about recurring or nonrecurring fair-value measurements including significant transfers into and out of Level 1 and Level 2 fair-value measurements and information on purchases, sales, issuances, and settlements on a gross basis in the reconciliation of Level 3 fair-value measurements. ASU 2010-06 was effective for interim and annual reporting periods beginning after December 15, 2009, except for Level 3 reconciliation disclosures which are effective for annual periods beginning after December 15, 2010. The Company adopted the provisions of this guidance under ASU 2009-06, except for Level 3 reconciliation disclosures, effective January 2, 2010. As this guidance is disclosure-related, it did not have an impact on the Company's consolidated results of operations, financial position or cash flows.

In February 2010, the FASB issued ASU 2010-08, "Technical Corrections to Various Topics." This update eliminates inconsistencies and outdated provisions in U.S. generally accepted accounting principles ("GAAP") and provides needed clarification on others. Amendments within ASU 2010-08 that may be applicable to the Company are effective as of the first reporting period beginning after February 2, 2010, the date this ASU was issued. The Company adopted the provisions of this guidance under ASU 2010-08 effective April 3, 2010 with no material impact on its consolidated results of operations, financial position or cash flows.

In April 2010, the FASB issued ASU 2010-17, "Revenue Recognition—Milestone Method (Topic 605): Milestone Method of Revenue Recognition." ASU 2010-17 provides guidance on applying the milestone method to milestone payments for achieving specified performance measures when those payments are related to uncertain future events. The scope of ASU 2010-17 is limited to transactions involving research or development. This update further states that the milestone method is not the only acceptable method of revenue recognition for milestone payments. Accordingly, entities can make an accounting policy election to recognize arrangement consideration received for achieving specified performance measures during the period in which the milestones are achieved, provided certain criteria are met. An entity's policy for recognizing deliverable consideration or unit of accounting consideration contingent upon achievement of a milestone shall be applied consistently to similar deliverables or units of accounting. ASU 2010-17 is effective on a prospective basis for milestones achieved in interim and fiscal years beginning after June 15, 2010. Early adoption is permitted. The Company will adopt the provisions of this update under ASU 2010-17 effective October 2, 2010. The Company does not expect ASU 2010-17 to have a material impact on its consolidated results of operations, financial position or cash flows.

3. Supplemental Balance Sheet Information

Accounts Receivable: Accounts receivable are stated net of allowances for doubtful accounts as follows:

	October 1, 2010	October 2, 2009
Accounts receivable	\$ 45,819	\$ 45,240
Less: Allowance for doubtful accounts	(112)	(95)
	\$ 45,707	\$ 45,145

	\$ 90,704	\$ (18,230)	\$ 72,474	\$ 90,774	\$ (15,344)	\$ 75,430

Intangible assets, net as of October 1, 2010 and October 2, 2009 include a total of approximately \$0.1 million of application costs and associated legal costs incurred to obtain certain patents. Once obtained, these patents will be amortized on a straight-line basis and charged to operations over their estimated useful lives, not to exceed 17 years.

The amortization of intangible assets amounted to \$3.0 million, \$3.0 million and \$3.4 million for fiscal years 2010, 2009 and 2008, respectively.

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Product Warranty: The following table summarizes the activity related to product warranty during fiscal years 2010 and 2009:

	Year Ended	
	October 1, 2010	October 2, 2009
Beginning accrued warranty	\$ 3,845	\$ 4,159
Actual costs of warranty claims	(5,451)	(4,524)
Estimates for product warranty, charged to cost of sales	6,707	4,210
Ending accrued warranty	\$ 5,101	\$ 3,845

4. Financial Instruments

FASB ASC 825 establishes a framework for measuring fair value and expands disclosures about fair value measurements by establishing a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels of the fair value hierarchy under ASC 825 are described as follows:

Level 1 Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 Inputs reflect quoted prices for identical assets or liabilities in markets that are not active; quoted prices for similar assets or liabilities in active markets; inputs other than quoted prices that are observable for the asset or the liability; or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Unobservable inputs reflecting the Company's own assumptions incorporated in valuation techniques used to determine fair value. These assumptions are required to be consistent with market participant assumptions that are reasonably available.

Fair value is the price that would be received upon sale of an asset or paid upon transfer of a liability in an orderly transaction between market participants at the measurement date and in the principal or most advantageous market for that asset or liability. The fair value should be calculated based on assumptions that market participants would use in pricing the asset or liability, not on assumptions specific to the entity. In addition, the fair value of liabilities should include consideration of non-performance risk, including the Company's own credit risk.

The Company's non-financial assets (including goodwill, intangible assets, inventories and long-lived assets) and liabilities are measured at fair value on a non-recurring basis; that is, the assets and liabilities are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances such as when they are deemed to be other-than-temporarily impaired. The fair values of these non-financial assets and liabilities are determined based on valuation techniques using the best information available, and may include quoted market prices, market comparables, and discounted cash flow projections. During fiscal year 2010, no fair value adjustments or material fair value measurements were required for the Company's non-financial assets or liabilities.

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

The Company measures certain financial assets and liabilities at fair value on a recurring basis, including cash equivalents, restricted cash, available-for-sale securities and derivative instruments. As of October 1, 2010, financial assets utilizing Level 1 inputs included cash equivalents, such as money market and overnight U.S. Government securities and available-for-sale securities, such as mutual funds. Financial assets and liabilities utilizing Level 2 inputs included foreign currency derivatives and interest rate swap derivatives. The Company does not have any financial assets or liabilities requiring the use of Level 3 inputs.

The following tables set forth financial instruments carried at fair value within the ASC 825 hierarchy:

	Total	Fair Value Measurements at October 1, 2010 Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Money market and overnight U.S. Government securities ¹	\$ 36,420	\$ 36,420	\$ -	\$ -
Mutual funds ²	171	171	-	-
Foreign exchange forward derivatives ³	437	-	437	-
Total assets at fair value	\$ 37,028	\$ 36,591	\$ 437	-
Liabilities:				
Interest rate swap derivative ⁴	\$ 816	\$ -	\$ 816	\$ -
Total liabilities at fair value	\$ 816	\$ -	\$ 816	\$ -

¹ The money market and overnight U.S. Government securities are classified as part of cash and cash equivalents and restricted cash in the consolidated balance sheet.

² The mutual funds are classified as part of other long-term assets in the consolidated balance sheet.

³ The foreign currency derivatives are classified as part of prepaid and other current assets in the consolidated balance sheet.

⁴ The interest rate swap derivatives are classified as part of accrued expenses in the consolidated balance sheet.

Liabilities:				
Interest rate swap derivative ⁴	\$ 2,323	\$ -	\$ 2,323	\$ -
Total liabilities at fair value	\$ 2,323	\$ -	\$ 2,323	\$ -

¹ The money market and overnight U.S. Government securities are classified as part of cash and cash equivalents and restricted cash in the consolidated balance sheet.

² The mutual funds are classified as part of other long-term assets in the consolidated balance sheet.

³ The foreign currency derivatives are classified as part of prepaid and other current assets in the consolidated balance sheet.

⁴ The interest rate swap derivatives are classified as part of accrued expenses and other long-term liabilities in the consolidated balance sheet.

Investments Other Than Derivatives

In general and where applicable, the Company uses quoted prices in active markets for identical assets or liabilities to determine fair value. This pricing methodology applies to the Company's Level 1 investments, such as money market, U.S. Government securities and mutual funds.

If quoted prices in active markets for identical assets or liabilities are not available to determine fair value, then the Company would use quoted prices for similar assets and liabilities or inputs other than the quoted prices that are observable either directly or indirectly. These investments would be included in Level 2.

Derivatives

The Company executes foreign exchange forward contracts to purchase Canadian dollars and holds a pay-fixed receive-variable interest rate swap contract, all executed in the retail market with its relationship banks. To determine the most appropriate value, the Company uses an in-exchange valuation premise which considers the assumptions that market participants would use in pricing the derivatives. The Company has elected to use the income approach and uses observable (Level 2) market expectations at the measurement date and standard valuation techniques to convert future amounts to a single present amount. Level 2 inputs for derivative valuations are midmarket quoted prices for similar assets or liabilities in active markets and inputs other than quoted prices that are observable for the asset or liability.

- 95 -

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

Key inputs for currency derivatives are spot rates, forward rates, interest rates and credit derivative rates. The spot rate for the Canadian dollar is the same spot rate used for all balance sheet translations at the measurement date. Forward premiums/discounts and interest rates are interpolated from commonly quoted intervals. Once valued, each forward is identified as either an asset or liability. Assets are further discounted using counterparty annual credit default rates, and liabilities are valued using the Company's credit as reflected in the spread paid over LIBOR on the term loan under the Company's senior credit facilities.

Key inputs for valuing the interest rate swap are the cash rates used for the short term (under 3 months), futures rates for up to three years and LIBOR swap rates for periods beyond. These inputs are used to derive variable resets for the swap as well as to discount future fixed and variable cash flows to present value at the measurement date. A credit spread is used to further discount each net cash flow using, for assets, counterparty credit default rates and, for liabilities, the Company's credit spread over LIBOR on the term loan under the Company's senior credit facilities.

See Note 7 for further information regarding the Company's derivative instruments.

Other Financial Instruments

The Company's other financial instruments include cash, restricted cash, accounts receivable, accounts payable and long-term debt. Except for long-term debt, the carrying value of these financial instruments approximates fair values because of their relatively short maturity.

The fair values of the Company's long-term debt were estimated using quoted market prices where available. For long-term debt not actively traded, fair values were estimated using discounted cash flow analyses, based on the Company's current estimated incremental borrowing rates for similar types of borrowing arrangements. The estimated fair value of the Company's long-term debt was \$192.6 million and \$188.5 million as of October 1, 2010 and October 2, 2009, respectively. See Note 5 for the carrying value of the long-term debt.

5. Long-Term Debt

Long-term debt comprises the following:

	October 1, 2010	October 2, 2009
Term loan	\$ 66,000	\$ 66,000
8% Senior subordinated notes due 2012	117,000	117,000
Floating rate senior notes due 2015, net of issue discount of \$66 and \$78	11,934	11,922
	194,934	194,922
Less: Current portion	66,000	-
Long-term portion	\$ 128,934	\$ 194,922

Standby letters of credit	\$ 4,544	\$ 5,544
---------------------------	----------	----------

Table of Contents

CPI INTERNATIONAL, INC.
and subsidiaries

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

Senior Credit Facilities: CPI's senior credit facilities ("Senior Credit Facilities") provide for borrowings of up to an aggregate principal amount of \$160 million, consisting of a \$100 million term loan facility ("Term Loan") and a \$60 million revolving credit facility ("Revolver"), with a sub-facility of \$15 million for letters of credit and \$5 million for swing line loans. Upon certain specified conditions, including maintaining a senior secured leverage ratio of 3.75:1 or less on a pro forma basis, CPI may seek commitments for a new class of term loans, not to exceed \$125 million in the aggregate. The Senior Credit Facilities are guaranteed by CPI International and all of CPI's domestic subsidiaries and are secured by substantially all of the assets of CPI International, CPI and CPI's domestic subsidiaries.

Both the Term Loan and the Revolver will mature on August 1, 2011 if, prior to August 1, 2011, CPI has not repaid or refinanced its 8% Senior Subordinated Notes due 2012. If CPI repays or refinances its 8% Senior Subordinated Notes due 2012 prior to August 1, 2011, then the Term Loan would mature on August 1, 2014 and the Revolver would mature on August 1, 2013.

In August 2007, CPI borrowed \$100 million under the Term Loan. Borrowings under the Senior Credit Facilities bear interest at a rate equal to, at CPI's option, LIBOR or the ABR plus the applicable margin. The ABR is the greater of the (a) the prime rate and (b) the federal funds rate plus 0.50%. For Term Loans, the applicable margin is 2.00% for LIBOR borrowings and 1.00% for ABR borrowings. The applicable margins under the Revolver vary depending on CPI's leverage ratio, as defined in the Senior Credit Facilities, and range from 1.25% to 2.00% for LIBOR borrowings and from 0.25% to 1.00% for ABR borrowings.

In addition to customary fronting and administrative fees under the Senior Credit Facilities, CPI will pay letter of credit participation fees equal to the applicable LIBOR margin per annum on the average daily amount of the letter of credit exposure and a commitment fee on the average daily unused commitments under the Revolver. The commitment fee varies depending on CPI's leverage ratio, as defined in the Senior Credit Facilities and ranges from 0.25% to 0.50%.

The Senior Credit Facilities require that CPI repay \$250,000 of the Term Loan at the end of each fiscal quarter prior to the maturity date of the Term Loan, with the remainder due on the maturity date. CPI is required to prepay its outstanding loans under the Senior Credit Facilities, subject to certain exceptions and limitations, with net cash proceeds received from certain events, including, without limitation, (1) all such proceeds received from certain asset sales by CPI International, CPI or any of CPI's subsidiaries, (2) all such proceeds received from issuances of debt (other than certain specified permitted debt) or preferred stock by CPI International, CPI or any of CPI's subsidiaries, and (3) all such proceeds paid to CPI International, CPI or any of CPI's subsidiaries from casualty and condemnation events in excess of amounts applied to replace, restore or reinvest in any properties for which proceeds were paid within a specified period.

If CPI's leverage ratio, as defined in the Senior Credit Facilities, exceeds 3.5:1 at the end of any fiscal year, CPI will also be required to make an annual prepayment within 90 days after the end of such fiscal year equal to 50% of excess cash flow, as defined in the Senior Credit Facilities, less optional prepayments made during the fiscal year. CPI can make optional prepayments on the outstanding loans at any time without premium or penalty, except for customary "breakage" costs with respect to LIBOR loans.

Table of Contents

CPI INTERNATIONAL, INC.
and subsidiaries

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

The Senior Credit Facilities contain a number of covenants that, among other things, restrict, subject to certain exceptions, the ability of CPI International, CPI or any of CPI's subsidiaries to: sell assets; engage in mergers and acquisitions; pay dividends and distributions or repurchase their capital stock; incur additional indebtedness or issue equity interests; make investments and loans; create liens or further negative pledges on assets; engage in certain transactions with affiliates; enter into sale and leaseback transactions; amend agreements or make prepayments relating to subordinated indebtedness; and amend or waive provisions of charter documents in a manner materially adverse to the lenders. CPI and its subsidiaries must comply with a maximum capital expenditure limitation and a maximum total secured leverage ratio, each calculated on a consolidated basis for CPI.

CPI made no payments on the Term Loan during fiscal year 2010. During fiscal years 2009 and 2008, CPI made repayments on the Term Loan of \$22.8 million and \$11.0 million, respectively. As of October 1, 2010, the principal balance of the Term Loan was \$66.0 million.

At October 1, 2010, the amount available for borrowing under the Revolver, after taking into account the Company's outstanding letters of credit of \$4.5 million, was approximately \$55.5 million.

8% Senior Subordinated Notes due 2012 of CPI: As of October 1, 2010, CPI had \$117.0 million in aggregate principal amount of its 8% Senior Subordinated Notes due 2012 (the "8% Notes"). CPI made no repurchase of any of the outstanding 8% Notes during fiscal year 2010. During fiscal year 2009, CPI repurchased a total of \$8.0 million. CPI repurchased \$3.0 million aggregate principal amount of the 8% Notes in January 2009 at a discount of 8.5% to par value. CPI paid approximately \$2.9 million, including accrued interest of \$0.1 million, for the repurchase and realized a net gain of approximately \$0.2 million. CPI also repurchased \$5.0 million aggregate principal amount of the 8% Notes in June 2009 at a discount of 2.75% to par value. CPI paid approximately \$5.0 million, including accrued interest of \$0.2 million, for the repurchase and realized a net gain of approximately \$0.1 million. The 8% Notes have no sinking fund requirements.

The 8% Notes bear interest at the rate of 8.0% per year, payable on February 1 and August 1 of each year. The 8% Notes will mature on February 1, 2012. The 8% Notes are unsecured obligations, jointly and severally guaranteed by CPI International and each of CPI's domestic subsidiaries. The payment of all obligations relating to the 8% Notes are subordinated in right of payment to the prior payment in full in cash or cash equivalents of all senior debt (as defined in the indenture governing the 8% Notes) of CPI, including debt under the Senior Credit Facilities. Each guarantee of the 8% Notes is and will be subordinated to guarantor senior debt (as defined in the indenture governing the 8% Notes) on the same basis as the 8% Notes are subordinated to CPI's senior debt.

At any time or from time to time, CPI, at its option, may redeem the 8% Notes, in whole or in part, at the redemption prices (expressed as percentages of principal amount) thereof, together with accrued and unpaid interest thereon, if any, to the redemption date, if redeemed during the 12-month period beginning on February 1 of any given year. For year 2010 and thereafter, the optional redemption price is 100% of the principal amount of the 8% Notes.

Upon a change of control, CPI may be required to purchase all or any part of the 8% Notes for a cash price equal to 101% of the principal amount, plus accrued and unpaid interest thereon, if any, to the date of purchase.

Table of Contents

CPI INTERNATIONAL, INC.
and subsidiaries

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

The indenture governing the 8% Notes contains a number of covenants that, among other things, restrict, subject to certain exceptions, the ability of CPI and its restricted subsidiaries (as defined in the indenture governing the 8% Notes) to incur additional indebtedness, sell assets, consolidate or merge with or into other companies, pay dividends or repurchase or redeem capital stock or subordinated indebtedness, make certain investments, issue capital stock of their subsidiaries, incur liens and enter into certain types of transactions with their affiliates.

Events of default under the indenture governing the 8% Notes include: failure to make payments on the 8% Notes when due; failure to comply with covenants in the indenture governing the 8% Notes; a default under certain other indebtedness of CPI or any of its restricted subsidiaries that is caused by a failure to make payments on such indebtedness or that results in the acceleration of the maturity of such indebtedness; the existence of certain final judgments or orders against CPI or any of the restricted subsidiaries; and the occurrence of certain insolvency or bankruptcy events.

Floating Rate Senior Notes due 2015 of CPI International: As of October 1, 2010, \$12.0 million of aggregate principal amount remained outstanding under CPI International's Floating Rate Senior Notes due 2015 (the "FR Notes"). CPI International redeemed none of its outstanding FR Notes during fiscal years 2010 and 2009. During fiscal year 2008, CPI International redeemed \$10.0 million aggregate principal amount of the FR Notes. The FR Notes were originally issued at a 1% discount and have no sinking fund requirements.

The FR Notes require interest payments at an annual interest rate, reset at the beginning of each semi-annual period, equal to the then six-month LIBOR plus 5.75%, payable semiannually on February 1 and August 1 of each year. The interest rate on the semi-annual interest payment due February 1, 2011 is 6.43% per annum. The FR Notes will mature on February 1, 2015.

The FR Notes are general unsecured obligations of CPI International. The FR Notes are not guaranteed by any of CPI International's subsidiaries but are structurally subordinated to all existing and future indebtedness and other liabilities of CPI International's subsidiaries. The FR Notes are senior in right of payment to CPI International's existing and future indebtedness that is expressly subordinated to the FR Notes.

Because CPI International is a holding company with no operations of its own, CPI International relies on distributions from Communications & Power Industries to satisfy its obligations under the FR Notes. The Senior Credit Facilities and the indenture governing the 8% Notes restrict CPI's ability to make distributions to CPI International. The Senior Credit Facilities prohibit CPI from making distributions to CPI International unless there is no default under the Senior Credit Facilities and CPI satisfies a senior secured leverage ratio of 3.75:1 and, in the case of distributions to pay amounts other than interest on the FR Notes, the amount of the distribution and all prior such distributions do not exceed a specified amount. The indenture governing the 8% Notes prohibits CPI from making distributions to CPI International unless, among other things, there is no default under the indenture and the amount of the proposed dividend plus all previous Restricted Payments (as defined in the indenture governing the 8% Notes) does not exceed a specified amount.

At any time or from time to time, CPI International, at its option, may redeem the FR Notes, in whole or in part, at the redemption prices (expressed as percentages of principal amount) thereof, together with accrued and unpaid interest thereon, if any, to the redemption date, if redeemed during the 12-month period beginning on February 1 of any given

year. For year 2010 and thereafter, the optional redemption price is 100% of the principal amount of the FR Notes.

- 99 -

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

Upon a change of control, as defined in the indenture governing the FR Notes, CPI International may be required to purchase all or any part of the outstanding FR Notes for a cash price equal to 101% of the principal amount, plus accrued and unpaid interest thereon, if any, to the date of purchase.

The indenture governing the FR Notes contains certain covenants that, among other things, limit the ability of CPI International and its restricted subsidiaries (as defined in the indenture governing the FR Notes) to incur additional indebtedness, sell assets, consolidate or merge with or into other companies, pay dividends or repurchase or redeem capital stock or subordinated indebtedness, make certain investments, issue capital stock of their subsidiaries, incur liens and enter into certain types of transactions with their affiliates.

Events of default under the indenture governing the FR Notes include: failure to make payments on the FR Notes when due; failure to comply with covenants in the indenture governing the FR Notes; a default under certain other indebtedness of CPI International or any of its restricted subsidiaries that is caused by a failure to make payments on such indebtedness or that results in the acceleration of the maturity of such indebtedness; the existence of certain final judgments or orders against CPI International or any of the restricted subsidiaries; and the occurrence of certain insolvency or bankruptcy events.

Debt Maturities: As of October 1, 2010, maturities on long-term debt were as follows:

Fiscal Year	Term Loan	8% Senior Subordinated Notes	Floating Rate Senior Notes	Total
2011	\$ 66,000	\$ -	\$ -	\$ 66,000
2012	-	117,000	-	117,000
2013	-	-	-	-
2014	-	-	-	-
2015	-	-	12,000	12,000
	\$ 66,000	\$ 117,000	\$ 12,000	\$ 195,000

The above table assumes (1) that the respective debt instruments will be outstanding until their scheduled maturity dates, except for the Term Loan under the Senior Credit Facilities, which is assumed to mature on the earlier date of August 1, 2011 as described above under "Senior Credit Facilities," and (2) a debt level based on mandatory repayments according to the contractual amortization schedule. The above table also excludes any optional prepayments.

As of October 1, 2010, the Company was in compliance with the covenants under the indentures governing the 8% Notes and FR Notes and the agreements governing the Senior Credit Facilities.

(Gain) loss on debt extinguishment: The repurchase of \$8.0 million of the 8% Notes during fiscal year 2009, as discussed above, resulted in a gain on debt extinguishment of \$0.2 million which was comprised of a discount of \$0.4 million, partially offset by a non-cash write-off of \$0.2 million deferred debt issue costs. The redemption of \$10.0 million of the FR Notes in fiscal year 2008 resulted in a loss on debt extinguishment of approximately \$0.6 million, including non-cash write-offs of \$0.4 million of unamortized debt issue costs and issue discount costs and \$0.2 million

in cash payments primarily for call premiums.

(All tabular amounts in thousands except share and per share amounts)

Interest rate swap agreements: See Note 7 for information on the interest rate swap agreements entered into by the Company to hedge the interest rate exposure associated with the Term Loan.

6. Employee Benefit Plans

Retirement Plans: The Company provides a qualified 401(k) investment plan covering substantially all of its domestic employees and a pension contribution plan covering substantially all of its Canadian employees. Discontinued as of end of fiscal year 2008, a profit sharing plan had also been provided by the Company, covering substantially all of its Econco employees. These plans provided for the Company to contribute an amount based on a percentage of each participant's base pay. The Company also has a Non-Qualified Deferred Compensation Plan (the "Non-Qualified Plan") that allows a select group of management and highly compensated employees to defer a portion of their compensation. The Non-Qualified Plan liability recorded by the Company amounted to approximately \$0.4 million and \$0.3 million as of October 1, 2010 and October 2, 2009, respectively. For all of the Company's current retirement plans, all participant contributions and Company matching contributions are 100% vested. Total CPI contributions to these retirement plans were \$2.7 million, \$2.6 million and \$3.7 million for fiscal years 2010, 2009 and 2008, respectively. The Company's contributions were lower in fiscal years 2010 and 2009 as the Company reduced its contributions to the retirement plans as a cost savings measure, which was restored to prior levels during fiscal year 2010.

Defined Benefit Pension Plan: The Company maintains a defined benefit pension plan for its Chief Executive Officer ("CEO"). The plan's benefits are based on the CEO's compensation earnings and are limited by statutory requirements of the Canadian Income Tax Act. All costs of the plan are borne by the Company.

At October 1, 2010 and October 2, 2009, the Company recorded a liability of \$0.4 million and \$0.3 million, respectively, which approximates the excess of the projected benefit obligation over plan assets of \$0.9 million and \$0.8 million, respectively. Additionally, the Company recorded an unrealized loss of \$0.3 million, net of tax of \$0.1 million, as of October 1, 2010; an unrealized loss of \$0.2 million, net of tax of \$0.1 million, as of October 2, 2009; and an unrealized loss of \$0.2 million, net of tax of \$0.1 million, as of October 3, 2008 to accumulated other comprehensive (loss) income in the consolidated balance sheets..

The Company's defined benefit pension plan is managed by an insurance company consistent with regulations or market practice in Canada, where the plan assets are invested. Net pension expense was not material for any period. Contributions to the plan are not expected to be significant to the financial position of the Company.

7. Derivative Instruments and Hedging Activities

Foreign Exchange Forward Contracts: Although the majority of the Company's revenue and expense activities are transacted in U.S. dollars, the Company does transact business in foreign countries. The Company's primary foreign currency cash flows are in Canada and several European countries. In an effort to reduce its foreign currency exposure to Canadian dollar denominated expenses, the Company enters into Canadian dollar forward contracts to hedge the Canadian dollar denominated costs for its manufacturing operation in Canada. The Company does not engage in

currency speculation.

- 101 -

Table of Contents

CPI INTERNATIONAL, INC.
and subsidiaries

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

The Company's Canadian dollar forward contracts in effect as of October 1, 2010 have durations of 7 to 11 months. These contracts are designated as cash flow hedges and are considered highly effective, as defined by FASB ASC 815. Unrealized gains and losses from foreign exchange forward contracts are included in accumulated other comprehensive (loss) income in the consolidated balance sheets. At October 1, 2010, the unrealized gain, net of tax of \$0.3 million, was \$0.7 million. The Company anticipates recognizing the entire unrealized gain or loss in operating earnings within the next four fiscal quarters. Changes in the fair value of foreign currency forward contracts due to changes in time value are excluded from the assessment of effectiveness and are immediately recognized in general and administrative expenses in the consolidated statements of income. The time value was not material for fiscal years 2010, 2009 and 2008. If the transaction being hedged fails to occur, or if a portion of any derivative is ineffective, then the Company immediately recognizes the gain or loss on the associated financial instrument in general and administrative expenses in the consolidated statements of income. The gain recognized in general and administrative expenses due to hedge ineffectiveness for fiscal year 2010 was \$0.1 million. No ineffective amounts were recognized due to anticipated transactions failing to occur in fiscal years 2009 and 2008.

As of October 1, 2010, the Company had entered into Canadian dollar forward contracts for approximately \$14.1 million (Canadian dollars), or approximately 39% of estimated Canadian dollar denominated expenses for October 2010 through June 2011, at an average rate of approximately 0.94 U.S. dollars to Canadian dollars.

Interest Rate Contracts: The Company also uses derivative instruments in order to manage interest costs and risk associated with its long-term debt. During fiscal year 2007, the Company entered into an interest rate swap contract (the "2007 Swap") to receive three-month USD-LIBOR-BBA (British Bankers' Association) interest and pay 4.77% fixed rate interest. Net interest positions are settled quarterly. The Company has structured the 2007 Swap with decreasing notional amounts such that it is less than the balance of its Term Loan under the Senior Credit Facilities discussed in Note 5. The notional value of the 2007 Swap was \$30.0 million at October 1, 2010 and represented approximately 45% of the aggregate Term Loan balance. The Swap agreement is effective through June 30, 2011. Under the provisions of ASC 815, this arrangement was initially designated and qualified as an effective cash flow hedge of interest rate risk related to the term loan, which permitted recording the fair value of the 2007 Swap and corresponding unrealized gain or loss to accumulated other comprehensive (loss) income in the consolidated balance sheets. At October 1, 2010, the unrealized loss, net of tax of \$0.3 million, was \$0.5 million. The interest rate swap gain or loss is included in the assessment of hedge effectiveness. Gains and losses representing hedge ineffectiveness are immediately recognized in interest expense, net, in the consolidated statements of income.

See Note 4, Financial Instruments, for further information regarding the Company's derivative instruments.

(All tabular amounts in thousands except share and per share amounts)

As a result of the use of derivative instruments, the Company is exposed to the risk that counterparties to derivative contracts will fail to meet their contractual obligations. The Company does not hold collateral or other security from its counterparties supporting its derivative instruments. To mitigate the counterparty credit risk, the Company has a policy of only entering into contracts with carefully selected major financial institutions based upon their credit ratings and other factors. The Company regularly reviews its credit exposure balances as well as the creditworthiness of its counterparties.

When the Company's derivatives are in a net asset position, such as the case with the Company's forward foreign exchange contract derivatives at October 1, 2010, the Company is exposed to credit loss from nonperformance by the counterparty. If the counterparty fails to perform, credit risk with such counterparty is equal to the extent of the fair value gain in the derivative. At October 1, 2010, the Company's interest rate contract derivatives were in a net liability position, and the Company, therefore, was not exposed to the interest rate contract counterparty credit risk.

8. Commitments and Contingencies

Leases: The Company is committed to minimum rentals under non-cancelable operating lease agreements, primarily for land and facility space, that expire on various dates through 2050. Certain of the leases provide for escalating lease payments. Future minimum lease payments for all non-cancelable operating lease agreements at October 1, 2010 were as follows:

Fiscal Year	Operating Leases
2011	\$ 1,409
2012	1,128
2013	699
2014	422
2015	219
Thereafter	2,443
	\$ 6,320

Real estate taxes, insurance, and maintenance are also obligations of the Company. Rental expense under non-cancelable operating leases amounted to \$2.5 million for each of fiscal years 2010, 2009 and 2008. Assets subject to capital leases at October 1, 2010 and October 2, 2009 were not material.

Guarantees: The Company has restricted cash of \$1.8 million and \$1.6 million as of October 1, 2010 and October 2, 2009, respectively, consisting primarily of bank guarantees from customer advance payments to the Company's international subsidiaries. The bank guarantees become unrestricted cash when performance under the sales or supply contract is complete.

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

Purchase commitments: As of October 1, 2010, the Company had the following known purchase commitments, which include primarily future purchases for inventory-related items under various purchase arrangements as well as other obligations in the ordinary course of business that the Company cannot cancel or where it would be required to pay a termination fee in the event of cancellation:

Fiscal Year	Purchase Contracts
2011	\$ 28,519
2012	326
2013	5
2014	-
2015	-
	\$ 28,850

Indemnification: As permitted under Delaware law, the Company has agreements whereby the Company indemnifies its officers, directors and certain employees for certain events or occurrences while the employee, officer or director is, or was serving, at the Company's request in such capacity. The term of the indemnification period is for the officer's or director's lifetime. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is unlimited; however, the Company has Director and Officer insurance policies that limit its exposure and may enable it to recover a portion of any future amounts paid.

The Company has entered into other standard indemnification agreements in its ordinary course of business. Pursuant to these agreements, the Company agrees to indemnify, defend, hold harmless and to reimburse the indemnified party for losses suffered or incurred by the indemnified party, generally the Company's business partners or customers, in connection with any patent, copyright or other intellectual property infringement claim by any third-party with respect to the Company's products. The term of these indemnification agreements is generally perpetual after execution of the agreement. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is unlimited. Management believes that the likelihood of loss under these agreements is remote.

Employment Agreements: The Company has entered into employment agreements with certain members of the executive management, which include provisions for the continued payment of salary, benefits and a pro-rata portion of an annual bonus for periods ranging from 12 months to 30 months upon certain terminations of employment.

Contingencies: From time to time, the Company may be subject to claims that arise in the ordinary course of business. Except as noted below, in the opinion of management, all such matters involve amounts that would not have a material adverse effect on the Company's consolidated financial position if unfavorably resolved.

CPI INTERNATIONAL, INC.
and subsidiaries

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

On July 1, 2010, a putative stockholder class action complaint was filed against the Company, the members of the Company's board of directors, and Comtech Telecommunications Corporation ("Comtech"). The lawsuit concerns the proposed merger between the Company and Comtech, and generally asserts claims alleging, among other things, that each member of the Company's board of directors breached his fiduciary duties by agreeing to the terms of the previously proposed merger and by failing to provide stockholders with allegedly material information related to the proposed merger, and that Comtech aided and abetted the breaches of fiduciary duty allegedly committed by the members of the Company's board of directors. The lawsuit seeks, among other things, class action certification and monetary relief. On July 28, 2010, the plaintiff filed an amended complaint, making generally the same claims against the same defendants, and seeking the same relief. In addition, the amended complaint generally alleges that the consideration that would have been paid to the Company's stockholders under the terms of the proposed merger was inadequate. On September 7, 2010, the Company terminated the Comtech sale agreement. On November 24, 2010, the Company entered in an agreement and plan of merger with Catalyst Holdings, Inc. and Catalyst Acquisition, Inc. which are affiliates of The Veritas Capital Fund IV, L.P. ("Veritas"). On December 9, 2010, the plaintiff filed a motion for leave to file a second amended complaint which, among other things, amends its breach of fiduciary duty claims to allege that the Company and its board of directors, as well as Cypress Associates II LLC, breached fiduciary duties in connection with the proposed merger of the Company with a Veritas affiliate, adds a claim for attorneys' fees for the benefit the plaintiff purportedly obtained as a result of its previous prosecution of this action, and adds claims against Veritas and its affiliates for aiding and abetting the aforementioned breaches of fiduciary duties. The action continues to seek, among other things, class action certification and monetary relief. The Company believes all claims asserted in the lawsuit to be without merit.

During fiscal year 2009, the Company received a notice from a customer purporting to terminate a sales contract due to alleged nonperformance. In April and June 2010, the Company received notices from the customer claiming additional cost incurred due to the alleged nonperformance. The customer has filed a claim for damages of approximately \$2.1 million and the Company has filed a counterclaim for damages of approximately \$0.9 million. The Company plans to contest this matter vigorously. At this time, the Company believes that any loss or gain with respect to this matter will not have a material effect on the Company's consolidated results of operations and cash flows.

All legal costs are expensed as incurred.

9. Stockholders' Equity

Common and Preferred Stock: The Company has 90,000,000 authorized shares of Common Stock, par value \$0.01 per share, and 10,000,000 authorized shares of Preferred Stock, par value \$0.01 per share. The holder of each share of Common Stock has the right to one vote. The board of directors has the authority to issue the undesignated Preferred Stock in one or more series and to fix the rights, preferences, privileges and restrictions thereof. At October 1, 2010 and October 2, 2009, there were no shares of Preferred Stock outstanding.

Treasury Stock: Pursuant to its May 2008 publicly announced share repurchase program, the Company repurchased 206,243 shares at an average per share price of \$13.54, plus average brokerage commissions of \$0.04 per share, for an aggregate cost of \$2.8 million during fiscal year 2008. Repurchased shares have been recorded as treasury shares and

will be held until the Company's board of directors designates that these shares be retired or used for other purposes.

Stock-Based Compensation Plans: The Company has two active stock plans: the 2006 Equity and Performance Incentive Plan (the "2006 Plan") and the 2006 Employee Stock Purchase Plan (the "2006 ESPP").

- 107 -

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

2006 Plan: The 2006 Plan provides for an aggregate of up to 2,800,000 shares of CPI International's common stock to be available for awards, plus the number of shares subject to awards granted under the 2004 Stock Incentive Plan (the "2004 Plan") and the 2000 Stock Option Plan (the "2000 Plan") that are forfeited, expire or are cancelled after the effective date of the 2006 Plan. All of the Company's employees (including officers), directors, and consultants are eligible for awards under the 2006 Plan. The 2006 Plan is administered by the Compensation Committee of the Company's board of directors ("Compensation Committee") and awards may consist of options, stock appreciation rights, restricted stock, other stock unit awards, performance awards, dividend equivalents or any combination of the foregoing. The exercise price for stock options generally cannot be less than 100% of the fair market value of the shares on the date of grant. Effective February 2009, future share-based awards (other than option and stock appreciation right awards) made under the 2006 Plan will count as two shares for purposes of determining whether the cap on the total number of shares issuable under the 2006 Plan has been exceeded. Approximately 1,285,000 shares were available for grant as of October 1, 2010.

2006 ESPP: The 2006 ESPP permits eligible employees to purchase common stock at a discounted price. An aggregate of 760,000 shares of common stock is reserved for issuance under this plan. The stock purchase plan is administered by the Compensation Committee. Employees participating in the plan may purchase stock for their accounts according to a price formula set by the Compensation Committee, as administrator, before the applicable offering period, which cannot exceed 24 months. The price per share will equal either a fixed percentage (which may not be lower than 85%) of the fair market value of a share of common stock on the last day of the purchase period in the offering, or the lower of (1) a fixed percentage (not to be less than 85%) of the fair market value of a share of common stock on the date of commencement of participation in the offering and (2) a fixed percentage (not to be less than 85%) of the fair market value of a share of common stock on the date of purchase as determined by the Compensation Committee. Under the 2006 ESPP, approximately 477,000 shares of common stock were available for issuance as of October 1, 2010.

The Company has two other stock plans, the 2004 Plan and the 2000 Plan mentioned above, that were terminated as to future grants. Although these plans have been terminated as to future grants, they continue to govern all awards granted under them.

Stock Options: Options outstanding that have vested and are expected to vest as of October 1, 2010 are as follows:

	Number of Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Vested	2,915,483	\$ 5.61	3.8	\$ 25,930
Expected to vest	430,539	13.29	7.5	871
Total	3,346,022	6.60	4.2	\$ 26,801

Options outstanding that are expected to vest are net of estimated future option forfeitures in accordance with the provisions of FASB ASC 718, "Compensation—Stock Compensation."

The aggregate intrinsic value in the preceding table represents the total pre-tax intrinsic value of in-the-money options that would have been received by the option holders had all option holders exercised their options at the Company's closing stock price on the date indicated. As of October 1, 2010, approximately 2.4 million exercisable options were in-the-money.

During fiscal years 2010, 2009 and 2008, cash received from option exercises was approximately \$0.2 million, \$0.1 million and \$38,000, and the total intrinsic value of options exercised was approximately \$1.5 million, \$0.4 million and \$0.1 million, respectively. As of October 1, 2010, there was approximately \$1.5 million of total unrecognized compensation costs related to nonvested stock options, which is expected to be recognized over a weighted-average vesting period of 1.3 years.

Stock Purchase Plan: Employees purchased approximately 49,000 shares, 111,000 shares, and 72,000 shares in fiscal years 2010, 2009 and 2008, respectively, for \$0.6 million, \$1.0 million and \$0.9 million, respectively, under the 2006 ESPP. As of October 1, 2010, there were no unrecognized compensation costs related to rights to acquire stock under the 2006 ESPP.

Restricted Stock and Restricted Stock Units: As of October 1, 2010, October 2, 2009 and October 3, 2008, there were outstanding 310,341, 218,298 and 117,154, respectively, of nonvested restricted stock and restricted stock units, in each case, granted to directors and employees. The restricted stock and restricted stock units generally vest over periods of one to four years. Upon vesting, each restricted stock unit will automatically convert into one share of common stock of CPI International.

* Based on the value of the Company's stock on the date that the restricted stock units vest.

During the first quarter of fiscal year 2010, the Company granted 104,800 restricted stock units with time vesting criteria to certain of its non-executive employees and 36,000 restricted stock units with performance vesting criteria to its officers.

During the second quarter of fiscal year 2010, the Company granted certain members of its board of directors a total of 22,507 shares of restricted stock which will vest within the following three years.

Aggregate intrinsic value of the nonvested restricted stock and restricted stock unit awards at October 1, 2010 and October 2, 2009 was \$4.4 million and \$2.5 million, respectively. As of October 1, 2010, there was \$2.3 million of unrecognized compensation costs related to restricted stock and restricted stock unit awards. The unrecognized compensation cost is expected to be recognized over a weighted average period of 1.7 years.

The Company settles stock option exercises and restricted stock units with newly issued common shares.

Valuation and Expense Information

The fair value of the Company's time-based option awards is estimated on the date of grant using the Black-Scholes model. The fair value of each market performance-based (or combination of market performance- and time-based) option, restricted stock and restricted stock unit award is estimated on the date of grant using the Monte Carlo simulation technique in a risk-neutral framework.

- 111 -

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

The Black-Scholes and the Monte Carlo simulation valuation models were developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable and require the input of subjective assumptions, including the expected stock price volatility and estimated option life. The Company currently does not intend to pay dividends and, accordingly, no dividends have been assumed in its Black-Scholes calculation and Monte Carlo simulation. Since the Company's common stock has not been publicly traded for a sufficient time period, the expected volatility is based on a blend of expected volatilities of similar companies and that of the Company based on its available historical data. The risk-free rates are based on the U.S. Treasury yield in effect at the time of the grant. Since the Company's historical data is limited, the expected term of time-based options granted is based on integrating historical data with the simplified method for plain vanilla options in accordance with ASC 718. The integration of historical data with the simplified method is done by using the actual life for options that have been settled, and a uniform distribution assumption for the options still outstanding. The Company will continue to use historical data with the simplified method until it has enough historical experience to provide a reasonable estimate of expected term.

Stock Options. Assumptions used in the Black-Scholes model to estimate the fair value of time-based option grants are presented below.

	Year Ended					
	October 1, 2010		October 2, 2009		October 3, 2008	
Expected term (in years)	7.79		-		6.25	
Expected volatility	60.50	%	-	%	41.20	%
Dividend yield	0.00	%	-	%	0.0	%
Risk-free rate	3.0	%	-	%	3.8	%

There were no time-based options granted during fiscal year 2009.

Assumptions used in the Monte Carlo simulation model to estimate the fair value of time- and market performance-based options first granted during fiscal year 2009 are presented below.

Contractual term (in years)	10.00
Expected volatility	51.50%
Risk-free rate	3.5 %
Dividend yield	0 %

There were no time-based and market performance-based options granted during fiscal years 2010 and 2008.

The weighted-average grant-date fair value of all the options granted during fiscal years 2010, 2009 and 2008 was \$6.25, \$5.61 and \$7.83 per share, respectively.

Stock Purchase Plan. Based on the 15% discount received by the employees, the weighted-average fair value of shares issued under the 2006 ESPP was \$2.08, \$1.51 and \$2.08 per share during fiscal years 2010, 2009 and 2008, respectively.

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

Restricted Stock and Restricted Stock Units. The fair value of each time-based restricted stock and restricted stock unit award and of each performance-based restricted stock unit award is calculated using the market price of the Company's common stock on the date of grant. The fair value of each performance-based restricted stock unit award assumes that the relevant performance criteria will be met and the target payout level will be achieved. Compensation cost is adjusted for subsequent changes in the outcome of performance-related conditions until the award vests.

Assumptions used in the Monte Carlo simulation model to estimate the fair value of time- and market performance-based restricted stock and restricted stock units first granted during fiscal year 2009 are presented below.

Expected volatility	51.50%
Risk-free rate	3.5 %
Dividend yield	0 %

There were no time- and market performance-based restricted stock and restricted stock units granted during fiscal years 2010 and 2008.

The weighted-average estimated fair value of restricted stock and restricted stock units granted was \$10.04, \$8.87 and \$15.22 per share during fiscal years 2010, 2009 and 2008, respectively.

As stock-based compensation expense recognized in the consolidated statement of income for all fiscal years presented is based on awards ultimately expected to vest, it has been reduced for estimated forfeitures. FASB ASC 718 requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

The following table summarizes stock-based compensation expense for fiscal years 2010, 2009, and 2008, which was allocated as follows:

	October 1, 2010	Year Ended October 2, 2009	October 3, 2008
Share-based compensation cost recognized in the statement of income by caption:			
Cost of sales	\$ 575	\$ 506	\$ 425
Research and development	200	174	153
Selling and marketing	284	262	229

(All tabular amounts in thousands except share and per share amounts)

The tax benefit realized from option exercises and restricted stock vesting totaled approximately \$0.8 million, \$0.2 million and \$50,000 during fiscal years 2010, 2009 and 2008, respectively.

10. Termination of Merger Agreement with Comtech

On September 7, 2010, the Company and Comtech entered into a Termination and Release Agreement, by which the Company and Comtech terminated a previously announced merger agreement, dated May 8, 2010. The termination was by mutual agreement of the companies and was unanimously approved by the Company's board of directors and the board of directors of Comtech. As part of the termination, the Company has paid Comtech a termination fee of \$15.0 million. In addition, the Company has incurred during fiscal year 2010 transaction expenses relating to the proposed merger in the amount of \$4.9 million. Such transaction expenses comprised fees for investment bankers, attorneys and other professional services rendered in connection with the proposed merger, as well as with the related stockholder class lawsuit described in Note 8 above. The total expenses of \$19.9 million is presented as "strategic alternative transaction expenses" in the consolidated statement of income for fiscal year 2010.

11. Income Taxes

Income (loss) before income taxes consisted of the following:

	October 1, 2010	Year Ended October 2, 2009	October 3, 2008
U.S.	\$ (2,914)	\$ 15,206	\$ 20,405
Foreign	15,275	8,042	10,848
	\$ 12,361	\$ 23,248	\$ 31,253

Income tax expense (benefit) consisted of the following:

	October 1, 2010	Year Ended October 2, 2009	October 3, 2008
Current			
Federal	\$ 5,879	\$ 1,263	\$ 6,904
State	857	1,083	1,980

- 114 -

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

The differences between the effective income tax rate and the federal statutory income tax rate were as follows:

	Year Ended					
	October 1, 2010		October 2, 2009		October 3, 2008	
Statutory federal income tax rate	35.0	%	35.0	%	35.0	%
Domestic manufacturing deduction	(3.2))	(1.7))	(1.5))
Foreign tax rate differential	(10.0))	(2.8))	(2.3))
State taxes	2.8		4.3		3.7	
Research and development credit	(3.1))	(1.3))	-	
Tax contingency reserve accrual (reversal)	23.9		(14.6))	0.5	
Correction of error from prior year	-		(7.2))	(1.4))
New state legislation	-		(2.9))	-	
Tax treaty benefits	-		(12.1))	-	
Other differences	0.1		2.4		0.6	
Effective tax rate	45.5	%	(0.9)) %	34.6	%

The effective tax rate for fiscal year 2010 was 45.5% and diverged from the federal and state statutory rate primarily due to a \$3.1 million discrete tax expense on an uncertain tax position for strategic alternative transaction expenses.

Deferred income taxes reflect the net tax effects of temporary differences between the basis of assets and liabilities for financial reporting and income tax purposes. The Company's deferred tax assets (liabilities) were as follows:

	October 1, 2010	October 2, 2009
Deferred tax assets:		
Inventory and other reserves	\$ 6,699	\$ 6,539
Accrued vacation	1,758	1,607
Deferred compensation and other accruals	6,448	5,338
Tax credit carryforward	2,241	-
Other	1,695	2,001
Gross deferred tax assets	18,841	15,485
Valuation allowance	-	-
Total deferred tax assets	\$ 18,841	\$ 15,485
Deferred tax liabilities:		
Accelerated depreciation	\$ (6,084)	\$ (7,122)
Acquisition-related intangibles	(23,022)	(23,659)

Edgar Filing: CPI INTERNATIONAL, INC. - Form 10-K

Other comprehensive income	-	(432)
Unremitted foreign earnings	(92)	(63)
Other long-term deferred tax liabilities	(320)	(283)
Total deferred tax liabilities	\$ (29,518)	\$ (31,559)
Net deferred tax liabilities	\$ (10,677)	\$ (16,074)

- 115 -

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

Realization of the Company's net deferred tax assets is based upon the weight of available evidence, including such factors as recent earnings history and expected future taxable income. The Company believes it is more likely than not that such assets will be realized; however, ultimate realization could be negatively impacted by market conditions and other variables not known or anticipated at this time. As of October 1, 2010, the Company had federal tax credit carryforwards of \$2.2 million. If not utilized, the federal tax credit carryforwards will begin to expire in 2019.

The net deferred tax assets (liabilities) were classified in the consolidated balance sheet as follows:

	October 1, 2010	October 2, 2009
Deferred tax assets (Current asset)	\$ 11,030	\$ 8,652
Deferred income taxes (Long-term liability)	(21,707)	(24,726)
Net deferred tax liabilities	\$ (10,677)	\$ (16,074)

The Company has not provided deferred taxes on approximately \$21.8 million of the Company's undistributed earnings in its Canadian operations which are intended to be permanently reinvested. The amount of unrecognized deferred tax liability related to this temporary difference is estimated to be approximately \$2.7 million.

The total unrecognized tax benefits, excluding any related interest accrual, are reported in the consolidated balance sheet in the following accounts:

	October 1, 2010	October 2, 2009
Income taxes payable	\$ 2,744	\$ 2,713
Other long-term liabilities	3,841	615
	\$ 6,585	\$ 3,328

Of the total unrecognized tax benefit balance, \$6.3 million and \$2.4 million would reduce the effective tax rate if recognized as of October 1, 2010 and October 2, 2009, respectively. The Company believes that it is reasonably possible that, in the next 12 months, the amount of unrecognized tax benefits related to the resolution of federal, state and foreign matters could be reduced by \$2.7 million as audits close, statutes expire and amended tax returns are filed.

As of October 1, 2010 and October 2, 2009, the Company had \$0.8 million and \$0.6 million of accrued income tax related interest and penalties on unrecognized tax benefits, respectively. Interest included in the Company's provision for income taxes was an expense of \$0.2 million for fiscal year 2010 and a benefit of \$1.2 million for fiscal year 2009. If the accrued interest and penalties do not ultimately become payable, amounts accrued will be reduced in the period that such determination is made, and reflected as a reduction of the income tax provision.

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

A reconciliation of the beginning and ending balances of the total amount of unrecognized tax benefits, excluding accrued interest and penalties is as follows:

	Year Ended	
	October 1, 2010	October 2, 2009
Unrecognized tax benefits - beginning of year	\$ 3,328	\$ 5,609
Settlements and effective settlements with tax authorities and related remeasurements	-	(75)
Decrease in balances related to expiration of statute of limitations	(82)	-
Increase in balances related to tax positions taken in current year	3,312	228
Decrease in balances related to tax positions taken in prior years	(86)	(2,964)
Increase in balances related to tax positions taken in prior years	31	512
Changes due to translation of foreign currency	82	18
Unrecognized tax benefits - end of year	\$ 6,585	\$ 3,328

The Company files U.S. federal, California and other U.S. states, Canada and other foreign jurisdictions income tax returns. Generally, fiscal years 2006 to 2009 remain open to examination by the various taxing jurisdictions and the Company has not been audited for U.S. federal income tax matters. The Company has income tax audits in progress in Canada and in several international jurisdictions in which it operates. The years under examination by the Canadian taxing authorities are 2001 to 2002.

Based on the outcome of examinations of the Company and the result of the expiration of statutes of limitations for specific jurisdictions, it is reasonably possible that the related unrecognized tax benefits could change from those recorded in the statement of financial position. The Company has provided for amounts of anticipated tax audit adjustments in various jurisdictions based on its reasonable estimate of additional taxes and interest that do not meet the more likely than not standard under the accounting guidance for uncertainty in income taxes.

The Canada Revenue Agency (“CRA”) is conducting an audit of the Company’s income tax returns in Canada for fiscal years 2001 and 2002. The Company received a proposed tax assessment, including interest expense from the CRA for fiscal years 2001 and 2002. The tax assessment is based on tax deductions related to the valuation of the Satcom business, which was purchased by Communications & Power Industries Canada Inc. from CPI in fiscal years 2001 and 2002. While the Company believes that it has meritorious defenses and intends to vigorously defend its position, it is reasonably possible that the CRA may issue a formal tax assessment requiring the Company to settle the tax deficiency within 12 months. The Company believes that adequate accruals have been provided for any adjustments

that may result from the CRA examination.

and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

12. Earnings Per Share

As discussed in Note 2, the Company adopted ASC 260 effective October 3, 2009. Under ASC 260, earnings per share is computed using the two-class method, which is an earnings allocation method for computing earnings per share that treats a participating security as having rights to earnings that would otherwise have been available to common stockholders. Certain of the Company's stock-based compensation awards pay nonforfeitable dividends to the participants during the vesting period and, as such, are deemed participating securities. Basic earnings per share are computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted earnings per share is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding that are increased for additional shares that would be outstanding if potentially dilutive non-participating securities were converted to common shares, pursuant to the treasury stock method.

Earnings per share for the respective periods were calculated as follows:

	October 1, 2010	Year Ended October 2, 2009	October 3, 2008
Basic Earnings per Share			
Net income	\$ 6,739	\$ 23,466	\$ 20,449
Income allocated to participating securities	(116)	(286)	(118)
Net income available to common shareholders	\$ 6,623	\$ 23,180	\$ 20,331
Basic weighted average common shares outstanding			
	16,571	16,343	16,356
Net income per common share - Basic	\$ 0.40	\$ 1.42	\$ 1.24
Diluted Earnings per Share			
Net income	\$ 6,739	\$ 23,466	\$ 20,449
Income allocated to participating securities	(108)	(268)	(110)
Net income available to common shareholders	\$ 6,631	\$ 23,198	\$ 20,339
Diluted weighted average common shares outstanding			
	17,837	17,443	17,684
Effect of dilutive stock options	1,266	1,100	1,328
Diluted weighted average common shares outstanding	17,837	17,443	17,684
	\$ 0.37	\$ 1.33	\$ 1.15

Net income per common share -
Diluted

1 Restated in accordance with ASC
260.

The calculation of diluted net income per share excludes all anti-dilutive shares from stock options. For fiscal years 2010, 2009 and 2008, the number of anti-dilutive shares, as calculated based on the weighted average price of the Company's common stock for the periods, was approximately 743,000, 864,000 and 731,000 shares, respectively.

13. Segments, Geographic and Customer Information

The Company's reportable segments are VED and satcom equipment. The VED segment develops, manufactures and distributes high-power/high-frequency microwave and radio frequency signal components. The satcom equipment segment manufactures and supplies high-power amplifiers and networks for satellite communication uplink and industrial applications. Segment information reported below is consistent with the manner in which it is reviewed and evaluated by the Company's chief operating decision maker ("CODM"), its chief executive officer, and is based on the nature of the Company's operations and products offered to customers.

The Company's reportable segments, VED and satcom equipment, are differentiated based on their underlying profitability and economic performance. The VED segment is made up of four divisions, that have been aggregated based on the similarity of their economic characteristics as measured by EBITDA, and the similarity of their products and services, production processes, types of customers and distribution methods, and nature of regulatory environments. The satcom equipment segment consists of one division. The Company's analysis of the similarity of economic characteristics was based on both a historical and anticipated future analysis of performance.

The VED segment develops, manufactures and distributes high power/high frequency microwave and radio frequency signal components. Its products include linear beam, cavity, power grid, crossed field and magnetron devices. These products are used in the communication, radar, electronic countermeasures, industrial, medical and scientific markets depending on the specific power and frequency requirements of the end-user and the physical operating conditions of the environment in which the VED will be located. These products are distributed through the Company's direct sales force, independent sales representatives and distributors.

The satcom equipment segment manufactures and supplies high power amplifiers and networks for satellite communication uplink and industrial applications. This segment also provides spares, service and other post sales support. Its products are distributed through the Company's direct sales force and independent sales representatives.

Amounts not reported as VED or satcom equipment are reported as Other. In accordance with quantitative and qualitative guidelines established by FASB ASC 280, "Segment Reporting." Other includes the activities of the Company's Malibu Division and unallocated corporate expenses, such as business combination-related expenses, share-based compensation expense and certain non-recurring or unusual expenses. The Malibu Division is a designer, manufacturer and integrator of advanced antenna systems for radar, radar simulators and telemetry systems, as well as for data links used in ground, airborne, unmanned aerial vehicles ("UAVs") and shipboard systems.

Sales and marketing, and certain administration expenses, are allocated to the divisions and are included in the results reported. The accounting policies of the reportable segments are the same as those described in the summary of significant accounting policies. Intersegment product transfers are recorded at cost.

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

Summarized financial information concerning the Company's reportable segments is shown in the following tables:

	Year Ended		
	October 1, 2010	October 2, 2009	October 3, 2008

Other	103,804	87,044
	\$ 478,276	\$ 458,254

EBITDA is the measure used by the CODM to evaluate segment profit or loss. EBITDA represents earnings before net interest expense, provision for income taxes and depreciation and amortization. The Company believes that EBITDA is a more meaningful representation of segment operating performance for leveraged businesses like its own and therefore uses this metric as its internal measure of profitability. For the reasons listed below, the Company believes EBITDA provides investors better understanding of the Company's financial performance in connection with their analysis of the Company's business:

EBITDA is a component of the measures used by the Company's board of directors and management team to evaluate the Company's operating performance;

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

the Company's Senior Credit Facilities contain a covenant that requires the Company to maintain a senior secured leverage ratio that contains EBITDA as a component, and the Company's management team uses EBITDA to monitor compliance with this covenant;

EBITDA is a component of the measures used by the Company's management team to make day-to-day operating decisions;

EBITDA facilitates comparisons between the Company's operating results and those of competitors with different capital structures and, therefore, is a component of the measures used by the Company's management to facilitate internal comparisons to competitors' results and the Company's industry in general; and

the payment of management bonuses is contingent upon, among other things, the satisfaction by the Company of certain targets that contain EBITDA as a component.

Other companies may define EBITDA differently and, as a result, the Company's measure of EBITDA may not be directly comparable to EBITDA of other companies. Although the Company uses EBITDA as a financial measure to assess the performance of its business, the use of EBITDA is limited because it does not include certain material costs, such as interest and taxes, necessary to operate the Company's business. When analyzing the Company's performance, EBITDA should be considered in addition to, and not as a substitute for or superior to, operating income, net income, cash flows from operating activities or other statements of income or statements of cash flows data prepared in accordance with U.S. GAAP. Operating income by the Company's reportable segments was as follows:

	October 1, 2010	Year Ended October 2, 2009	October 3, 2008
Operating income			
VED	\$ 59,765	\$ 49,006	\$ 64,431
Satcom equipment	8,726	4,861	5,327
Other	(40,917)	(13,888)	(18,817)
	\$ 27,574	\$ 39,979	\$ 50,941

The following table reconciles net income to EBITDA:

	October 1, 2010	Year Ended October 2, 2009	October 3, 2008
Net income	\$ 6,739	\$ 23,466	\$ 20,449
Depreciation and amortization	11,072	10,794	10,963
Interest expense, net	15,213	16,979	19,055
Income tax expense (benefit)	5,622	(218)	10,804
EBITDA	\$ 38,646	\$ 51,021	\$ 61,271

Table of ContentsCPI INTERNATIONAL, INC.
and subsidiariesNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

Net property, plant and equipment by geographic area were as follows:

	October 1, 2010	October 2, 2009
United States	\$ 41,746	\$ 45,028
Canada	12,290	12,831
Other	223	53
Total	\$ 54,259	\$ 57,912

With the exception of goodwill, the Company does not identify or allocate assets by operating segment, nor does its CODM evaluate operating segments using discrete asset information.

Goodwill by geographic area was as follows:

	October 1, 2010	October 2, 2009
United States	\$ 114,252	\$ 114,252
Canada	47,973	47,973
	\$ 162,225	\$ 162,225

Geographic sales by customer location were as follows for external customers:

	October 1, 2010	Year Ended October 2, 2009	October 3, 2008
United States	\$ 230,888	\$ 210,590	\$ 237,909
All foreign countries	129,546	122,286	132,105
Total sales	\$ 360,434	\$ 332,876	\$ 370,014

There were no individual foreign countries with sales greater than 10% of total sales for the periods presented.

The United States Government is the only customer that accounted for 10% or more of the Company's consolidated sales in fiscal years 2010, 2009 and 2008. Direct sales to the United States Government were \$48.5 million, \$49.2 million and \$68.6 million for fiscal years 2010, 2009 and 2008, respectively. Accounts receivable from this customer represented 12% and 11% of consolidated accounts receivable at October 1, 2010 and October 2, 2009, respectively.

14. Selected Quarterly Financial Data (Unaudited)

In management's opinion, the unaudited data has been prepared on the same basis as the audited information and includes all adjustments (consisting only of normal recurring adjustments) necessary for a fair presentation of the data for the periods presented. The Company's results of operations have varied and may continue to fluctuate significantly from quarter to quarter. The results of operations in any period should not be considered indicative of the results to be expected from any future period.

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Year ended October 1, 2010				
Sales	\$ 82,767	\$ 88,352	\$ 93,876	\$ 95,439
Gross profit	23,440	26,722	28,923	29,362
Net income (loss)	3,841	4,492	4,211	(5,805)
Basic earnings per share	\$ 0.23	\$ 0.27	\$ 0.25	\$ (0.34)
Diluted earnings per share	\$ 0.21	\$ 0.25	\$ 0.23	\$ (0.34)
Year ended October 2, 2009				
Sales	\$ 77,146	\$ 81,903	\$ 82,520	\$ 91,307
Gross profit	19,916	21,766	24,284	27,525
Net income	7,655	3,689	3,870	8,252
Basic earnings per share ¹	\$ 0.47	\$ 0.22	\$ 0.23	\$ 0.50
Diluted earnings per share ¹	\$ 0.44	\$ 0.21	\$ 0.22	\$ 0.46

¹ Restated in accordance with
ASC 260.

Net income for the third quarter of fiscal year 2010 includes after-tax transaction expenses of \$2.2 million relating to the previously announced merger agreement with Comtech.

Net loss for the fourth quarter of fiscal year 2010 reflects after-tax termination fee and transaction expenses totaling \$12.9 million relating to the merger agreement with Comtech.

Net income for the first quarter of fiscal year 2009 includes two significant discrete tax benefits: (1) \$5.1 million related to the Company's position with regard to an outstanding audit by the Canada Revenue Agency, and (2) \$0.6 million for an adjustment to Canadian tax accounts.

Net income for the second quarter of fiscal year 2009 includes a significant discrete tax benefit of \$0.7 million related to certain provisions of the California Budget Act of 2008 signed in February 2009.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

15. Subsequent Event

The Company entered into an Agreement and Plan of Merger dated as of November 24, 2010 ("Merger Agreement") with Catalyst Holdings, Inc., a Delaware corporation ("Parent") and Catalyst Acquisition, Inc., a wholly-owned subsidiary of Parent ("Merger Sub"). Parent and Merger Sub are affiliates of The Veritas Capital Fund IV ("Veritas").

The Merger Agreement contemplates that Merger Sub will be merged with and into the Company, with the Company surviving as a wholly-owned subsidiary of Parent (the "Merger"), and each outstanding share of the Company's common stock will be converted in the Merger into the right to receive \$19.50 per share in cash.

The Company has made customary representations, warranties and covenants in the Merger Agreement, including (i) its agreement, subject to certain exceptions, to conduct business in the ordinary course and not to engage in certain activities between the execution of the Merger Agreement and the consummation of the merger and (ii) its agreement to not solicit or knowingly encourage alternative transactions or, subject to certain exceptions, enter into discussions concerning, or provide information in connection with, alternative transactions.

The completion of the Merger is subject to certain conditions, including, among others, (i) the adoption of the Merger Agreement by the Company's stockholders, (ii) the absence of certain legal impediments to the consummation of the merger, (iii) the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, and certain approvals under foreign anti-competition laws, (iv) subject to certain materiality exceptions, the accuracy of the representations and warranties made by Parent and the Company, respectively, and (v) compliance by Parent and the Company with the respective obligations under the Merger Agreement. The completion of the Merger is not subject to a financing condition. However, generally, Parent will not be required to close the merger until completion of a marketing period set forth in the Merger Agreement.

The Merger Agreement contains typical mutual termination rights, including termination by mutual agreement of the parties, for any final and nonappealable order or law enjoining or prohibiting or making illegal the Merger or for failure to obtain the Company's stockholder approval. In addition, either party may terminate the Merger Agreement if the Merger is not consummated by April 15, 2011. In addition, the Merger Agreement may be terminated by Parent in the event that the Company's board of directors changes its recommendation. The Company may terminate the Merger Agreement in order to enter into a superior acquisition proposal. The Company may also terminate the Merger agreement if all of the conditions precedent to Parent's obligation to close have been satisfied or waived (other than conditions that by their terms are to be satisfied at the closing) and Parent does not complete the closing by the required date.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(All tabular amounts in thousands except share and per share amounts)

The Company has agreed to pay a termination fee upon termination of the merger agreement if, among other things, (i) Parent terminates the merger agreement due to a recommendation change by the Company's board of directors, (ii) either party terminates the merger agreement because of the failure to obtain stockholder approval and before termination, the Company's board of directors changes its recommendation, or (iii) the Company terminates the merger agreement to enter into a superior acquisition proposal. If the merger agreement is terminated in connection with a superior acquisition proposal, then the termination fee payable by the Company is \$13 million. A termination by Parent following a change of recommendation resulting from certain events, circumstances or developments unknown or not understood as of the date of the merger agreement results in a termination fee of \$15 million. In addition, if the termination by Parent following a change in recommendation resulting from certain events, circumstances or developments unknown or not understood as of the date of the merger agreement occurs after the stockholder meeting to approve the merger agreement and the stockholders fail to approve the merger agreement, the Company will also be required to reimburse up to \$2.5 million of Parent's fees and expenses.

If the Company terminates the merger agreement under certain circumstances (including Parent's failure to consummate the merger by the required date following satisfaction or waiver of all conditions precedent to Parent's obligation to close (other than conditions that by their terms are to be satisfied at the closing)), Parent must pay the Company a termination fee of \$22.5 million; provided that this termination fee will be increased to \$27.5 million if Parent has committed willful breach of the merger agreement.

16. Supplemental Guarantors Condensed Consolidating Financial Information

Issued on January 23, 2004, CPI's 8% Notes, the current balance of which is \$117.0 million, are guaranteed by CPI International and all of CPI's domestic subsidiaries. Separate financial statements of the guarantors are not presented because (i) the guarantors are wholly owned and have fully and unconditionally guaranteed the 8% Notes on a joint and several basis and (ii) the Company's management has determined that such separate financial statements are not material to investors. Instead, presented below are the consolidating financial statements of: (a) the parent, CPI International, (b) the issuer, CPI, (c) the guarantor subsidiaries (all of the domestic subsidiaries), (d) the non-guarantor subsidiaries, (e) the consolidating elimination entries, and (f) the consolidated totals. The accompanying consolidating financial information should be read in connection with the consolidated financial statements of CPI International.

Investments in subsidiaries are accounted for based on the equity method. The principal elimination entries eliminate investments in subsidiaries, intercompany balances, intercompany transactions and intercompany sales.
