Petrobras discovers new oil-bearing reservoirs in Alagoas

(Rio de Janeiro, November 25, 2004). PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA], a Brazilian international energy company, informs that it has discovered a new oil-bearing reservoir in the vicinity of the 1-FRO-3-AL (1- Fazenda Rosário number 3 AL) pioneer well in exploratory block BT-SEAL-2, the onshore part of the Sergipe-Alagoas Basin (see map below).

The Company's technical personnel have detected the presence excellent quality light oil. Further drilling will be needed to establish the extent of the reserves, but preliminary estimates indicate total recoverable volumes of 15 million barrels of oil equivalent. The 1-FRO-3-AL well is located about 37 km southeast of the city of Maceió. The oil-bearing reservoir lies at a depth of 965 meters.

Geophysicists and geologists from the Sergipe and Alagoas Exploration and Production Business Unit carried out the studies based on new seismic data obtained since 2000 and resulting in the BT-SEAL-2 block finds. The oil reservoirs that had been identified seismically have now been confirmed with the drilling of the 1-FRO-3-AL well.

Location of the discovery following the drilling of 1-FRO-3D-AL well

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
