(i) Water and sewage services

The Company provides supply services of water and collection of sewage to the State Government and other Companies related to it, under terms and conditions considered by Management as normal in the market, except as to the form of settlement of the credits, that may be realized under the conditions mentioned in items (iii), (iv) and (v).

(ii) Reimbursement of additional retirement and pension benefits paid

Refers to amounts of supplemental benefits of retirement and pension plan provided by State of Sao Paulo Law 4819/58 (Benefits) paid by the Company to former employees or retirees.

Under the terms of the Agreement referred to in (iii) below Gesp acknowledges to be responsible for the charges resulting from the Benefits, provided that the payment criteria set forth by the State Personnel Expense Department - DDPE, founded on the legal direction provided by the Legal Advisory of the Treasury Secretary and State s General Attorney s Office - PGE are obeyed.

As explained in item (vi), during the validation by Gesp of the amounts due to the Company on account of the Benefits, divergences have arisen as to the calculation criteria and eligibility of the Benefits applied by the Company. Company Management, however, maintains its understanding that these divergences do not justify any provision under the terms detailed in item (vi).

On June 30, 2009 and March 31, 2009, 2,576 and 2,585 retirees, respectively, received supplemental pension payment, and in the quarters ended on June 30, 2009 and March 31, 2009, the Company paid R\$26,763 and R\$25,220, respectively. There were 126 active employees on June 30, 2009 that will justify these benefits on occasion of their retirement, as compared to the 134 employees on March 31, 2009.

In January, 2004, the supplemental pension and retirement pension payments were transferred to the Secretary of Treasury, and they would be made in accordance with the calculation criteria defined by the PGE. Due to a judicial decision, the responsibility for the payments returned to Sabesp, under the original form.

(iii) Gesp Agreement

On December 11, 2001 the Company, Gesp (by means of the State Secretary of Treasury Affairs, currently the Secretary of Treasury) and the Departamento of Água e Energia Eletrica - DAEE, with the intermediation of the Secretary of Hydro Resources, Sanitation and Works, currently the Secretary of Sanitation and Energy, entered into the Term of Acknowledgement and Consolidation of Obligations, Payment Commitment and Other Covenants (the Gesp Agreement) with the purpose to resolve the outstanding issues existing between Gesp and the Company related to the services of water and sewage as to the Benefits.

The total agreement was R\$678,830, at cost value, being (i) R\$320,623 referring to the Benefits paid by the Company and not reimbursed by the State during the period from March, 1986 to November, 2001, and (ii) R\$358,207 arising from the provision of water supply and sewage collection services, invoiced and past due from 1985 to December 01, 2001, but not paid by Gesp.

Having in view the strategic importance of the reservoirs of Taiaçupeba, Jundiá, Biritiba, Paraitinga and Ponte Nova (Reservoirs), to guarantee the maintenance of the water volume of Alto Tiete, the Company agreed to receive them as part of the reimbursement referring to the Benefits. The Reservoirs would be transferred to it by DA EE, which, on its turn, would subrogate itself in credit of the same amount before Gesp.

However, the State of Sao Paulo s Attorney s Office questioned the legal validity of this agreement, by means of public civil action, which main argument is the lack of specific legislative authorization for the alienation of DAEE s estate. The Company s legal counsels assess the risk of loss of this proceeding as probable, in case the mentioned legislative authorization is not obtained, which would prevent the transfer of the respective reservoirs as partial amortization of the balance receivable.

The balances of services of water supply and sewage collection were included in the First and Second Amendments as described on items (iv) and (v). The balances referring to reimbursement of the supplement of retirement and pension plan were included in the Term of Commitment between the State of Sao Paulo and Sabesp, as described in items (vi) and (vii).

(iv) First Amendment to the Gesp Agreement

On March 22, 2004, the Company and the State Government amended the terms of the original GESP Agreement, thereby (1) consolidating and acknowledging amounts due from the State Government for water and sewage services , monetarily adjusted through February 2004; (2) formally authorizing the offset of amounts due from the State Government against interest on own capital declared by the Company and any other debt owed to the State Government at December 31, 2003, which were monetarily adjusted through

February 2004; and (3) defining the payment conditions of the remaining obligations of the State Government for water and sewage services.

Pursuant to the Amendment, the State Government recognized the amounts due to the Company for water supply and sewage collection services provided until February 2004 in the amount of R\$581,779, including monetary adjustment based on the Reference Rate (TR) at the end of each year until February 2004. The Company recognized amounts payable to the State Government related to interest on own capital in the amount of R\$518,732, including (1) amounts declared and paid related to years previous to 2003 (R\$126,967), (2) monetary adjustment of these amounts based on the annual variation of the Consumer Price Index (IPC/Fipe) until February 2004 (R\$31,098); and (3) amounts declared and due related to 2003 (R\$360,667).

The remaining obligation will be payable in monthly installments from May 2005 through April 2009, which will be subject to monetary adjustment at the Wholesale Consumer Price Index (IPCA/IBGE), plus interest of 0.5% .

The Amendment to the GESP Agreement does not provide for amounts owed by the State Government for supplementary retirement and pension plan benefits, paid by the Company on behalf of the State Government. Such amounts continue to be subject to the terms of the original GESP Agreement.

Management believes that the amounts owed by the State Government are receivable and it is not expected that losses will be incurred.

(v) Second Amendment to the Gesp Agreement

On December 28, 2007, the Company and the State of São Paulo, by means of the Secretary of Treasury signed the second amendment to the terms of the original Gesp agreement, (1) agreeing with the payment in installments of the remaining balance of the First Amendment, in the amount of R\$133,709 (amount at November 30, 2007) to be paid in 60 equal, monthly and consecutive installments, the first one maturing on January 02, 2008. The amount of the installments is monetarily adjusted according to the variation of the IPCA-IBGE, inserted by simple interest of 0.5% per month. In the balance of this agreement, which installments have been paid monthly, there is an amount of R\$46,244 that the State does not recognize as due. Sabesp has an understanding different from the State regarding this amount, not admitting the review of these previously agreed upon amounts, without the demonstration, in a grounded and unmistakable way, of the lack of correspondence between the amounts presented by Sabesp and the services effectively provided. For this reason the Company understands not necessary any provision for losses regarding these amounts (pursuant item VII of the Recitals of the Second Amendment to the Term of Acknowledgement, Payment Commitment and Other Covenants between the State of Sao Paulo and Sabesp) (2) with regards to the past due and unpaid accounts in the period from March, 2004 to October, 2007, resulting from the provision of water and collection of sewage services in the total of R\$256,608, R\$236,322 have been received and R\$8,784 were transferred to other debtor and R\$11,502 are pending confirmation and collection, These amounts are being jointly evaluated by Sabesp and the representatives of various Secretaries of State. Divergences have been identified, up to the moment, as to the debtor, but not as to the amount of the debt itself. In case of reclassification of the responsible for payment of the account, Sabesp transferred the collection to the corresponding Entity. The Company has not recorded a provision for losses in this amount because it understands that the divergences are substantially related to the identification of the debtor. (3) The interest on own capital due by Sabesp to the State, referring to the period from March, 2004 to December, 2006, in the amount of R\$400,823, restated from June, 2007 to November, 2007 by the Selic

rate, were paid in the period from January to March, 2008. (4) The State and Sabesp agreed upon resuming the fulfillment of their reciprocal obligations, timely, under the new premises: (a) implementation of the accounts electronic management system to facilitate and speed up the follow-up of the payment processes and the procedures of budgeting management; (b) structuring of the Program of Rational Use of Water (PURA), to rationalize the consumption of water and the amount of the water and sewage bills of the responsibility of the State; (c) the establishment, by the State, of criteria in the budgeting of a way to avoid the displacement of amounts in the specific line of water and sewage bills from 2008; (d) possibility of registration of state entities and bodies in a default system or master file; (e) possibility of interruption of the supply of water to the state entities in case of default in the payment of water and sewage bills.

Out of the invoicing of the months of November, 2007 to June, 2009, approximately 92% of the accounts have already been paid by the State Government.

(vi) Third Amendment to the Gesp Agreement

Gesp, Sabesp and DAEE, on November 17, 2008, entered into the Third Amendment to the Gesp Agreement, by means of which the State confesses to owe Sabesp the amount of R\$915,251, monetarily adjusted until September, 2008 by the IPCA-IBGE index, corresponding to the Uncontroversial Amount, calculated by FIPECAFI. Sabesp accepted temporarily the Reservoirs as part of the payment of the Uncontroversial Amount and offered to Gesp a temporary settlement, constituting a financial credit of R\$696,283, corresponding to the value of the Reservoirs. The definitive settlement will only occur with the effective transfer of property in the competent real estate notary. The remaining balance of R\$218,967 is being paid in 114 monthly and consecutive installments, in the amount of R\$1,920 each, restated annually by the IPCA/FIPE index, added by interest of 0.5% p.m., the first installment became due on November 25, 2008.

Sabesp and the State are working together to obtain legislative authorization in order to make viable the transfer of the Reservoirs to Sabesp, thus overcoming the juridical uncertainty caused by the Public Civil Action, mentioned in item (iii). After publication of the legislative authorization, the transfer of the Reservoirs to Sabesp will occur.

The Third Amendment also provides for the regularization of the monthly flow of benefits. While Sabesp is responsible for the monthly payments, by judicial decision, the State reimburses the Company based on criteria identical to those applied to the Uncontroversial Amount. In the absence of a impeditive judicial decision, the State will directly assume the flow of monthly payment of the part considered uncontroversial.

The difference between the Uncontroversial Amount and the amount effectively paid by the Company constitutes the Controversial Amount. On March 04, 2009 the Sabesp forwarded to the State Public Attorney's Office - PGE a grounded request in order to obtain the reanalysis of the divergences that gave rise to the Controversial Amount. In fact, the State Attorney General has already confirmed, formally, the disposition to reanalyze the matter.

Sabesp will not waive the receivables from the State to which the Company considers itself to be legally entitled. Accordingly, it will take all possible actions to resolve the issue at all technical and court levels. Should this dispute persist, the Company will take all the necessary actions to protect its interests.

(vii) Reasons that directed the Company's Management not to make a provision for the uncontroversial amount of the Benefits.

As demonstrated in (vi), the Third Amendment to the Gesp Agreement divides the amount of the Benefits into an uncontroversial amount and a controversial amount.

The uncontroversial amount has been plainly resolved, including with regards to the uncontroversial amount of the future monthly flow of payment of the Benefits. The inventory of the uncontroversial amount, already exposed, will be paid by means of the Reservoirs and the remaining balance in 114 installments. With regards to the uncontroversial amount of the monthly flow, while Gesp arranges for the internal operating structure necessary for the calculation and processing of the reimbursements, the Company will maintain Fipecafi contracted so that it effects monthly the calculation of the reimbursement, applying criteria identical to those used in the calculation of the Uncontroversial Amount. Gesp has undertaken to make the reimbursements in up to 10 (ten) business days counted from the date of the submission of the monthly reimbursement calculation report issued by Fipecafi. This has been agreed upon in the third clause of this Amendment. The installments of the agreement and the monthly flow are being normally paid by the State Government.

No provision has been recorded for the controversial amount of the Benefits - whether with regards to eventual loss of amounts already recorded or even with regards to the controversial amounts of the Benefits that will be paid in the future - in view of the high expectation of success in receiving these pending amounts and the solution of the divergences favorable to the Company.

This expectation has ground in several reasons.

No new fact that justifies a change in the interpretation on the chances of receiving the pending amounts as Benefits. The controversy on the portion of Benefits is not new data. In the financial statements related to the fiscal year of 2007, it has been indicated inclusively the estimate of the uncontroversial and controversial amounts, without any provision in relation to the controversial amount.

To the contrary, it is needed to highlight that during 2008, there was great progress with regards to the perspective of receiving the pending amounts on account of Benefits. The uncontroversial amount of the Benefits has been plainly resolved as already pointed out in item (vi) of this item.

With regards to the controversial amount, there has also been an improvement in the receiving perspective. As informed in (vi), the State's General Attorney has formally undertaken to reassess the divergences that gave rise to the controversial amount.

The Company contracted the opinion of a reputable accountant to evaluate the decision of the Management of not recording a provision for the amount considered controversial, which conclusion was that it is a theme with characteristics of uncertainty, not existing technical obstacles in light of the norms that regulate the work and reports of the independent auditors so that this situation is treated as an emphasis paragraph, instead of a qualification for lack of recording a provision for losses with doubtful accounts.

From the legal point of view, the Company contracted two jurists of notorious repute in order to obtain external evaluation in its right to reimbursement. The first one, in opinion dated March, 2008, concluded that the responsibility of the State is irrefutable having Sabesp the legal and moral conditions to recover what it had paid. The second one, in February, 2009 in an exhaustive work, performed an analysis of the general conditions under which occurred the payments of the Benefits as well as more than 1,000 judicial proceedings related to the disputes between the Company and the beneficiaries of Law 4819/58 and their dependants. The conclusion of the second report was also, in general, favorable to Sabesp.

Additionally, the Advisory Staff to the Company's Presidency prepared a technical note (not audited) on the matter, with detailed evaluation of the historical circumstances where the concession criteria and calculation of the Benefits were adopted, concluding favorable to the right to reimbursement to Sabesp. This technical note was forwarded on March 04, 2009 to PGE and represents, in essence, the main reasons that ground the Company's right to reimbursement. Since this moment, the divergences between Sabesp and the State are formally in phase of reanalysis by PGE.

The Company maintains its understanding that the best estimate for the controversial amount of the Benefits is in the sense that it will be received by the Company in the future, whether by means of the re-appreciation provided by the State's General Attorney or even for a judicial decision.

(b) Cash and cash equivalents

The Company's balance of banks and short-term investment accounts with financial institutions controlled by the State Government was R\$ 628,443 and R\$ 735,495 on June 30, 2009 and March 31, 2009, respectively. The financial income from such investments was R\$ 47,308 and R\$ 22,697 in the second quarter of 2009 and 2008, respectively. The Company, due to State Decree, must invest its excess resources with financial institutions controlled by the State Government.

(c) Agreement for the use of reservoirs

In its operations, the Company uses the Guarapiranga and Billings reservoirs. Should these reservoirs not be available for use to the Company, there could be the need to collect water in more distant places. The Company does not pay any fee for the use of these reservoirs but it is responsible for their maintenance and operating costs.

(d) Contracts with reduced tariffs for State and Municipal Government Entities that joined the Rational Water Use Program (PURA).

The Company has approximately 779 contracts signed with public entities linked to the State Government and to the municipalities served, which are benefited with a 25% reduction in the tariffs of the services of water supply and sewage collection, when not in default. The contracts provide for the implementation of the rational use of water program, which considers a reduction in the consumption of water.

(e) Guarantees

The State Government grants guarantees for some loans and financings of the Company and does not charge any fee related thereto.

Management is making efforts to maintain the State's payments with respect to transactions with related parties in non-default on a permanent basis.

(f) Sesamm

On August 15, 2008, the Company, as part of its expansion process, together with companies OHL Médio Ambiente, Inima S.A.U. - Unipersonal (Inima), Técnicas y Gestion Medioambiental S.A.U. (TGM) and Estudos Tecnicos e Projetos ETEP Ltda. (ETEP) organized the company Sesamm - Serviços de Saneamento de Mogi Mirim S/A (Sesamm or Subsidiary) whose corporate objective is the rendering of services of supplementation of the implementation of the system of separation of sewage and implementation and operation of the sewage treatment system of the Municipality of Mogi Mirim, including the disposal of solid waste generated, as per note 7.

(g) Contract of personnel assignment among entities related to GESP

The Company has contracts of personnel assignments with entities related to the São Paulo s State Government, where the expenditures are fully passed on and monetarily reimbursed.

In this second quarter of 2009, the expenditures with employees assigned by Sabesp to other state entities amounted to R\$ 1,294.

In the same period, the expenditures with the employees of other entities at Sabesp s disposition totaled R\$313.

(h) Services contracted from entities related to GESP

On June 30, 2009 Sabesp had outstanding a balance of R\$12,633 payable referring to services provided to entities related to São Paulo s State Government, among which we highlight the services of electric energy supply by Companhia Energetica de Sao Paulo - CESP, totaling 73% of the balance payable.

(i) Non-operating Assets

The Company had, on June 30, 2009 the amount of R\$ 26,411 mainly related to lands granted in free lease (comodato) to Associations, Assistance Entities, Non-Governmental Organizations and to DAEE - Departamento de Águas e Energia Eletrica, among others.

(j) Sabesprev

The Company sponsors the defined contribution plan managed by Fundação Sabesp de Seguridade Social - Sabesprev. The net actuarial obligation, recognized up to June 30, 2009, is R\$ 449,568.

6. INDEMNIFICATIONS RECEIVABLE

Indemnities receivable are a non-current asset that represents amounts receivable from the Municipalities of Diadema and Mauá as an indemnity for their unilateral termination of the concessions for water supply and sewage collection services of the Company in 1995. As of June 30, 2009 and March 31, 2009, this asset amounted to R\$ 146,213 (nominal amounts).

Due to these concession agreements, the Company invested in the construction of water and sewage systems in those municipalities in order to meet its concession service commitments. For the unilateral termination of the Diadema and Mauá concessions, the municipalities assumed the responsibility of supplying water and sewage services in those regions. At that time, the Company reclassified the balances of property, plant and equipment related to the assets used in those municipalities to non-current assets (indemnities receivable).

The net book value of the items of property, plant and equipment related to the Municipality of Diadema, reclassified in December, 1996, was R\$75,231, and the balance of the indemnifications receivable from the Municipality was R\$60,295.

The net book value of the items of property, plant and equipment related to the Municipality of Maua, reclassified in December, 1999, was R\$103,763, and the balance of the indemnifications receivable from the Municipality was R\$85,918.

The Company's rights to the recovery of these amounts are being judicially discussed by the municipalities.

Sabesp filed lawsuits to collect the amounts due by the municipalities. With respect to Diadema, the decision of the lower court judge was unfavorable to Sabesp, which filed an appeal in November 2000. In December 2005, Sabesp's appeal to have the agreement entered into with the municipality of Diadema declared valid was partially accepted. In October, 2006, the city hall filed special and extraordinary appeals which were denied by the President of the Court of Justice in March, 2007. Against such decision, the city hall filed new appeals. The interlocutory appeal filed in the Federal Supreme Court (STF) was accepted but only for the purposes of determining the sentence for the extraordinary appeal that had been rejected. In December 2007, the decision that accepted the execution of Companhia de Saneamento the Diadema - Saned was rendered, ordering this company to be summoned to pay the full amount of the debt within 15 days under the penalty of fine. Saned filed an interlocutory appeal against this decision, but the appeal was rejected by the Court of Justice in June 2008. In order to pursue the execution, the judge authorized the realization of an online pledge of funds in bank accounts and financial investments of Saned (online pledge) in up to 10% of the restated amount of the debt, not authorizing, however, the pledge of a percentage of the Company's revenues. Saned appealed the first decision and Sabesp appealed the second. Both appeals were denied by the Court of Justice only remaining, however, the on-line pledge of up to 10% of the restated amount of the debt. There was no appeal to these decisions. R\$2,919 was blocked and withdrawn on March 3, 2009. Later, the Court of Justice determined in a preliminary injunction that the pledge be made upon weekly deposits by Saned in the amount corresponding to 20% of all it receives in its accounts and financial investments.

On December 29, 2008, Saned and the municipality of Diadema entered into, with the State of Sao Paulo and Sabesp, a Memorandum of Intent with the purpose to prepare studies and conduct negotiations to instruct decisions of Diadema and Sabesp, aiming at the exclusive rendering of water and sewage services in the municipality of Diadema.

The parties agreed that the search for a negotiated solution for the currently existing conflicts among the companies is fundamental so that the public service of water supply, sewage collection and treatment have their proper development in Diadema.

On January, 2009 the parties presented a joint petition requesting the suspension of new pledges for a period of three months in order to try to make an agreement viable. The suspension was granted by the Judge of Public Treasury and in April, 2009 the suspension period having elapsed, a new joint petition was filed with the request for an extension of the suspension for three more months.

With regards to Mauá, a first level decision was announced determining that the Municipality should pay the amount of R\$153.2 million as compensation for the damages caused and for loss of profits. The Maua s City Hall appealed against this decision in April, 2005. In July 2006, the decision was converted in diligence consisting of an expert clarification on the amount of the indemnity for loss of profits. Clarification was provided in December 2007 and the expert confirmed the amount of the loss of profits determined by the lower court. In August, 2008, the appeal was judged, being fully maintained the conviction imposed at the first level. The Maua Municipal Hall filed special and extraordinary appeals against the decision that confirmed its conviction to indemnify Sabesp.

Based on the opinion of the legal counsels, Management continues to affirm that the Company has legal right to receive the amounts corresponding to the indemnification and it continues to monitor the situation of the lawsuits.

The operating fixed assets represent the assets involved in the services of providing water supply and sewage collection in 365 municipalities. Of the assets originated from contracts negotiated based on financial and economic appraisals, Sabesp holds the possession and management.

Up to June, 2009 74 concession contracts were expired, all in phase of negotiation with the municipalities, without prejudice to the continuation of the service rendering. The net book value of the property, plant and equipment used in these municipalities totals R\$1,735,856. The depreciation charges in the second quarter of 2009 of these municipalities were R\$16,364.

The concession contracts provide that the assets will be reversed to the conceding power at the end of the period, upon indemnification by the net market value as set forth in each contract. In the program contracts, the indemnification will correspond to the net present value of the cash flow in the remaining period at the date of resume of the services, monetarily restated and increased by interest until the date of effective payment.

(a) Depreciation

Structure - 4%, connections - 5%, hydrometers - 10%, networks - 2%, wells - 5%, equipment - 10%, transportation equipment - 20%, information technology equipment - 20%, furniture and fixtures - 10%.

As a determination introduced by CPC-13 - Initial Adoption of Law 11638/07, in items 53 and 54, the Company will review the useful life of items of its fixed assets for the year 2009.

(b) Write-off of Property, Plant and Equipment

(i) The Company wrote-off, in the second quarter of 2009 and first semester of 2009, items of property, plant and equipment, in the amount of R\$6,538 and R\$ 8,319, respectively (2008 - R\$3,455 and R\$6,691), resulting in a total loss in the amount of R\$4,268 and R\$6,048, respectively. R\$2,846 and R\$4,626 related to the items in operation group, due to obsolescence, thefts and disposals and R\$1,422 (such amount related to the second quarter and first quarter of 2009) referring to discontinued works, unproductive wells, and economically unprofitable projects.

The prevision for disbursements from the third quarter of 2009 until 2014, relating to investments already contracted, is approximately R\$2,207 million (not audited).

(e) Expropriations

As a result of the execution of priority works related to the water and sewage systems there was the need to expropriate or the institution of rights of passage in third party properties which owners shall be reimbursed by amicable or judicial means.

The forecast for disbursements to be made after the third quarter 2009 is approximately R\$ 492 million (not audited), to be covered by own resources. The assets object of these processes is to be recorded in fixed assets when the operation is completed. In the second quarter of 2009, the amount referring to expropriations was R\$ 2,117 (in the second quarter of 2008 - R\$ 4,918).

As permitted by CVM Instruction 197/93, the Company did not record a provision for the tax effects (deferred taxes) on the surplus arising from the revaluation of property, plant and equipment carried out in 1990 and 1991. Had the income tax and social contribution on the revaluation reserve been accounted for, the unrealized amount at June 30, 2009 would be R\$ 356,354 (R\$ 385,859 up to June 30, 2008). In order to obtain the market values of Financial Instruments, the following criteria have been adopted:

(i) Debentures are financings considered by the nominal amount restated up to the maturity date, discounted to present value at the forward interest market rates, disclosed by Andima in the secondary market, having as basis June 30, 2009 and the Company's security traded in the domestic market.

(ii) Financings - BNDES, are instruments considered by the nominal amount restated up to the maturity date, that have as characteristics the indexation to the TJLP, which is a specific modality, not being compared to any other market rate.

Therefore, the Company opted to publish as market value the amount accounted for as of June 30, 2009

(iii) Other financings in national currency are considered by the nominal amount restated up to the maturity date, discounted to present value at the forward interest market rates. The forward rates used were obtained at the BM&F website.

(iv) Foreign currency financings are controlled in the original currency, converted at the foreign exchange rate at the date of the balance sheet, discounted to present value using the forward market rate obtained on Bloomberg, based on the Company's shares traded in the market.

Additionally, the Company has an instrument indexed to the YEN (JICA, as mentioned in Note 10), which, in addition of the premises above, was considered in the conversion to present value the parity of the original currency of the instrument in relation to the dollar.

(b) Market risks

(i) Foreign exchange rate risk

This risk results from the possibility of the Company in incur in losses on account of fluctuations in the foreign exchange rates that impact the balances of loans and financings in foreign currency funded in the market and, consequently, the financial expenses. The Company does not maintain hedge or swap operations, however, it carries out an active management of the debt, seeking to reduce the exposure in foreign currency, taking advantage of the windows of opportunity, to exchange expensive debts for cheaper debts, reducing the cost by means of anticipation of the maturity dates.

A significant portion of the Company's financial debt was linked to the US dollar and to the Yen, in the total amount of R\$1,967,248(Note 10). The table below summarizes the Company's exposure to exchange rates at June 30, 2009.

Holding and Consolidated

In thousands

US\$ Japanese Yen

Loans and financing	779,804	21,280,000
---------------------	---------	------------

(ii) Interest rate risk

This risk arises from the possibility that the Company may incur losses due to interest rate fluctuations and indices that increase their interest expenses on loans and financing. The Company has not entered into any derivative contract to hedge against this risk; however, it continually monitors market interest rates in order to evaluate the possible need to replace its debt. As of June 30, 2009, the Company had R\$1,075,008 in loans and financing which were obtained at variable interest rates (CDI and TJLP).

Another risk faced by the Company is the lack of correlation between the monetary adjustment indices of its debt and those of its receivables. Water supply and sewage treatment tariffs do not necessarily follow the increases in the interest rates affecting the Company's debt.

(iii) Credit risk

Credit risk is mitigated by selling to a geographically dispersed customer base.

(c) Sensitivity analysis

Following is presented the table demonstrating the sensitivity analysis of the financial instruments that may generate significant impacts on the Company.

Under the terms of CVM Instruction 475/08, in order to demonstrate the financial balances of assets and liabilities converted to a rate projected to June 30, 2009 with appreciation of 25% and 50% in Scenario I and 25% and 50% of deterioration in Scenario II, according to the table below:

21.01 - REPORT ON THE LIMITED REVIEW WITH EXCEPTION

Report of Independent Accountants on Review

To the Board of Directors and Shareholders
Companhia de Saneamento Básico do
Estado de São Paulo - SABESP

1 We have reviewed the accounting information included in the Quarterly Information (ITR) (parent company and consolidated) of Companhia de Saneamento Básico do Estado de São Paulo - SABESP ("Company") for the quarter ended June 30, 2009, comprising the balance sheet, the statements of income, of changes in shareholders' equity, of cash flows, and of value added, the explanatory notes and the performance report. This Quarterly Information is the responsibility of the Company's management.

2 Our review was carried out in accordance with specific standards established by the Institute of Independent Auditors of Brazil (IBRACON), in conjunction with the Federal Accounting Council (CFC), and mainly comprised: (a) inquiries of and discussions with management responsible for the accounting, financial and operating areas of the Company with regard to the main criteria adopted for the preparation of the Quarterly Information and (b) a review of the significant information and of the subsequent events which have, or could have, significant effects on the financial position and operations of the Company and its subsidiary.

3 As mentioned in Note 5, the Company keeps recorded in non-current assets the amounts related to the supplementation of retirement and pensions paid by it in the period from 1986 to 2009. After a period of negotiation, the parties (Company and Government of the State of São Paulo) signed, on November 17, 2008, the Third Amendment to the Document of Recognition, Payment Commitment and Other Covenants, which presents the installments considered disputed and undisputed, originated from calculations made by a specialized entity in relation to the payments made. As a result of this Document, the Company recognized the monetary restatement of the undisputed part, which was kept at historical values until then, however it did not record a provision for the disputed installment, in the amount of R\$ 323,890 thousand, net of tax effects, due to the high expectation of a favorable outcome to receive the pending amounts and the expected solution of divergences with the State and/or discussions at technical and judicial levels. Accounting practices adopted in Brazil require a provision for losses to reduce to the recoverable value, which corresponds, in this context, to the amounts overdue for a long time and considered as controversial. Consequently, non-current assets and shareholders' equity are overstated by R\$ 323,890 thousand and net income for the six-month period ended June 30, 2009 is overstated by R\$ 21,117 thousand, net of the tax effects.

4 Based on our limited review, except for the effects of the matter mentioned in paragraph 3 above, we are not aware of any material modifications that should be made to the accounting information included in the Quarterly Information referred to above in order that it be stated in accordance with the standards issued by the Brazilian Securities Commission (CVM) applicable to the preparation of Quarterly Information, including CVM Instruction 469/08.

5 As mentioned in Note 5, the Company and the Government of the State of São Paulo entered into an agreement to settle the amount denominated controversial, referring to the reimbursement of complementary retirement and pension, paid by the Company on behalf of and for the account of the Government of the State of São Paulo. The realization of this asset could eventually be influenced by: (a) the resolution of legal uncertainties caused by a public lawsuit and legislative authorization related to the transfer of the reservoirs to the Company, in the amount of R\$ 696,283 thousand and (b) the financial receipt of the other amounts, totaling R\$ 213,270 thousand.

6 As mentioned in Note 21, some agreements were signed between the Municipal Authority of São Paulo and the Company, which intended to restructure the existing debts in the context that simultaneously involves stability in the rendering of services and establishment of water and sewage actions. Due to the current stage of negotiations between the Company and the Municipality, management expects that no adjustment will be necessary to the corresponding amounts included in the financial statements. Accordingly, no adjustment has been included in the financial statements.

7 As mentioned in Note 2, the accounting practices adopted in Brazil were changed during 2008 and the effects of their initial adoption were recorded by the Company and its subsidiary during the fourth quarter of 2008 and disclosed in the financial statements as at December 31, 2008. The statements of income, of changes in shareholders' equity, of cash flows, and of value added for the quarter ended June 30, 2008, presented together with the current quarterly information, have not been adjusted for comparison purposes as permitted by Official Letter CVM 02/2009.
