The recovery of global economic activity has been occurring at a moderate pace and on heterogeneous way. While among the developed countries, the United States and the United Kingdom have been recording growth, the slower-than-expected recovery in the Eurozone and the less optimistic prospects for certain emerging economies have contributed to more conservative revisions of global growth. The International Monetary Fund (IMF) reduced the global growth projections to 3.3% in 2014 and 3.8% in 2015.

USA

The latest figures from the U.S. Department of Commerce and the FED indicate an upturn in domestic economic activity. In 3Q14, the U.S. economy recorded growth of 3.5%, reflecting the good performance of exports, investments and consumption, as well as the increase in government spending. In September, industrial production increased by 1.0% over August, giving 12-month growth of 4.3%, and installed capacity use remained at 79% throughout the year.

Manufacturing PMI averaged 57.6 points in 3Q14, 2.4 points above the average in the previous quarter and continuing the expansion that began in June 2013.

In September 2014, the unemployment rate reached 5.9%, the lowest level for the last six years, giving a year-to-date decline of 1.3 p.p.

At its last meeting in October, the FED's Monetary Policy Committee (FOMC) announced the end of the securities purchase program, designed to stimulate the economy, maintaining interest rates at between 0 and 0.25%. The Committee considered it appropriate to maintain interest at this level for a considerable period of time, especially in a scenario of inflation lower than the 2% target.

As a result, the FED estimates GDP growth of between 2.0% and 2.2% in 2014.

Europe

The European recovery continues at a slower pace. After four quarters of moderate expansion, 2Q14 GDP in the Eurozone remained virtually flat. Industrial output fell by 1.8% in August over July, chiefly reflecting the 4.8% reduction in capital goods production, while the manufacturing PMI declined from 52.8 points in June to 52.0 points in September, the lowest figure in the last ten months.

Eurozone unemployment rate remained stable, but still high, recording 11.5% in September. Austria and Germany recorded the lowest rates among the countries, while Greece and Spain had the highest.

Eurozone inflation came to 0.3% in the 12 months ended September 2014, well below the long-term goal of 2% established by the European Central Bank (ECB) and the lowest figure since October 2009. Certain countries such as Spain, Greece, Hungary and Bulgaria actually recorded negative inflation in the same period. In this context, the ECB implemented new measures to stimulate the economy, including the repurchase of securities, with a minimum duration of two years. The institution expects a GDP growth of 0.9% in 2014 and 1.6% in 2015.

UK GDP expanded for the seventh consecutive quarter, moving up by 0.7% in 3Q14, fueled by the service and construction sectors, which grew by 0.7% and 0.8%, respectively. The British Chamber of Commerce estimates annual GDP growth of 3.2% in 2014.

The labor market continues to improve, with unemployment between June and August 2014 declining by 6%, the lowest level since the end of 2008 and 0.4 p.p. less than in the previous three-month period from March to May. In the year through September, inflation fell to 1.2%, below the 1.5% recorded through August.

Asia

Preliminary 3Q14 figures from the National Bureau of Statistics point to Chinese GDP growth of 7.3% over 3Q13, below the 7.5% recorded in 2Q14. In 9M14, the Chinese economy grew by 7.4% over 9M13, slightly below the 7.5% target established by the government.

In September 2014, the manufacturing PMI published by HSBC reached 50.2 points, continuing the expansion begun in June. Industrial production increased by 8.0% in September, higher than the 6.9% registered in August. In the first nine months, investments in fixed assets moved up by 16%, less than the 20% recorded in 9M13.

Manufacturing PMI also continued to expand in Japan, reaching 51.7 points in September. Unemployment rate recorded 3.5% in August, the lowest rate since July 2007. At its last monetary policy meeting, the Central Bank of Japan (BoJ) increased the ceiling of the security buyback program from between 60 and 70 trillion yen, to 80 trillion yen per year, maintaining interest at 0.1%. The BoJ's long-term inflation target is 2% p.y. and it is projecting GDP growth of 1.0% in 2014.

Brazil

In Brazil, the economic fundamentals remain unfavorable, with GDP declining by 0.6% in 2Q14, following the 0.2% slide in 1Q14 over 4Q13. The 2Q14 result was primarily due to the negative performance of the industrial (-1.5%) and service (-0.5%) sectors. September's activity indicators, notably industrial production, suggest a further slowdown in the third quarter. Industrial output fell by 0.2% in September over August, largely due to the 1.6% reduction in the production of intermediate goods, giving a year-to-date downturn of 2.9%. The Central Bank's Focus report expects GDP growth of 0.2% in 2014 and 0.8% in 2015.

According to CAGED (the employment and unemployment registry), 80,000 new registered jobs were created in September, 41% down on the same month last year and the worst result since mid-2001. In the year through September, a net total of 905 thousand formal jobs were created.

Inflation recorded by the IPCA consumer price index moved up by 0.57% in September, giving year-to-date and last-12-month growth of 4.61% and 6.75%, respectively, exceeding the 6.5% ceiling of the annual inflation target. Given this scenario, at its last meeting in October, the Monetary Policy Committee (COPOM) raised the Selic base rate once again, this time to 11.25% p.a. The Focus report expects 2014 inflation of 6.39%, with a Selic of 11.50% at year-end.

On the foreign exchange front, the real depreciated by 11.3% against the U.S. dollar in 3Q14, closing September at R\$2.451/US\$, reflecting greater risk aversion in the domestic market, coupled with international factors such as the end of the U.S. government's security repurchase program and a possible increase in interest rates by the FED.

Base: 11/07/2014

In the third quarter, consolidated net revenue totaled R\$3,883 million, 4% down on the R\$4,052 million recorded in 2Q14, chiefly influenced by the reduction in mining revenue, due to lower iron ore prices in the international market.

COGS totaled R\$2,912 million in 3Q14, 6% up on the R\$2,747 million posted in 2Q14, basically due to a nominal increase in COGS from steel operations, given non-recurring adjustments booked in 2Q14.

Consolidated SG&A expenses totaled R\$379 million in 3Q14, 6% more than the R\$358 million reported in 2Q14, due to higher selling expenses.

Other Operating Revenue/Expenses came to R\$63 million in 3Q14, versus R\$31 million in 2Q14, basically due to the write-off of judicial deposits.

The Company uses Adjusted EBITDA to measure the segments' performance and operating cash flow capacity. It comprises net income before the net financial result, income and social contribution taxes, depreciation and amortization, results from investees and other operating revenue (expenses), plus the proportional EBITDA of the jointly-owned subsidiaries, Namisa, MRS Logística and CBSI.

Third-quarter adjusted EBITDA amounted to R\$977 million, 25% less than the R\$1,303 million posted in 2Q14, basically due to the lower contribution from steel and mining operations, accompanied by a margin of 23%, down by 7 p.p. over 2Q14.

In 3Q14, CSN's consolidated net financial result was negative by R\$944 million, mainly due to the following factors:

- Interest on loans and financing totaling R\$707 million;
- The R\$119 million effect related to the complement of interest on contingencies included in the tax repayment program REFIS (Law 11941/09);
- Monetary and foreign exchange variations amounting to R\$77 million;
- Expenses of R\$40 million with the monetary restatement of tax payment installments;
- Other financial expenses totaling R\$44 million.

These negative effects were partially offset by consolidated financial revenue of R\$43 million.

Gross debt, net debt and the net debt/EBITDA ratio presented below reflect the Company's proportional interest in Namisa, MRS Logística and CBSI, as well as the impact from the partial spin-off of Transnordestina Logística S/A.

At the close of September 30, 2014, net debt stood at R\$17.6 billion, R\$0.9 billion more than on June 30, 2014. The net debt/EBITDA ratio based on LTM adjusted EBITDA closed the third quarter at 3.2x, 0.5x more than the 2.7x recorded at the end of 2Q14. Net debt was impacted by the following factors:

- Investments of R\$0.6 billion in fixed assets;
- A R\$0.7 billion effect related to the cost of debt;

- Foreign exchange variation of R\$0.4 billion;
- Disbursements of R\$0.3 billion on the share buyback program.

These negative effects were partially offset by 3Q14 EBITDA of R\$1.0 billion and the R\$0.1 billion reduction in working capital.

Indebtedness (R\$ million) and Net Debt /Adjusted EBITDA ratio

CSN's equity result was positive by R\$198 million in 3Q14, versus a negative R\$67 million in 2Q14, chiefly due to the result of the jointly-owned subsidiary Namisa.

In the third quarter, the Company posted a consolidated net loss of R\$250 million, basically reflecting the lower operating result in the quarter.

Investments reflect the Company's proportional interest in Namisa, MRS Logística and CBSI. The Company has ceased consolidating its interest in Transnordestina Logística S/A, due to the partial spin-off on December 27, 2013 and the consequent entry into effect of the new shareholders' agreement.

CSN invested R\$613 million in 3Q14. Of this total, the main investments were R\$156 million in mining, R\$128 million in steel, R\$203 million in cement and R\$108 million in logistic.

In the third quarter, the Company reviewed the balance of the accounts composing its working capital, which includes Inventories, Suppliers, Salaries and Taxes. For comparison purposes, 2Q14 working capital was recalculated and reduced by R\$493 million.

At the close of 3Q14, working capital applied to the Company's businesses totaled R\$2,094 million, a reduction of R\$144 million compared to 2Q14, particularly due to the reduction in accounts receivable and the increase in salaries and social contributions, partially offset by higher inventories.

The average receivables period contracted by five days, the average payment period by one day, while the average inventory turnover period widened by seven days.

Scenario

According to the World Steel Association (WSA), global crude steel production totaled 1.2 billion tonnes in the first nine months of 2014, 2% higher than in 9M13, the same percentage growth recorded in China, which was responsible for 618 million tonnes. Global capacity use reached 76% in September 2014, 2 p.p. down on June. For 2014, the WSA expects a 2%

growth in world apparent steel consumption and an increase of 1% in China.

According to the Brazilian Steel Institute (IABr), domestic crude steel production came to 25.5 million tonnes in 9M14, down 1% on 9M13, while rolled flat output totaled 18.7 million tonnes, down by 5%. Flat steel apparent consumption in 9M14 reached 9.0 million tonnes, 3% less year-on-year, with domestic sales totaling 8.4 million tonnes, 8% down on 9M13. On the other hand, flat steel imports climbed by 26% to 1.8 million tonnes, while exports fell by 3% to 1.2 million tonnes.

The IABr reduced its estimates for domestic steel product sales from 23.7 to 21.7 million tonnes in 2014, with apparent consumption moving down from 27.2 to 25.3 million tonnes.

Automotive

According to ANFAVEA (the Auto Manufacturers' Association), Brazil's vehicle production totaled 2.4 million units in 9M14, 17% less than the 2.9 million vehicles produced in 9M13. It is important mentioning truck production, which fell by 24%, followed by vehicles, light commercial vehicles and buses, down by 17%, 14% and 12%, respectively.

Vehicle sales declined by 9% in 9M14 over 9M13, led by the bus and trucks segments, with respective downturn of 17% and 14%, partially offset by the 1% growth in the light commercial vehicle segment. Exports fell by 39% year-on-year in the first nine months, basically influenced by the lower sales to Argentina.

In this scenario, ANFAVEA revised its estimates for 2014, estimating reduction of 10% in production and 5% in vehicle sales over 2013.

With relation to light vehicles, FENABRAVE (the Vehicle Distributors' Association) registered reduction of 8% in the number of vehicles licensed, from 2.6 million units in 9M13 to 2.4 million units in 9M14. The association expects 2014 light vehicle sales to fall by 8% over last year.

Construction

According to ABRAMAT (the Construction Material Manufacturers' Association), sales of building material in the last twelve months ended in September 2014 fell by 4.9% over the same period in 2013. In this context, the association revised its estimates for 2014, to a reduction of 4% in sales.

Home Appliances

According to the IBGE (Brazilian Institute of Geography and Statistics), home appliance production grew by 17% in 3Q14 over 2Q14, with expansion of 3% in the first nine months of 2014 over 9M13.

Distribution

According to INDA (the Brazilian steel distributors' association), flat steel sales by domestic distributors totaled 3.3 million tonnes in 9M14, 2% down on the previous year. 9M14 purchases by the associated network came to 3.2 million tonnes, 9.7% down year-on-year, while inventories totaled 1.0 million tonnes at the close of 3Q14, declining by 1% over 2Q14. In this scenario, the association estimates sales to fall by 3% in 2014 over 2013.

Sales Volume

In 3Q14, CSN's steel sales totaled 1.27 million tonnes. Of this total, 72% went to the domestic market, 25% were sold by overseas subsidiaries and 3% went to exports.

Domestic Sales Volume

CSN's domestic steel sales came to 921 thousand tonnes in 3Q14, slightly more than the 918 thousand tonnes sold in 2Q14.

Foreign Sales Volume

Foreign sales amounted to 353 thousand tonnes in 3Q14, 3% more than in the previous quarter. Of this total, the overseas subsidiaries sold 319 thousand tonnes, 180 thousand tonnes of which by SWT. Direct exports came to 34 thousand tonnes.

Prices

Net revenue per tonne averaged R\$2,130 in 3Q14, a 3.8% reduction over 2Q14, essentially due to the sales mix.

Net Revenue

Net revenue from steel operations totaled R\$2,788 million in 3Q14, 2% down on the R\$2,843 million recorded in 2Q14.

Cost of Goods Sold (COGS)

In 3Q14, steel COGS amounted to R\$2,173 million, 4% higher than the 2Q14 figure, basically due to a nominal increase in COGS given non-recurring adjustments booked in 2Q14.

Adjusted EBITDA

Adjusted steel segment EBITDA totaled R\$658 million in 3Q14, 17% down on the R\$793 million recorded in 2Q14, due to the aforementioned reasons. The adjusted EBITDA margin came to 24% in 3Q14, 4 p.p. down on 2Q14.

Production

The Presidente Vargas Steelworks (UPV) produced 1.2 million tonnes of crude steel in 3Q14, 5% more than in 2Q14, with additional consumption of 125,000 slabs purchased from third parties. Third-quarter rolled steel output totaled 1.1 million tonnes, the same level of the previous quarter.

Production (in thousand t)	2Q14	3Q14	First Nine months of		Change	
			2013	2014	3Q14 x 2Q14	9M14 X 9M13

Total Rolled Products	1,099	1,097	3,446	3,250	0%	-6%

Production Costs (Parent Company)

In 3Q14, total production costs at the Presidente Vargas Steelworks (UPV) came to R\$1,651 million, in line with the second-quarter figure.

At the close of 3Q14, seaborne iron ore prices recorded the lowest figure in the last five years, with the Platts Fe62% CFR China index reaching US\$77.75/dmt. Compared to the US\$134.50/dmt registered in early 2014, the price reduction came to 42%. Pressed by the capacity expansion in Australian mining companies, iron ore prices were still impacted by demand factors, such as the poor performance of the real estate sector in China, the low availability of credit for steelmakers and the high level of iron ore inventories in Chinese ports.

In this scenario, the Platts Fe62% CFR China index averaged US\$90.21/dmt in 3Q14, 12% down on the 2Q14 average. The iron ore quality premium varied between US\$1.45/dmt and US\$1.70/dmt per 1% of Fe content, while freight costs on the Tubarão/Qingdao route averaged US\$21.06/wmt, 3.7% more than the previous quarter's average.

Brazil exported 92.5 million tonnes of iron ore in the third quarter, 9% up on 2Q14.

Iron ore sales

In 3Q14, sales of finished iron ore products totaled 7.7 million tonnes, 7% up on the 7.2 million tonnes sold in 2Q14. Of this total, 2.6 million tonnes were sold by Namisa¹. Almost all iron ore sold in 3Q14 was exported. Iron ore volume for own consumption reached 1.5 million tonnes in 3Q14.

In 9M14, sales of finished iron ore products totaled a record of 21.3 million tonnes, 19% up on 9M13. Of this total, 7.1 million tonnes were sold by Namisa¹. Virtually all iron ore sold in 9M14 was exported. In addition to sales to third-parties, CSN's steel production consumed 4.5 million tonnes in 9M14.

It is important mentioning the record volume of iron ore shipments at Tecar, which totaled 24.4 million tonnes in the first nine months, climbing by 23% year-on-year.

¹ Sales volumes include 100% of the stake in NAMISA.

Net Revenue

Net revenue from mining operations totaled R\$914 million in 3Q14, 18% less than in 2Q14, primarily due to the reduction in iron ore prices.

Cost of Goods Sold (COGS)

Mining COGS came to R\$796 million in 3Q14, 8% up on 2Q14, mostly due to the increase in iron ore sales volume.

Adjusted EBITDA

Adjusted EBITDA from mining operations totaled R\$203 million in 3Q14, 54% down on the R\$442 million reported in 2Q14, for the above mentioned reasons, accompanied by an adjusted EBITDA margin of 22%.

Scenario

Railway Logistics

According to the ANTF (the National Rail Transport Association), the Brazilian railways transported 233 million tonnes in 1H14 of useful cargo. The association expects rail cargo volume to move up by 12% to 510 million tonnes between 2014 and 2016.

Port Logistics

According to ANTAQ (the National Waterway Transport Agency), Brazil's port installations handled around 463 million tonnes in 1H14, 6% up on the same period the year before.

Also in 1H14, bulk solids totaled 281 million tonnes, 6% more than in 1H13, while container handling in Brazilian ports came to 4.5 million TEUs¹, 9% up year-on-year.

¹ TEU (Twenty-Foot Equivalent Unit) – transportation unit equivalent to a standard 20-foot intermodal container

1. DESCRIPTION OF BUSINESS

Companhia Siderúrgica Nacional “CSN”, also referred to as the Company or Parent Company, is a publicly-held company incorporated on April 9, 1941, under the laws of the Federative Republic of Brazil (Companhia Siderúrgica Nacional, its subsidiaries, associates and jointly controlled entities collectively referred to herein as the “Group”). The Company’s registered office is located in São Paulo, SP, Brazil.

CSN has shares listed on the São Paulo Stock Exchange (BM&F BOVESPA) and the New York Stock Exchange (NYSE). Accordingly, it reports its information to the Brazilian Securities Commission (CVM) and the U.S. Securities and Exchange Commission (SEC).

The Group's main operating activities are divided into five (5) operating segments as follows:

- **Steel:**

The Company’s main industrial facility is the Presidente Vargas Steel Mill (“UPV”), located in the city of Volta Redonda, State of Rio de Janeiro. This segment consolidates the operations related to the production, distribution and sale of flat steel, long steel, metallic containers and galvanized steel. In addition to the facilities in Brazil, CSN has operations in the United States, Portugal and Germany aimed at gaining markets and performing excellent services for final consumers. Its steels are used in the home appliances, civil construction and automobile industries.

- **Mining:**

The production of iron ore is developed in the city of Congonhas, in the State of Minas Gerais. It further mines tin in the State of Rondônia to supply the needs of UPV, with the excess of these raw materials being sold to subsidiaries and third parties. CSN holds the concession to operate TECAR, a solid bulk terminal, one of the 4 (four) terminals that comprise the Itaguaí Port, in Rio de Janeiro. Importations of coal and coke are carried out through this terminal.

- **Cement:**

CSN entered the cement market boosted by the synergy between this new activity and its already existing businesses. Next to the Presidente Vargas Steel Mill in Volta Redonda (RJ), it installed a new business unit: CSN Cimentos, which produces CP-III type cement by using slag produced by the UPV blast furnaces in Volta Redonda. It also explores limestone and dolomite at the Arches drive in the State of Minas Gerais, to supply the needs of UPV and of the cement plant.

- **Logistics**

Railroads:

CSN has equity interests in three railroad companies: MRS Logística S. A., which manages the former Southeast Railway System of Rede Ferroviária Federal S.A., Transnordestina Logística S. A. (“TLSA”) and FTL - Ferrovia Transnordestina Logística S.A. (“FTL”), which operate the Northeast Railway System of RFFSA, in the States of Maranhão, Piauí, Ceará, Rio Grande do Norte, Paraíba, Pernambuco and Alagoas, with TLSA being responsible for the stretches of Missão Velha - Salgueiro, Salgueiro - Trindade, Trindade - Eliseu Martins, Salgueiro - Porto de Suape and Missão Velha - Porto de Pecém (Railway System II) and FTL being responsible for the stretches of São Luiz - Mucuripe, Arrojado - Recife, Itabaiana - Cabedelo, Paula Cavalcante - Macau and Propriá - Jorge Lins (Railway System I).

Ports:

In the State of Rio de Janeiro, by means of its subsidiary Sepetiba Tecon S. A., the Company operates the Container Terminal (Tecon) at the Itaguaí Port. Located in the Bay of Sepetiba, this port has privileged highway, railroad and maritime access.

Tecon handles the shipments of CSN steel products, movement of containers, as well as storage, consolidation and deconsolidation of cargo.

- **Energy:**

As energy is fundamental in its production process, the Company has assets for generation of electric power to guarantee its self-sufficiency.

For further details on the Group's segments, see Note 24 - Business Segment Reporting.

Private securities are short-term investments in Bank Deposit Certificates (CDBs) with yields pegged to the Interbank Deposit Certificate (CDI) fluctuation, and government securities are basically repurchase agreements backed by National Treasury Notes and National Treasury Bills. The exclusive funds managed by BTG Pactual Serviços Financeiros S.A. DTVM and Caixa Econômica Federal and their assets collateralize possible losses on investments and transactions carried out. Investments in funds were consolidated.

In addition, a significant part of the funds of the Company and its foreign subsidiaries is invested in Time Deposits with leading banks, bearing fixed rates.

In order to meet the needs of some customers in the domestic market, related to the extension of the payment term for billing of steel, in common agreement with CSN's internal commercial policy and maintenance of its very short-term receipts (up to 7 days), at the request of the customer, transactions are carried out for assignment of receivables without co-obligation negotiated between the customer and banks

with common relationship, where CSN assigns the trade notes/bills that it issues to the banks with common relationship.

Due to the characteristics of the transactions for assignment of receivables without co-obligation, after assignment of the customer's trade notes/bills and receipt of the funds from the closing of each transaction, CSN settles the trade receivables and becomes entirely free of the credit risk on the transaction. This transaction totals R\$252,010 as of September 30, 2014 (R\$386,732 as of December 31, 2013), less the trade receivables.

On that date the following agreements were also signed (i) a new Shareholders' Agreement of TLISA between CSN, Valec Engenharia, Construções e Ferrovias S.A. ("Valec"), Fundo de Desenvolvimento do Nordeste – FDNE ("FDNE") and BNDES Participações S.A. – BNDESPAR ("BNDESPAR"), with the intervenience of TLISA, whose effectiveness was conditioned to the disproportionate spin-off of TLISA, to be implemented under the terms of ANTT Resolution 4,042/2013; and (ii) Investment Agreement between CSN, Valec and FDNE, with the intervenience of TLISA, which besides other matters, deals with the new budget and the sources of funds that will have to be contributed to TLISA or financed for implementation of the Railway System II.

At the Extraordinary Shareholders' Meeting held on December 27, 2013, as part of the reorganization process described above, the shareholders approved the disproportionate spin-off of TLISA, completing the segregation of Railway System I and Railway System II.

The purpose of this restructuring was to rebalance economically and financially the Northeast Railway System concession, leading to the extension of the Railway System II operation concession, which could reach 2057, and the segregation of the assets related to Railway System I, which were merged into subsidiary FTL - Ferrovia Transnordestina Logística S.A. ("FTL"), . ("FTL"), with the maintenance of the assets related to Railway System II in TLISA.

As a result of the spin-off, CSN became the holder of an 88.41% stake in FTL and a 77.30% stake in TLISA.

In April 2014, the shareholders of Transnordestina approved a capital increase in the amount of R\$400,000, through the issuance of 7,278,020 class A preferred shares, which were fully subscribed by the shareholder Valec and paid up through the capitalization of credits from Advances for Future Capital Increase held by such shareholder against Transnordestina. As a result of such increase CSN no longer holds a 77.30% interest, it currently holds 62.68% of the total capital of Transnordestina.

With the completion of the spin-off, the new Shareholders' Agreement became effective and control is now jointly held with the shareholders part of the public block, which became the holders of substantive rights to

make certain material company decisions and influence the ordinary course of business, as well as CSN, by influencing budgeting, internal policies, capital expenditures, debt, etc., thus typifying the loss of control by CSN, pursuant to specific IFRS criteria.

Accordingly, as of December 31, 2013, in accordance with IFRS 10, corresponding to CPC 36(R3), CSN reversed all TLSA assets and liabilities and non-controlling interests and started to recognize the remaining stake in this investment at fair value on the date control was lost. After this initial recognition, the investment starts to be measured under the equity method.

The gain generated by the loss of control over the investment recognized in the income statement, in other operating income in 2013, is broken down as follows:

	Consolidated	Parent Company
	12/31/2013	12/31/2013

II – Investments in financial instruments classified as available for sale and measured at fair value through OCI

These consist mainly of investments in shares acquired in Brazil involving top ranked companies, which are recognized in non-current assets, and any gains or losses are recognized in shareholders' equity, where they will remain until actual realization of the securities or when any loss is considered unrecoverable.

Impairment of financial assets classified as available for sale

The Company has investments in common (USIM3) and preferred (USIM5) shares (“Usiminas Shares”), designated as available-for-sale financial assets as they do not meet the criteria to be classified within any of the other categories of financial instruments (loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss). The asset is classified as a non-current asset under line item “investments” and is carried at fair value based on the quoted price on the stock exchange (BM&FBOVESPA).

Considering the volatility of the quotations of Usiminas shares, the Company evaluated whether, at the end of the reporting period, there was objective evidence of impairment of these financial assets, i.e., the Company’s management evaluated if the decline in the market value of Usiminas shares should be considered either significant or prolonged. In turn, this valuation requires judgment based on CSN’s policy, prepared according to practices used in the domestic and international markets, and consists of an instrument by instrument analysis based on quantitative and qualitative information available in the market, from the time an instrument shows a drop of 20% or more in its market value or from the time there is a significant drop in its market value as compared to its acquisition price during more than twelve months.

On June 30, 2014 and 2013, there was a decline in the quotation of the common shares (USIM3) which, according to the Company’s accounting policy, generated a loss of R\$34,396 and R\$3,302, net of income tax and social contribution, and R\$52,115 and R\$5,002 were recorded in other operating expenses and R\$17,719 and R\$1,701 in deferred taxes, respectively.

On September 30, 2014, after a new decline in the quotation of the common shares (USIM3) in relation to the quotation of June 30, 2014, the Company reclassified the accumulated losses for the quarter recognized in other comprehensive income, in the amount of R\$13,193, net of income tax and social contribution, to profit or loss for the period, in the amount of R\$19,989 in other operating expenses and R\$6,796 in deferred taxes, totaling in 2014 R\$72,104 in other operating expenses and R\$24,515 in deferred taxes.

Beginning this date, pursuant to a Company's policy, gains and losses arising from the variation of the quotation of shares were recognized in other comprehensive income.

On April 9, 2014, the Administrative Council for Economic Defense (CADE - Conselho Administrativo de Defesa Econômica) issued its decision on the matter and a commitment agreement (Performance Commitment Agreement), or TCD, was signed between CADE and CSN. Under the terms of the decision of CADE and TCD, CSN must reduce its interest in Usiminas within a specified term. The term and percentage of reduction are confidential. Moreover, the political rights at Usiminas will continue suspended until the Company reaches the limits established in the TCD.

The Company's interest in Usiminas has not changed as compared with the percentage disclosed in the financial statements as of December 31, 2013.

The Company will continue to evaluate strategic alternatives with respect to its investment in Usiminas.

III – Fair values of assets and liabilities as compared to their carrying amounts

The estimated fair values of consolidated long-term borrowings and financing were calculated at prevailing market rates, taking into consideration the nature, terms and risks similar to those of the recorded contracts, as compared below:

(*) The Company taxes foreign exchange differences on a cash basis to calculate income tax and social contribution.

Some Group companies recognized tax credits on income tax and social contribution loss carryforwards not subject to statute of limitations and based on the history of profitability and expected future taxable profits determined in technical studies approved by Management.

Since they are subject to significant factors that may change the projections for realization, the carrying amounts of deferred tax assets and projections are reviewed annually. These studies indicate the realization of these tax assets within the term stipulated by CVM Instruction 371/02 and the limit of 30% of the taxable profit.

Certain group companies have income tax and social contribution loss carryforwards in the amounts of R\$2,872,260 and R\$309,805, respectively, for which no deferred taxes were set up, of which R\$141,466 expire in 2015, R\$42,144 in 2018, R\$139,555 in 2015, R\$42,567 in 2027, R\$64,994 in 2029, and R\$80,082 in 2030.

The Company's corporate structure includes foreign subsidiaries whose profits are subject to income tax levied by the related countries, recognized at tax rates lower than in Brazil.

For the years from 2010 to 2014 these subsidiaries generated profits amounting to R\$3,567,806, which tax authorities may understand that have already been distributed, hence, it would be subject to additional taxation in Brazil, in the approximate amount of R\$1,213,054. The Company, based on its legal counsel's opinion, assessed the likelihood of loss in a potential challenge by tax authorities as possible and, therefore, no provision was recognized in the condensed interim financial statements.

- **Law 12,973/14**

Provisional Act 627, converted into Law 12,973 in May 2014, which revokes the Transition Tax Regime (RTT) and introduces other measures, such as: (i) amendments to Decree-Law 1,598/77, which addresses the corporate income tax and social contribution on net income law; (ii) definition that any change in or adoption of accounting methods and criteria through administrative acts issued based on a competence attributed by the commercial law shall not have any impact on the calculation of federal taxes; (iii) inclusion of a specific treatment on the taxation of profits or dividends; (iv) inclusion of provisions on the calculation of interest on capital; and (v) new considerations about investments accounted for under the equity method of accounting. The provisions established in the law are effective starting 2015, however, companies may opt for their early adoption, on an irreversible basis, in 2014.

The Company prepared studies on the possible effects that could arise from the application of the provisions of Law 12,973 and concluded that they do not result in material adjustments to its financial statements as of September 30, 2014 and December 31, 2013.

The Brazilian Tax Authority, through Normative Ruling 1,499/14, regulated the form of declaration of the option for the adoption or not of the legislation still in 2014, which will be made through the DCTF (Declaration of Federal Tax Debits and Credits) of December 2014, to be filed in February 2015, when the Company will disclose its definitive option.

a) Tax Recovery Program (Federal Refis) – Law 11,941/09 and Law 12,865/13

- New deadline – Law 11,941/09**

On November 26, 2009, the Group companies joined the Tax Recovery Programs established by Law 11,941/09 and Provisional Act 470/2009, aimed at settling tax liabilities through a special payment system and installment plan for the settlement of tax and social security obligations.

With the new deadline to join the Law 11,941/09 tax installment program established by the RFB/PGFN, pursuant to Laws 12,865/13, 12,973/14 and 12,996/14(*), the Company analyzed with its legal counsel the lawsuits that could have changed or been subject to new jurisprudence. After the analysis, the Company concluded that there were debts that could be included in the program and applied for the Law 11,941/09 tax installment payment on December 27, 2013 and August 22, 2014, respectively.

(* Law 12,996/14

Law 12,996/2014 introduced the new deadline to join the "Crisis Refis", originally governed by Law 11,941, of 2009.

The Company analyzed with its legal counsel the lawsuits that could have changed or been subject to new jurisprudence. After the analysis, the Company concluded that there were debts that could be included in the program and applied for the tax installment payment.

Both programs establish reductions of fines and interest. The Company joined the program in the modality "In cash" with payment in credit from tax loss carryforwards of R\$95,000 and the other lawsuits were included in the modality "180 installments" with utilization of credits from tax loss carryforwards of R\$27,000. The program is subject to approval by the tax authorities.

The joining of the program above generated an impact on profit or loss as shown below:

- **Overseas profits – Law 12,865/13**

Under Article 40 of Law 12,865/13, the federal government allowed the payment in installments of income tax and social contribution arising from the application of Article 74 of Provisional Act 2158-35/2001, the so-called overseas profits, which requires that profits earned by foreign subsidiaries or associates be taxed at yearend.

The Company elected to join the amounts corresponding to the assessed period (2004-2009), on November 29, 2013.

Both programs provide for reductions in fines and interest, however, only income tax and social contribution debt arising from the application of Law 12,865/12 could be settled with tax credits claimed on tax loss carryforwards of subsidiaries and the parent company. The tax credit utilized by the subsidiaries total R\$565,273, of which R\$550,270 did not have a recognized tax credit.

The remaining balance was divided into 179 monthly installments adjusted by the SELIC and the amount determined pursuant to Laws 11,941/09 and 1,2865/13 is subject to approval by the tax authorities.

b) Other tax installments (regular and other)

The Group companies also joined the Regular social security tax (INSS) installment plan and other plans.

The provision for tax, social security, labor, civil and environmental liabilities was estimated by management and is mainly based on the legal counsel's assessment. Only proceedings for which the risk is classified as probable loss are accrued. Moreover, this provision includes tax liabilities resulting from contingencies filed by the Company, subject to SELIC (Central Bank's policy rate).

The Company has tax assessment notices related to transfer of imported raw material for an amount lower than the import document, and the Rio de Janeiro state tax authorities are requiring the following: (i) difference of the ICMS levied on the operation, (ii) disallowance of the alleged ICMS credit recorded in duplicate in the tax books, and (iii) fine for non-recording of invoices. On December 31, 2013, CSN had a provision for contingencies recorded since Management, together with the internal and external legal counsel, understood that the likelihood of loss on this cause was probable.

During the third quarter of 2014, in line with the Company's accounting policy of continuous review of the likelihood of losses on lawsuits in progress, Management, supported by its internal and external legal counsel, reviewed the assumptions involving these tax assessment notices and, in view of the favorable previous court decision of the Superior Court of Justice and the evolution of the lawsuits, as well as the existence of new and consistent arguments to cancel the assessment notices, considered that the chances of success in these lawsuits are good and that it is no longer probable that an outflow of resources that incorporate future economic benefits will be required to settle an eventual obligation derived from an outcome unfavorable to the Company. Accordingly, Management reversed the provision for contingencies recognized through June 30, 2014, in the net amount of R\$162,651.

Starting September 30, 2014, the updated amount of these assessments is disclosed in the notes to the interim financial statements as contingent liability with likelihood of loss classified as possible.

§ Other administrative and judicial proceedings

The Group is a defendant in other administrative and judicial proceedings (tax, social security, labor, civil, and environmental), in the approximate amount of R\$15,970,944, of which

(a) R\$6,912,278 refers to the tax assessment notice issued against the Company for an alleged sale of 40% of the shares of its subsidiary NAMISA to a Japanese-Korean consortium, thus failing to determine and pay taxes on the capital gain resulting from this transaction, and in May 2013, the São Paulo (SP) Regional Judgment Office (lower administrative court) issued a decision favorable to the Company and cancelled the tax assessment notice. In light of this decision, an ex-officio appeal was filed that will be judged by the Administrative Board of Tax Appeals (CARF). In a trial the appeal was partially granted and the Company awaits the publication of the decision for the analysis of the filing of an appeal to the Superior Board of Tax Appeals.

(b) R\$1,585,174 refer to the notification received on October 20, 2014, in which the Company had its request for installment payment of IRPJ and CSLL debts, regulated by Law 12,865/14, also known as installment payment of Profits Abroad, denied. The basis of the decision, in summary, is that there would be inconsistency in the amounts of interest declared. An hierarchical appeal was filed against this decision, stating that such interest had been paid in the installment payment program of Law 11,941/09, with a new deadline introduced by Law 12,996/14. Of the total amount informed above, the amounts provided for in the specific account of taxes in installments were excluded. The opinion of our lawyers is that the chances of success as regards the continuity of the Company in the program of installment payment of Profits Abroad, both at the administrative and judicial levels, is very good.

(c) R\$716,227 refers to tax foreclosures filed to require the Company to pay the ICMS, as liable party, allegedly due on the electricity purchased from a Generating Plant and fully consumed in the manufacturing of steel products. The tax auditors believe that the use of electricity in the production process does not exclude the Company responsibility for withholding ICMS levied on delivery of this input in the plant.

(d) R\$512,546 refers to the decision issued by the Federal Revenue Service that partially approved the request to pay debts in installments governed by Provisional Act 470/09, due to the insufficiency of tax loss carryforwards. When it consolidated the tax installment plan, the Federal Revenue Service considered the existing outstanding balance in the Inflationary Profit Tax Return (SAPLI) as the correct amount: however, this balance already included the adjustments to tax loss carryforwards as a result of the Overseas Profits tax assessment notice issued against the Company.

(e) R\$499,482 refers to the offset of taxes that were not approved by the Federal Revenue Service for different reasons. The taxes involved are CSLL, IRPJ, IPI, PIS and COFINS. The analysis of the entire documentation evidences the right to claim credits and the right to file the offset requests, processed at the time.

(f) R\$459,321 refers to the assessment notice issued against the Company for an alleged nonpayment of income tax (IRPJ) and social contribution on net income (CSLL) on profits recognized in the balance sheets of its foreign subsidiaries in 2010.

(g) R\$427,791 refers to the disallowance of the ICMS credits claimed by the Company in the period 04/1999-07/2002 on the transfer of iron ore between the Casa de Pedra mine and the Presidente Vargas Plant. According to the tax auditors, the tax base used on the transfer under the Minas Gerais State Law is not accepted under the Rio de Janeiro State Law, reason why the difference was disallowed.

(h) R\$248,347 refers to the disallowance of the ICMS credits on the acquisition of subsidiary INAL's units located in the State of Rio de Janeiro. According to the tax auditors, the acquisition of a unit does not entitle an entity to claim ICMS credits. In light of these tax assessments, the Company filed for an injunction at the time and its right to change its State taxpayer master file was recognized, to state that the units acquired belong to CSN. This decision was favorable to the Company and can be applied in the judgment of our appeals by the Rio de Janeiro State Taxpayers Board.

(i) R\$222,567 refers to transfer of imported raw material for an amount lower than the import document, and the state tax authorities are requiring the following: (i) difference of the ICMS levied on the operation, (ii) disallowance of the alleged ICMS credit recorded in duplicate in the tax books, and (iii) fine for non-recording of invoices.

(j) R\$2,525,000 refers to other tax (federal, state, and municipal) lawsuits.

(k) R\$1,273,358 refers to labor and social security lawsuits; R\$478,803 refers to civil lawsuits, and R\$110,050 refers to environmental lawsuits.

The assessments made by the legal counsel define these administrative and judicial proceedings as entailing risk of possible loss and, therefore, no provision was recorded in conformity with Management's judgment and accounting practices adopted in Brazil.

16. PROVISION FOR ENVIRONMENTAL LIABILITIES AND ASSET RETIREMENT OBLIGATION - ARO

The balance of the provision for environmental liabilities and asset retirement obligation - ARO is as follows:

	236,161	370,454	231,019	365,716

In the second quarter of 2014, the Company reassessed the costs with the remediation of environmental liabilities and concluded a new study of remediation alternatives for some areas in Volta Redonda (RJ) that were used as landfill by the Company in the past. The study comprised the change of the remediation technology, replacing the material removal by the on-site geotechnical confinement, as permitted by the Brazilian environmental legislation, resulting in a reversal of R\$120,582. For the other liabilities, there were no significant changes as compared with the balance as of December 31, 2013.

(*) The ore sales volumes presented in this note take into consideration Company sales and the interest in its subsidiaries and jointly controlled entities (Namisa 60%).

Adjusted EBITDA is the tool based on which the chief operating decision maker measures segment performance and the capacity to generate recurring operating cash, and consists of profit for the year less net finance income (costs), income tax and social contribution, depreciation and amortization, share of profits of investments, and other operating income (expenses), plus the proportional EBITDA of jointly controlled entities.

Even though it is an indicator used in segment performance measurements, EBITDA is not a measurement recognized by accounting practices adopted in Brazil or IFRS, does not have a standard definition, and may not be comparable with measurements using similar names provided by other entities.

As required by IFRS 8, the table below shows the reconciliation of the measurement used by the chief operating decision maker with the results determined using the accounting practices.

REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To the Board of Directors and Shareholders of

We have reviewed the accompanying individual and consolidated interim financial information of Companhia Siderúrgica Nacional (“the Company”), identified as Parent and Consolidated, respectively, included in the Interim Financial Information Form (ITR), for the nine-month period ended September 30, 2014, which comprises the balance sheet as of September 30, 2014 and the related statements of income, and of comprehensive income, for the nine-months periods then ended and of changes in equity and of cash flows for the nine-month period then ended, including the explanatory notes.

The Company’s management is responsible for the preparation of the individual interim financial information in accordance with technical pronouncement CPC 21 (R1) – Interim Financial Information and of the consolidated interim financial information in accordance with technical pronouncement CPC 21 (R1) and with international standard IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB, as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM), applicable to the preparation of Interim Financial Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 and ISRE 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with standards on auditing and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the individual interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual interim financial information included in the ITR referred to above was not prepared, in all material respects, in accordance with technical pronouncement CPC 21 (R1), applicable to the preparation of the Interim Financial Information (ITR) and presented in accordance with the standards issued by the Brazilian Securities Commission.

Conclusion on the consolidated interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim financial information included in the ITR referred to above was not prepared, in all material respects, in accordance with technical pronouncement CPC 21 (R1) and international standard IAS 34, applicable to the preparation of Interim Financial Information (ITR) and presented in accordance with the standards issued by the Brazilian Securities Commission.

Other matters

Statements of value added

We have also reviewed the individual and consolidated interim statements of value added (DVA), for the nine-month period ended September 30, 2014, prepared under the responsibility of the Company's Management, the presentation of which is required by the standards issued by the CVM applicable to the preparation of Interim Financial Information (ITR), and considered as supplemental information for International Financial Reporting Standards – IFRS, which do not require the presentation of DVA. These statements were subject to the same review procedures described above and, based on our review, nothing has come to our attention that causes us to believe that they were not prepared, in all material respects, consistently with the individual and consolidated interim financial information taken as a whole.

The accompanying individual and consolidated interim financial information has been translated into English for the convenience of readers outside Brazil.
