Financial Statements of the Prudential Conglomerate and Independent Auditor's Report

***Notes to the Financial Statements of the Prudential Conglomerate***

**1) OPERATIONS**

Banco Bradesco S.A. (Bradesco) is a private-sector, publicly traded company and universal bank that through its commercial, foreign exchange, consumer financing and housing loan portfolios carries out all types of banking activities which it is authorised to. The Bank is involved in a number of other activities, either directly or indirectly, through its subsidiaries, specifically leasing, investment banking, brokerage, consortium management, credit cards, real estate projects, insurance, pension plans and capitalization bonds. All these activities are undertaken by the various companies in the Organização Bradesco, working together in an integrated fashion in the market.

**2) PRESENTATION OF THE FINANCIAL STATEMENTS**

The Financial Statements of the Prudential Conglomerate were prepared to comply with the requirements of Resolution No. 4,280/13, of the National Monetary Council (CMN) and additional rules of the Brazilian Central Bank (Bacen). Thus, specific requirements in the consolidation and/or combination of the entities listed in Resolution No. 4,280/13 determined by the CMN and Bacen were observed, which are not necessarily the same established by the corporate law and by the CMN or Bacen for other types of consolidation. In this sense, they cover the financial statements of Bradesco, and foreign branches, subsidiaries and investment funds, as requested in Resolution No. 4,280/13.

In the preparation of these Financial Statements of the Prudential Conglomerate intercompany transactions, including investments, assets and liabilities, revenue, expenses and unrealized profit were eliminated and net income and shareholders' equity attributable to the non-controlling interests were accounted for in a separate line. For jointly controlled investments with other shareholders, assets, liabilities and income and loss were included in the consolidated financial statements of the Prudential Conglomerate according to the interest held in the shareholders' equity of each investee. Goodwill on the acquisition of investments in subsidiary/associate companies or jointly controlled entities is presented in the investments and intangible assets lines (Note 14a).

The financial statements include estimates and assumptions, such as: the calculation of estimated loan losses; fair market value estimates of certain financial instruments; civil, tax and labor provisions; impairment losses of securities classified as available-for-sale and held-to-maturity securities and

non-financial assets; and the determination of the useful life of specific assets. Actual results may differ from those based on estimates and assumptions.

Bradesco's financial statements of the Prudential Conglomerate were approved by the Board of Executive Officers and by the Disclosure Committee on March 7, 2016.

We highlight the societies and the major investment funds, with direct and indirect participation, included in the financial statements of the Prudential Conglomerate:

Financial Statements of the Prudential Conglomerate and Independent Auditor's Report

***Notes to the Financial Statements of the Prudential Conglomerate***

**3) SIGNIFICANT ACCOUNTING PRACTICES**

**a) Functional and presentation currencies**

Financial statements of Prudential Conglomerate are presented in Brazilian reais, which is also Bradesco's functional currency. Foreign branches and subsidiaries are mainly a continuation of activities in Brazil, and, therefore, assets, liabilities and profit or loss are converted into Brazilian reais using the appropriate currency exchange rate to comply with accounting practices adopted in Brazil. Foreign currency conversion gains and losses arising are recognized in the period's income statement in the lines "Derivative Financial Instruments" and "Borrowing and On-lending".

**b) Income and expense recognition**

The result is calculated according to the regime of competence, which establishes that the revenues and expenses should be included in the calculation of the results for the periods in which they occur, always simultaneously to when they are correlated, regardless of being a receipt or payment.

Fixed rate contracts are recorded at their redemption value with the income or expense relating to future periods being recorded as a deduction from the corresponding asset or liability. Finance income and costs are recognized daily on a pro-rata basis and calculated using the compounding method, except when they relate to discounted notes or to foreign transactions, which are calculated using the straight-line method.

Floating rate and foreign-currency-indexed contracts are adjusted to the interest and foreign exchange rates applicable at the end of the reporting period.

**c) Cash and cash equivalents**

Cash and cash equivalents include: funds available in currency, investments in gold, securities sold under agreements to repurchase and interest-earning deposits in other banks, maturing in 90 days or less, which are exposed to insignificant risk of change in fair market value. These funds are used by Bradesco to manage its short-term commitments.

Cash and cash equivalents detailed balances are presented in Note 4.

#### **d) Interbank investments**

Unrestricted repurchase and reverse repurchase agreements are stated at their fair market value. All other interbank investments are stated at cost, plus income earned up to the end of the reporting period, net of any devaluation allowance, if applicable.

The breakdown, terms and proceeds relating to interbank investments are presented in Note 5.

#### **e) Securities – Classification**

- Trading securities – securities acquired for the purpose of being actively and frequently traded. They are recorded at cost, plus income earned and adjusted to fair market value with movements recognized in the Income Statement for the period;
- Available-for-sale securities – securities that are not specifically intended for trading purposes or to be held to maturity. They are recorded at cost, plus income earned, which is recorded in profit or loss in the period and adjusted to fair market value with movements recognized in shareholders' equity, net of tax, which will be transferred to the Income Statement only when effectively realized; and
- Held-to-maturity securities – securities for which there is positive intent and financial capacity to hold to maturity. They are recorded at cost, plus income earned recognized in the Income Statement for the period.

Securities classified as trading and available-for-sale, as well as derivative financial instruments, are recognized in the consolidated statement of financial position at their fair market value. Fair market value is generally based on quoted market prices or quotations for assets or liabilities with similar characteristics. If

market prices are not available, fair market values are based on traders' quotations, pricing models, discounted cash flows or similar techniques to determine the fair market value and may require judgment or significant estimates by Management.

***Notes to the Financial Statements of the Prudential Conglomerate***

Classification, breakdown and segmentation of securities are presented in Note 6 (a to c).

**f) Derivative financial instruments (assets and liabilities)**

Derivate instruments are classified based on the objective for which the underlying instrument was acquired at the date of purchase, taking into consideration its use for possible hedging purposes.

Operations involving derivative financial instruments are designed to meet the Bank's own needs in order to manage overall exposure, as well as to meet customer requests to manage their positions. The gains or losses are recorded in profit-and-loss and shareholders' equity accounts.

Derivative financial instruments used to mitigate risk deriving from exposure to variations in the fair market value of financial assets and liabilities are designated as hedges when they meet the criteria for hedge accounting and are classified according to their nature:

- Market risk hedge: the gains and losses, realized or not, of the financial instruments classified in this category as well as the financial assets and liabilities, that are the object of the hedge, are recorded in the Income Statement; and
- Cash flow hedge: the effective portion of valuation or devaluation of the financial instruments classified in this category is recorded, net of taxes, in a specific account in shareholders' equity. The ineffective portion of the hedge is recognized directly in the Income Statement.

A breakdown of amounts included as derivative financial instruments, in the balance sheet and off-balance-sheet accounts, is disclosed in Note 6 (d to g).

**g) Loans and leasing, advances on foreign exchange contracts, other receivables with credit characteristics and allowance for loan losses**

Loans and leasing, advances on foreign exchange contracts and other receivables with credit characteristics are classified by risk level, based on: (i) the parameters established by CMN Resolution No. 2,682/99, which requires risk ratings to have nine levels, from “AA” (minimum risk) to “H” (maximum risk); and (ii) Management’s assessment of the risk level. This assessment, which is carried out regularly, considers current economic conditions and past experience with loan losses, as well as specific and general risks relating to operations, debtors and guarantors. Moreover, the days past due are also considered in the rating of customer risk as per CMN Resolution No. 2,682/99, as follows:

<b>Past-due period (1)</b>	<b>Customer rating</b>
• from 15 to 30 days	B
• from 31 to 60 days	C
• from 61 to 90 days	D
• from 91 to 120 days	E
• from 121 to 150 days	F
• from 151 to 180 days	G
• more than 180 days	H

(1) For transactions with terms of more than 36 months, past-due periods are doubled, as permitted by CMN Resolution No. 2,682/99.

Interest and inflation adjustments on past due transactions are only recognized on the Income Statement up to 59 days past the due date. As from the 60<sup>th</sup> day, they are recognized on off-balance sheet accounts and are only recognized when the Income Statement has been received.

Dezembro 2015

Financial Statements of the Prudential Conglomerate and Independent Auditor's Report

***Notes to the Financial Statements of the Prudential Conglomerate***

H-rated past due transactions remain at this level for six months, after which they are written-off against the existing allowance and controlled in off-balance-sheet accounts for at least five years.

Renegotiated transactions are held at the same rating as on the date of the renegotiation or classified in a higher risk rating. Renegotiations which have already been written-off against the allowance and that were recorded in off-balance-sheet accounts, are rated as level "H" and any possible gains derived from their renegotiation are recognized only when they are effectively received. When there is a significant repayment on the operation or when new material facts justify a change in the level of risk, the operation may be reclassified to a lower risk category.

The estimated allowance for loan losses is calculated to sufficiently cover probable losses, considering CMN and Bacen standards and instructions, together with the Management's assessment of the credit risk.

Type, values, terms, levels of risk, concentration, economic sector of client's activity, renegotiation and income from loans, as well as the breakdown of expenses and statement of financial position accounts for the allowance for loan losses are presented in Note 8.

**Leasing**

The portfolio of leasing operations consists of contracts firmed with the support of Decree No. 140/84, of the Ministry of Finance, which contains clauses of: (a) non-cancellation; (b) purchase option; and c) post-fixed or fixed restatement and are accounted for in accordance with the standards established by Bacen, as follows:

**I- Leases receivable**

Reflect the balance of installments receivable, restated according to the indexes and criteria established by contractual agreement.

## **II- Unearned income from leasing and Guaranteed Residual Value (GRV)**

Recorded at the contractual amount, conversely to adjusted accounts of unearned revenues from leasing and Residual value to balance, both submitted through negotiated conditions. The GRV received in advance is recorded in Other Liabilities – Creditors by Anticipation of the Residual Value until the date of contractual termination. The adjustment at present value of the lease payments and the GRV receivable from the financial leasing operations is recognized as excessive/insufficient depreciation on leased assets, in order to reconcile the accounting practices. In operations whose delays are equal to or greater than 60 days, the appropriation to the result occurs upon receipt of contractual installments, in accordance with CMN Resolution No. 2,682/99.

## **III- Leased fixed assets**

It is recorded at acquisition cost, minus the accrued depreciations. The depreciation is calculated using the linear method, with the benefit of a 30% reduction in the normal life cycle of the asset, provisioned in the current legislation. The main annual rates of depreciation used, as base for this reduction, are the following: vehicles and the like, 20%; furniture and utensils, 10%; machinery and equipment, 10%; and other assets, 10% and 20%.

## **IV- Losses on leases**

The losses recorded in the sale of leased assets are deferred and amortized over the remaining normal life cycle of assets, and are shown along with the Leased Fixed Assets (Note 8k).

## **V- Excessive (insufficient) depreciation**

The accounting records of leasing operations are maintained as legal requirements, specific for this type of operation. The procedures adopted and summarized in items "II" to "IV" above differ from the accounting practices provisioned in Brazilian corporate law, especially concerning the regime of competence in the record of revenues and expenses related to lease contracts. As a result, in accordance with Bacen Circular No. 1,429/89, the present value of outstanding leasing installments was calculated, using the internal rate of return of each contract, recording a leasing revenue or expenditure, conversely to the entries of excessive or insufficient depreciation, respectively, recorded in Permanent Assets, with the objective of adapting the leasing operations to the regime of competence (Note 8k).

**h) Income tax and social contribution (assets and liabilities)**

Income tax and social contribution deferred tax assets, calculated on income tax losses, social contribution losses and temporary differences, are recorded in "Other Receivables - Sundry" and the deferred tax liabilities on tax differences in leasing depreciation (applicable only for income tax), mark-to-market adjustments on securities, restatement of judicial deposits, among others, are recorded in "Other Liabilities - Tax and Social Security".

Deferred tax assets on temporary differences are realized when the difference between the accounting treatment and the income tax treatment reverses. Deferred tax assets on income tax and social contribution losses are realizable when taxable income is generated, up to the 30% limit of the taxable profit for the period. Deferred tax assets are recorded based on current expectations of realization considering technical studies and analyses carried out by Management.

The provision for income tax is calculated at 15% of taxable income plus a 10% surcharge. For financial companies, equated and of the insurance industry, the social contribution on the profit was calculated until August 2015, considering the rate of 15%. For the period between September 2015 and December 2018, the rate was changed to 20%, according to Law No. 13,169/15, returning to the rate of 15% as from January 2019. For the other companies, the social contribution is calculated considering the rate of 9%.

Due to the amendment of the rate, the Organização Bradesco constituted, in September 2015, a supplement to the tax credit of social contribution, considering the annual expectations of achievement and their respective rates in force in each period, according to the technical study conducted.

Provisions were recorded for other income tax and social contribution in accordance with specific applicable legislation.

Changes in the criteria to recognize revenue, costs and expenses included in the net profit for the period, enacted by Law No. 11,638/07 and subsequent amendments were made fiscally by the new regime of the taxation in force instituted by Law No. 12,973/14.

The breakdown of income tax and social contribution, showing the calculations, the origin and expected use of deferred tax assets, as well as unrecorded deferred tax assets, are presented in Note 32.

**i) Prepaid expenses**

Prepaid expenses consist of funds already disbursed for future benefits or services, which are recognized in the profit or loss on an accrual basis.

Incurred costs relating to assets that will generate revenue in subsequent periods are recorded in the Income Statement according to the terms and the amount of expected benefits and directly written-off in the Income Statement when the corresponding assets or rights are no longer part of the institution's assets or when future benefits are no longer expected.

In the case of the remuneration paid by the origination of credit operations to the banking correspondents related to credit operations originated during 2015, Bradesco opted to recognize 2/3 of the total value of compensation, pursuant to the provisions of Bacen Circular No. 3,738/14.

Prepaid expenses are shown in detail in Note 10b.

**p) Provisions, contingent assets and liabilities and legal obligations – tax and social security**

- **Contingent Assets:** these are not recognized in the financial statements, except to the extent that there are real guarantees or favorable judicial decisions, to which no further appeals are applicable, and confirmation of the capacity of the counterparty to pay or the ability of Bradesco to realize the asset via compensation against another liability upon which the gain is considered practically certain. Contingent assets with a chance of probable success are disclosed in the notes to the financial statements;

- Provisions: these are recorded taking into consideration the opinion of legal counsel, the nature of the lawsuits, similarity with previous lawsuits, complexity and positioning of the courts, whenever the loss is deemed probable, it requires a probable outflow of funds to settle the obligation and when the amount can be reliably measured;

Financial Statements of the Prudential Conglomerate and Independent Auditor's Report

**Notes to the Financial Statements of the Prudential Conglomerate**

- (1) Consistent with the criteria in Bacen Circular Letter No. 3,068/01 and due to the characteristics of the securities, we are classifying the derivative financial instruments, except those considered as cash flow hedges in the category Trading Securities;
- (2) These refer to investment fund and managed portfolio resources invested in purchase contracts with a commitment to re-sell with Bradesco, whose owners are consolidated subsidiaries, included in the financial statements of the Prudential Conglomerate;
- (3) The investment fund quotas are presented based on the instruments comprising their portfolios and maintaining the classification used in the fund;
- (4) In compliance with Article 8 of Bacen Circular Letter No. 3,068/01, Bradesco declares that it has the financial capacity and intention to maintain held-to-maturity securities until their maturity dates. The mark-to-market of securities, which were transferred from the category "Securities Available for Sale" to the category of "Securities Held to Maturity", in June 2015 and in December 2013, was maintained in the shareholders' equity and will be recognized in the results for the remaining term of these securities, according to Bacen Circular No. 3,068/01;
- (5) The number of days to maturity was based on the contractual maturity of the instruments, regardless of their accounting classification;
- (6) This column reflects book value after mark-to-market accounting in accordance with item (7), except for securities classified as securities held to maturity, which fair value is less than the original amortized cost by R\$1,328,973 thousand (higher than amortized cost value to the amount of R\$5,402 thousand in 2014);
- (7) The fair value of securities is determined based on the market price available at the end of the reporting period. If no market price quotation is available at the end of the reporting period, amounts are estimated based on the prices quoted by dealers, pricing models, quotation models or price quotations for instruments with similar characteristics. For investment funds, the original amortized cost reflects the fair value of the respective quotas;
- (8) Includes hedge for protection of assets and liabilities, denominated in or indexed to foreign currency, primarily, arising from foreign investments, eliminating the effects of exchange variation of these assets and liabilities. For a better analysis of these items, consider the net exposure (Note 6d II);
- (9) In March 2015, there was a modification in the calculation method of the market capitalization of debentures, using market parameters (Brazilian Association of Entities of the Financial and Capital Markets – Anbima); and
- (10) In the period ended December 31, 2015, there were losses through impairment in the amount of R\$135,850 thousand, related to the heading "Variable Income Securities", classified in the category

"Securities Available for Sale" (R\$598,087 thousand on December 31, 2014).

**d) Derivative financial instruments**

Bradesco carries out transactions involving derivative financial instruments, which are recorded in the statement of financial position or in off-balance-sheet accounts, to meet its own needs in managing its global exposure, as well as to meet its customer's requests, in order to manage their exposure. These operations involve a range of derivatives, including interest rate swaps, currency swaps, futures and options. Bradesco's risk management policy is based on the utilization of derivative financial instruments mainly to mitigate the risks from operations carried out by the Bank and its subsidiaries.

Securities classified as trading and available-for-sale, as well as derivative financial instruments, are recognized in the consolidated statement of financial position at their fair market value. Fair market value is generally based on quoted market prices or quotations for assets or liabilities with similar characteristics. Should market prices not be available, fair market values are based on dealer quotations, pricing models, discounted cash flows or similar techniques for which the determination of fair market value may require judgment or significant estimates by Management.

Quoted market prices are used to determine the fair market value of derivative financial instruments. The fair market value of swaps is determined by using discounted cash flow modeling techniques that use yield curves, reflecting adequate risk factors. The information to build yield curves is mainly obtained from the Securities, Commodities and Futures Exchange (BM&FBOVESPA) and the domestic and international secondary market. These yield curves are used to determine the fair market value of currency swaps, interest rate and other risk factor swaps.

The fair market value of forward and futures contracts is also determined based on market price quotations for derivatives traded at the exchange or using methodologies similar to those outlined for swaps. The fair market values of credit derivative instruments are determined based on market price quotations or from specialized entities. The fair market value of options is determined based on mathematical models, such as Black & Scholes, using yield curves, implied volatilities and the fair market value of corresponding assets. Current market prices are used to calculate volatility.

Derivative financial instruments in Brazil mainly refer to swaps and futures and are registered at the OTC Clearing House (Cetip) and BM&FBOVESPA.

## Financial Statements of the Prudential Conglomerate and Independent Auditor's Report

**Notes to the Financial Statements of the Prudential Conglomerate**

Operations involving forward contracts of interest rates, indexes and currencies are contracted by Management to hedge Bradesco's overall exposures and to meet customer needs.

Foreign derivative financial instruments refer to swap, forward, options, credit and futures operations and are mainly carried out at the stock exchanges in Chicago and New York, as well as the over-the-counter (OTC) markets.

**17) PROVISIONS, CONTINGENT ASSETS AND LIABILITIES AND LEGAL LIABILITIES – TAX AND SOCIAL SECURITY****a) Contingent assets**

Contingent assets are not recognized in the financial statements. However, there are ongoing proceedings where the chance of success is considered probable, such as: a) Social Integration Program (PIS), claiming to offset PIS against Gross Operating Income, paid under Decree-Laws No. 2,445/88 and No. 2,449/88, regarding the payment that exceeded the amount due under Supplementary Law No. 07/70 (PIS Repique); and b) other taxes, the legality and/or constitutionality of which is being challenged, where the decision may lead to reimbursement of amounts paid.

**b) Provisions classified as probable losses and legal obligations – tax and social security**

Organização Bradesco is a party to a number of labor, civil and tax lawsuits, arising from the normal course of business.

Management recorded provisions where, based on their opinion and that of their legal counsel, the nature of the lawsuit, similarity to previous lawsuits, complexity and the courts standing, the loss is deemed probable.

Management considers that the provision is sufficient to cover the future losses generated by the respective lawsuits.

Provisions related to legal obligations are maintained until the conclusion of the lawsuit, represented by judicial decisions with no further appeals or due to the statute of limitation.

#### **I - Labor claims**

These are claims brought by former employees and outsourced employees seeking indemnifications, most significantly for unpaid "overtime", pursuant to Article 224 of the Consolidation of Labor Laws (CLT). In proceedings in which a judicial deposit is used to guarantee the execution of the judgment, the labor provision is made considering the estimated loss of these deposits. For proceedings with similar characteristics and not judged, the provision is recorded based on the average calculated value of payments made for labor complaints settled in the past 12 months; and for proceedings originating from acquired banks, with unique characteristics, the calculation and assessment of the required balance is conducted periodically, based on the updated recent loss history.

Financial Statements of the Prudential Conglomerate and Independent Auditor's Report

***Notes to the Financial Statements of the Prudential Conglomerate***

Overtime is monitored by using electronic time cards and paid regularly during the employment contract and, accordingly, the claims filed by former employees do not represent significant amounts.

**II - Civil claims**

These are claims for pain and suffering and property damages, mainly relating to protests, returned checks, the inclusion of information about debtors in the credit restriction registry and the replacement of inflation adjustments excluded as a result of government economic plans. These lawsuits are individually controlled using a computer-based system and provisioned whenever the loss is deemed as probable, considering the opinion of Management and their legal counsel, the nature of the lawsuits, similarity with previous lawsuits, complexity and positioning of the courts.

Most of these lawsuits are brought to the Special Civil Court (JEC), in which the claims are limited to 40 times the minimum wage and do not have a significant impact on Organização Bradesco's financial position.

There are a significant number of legal claims pleading alleged differences in adjustment for inflation on savings account balances due to the implementation of economic plans that were part of the federal government's economic policy to reduce inflation in the '80s and '90s.

Although Bradesco complied with the law and regulation in force at the time, these lawsuits have been recorded in provisions, taking into consideration the claims where the Bank is the defendant and the perspective of loss, which is considered after the analysis of each demand, based on the current decision of the Superior Court of Justice (STJ).

Note that, regarding disputes relating to economic plans, the Federal Supreme Court (STF) suspended the prosecution of all lawsuits at the cognizance stage, until the Court issues a final decision on the right under litigation.

### III - Legal obligations – provision for tax risks

The Organização Bradesco is disputing the legality and constitutionality of certain taxes and contributions in court, for which provisions have been recorded in full, although there is a good chance of a favorable outcome, based on the opinion of Management and their legal counsel, The processing of these legal obligations and the provisions for cases for which the risk of loss is deemed as probable is regularly monitored in the legal court, During or after the conclusion of each case, a favorable outcome may arise for the Organization, resulting in the reversal of the related provisions.

The main cases are:

- PIS and Cofins – R\$2,088,742 thousand (R\$1,792,621 thousand in 2014): a request for authorization to calculate and pay PIS and Cofins based on effective billing, as set forth in Article 2 of Supplementary Law No, 70/91, removing from the calculation base the unconstitutional inclusion of other revenues other than those billed;
- IRPJ/CSLL on losses of credits – R\$1,880,905 thousand (R\$2,059,542 thousand in 2014): we are requesting to deduct from income tax and social contributions payable (IRPJ and CSLL, respectively) amounts of actual and definite loan losses related to unconditional discounts granted during collections, regardless of compliance with the terms and conditions provided for in Articles 9 to 14 of Law No, 9,430/96 that only apply to temporary losses;
- PIS – EC 17/97 - R\$233,597 thousand (R\$321,748 thousand in 2014): for the period from July 1997 to February 1998, request to calculate and pay Pis contributions as established by LC 07/70 (Pis Repique) and not as established by EC 17/97 (Pis on Gross Operating Income);

- Pension Contributions – R\$995,380 thousand (R\$463,071 thousand in 2014): official notifications related to the pension contributions on financial contributions in private pension plans, considered by the audit as compensatory sums subject to the incidence of such financial contributions and isolated fine for not withholding tax of the IRRF on the related financial contributions.

### c) Contingent liabilities classified as possible losses

The Organização Bradesco maintains a system to monitor all administrative and judicial proceedings in which the institution is plaintiff or defendant and, based on the opinion of legal counsel, classifies the lawsuits according to the expectation of loss. Case law trends are periodically analyzed and, if necessary, the related risk is reclassified. In this respect, contingent lawsuits deemed to have a possible risk of loss are not recorded as a liability in the financial statements. The main proceedings in this category are the following: a) leasing companies' Tax on Services of any Nature (ISSQN), total lawsuits correspond to R\$1,910,629 thousand (R\$1,840,272 thousand in 2014) which relates to the municipal tax demands from municipalities other than those in which the company is located and where, under law, tax is collected; b) 2006-2010 income tax and social contribution, relating to goodwill amortization being disallowed on the acquisition of investments, for the amount of R\$1,777,707 thousand (R\$991,924 thousand in 2014); c) IRPJ and CSLL deficiency notice relating to the disallowance of loan loss deductions, for the amount of R\$1,200,403 thousand (R\$1,034,018 thousand in 2014); and d) IRPJ and CSLL deficiency note relating to disallowance of exclusions of revenues from the mark-to-market of securities from 2007 to 2010, and differences in depreciation and operating expenses and income, amounting to R\$908,915 thousand (R\$1,226,665 thousand in 2014).

**a) Capital Management**

The primary objective of the Capital Management structure is to provide the necessary conditions for a continuous process of capital assessment, monitoring and control, contributing to the achievement of the Organization's strategic objectives. It considers the current business environment and a prospective and consistent vision for capital adequacy planning. This structure is composed of the Statutory, Non-Statutory and Executive Committees that assist the Board of Directors and the Board of Executive Officers in decision making.

The internal process of assessing capital adequacy is carried out so as to ensure that the Organization has a Reference Equity base composition to support the development of activities and provide sufficient protection against risks, whether in normal or in extreme market conditions, as well as meeting managerial and regulatory requirements in relation to capital management.

### **31) EMPLOYEE BENEFITS**

Bradesco and its subsidiaries sponsor a private defined contribution pension for employees and directors, that allows financial resources to be accumulated by participants throughout their careers by means of employee and employer contributions and invested in an Exclusive Investment Fund (FIE). The Plan is managed by Bradesco Vida e Previdência S.A. and BRAM – Bradesco Asset Management S.A. DTVM is responsible for the financial management of the FIEs funds.

The Supplementary Pension Plan counts on contributions from employees and administrators of Bradesco and its subsidiaries equivalent to at least 4% of the salary by employees and 5% of the salary, plus the percentage allocated to covers of risk benefits (invalidity and death), by the company. Actuarial obligations of the defined contribution plan are fully covered by the plan assets of the corresponding FIE. In addition to the plan, in 2001, participants who chose to migrate from the defined benefit plan are guaranteed a proportional deferred benefit, corresponding to their accumulated rights in that plan. For the active participants, retirees and pensioners of the defined benefit plan, in extinction, the present value of the actuarial obligations of the plan is completely secured by collateral assets.
