**Summarized Analysis of Adjusted Income**

**Adjusted Net Income and Profitability**

The return on the Average Adjusted Shareholders' Equity (ROAE), which is calculated on a linear basis, registered 17.4% in June 2016. The adjusted net income decreased 5.7% in the comparative study between semesters, impacted, largely, by the increase in allowance for loan losses expenses, as a result of: (i) the leveling of provisioning for certain corporate client operations, particularly a specific case, whose downgraded rating had an impact of R\$1,201 million; and (ii) the increase in delinquency due to the escalating economic slowdown.

The main events that affected adjusted net income are detailed below.

Adjusted net income reached R\$4,161 million in the second quarter of 2016, an increase of R\$48 million, or 1.2%, compared to the previous quarter, mainly due to: (i) the decrease in allowance for loan losses expenses due to the impact produced by the downgraded rating in the particular case of a corporate client, whose effect in the second quarter of 2016 was R\$365 million whereas in the first quarter of 2016 it was R\$836 million; (ii) the increase in (a) fee and commission income and (b) the "interest-earning portion of the NII" and the "non-interest-earning portion of the NII", partly offset by: (iii) a decrease in the income of insurance premiums, pension and capitalization bonds; (iv) higher other net operating expenses; and (v) higher personnel and administrative expenses.

In the comparison between the first semester of 2016 and the same period in the previous year, the adjusted net income decreased R\$504 million, which reflects an increase in (i) allowance for loan losses expenses, for the reasons detailed above; and (ii) personnel and administrative expenses. However, it's important to highlight the increase in: (i) the interest-earning portion of the NII; (ii) fee and

Shareholders' Equity totaled R\$96,358 million in June 2016, up 10.8% over June 2015. Based on the Prudential Conglomerate, the Basel III Ratio was calculated at 17.7%, 13.7% of which is classified as Common Equity/ Tier I.

Total Assets registered R\$1.105 trillion in June 2016, a 7.3% increase over June 2015, driven by the increased turnover. Return on Average Assets (ROAA) reached 1.5%, calculated on a linear basis.

Press Release

**Summarized Analysis of Adjusted Income**

The 12-month ER<sup>(1)</sup> recorded 37.4%, a 0.2 p.p. increase as compared with the previous quarter, partially impacted by: (i) higher operating expenses, mainly administrative expenses, originated from: (a) advertising and marketing; and (b) outsourced services; partially offset by: (ii) the growth of (a) the fee and commission income, originated by the increase in the volume of business and services provided; and (b) the net interest income. In the annual comparison, such indicator showed an improvement of 0.5 p.p. mainly due to the increase in (i) the interest-earning portion of the NII; (ii) fee and commission income; and (iii) income from Insurance Premiums, Pension Plans and Capitalization Bonds, net of technical reserves, retained claims and others; offset, largely, by: (iv) the increase in operating expenses during the period.

In the ER – quarterly, the indicator was partially impacted by: (i) higher administrative expenses, largely, due to the same reason detailed above; (ii) lower income from Insurance Premiums, Pension Plans and Capitalization Bonds, net of technical reserves, retained claims and others; (iii) higher net operating expenses of other operating revenues; and offset by: (iv) the growth of the fee and commission income, originated by the increase in the volume of business and services provided.

The risk adjusted ER reflects the impact of the risk associated with loan operations<sup>(2)</sup> and reached 48.1%, impacted primarily by the leveling of provisions for corporate clients carried out in the first semester of 2016.

(1)  $ER = (\text{Personnel Expenses} - \text{Employee Profit Sharing} + \text{Administrative Expenses}) / (\text{Net Interest Income} + \text{Fee and Commission Income} + \text{Income from Insurance} + \text{Equity in the Earnings (Losses) of Unconsolidated Companies} + \text{Other Operating Income} - \text{Other Operating Expenses})$ ; and

(2) Including ALL expenses, adjusted for discounts granted, loan recovery and sale of foreclosed assets, among others.

It is important to mention that the ER performance reflects the strategy of sustainable growth, which includes, among other things, (i) the availability of appropriate products and services for clients through the segmentation of the base and of digital channels, (ii) the optimization of points of service, and (iii) the strict control of operating expenses, arising from the actions of the Efficiency Committee and of investments in Information Technology, to the amount of R\$2.993 billion in the first semester of 2016.

Press Release**Summarized Analysis of Adjusted Income****NII (Net Interest Income)**

In the quarterly comparison, the R\$70 million, or 0.5%, increase was, mainly, due to: (i) the higher interest-earning portion of the NII, to the value of R\$49 million, with emphasis on “Securities/ Other”, a result of an improved management in investment resources and funding operations; and (ii) non-interest-earning portion of the NII, in the amount of R\$21 million.

In the comparison between the first semester of 2016 and the same period in the previous year, net interest income increased by R\$2,714 million, or 10.0%, due to: (i) a higher interest-earning portion of the NII, to the amount of R\$2,829 million, particularly in “Credit Intermediation”; and offset by: (ii) the non-interest-earning portion of the NII, to the amount of R\$115 million.

**Interest-Earning Portion of the NII – Average Rates in the last 12 months**

**Summarized Analysis of Adjusted Income**

**Expanded Loan Portfolio<sup>(1)</sup>**

In June 2016, the expanded loan portfolio of Bradesco totaled R\$447.5 billion, a 3.4% decrease in comparison with the previous quarter, impacted, partially, by the exchange rate variation. Micro, Small and Medium-sized Companies and Large Companies presented a reduction of 5.7% and 5.2%, respectively, while the loans to individuals increased 0.8% during the period.

In relation to the last 12 months, the portfolio also decreased 3.4%. The Legal Entities registered a decline of 6.7%, impacted mainly by the segment of Micro, Small and Medium-sized Companies, but credits allocated to Individuals grew 3.8%.

For Individuals, the products that had the strongest growth in the last 12 months were: (i) real estate financing; and (ii) credit card. For the Legal Entity, the notable products were: (i) export financing; and (ii) operations bearing credit risk – commercial portfolio (debentures and promissory notes).

(1) In addition to Bacen loan portfolio, it includes sureties, guarantees, letters of credit, advances of credit card receivables, debentures, promissory notes, co-obligation in mortgage-backed receivables, and farm loans.

For more information, see Chapter 2 of this Report.

**Allowance for Loan Losses (ALL) Expenses <sup>(1)</sup>**

In the first semester of 2016, allowance for loan losses expenses totaled R\$10,472 million, registering a variation of 46.9%, or R\$3,342 million, over the same period of the previous year, mainly impacted by: (i) the levelling of provisions for certain corporate clients, particularly a specific case, whose downgraded rating had an impact of R\$1,201 million in the first semester (this operation is 100% provisioned); and (ii) by the higher delinquency rate, mainly due to the

It is important to note the balance in credit operations – the Bacen concept, presented a 3.7% decrease in the annual comparison and a 3.4% decrease in the quarterly comparison.

The effect in the growth of delinquency rates was mitigated by the reinforcement of the credit granting policies, quality of guarantees, as well as the improvement of the credit recovery processes.

escalating economic slowdown in the period. In the second quarter of 2016, this expenditure was reduced by 7.8%, or R\$424 million, primarily due to the lower impact produced by the specific case, stated above, the effect of which, during the second quarter of 2016, was of R\$365 million and, in the first quarter of 2016, in which it was R\$836 million. For more information, see Chapter 2 of this Report.

**Delinquency Ratio<sup>(1) (2)</sup>**

**Delinquency over 90 days**

The total delinquency ratio, which refers to operations that are over 90 days past due, maintained its increase in the quarter, mainly due: (i) to the continuity of the unfavorable economic situation, which impacted the quality of the credit portfolio, mainly for the Individual and Micro, Small and Medium-sized Companies; and (ii) by the reduction of the credit portfolio for both segments of Legal Entities, in the second quarter of 2016.

**Delinquency from 15 to 90 days**

In the quarter, short-term delinquency, including operations between 15 and 90 days overdue presented growth due to a specific client from the Large Companies section, as mentioned beforehand.

We highlight the positive performance of the Individual portfolio.

- (1) As defined by Bacen; and
- (2) Portfolios were not sold.

**Provisioning, Delinquency, ALL and Effective Coverage Ratio**

The assertiveness of the provisioning criteria adopted must be mentioned, which is proven by: (i) analyzing historical data on recorded allowances for loan losses; and (ii) effective losses in the subsequent 12-month period. When analyzed in terms of net loss of recovery, for an existing provision of 6.7% of the portfolio<sup>(1)</sup> in June 2015, the net loss in the subsequent 12 months was 3.3%, this represents an effective coverage of 200.6%.

It should be highlighted that, considering the losses expected for one year (dotted part), which has a high correlation with E-H non-performing ratings, there is an effective coverage of 233.9% for June 2016, which compares well with excess ALL.

Press Release

**Summarized Analysis of Adjusted Income**

**Income from Insurance, Pension Plans and Capitalization Bonds**

In the second quarter of 2016, in comparison with the previous quarter, revenue showed an increase of 13.6%, driven by the "Life and Pension", "Auto/RE", "Capitalization" and "Health" products, which grew by 22.0%, 16.6%, 6.1% and 4.2%, respectively.

In the first semester of 2016, this section registered an increase of 6.9% in comparison with the same period of the previous year, influenced by the "Health" and "Capitalization" products, which increased by 16.7% and 4.0%, respectively.

Net earnings for the second quarter of 2016 were 15.7% lower than the results presented in the previous quarter, largely due to: (i) the introduction of a supplemental coverage provision, whose methodology of calculation takes into account the discount of the projected cash flow of the insurance contracts in force, based on the interest rates' fixed-term structure (ETTJ). These curves present approximately 1.0 p.p. of variation between the dates of the calculation base, resulting in an increase of R\$144 million, the SCP (Supplemental Coverage Provision), with the other compensations, net of tax, of R\$79.2 million; (ii) the increase of 4.7 p.p. in the claims ratio index; partially offset by: (iii) the increase of 13.6% in revenue; (iv) by the maintenance of the commercialization index; (v) by the improvement in the administrative efficiency index; and (vi) by the increase in financial and equity earnings.

**Minimum Capital Required – Grupo Bradesco Seguros**

According to CNSP Resolution No. 321/15, corporations should adjust shareholder's equity

Net income for the first semester of 2016 remained in line with the earnings presented in the same semester of the previous year, largely due to: (i) the turnover growth of 6.9%; (ii) maintenance of the commercialization index and of the administrative efficiency index, considering the collective bargaining of the category in January 2016; (iii) the increase in financial and equity results, offset by (iv) the constitution of a supplemental coverage provision, as previously mentioned in the preceding paragraph (v) by the increase of 3.0 p.p. in the claims ratio index; and (vi) by the increase in the Social Contribution rate (CSLL).

The capital adjustment and management process is continuously monitored and aims to ensure that Grupo Bradesco Seguros keeps a solid capital base to support the development of activities and cope with the risks in any market situation, in compliance

**Summarized Analysis of Adjusted Income**

**Fee and Commission Income**

In the comparison between the first semester of 2016 and the same period of the previous year, the increase of R\$1,167 million, or 9.8%, in the revenues of provision of services, was mainly due to: (i) an increase in the volume of operations arising from continuous investment in service channels and in technology; and (ii) an advance in the client segmentation process improving the ability to offer products and services. It must be noted that the sources that have significantly contributed to this result derived from: (i) an increase in checking account income, mainly due to an improvement in the client segmentation process; (ii) the good performance of the card business, as a result of (a) the increase in financial volume traded; and (b) the highest volume of transactions performed; and increase in revenue in the areas of: (iii) fund management; (iv) consortium management; (v) underwriting / financial advisory services; and (vi) custody and brokerage services.

In the second quarter of 2016, fee and commission income totaled R\$6,624 million, showing an increase of R\$219 million, or 3.4%, in comparison with the previous quarter, primarily due to the increase in the volume of operations and the higher number of business days, with emphasis on the performance of revenue generated with: (i) loan operations, particularly income from collaterals; (ii) checking accounts; (iii) underwriting / financial advisory services; (iv) cards; (v) fund management; and (vi) custody and brokerage services.

**Personnel Expenses**

In the comparison between the first semester of 2016 and the same period of the previous year, the increase of R\$573 million, or 8.1%, in personnel expenses, a figure below the levels of salary readjustments deriving from the collective agreement, is mainly due to the variations in the following expenses: (i) "structural portion" due to the increase in expenses with payroll, social charges and benefits, impacted by higher salaries, in accordance with the 2015 collective bargaining agreement; and (ii) "non-structural", mainly due to higher expenses with (a) costs deriving from the termination of employment contracts and (b) profit sharing between management and employees (EPS).

In the second quarter of 2016, the increase of R\$128 million, or 3.4%, compared to the previous quarter is mainly composed of the variation of R\$137 million, or 19.0%, in the "non-structural" portion, mainly due to higher expenses with: (i) costs deriving from the termination of employment contracts; and (ii) provision for labor lawsuits.

Note: Structural Expenses = Salaries + Social Charges + Benefits + Pension Plans.

Non-Structural Expenses = Employee and Management Profit Sharing + Training + Labor Provision + Costs with termination of employment contracts.

**Administrative Expenses**

In the comparison between the first semester of 2016 and the same period of the previous year, the 10.9%, or R\$821 million increase in administrative expenses, was primarily due to an increase in expenses originated from: (i) higher business volume in the period; (ii) the effect of advertising and marketing actions; (iii) contractual adjustments; and offset by: (iv) the optimization of service channels.

In the second quarter of 2016, the increase of 3.7%, or R\$154 million, in administrative expenses over the previous quarter, was mainly due to: the increase in the business volume occurred in the period, consequently, impacting in higher expenses with: (i) outsourced services; (ii) advertising and marketing; (iii) asset maintenance and conservation; and (iv) communications; being offset, in part, by: (v) less expenses involving data processing, affected by the devaluation of the dollar in the period.

(1) The decrease as of March 2015 is related to: (i) the migration of “External ATM Network – Bradesco” to “Banco24Horas Network”; (ii) the deactivation of ATMs from “Banco24Horas Network”; and (iii) the decrease of Bradesco Expresso correspondents.

**Other Operating Income and Expenses**

In the first semester of 2016, other net operating expenses totaled R\$3,684 million, a R\$166 million increase, or 4.7%, over the same period of the previous year, primarily due to: (i) the constitution of the expense allowance for tax contingency, net of reversal, in the first half of 2016, in the amount of R\$485 million; (ii) the constitution of the expense allowance for contingent liabilities, originating from the obligation through assignment of claims (FCVS), in the first half of 2016, in the amount of R\$200 million; (iii) increased expenditure on civil provisions; offset by: (iv) the constitution of the provision expense for tax contingency, in the first semester of 2015, in the amount of R\$571 million.

In the comparison between the second quarter of 2016 and the previous quarter, other operating expenses increased R\$346 million, or 20.7%, partially due to: (i) the constitution of the expense allowance for tax contingency, net of reversal, in the first half of 2016, in the amount of R\$485 million; (ii) the constitution of the expense allowance for contingent liabilities, originating from the obligation through assignment of claims (FCVS), in the first half of 2016, in the amount of R\$200 million; offset by: (iii) lower operating expenses related to activities of cards and insurance, in the period.

**Summarized Analysis of Adjusted Income**

**Income Tax and Social Contribution**

In the comparison between the first semester of 2016 and the same period of the previous year, the 8.5%, or R\$394 million, decrease is related to: (i) an increase in provisioning/payment of interest on shareholder's equity, due to the increase in the Long-Term Interest Rate (TJLP) in the period (from 5.7% in the first semester of 2015 to 7.5% in the first semester of 2016); (ii) a lower taxable income, being partially offset by: (iii) the increase in the Social Contribution (CSLL) rate.

Income tax and social contribution expenses in the quarterly comparison showed a decrease of 16.9%, or R\$390 million, mainly due to the reduction of the taxable income, impacted by higher nontaxable income.

**Unrealized Gains**

Unrealized gains totaled R\$18,175 million at the end of the second quarter of 2016, an R\$5,078 million increase over the previous quarter. Such variation was mainly due to the market valuation in: (i) investments, particularly being the shares of Cielo, which appreciated 16.2%; and (ii) securities indexed to fixed income.

**Capital Ratios - Basel III**

**Basel Ratio**

In June 2016, the Capital of the Prudential Conglomerate stood at R\$102,548 million, against risk-weighted assets totaling R\$580,568 million. The Basel Ratio showed an increase of 0.8 p.p., from 16.9%, in March 2016, to 17.7%, in June 2016, and the Common Equity Tier I ratio from 12.9%, in March 2016, to 13.7%, in June 2016.

The table below shows the main events that impacted the Common Equity Tier I ratio in this quarter:

Additionally, it is worth stating that in the second quarter of 2016, the Brazilian Central Bank authorized the Subordinated Letters of Credit to compose Tier II, whose restated total, on June 30, 2016, reached R\$1,107 million.

**Full Impact – Basel III**

We calculated a Basel III simulation, considering some of the main future adjustments, which include:

(i) deductions of 100% according to the schedule of phase-in arrangements; (ii) the allocation of resources, obtained via payment of dividends, by our Insurance Group; (iii) the use of tax credits; (iv) the decrease in the market and operational risk multiplier (early adoption), from 9.875% to 8%; and (v) the impact of the acquisition of HSBC Brasil, reaching a Common Equity ratio of 11.3%, which, added to funding obtained via subordinated debt, may reach a Common Equity Tier I ratio of approximately 12.8% at the end of 2018.

- (1) Published (Schedule 60%);
- (2) Effect of the full impact. Includes the allocation of resources, obtained via payment of dividends, by the Insurance Group;
- (3) Considers the decrease in the market and operational risks multiplier (early adoption), from 9.875% to 8% in 2019;
- (4) Refers to the minimum required. It is important to highlight that Bacen fixed at 0% the tranche of countercyclical capital required, which could reach up to 2.5% in 2019; and
- (5) Considering a possible issuance of additional capital by 2018, according to the Management, depending on market conditions.

**Economic Environment**

The risks related to the international environment remain present, however it can be said that there is a certain moderation in them. On the one hand the loss of the Chinese foreign exchange reserves stagnated, which had brought uncertainties regarding the economic conditions of this country in the first quarter. On the other hand, it is worth acknowledging the continuity of timely actions by the main central banks worldwide, mainly, the European Central Bank (ECB), Bank of Japan and the Federal Reserve (Fed). The Brexit episode can contribute to the continuity of these actions, bearing in mind that its main consequence will be the moderation of growth in the UK and Europe.

In the Euro area, the ECB, in addition to expanding its balance sheet with the purchase of sovereign bonds, added assets from private companies to its purchase program. In the same direction, the Bank of Japan, as well as adopting negative nominal interest rates, continues to be committed to expanding its stimulus package. The Fed, in turn, indicated a more piecemeal posture to the rhythm of monetary normalization, in response to the moderation of economic activity. As a result, the dollar lost strength in comparison with other currencies and the price of commodities showed recovery, with emphasis on the prices of agriculture, which reacted more specifically to the prospects of an unfavorable climate and the possibility of a smaller harvest in the USA.

With regards to the domestic economy we highlight the increasing confidence of consumers and business, favoring the likelihood of economic stabilization and potential recovery in subsequent quarters. The labor market's performance is notable, with a reduction in the rate of lay-offs of formal jobs.

However, in the short term the slowdown in economic activity continues to hinder ongoing fiscal adjustment. Thus, actions to ensure fiscal sustainability in the medium term, and progress on the reform agenda have become even more

With the macroeconomic adjustments made, additional actions of a structural nature that can affect potential future growth continue to be essential. The constant search for excellence in education is Brazil's front line in its struggle to become more competitive and to expedite its efforts to upgrade infrastructure. It should be remembered that, in the long term, the main source of economic growth is productivity, a theme that is even more relevant in a global context characterized by increased competition and an economic growth that is still fragile.

Investments will tend to play an increasingly important role in the composition of growth in coming years, especially in the process of the recovery of economic activity. This would benefit more from greater participation of the capital market in financing these projects. At the same time, despite the cyclical retraction of the consumer market in some sectors, structurally, the potential of the domestic demand for goods and services is not exhausted.

Bradesco maintains a positive outlook towards Brazil, with favorable perspectives for its operating sections. Credit volume is evolving at sustainable and risk-compatible rates, even when faced with a cyclical upswing in delinquency rates, due to the reduction of activity and the increase of the employment rate this year. The circumstances are still very promising for Brazilian banking and insurance sectors in the medium and long term.

relevant. Efforts in this direction are necessary to maintain the economic predictability and to increase families' and entrepreneurs' trust, enabling the trend of increases in actual income and productive investments to resume. At the same time, moderation in the economy will allow the inflation to reach the set target more quickly, enabling the conditions to initiate a process of flexibility in monetary policy this year.

## FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
