FOR IMMEDIATE RELEASE - São Paulo, November 8, 2016 – Gafisa S.A. (Bovespa: GFS3; NYSE: GFA), one of Brazil's leading homebuilders, today reported financial results for the third quarter ended September 30, 2016.

GAFISA RELEASES 3Q16 RESULTS

MANAGEMENT COMMENTS AND HIGHLIGHTS

Conditions in the real estate sector remain impacted by Brazil's recessive environment. The combination of the political crisis experienced since 2015 and economic contraction has had a severe impact on the Brazilian real estate market. Gafisa, due to the diversification of its operations, serving both the upper-middle income segment and the low-income segment, experiences different realities that have allowed us to partially mitigate the negative effects of this period.

Once again, the Gafisa and Tenda segments faced substantially different market environments throughout the quarter. The Gafisa segment, which continues to be impacted by a weak macroeconomic environment, remains committed to improved operational and business performance by searching for the adequate development of new projects. The Tenda segment, conversely, took advantage of the low-income market's resilience and continued to expand the scale of its business model, despite macroeconomic conditions.

In keeping with more balanced supply and demand dynamics in the 3Q16, the Gafisa segment advanced the development of new projects and launched four projects/phases in the city of São Paulo, accounting for

(1) Including 14,160,533 treasury shares; R\$411.0 million in PSV, ending the first nine months with
(2) Until September 30, 2016 R\$621.4 million in new projects launched.

We would like to point out the solid commercial performance of these launches, whose speed of sales reached 30.7% in the period, which may signal a slight improvement in consumer confidence.

We highlight in particular two new products: MOOV Vila Prudente and MOOV Freguesia do Ó, whose average speed of sales reached 51.6%, well above the industry average in recent years. It is worth mentioning that this trend is also evident in this quarter's launches. Such evolution in the sales speed of launches attests not only a gradual increase in consumer confidence, but also the Company's success in improving its operating processes in recent years, with improvements in the areas of development, products, sales and construction.

Despite prevailing political and economic headwinds in the 3Q16, the segment achieved its best quarterly operating performance of the year. In addition to a 39.1% q-o-q increase in gross sales to R\$364.4 million, another important driver of 3Q results was the reduction in the volume of dissolutions.

As a result of these factors, 3Q16 net pre-sales reached R\$258.3 million, up 99.5% from the previous quarter, and accounting for 56.8% of total net pre-sales in 9M16.

Even taking into consideration the solid performance of projects launched in the period, the Gafisa segment's SoS remains highly impacted by current market's challenges, reflected in the low volume of net sales of some inventory products. In the 3Q16, SoS reached 11.5%, higher when compared to 2015. SoS in the last twelve months reached 26.1%. The volume of dissolutions in 3Q16, while slightly improved, continues to reflect the weak economic scenario and high volume of deliveries since the end of 2015. In 3Q16, the segment delivered R\$935.7 million in PSV, totaling R\$1.5 billion in delivered projects in 9M16.

The Gafisa segment ended 3Q16 with 19 projects under construction, all on schedule and within the delivery timeframe, reflecting Gafisa's commitment to customers. The transfer volume reached R\$126.0 million in 3Q16 and R\$378.7 million in

Despite the first signs of stability in the market and the Company's improved operating performance in the period, this improvement is not yet reflected in our financial results, which are still under pressure from the difficulty of selling some projects in inventory, and also from the effect of the long recession on the pricing of products. Continued recovery in the political and economic scenario over the next quarters, combined with the consequent upturn in the real estate market, should allow for a gradual recovery in the Company's financial results over the coming periods.

In this regard, we will maintain a conservative approach, balancing the placement of new products on the market and prioritizing those with higher liquidity, so as to achieve an appropriate level of sales and profitability.

The Tenda low-income segment continues to demonstrate resilient performance, benefiting consolidated results in the period. Accordingly, the segment continues to expand the scale of its new business model.

In 3Q16, Tenda further expanded the size of its operations, with launches totaling R\$325.4 million. The launches were comprised of 9 projects/phases, in the states of São Paulo, Rio de Janeiro, Rio Grande do Sul, Pernambuco and Bahia. Launches accounted for 70.2% of the Tenda segment's total sales and 38.4% of the segment's total in 9M16.

The Tenda segment's SoS reached 18.8%, lower than previous periods due to a higher volume of dissolutions.

3Q16 gross sales totaled R\$318.7 million and dissolutions reached 25.1% of gross sales, resulting in net pre-sales of R\$238.7 million. In the period, dissolutions were impacted by seasonality related to projects sold in "Feirão da Caixa" (2Q16), the introduction of in-person interviews in bank branches as an additional step in the process of

9M16, showing an appropriate level of operational control and efficiency. Despite current credit restrictions, Gafisa maintains a strong relationship in partnering with banks for the transfer process.

The Company has maintained a focus on the sale of remaining units. As a result, 43.2% of net sales in 3Q16 and 58.0% in 9M16 were for products launched prior to current year. Considering the higher volume of dissolutions related to legacy projects, net sales were concentrated in more recent projects, impacting the Gafisa segment's revenues.

analyzing and granting credit by financial agents, which led to annulments of already preapproved customers and the review of Tenda's unilateral dissolution process for sales not transferred after a period exceeding three months as the prior process allowed for some

units to remain beyond the deadline deemed appropriate by the Company. We estimate that this last factor should result in a temporary increase in the level of company dissolutions before returning to the average levels that we expect.

Since 2013, when Tenda started its new model operations, the segment has launched 81 projects, representing a total of R\$3.0 billion in PSV. Of this total, Tenda has delivered R\$1.4 billion, comprised of 42 projects/phases. Notably, all projects related to the first year of new model operations (2013) have been completed and delivered on schedule. In relation to the 2014 projects, only one project/phase of 14 projects launched is still awaiting delivery. In 3Q16, the Tenda segment delivered 10 projects/phases, corresponding to 1,811 units, and representing R\$265.1 million in PSV. In 9M16, the Tenda segment delivered 23 projects/phases, comprising 4,170 units and R\$602.2 million in PSV.

The Tenda segment remains focused on increasing its scale by growing launches and implementing strategies designed to ensure a strong sales pace. The consistency of recent results from new model projects reaffirms management's confidence in the 2016 business plan.

On a consolidated basis, Gafisa and Tenda launched R\$736.4 million in 3Q16, ending the first nine months with R\$1.6 billion in new projects. The Gafisa segment accounted for 56% of 3Q16 launches while Tenda accounted for the remaining 44%. Third quarter 2016 net pre-sales totaled R\$497.0 million, an increase of 9.4% q-o-q., reaching R\$1.3 billion in the year.

Consolidated adjusted gross profit totaled R\$142.0 million with a gross margin of 26.4%, which remained impacted by challenges in the upper-middle income market. In 9M16, adjusted gross profit totaled R\$390.5 million, with a gross margin of 27.5%.

The Company remains focused on a stabilized cost and expense structure. Selling, general and administrative expenses were R\$49.5 million in 3Q16, slightly down y-o-y, reflecting the Company's efforts to more efficiently respond to adjustments and movements of the real estate market. In 9M16, selling, general and administrative expenses dropped by 5.2%.

Gafisa reported a 3Q16 consolidated net loss of R\$72.6 million, compared to a loss of R\$38.4 million recorded in 2Q16 and net income of R\$13.5 million in 3Q15.

As a result of the better environment for the low income segment, Tenda has achieved its best quarterly profit since 2012, as a result of the maintenance of a more efficient operating performance and the scale gains over the last quarters. Gafisa, in turn, remains impacted by the delicate market moment of the upper income segment.

At the end of the period, the Net Debt/Shareholders' Equity ratio reached 49.3%, a slight increase compared to 2Q16, although in line with the Company's business plan. Excluding project finance, the Net Debt/Shareholders' Equity ratio was negative at 8.1% .

Consolidated operating cash generation reached R\$97.4 million in the quarter and R\$232.9 million in 9M16. Net cash generation totaled R\$13.0 million in 3Q16 and R\$8.8 million YTD.

We expect to maintain a conservative approach in the last quarter of 2016 as we seek to attain adequate sales and profitability levels. The Gafisa segment, through its improved operational performance, seeks to overcome this period of economic weakness. The Tenda segment, guided by resilience in the low-income segment and backed by positive results from new model projects.

The Company continues to advance guided by capital discipline, its profitability goals, and value creation for all shareholders.

Despite the strong performance of projects launched in the quarter, ongoing recessive scenario in Brazil keeps negatively impacting Gafisa segment's financial results in 3Q16, in particular the level of inventory gross sales, volume of dissolutions and prices of the inventory projects. Despite a greater share of projects launched before 2015 in the 3Q16 gross sales mix (48.2% of gross sales), the high volume of dissolutions related to these projects (96.3% of dissolutions in the quarter) ended up concentrating part of the net volume of sales from inventory of more recent projects. Thus, revenues in the quarter were once again impacted by the following items: (i) lower volume of net sales in the period; and (ii) higher concentration of net sales in projects with slower evolution of work in progress.

Reflecting the operational variables mentioned above, the Gafisa segment ended 3Q16 with a gross margin of 0.4% compared to 27.0% in 3Q15 and 12.3% in 2Q16. The result was impacted by the following effects: (i) R\$16.3 million non-recurrent loss from the sale of a land parcel with potential development directed to the commercial segment; (ii) R\$9.5 million referring to a higher provision for a guarantee due to the increased volume of projects delivered in 3Q16; (iii) pricing adjustments on the sale of remaining units in response to current market prices, and; (iv) accounting effect related to higher appropriation of financial costs of recently launched projects with good sales speed, which suspension clause (of projects that are no longer subject to restriction) occurred in the period. Adjusted gross margin reached 17.6% in the quarter and 22.8% in the last 9 months.

Excluding the non-recurring effect of the sale of the land parcel mentioned above, Gafisa segment's gross margin would have reached 6.4% in the 3Q16, while adjusted gross margin would be 23.7% in 3Q16 and 25.3% in 9M16.

Net Income

Net loss for the period was R\$95.7 million compared to a loss of R\$47.1 million in 2Q16 and a profit of R\$1.7 million in 3Q15. Excluding the net loss from Alphaville equity income, which totaled R\$9.2 million in the quarter, the Gafisa segment reported a 3Q16 net loss of R\$86.5 million, compared to a net loss of R\$35.1 million in 2Q16 and net profit of R\$0.5 million in 3Q15. In 9M16, the Gafisa segment posted a net loss of R\$190.5 million.

As previously stated, this was due to the following factors: (i) maintenance of lower level of revenues; (ii) lower gross margin level due to the factors detailed above; and (iii) the negative contribution of AUSA equity income. Alphaville performance is being affected by the Company's lower operating volumes in 2016 (launches and sales), with direct reflect in the quarter's revenue level, besides the worsened net financial result, impacted by the higher cost of debt, compared to the previous year. In 9M16, Gafisa segment net loss including Alphaville equity income reached R\$200.7 million.

During 3Q16, Tenda continued to increase the scale its operations, supported by sales and launch performance, thus enabling a solid level of net revenue.

3Q16 adjusted gross margin was up 35.0%, compared with 28.0% in 2Q16 and 32.1% in 3Q15, due to the accounting reclassification of R\$11.1 million in the balance of provision for co-obligation of interest rates on construction works owed by customers transferred and charged by financial institutions during period of works, which is now accounted for under Financial Result. Excluding this impact, the adjusted gross margin would have been 32.2% in 3Q16.

Selling, general and administrative expenses ended the 9M16 at R\$127.2 million, 15.4% higher than 9M15, but in line with the expansion of Tenda's operations; launch volumes increased by 23.2% in the period, compared to 9M15.

Adjusted EBITDA totaled R\$39.7 million, with adjusted EBITDA margin of 14.7% in 3Q16. Adjusted EBITDA increased from R\$24.6 million in 3Q15 and R\$21.9 million in 2Q16. Year-to-date, adjusted EBITDA reached R\$85.0 million with an adjusted EBITDA margin of 11.1%.

Net Income

Tenda's 3Q16 net income was R\$ 23.0 million, up from net income of R\$11.8 million recorded in 3Q15 and R\$8.6 million in 2Q16. In 9M16, net income was R\$36.5 million.

The 3Q16 results are attributable to: (i) higher volume of revenues, (ii) higher gross margin level and adjusted EBITDA.

GAFISA SEGMENT

Focuses on residential developments within the upper, upper-middle, and middle-income segments, with average unit prices above R\$250,000.00.

Operating Results | Launches and Pre-Sales

Third quarter launches totaled R\$411.0 million and consisted of 4 projects/phases in São Paulo. The sales speed of these launches reached 30.7%. In 9M16, Gafisa segment launches reached R\$621.4 million or 39.1% of consolidated launches.

Third quarter gross pre-sales in the Gafisa segment totaled R\$364.4 million. Dissolutions in 3Q16 were R\$106.1 million, yielding total net pre-sales of R\$258.3 million, up 99.5% q-o-q and 4.3% y-o-y. Out of total dissolutions in the quarter, 24% were related to corporate projects, while residential dissolutions corresponded to the remaining 76%. In 9M16, net pre-sales totaled R\$454.7 million.

Despite continued headwinds in Brazil's political and economic scenario, and the resulting effects on inventory pricing, the segment achieved an improved sales performance in 3Q16 relative to the previous quarters. The improved performance of sales from launches reflects more efficient sales execution processes and new product development, and may signal a marginal improvement in consumer confidence. In addition to improved sales results, with gross sales increasing 39.1% versus 2Q16 to R\$364.4 million, another positive trend in 3Q16 was the decrease in the volume of dissolutions y-o-y and q-o-q.

The Company continues to focus its efforts on the sale of remaining units. As a result, 43.2% of net sales for the quarter were related to projects with launches before 2016. Dissolutions, in turn, were concentrated in units launched prior to 2014, which have higher work evolution, and accordingly, an increased contribution to revenue and margins.

Sales over Supply (SoS)

The Gafisa segment's SoS for the last twelve months reached 26.1% compared to 29.6% in the same period last year. In the 3Q16, SoS was 11.5% compared to 6.3% in 2Q16 and 11.0% in 3Q15.

Dissolutions

The macroeconomic uncertainty observed in 2016 and the recession have directly impacted consumer confidence and, accordingly, the level of gross sales and dissolutions. In the context of a challenging operating environment, the level of dissolutions in the Gafisa segment reached R\$106.1 million in 3Q16, down sequentially compared to R\$132.5 million in 2Q16 and down y-o-y from R\$147.2 million in 3Q15. In 9M16, the total volume of dissolutions was R\$408.9 million.

Over the last three years, the Company has been working on initiatives to strengthen the credit review component of its sale process. In doing so, the Company intends to reduce the level of dissolutions throughout the construction and delivery cycle. Given the current political and economic uncertainties and corresponding effects on the real estate market, the reduction in dissolutions has been slower than expected.

A comprehensive approach in the credit review process at the time of sale has generated a more efficient process of transferring Gafisa customers to financial institutions, even amid an unfavorable economic environment. As an example of the efficiency achieved in this process, only 9.5% of those who asked for transfers in 9M16 have been rejected by the bank's credit analysis (i.e. out of the 915 units asking for transfers, only 87 were not accepted).

In recent quarters the Gafisa segment has been able to reduce the level of dissolutions by enabling customers facing financial pressure to swap their units for those that better match their financial position. This exchange process reflects the flexibility of Gafisa's product portfolio. Year-to-date, R\$94.7 million of new sales were made to customers who opted for swaps.

In the quarter, 213 Gafisa units were cancelled and 133 units, representing R\$63.6 million, were resold within the period. In 9M16, 713 units were cancelled, with the resale of 392 units in the same period, or R\$198.9 million.

Inventory

Gafisa is maintaining its focus on inventory reduction initiatives. Projects launched prior to 2016 represented 58.0% of net sales in the year. The market value of the Gafisa segment's inventory increased by 3.5% q-o-q, and decreased 1.5% y-o-y, totaling R\$2.0 billion. The reduction reflects the sale of units in the period, and price adjustments on some projects in inventory, as to reflect more efficiently the current market scenario. Finished units outside of core markets accounted for R\$45.3 million, or 2.3% of total inventory.

¹ The Period Adjustments reflect the updates related to the project scope, launch date and pricing update in the period.

During the same period, finished units represented R\$717.0 million, or 36.2% of total inventory. Inventory from projects launched outside core markets, which is comprised exclusively of finished units, represented R\$45.3 million, a decrease of 53.2% when compared to R\$96.6 million in 3Q15 and down 11.5% from 2Q16. The Company estimates that through the beginning of 2017, it will have monetized a large portion of its inventory in non-core markets, based on the strong sales rate observed in these markets over the past few quarters.

The inventory of concluded commercial projects accounts for approximately 53,5% of Gafisa segment total volume of concluded projects, not only due to the high volume of commercial projects delivered during the last 12 months, but also to the current low liquidity for these projects. Three commercial projects were delivered in 3Q16 with PSV of R\$395.5 million. The challenging macroeconomic scenario and, mainly, the high interest rates, has strongly impacted commercial developments, causing higher likelihood of cancellation and lower sales speed. It is worth mentioning that in its current portfolio of projects under construction, the Company only has one commercial project, accounting for R\$24.3 million in PSV, with delivery expected in 1H18.

In regards to Gafisa's inventory, approximately 52% or R\$1.0 billion, is concentrated in projects to be delivered after 3Q17 and will not significantly increase the segment's inventory of finished units in the short

term.

Landbank

The Gafisa segment landbank, with a PSV of R\$5.1 billion, is comprised of 30 land parcels, representing 41 potential projects/phases, and corresponding to nearly 11.4 thousand units. 65% of potential projects/phases are located in São Paulo and 35% are located in Rio de Janeiro. The largest portion of land acquired through swap agreements is located in Rio de Janeiro, bringing the total percentage of land acquired through swaps to 61.9%.

In 3Q16, the Company acquired a new land parcel with a potential PSV of R\$73.4 million, and an acquisition cost of R\$11.4 million. It was financed 22% by cash and 78% by swap agreements, with an initial disbursement of R\$1.0 million. The disbursement schedule of the residual value is subject to the launch date.

The quarterly adjustments reflect updates related to project scope, expected launch date and other adjustments to landbank in the period.

Transfers

Over the past few years, the Company has been taking steps to improve the performance of its receivables/transfer process, in an attempt to achieve higher rates of return on invested capital. Currently, the Company's strategy is to transfer 90% of eligible units in a 90-day period after the delivery of the project. In accordance with this policy, transfers totaled R\$126.0 million in PSV in the third quarter.

Revenue

3Q16 net revenues for the Gafisa segment totaled R\$268.3 million, up 26.2% q-o-q and down 33.3% y-o-y. 3Q16 revenues were impacted by higher net sales volumes compared to 2Q16 and the sales mix, with a higher concentration of sales of launches. In 9M16, net revenue reached R\$651.9 million.

In the quarter, 99% of Gafisa segment revenues derived from projects located in Rio de Janeiro and São Paulo. The table below provides additional details.

Gross Profit & Margin

3Q16 gross profit for the Gafisa segment was R\$1.0 million, down from R\$26.1 million in 2Q16, and down from R\$108.8 million in the prior year period, resulting from the following effects: (i) a R\$16.3 million loss on the sale of a land parcel with potential development directed to the commercial segment; (ii) a R\$9.5 million provision for guarantee due to a higher volume of projects delivered in 3Q16; and (iii) pricing adjustments in the sale of units in response to current market prices. Excluding the non-recurring effect of the sale of the land parcel mentioned above, Gafisa segment's gross margin would have reached 6.4% in 3Q16, while adjusted gross margin would be 23.7% in 3Q16 and 25.3% in 9M16.

Besides the issues mentioned above, gross margin in 3Q16 also reflects the accounting effect of increased appropriation of financial cost of recently launched projects with good sales speed, which suspensive clause (of projects that are no longer subject to restriction) has occurred in the period. This reflects

accounting conventions which recognize financial costs in line with the percentage sold, and not recognizing revenues according to the PoC method. As a result, 3Q16 gross margin was 0.4%, compared to 12.3% in 2Q16 and 27.0% in 3Q15.

Excluding financial impacts, adjusted gross margin reached 17.6% in 3Q16 compared to 30.7% in 2Q16 and 37.9% in 3Q15.

The table below contains more details on the breakdown of 3Q16 Gafisa's gross margin.

Selling, General and Administrative Expenses (SG&A)

SG&A expenses totaled R\$52.2 million in 3Q16, up 12.0% y-o-y and 31.4% q-o-q. In the 9M16, these expenses totaled R\$135.8 million, 3.1% down from R\$140.0 million in the past year.

Selling expenses increased 9.6% when compared to 3Q15 and 22.0% sequentially 2Q16, due to an increased level of launch volumes in the period and current market conditions requiring sales and marketing investments to stimulate demand. Year-to-date, selling expenses increased 3.5% compared to 9M15.

The segment's general and administrative expenses reached R\$27.5 million in 3Q16, an increase of 14.4% compared to the previous year and 41.1% compared to 2Q16. Given the absence of a provision for Profit Sharing in the previous quarter, the net effect in the 3Q16 was R\$6.2 million. Year-to-date, G&A expenses reached R\$74.1 million, compared to R\$80.4 million in 9M15, a decrease of 7.9%.

SG&A levels reflect the Company's commitment to improving operational efficiency and achieving a level of costs and expenses that is consistent with the business cycle and current economic outlook.

The Company continues to be proactive in mitigating risks associated with potential contingencies.

The table below contains more details on the breakdown of this expense.

A higher volume of deliveries over the past three years, due to the delivery of delayed projects in legacy regions, led to an increase in the level of contingencies. As a result, the Gafisa segment continues to concentrate its operations only in the metropolitan regions of São Paulo and Rio de Janeiro. This strategic geographical positioning, combined with improved internal processes, is expected to result in fewer future legal claims and a subsequent decrease in the amount of expenses related to contingencies in the following years.

Adjusted EBITDA

Adjusted EBITDA for the Gafisa segment was negative R\$15.7 million in 3Q16, compared to the positive R\$12.5 million result reported in 2Q16 and positive R\$66.8 million result reported in 3Q15. Year-to-date adjusted EBITDA was negative R\$21.3 million, compared to the positive result of R\$177.5 million in 9M15. 3Q16 Adjusted EBITDA was mainly impacted year-over-year by the following factors: (i) lower gross profit in the quarter due to negative result from the sale of a land parcel located outside of the current business plan, (ii) higher volume of provisions for guarantee and effect of current market conditions; and (iii) higher levels of selling, general and administrative expenses compared to 2Q16. As a reminder, adjusted EBITDA for the Gafisa segment does not include equity income from Alphaville.

The adjusted EBITDA margin was negative 5.8%, compared to a positive margin of 16.6% in 3Q15, and a positive margin of 5.9% in 2Q16. The adjusted EBITDA margin YTD was negative 3.3%.

Below is a breakdown of Tenda's SoS, which includes both legacy and New Model projects.

Dissolutions

The level of dissolutions totaled R\$80.0 million in 3Q16, an increase of 90.4% compared to 3Q15 and 38.1% compared to 2Q16.

Tenda maintains its policy of immediately transferring a sale and the reduction in the legacy project portfolio. However, the percentage of dissolutions over gross sales reached 25.1% in 3Q16, higher than the

average level seen in previous periods due to the following factors: (i) seasonality related to projects sold in “Feirão da Caixa” (2Q16); (ii) introduction of in-person interviews in bank branches as an additional step in the process of analyzing and granting credit by financial agents, which led to annulments of already preapproved customers and; (iii) review of Tenda’s unilateral dissolution process for sales not transferred after a period exceeding three months as the prior process allowed for some units to remain beyond the deadline deemed appropriate by the Company.

We estimate that this last factor should result in a temporary increase in the level of Company dissolutions before returning to the average levels that we expect.

Tenda remained focused on the completion and delivery of legacy projects. In addition, the Company is dissolving contracts with ineligible clients to resell the related units to new, qualified customers.

During the quarter, 562 units were cancelled and returned to inventory, of which 294 units were resold to qualified customers during the same period. The sale and transfer process plays an important role in Tenda's business model. It is expected that within a 90-day period, the effective sale and transfer process will be completed.

Tenda Segment Transfers

In the 3Q16, 1,632 units were transferred to financial institutions, representing R\$208.8 million in net presales. It is worth noting that the banking strike that lasted throughout the month of September detracted from the performance of lending. The volume should normalize over the coming months.

reinstated land parcels with potential PSV of approximately R\$133.1 million, which were previously for sale; they were added to landbank, due to positive results from new feasibility studies.

New Model Update and Turnaround

Tenda is focused on expanding launch volumes under its New Business Model, which is based on three pillars: operational efficiency, risk management, and capital discipline.

The Company continues to operate in six macro regions: São Paulo, Rio de Janeiro, Belo Horizonte, Porto Alegre, Salvador and Recife. Tenda has a total of 81 projects/phases and a launched PSV of R\$3.0 billion since 2013. Below is a brief description of the average performance of these projects, per region.

Notably, Tenda has delivered 42 projects/phases since 2013, totaling 9,853 units and R\$1.4 billion in PSV, all of them maintaining the performance and profitability drivers established in the New Model.

Financial Result

Revenues

Tenda's 3Q16 net revenues totaled R\$270.5 million, an increase of 22.1% y-o-y, reflecting an increased operational volume during the past quarters. As shown in the table below, revenue from new projects, which quarter after quarter has been increasing its contribution to total volume of revenues, represented the majority of total revenues in 3Q16. Tenda's net revenues totaled R\$765.8 million in 9M16, an increase of 18.9% y-o-y, due to the increased level of operations in the period.

Gross Profit and Margin

3Q16 gross profit totaled R\$90.9 million, up from R\$67.4 million in 3Q15 and 2Q16. Gross margin for the quarter reached 33.6%, compared to 30.4% in 3Q15 and 25.9% in 2Q16. The adjusted gross margin was up 35.0% in 3Q16, compared with 28.0% in 2Q16 and 32.1% y-o-y due to the accounting reclassification of R\$11.1 million of the Company's financial co-obligation balance in relation to transferred clients, required by financial institutions during construction period, which now is accounted for in Financial Results. Excluding this effect, the adjusted gross margin would remain in a healthy level of 32.2% in 3Q16.

The table below shows Tenda's gross margin breakdown in 3Q16.

Selling, General and Administrative Expenses (SG&A)

During 3Q16, selling, general and administrative expenses totaled R\$47.5 million, an increase of 10.1% compared to R\$43.1 million in 3Q15 and 11.9% compared to R\$42.4 million in 2Q16. In 9M16, SG&A increased by 15.4%, totaling R\$127.2 million, as a result of a higher volume of operations.

Selling expenses reached R\$25.6 million in 3Q16, an increase of 20.1% from 2Q16 and 56.9% from 3Q15, due to a higher launch volume and increased gross sales. In addition, the increase of 20.1% in selling expenses reflects the current scenario of greater restriction of credit to customers, requiring a higher volume of investments related to marketing and sales expenses, so that to allow a higher volume of clients in our stores. In 9M16, selling expenses increased 38.6%, totaling R\$65.1 million.

In 3Q16, general and administrative expenses decreased 18.4% compared to 3Q15 and increased 3.5% in the sequential comparison. In 9M16, general and administrative expenses totaled R\$62.1 million, 1.8% down from R\$63.2 million recorded in 2015 and in line with the current level of operations of the Company.

Since 2013, Tenda has been rebalancing its cost structure and expenses to levels that are adequate for the current stage of its business model. This is a key step in the Company's ability to improve its operating and financial cycles, in order to achieve better profitability.

20. Financial instruments

The Company and its subsidiaries engage in operations involving financial instruments. These instruments are managed through operational strategies and internal controls aimed at providing liquidity, return and safety. The use of financial instruments with the objective of hedging is achieved through a periodical analysis of exposure to the risk that the management intends to cover (exchange, interest rate, etc.) which is submitted to the corresponding Management bodies for approval and performance of the proposed strategy. The control policy consists of continuously monitoring the contracted conditions in relation to the prevailing market conditions. The Company and its subsidiaries do not use derivatives or any other risky assets for speculative purposes. The result from these operations is consistent with the policies and strategies devised by Company management. The Company and its subsidiaries operations are subject to the risk factors described below:

Report on the review of quarterly information - ITR

To

Board Members and Shareholders of

Gafisa S.A.

São Paulo - SP

We have reviewed the accompanying individual and consolidated interim financial information of Gafisa S.A. ("Company"), identified as Company and Consolidated, respectively, contained in the Quarterly Information (ITR) for the quarter ended September 30, 2016, which comprises the balance sheet as at September 30, 2016 and the respective statement of profit or loss and statement of comprehensive income (loss) for the quarter and nine-month period then ended, and the statement of changes in equity and statement of cash flows for the nine-month period then ended, including explanatory notes.

The Company's management is responsible for the preparation of individual interim financial information in accordance with the Accounting Pronouncements Committee (CPC) Technical Pronouncement (CPC) 21 (R1) – Interim Financial Reporting and the consolidated interim financial information in accordance with CPC 21 (R1) and IAS 34 – Interim Financial Reporting, issued by the International Accounting Standards Board (IASB) which considers the Technical Orientation - OCPC 04 - Application of the Technical Interpretation ICPC 02 to the Brazilian Real Estate Development Entities, edited by the Accounting Pronouncements Committee (CPC) and approved by the Brazilian Securities Commission (CVM) and the Federal Accounting Council (CFC), as well as for the presentation of these information in compliance with the rules issued by the CVM, applicable to the preparation of Quarterly Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review according to the Brazilian and international review standards of interim financial information (NBC TR 2410 – Review of Interim Financial Information Performed by the Auditor of the Entity, and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of inquiries, mainly of the people responsible for the financial and accounting matters, and the application of analytical and other review procedures. The scope of a review is significantly narrower than that of an audit conducted in accordance with audit standards and, accordingly, it did not permit us to obtain assurance that we took notice of all significant matters that could have been raised in an audit. Therefore, we did not express an audit opinion.

Conclusion from the individual and consolidated interim financial information prepared in accordance with CPC 21(R1)

Based on our review, we are not aware of any fact that makes us believe that the individual and consolidated interim financial information included in the Quarterly Information referred to above was not prepared, in all significant respects, in accordance with CPC 21 (R1) applicable to the preparation of Quarterly Information (ITR), and presented in compliance with the rules issued by the CVM.

(A free translation from the original in Portuguese into English)

Gafisa S.A.

Conclusion from the consolidated interim information prepared in accordance with IAS 34, which considers the Technical Orientation - OCPC 04 – Application of the Technical Interpretation ICPC 02 to the Brazilian Real Estate Development Entities, edited by the Accounting Pronouncement Committee (CPC) and approved by the Brazilian Securities Commission (CVM) and the Federal Accounting Council (CFC)

Based on our review, we are not aware of any fact that makes us believe that the consolidated interim financial information included in the Quarterly Information referred to above was not prepared, in all significant respects, in accordance with IAS 34, issued by the IASB, which considers the Technical Orientation - OCPC 04 - Application of technical interpretation ICPC02 to the Brazilian Real Estate Development Entities, issued by the CPC, and approved by the CVM and the CFC applicable to the preparation of Quarterly Information (ITR), and presented in compliance with the rules issued by the CVM.

Emphasis of matter

As described in Note 2, the individual (Company) and consolidated interim financial information has been prepared in accordance with the accounting practices adopted in Brazil (CPC 21 (R1)). The consolidated interim financial information prepared in accordance with International Financial Reporting Standards (IFRS) applicable to real estate entities in Brazil also considers technical guideline OCPC 04 issued CPC. Such technical guideline addresses the recognition of real state revenues and involves issues related to meaning and application of the concept of continuous transfer of risks, rewards and control on the sale of real estate units, as detailed in Note 2. Our opinion is not qualified in this respect.

Other matters

Statements of value added

We have also reviewed the individual and consolidated statements of value added (DVA) for the nine-month period ended September 30, 2016, prepared under the responsibility of the Company's management, whose presentation in the interim financial information is required by the rules of the CVM applicable to Quarterly Information (ITR) and as supplementary information under IFRS that do not require the presentation of DVA. These statements were subject to the same previously described review procedures and, based on our review, we are not aware of any fact that makes us believe that they were not prepared, in all significant respects, according to the individual and consolidated interim financial information taken as a whole.
