CNO's remuneration for the execution of the TAEs under the Alliance Agreement is limited to R\$121 million. Such remuneration is calculated as a percentage of the value of the agreement, in accordance with the type of service to be rendered and the payment of a bonus or discount due to penalties that may be determined between the Final Price and the Target-Price.</p> <p>Based on this system, the total contracted value based on the Alliance Agreement resulting from the sum of the set of TAEs is determined only at the end of the term of the Alliance Agreement. If the ceiling of CNO's remuneration mentioned above is reached before the end of the Alliance Agreement, a new contract must be negotiated between the parties.</p> <p>The scope of the TAEs entered into in November 2017 is detailed in the following item (Main terms and conditions).</p>

Any participation by the counterparty, its partners or managers in the issuer’s decision-making process or in the negotiation of the transaction as representatives of the issuer

The Alliance Agreement, which provides for the execution of the TAEs, was considered and voted on by the Board of Directors of Braskem S.A., whose composition includes three members (one sitting and two alternate members) in common with the Board of Directors of CNO. However, such managers did not participate in the negotiation of the transaction as representatives of the issuer.

Detailed justification of the reasons why the management of the issuer believes the transaction was carried out on an arm’s length basis or involves adequate compensatory payment

The commercial conditions established by the TAE were based on industry standards, considering the volumes contracted and technical conditions. Braskem conducted a comparative analysis of its routine agreements, maintenance shutdown agreements and market proposals, in particular, an analysis of labor costs, charges, contractual management fees and profit, and the CNO proposal was deemed technically and commercially competitive. Furthermore, the execution of the Services require compliance with rigorous cost and deadline targets, as well as with high quality and productivity technical standards, including rigorous compliance with environmental, health and safety standards, and CNO fulfilled all requirements. CNO holds long experience in executing the Services under other previous alliance agreements, with its performance reviews always very positive.

The decision-making process involved an analysis and negotiation of the proposal prepared by CNO by the respective Executive Officers of Braskem.
