Investment Valuation

Municipal bonds are valued by an independent pricing service, taking into consideration yield, liquidity, risk, credit quality, coupon, maturity, type of issue, and any other factors or market data the pricing service deems relevant. Short-term securities are valued at the prices provided by an independent pricing service. However, short-term securities with remaining maturities of 60 days or less at the time of purchase may be valued at amortized cost, which approximates fair market value. Securities for which no quotations are readily available are valued at fair value as determined in accordance with procedures established by and under general supervision of the Trustees.
