Amendment  
-----

## Edgar Filing: COMPETITIVE TECHNOLOGIES INC - Form 8-K/A

This amendment is being filed in response to comments by the SEC relating to Exhibit 10.1.

### ITEM 1.01. ENTRY INTO A MATERIAL DEFINITIVE AGREEMENT

On July 29, 2009, Competitive Technologies, Inc. ("CTT") entered into a distribution agreement (the "Agreement") with Innovative Medical Therapies, Inc. ("IMT") granting them exclusive distribution rights to CTT's pain therapy medical device in the United States and related territories excluding selected Federal agencies. The Company has worldwide rights to the device, and has granted distribution rights to other distributors in Europe, India, Korea, Malaysia and Bangladesh.

The initial term of the Agreement is five years, with two automatic ten year extensions unless IMT fails to meet its obligations or elects not to renew. The Agreement provides for minimum payments of \$1 million over the first five months, with monthly minimums increasing throughout the term of the agreement up to \$1,750,000 per month in year eight and thereafter.

### ITEM 8.01. OTHER EVENTS

In conjunction with the above referenced agreement, on July 30, 2009 Competitive Technologies, Inc. issued the following press release:

#### COMPETITIVE TECHNOLOGIES SIGNS U.S. DISTRIBUTOR FOR PAIN THERAPY MEDICAL DEVICE

Fairfield, CT - (July 30, 2009) - Competitive Technologies, Inc. (NYSE Amex: CTT) announced today that it has signed an agreement with Innovative Medical Therapies, Inc (IMT) granting them exclusive distribution rights to CTT's pain therapy medical device in the United States and related territories excluding selected Federal agencies. The contract provides for minimum monthly cash payments to CTT totaling over \$1 million for the first five months. These minimum monthly payments increase throughout the term of the agreement with the fourth year minimum payments reaching \$9 million and eighth year minimum payments of \$21 million dollars. IMT will receive shipments of CTT's pain therapy medical device in return for these payments.

-----

IMT CEO Michael Clinton welcomed the opportunity to bring the pain therapy medical device to the many thousands of people suffering from chronic neuropathic pain stating, "We believe that this pain therapy medical device will revolutionize pain treatment for many people suffering from intractable pain. No longer will harmful and addictive drugs be the first treatment option. On the contrary, the CTT medical device, having no side effects and substantial clinical success will be the new future to treat chronic sufferers of neuropathic pain."

IMT intends to immediately deliver and begin training leading oncologists and spine specialists, along with their technical staff who have already agreed to further confirm the patient benefits and effectiveness of the CTT medical device.

Seven sales agreements for the pain therapy medical device are now in place for 42 countries around the world accounting for over 50% of the world's population. CTT has exclusive worldwide rights to this device. The device has U.S. FDA 510(k) clearance for U.S. sales, as well as Medical Device CE certification from

## Edgar Filing: COMPETITIVE TECHNOLOGIES INC - Form 8-K/A

the E.U. allowing sales throughout Europe and several other countries.

CTT8K7300902

CTT and its partner, GEOMC Co. Ltd. of Seoul, Korea, have completed a strategic update conference at CTT's headquarters in Fairfield, CT, reviewing the sales and manufacturing progress on the pain therapy medical device.

GEOMC has current manufacturing facilities capable of commercially producing 200 pain therapy medical devices per month and the partners have agreed to expand production capacity to an increased production level of 600 units per month to match increased order demand.

Young Hyun Lim, GEOMC's CEO stated, "Our firm has invested over \$3 million for the design, tooling and manufacturing facilities for this device. We are quite pleased with the sales progress and are fully committed to ramp up the manufacturing capacity to support the worldwide order pattern."

This medical device has successfully treated over 3,000 patients in Europe and dozens of patients in the U.S. at hospitals and pain therapy centers. CTT's pain therapy medical device is currently being used by clinical investigators at the Virginia Commonwealth University Massey Cancer Center for independent clinical research to examine the device's ability to decrease pain associated with chemotherapy-induced peripheral neuropathy (CIPN).

The device has been used to successfully treat over 20 wounded warriors at the Walter Reed Army Medical Center. The treatments were for pain from loss of limb, back injuries, and other neuropathies. CTT distributor Native Energy and Economic Development, LLC is working with CTT executives and the Department of Veterans Affairs (VA) seeking general funding for the use of the pain therapy medical device at the over 1,500 VA installations

Several patients were successfully treated at Dr. Jeffrey Perry's Pain Diagnostic & Rehabilitation Center on Long Island, New York where the patients suffered from extreme pain resulting from failed back surgery and bulging or herniated spinal discs.

The University of Miami Hospital is in the process of receiving one of CTT's pain therapy medical devices for treatment trials of patients at their prestigious Pain Management Center.

"This distribution agreement is a major step in our ongoing aggressive sales program for this medical device, " said John B. Nano, CTT's Chairman, President and CEO. "We previously signed an agreement for sales to selected U.S. government agencies, including the Department of Veteran's Affairs (VA), the Department of Defense (DOD), and the Indian Health Service (IHS). We are continuing our review and selection process for additional distributors worldwide. Our device, which offers relief to patients suffering extreme pain, provides a valuable tool to the clinician in offering an effective treatment program that can positively impact the quality of life of a patient without the harmful side effects of painkilling drugs."

The pain therapy medical device utilizes an innovative process by applying a low electrical current to the pain pathway, which results in the patient's brain receiving a "no pain" signal. For more information on the pain therapy medical device, visit [www.CalmareTT.com](http://www.CalmareTT.com).

### ABOUT INNOVATIVE MEDICAL THERAPIES, INC.

Innovative Medical Therapies, Inc. ("IMT") is a Delaware corporation formed in early 2008 to deliver innovative medical devices and therapies to hospital and
