(Zip Code)

Registrant's telephone number, including area code (315) 926-8100

Securities registered pursuant to Section 12(b) of the Exchange Act:

Edgar Filing: Seneca Foods Corp - Form 10-K

<u>Title of Each Class</u>	<u>Name of Each Exchange on Which Registered</u>
Common Stock Class A, \$.25 Par	NASDAQ Global Market
Common Stock Class B, \$.25 Par	NASDAQ Global Market

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Edgar Filing: Seneca Foods Corp - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer X Non-accelerated filer Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act)

Yes No X

The aggregate market value of the Registrant's voting and non-voting common equity held by non-affiliates based on the closing sales price per market reports by the NASDAQ Global Market System on October 1, 2017 was approximately \$241,650,000.

As of June 15, 2018, there were 7,860,033 shares of Class A common stock and 1,884,439 shares of Class B common stock outstanding.

Documents Incorporated by Reference:

- (1) Portions of the Annual Report to shareholders for fiscal year ended March 31, 2018 (the "2018 Annual Report") applicable to Part I, Item 1, Part II, Items 5-9A and Part IV, Item 15 of Form 10-K.
- (2) Portion of the Proxy Statement to be issued in connection with the Registrant's annual meeting of stockholders (the "Proxy Statement") applicable to Part III, Items 10-14 of Form 10-K.

Forward-Looking Statements

Certain of the statements contained in this annual report on Form 10-K are forward-looking statements made within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 (Exchange Act). Forward-looking statements involve numerous risks and uncertainties. Forward-looking statements are not in the present or past tense and, in some cases, can be identified by the use of the words "will," "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "seeks," "should," "likely," "targets," "may", "can" and other expressions that indicate future trends and events. A forward-looking statement speaks only as of the date on which such statement is made and reflects management's analysis only as of the date thereof. The Company undertakes no obligation to update any forward-looking statement. The following factors, among others discussed herein and in the Company's filings under the Exchange Act, could cause actual results and future events to differ materially from those set forth or contemplated in the forward-looking statements: costs and availability of raw materials, competition, cost controls, sales levels, governmental regulation, consumer preferences, industry trends, weather conditions, crop yields, natural disasters, recalls, litigation, reliance on third-parties, wage rates, and other factors. See also the factors described in "Part I, Item 1A. Risk Factors" and elsewhere in this report, and those described in the Company's filings under the Exchange Act.

Restatement of Financial Statements

As described in the Form 12b-25 filed by the Company on June 14, 2018, this Form 10-K was delayed because of the additional time that the Company required to finalize its financial statements for the fiscal year ended March 31, 2018. The Company's delay in filing the Form 10-K is due principally to the additional time the Company required to complete its analysis of complex and technical accounting issues relating to "bill and hold" revenue recognition relating to a contract packing agreement with a customer. On June 28, 2018 the Audit Committee of the Company determined that the Company's accounting practices for bill and hold revenue recognition were incorrect. The Company has made all necessary adjustments to correct this information for all periods presented in this Form 10-K. See Note 2 of the accompanying Consolidated Financial Statements for additional information.

PART I

Item 1

Business

History and Development of Seneca Foods Corporation

SENECA FOODS CORPORATION (the “Company”) is one of North America's leading providers of packaged fruits and vegetables with facilities located throughout the United States. The Company’s product offerings include canned, frozen and bottled produce and snack chips and its products are sold under private label as well as national and regional brands that the Company owns or licenses, including Seneca®, Libby’s®, Aunt Nellie’s®, READ®, Green Valley®, CherryMan® and Seneca Farms®. The Company packs Green Giant, Le Sueur and other brands of canned vegetables as well as select Green Giant frozen vegetables for B&G Foods North America (“B&G”) under a contract packing agreement.

As of March 31, 2018, the Company’s facilities consisted of 24 packaging plants strategically located throughout the United States, three can manufacturing plants, three seed processing and packaging operations, a farming operation and a logistical support network. The Company also maintains warehouses which are generally located adjacent to its packaging plants. The Company is a New York corporation and its headquarters is located at 3736 South Main Street, Marion, New York and its telephone number is (315) 926-8100.

The Company was founded in 1949 and during its 70 years of operation, the Company has made over 50 strategic acquisitions including the purchase of the long-term license for the Libby’s brand in 1983, the purchase of Pillsbury’s Green Giant packaging assets and entry into an Alliance Agreement with respect to the Green Giant canned and frozen vegetable business in 1995 and the acquisition of Chiquita Processed Foods in 2003. The Company believes that these acquisitions have enhanced the Company’s leadership position in the private label and foodservice canned vegetable markets in the United States and significantly increased its international sales. In 2013, the Company completed its acquisition of 100% of the membership interest in Independent Foods, LLC. In April 2014, the Company purchased a 50% equity interest in Truitt Bros. Inc. In 2016, the Company acquired Gray & Company and Diana Foods Co., Inc., each leading providers of maraschino cherries and other cherry products. In 2018, the Company acquired the remaining 50% ownership interest in Truitt Bros., Inc. making it a wholly owned subsidiary of the Company.

Available Information

The Company’s Internet address is www.senecafoods.com. The Company’s annual report on Form 10-K, the Company’s quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act are available on the Company’s web site, as soon as reasonably practicable after they are electronically filed with or furnished to the SEC. All such filings on the Company’s web site are available free of charge. Information on our website is not part of the Annual Report on Form 10-K.

In addition, the Company's website includes items related to corporate governance matters, including charters of various committees of the Board of Directors and the Company's Code of Business Conduct and Ethics. The Company intends to disclose on its website any amendment to or waiver of any provision of the Code of Business Conduct and Ethics that would otherwise be required to be disclosed under the rules of the SEC and NASDAQ.

Financial Information about Industry Segments

The Company manages its business on the basis of three reportable segments – the primary segment is the packaging and sale of fruits and vegetables, secondarily, the packaging and sale of prepared food products (added as a result of the Truitt acquisition), third, the packaging and sale of snack products, of which the majority are chip products. These three segments constitute the food operation. The food operation constitutes 99% of total sales, of which approximately 61% is canned vegetable packaging, 20% is canned fruit packaging, 11% is frozen fruit and vegetable packaging, 7% is prepared foods and 1% is fruit chip packaging. The non-food operation, which is primarily related to the sale of cans and ends and outside revenue generated from our trucking and aircraft operations, represents 1% of the Company's total sales.

Table of Contents**Narrative Description of Business**Principal Products and MarketsFood Packaging

The Company's principal products include canned fruits and vegetables, frozen vegetables and other food products. The products are sold nationwide by major grocery outlets, including supermarkets, mass merchandisers, limited assortment stores, club stores and dollar stores. Additionally, products are sold to food service distributors, industrial markets, other food packagers, export customers in 90 countries and federal, state and local governments for school and other feeding programs. Food packaging operations are primarily supported by plant locations in New York, California, Kentucky, Michigan, Oregon, Pennsylvania, Wisconsin, Washington, Idaho, Illinois, and Minnesota. See Note 13 of Item 8, Financial Statements and Supplementary Data, for additional information about the Company's segments.

The following table summarizes net sales by major product category for the years ended March 31, 2018, 2017, and 2016:

Classes of similar products/services:	2018	2017	2016
		(Restated)	(Restated)
	(In thousands)		
Net Sales:

Foods.

Source and Availability of Raw Materials

The Company's food packaging plants are located in major vegetable producing states and in four fruit producing states. Fruits and vegetables are primarily obtained through supply contracts with independent growers.

Intellectual Property

The Company's most significant brand name, Libby's®, is held pursuant to a trademark license granted to the Company in March 1982 and renewable by the Company every 10 years for an aggregate period expiring in March 2081. The original licensor was Libby, McNeill & Libby, Inc., then an indirect subsidiary of Nestlé, S. A. ("Nestlé") and the license was granted in connection with the Company's purchase of certain of the licensor's canned vegetable operations in the United States. Corlib Brands Management, LTD acquired the license from Nestlé during 2006. The license is limited to vegetables which are shelf-stable, frozen, and thermally packaged, and includes the Company's major vegetable varieties – corn, peas and green beans – as well as certain other thermally packaged vegetable varieties and sauerkraut.

The Company is required to pay an annual royalty to Corlib Brands now known as Libby's Brand Holding, Ltd., who may terminate the license for non-payment of royalty, use of the trademark in sales outside the licensed territory, failure to achieve a minimum level of sales under the licensed trademark during any calendar year or a material breach or default by the Company under the agreement (which is not cured within the specified cure period). With the purchase of Signature Fruit Company, LLC, which also uses the Libby'® brand name, the Company re-negotiated the license agreement and created a new, combined agreement based on Libby'® revenue dollars for fruits, vegetables, and dry beans. A total of \$310,000 was paid as a royalty fee for the year ended March 31, 2018.

The Company also sells canned fruits and vegetables, frozen vegetables and other food products under several other brands for which the Company has obtained registered trademarks, including, Aunt Nellie'®, Cherryman®, Green Valley®, READ®, Seneca Farms®, and Seneca® and other regional brands.

Seasonal Business

While individual fruits and vegetables have seasonal cycles of peak production and sales, the different cycles are somewhat offsetting. Minimal food packaging occurs in the Company's last fiscal quarter ending March 31, which is the optimal time for maintenance, repairs and equipment changes in its packaging plants. The supply of commodities, current pricing, and expected new crop quantity and quality affect the timing and amount of the Company's sales and earnings. When the seasonal harvesting periods of the Company's major fruits and vegetables are newly completed, inventories for these packaged fruits and vegetables are at their highest levels. For peas, the peak inventory time is mid-summer and for corn, the Company's highest volume vegetable, the peak inventory is in mid-autumn. For peaches, the Company's highest volume fruit, the peak inventory time is early-autumn. For pears and cherries, the peak inventory is late-summer.

Table of Contents

These seasonal fluctuations are illustrated in the following table, which presents certain unaudited quarterly financial information for the periods indicated:

	First Quarter (In thousands)	Second Quarter (In thousands)	Third Quarter (In thousands)	Fourth Quarter (In thousands)
Year ended March 31, 2018:	(Restated)	(Restated)	(Restated)	
Net sales	\$288,927	\$338,470	\$387,689	\$299,679
Gross margin	15,535	17,411	30,501	11,140
Net (loss) earnings	(980)	(2,958)	4,377	(14,250)
Inventories (at quarter end)	655,419	859,146	770,702	680,828
Revolver outstanding (at quarter end)	226,010	272,609	290,196	293,459
Year ended March 31, 2017:	(Restated)	(Restated)	(Restated)	(Restated)
Net sales	\$272,135	\$352,606	\$356,767	\$280,690
Gross margin	21,955	31,025	37,926	21,098
Net (loss) earnings	965	6,821	7,789	320
Inventories (at quarter end)	611,063	801,684	699,445	628,935
Revolver outstanding (at quarter end)	264,000	342,935	232,586	214,781

Backlog

In the food packaging business, an end of year sales order backlog is not considered meaningful. Traditionally, larger customers provide tentative bookings for their expected purchases for the upcoming season. These bookings are further developed as data on the expected size of the related national harvests becomes available. In general, these bookings serve as a yardstick rather than as a firm commitment, since actual harvest results can vary notably from early estimates. In actual practice, the Company has substantially all of its expected seasonal production identified to potential sales outlets before the seasonal production is completed.

Competition and Customers

Competition in the food business is substantial with brand recognition and promotion, quality, service, and pricing being the major determinants in the Company's relative market position. The Company believes that it is a major producer of canned fruits and vegetables, but some producers of canned, frozen and other forms of fruit and vegetable products have sales which exceed the Company's sales. The Company is aware of approximately 14 competitors in the U.S. packaged vegetable industry, many of which are privately held companies. The Company is aware of approximately nine competitors in the U.S. packaged fruit industry. In addition, there are significant quantities of fruit that are imported from Europe, Asia and South America.

During the past year, approximately 10% of the Company's packaged foods sales were packed for retail customers under the Company's branded labels of Seneca®, Libby's®, Green Valley®, Aunt Nellie's®, READ®, and Seneca Farms®. About 24% of packaged foods sales were packed for institutional food distributors and 57% were retail packed under the private label of our customers. The remaining 9% was sold under an agreement with B&G Foods (the "Green Giant Agreement") (see note 12 of Item 8, Financial Statements and Supplementary Data). Termination of the Green Giant Agreement would substantially reduce the Company's sales and profitability unless the Company was to enter into a new substantial supply relationship with B&G Foods or another major vegetable marketer. The non-Green Giant customers represent a full cross section of the retail, institutional, distributor, and industrial markets; and the Company does not consider itself dependent on any single sales source other than sales attributable to the Green Giant Agreement.

The Company's principal branded products are its Libby's canned fruit and vegetable products, which rate among the top three national brands according to a leading market research firm.

The information under the heading "Results of Operations in Management's Discussion and Analysis of Financial Condition and Results of Operations" in the 2018 Annual Report is incorporated by reference.

Environmental Regulation

Environmental Protection

Environmental protection is an area that has been worked on diligently at each food packaging facility. In all locations, the Company has cooperated with federal, state, and local environmental protection authorities in developing and maintaining suitable antipollution facilities. In general, we believe our pollution control facilities are equal to or somewhat superior to those of our competitors and are within environmental protection standards. The Company does not expect any material capital expenditures to comply with environmental regulations in the near future.

There has been a broad range of proposed and promulgated state, national and international regulations aimed at reducing the effects of climate change. In the United States, there is a significant possibility that some form of regulation will be forthcoming at the federal level to address the effects of climate change. Such regulation could result in the creation of additional costs in the form of taxes, the restriction of output, investments of capital to maintain compliance with laws and regulations, or required acquisition or trading of emission allowances.

Environmental Litigation and Contingencies

In the ordinary course of its business, the Company is made a party to certain legal proceedings seeking monetary damages, including proceedings involving product liability claims, worker's compensation and other employee claims, tort and other general liability claims, for which it carries insurance as well as patent infringement and related litigation. The Company is in a highly regulated industry and is also periodically involved in government actions for regulatory violations and other matters surrounding the manufacturing of its products, including, but not limited to, environmental, employee, and product safety issues. While it is not feasible to predict or determine the ultimate outcome of these matters, the Company does not believe that an adverse decision in any of these legal proceedings would have a material adverse impact on its financial position, results of operations, or cash flows.

Table of ContentsEmployment

At our fiscal year end 2018, the Company had approximately 4,300 employees of which 3,700 full time and 500 seasonal employees work in food packaging and 100 full time employees work in other activities. The number of employees increases by approximately 7,000 due to an increase in seasonal employees during our peak pack season.

The Company has seven collective bargaining agreements with three unions covering approximately 1,050 of its full-time employees. The terms of these agreements result in wages and benefits which are substantially the same for comparable positions for the Company's non-union employees. There are two agreements that will expire in 2018, two agreements that will expire in calendar 2019 and three agreements that will expire in calendar 2020.

Domestic and Export Sales

The following table sets forth domestic and export sales:

	Fiscal Year					
	2018		2017		2016	
			(Restated)		(Restated)	
	(In thousands, except percentages)					
Net Sales:						
United States	\$ 1,223,959		\$ 1,166,140		\$ 1,171,285	
Export	90,806		96,058		108,282	
Total Net Sales	\$ 1,314,765		\$ 1,262,198		\$ 1,279,567	
As a Percentage of Net Sales:						
United States	93.1	%	92.4	%	91.5	%
Export	6.9	%	7.6	%	8.5	%
Total	100.0	%	100.0	%	100.0	%

Item 1A

Risk Factors

The following factors as well as factors described elsewhere in this Form 10-K or in other filings by the Company with the Securities and Exchange Commission, could adversely affect the Company's consolidated financial position, results of operations or cash flows. Other factors not presently known to us or that we presently believe are not material could also affect our business operations or financial results. The Company refers to itself as "we", "our" or "us" in this section.

Fruit and Vegetable Industry Risks

Excess capacity in the fruit and vegetable industry has a downward impact on selling price.

Canned fruit and vegetable categories are declining, with that; less shelf space is being devoted to these categories in the supermarkets. Fresh and perishable businesses are improving their delivery systems around the world and the availability of fresh produce is impacting the consumers purchasing patterns relating to processed fruits and vegetables. Our financial performance and growth are related to conditions in the United States' fruit and vegetable packaging industry, which is a mature industry with a modest growth rate during the last 10 years. Our net sales are a function of product availability and market pricing. In the fruit and vegetable packaging industry, product availability and market prices tend to have an inverse relationship: market prices tend to decrease as more product is available and to increase if less product is available. Product availability is a direct result of plantings, growing conditions, crop yields and inventory levels, all of which vary from year to year. Moreover, fruit and vegetable production outside the United States, particularly in Europe, Asia and South America, is increasing at a time when worldwide demand for certain products, such as peaches, is declining. These factors may have a significant effect on supply and competition and create downward pressure on prices. In addition, market prices can be affected by the planting and inventory levels and individual pricing decisions of our competitors. Generally, market prices in the fruit and vegetable packaging industry adjust more quickly to variations in product availability than an individual packager can adjust its cost structure; thus, in an oversupply situation, a packager's margins likely will weaken. We typically have experienced lower margins during times of industry oversupply.

The Company announced that it will cease production and close its Modesto, California plant prior to the 2018 production season. Reasons for exiting the business include large operating losses, rising costs for farmers and the Company and export competition from China and Europe.

In the past, the fruit and vegetable packaging industry has been characterized by excess capacity, with resulting pressure on our prices and profit margins. We have closed packaging plants in past years in response to the downward pressure on prices. There can be no assurance that our margins will improve in response to favorable market conditions or that we will be able to operate profitably during depressed market conditions.

Table of Contents

Growing cycles and adverse weather conditions may decrease our results from operations.

Our operations are affected by the growing cycles of the fruits and vegetables we package. When the fruits and vegetables are ready to be picked, we must harvest and package them quickly or forego the opportunity to package fresh picked fruits and vegetables for an entire year. Most of our fruits and vegetables are grown by farmers under contract with us. Consequently, we must pay the contract grower for the fruits and vegetables even if we cannot or do not harvest or package them. Most of our production occurs during the second quarter (July through September) of our fiscal year, which corresponds with the quarter that the growing season ends for most of the produce packaged by us. A majority of our sales occur during the third and fourth quarters of each fiscal year due to seasonal consumption patterns for our products. Accordingly, inventory levels are highest during the second and third quarters, and accounts receivable levels are highest during the third and fourth quarters. Net sales generated during our third and fourth fiscal quarters have a significant impact on our results of operations. Because of these seasonal fluctuations, the results of any particular quarter, particularly in the first half of our fiscal year, will not necessarily be indicative of results for the full year or for future years.

We set our planting schedules without knowing the effect of the weather on the crops or on the entire industry's production. Weather conditions during the course of each fruit and vegetable crop's growing season will affect the volume and growing time of that crop. As most of our vegetables are produced in more than one part of the U.S., this somewhat reduces the risk that our entire crop will be subject to disastrous weather. The upper Midwest is the primary growing region for the principal vegetables which we pack, namely peas, green beans and corn, and it is also a substantial source of our competitors' vegetable production. The adverse effects of weather-related reduced production may be partially mitigated by higher selling prices for the fruits and vegetables which are produced.

The commodity materials that we package or otherwise require are subject to price increases that could adversely affect our profitability.

The materials that we use, such as fruits and vegetables, steel (used to make cans), ingredients, pouches and other packaging materials as well as the electricity and natural gas used in our business, are commodities that may experience price volatility caused by external factors, including market fluctuations, availability, currency fluctuations and changes in governmental regulations and agricultural programs. General inventory positions of major commodities, such as field corn, soybeans and wheat, all commodities with which we must compete for acreage, can have dramatic effects on prices for those commodities, which can translate into similar swings in prices needed to be paid for our contracted commodities. These programs and other events can result in reduced supplies of these commodities, higher supply costs or interruptions in our production schedules. If prices of these commodities increase beyond what we can pass along to our customers, our operating income will decrease.

Global Trade Policy Could Adversely Impact Our Results From Operations

Earlier this year, the U.S. Government imposed 25% duties on the importation of steel from most of the steel producing countries around the world. Seneca Foods makes its own cans using tin-plated and tin-free steel purchased from both domestic and off-shore suppliers. The duties will potentially have an impact on the cost of steel that the company has already committed for but yet not received from off-shore suppliers. In addition, based on information provided by domestic suppliers, the cost of steel in the future will substantially increase. This will create higher costs of the primary packaging used by the Company for its products. The ability to pass on these costs to our customers is an unknown risk. In addition, other countries have or are threatening to impose retaliatory duties on items produced in the U.S. including the Company's products. This will limit the export potential for the Company's products going forward. In 2018, 6.9 percent of the company's products were exported.

Risks Associated With Our Operations

We depend upon key customers.

Our products are sold in a highly competitive marketplace, which includes increased concentration and a growing presence of large-format retailers and discounters. Dependence upon key customers could lead to increased pricing pressure by these customers.

Green Giant products packed by us in fiscal years 2018 and 2017 constituted approximately 9% and 11%, respectively, of our total sales. Our sales of Green Giant product and financial performance under the Green Giant Agreement depend to a significant extent on our success in producing quality Green Giant vegetables at competitive costs and B&G Foods success in marketing the products produced by us. The ability of B&G Foods to successfully market these products will depend upon B&G Foods's sales efforts as well as the factors described above under "Excess capacity in the fruit and vegetable industry has a downward impact on selling price." We cannot give assurance as to the volume of B&G Foods's sales and cannot control many of the key factors affecting that volume.

Additionally, purchases by the United States Department of Agriculture ("USDA") in fiscal year 2018 represented approximately 3.7% of our total sales. The purchase of our products by the USDA is done through the government's competitive bid process. We bid on stated product requirements and needs as presented by the USDA and, if we are the successful bidder, we fulfill the contract and deliver the product. The government contracting process is complex and subject to numerous regulations and requirements. Failure by us to comply with the regulations and requirements for government contracts could jeopardize our ability to contract with the government and could result in reduced sales or prohibition on submitting bids to the USDA. The government procurement process could also change and result in our inability to meet the new requirements. Additionally, the government's need for our products could decrease, which would result in reduced sales to the USDA.

If we lose a significant customer or if sales to a significant customer materially decrease, our business, financial condition and results of operations may be materially and adversely affected.

If we do not maintain the market shares of our products, our business and revenues may be adversely affected.

All of our products compete with those of other national and regional food packaging companies under highly competitive conditions. The vegetable products which we sell under our own brand names not only compete with vegetable products produced by vegetable packaging competitors, but also compete with products we produce and sell to other companies who market those products under their own brand names, such as the Green Giant vegetables we sell to B&G Foods and the fruits and vegetables we sell to various retail grocery chains which carry our customer's own brand names.

The customers who buy our products to sell under their own brand names control the marketing programs for those products. In recent years, many major retail food chains have been increasing their promotions, offerings and shelf space allocations for their own fruit and vegetable brands, to the detriment of fruit and vegetable brands owned by the packagers, including our own brands. We cannot predict the pricing or promotional activities of our customers/competitors or whether they will have a negative effect on us. There are competitive pressures and other factors, which could cause our products to lose market share or result in significant price erosion that could materially and adversely affect our business, financial condition and results of operations.

Table of Contents

Increases in logistics and other transportation-related costs could materially adversely impact our results of operations.

Our ability to competitively serve our customers depends on the availability of reliable and low-cost transportation. We use multiple forms of transportation to bring our products to market. They include trucks, intermodal, rail cars, and ships. Disruption to the timely supply of these services or increases in the cost of these services for any reason, including availability or cost of fuel, regulations affecting the industry, or labor shortages in the transportation industry, could have an adverse effect on our ability to serve our customers, and could materially and adversely affect our business, financial condition and results of operations.

If we are subject to product liability claims, we may incur significant and unexpected costs and our business reputation could be adversely affected.

Food packagers are subject to significant liability should the consumption of their products cause injury or illness. We work with regulators, the industry and suppliers to stay abreast of developments. A product liability judgment against us could also result in substantial and unexpected expenditures, affect consumer confidence in our products, and divert management's attention from other responsibilities. Product liability claims may also lead to increased scrutiny by federal and state regulatory agencies and could have a material adverse effect on our financial condition and results of operation. Although we maintain comprehensive general liability insurance coverage, there can be no assurance that this level of coverage is adequate or that we will be able to continue to maintain our existing insurance or obtain comparable insurance at a reasonable cost, if at all. A product recall or a partially or completely uninsured judgment against us could materially and adversely affect our business, financial condition and results of operations.

We generate agricultural food packaging wastes and are subject to substantial environmental regulation.

As a food packager, we regularly dispose of produce wastes (silage) and processing water as well as materials used in plant operation and maintenance, and our plant boilers, which generate heat used in packaging, produce generally small emissions into the air. These activities and operations are regulated by federal and state laws and the respective federal and state environmental agencies. Occasionally, we may be required to remediate conditions found by the regulators to be in violation of environmental law or to contribute to the cost of remediating waste disposal sites, which we neither owned nor operated, but in which, we and other companies deposited waste materials, usually through independent waste disposal companies. Future possible costs of environmental remediation, contributions and penalties could materially and adversely affect our business, financial condition and results of operations.

Our production capacity for certain products and commodities is concentrated in a limited number of facilities, exposing us to a material disruption in production in the event that a disaster strikes.

We only have four plants that produce fruit products, the largest of which we will cease operations prior to the 2018 production season, and one plant that produces pumpkin products. We have three plants that manufacture empty cans, one with substantially more capacity than the other two, which are not interchangeable since each plant cannot necessarily produce all the can sizes needed. Although we maintain property and business interruption insurance coverage, there can be no assurance that this level of coverage is adequate in the event of a catastrophe or significant disruption at these or other Company facilities. If such an event occurs, it could materially and adversely affect our business, financial condition and results of operations.

We may undertake acquisitions or product innovations and may have difficulties integrating them or may not realize the anticipated benefits.

In the future, we may undertake acquisitions of other businesses or introduce new products, although there can be no assurances that these will occur. Such undertakings involve numerous risks and significant investments. There can be no assurance that we will be able to identify and acquire acquisition candidates on favorable terms, to profitably manage or to successfully integrate future businesses it may acquire or new products it may introduce without substantial costs, delays or problems. Any of these outcomes could materially and adversely affect our business, financial condition and results of operations.

We are dependent upon a seasonal workforce and our inability to hire sufficient employees may adversely affect our business.

At the end of our 2018 fiscal year, we had approximately 4,300 employees of which 3,700 full time and 500 seasonal employees worked in food packaging and 100 employees worked in other activities. During the peak summer harvest period, we hire up to approximately 7,000 seasonal employees to help package fruits and vegetables. If there is an increase to minimum wage rates, this could have a negative impact on costs of operations. Many of our packaging operations are located in rural communities that may not have sufficient labor pools, requiring us to hire employees from other regions. An inability to hire and train sufficient employees during the critical harvest period could materially and adversely affect our business, financial condition and results of operations.

There may be increased governmental legislative and regulatory activity in reaction to consumer perception related to BPA.

There has been continued state legislative activity to ban Bisphenol-A ("BPA") from food contact packaging. These legislative decisions are predominantly driven by consumer perception that BPA may be harmful. These actions have been taken despite the scientific evidence and general consensus of United States and international government agencies that BPA is safe and does not pose a risk to human health. The legislative actions combined with growing public perception about food safety may require us to change some of the materials used as linings in our packaging

materials. Failure to do so could result in a loss of sales as well as loss in value of the inventory utilizing BPA containing materials. The Company, in collaboration with other can makers as well as enamel suppliers, has decided to aggressively work to find alternative materials for can linings not manufactured using BPA. However, commercially acceptable alternatives are not immediately available for some applications and there can be no assurance that these steps will be successful. About 4% of our canned product volume (excluding B&G Foods and purchased canned products) still includes BPA.

Table of Contents

The implementation of the Food Safety Modernization Act of 2011 may affect operations

The Food Safety Modernization Act ("FSMA") was enacted with the goal of enabling the Food and Drug Administration ("FDA") to better protect public health by strengthening the food safety system. FSMA was designed to focus the efforts of FDA on preventing food safety problems rather than relying primarily on reacting to problems after they occur. The law also provides FDA with new enforcement authorities designed to achieve higher rates of compliance with prevention and risk-based food safety standards and to better respond to and contain problems when they do occur. The increased inspections, mandatory recall authority of the FDA, increased scrutiny of foreign sourced or supplied food products, and increased records access may have an impact on our business. As we are already in a highly regulated business, operating under the increased scrutiny of more FDA authority does not appear likely to negatively impact our business. The law also gives FDA important new tools to hold imported foods to the same standards as domestic foods.

The Company's results are dependent on successful marketplace initiatives and acceptance by consumers of the Company's products.

The Company's product introductions and product improvements, along with its other marketplace initiatives, are designed to capitalize on new customer or consumer trends. The FDA recently issued a statement on sodium which referred to an Institute of Medicine statement that too much sodium is a major contributor to high blood pressure. Some of our products contain a moderate amount of sodium per recommended serving, which is based on consumer's preferences for taste. In order to remain successful, the Company must anticipate and react to these new trends and develop new products or packages to address them. While the Company devotes significant resources to meeting this goal, we may not be successful in developing new products or packages, or our new products or packages may not be accepted by customers or consumers.

Regulations related to "conflict minerals" may cause us to incur additional expenses and could limit the supply and increase the cost of certain metals used primarily in manufacturing our canned products.

On August 22, 2012, the SEC adopted a new rule requiring disclosures of specified minerals, known as conflict minerals, that are necessary to the functionality or production of products manufactured or contracted to be manufactured by companies filing public reports. The rule, which requires a disclosure report to be filed by May 31 each year, requires companies to perform country of origin inquiries, due diligence as required, disclosure, and reporting whether such minerals originate from the Democratic Republic of Congo or an adjoining country. The conflict mineral rule could affect sourcing at competitive prices and availability in sufficient quantities of certain minerals, including, tin, which is used primarily in the manufacture of our cans. The number of suppliers, who provide conflict-free minerals in steel production, or other components, may be limited. In addition, there may be significant costs associated with complying with the disclosure requirements, such as costs related to determining the source of certain minerals used in the manufacture of our cans, as well as costs of possible changes to products, packages, or

sources of supply as a consequence of such verification activities. Since our supply chain is complex, we may not be able to sufficiently verify the origins of the relevant minerals used in our products through the procedures that we implement, which may hurt our business. In addition, we may encounter significant challenges to satisfy those customers who require that all of the components of our products be certified as conflict-free, which could place us, as well as our competitors, at a disadvantage if we are unable to do so.

Financing Risks

Global economic conditions may materially and adversely affect our business, financial condition and results of operations.

Unfavorable economic conditions, including the impact of recessions in the United States and throughout the world, may negatively affect our business and financial results. These economic conditions could negatively impact (i) consumer demand for our products, (ii) the mix of our products' sales, (iii) our ability to collect accounts receivable on a timely basis, (iv) the ability of suppliers to provide the materials required in our operations and (v) our ability to obtain financing or to otherwise access the capital markets. The strength of the U.S. dollar versus other world currencies could result in increased competition from imported products and decreased sales to our international customers. A prolonged recession could result in decreased revenue, margins and earnings. Additionally, the economic situation could have an impact on our lenders or customers, causing them to fail to meet their obligations to us. The occurrence of any of these risks could materially and adversely affect our business, financial condition and results of operations.

Our ability to manage our working capital and our Revolver is critical to our success.

As of March 31, 2018, we had approximately \$459.8 million of total indebtedness, including various debt agreements and a \$293.5 million outstanding balance on our \$400.0 million to \$500.0 million revolving credit facility ("Revolver"). Debt service for fiscal 2019 is \$9.8 million. During our second and third fiscal quarters, our operations generally require more cash than is available from operations. In these circumstances, it is necessary to borrow under our Revolver. Our ability to obtain financing in the future through credit facilities will be affected by several factors, including our creditworthiness, our ability to operate in a profitable manner and general market and credit conditions. Significant changes in our business or cash outflows from operations could create a need for additional working capital. An inability to obtain additional working capital on terms reasonably acceptable to us or access the Revolver would materially and adversely affect our operations. Additionally, if we need to use a portion of our cash flows to pay principal and interest on our debt, it will reduce the amount of money we have for operations, working capital, capital expenditures, expansions, acquisitions or general corporate or other business activities.

Failure to comply with the requirements of our debt agreements and Revolver could have a material adverse effect on our business.

Our debt agreements and Revolver contain financial and other restrictive covenants which, among other things, limit our ability to borrow money, including with respect to the refinancing of existing indebtedness. These provisions may limit our ability to conduct our business, take advantage of business opportunities and respond to changing business, market and economic conditions. In addition, they may place us at a competitive disadvantage relative to other companies that may be subject to fewer, if any, restrictions. Failure to comply with the requirements of our Revolver and debt agreements could materially and adversely affect our business, financial condition and results of operations. We have pledged our accounts receivable, inventory and the capital stock or other ownership interests that we own in our subsidiaries to secure the credit facility. If a default occurred and was not cured, secured lenders could foreclose on this collateral.

Table of Contents

Risks Relating to Our Stock

Our existing shareholders, if acting together, may be able to exert control over matters requiring shareholder approval.

Holders of our Class B common stock are entitled to one vote per share, while holders of our Class A common stock are entitled to one-twentieth of a vote per share. In addition, holders of our 10% Cumulative Convertible Voting Preferred Stock, Series A, our 10% Cumulative Convertible Voting Preferred Stock, Series B and, solely with respect to the election of directors, our 6% Cumulative Voting Preferred Stock, which we refer to as our voting preferred stock, are entitled to one vote per share. As of March 31, 2018, holders of Class B common stock and voting preferred stock held 88.0% of the combined voting power of all shares of capital stock then outstanding and entitled to vote. These shareholders, if acting together, would be in a position to control the election of our directors and to effect or prevent certain corporate transactions that require majority or supermajority approval of the combined classes, including mergers and other business combinations. This may result in us taking corporate actions that you may not consider to be in your best interest and may affect the price of our common stock.

As of March 31, 2018, our current executive officers and directors beneficially owned 12.6% of our outstanding shares of Class A common stock, 52.0% of our outstanding shares of Class B common stock and 53.5% of our voting preferred stock, or 47.7% of the combined voting power of our outstanding shares of capital stock. This concentration of voting power may inhibit changes in control of the Company and may adversely affect the market price of our common stock.

Our certificate of incorporation and bylaws contain provisions that discourage corporate takeovers.

Certain provisions of our certificate of incorporation and bylaws and provisions of the New York Business Corporation Law may have the effect of delaying or preventing a change in control. Various provisions of our certificate of incorporation and bylaws may inhibit changes in control not approved by our directors and may have the effect of depriving shareholders of any opportunity to receive a premium over the prevailing market price of our common stock in the event of an attempted unsolicited takeover. In addition, the existence of these provisions may adversely affect the market price of our common stock. These provisions include:

a classified board of directors;

a requirement that special meetings of shareholders be called only by our directors or holders of 25% of the voting power of all shares outstanding and entitled to vote at the meeting;

our board of directors has the power to classify and reclassify any of our unissued shares of capital stock into shares of capital stock with such preferences, rights, powers and restrictions as the board of directors may determine;

the affirmative vote of two thirds of the shares present and entitled to vote is required to amend our bylaws or remove a director; and

under the New York Business Corporation Law, in addition to certain restrictions which may apply to “business combinations” involving us and an “interested shareholder”, a plan for our merger or consolidation must be approved by two-thirds of the votes of all outstanding shares entitled to vote thereon. See “Our existing shareholders, if acting together, may be able to exert control over matters requiring shareholder approval.”

We do not pay dividends on our common stock and do not expect to pay common dividends in the future.

We have not declared or paid any cash dividends on our common stock in more than 25 years and we have no intention to do so in the near future. In addition, payment of cash dividends on our common stock is not permitted by the terms of our revolving credit facility.

Other Risks

Risks Related to Our Restatement.

We have identified a material weakness in our internal control over financial reporting. If our remedial measures are insufficient to address the material weakness, or if we otherwise fail to establish and maintain an effective system of internal control over financial reporting, we may not be able to accurately report our financial results, timely file our periodic reports, maintain our reporting status or prevent fraud.

In connection with our assessment of the effectiveness of our internal control over financial reporting as of March 31, 2018, we concluded there was a material weakness in internal control over financial reporting. See Item 9A — “*Controls and Procedures*.” Our management or our independent registered public accounting firm may identify other material weaknesses in our internal control over financial reporting in the future. The existence of internal control material weaknesses may result in current and potential stockholders losing confidence in our financial reporting, which could harm our business, the market price of our common stock, and our ability to retain our current, or obtain new, alliance and collaboration agreements’ with our partners. In addition, the existence of material weaknesses in our internal control over financial reporting may affect our ability to timely file periodic reports under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). The inability to timely file periodic reports could result in the SEC revoking the registration of our common stock, which would prohibit us from listing or having

our stock quoted on The NASDAQ Global Select Market or any other stock exchange. This would have an adverse effect on our business and stock price by limiting the publicly available information regarding us and greatly reducing the ability of our stockholders to sell or trade our common stock.

Tax legislation could impact future cash flows.

The Company uses the Last-In, First-Out (LIFO) method of inventory accounting. As of March 31, 2018, we had a LIFO reserve of \$158.8 million, which, at the U.S. corporate tax rates (federal and state), represents approximately \$39.7 million of income taxes, payment of which is delayed to future dates based upon changes in inventory costs. From time-to-time, discussions regarding changes in U.S. tax laws have included the potential of LIFO being repealed. Should LIFO be repealed, the \$39.7 million of postponed taxes, plus any future benefit realized prior to the date of repeal, would likely have to be repaid over some period of time. Repayment of these postponed taxes will reduce the amount of cash that we would have available to fund our operations, working capital, capital expenditures, expansions, acquisitions or general corporate or other business activities. This could materially and adversely affect our business, financial condition and results of operations.

The impact of the U.S. Tax Cut and Jobs Act signed into law on December 22, 2017 on our reported results for fiscal 2018 and beyond may differ from the estimates provided in this report due to changes in interpretations and assumptions we have made, guidance that may be issued and the other actions we may take as a result of the new tax law different from that currently contemplated.

The tax status of our insurance subsidiary could be challenged resulting in an acceleration of income tax payments.

In conjunction with our workers' compensation program, we operate a wholly owned insurance subsidiary, Dundee Insurance Company, Inc. We recognize this subsidiary as an insurance company for federal income tax purposes with respect to our consolidated federal income tax return. In the event the Internal Revenue Service ("IRS") were to determine that this subsidiary does not qualify as an insurance company, we could be required to make accelerated income tax payments to the IRS that we otherwise would have deferred until future periods.

These facilities primarily package various fruit and vegetable products. Most of the facilities are owned by the Company. The Company is a lessee under a number of operating leases and a capital lease for equipment and real property used for packaging and warehousing. The Company announced that it will cease production and close its Modesto, California plant prior to the 2018 production season.

The Company believes that these facilities are suitable and adequate for the purposes for which they are currently intended. All locations, although highly utilized, have the ability to expand as sales requirements justify. Because of the seasonal production cycles, the exact extent of utilization is difficult to measure. In certain circumstances, the theoretical full efficiency levels are being reached; however, expansion of the number of production days or hours could increase the output by up to 20% for a season.

Certain of the Company's facilities are mortgaged to financial institutions to secure long-term debt. See Notes 4, 5 and 6 of Item 8, Financial Statements and Supplementary Data, for additional information about the Company's long-term debt and lease commitments.

Item 3

Market for Registrant’s Common Stock, Related Security Holder Matters and Issuer Purchases of Equity Securities

Each class of preferred stock receives preference as to dividend payment and declaration over any common stock. In addition, refer to the information in the 2018 Annual Report, “Shareholder Information and Quarterly Results”, which is incorporated by reference.

Securities Authorized for Issuance Under Equity Compensation Plans

On August 10, 2007, the 2007 Equity Incentive Plan (the “2007 Equity Plan”) was approved by shareholders at the Company’s annual meeting. The 2007 Equity Plan had a 10-year term and in 2018 was extended for an additional ten years, and authorized the issuance of up to 100,000 shares of either Class A Common Stock and Class B Common Stock or a combination of the two classes of stock. 3,408 shares were awarded in fiscal year 2018 under the terms of the 2007 Equity Plan. As of March 31, 2018, there were 62,240 shares available for distribution as part of future awards under the 2007 Equity Plan. No additional shares have been awarded under the 2007 Equity Plan through the date of this Form 10-K filing.

There are no equity compensation plans not approved by the Company’s shareholders.

(1) No shares were purchased under the Company's share repurchase program. The purchases were made in open market transactions by the Trustees of the Seneca Foods Corporation Employees' Savings Plan, matching Trustees of Dundee Insurance Company, Inc. and the Seneca Foods, L.L.C. 401(k) Retirement Savings Plan to provide employee contributions under the Plans.

(2) In 2012 the Company's Board of Directors authorized the repurchase of the Company's stock. The number of shares authorized for repurchase has been increased from time to time, most recently on March 10, 2015 when the repurchase program was increased to 2,500,000 shares. As of March 31, 2018, the Company has purchased 1,433,842 shares and there remains 1,066,158 shares available to purchase under the program.

Item 9A

Controls and Procedures

Evaluation of disclosure controls and procedures. Based on the evaluation of our disclosure controls and procedures (as defined in the Rules 13a-15(e) and 15d-15(e) under the Exchange Act) required by Exchange Act Rules 13a-15(b) or 15d-15(b), our Chief Executive Officer and Chief Financial Officer have concluded that as of the end of the period covered by this report, our disclosure controls and procedures were not effective as a result of the material weakness in our internal control over financial reporting discussed below.

Changes in internal controls. There were no changes in our internal control over financial reporting as defined in Exchange Act Rules 13a-15(f) and 15d-15(f) that occurred during our most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Material Weakness. In reviewing the accounting for certain transactions related to the Company's bill and hold revenue recognition for the Green Giant contract, our management identified a deficiency in our internal control over financial reporting that is described in Management's Annual Report on Internal Control Over Financial Reporting below. Our management has concluded that this deficiency constitutes a material weakness in our internal control over financial reporting. We also developed a remediation plan for this material weakness, which is also described below.

Management's Annual Report on Internal Control Over Financial Reporting. Our management, including our Chief Executive Officer and Chief Financial Officer, is responsible for establishing and maintaining adequate internal control over financial reporting. Our management conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework and criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In conducting the Company's evaluation of the effectiveness of its internal control over financial reporting, the Company excluded the acquisition of Truitt Bros., Inc. (Truitt) which was completed April 3, 2017. Truitt constituted 5.2% of total assets as of March 31, 2018, and 7.0% of revenues respectively, for the year then ended March 31, 2018. Refer to Note 3, Acquisition to the consolidated financial statements for further discussion of the Truitt acquisition and its impact on the Company's consolidated financial statements. Based on its evaluation, our management has concluded that our internal control over financial reporting was not effective as of March 31, 2018, due to the material weakness in our internal control over financial reporting discussed below. A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis.

In reviewing the accounting for certain transactions related to the Company's contract packing agreement, the Green Giant contract, our management identified a deficiency in the effectiveness of a control intended to properly document and review relevant facts in connection with our revenue recognition policy with respect to bill and hold transactions. The Company has determined that (1) the audited consolidated financial statements as of and for the years ended March 31, 2014, 2015, 2016 and 2017 and the independent registered public accounting firm's reports thereon and (2) the unaudited condensed consolidated financial statements as of and for each of the interim periods within the years ended March 31, 2017 and 2018 should be restated to correct inadvertent errors in the application of generally accepted accounting principles dealing with complex and technical accounting issues relating to "bill and hold" revenue recognition. This Annual Report on Form 10-K includes expanded financial information and other disclosures in lieu of filing separate amended annual reports for the affected periods. The Public Company Accounting Oversight Board Standards require that a restatement of financial statements be regarded as a significant deficiency in internal control over financial reporting and a strong indicator of a material weakness. Consistent with these standards, management has concluded that the restatements of its consolidated financial statements constitutes a material weakness.

The Company's independent registered public accountant has issued its report on the effectiveness of the Company's internal control over financial reporting. The report appears on the next page.

Remediation Plan. Management has begun implementing a remediation plan to address the control deficiency that led to the material weakness. The remediation plan includes the following:

Implementing specific review procedures designed to enhance our revenue recognition control; and

Strengthening our revenue recognition control with improved documentation standards, technical oversight and training.

We currently plan to have our enhanced review procedures and documentation standards in place and operating in the first quarter of Fiscal 2019. Our goal is to remediate this material weakness by the end of Fiscal 2019, subject to there being sufficient opportunities to conclude, through testing, that the enhanced control is operating effectively.

Report of Independent Registered Public Accounting Firm

Shareholders and Board of Directors

Seneca Foods Corporation

Marion, New York

Opinion on Internal Control over Financial Reporting

We have audited Seneca Foods Corporation's (the "Company's") internal control over financial reporting as of March 31, 2018, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (the "COSO criteria"). In our opinion, the Company did not maintain, in all material respects, effective internal control over financial reporting as of March 31, 2018, based on the COSO criteria.

We do not express an opinion or any other form of assurance on management's statements referring to any corrective actions taken by the Company after the date of management's assessment.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated balance sheets of the Company and subsidiaries as of March 31, 2018 and 2017, the related consolidated statements of net (loss) earnings, comprehensive (loss) income, stockholders' equity, and cash flows for each of the three years in the period ended March 31, 2018, and the related notes (collectively referred to as "the financial statements") and our report dated June 29, 2018, expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Item 9A, Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit of internal control over financial reporting in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. A material weakness regarding management's failure to design and maintain controls over bill and hold revenue recognition has been identified and described in management's assessment. This material weakness was considered in determining the nature, timing, and extent of audit tests applied in our audit of the 2018 financial statements, and this report does not affect our report dated June 29, 2018 on those financial statements.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Report of Independent Registered Public Accounting Firm

Shareholders and Board of Directors

Seneca Foods Corporation

Marion, New York

The audits referred to in our report dated June 29, 2018 relating to the consolidated financial statements of Seneca Foods Corporation, which is incorporated in Item 8 of Form 10-K for the year ended March 31, 2018 by reference to the annual report to shareholders for the year ended March 31, 2018 also included the audit of the financial statement schedule listed in the accompanying index. This financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement schedule based on our audits.

In our opinion, such financial statement schedule, when read in connection with the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.
