SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

(Mark One):

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended: December 31, 2018

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from: ___________ to ___________

Commission File Number: 000-18464

EMCLAIRE FINANCIAL CORP
(Exact name of registrant as specified in its charter)

Pennsylvania	25-1606091
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)

612 Main Street, Emlenton, PA	16373
(Address of principal executive office)	(Zip Code)

Registrant's telephone number: (844) 767-2311

Securities registered pursuant to Section 12(b) of the Act:

Common Stock, par value $1.25 per share	NASDAQ Capital Market (NASDAQ)
(Title of Class)	(Name of exchange on which registered)

Securities registered pursuant to Section 12(g) of the Act: None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. YES NO .

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. YES NO .

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 month (or for such shorter period that the registrant was required to submit and post such files). YES NO .

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company (do not check if a smaller reporting company).

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). YES NO .

As of June 30, 2018, the aggregate value of the 1,906,620 shares of Common Stock of the Registrant issued and outstanding on such date, which excludes 364,519 shares held by the directors and officers of the Registrant as a group, was approximately $65.4 million. This figure is based on the last sales price of $34.30 per share of the Registrant's Common Stock on June 30, 2018. The number of outstanding shares of common stock as of March 20, 2019, was 2,698,712.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement for the 2019 Annual Meeting of Stockholders are incorporated by reference in Part III of this Form 10-K.

Table of Contents

Discussions of certain matters in this Form 10-K and other related year end documents may constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act), and as such, may involve risks and uncertainties. Forward-looking statements, which are based on certain assumptions and describe future plans, strategies, and expectations, are generally identifiable by the use of words or phrases such as "believe", "plan", "expect", "intend", "anticipate", "estimate", "project", "forecast", "may increase", "may fluctuate", "may improve" and similar expr future or conditional verbs such as "will", "should", "would", and "could". These forward-looking statements relate to, amo other things, expectations of the business environment in which Emclaire Financial Corp operates, projections of future performance, potential future credit experience, perceived opportunities in the market and statements regarding the Corporation's mission and vision. The Corporation's actual results, performance and achievements may differ materially from the results, performance, and achievements expressed or implied in such forward-looking statements due to a wide range of factors. These factors include, but are not limited to, changes in interest rates, general economic conditions, the local economy, the demand for the Corporation's products and services, accounting principles or guidelines, legislative and regulatory changes, monetary and fiscal policies of the U.S. Government, U.S. Treasury, and Federal Reserve, real estate markets, competition in the financial services industry, attracting and retaining key personnel, performance of new employees, regulatory actions, changes in and utilization of new technologies and other risks detailed in the Corporation's reports filed with the Securities and Exchange Commission (SEC) from time to time. These factors should be considered in evaluating the forward-looking statements, and undue reliance should not be placed on such statements. The Corporation does not undertake, and specifically disclaims any obligation, to update any forward-looking statements to reflect occurrences or unanticipated events or circumstances after the date of such statements.

PART I

Item 1. Business

General

Emclaire Financial Corp (the Corporation) is a Pennsylvania corporation and financial holding company that provides a full range of retail and commercial financial products and services to customers in western Pennsylvania through its wholly owned subsidiary bank, The Farmers National Bank of Emlenton (the Bank).

The Bank was organized in 1900 as a national banking association and is a financial intermediary whose principal business consists of attracting deposits from the general public and investing such funds in real estate loans secured by liens on residential and commercial properties, consumer loans, commercial business loans, marketable securities and interest-earning deposits. The Bank currently operates through a network of twenty retail branch offices in Venango, Allegheny, Butler, Clarion, Clearfield, Crawford, Elk, Jefferson and Mercer counties, Pennsylvania and Hancock

county, West Virginia. The Corporation and the Bank are headquartered in Emlenton, Pennsylvania.

The Bank is subject to examination and comprehensive regulation by the Office of the Comptroller of the Currency (OCC), which is the Bank’s chartering authority, and the Federal Deposit Insurance Corporation (FDIC), which insures customer deposits held by the Bank to the full extent provided by law. The Bank is a member of the Federal Reserve Bank of Cleveland (FRB) and the Federal Home Loan Bank of Pittsburgh (FHLB). The Corporation is a registered bank holding company pursuant to the Bank Holding Company Act of 1956, as amended (BHCA), and a financial holding company under the Gramm-Leach Bliley Act of 1999 (GLBA) and is subject to the regulation and examination by the FRB.

On October 1, 2018, the Corporation completed the acquisition of Community First Bancorp, Inc. (CFB) and its subsidiary, Community First Bank, in accordance with the terms of the Agreement and Plan of Merger, dated as of May 25, 2018, in exchange for 419,173 shares of common stock valued at $15.6 million and $2.4 million in cash. The Corporation also issued 420,593 shares of preferred stock valued at $4.2 million in exchange for preferred stock of Community First Bank. In addition, on September 30, 2017, the Corporation completed the acquisition of Northern Hancock Bank and Trust Co. (NHB) in accordance with the terms of the Agreement and Plan of Merger, dated as of May 4, 2017, in exchange for 54,445 shares of common stock valued at $1.7 million and $22,000 in cash. These acquisitions expanded the Corporation's franchise into new markets, strengthened existing markets and increased the Corporation's consolidated total assets, loans and deposits.

At December 31, 2018, the Corporation had $898.9 million in total assets, $80.0 million in stockholders’ equity, $708.7 million in net loans and $761.5 million in total deposits.

Lending Activities

General. The principal lending activities of the Corporation are the origination of residential mortgage, commercial mortgage, commercial business and consumer loans. Nearly all of the Corporation's loans are originated in and secured by property within the Corporation's primary market area.

One-to-Four Family Mortgage Loans. The Corporation offers first mortgage loans secured by one-to-four family residences located mainly in the Corporation's primary lending area. One-to-four family mortgage loans amounted to 41.3% of the total loan portfolio at December 31, 2018. Typically such residences are single-family owner occupied units. The Corporation is an approved, qualified lender for the Federal Home Loan Mortgage Corporation (FHLMC) and the FHLB. As a result, the Corporation may sell loans to and service loans for the FHLMC and FHLB in market conditions and circumstances where this is advantageous in managing interest rate risk.

Home Equity Loans. The Corporation originates home equity loans secured by single-family residences. Home equity loans amounted to 14.5% of the total loan portfolio at December 31, 2018. These loans may be either a single advance fixed-rate loan with a term of up to 20 years or a variable rate revolving line of credit. These loans are made only on owner-occupied single-family residences.

Commercial Business and Commercial Real Estate Loans. Commercial lending constitutes a significant portion of the Corporation's lending activities. Commercial business and commercial real estate loans amounted to 42.6% of the total loan portfolio at December 31, 2018. Commercial real estate loans generally consist of loans granted for commercial purposes secured by commercial or other nonresidential real estate. Commercial loans consist of secured and unsecured loans for such items as capital assets, inventory, operations and other commercial purposes.

Consumer Loans. Consumer loans generally consist of fixed-rate term loans for automobile purchases, home improvements not secured by real estate, capital and other personal expenditures. The Corporation also offers unsecured revolving personal lines of credit and overdraft protection. Consumer loans amounted to 1.6% of the total loan portfolio at December 31, 2018.

Loans to One Borrower. National banks are subject to limits on the amount of credit that they can extend to one borrower. Under current law, loans to one borrower are limited to an amount equal to 15% of unimpaired capital and surplus on an unsecured basis, and an additional amount equal to 10% of unimpaired capital and surplus if the loan is secured by readily marketable collateral. At December 31, 2018, the Bank's loans to one borrower limit based upon 15% of unimpaired capital was $11.5 million. The Bank may grant credit to borrowers in excess of the legal lending limit as part of the Legal Lending Limit Pilot Program approved by the OCC which allows the Bank to exceed its legal lending limit within certain parameters. At December 31, 2018, the Bank's largest single lending relationship had

an outstanding balance of $8.6 million.

Loan Portfolio. The following table sets forth the composition and percentage of the Corporation's loans receivable in dollar amounts and in percentages of the portfolio as of December 31:

(Dollar amounts in thousands)	2018 Dollar Amount	%	2017 Dollar Amount	%	2016 Dollar Amount	%	2015 Dollar Amount	%	2014 Dollar Amount	%
Mortgage loans on real estate:										
Residential mortgages	$295,405	41.3 %	$221,823	38.1 %	$198,167	38.0 %	$139,305	32.0 %	$107,173	27.8 %
Home equity loans and lines of credit	103,752	14.5 %	99,940	17.1 %	91,359	17.5 %	87,410	20.1 %	89,106	23.2 %
Commercial real estate	238,734	33.4 %	193,068	33.1 %	166,994	32.1 %	129,691	29.8 %	110,810	28.8 %
Total real estate loans	637,891	89.2 %	514,831	88.3 %	456,520	87.6 %	356,406	81.9 %	307,089	79.8 %
Other loans:										
Commercial business	66,009	9.2 %	58,941	10.1 %	57,788	11.1 %	71,948	16.5 %	70,185	18.2 %
Consumer	11,272	1.6 %	9,589	1.6 %	6,672	1.3 %	6,742	1.6 %	7,598	2.0 %
Total other loans	77,281	10.8 %	68,530	11.7 %	64,460	12.4 %	78,690	18.1 %	77,783	20.2 %
Total loans receivable	715,172	100.0%	583,361	100.0%	520,980	100.0%	435,096	100.0%	384,872	100.0%
Less: Allowance for loan losses	6,508		6,127		5,545		5,205		5,224	
Net loans receivable	$708,664		$577,234		$515,435		$429,891		$379,648	

Table of Contents

The following table sets forth the final maturity of loans in the Corporation's portfolio as of December 31, 2018. Demand loans having no stated schedule of repayment and no stated maturity are reported as due within one year.

(Dollar amounts in thousands)	Due in one year or less	Due from one to five years	Due from five to ten years	Due after ten years	Total
Residential mortgages	$1,004	$4,727	$27,760	$261,914	$295,405
Home equity loans and lines of credit	792	11,609	21,088	70,263	103,752
Commercial real estate	981	33,849	78,955	124,949	238,734
Commercial business	3,386	22,490	11,450	28,683	66,009
Consumer	363	7,034	1,912	1,963	11,272
	$6,526	$79,709	$141,165	$487,772	$715,172

The following table sets forth the dollar amount of the Corporation's fixed and adjustable rate loans with maturities greater than one year as of December 31, 2018:

(Dollar amounts in thousands)	Fixed rates	Adjustable rates
Residential mortgages	$281,911	$12,490
Home equity loans and lines of credit	89,046	13,914
Commercial real estate	42,182	195,571
Commercial business	25,656	36,967
Consumer	9,149	1,760
	$447,944	$260,702

Contractual maturities of loans do not reflect the actual term of the Corporation's loan portfolio. The average life of mortgage loans is substantially less than their contractual terms because of loan prepayments and enforcement of due-on-sale clauses, which give the Corporation the right to declare a loan immediately payable in the event, among other things, that the borrower sells the real property subject to the mortgage. Scheduled principal amortization also reduces the average life of the loan portfolio. The average life of mortgage loans tends to increase when current market mortgage rates substantially exceed rates on existing mortgages and conversely, decrease when rates on existing mortgages substantially exceed current market interest rates.

Delinquencies and Classified Assets

Delinquent Loans and Other Real Estate Acquired Through Foreclosure (OREO). Typically, a loan is considered past due and a late charge is assessed when the borrower has not made a payment within 15 days from the payment due date. When a borrower fails to make a required payment on a loan, the Corporation attempts to cure the deficiency by contacting the borrower. The initial contact with the borrower is made shortly after the 17th day following the due date for which a payment was not received. In most cases, delinquencies are cured promptly.

If the delinquency exceeds 60 days, the Corporation works with the borrower to set up a satisfactory repayment schedule. Typically, loans are considered nonaccruing upon reaching 90 days delinquent unless the credit is well secured and in the process of collection, although the Corporation may be receiving partial payments of interest and partial repayments of principal on such loans. When a loan is placed in nonaccrual status, previously accrued but unpaid interest is deducted from interest income. The Corporation institutes foreclosure action on secured loans only if all other remedies have been exhausted. If an action to foreclose is instituted and the loan is not reinstated or paid in full, the property is sold at a judicial or trustee’s sale at which the Corporation may be the buyer.

Real estate properties acquired through, or in lieu of, foreclosure are to be sold and are initially recorded at fair value at the date of foreclosure less costs to sell, thereby establishing a new cost basis. After foreclosure, management periodically performs valuations and the real estate is carried at the lower of carrying amount or fair value less the cost to sell the property. Changes in the valuation allowance are included in the loss on foreclosed real estate. The Corporation generally attempts to sell its OREO properties as soon as practical upon receipt of clear title.

As of December 31, 2018, the Corporation’s nonperforming assets were $3.7 million, or 0.42% of the Corporation’s total assets, compared to $4.2 million, or 0.56% of the Corporation’s total assets, at December 31, 2017. Nonperforming assets at December 31, 2018 included nonaccrual loans and OREO of $2.3 million and $701,000, respectively. Included in nonaccrual loans at December 31, 2018 were four loans totaling $394,000 considered to be troubled debt restructurings (TDRs).

Table of Contents

Classified Assets. Regulations applicable to insured institutions require the classification of problem assets as "substandard," "doubtful," or "loss" depending upon the existence of certain characteristics as discussed below. A category designated "special mention" must also be maintained for assets currently not requiring the above classifications but having potential weakness or risk characteristics that could result in future problems. An asset is classified as substandard if not adequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. A substandard asset is characterized by the distinct possibility that the Corporation will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful have all the weaknesses inherent in those classified as substandard and these weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable or improbable. Assets classified as loss are considered uncollectible and of such little value that their continuance as assets is not warranted.

The Corporation's classification of assets policy requires the establishment of valuation allowances for loan losses in an amount deemed prudent by management. Valuation allowances represent loss allowances that have been established to recognize the inherent risk associated with lending activities. When the Corporation classifies a problem asset as a loss, the portion of the asset deemed uncollectible is charged off immediately.

The Corporation regularly reviews the problem loans and other assets in its portfolio to determine whether any require classification in accordance with the Corporation's policy and applicable regulations. As of December 31, 2018, the Corporation's classified and criticized assets amounted to $22.9 million or 2.5% of total assets, with $6.5 million identified as special mention and $16.4 million classified as substandard.

Included in classified and criticized assets at December 31, 2018 are three large loan relationships exhibiting credit deterioration that may impact the ability of the borrowers to comply with their present loan repayment terms on a timely basis.

The first relationship, with an outstanding balance of $3.2 million at December 31, 2018, consists of two commercial mortgages which primarily refinanced third-party debt obligations. The debt obligations are secured by a hotel along with all related furniture, fixtures and equipment as well as two undeveloped parcels of land. The hotel is operational; however, cash flow was adversely impacted by elevated operating expenses. That said, results continue to evidence improvement in operating performance. The loans are well supported by guarantors who have significant net worth positions and the ability to support the operations of the hotel, as needed. At December 31, 2018, the loans were performing and classified as special mention. Ultimately, due to the estimated value of the collateral and the willingness and ability of the guarantors to support the loans, the Corporation does not currently expect to incur a loss on this loan.

The second relationship, with an outstanding balance of $2.1 million at December 31, 2018, consists of one commercial mortgage originated for the construction of a hotel and is secured by the hotel and all related furniture, fixtures and equipment. The hotel is complete and operational; however, operating performance has been adversely

impacted due to local market conditions. The loan is guaranteed by the principal shareholders of whom have significant net worth positions and the ability to support the operations of the hotel until stabilization can be achieved. At December 31, 2018, the loan was performing and classified as special mention. Ultimately, due to the estimated value of the hotel and the willingness and ability of the guarantors to support the loan, the Corporation does not currently expect to incur a loss on this loan.

The third relationship, with an outstanding balance of $2.0 million at December 31, 2018, consists of one commercial mortgage originated for the construction of a hotel and is secured by the hotel and all related furniture, fixtures and equipment. The hotel is complete and operational; however, cash flow from the first year of operations significantly lagged management's projections, and as such, was insufficient for debt service requirements. Although results continue to evidence improvement in operating performance, cash flow remains marginal. The loan is guaranteed by five individuals, all of whom have significant net worth positions and the ability to support the operations of the hotel until stabilization can be achieved. At December 31, 2018, the loan was performing and classified as substandard. Ultimately, due to the estimated value of the hotel and the willingness and ability of the guarantors to support the loan, the Corporation does not currently expect to incur a loss on this loan.

Table of Contents

The following table sets forth information regarding the Corporation's nonperforming assets as of December 31:

(Dollar amounts in thousands)	2018	2017	2016	2015	2014
Nonperforming loans	$3,028	$3,693	$3,323	$3,069	$6,942
Total as a percentage of gross loans	0.42 %	0.63 %	0.64 %	0.71 %	1.80 %
Repossessions	13	—	—	—	—
Real estate acquired through foreclosure	701	492	291	160	124
Total as a percentage of total assets	0.08 %	0.07 %	0.04 %	0.03 %	0.02 %
Total nonperforming assets	$3,742	$4,185	$3,614	$3,229	$7,066
Total nonperforming assets as a percentage of total assets	0.42 %	0.56 %	0.52 %	0.54 %	1.21 %
Allowance for loan losses as a percentage of nonperforming loans	214.93%	165.91%	166.87%	169.60%	75.25%

Allowance for Loan Losses. Management establishes allowances for estimated losses on loans based upon its evaluation of the pertinent factors underlying the types and quality of loans; historical loss experience based on volume and types of loans; trend in portfolio volume and composition; level and trend of nonperforming assets; detailed analysis of individual loans for which full collectability may not be assured; determination of the existence and realizable value of the collateral and guarantees securing such loans and the current economic conditions affecting the collectability of loans in the portfolio. The Corporation analyzes its loan portfolio at least quarterly for valuation purposes and to determine the adequacy of its allowance for loan losses. Based upon the factors discussed above, management believes that the Corporation's allowance for loan losses as of December 31, 2018 of $6.5 million was adequate to cover probable incurred losses in the portfolio at such time.

The following table sets forth an analysis of the allowance for losses on loans receivable for the years ended December 31:

(Dollar amounts in thousands)	2018	2017	2016	2015	2014
Balance at beginning of period	$6,127	$5,545	$5,205	$5,224	$4,869
Provision for loan losses	1,280	903	464	381	670
Charge-offs:					
Residential mortgages	(71)	(40)	(101)	(79)	(134)
Home equity loans and lines of credit	(155)	(114)	(118)	(221)	(72)

Consumer loans	56	1.6	%	53	1.6	%	52	1.6	%	45	2.0	%	52	2.6	%
	$6,508	100.0	%	$6,127	100.0	%	$5,545	100.0	%	$5,205	100.0		$5,224	100.0	%

Investment Activities

General. The Corporation maintains an investment portfolio of securities such as U.S. government agencies, mortgage-backed securities, municipal and equity securities.

Investment decisions are made within policy guidelines as established by the Board of Directors. This policy is aimed at maintaining a diversified investment portfolio, which complements the overall asset/liability and liquidity objectives of the Corporation, while limiting the related credit risk to an acceptable level.

The following table sets forth certain information regarding the fair value, weighted average yields and contractual maturities of the Corporation’s securities as of December 31, 2018:

(Dollar amounts in thousands)	Due in 1 year or less	Due from 1 to 3 years	Due from 3 to 5 years	Due from 5 to 10 years	Due after 10 years	No scheduled maturity	Total
U.S. Treasury	$495	$2,962	$988	$—	$—	$ —	$4,445

(1) Taxable equivalent adjustments have been made in calculating yields on state and political subdivision securities.

Table of Contents

The following table sets forth the fair value of the Corporation's investment securities as of December 31:

(Dollar amounts in thousands)	2018	2017	2016
U.S. Treasury	$4,445	$4,472	$4,500
U.S. government sponsored entities and agencies	16,783	13,926	8,998
U.S. agency mortgage-backed securities: residential	27,176	20,758	25,626
U.S. agency collateralized mortgage obligations: residential	18,664	21,924	24,706
Corporate securities	22,732	9,030	7,932
State and political subdivision	7,918	29,240	27,608
Equity securities	7	1,817	2,190
	$97,725	$101,167	$101,560

For additional information regarding the Corporation's investment portfolio see "Note 2 – Securities" to the consolidated financial statements on page F-14.

Sources of Funds

General. Deposits are the primary source of the Corporation's funds for lending and investing activities. Secondary sources of funds are derived from loan repayments, investment maturities and borrowed funds. Loan repayments can be considered a relatively stable funding source, while deposit activity is greatly influenced by interest rates and general market conditions. The Corporation also has access to funds through other various sources. For additional information about the Corporation's sources of funds, see "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity" in Item 7.

Deposits. The Corporation offers a wide variety of deposit account products to both consumer and commercial deposit customers, including time deposits, noninterest bearing and interest bearing demand deposit accounts, savings deposits and money market accounts.

Deposit products are promoted in periodic newspaper, radio and other forms of advertisements, along with notices provided in customer account statements. The Corporation's marketing strategy is based on its reputation as a community bank that provides quality products and personalized customer service.

The Corporation sets interest rates on its interest bearing deposit products that are competitive with rates offered by other financial institutions in its market area. Management reviews interest rates on deposits bi-weekly and considers a

number of factors, including: (1) the Corporation's internal cost of funds; (2) rates offered by competing financial institutions; (3) investing and lending opportunities; and (4) the Corporation's liquidity position.

The following table summarizes the Corporation's deposits as of December 31:

(Dollar amounts in thousands)	2018			2017		
Type of accounts	Weighted average rate	Amount	Percent	Weighted average rate	Amount	Percent
Non-interest bearing deposits	—	$148,893	19.6 %	—	$126,263	19.3 %
Interest bearing demand deposits	0.52%	391,054	51.4 %	0.44%	357,693	54.6 %
Time deposits	1.84%	221,599	29.1 %	1.58%	170,687	26.1 %
Total	0.80%	$761,546	100.0%	0.65%	$654,643	100.0%

The following table sets forth maturities of the Corporation's time deposits of $100,000 or more at December 31, 2018 by time remaining to maturity:

(Dollar amounts in thousands)	Amount
Three months or less	$9,606
Over three months to six months	10,607
Over six months to twelve months	17,832
Over twelve months	85,609
	$123,654

Table of Contents

Borrowings. Borrowings may be used to compensate for reductions in deposit inflows or net deposit outflows, or to support lending and investment activities. These borrowings include FHLB advances, federal funds, repurchase agreements, advances from the Federal Reserve Discount Window and lines of credit at the Bank and the Corporation with other correspondent banks. The following table summarizes information with respect to borrowings at or for the years ending December 31:

(Dollar amounts in thousands)	2018	2017
Ending balance	$45,350	$26,000
Average balance	24,250	40,537
Maximum balance	57,675	54,250
Average rate	2.73 %	3.00 %

For additional information regarding the Corporation's deposit base and borrowed funds, see "Management's Discussion and Analysis of Financial Condition and Results of Operations – Deposits and Borrowed Funds" in Item 7 and "Note 8 – Deposits" on page F-23 and "Note 9 – Borrowed Funds" on page F-24 to the consolidated financial statements.

Subsidiary Activity

The Corporation has two wholly owned subsidiaries, the Bank and the Title Company. The Title Company provides real estate settlement services to the Bank and other customers. As of December 31, 2018, the Bank and the Title Company had no subsidiaries.

Personnel

At December 31, 2018, the Corporation had 164 full time equivalent employees, compared to 137 at December 31, 2017. There is no collective bargaining agreement between the Corporation and its employees, and the Corporation believes its relationship with its employees is satisfactory.

Competition

The Corporation competes for loans, deposits and customers with other commercial banks, savings and loan associations, securities and brokerage companies, mortgage companies, insurance companies, finance companies, money market funds, credit unions and other nonbank financial service providers.

Supervision and Regulation

General. Bank holding companies and banks are extensively regulated under both federal and state law. Set forth below is a summary description of certain provisions of certain laws that relate to the regulation of the Corporation and the Bank. The description does not purport to be complete and is qualified in its entirety by reference to the applicable laws and regulations.

The Corporation. The Corporation is a registered bank holding company and subject to regulation and examination by the FRB under the BHCA. The Corporation is required to file periodic reports with the FRB and such additional information as the FRB may require. The Bank Holding Company rating system emphasizes risk management and evaluation of the potential impact of non-depository entities on safety and soundness.

The FRB may require the Corporation to terminate an activity or terminate control of or liquidate or divest certain subsidiaries, affiliates or investments when the FRB believes the activity or the control of the subsidiary or affiliate constitutes a significant risk to the financial safety, soundness or stability of any of its banking subsidiaries. The FRB also has the authority to regulate provisions of certain bank holding company debt, including the authority to impose interest rate ceilings and reserve requirements on such debt. Under certain circumstances, the Corporation must file written notice and obtain FRB approval prior to purchasing or redeeming its equity securities.

The Corporation is required to obtain prior FRB approval for the acquisition of more than 5% of the outstanding shares of any class of voting securities or substantially all of the assets of any bank or bank holding company. Prior FRB approval is also required for the merger or consolidation of the Corporation and another bank holding company.

The BHCA generally prohibits a bank holding company from acquiring direct or indirect ownership or control of more than 5% of the outstanding voting shares of any company that is not a bank or bank holding company and from engaging directly or indirectly in activities other than those of banking, managing or controlling banks, or furnishing services to its subsidiaries. However, subject to the prior FRB approval, a bank holding company may engage in any, or acquire shares of companies engaged in, activities that the FRB deems to be so closely related to banking or managing or controlling banks as to be a proper incident thereto.

The BHCA also authorizes bank holding companies to engage in securities, insurance and other activities that are financial in nature or incidental to a financial activity. In order to undertake these activities, a bank holding company must become a financial holding company by submitting to the appropriate FRB a declaration that the company elects to be a financial holding company and a certification that all of the depository institutions controlled by the company are well capitalized and well managed. The Corporation submitted a declaration of election to become a financial holding company with the FRB which became effective in March 2007. Federal legislation also directed federal regulators to require depository institution holding companies to serve as a source of strength for their depository institution subsidiaries.

Under FRB regulations, the Corporation is required to serve as a source of financial and managerial strength to the Bank and may not conduct operations in an unsafe or unsound manner. In addition, it is the FRB's policy that a bank holding company should stand ready to use available resources to provide adequate capital funds to its subsidiary banks during periods of financial stress or adversity and should maintain the financial flexibility and capital raising capacity to obtain additional resources for assisting its subsidiary banks. A bank holding company's failure to meet its obligations to serve as a source of strength to its subsidiary banks will generally be considered by the FRB to be an unsafe and unsound banking practice or a violation of FRB regulations or both.

The Corporation is also a bank holding company within the meaning of the Pennsylvania Banking Code. As such, the Corporation and its subsidiaries are subject to examination by, and may be required to file reports with, the Pennsylvania Department of Banking and Securities.

The Corporation's securities are registered with the SEC under the Exchange Act. As such, the Corporation is subject to the information, proxy solicitation, insider trading, corporate governance, and other requirements and restrictions of the Exchange Act. The public may obtain all forms and information filed with the SEC through its website http://www.sec.gov.

In December 2013, federal regulators adopted final rules to implement the provisions of the Dodd Frank Act commonly referred to as the Volcker Rule and established July 21, 2015 as the end of the conformance period. The regulations contain prohibitions and restrictions on the ability of financial institutions, holding companies and their affiliates to engage in proprietary trading and to hold certain interests in, or to have certain relationships with, various types of investment funds, including hedge funds and private equity funds. However, legislation enacted in 2018 exempts bank with less than $10 billion in assets from the Volcker Rule.

The Bank. As a national banking association, the Bank is subject to primary supervision, examination and regulation by the OCC. The Bank is also subject to regulations of the FDIC as administrator of the Deposit Insurance Fund (DIF) and the FRB. If, as a result of an examination of the Bank, the OCC should determine that the financial condition, capital resources, asset quality, earnings prospects, management, liquidity or other aspects of the Bank's operations are unsatisfactory or that the Bank is violating or has violated any law or regulation, various remedies are available to the

OCC. Such remedies include the power to enjoin “unsafe or unsound practices,” to require affirmative action to correct any conditions resulting from any violation or practice, to issue an administrative order that can be judicially enforced, to direct an increase in capital, to restrict the Bank’s growth, to assess civil monetary penalties, and to remove officers and directors. The FDIC has similar enforcement authority, in addition to its authority to terminate the Bank’s deposit insurance in the absence of action by the OCC and upon a finding that the Bank is operating in an unsafe or unsound condition, is engaging in unsafe or unsound activities, or that the Bank’s conduct poses a risk to the deposit insurance fund or may prejudice the interest of its depositors.

A national bank may have a financial subsidiary engaged in any activity authorized for national banks directly or certain permissible activities. Generally, a financial subsidiary is permitted to engage in activities that are “financial in nature” or incidental thereto, even though they are not permissible for the national bank itself. The definition of “financial in nature” includes, among other items, underwriting, dealing in or making a market in securities, including, for example, distributing shares of mutual funds. The subsidiary may not, however, engage as principal in underwriting insurance, issue annuities or engage in real estate development or investment or merchant banking.

The Sarbanes-Oxley Act of 2002. The Sarbanes-Oxley Act of 2002 established a comprehensive framework to modernize and reform the oversight of public company auditing, improve the quality and transparency of financial reporting by those companies and strengthen the independence of auditors. Among other things, the legislation (i) created a public company accounting oversight board that is empowered to set auditing, quality control and ethics standards, to inspect registered public accounting firms, to conduct investigations and to take disciplinary actions, subject to SEC oversight and review; (ii) strengthened auditor independence from corporate management by limiting the scope of consulting services that auditors can offer their public company audit clients; (iii) heightened the responsibility of public company directors and senior managers for the quality of the financial reporting and disclosure made by their companies; (iv) adopted a number of provisions to deter wrongdoing by corporate management; (v) imposed a number of new corporate disclosure requirements; (vi) adopted provisions which generally seek to limit and expose to public view possible conflicts of interest affecting securities analysis; and (vii) imposed a range of new criminal penalties for fraud and other wrongful acts and extended the period during which certain types of lawsuits can be brought against a company or its insiders.

2010 Regulatory Reform. On July 21, 2010, the Dodd Frank Wall Street Reform and Consumer Protection Act of 2010 was signed into law. The goals of the Dodd Frank Act included restoring public confidence in the financial system following the financial crisis, preventing another financial crisis and permitting regulators to identify shortfalls in the system before another financial crisis can occur. The Dodd Frank Act is also intended to promote a fundamental restructuring of federal banking regulation by taking a systemic view of regulation rather than focusing on regulation of individual financial institutions.

Many of the provisions in the Dodd Frank Act require that regulatory agencies draft implementing regulations. Implementation of the Dodd Frank Act has had and will continue to have a broad impact on the financial services industry by introducing significant regulatory and compliance changes including, among other things: (i) changing the assessment base for federal deposit insurance from the amount of insured deposits to average consolidated total assets less average tangible equity, eliminating the ceiling and increasing the size of the floor of the DIF and offsetting the impact of the increase in the minimum floor on institutions with less than $10 billion in assets; (ii) making permanent the $250,000 limit for federal deposit insurance and increasing the cash limit of Securities Investor Protection Corporation protection to $250,000; (iii) eliminating the requirement that the FDIC pay dividends from the DIF when the reserve ratio is between 1.35% and 1.50%, but continuing the FDIC’s authority to declare dividends when the reserve ratio at the end of a calendar year is at least 1.50%; however, the FDIC is granted sole discretion in determining whether to suspend or limit the declaration or payment of dividends; (iv) repealing the federal prohibition on payment of interest on demand deposits, thereby permitting depository institutions to pay interest on business transaction and other accounts; (v) implementing certain corporate governance revisions that apply to all public companies, including regulations that require publicly traded companies to give shareholders a non-binding advisory vote to approve executive compensation, commonly referred to as a “say-on-pay” vote and an advisory role on so-called “golden parachute” payments in connection with approvals of mergers and acquisitions; new director independence requirements and considerations to be taken into account by compensation committees and their advisers relating to executive compensation; additional executive compensation disclosures; and a requirement that companies adopt a policy providing for the recovery of executive compensation in the event of a restatement of its financial statements, commonly referred to as a “clawback” policy; (vi) centralizing responsibility for consumer financial protection by creating a new independent federal agency, the Consumer Financial Protection Bureau (CFPB) responsible for implementing federal consumer protection laws to be applicable to all depository institutions; (vii) imposing new requirements for mortgage lending, including new minimum underwriting standards, limitations on prepayment penalties and imposition of new mandated disclosures to mortgage borrowers; (viii) imposing new limits on affiliate transactions and causing derivative transactions to be subject to lending limits and other restrictions including adoption of the “Volcker Rule” regulating transactions in derivative securities; (ix) limiting debit card interchange fees that financial institutions with $10 billion or more in assets are permitted to charge their customers; and (x) implementing regulations to incentivize and protect individuals, commonly referred to as whistleblowers to report violations of federal securities laws.

Many aspects of the Dodd Frank Act continue to be subject to rulemaking and will take effect over several additional years, making it difficult to anticipate the overall financial impact on us or across the industry. The changes resulting from the Dodd Frank Act may impact the profitability of our business activities, require changes to certain of our business practices, impose upon us more stringent capital, liquidity and leverage requirements or otherwise adversely affect our business. The legislation enacted in 2018 and summarized below may reduce some of the burdens associated with the implementation of the Dodd Frank Act, but the actual impact is impossible to predict with any certainty.

2018 Regulatory Reform. In May 2018, the Economic Growth, Regulatory Relief and Consumer Protection Act (the Act), was enacted to modify or remove certain financial reform rules and regulations, including some of those implemented under the Dodd Frank Act. While the Act maintains most of the regulatory structure established by the Dodd Frank Act, it amends certain aspects of the regulatory framework for small depository institutions with assets of less than $10 billion and for large banks with assets of more than $50 billion. Many of these changes could result in meaningful regulatory relief for community banks such as the Bank.

The Act, among other matters, expands the definition of qualified mortgages which may be held by a financial institution and simplifies the regulatory capital rules for financial institutions and their holding companies with total consolidated assets of less than $10 billion by instructing the federal banking regulators to establish a single "Community Bank Leverage Ratio" of between 8 and 10 percent to replace the leverage and risk-based regulatory capital ratios. The Act also expands the category of holding companies that may rely on the "Small Bank Holding Company and Savings and Loan Holding Company Policy Statement" by raising the maximum amount of assets a qualifying holding company may have from $1 billion to $3 billion. This expansion also excludes such holding companies from the minimum capital requirements of the Dodd Frank Act. In addition, the Act includes regulatory relief for community banks regarding regulatory examination cycles, call reports, the Volcker Rule (proprietary trading prohibitions), mortgage disclosures and risk weights for certain high-risk commercial real estate loans.

It is difficult at this time to predict when or how any new standards under the Act will ultimately be applied to us or what specific impact the Act and the yet-to-be-finalized implementing rules and regulations will have on community banks.

Table of Contents

Anti-Money Laundering. All financial institutions, including national banks, are subject to federal laws that are designed to prevent the use of the U.S. financial system to fund terrorist activities. Financial institutions operating in the United States must develop anti-money laundering compliance programs, due diligence policies and controls to ensure the detection and reporting of money laundering. Such compliance programs are intended to supplement compliance requirements, also applicable to financial institutions, under the Bank Secrecy Act and the Office of Foreign Assets Control Regulations. The Bank has established policies and procedures to ensure compliance with these provisions.

Privacy. Federal banking rules limit the ability of banks and other financial institutions to disclose non-public information about consumers to nonaffiliated third parties. Pursuant to these rules, financial institutions must provide (i) initial notices to customers about their privacy policies, describing conditions under which they may disclose nonpublic personal information to nonaffiliated third parties and affiliates; (ii) annual notices of their privacy policies to current customers and (iii) a reasonable method for customers to "opt out" of disclosures to nonaffiliated third parties. These privacy provisions affect how consumer information is transmitted through diversified financial companies and conveyed to outside vendors. The Corporation's privacy policies have been implemented in accordance with the law.

Dividends and Other Transfers of Funds. Dividends from the Bank constitute the principal source of income to the Corporation. The Corporation is a legal entity separate and distinct from the Bank. The Bank is subject to various statutory and regulatory restrictions on its ability to pay dividends to the Corporation. In addition, the Bank's regulators have the authority to prohibit the Bank from paying dividends, depending upon the Bank's financial condition, if such payment is deemed to constitute an unsafe or unsound practice.

Limitations on Transactions with Affiliates. Transactions between national banks and any affiliate are governed by Sections 23A and 23B of the Federal Reserve Act. An affiliate of a national bank includes any company or entity which controls the national bank or that is controlled by a company that controls the national bank. In a holding company context, the holding company of a national bank (such as the Corporation) and any companies which are controlled by such holding company are affiliates of the national bank. Generally, Section 23A limits the extent to which the national bank or its subsidiaries may engage in "covered transactions" with any one affiliate to an amount equal to 10% of such bank's capital stock and surplus, and contains an aggregate limit on all such transactions with all affiliates to an amount equal to 20% of such capital stock and surplus. Section 23B applies to "covered transactions" as well as certain other transactions and requires that all transactions be on terms substantially the same, or at least as favorable, to the national bank as those provided to a non-affiliate. The term "covered transaction" includes the making of loans to, purchase of assets from and issuance of a guarantee to an affiliate and similar transactions. Section 23B transactions also include the provision of services and the sale of assets by a national bank to an affiliate.

In addition, Sections 22(g) and (h) of the Federal Reserve Act place restrictions on loans to executive officers, directors and principal shareholders of the national bank and its affiliates. Under Section 22(h), loans to a director, an executive officer and to a greater than 10% shareholder of a national bank, and certain affiliated interests of either, may not exceed, together with all other outstanding loans to such person and affiliated interests, the national bank's loans to one borrower limit (generally equal to 15% of the bank's unimpaired capital and surplus). Section 22(h) also

requires that loans to directors, executive officers and principal shareholders be made on terms substantially the same as offered in comparable transactions to other persons unless the loans are made pursuant to a benefit or compensation program that (i) is widely available to employees of the bank and (ii) does not give preference to any director, executive officer or principal shareholder, or certain affiliated interests of either, over other employees of the national bank. Section 22(h) also requires prior board approval for certain loans. In addition, the aggregate amount of extensions of credit by a national bank to all insiders cannot exceed the bank's unimpaired capital and surplus. Furthermore, Section 22(g) places additional restrictions on loans to executive officers. The Bank currently is subject to Sections 22(g) and (h) of the Federal Reserve Act and at December 31, 2018, was in compliance with the above restrictions.

Loans to One Borrower Limitations. With certain limited exceptions, the maximum amount that a national bank may lend to any borrower (including certain related entities of the borrower) at one time may not exceed 15% of the unimpaired capital and surplus of the institution, plus an additional 10% of unimpaired capital and surplus for loans fully secured by readily marketable collateral. At December 31, 2018, the Bank's loans-to-one-borrower limit was $11.5 million based upon the 15% of unimpaired capital and surplus measurement. The Bank may grant credit to borrowers in excess of the legal lending limit as part of the Legal Lending Limit Pilot Program approved by the OCC which allows the Bank to exceed its legal lending limit within certain parameters. At December 31, 2018, the Bank's largest single lending relationship had an outstanding balance of $8.6 million.

Capital Standards. The Bank is required to comply with applicable capital adequacy standards established by the federal banking agencies. Beginning on January 1, 2015, the Bank became subject to a new comprehensive capital framework for U.S. banking organizations. In July 2013, the Federal Reserve Board, FDIC and OCC adopted a final rule that implements the Basel III changes to the international regulatory capital framework. The Basel III rules include requirements contemplated by the Dodd Frank Act as well as certain standards initially adopted by the Basel Committee on Banking Supervision in December 2010.

Table of Contents

The Basel III rules include new risk-based and leverage capital ratio requirements that refine the definition of what constitutes "capital" for purposes of calculating those ratios. The minimum capital level requirements are (i) a new common equity Tier 1 risk-based capital ratio of 4.5%; (ii) a Tier 1 risk-based capital ratio of 6% (increased from 4%); (iii) a total risk-based capital ratio of 8% (unchanged from previous rules); and (iv) a Tier 1 leverage ratio of 4% for all institutions. Common equity Tier 1 capital will consist of retained earnings and common stock instruments, subject to certain adjustments.

The Basel III rules also establish a "capital conservation buffer" of 2.5% above the new regulatory minimum risk-based capital requirements. The conversation buffer was fully phased in as of January 1, 2019 and results in the following minimum ratios: (i) a common equity Tier 1 risk-based capital ratio of 7.0%, (ii) a Tier 1 risk-based capital ratio of 8.5% and (iii) a total risk-based capital ratio of 10.5%. An institution is subject to limitations on certain activities including payment of dividends, share repurchases and discretionary bonuses to executive officers if its capital level is below the buffer amount.

The Basel III rules also revise the prompt corrective action framework, which is designed to place restrictions on insured depository institutions if their capital levels do not meet certain thresholds. These revisions were effective January 1, 2015. The prompt corrective action rules were modified to include a common equity Tier 1 capital component and to increase certain other capital requirements for the various thresholds. Under the proposed prompt corrective action rules, insured depository institutions are required to meet the following capital levels in order to qualify as "well capitalized": (i) a new common equity Tier 1 risk-based capital ratio of 6.5%; (ii) a Tier 1 risk-based capital ratio of 8% (increased from 6%); (iii) a total risk-based capital ratio of 10% (unchanged from previous rules); and (iv) a Tier 1 leverage ratio of 5% (unchanged from previous rules).

The Basel III rules set forth certain changes in the methods of calculating risk-weighted assets, which in turn affect the calculation of risk based ratios. Under the Basel III rules, higher or more sensitive risk weights are assigned to various categories of assets including certain credit facilities that finance the acquisition, development or construction of real property, certain exposures of credits that are 90 days past due or on nonaccrual, foreign exposures and certain corporate exposures. In addition, Basel III rules include (i) alternate standards of credit worthiness consistent with the Dodd Frank Act; (ii) greater recognition of collateral guarantees and (iii) revised capital treatment for derivatives and repo-style transactions.

In addition, the final rule includes certain exemptions to address concerns about the regulatory burden on community banks. Banking organizations with less than $15 billion in consolidated assets as of December 31, 2009 are permitted to include in Tier 1 capital trust preferred securities and cumulative perpetual preferred stock issued and included in Tier 1 capital prior to May 19, 2010 on a permanent basis without any phase out. Community banks were required to make this election by their March 31, 2015 quarterly filings with the appropriate federal regulator to opt-out of the requirement to include most accumulated other comprehensive income (AOCI) components in the calculation of Common equity Tier 1 capital and in effect retain the AOCI treatment under the current capital rules. The Bank made in its March 31, 2015 quarterly filing a one-time permanent election to continue to exclude accumulated other comprehensive income from capital. If it would not have made this election, unrealized gains and losses would have

been included in the calculation of its regulatory capital.

The Basel III rules generally became effective beginning January 1, 2015; however, certain calculations under the Basel III rules have phase-in periods. In 2015, the Board of Governors of the Federal Reserve System amended its Small Bank Holding Company Policy Statement by increasing the policy’s consolidated assets threshold from $500 million to $1 billion and the 2018 legislation summarized above increased that asset threshold to $3 billion. The primary benefit of being deemed a "small bank holding company" is the exemption from the requirement to maintain consolidated regulatory capital ratios; instead, regulatory capital ratios only apply at the subsidiary bank level.

Table of Contents

The following table sets forth certain information concerning regulatory capital ratios of the Bank as of the dates presented. The capital adequacy ratios disclosed below are exclusive of the capital conservation buffer.

(Dollar amounts in thousands)	December 31, 2018		December 31, 2017	
	Amount	Ratio	Amount	Ratio
Total capital to risk-weighted assets:				
Actual	$76,344	12.93%	$64,221	12.96%
For capital adequacy purposes	47,252	8.00 %	39,630	8.00 %
To be well capitalized	59,065	10.00%	49,537	10.00%
Tier 1 capital to risk-weighted assets:				
Actual	$69,836	11.82%	$58,088	11.73%
For capital adequacy purposes	35,439	6.00 %	29,722	6.00 %
To be well capitalized	47,252	8.00 %	39,630	8.00 %
Common equity Tier 1 capital to risk-weighted assets:				
Actual	$69,836	11.82%	$58,088	11.73%
For capital adequacy purposes	26,579	4.50 %	22,292	4.50 %
To be well capitalized	38,393	6.50 %	32,199	6.50 %
Tier 1 capital to average assets:				
Actual	$69,836	7.95 %	$58,088	7.71 %
For capital adequacy purposes	35,126	4.00 %	30,117	4.00 %
To be well capitalized	43,908	5.00 %	37,647	5.00 %

As summarized above, in May 2018 the Act amended certain aspects of the Dodd Frank Act to ease the regulatory burden for small-to medium-sized U.S. banks. The legislation included new rules aimed at simplifying the calculation of regulatory capital ratios. Regulations setting forth the details of those new capital calculations have not been finalized.

Prompt Corrective Action and Other Enforcement Mechanisms. Federal banking agencies possess broad powers to take corrective and other supervisory action to resolve the problems of insured depository institutions, including but not limited to those institutions that fall below one or more prescribed minimum capital ratios. Each federal banking agency has promulgated regulations defining the following five categories in which an insured depository institution will be placed, based on its capital ratios: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized. At December 31, 2018, the Bank exceeded the required ratios for classification as “well capitalized.”

An institution that, based upon its capital levels, is classified as well capitalized, adequately capitalized, or undercapitalized may be treated as though it were in the next lower capital category if the appropriate federal banking agency, after notice and opportunity for hearing, determines that an unsafe or unsound condition or an unsafe or unsound practice warrants such treatment. At each successive lower capital category, an insured depository institution

is subject to more restrictions. The federal banking agencies, however, may not treat a significantly undercapitalized institution as critically undercapitalized.

In addition to measures taken under the prompt corrective action provisions, commercial banking organizations may be subject to potential enforcement actions by the federal regulators for unsafe or unsound practices in conducting their businesses or for violations of any law, rule, regulation, or any condition imposed in writing by the agency or any written agreement with the agency. Finally, pursuant to an interagency agreement, the FDIC can examine any institution that has a substandard regulatory examination score or is considered undercapitalized – without the permission of the institution's primary regulator.

Safety and Soundness Standards. The federal banking agencies have adopted guidelines designed to assist the federal banking agencies in identifying and addressing potential safety and soundness concerns before capital becomes impaired. The guidelines set forth operational and managerial standards relating to: (i) internal controls, information systems and internal audit systems, (ii) loan documentation, (iii) credit underwriting, (iv) asset growth, (v) earnings, and (vi) compensation, fees and benefits. In addition, the federal banking agencies have also adopted safety and soundness guidelines with respect to asset quality and earnings standards. These guidelines provide six standards for establishing and maintaining a system to identify problem assets and prevent those assets from deteriorating. Under these standards, an insured depository institution should: (i) conduct periodic asset quality reviews to identify problem assets, (ii) estimate the inherent losses in problem assets and establish reserves that are sufficient to absorb estimated losses, (iii) compare problem asset totals to capital, (iv) take appropriate corrective action to resolve problem assets, (v) consider the size and potential risks of material asset concentrations, and (vi) provide periodic asset quality reports with adequate information for management and the board of directors to assess the level of asset risk. These guidelines also set forth standards for evaluating and monitoring earnings and for ensuring that earnings are sufficient for the maintenance of adequate capital and reserves.

Table of Contents

Insurance of Accounts. Deposit accounts are currently insured by the DIF generally up to a maximum of $250,000 per separately insured depositor. As insurer, the FDIC is authorized to conduct examinations of, and to require reporting by, insured institutions. It also may prohibit any insured institution from engaging in any activity determined by regulation or order to pose a serious threat to the FDIC. The FDIC also has the authority to initiate enforcement actions against insured institutions.

The Dodd Frank Act raises the minimum reserve ratio of the DIF from 1.15% to 1.35% and requires the FDIC to offset the effect of this increase on insured institutions with assets of less than $10 billion (small institutions). In March 2016, the FDIC adopted a rule to accomplish this by imposing a surcharge on larger institutions commencing when the reserve ratio reaches 1.15% and ending when it reaches 1.35%. The reserve ratio reached 1.15% effective as of June 30, 2016 and exceeded 1.35% effective as of September 30, 2018. Small institutions will receive credits for the portion of their regular assessments that contributed to growth in the reserve ratio between 1.15% and 1.35%. The credits will apply to reduce regular assessments by 2 basis points for quarters when the reserve ratio is at least 1.38%.

Effective July 1, 2016, the FDIC adopted changes that eliminated its risk-based premium system. Under the new premium system, the FDIC assesses deposit insurance premiums on the assessment base of a depository institution, which is its average total assets reduced by the amount of its average tangible equity. For a small institution (one with assets of less than $10 billion) that has been federally insured for at least five years, effective July 1, 2016, the initial base assessment rate ranges from 3 to 30 basis points, based on the institution's CAMELS composite and component ratings and certain financial ratios; its leverage ratio; its ratio of net income before taxes to total assets; its ratio of nonperforming loans and leases to gross assets; its ratio of other real estate owned to gross assets; its brokered deposits ratio (excluding reciprocal deposits if the institution is well capitalized and has a CAMELS composite rating of 1 or 2); its one year asset growth ratio (which penalizes growth adjusted for mergers in excess of 10%); and its loan mix index (which penalizes higher risk loans based on historical industry charge off rates). The initial base assessment rate is subject to downward adjustment (not below 1.5%) based on the ratio of unsecured debt the institution has issued to its assessment base, and to upward adjustment (which can cause the rate to exceed 30 basis points) based on its holdings of unsecured debt issued by other insured institutions. Institutions with assets of $10 billion or more are assessed using a scorecard method.

In addition, all FDIC insured institutions are required to pay assessments to the FDIC at an annual rate of approximately six tenths of a basis point of insured deposits to fund interest payments on bonds issued by the Financing Corporation, an agency of the federal government established to recapitalize the predecessor to the Savings Association Insurance Fund. These assessments will continue until the Financing Corporation bonds mature in 2017 through 2019.

Under the Federal Deposit Insurance Act, the FDIC may terminate deposit insurance upon a finding that the institution has engaged in unsafe and unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule order or condition imposed by the FDIC.

Interstate Banking and Branching. Banks have the ability, subject to certain state restrictions, to acquire, by acquisition or merger, branches outside its home state. In addition, federal legislation permits a bank headquartered in Pennsylvania to enter another state through de novo branching (as compared to an acquisition) if under the state law in the state which the proposed branch is to be located a state-chartered institution would be permitted to establish the branch. Interstate branches are subject to certain laws of the states in which they are located. Competition may increase further as banks branch across state lines and enter new markets.

Consumer Protection Laws and Regulations. The bank regulatory agencies are focusing greater attention on compliance with consumer protection laws and their implementing regulations. Examination and enforcement have become more intense in nature, and insured institutions have been advised to carefully monitor compliance with such laws and regulations. The Bank is subject to many federal consumer protection statutes and regulations, some of which are discussed below.

The Community Reinvestment Act (CRA) is intended to encourage insured depository institutions, while operating safely and soundly, to help meet the credit needs of their communities. The CRA specifically directs the federal regulatory agencies, in examining insured depository institutions, to assess a bank’s record of helping meet the credit needs of its entire community, including low- and moderate-income neighborhoods, in a manner consistent with safe and sound banking practices. CRA regulations (i) establish the definition of “Intermediate Small Bank” as an institution with total assets of $250 million to $1 billion, without regard to any holding company; and (ii) take into account abusive lending practices by a bank or its affiliates in determining a bank’s CRA rating. The CRA further requires the agencies to take a financial institution’s record of meeting its community credit needs into account when evaluating applications for, among other things, domestic branches, mergers or acquisitions, or holding company formations. The agencies use the CRA assessment factors in order to provide a rating to the financial institution. The ratings range from a high of “outstanding” to a low of “substantial noncompliance.” In its last examination for CRA compliance, as of November 5, 2018, the Bank was rated “satisfactory.”

The Fair Credit Reporting Act (FCRA), as amended by the Fair and Accurate Credit Transactions Act of 2003 (FACTA), requires financial firms to help deter identity theft, including developing appropriate fraud response programs, and give consumers more control of their credit data. It also reauthorizes a federal ban on state laws that interfere with corporate credit granting and marketing practices. In connection with the FACTA, financial institution regulatory agencies proposed rules that would prohibit an institution from using certain information about a consumer it received from an affiliate to make a solicitation to the consumer, unless the consumer has been notified and given a chance to opt out of such solicitations. A consumer’s election to opt out would be applicable for at least five years.

The Federal Trade Commission (FTC), the federal bank regulatory agencies and the National Credit Union Administration (NCUA) have issued regulations (the Red Flag Rules) requiring financial institutions and creditors to develop and implement written identity theft prevention programs as part of the FACTA. The programs must provide for the identification, detection and response to patterns, practices or specific activities – known as red flags – that could indicate identity theft. These red flags may include unusual account activity, fraud alerts on a consumer report or attempted use of suspicious account application documents. The program must also describe appropriate responses that would prevent and mitigate the crime and detail a plan to update the program. The program must be managed by the Board of Directors or senior employees of the institution or creditor, include appropriate staff training and provide oversight of any service providers.

The Check Clearing for the 21st Century Act (Check 21) facilitates check truncation and electronic check exchange by authorizing a new negotiable instrument called a “substitute check,” which is the legal equivalent of an original check. Check 21 does not require banks to create substitute checks or accept checks electronically; however, it does require banks to accept a legally equivalent substitute check in place of an original.

The Equal Credit Opportunity Act (ECOA) generally prohibits discrimination in any credit transaction, whether for consumer or business purposes, on the basis of race, color, religion, national origin, sex, marital status, age (except in limited circumstances), receipt of income from public assistance programs, or good faith exercise of any rights under the Consumer Credit Protection Act.

The Truth in Lending Act (TILA) is designed to ensure that credit terms are disclosed in a meaningful way so that consumers may compare credit terms more readily and knowledgeably. As a result of the TILA, all creditors must use the same credit terminology to express rates and payments, including the annual percentage rate, the finance charge, the amount financed, the total of payments and the payment schedule, among other things.

The Fair Housing Act (FHA) regulates many practices, including making it unlawful for any lender to discriminate in its housing-related lending activities against any person because of race, color, religion, national origin, sex, handicap or familial status. A number of lending practices have been found by the courts to be, or may be considered, illegal under the FHA, including some that are not specifically mentioned in the FHA itself.

The Home Mortgage Disclosure Act (HMDA) grew out of public concern over credit shortages in certain urban neighborhoods and provides public information that will help show whether financial institutions are serving the housing credit needs of the neighborhoods and communities in which they are located. The HMDA also includes a "fair lending" aspect that requires the collection and disclosure of data about applicant and borrower characteristics as a way of identifying possible discriminatory lending patterns and enforcing anti-discrimination statutes.

The term "predatory lending," much like the terms "safety and soundness" and "unfair and deceptive practices," is far-reaching and covers a potentially broad range of behavior. As such, it does not lend itself to a concise or a comprehensive definition. Generally speaking, predatory lending involves at least one, and perhaps all three, of the following elements (i) making unaffordable loans based on the assets of the borrower rather than on the borrower's ability to repay an obligation ("asset-based lending"); (ii) inducing a borrower to refinance a loan repeatedly in order to charge high points and fees each time the loan is refinanced ("loan flipping"); and (iii) engaging in fraud or deception to conceal the true nature of the loan obligation from an unsuspecting or unsophisticated borrower.

FRB regulations aimed at curbing such lending significantly widened the pool of high-cost home-secured loans covered by the Home Ownership and Equity Protection Act of 1994, a federal law that requires extra disclosures and consumer protections to borrowers. Lenders that violate the rules face cancellation of loans and penalties equal to the finance charges paid.

OCC guidelines require national banks and their operating subsidiaries to comply with certain standards when making or purchasing loans to avoid predatory or abusive residential mortgage lending practices. Failure to comply with the guidelines could be deemed an unsafe and unsound or unfair or deceptive practice, subjecting the bank to supervisory enforcement actions.

Table of Contents

Finally, the Real Estate Settlement Procedures Act (RESPA) requires lenders to provide borrowers with disclosures regarding the nature and cost of real estate settlements. Also, RESPA prohibits certain abusive practices, such as kickbacks, and places limitations on the amount of escrow accounts. Penalties under the above laws may include fines, reimbursements and other penalties. Due to heightened regulatory concern related to compliance with the CRA, FACTA, TILA, FHA, ECOA, HMDA and RESPA generally, the Bank may incur additional compliance costs or be required to expend additional funds for investments in its local community.

Federal Home Loan Bank System. The Bank is a member of the FHLB. Among other benefits, each FHLB serves as a reserve or central bank for its members within its assigned region. Each FHLB is financed primarily from the sale of consolidated obligations of the FHLB system. Each FHLB makes available loans or advances to its members in compliance with the policies and procedures established by the Board of Directors of the individual FHLB. As an FHLB member, the Bank is required to own a certain amount of capital stock in the FHLB. At December 31, 2018, the Bank was in compliance with the stock requirements.

Federal Reserve System. The FRB requires all depository institutions to maintain noninterest bearing reserves at specified levels against their transaction accounts (primarily checking) and non-personal time deposits. At December 31, 2018, the Bank was in compliance with these requirements.

Item 1A. Risk Factors

Not required as the Corporation is a smaller reporting company.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The Corporation owns no real property but utilizes the main office of the Bank, which is owned by the Bank. The Corporation’s and the Bank’s executive offices are located at 612 Main Street, Emlenton, Pennsylvania. The Corporation pays no rent or other form of consideration for the use of this facility.

The Bank owns and leases numerous other premises for use in conducting business activities. The Bank considers these facilities owned or occupied under lease to be adequate. For additional information regarding the Bank's properties, see "Note 5 - Premises and Equipment" to the consolidated financial statements on page F-22.

Item 3. Legal Proceedings

Neither the Bank nor the Corporation is involved in any material legal proceedings. The Bank, from time to time, is party to litigation that arises in the ordinary course of business, such as claims to enforce liens, claims involving the origination and servicing of loans, and other issues related to the business of the Bank. In the opinion of management, the resolution of any such issues would not have a material adverse impact on the financial position, results of operation, or liquidity of the Bank or the Corporation.

Item 4. Mine Safety Disclosures

Not applicable.

Telephone: (800) 883-1212		Telephone: (312) 471-5100

The Corporation has traditionally paid regular quarterly cash dividends. Future dividends will be determined by the Board of Directors after giving consideration to the Corporation's financial condition, results of operations, tax status, industry standards, economic conditions, regulatory requirements and other factors.

The following table sets forth the high and low sale and quarter-end closing market prices of our common stock for the last two years as reported by the Nasdaq Capital Market as well as cash dividends paid for the quarterly periods presented.

	Market Price			**Cash**
	High	**Low**	**Close**	**Dividend**
2018:				
Fourth quarter	$36.70	$29.90	$30.34	$ 0.28
Third quarter	38.60	34.07	37.30	0.28
Second quarter	35.06	31.05	34.30	0.28
First quarter	33.60	29.72	33.41	0.28

2017:				
Fourth quarter	$31.75	$27.86	$30.35	$ 0.27
Third quarter	29.00	27.83	28.65	0.27
Second quarter	29.71	26.50	27.88	0.27
First quarter	31.50	26.13	29.25	0.27

As of March 1, 2018, there were approximately 746 stockholders of record and 2,698,712 shares of common stock entitled to vote, receive dividends and considered outstanding for financial reporting purposes. The number of stockholders of record does not include the number of persons or entities who hold their stock in nominee or "street" name.

Common stockholders may have dividends reinvested to purchase additional shares through the Corporation's dividend reinvestment plan. Participants may also make optional cash purchases of common stock through this plan. To obtain a plan document and authorization card to participate in the plan, please call 888-509-4619.

Purchases of Equity Securities

The Corporation did not repurchase any of its equity securities in the year ended December 31, 2018.

Item 6. Selected Financial Data

Not required as the Corporation is a smaller reporting company.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis represents a review of the Corporation's consolidated financial condition and results of operations for the years ended December 31, 2018 and 2017. This review should be read in conjunction with the consolidated financial statements beginning on page F-3.

Table of Contents

Overview

The Corporation reported consolidated net income available to common stockholders of $4.1 million, or $1.72 per diluted common share for 2018, compared to $4.3 million, or $1.93 per diluted common share for 2017. Net income available to common stockholders was impacted by the following:

- Net interest income increased $3.7 million, or 16.8%, to $25.6 million for the year ended December 31, 2018 from $21.9 million for 2017. This increase primarily related to an increase in interest income of $4.6 million, or 17.3%, partially offset by an increase in interest expense of $893,000, or 19.9%. Driving the increase in interest income was a $66.6 million increase in the average balance of loans. The increase in interest expense was driven by an increase in the Corporation's average balance of interest-bearing deposits of $66.7 million, partially offset by a $16.3 million decrease in the average balance of borrowed funds. The increases in the Corporation's interest-earning assets and interest-bearing liabilities includes the impact of the CFB acquisition in October 2018, which added $111.6 million in loans and $106.1 million in deposits and the NHB acquisition in September 2017, which added $18.5 million in loans and $19.7 million in deposits at the time of the acquisition.

- Noninterest income decreased $814,000, or 16.2%, to $4.2 million for the year ended December 31, 2018 from $5.0 million in 2017. During 2017, the Corporation recorded a $1.3 million bargain purchase gain related to the acquisition of NHB. During the same period, the Corporation recorded a $508,000 other-than-temporary impairment charge on a subordinated debt investment. The Corporation realized securities gains of $346,000 during 2017, compared to a $9,000 loss during 2018. The Corporation also realized a gain of $690,000 on the retirement of 18,000 shares of CFB stock owned at the time of the acquisition.

- Noninterest expense increased $4.0 million, or 20.5%, to $23.7 million for the year ended December 31, 2018 from $19.6 million for 2017. The increase primarily related to increases in acquisition costs, compensation and benefits expense, premises and equipment expense and professional fees of $2.5 million, $1.1 million, $190,000 and $128,000, respectively. Acquisition costs incurred during 2018 related to the acquisition of CFB and totaled $3.6 million, compared to acquisition costs of $1.1 million incurred during 2017 related to the acquisition of NHB. Also contributing to the increases in noninterest expense were operating costs associated with the three new offices from the CFB acquisition as well as the full-year operation of the banking office added during 2017 from the NHB acquisition.

- Provision for income taxes decreased $1.5 million, or 70.1%, to $633,000 for the year ended December 31, 2018 from $2.1 million for 2017. This decrease resulted primarily from the enactment of the Tax Cuts and Jobs Act of 2017 (TCJA) which decreased the 2018 corporate tax rate to a flat 21% from a maximum of 35% as well as a decrease in net income. During 2017, the Corporation reduced the value of its deferred tax assets by $827,000 and recorded an additional income tax expense as a result of the TCJA.

Changes in Financial Condition

Total assets increased $148.8 million, or 19.8%, to $898.9 million at December 31, 2018 from $750.1 million at December 31, 2017. This increase primarily related to an increase in net loans receivable of $131.4 million. Liabilities increased $127.9 million, or 18.5%, to $818.9 million at December 31, 2018 from $691.0 million at December 31, 2017 due to increases in customer deposits and borrowed funds of $106.9 million and $19.4 million, respectively. Loans and deposits acquired from CFB totaled $111.6 million and $106.1 million, respectively, at the time of the acquisition in October 2018.

Cash and cash equivalents. Cash and cash equivalents increased $3.3 million, or 23.1%, to $17.7 million at December 31, 2018 from $14.4 million at December 31, 2017. This increase primarily resulted from increases in customer deposits and borrowed funds, partially offset by the funding of loans.

Securities. Securities decreased $3.4 million, or 1.0%, to $97.7 million at December 31, 2018 from $101.2 million at December 31, 2017. This decrease primarily resulted from investment security sales, maturities, calls and repayments totaling $22.0 million, partially offset by purchases totaling $19.1 million during the year.

Loans receivable. Net loans receivable increased $131.4 million, or 22.8%, to $708.7 million at December 31, 2018 from $577.2 million at December 31, 2017. The increase was driven by growth in the Corporation's residential mortgage, commercial mortgage, commercial business, home equity and consumer portfolios of $73.6 million, $45.7 million, $7.1 million, $3.8 million and $1.7 million, respectively. Loans acquired from CFB totaled $111.6 million at the time of the acquisition in October 2018 and $109.1 million at December 31, 2018.

Nonperforming assets. Nonperforming assets include nonaccrual loans, loans 90 days past due and still accruing, repossessions and real estate owned. Nonperforming assets were $3.7 million, or 0.42% of total assets, at December 31, 2018 compared to $4.2 million, or 0.56% of total assets, at December 31, 2017. Nonperforming assets consisted of nonperforming loans and real estate owned of $3.0 million and $701,000, respectively, at December 31, 2018 and $3.7 million and $492,000, respectively, at December 31, 2017. At December 31, 2018, nonperforming loans consisted primarily of residential mortgage, home equity and commercial mortgage loans.

Federal bank stocks. Federal bank stocks were comprised of FHLB stock and FRB stock of $5.0 million and $1.3 million, respectively, at December 31, 2018. These stocks are purchased and redeemed at par as directed by the federal banks and levels maintained are based primarily on borrowing and other correspondent relationships between the Corporation and the federal banks.

Bank-owned life insurance (BOLI). The Corporation maintains single premium life insurance policies on certain current and former officers and employees of the Bank. In addition to providing life insurance coverage, whereby the Bank as well as the officers and employees receive life insurance benefits, the appreciation of the cash surrender value of the BOLI will serve to offset and finance existing and future employee benefit costs. BOLI increased $3.2 million, or 26.9%, to $14.9 million at December 31, 2018 from $11.7 million at December 31, 2017. This included the addition of $2.8 million of BOLI acquired from CFB and increases in the cash surrender value of the policies, partially offset by certain administrative expenses.

Premises and equipment. Premises and equipment increased $901,000, or 5.0%, to $18.9 million at December 31, 2018 from $18.0 million at December 31, 2017. The overall increase in premises and equipment during the year was due to capital expenditures of $885,000 and the addition of $1.3 million of fixed assets acquired from CFB, partially offset by depreciation and amortization of $1.2 million.

Goodwill. Goodwill increased $9.2 million, or 89.0%, to $19.4 million at December 21, 2018 from $10.3 million at December 31, 2017. During 2018, the Corporation recorded $9.2 million of goodwill related to the acquisition of CFB. Goodwill represents the excess of the total purchase price paid for the acquisition over the fair value of the identifiable assets acquired, net of the fair value of the liabilities assumed. Goodwill is evaluated for impairment at least annually and more frequently if events and circumstances indicate that the asset might be impaired. Management evaluated goodwill and concluded that no impairment existed at December 31, 2018.

Core deposit intangible. The core deposit intangible was $1.4 million at December 31, 2018, compared to $481,000 at December 31, 2016. During 2018, the Corporation recorded a core deposit intangible of $1.2 million related to the CFB acquisition. The core deposit intangible also includes amounts associated with the assumption of deposits in the 2017 NHB acquisition, the 2016 United American Savings Bank (UASB) acquisition and the 2009 Titusville branch acquisition. This asset represents the long-term value of the core deposits acquired. In each instance, the fair value was determined using a third-party valuation expert specializing in estimating fair values of core deposit intangibles. The

fair value was derived using an industry standard present value methodology. All-in costs and runoff balances by year were discounted by comparable term FHLB advance rates, used as an alternative cost of funds measure. This intangible asset amortizes over a weighted average estimated life of the related deposits. The core deposit intangible asset is not estimated to have a significant residual value. The Corporation recorded $266,000 and $246,000 of intangible amortization in 2018 and 2017, respectively.

Deposits. Total deposits increased $106.9 million, or 16.3%, to $761.5 million at December 31, 2018 from $654.6 million at December 31, 2017. Noninterest bearing deposits increased $22.6 million, or 17.9%, during the year while interest bearing deposits increased $84.3 million, or 16.0%. Deposits assumed from CFB totaled $106.1 million at the time of the acquisition in October 2018 and $91.7 million at December 31, 2018.

Borrowed funds. Borrowed funds increased $19.4 million, or 74.4%, to $45.4 million at December 31, 2018 from $46.0 million at December 31, 2017. Borrowed funds at December 31, 2018 consisted of short-term borrowings of $12.9 million and long-term borrowings of $32.5 million. Short-term borrowed funds at December 31, 2018 consisted of $10.8 million in FHLB overnight advances with a rate of 2.62% and $2.1 million outstanding on a line of credit with a correspondent bank at 5.75%. Long-term borrowed funds consisted of six $5.0 million FHLB term advances totaling $30.0 million, maturing between 2019 and 2023 and having fixed interest rates between 1.94% and 2.85%. In addition, the Corporation had $2.5 million outstanding on a term advance with a correspondent bank at a fixed rate of 4.75%. Long-term advances are utilized primarily to fund loan growth and short-term advances are utilized primarily to compensate for the normal deposit fluctuations.

Stockholders' equity. Stockholders' equity increased $20.9 million, or 35.4%, to $80.0 million at December 31, 2018 from $59.1 million at December 31, 2017. The increase was primarily due to $15.6 million of common stock and $4.2 million of preferred stock issued in connection with the acquisition of CFB and net income of $4.2 million for 2018, partially offset by $2.7 million of common stock dividends paid, $91,000 of preferred dividends paid and a decrease in accumulated other income of $839,000.

Table of Contents

Changes in Results of Operations

The Corporation reported net income before preferred stock dividends of $4.2 million and $4.3 million in 2018 and 2017, respectively. The following “Average Balance Sheet and Yield/Rate Analysis” and “Analysis of Changes in Net Interest Income” tables should be utilized in conjunction with the discussion of the interest income and interest expense components of net interest income.

Average Balance Sheet and Yield/Rate Analysis. The following table sets forth, for the periods indicated, information concerning the total dollar amounts of interest income from interest-earning assets and the resulting average yields, the total dollar amounts of interest expense on interest-bearing liabilities and the resulting average costs, net interest income, interest rate spread and the net interest margin earned on average interest-earning assets. For purposes of this table, average loan balances include nonaccrual loans and exclude the allowance for loan losses and interest income includes accretion of net deferred loan fees. Interest and yields on tax-exempt loans and securities (tax-exempt for federal income tax purposes) are shown on a fully tax equivalent basis. The information is based on average daily balances during the periods presented.

(Dollar amounts in thousands)	**Year ended December 31,**					
	2018			**2017**		
	Average Balance	**Interest**	**Yield/ Rate**	**Average Balance**	**Interest**	**Yield/ Rate**

Net interest margin (net interest income as a percentage of average interest-earning assets)			**3.47%**			**3.29%**

Table of Contents

Analysis of Changes in Net Interest Income. The following table analyzes the changes in interest income and interest expense in terms of: (1) changes in volume of interest-earning assets and interest-bearing liabilities and (2) changes in yields and rates. The table reflects the extent to which changes in the Corporation's interest income and interest expense are attributable to changes in rate (change in rate multiplied by prior year volume), changes in volume (changes in volume multiplied by prior year rate) and changes attributable to the combined impact of volume/rate (change in rate multiplied by change in volume). The changes attributable to the combined impact of volume/rate are allocated on a consistent basis between the volume and rate variances. Changes in interest income on loans and securities reflect the changes in interest income on a fully tax equivalent basis.

(Dollar amounts in thousands)	**Year ended December 31, 2018 versus 2017 Increase (Decrease) due to**		
	Volume	**Rate**	**Total**
Interest income:			
Loans	$2,982	$1,102	$4,084
Securities	(46)	86	40
Interest-earning deposits with banks	(36)	85	49
Federal bank stocks	(11)	67	56
Total interest-earning assets	2,889	1,340	4,229
Interest expense:			
Interest-bearing deposits	479	970	1,449
Borrowed funds, short-term	34	45	79
Borrowed funds, long-term	(452)	(183)	(635)
Total interest-bearing liabilities	61	832	893
Net interest income	$2,828	$508	$3,336

2018 Results Compared to 2017 Results

The Corporation reported net income available to common stockholders of $4.1 million and $4.3 million for 2018 and 2017, respectively. The $157,000, or 3.7%, decrease in net income was attributed to a decrease in noninterest income of $814,000 and increases in noninterest expense, the provision for loan losses and preferred stock dividends of $4.0 million, $377,000 and $91,000, respectively, partially offset by a $3.7 million increase in net interest income and a $1.5 million decrease in the provision for income taxes. Returns on average equity and assets were 6.56% and 0.53%, respectively, for 2018, compared to 7.52% and 0.59%, respectively, for 2017.

Net interest income. The primary source of the Corporation's revenue is net interest income. Net interest income is the difference between interest income on earning assets, such as loans and securities, and interest expense on

liabilities, such as deposits and borrowed funds, used to fund the earning assets. Net interest income is impacted by the volume and composition of interest-earning assets and interest-bearing liabilities, and changes in the level of interest rates. Tax equivalent net interest income increased $3.3 million to $25.8 million for 2018, compared to $22.4 million for 2017. This increase in net interest income can be attributed to an increase in tax equivalent interest income of $4.2 million, partially offset by an increase in interest expense of $893,000.

Interest income. Tax equivalent interest income increased $4.2 million, or 15.7%, to $31.2 million for 2018, compared to $26.9 million for 2017. This increase can be attributed to increases in interest earned on loans, dividends received on federal bank stocks, deposits with banks and interest earned on securities of $4.1 million, $56,000, $49,000 and $40,000, respectively.

Tax equivalent interest earned on loans receivable increased $4.1 million, or 17.0%, to $28.1 million for 2018, compared to $24.1 million for 2017. The average balance of loans increased $66.6 million, or 12.0%, generating $3.0 million of additional interest income on loans. In addition, the average yield on loans increased 19 basis points to 4.53% for 2018, versus 4.34% for 2017 causing a $1.1 million increase in interest income.

Interest earned on federal bank stocks increased $56,000, or 23.1%, to $298,000 for 2018, compared to $242,000 for 2017. The average yield on federal bank stocks increased 144 basis points to 6.43% for 2018 versus 4.99% for 2017 causing a $67,000 increase in interest income. Partially offsetting this favorable variance, the average balance of federal bank stocks decreased $215,000, or 4.4%, causing an $11,000 decrease in interest income.

Interest earned on interest-earning deposit accounts increased $49,000, or 20.9%, to $284,000 for 2018, compared to $235,000 for 2017. The average yield on these accounts increased 43 basis points to 1.48% for 2018 versus 1.05% for 2017 causing an $85,000 increase in interest income. Offsetting this favorable variance, the average balance of interest-earning deposits decreased $3.1 million causing a $36,000 decrease in interest income.

Table of Contents

Tax equivalent interest earned on securities increased $40,000, or 1.7%, to $2.4 million for 2018, compared to $2.4 million for 2017. The average yield on securities increased 9 basis points to 2.48% for 2018 versus 2.39% for 2017 causing an $86,000 increase in interest income. Offsetting this favorable variance, the average balance of securities decreased $1.9 million, or 1.9%, causing a $46,000 decrease in interest income.

Interest expense. Interest expense increased $893,000, or 19.9%, to $5.4 million for 2018, compared to $4.5 million for 2017. This increase can be attributed to increases in interest expense on interest-bearing deposits of $1.4 million, partially offset by a decrease on borrowed funds of $556,000.

Interest expense on deposits increased $1.4 million, or 44.2%, to $4.7 million for 2018, compared to $3.3 million for 2017. The average balance of interest-bearing deposits increased $66.7 million, or 13.4%, causing a $970,000 increase in interest expense. The average rate on interest-bearing deposits increased by 18 basis points to 0.84% for 2018 versus 0.63% for 2017 causing a $479,000 increase in interest expense.

Interest expense on borrowed funds decreased $556,000, or 45.6%, to $662,000 for 2018, compared to $1.2 million for 2017. The average balance of borrowed funds decreased $16.3 million, or 40.2%, to $24.3 million for 2018, compared to $40.5 million for 2017 causing a $418,000 decrease in interest expense. Additionally, the average cost of borrowed funds decreased 27 basis points to 2.73% for 2018 versus 3.00% for 2017 causing an additional $138,000 decrease in interest expense.

Provision for loan losses. The Corporation records provisions for loan losses to maintain a level of total allowance for loan losses that management believes, to the best of its knowledge, covers all probable incurred losses estimable at each reporting date. Management considers historical loss experience, the present and prospective financial condition of borrowers, current conditions (particularly as they relate to markets where the Corporation originates loans), the status of nonperforming assets, the estimated underlying value of the collateral and other factors related to the collectability of the loan portfolio.

Nonperforming loans decreased $665,000, or 18.0%, to $3.0 million at December 31, 2018 from $3.7 million at December 31, 2017. The decrease in nonperforming loans was primarily related to the payoff of an $830,000 commercial relationship, partially offset by an increase of $102,000 in loans past due more than 90 days and still accruing.

The provision for loan losses increased $377,000, or 41.7%, to $1.3 million for 2018 from $903,000 for 2017. The Corporation’s allowance for loan losses amounted to $6.5 million, or 0.91% of the Corporation’s total loan portfolio at December 31, 2018 compared to $6.1 million or 1.05% of total loans at December 31, 2017. The allowance for loan losses, as a percentage of nonperforming loans at December 31, 2018 and 2017, was 214.9% and 165.9%,

respectively. The allocation of the allowance for loan losses related to residential mortgage loans and commercial mortgage loans increased during the year as a result of growth in the loan portfolios, while the allocation related to commercial business loans decreased as the portfolio decreased. At December 31, 2018, there was no provision for loan losses allocated to loans acquired from UASB, NHB or CFB.

Noninterest income. Noninterest income includes revenue that is related to services rendered and activities conducted in the financial services industry, including fees on depository accounts, general transaction and service fees, title premiums, security and loan sale gains and losses, and earnings on bank-owned life insurance (BOLI). Noninterest income decreased $814,000, or 16.2%, to $4.2 million in 2018 from $5.0 million in 2017. The decrease in noninterest income is primarily due to a $1.3 million bargain purchase gain recorded during 2017 related to the acquisition of NHB. Also during 2017, the Corporation recorded a $508,000 other-than-temporary impairment charge on a subordinated debt investment issued by First NBC Bank Holding Company. On April 28, 2017, the Louisiana Office of Financial Institutions closed First NBC Bank, the wholly owned banking subsidiary of First NBC Bank Holding Company, and named the FDIC as receiver for the bank. Adding to the decrease in noninterest income, gains on the sale of loans totaled $19,000 for 2018 compared to $248,000 during the same period in 2017. The Corporation realized securities losses of $9,000 during 2018, compared to $346,000 during 2017. Additionally, the Corporation recorded a gain of $690,000 on the 18,000 share of CFB stock owned at the time of the acquisition. Customer service fees increased $282,000 as overdraft charges during 2018 outpaced the prior year.

Noninterest expense. Noninterest expense increased $4.0 million, or 20.5%, to $23.7 million for 2018, compared to $19.6 million for 2017. This increase was primarily related to increases in acquisition costs, compensation and employee benefits, premises and equipment expense and professional fees of $2.5 million, $1.1 million, $190,000 and $128,000, respectively.

Acquisition costs increased $2.5 million to $3.6 million for 2018, compared to $1.1 million for 2017. Acquisition costs for 2018 were related to the acquisition of CFB and included employee non-compete and severance costs, professional fees, system conversion costs, contract termination fees, legal fees, accounting and auditing fees and other costs of $1.5 million, $531,000, $481,000, $427,000, $330,000, $50,000 and $228,000, respectively. Acquisition costs for 2017 were related to the acquisition of NHB and included system conversion costs, contract termination fees, legal fees, employee severance costs, accounting and auditing fees and other costs of $421,000, $279,000, $173,000, $108,000, $55,000 and $84,000.

Table of Contents

Compensation and employee benefits expense increased $1.1 million, or 11.5%, to $10.3 million for 2018, compared to $9.3 million for 2017. This increase primarily related to normal wage and salary increases, increases in insurance and retirement benefits, as well as costs associated with the three new offices acquired from CFB in 2018 and the full-year operation of the office added during 2017 from the NHB acquisition.

Premises and equipment expense increased $190,000, or 6.4%, to $3.2 million for 2018, compared to $3.0 million for 2017. This increase primarily related to expenses associated with the Bank’s new branch offices.

The provision for income taxes decreased $1.5 million, or 70.1%, to $633,000 for 2018, compared to $2.1 million for 2018 primarily due to the reduction of the tax rate to a flat 21% from a maximum of 35% due to the enactment of the TCJA. During 2017, the Corporation reduced the value of its deferred tax assets by $827,000 and recorded an additional expense. As a result of this tax law change, the Corporation's effective tax rate for 2018 was 13.1%, compared to 33.1% for 2017.

Market Risk Management

Market risk for the Corporation consists primarily of interest rate risk exposure and liquidity risk. The Corporation is not subject to currency exchange risk or commodity price risk, and has no trading portfolio, and therefore, is not subject to any trading risk. In addition, the Corporation does not participate in hedging transactions such as interest rate swaps and caps. Changes in interest rates will impact both income and expense recorded and also the market value of long-term interest-earning assets.

The primary objective of the Corporation’s asset liability management function is to maximize the Corporation’s net interest income while simultaneously maintaining an acceptable level of interest rate risk given the Corporation’s operating environment, capital and liquidity requirements, balance sheet mix, performance objectives and overall business focus. One of the primary measures of the exposure of the Corporation’s earnings to interest rate risk is the timing difference between the repricing or maturity of interest-earning assets and the repricing or maturity of its interest-bearing liabilities.

The Corporation’s Board of Directors has established a Finance Committee, consisting of five outside directors, the President and Chief Executive Officer (CEO), Treasurer and Chief Financial Officer (CFO) and Chief Operating Officer (COO), to monitor market risk, including primarily interest rate risk. This committee, which meets at least quarterly, generally establishes and monitors the investment, interest rate risk and asset liability management policies of the Corporation.

In order to minimize the potential for adverse affects of material and prolonged changes in interest rates on the Corporation's results of operations, the Corporation's management team has implemented and continues to monitor asset liability management policies to better match the maturities and repricing terms of the Corporation's interest-earning assets and interest-bearing liabilities. Such policies have consisted primarily of (i) originating adjustable-rate mortgage loans; (ii) originating short-term secured commercial loans with the rate on the loan tied to the prime rate or reset features in which the rate changes at determined intervals; (iii) emphasizing investment in shorter-term (expected duration of five years or less) investment securities; (iv) selling longer-term (30-year) fixed-rate residential mortgage loans in the secondary market; (v) maintaining a high level of liquid assets (including securities classified as available for sale) that can be readily reinvested in higher yielding investments should interest rates rise; (vi) emphasizing the retention of lower cost savings accounts and other core deposits; and (vii) lengthening liabilities and locking in lower borrowing rates with longer terms whenever possible.

Interest Rate Sensitivity Gap Analysis

The implementation of asset and liability initiatives and strategies and compliance with related policies, combined with other external factors such as demand for the Corporation's products and economic and interest rate environments in general, has resulted in the Corporation maintaining a one-year cumulative interest rate sensitivity gap within internal policy limits of between a positive and negative 15% of total assets. The one-year interest rate sensitivity gap is identified as the difference between the Corporation's interest-earning assets that are scheduled to mature or reprice within one year and its interest-bearing liabilities that are scheduled to mature or reprice within one year.

The interest rate sensitivity gap is defined as the difference between the amount of interest-earning assets maturing or repricing within a specific time period and the amount of interest-bearing liabilities maturing or repricing within that time period. A gap is considered positive when the amount of interest rate-sensitive assets exceeds the amount of interest rate-sensitive liabilities, and is considered negative when the amount of interest rate-sensitive liabilities exceeds the amount of interest rate-sensitive assets. Generally, during a period of rising interest rates, a negative gap would adversely affect net interest income while a positive gap would result in an increase in net interest income. Conversely, during a period of falling interest rates, a negative gap would result in an increase in net interest income and a positive gap would adversely affect net interest income. The closer to zero, or more neutral, that gap is maintained, generally, the lesser the impact of market interest rate changes on net interest income.

Based on certain assumptions derived from the Corporation's historical experience, at December 31, 2018, the Corporation's interest-earning assets maturing or repricing within one year totaled $223.8 million while the Corporation's interest-bearing liabilities maturing or repricing within one year totaled $193.2 million, providing an excess of interest-earning assets over interest-bearing liabilities of $30.7 million or 3.4% of total assets. At December 31, 2018, the percentage of the Corporation's assets to liabilities maturing or repricing within one year was 115.8%.

The following table presents the amounts of interest-earning assets and interest-bearing liabilities outstanding as of December 31, 2018 which are expected to mature, prepay or reprice in each of the future time periods presented:

(Dollar amounts in thousands)	Six months or less	Six months to one year	One to three years	Three to four years	Over four years	Total
Total interest-earning assets	$148,056	$75,793	$223,600	$82,045	$300,603	$830,097
Total interest-bearing liabilities	104,102	89,096	294,551	51,463	116,290	655,502
Interest rate sensitivity gap	$43,954	$(13,303)	$(70,951)	$30,582	$184,313	$174,595
Cumulative rate sensitivity gap	$43,954	$30,651	$(40,300)	$(9,718)	$174,595	
Ratio of gap during the period to total interest earning assets	5.30%	(1.60%)	(8.55%)	3.68%	22.20%	
Ratio of cumulative gap to total interest earning assets	5.30%	3.69%	(4.85%)	(1.17%)	21.03%	

Although certain assets and liabilities may have similar maturities or periods of repricing, they may react in different degrees to changes in market interest rates. The interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types of assets and liabilities may lag behind changes in market interest rates. In the event of a change in interest rates, prepayment and early withdrawal levels would likely deviate significantly from those assumed in calculating the table. The ability of many borrowers to service their debt may decrease in the event of an interest rate increase.

Interest Rate Sensitivity Simulation Analysis

The Corporation also utilizes income simulation modeling in measuring its interest rate risk and managing its interest rate sensitivity. The Finance Committee of the Board of Directors believes that simulation modeling enables the

Corporation to more accurately evaluate and manage the possible effects on net interest income due to the exposure to changing market interest rates and different loan and security prepayment and deposit decay assumptions under various interest rate scenarios.

As with gap analysis and earnings simulation modeling, assumptions about the timing and variability of cash flows are critical in net portfolio equity valuation analysis. Particularly important are the assumptions driving mortgage prepayments and the assumptions about expected attrition of the core deposit portfolios. These assumptions are based on the Corporation's historical experience.

The Corporation has established the following guidelines for assessing interest rate risk:

Net interest income simulation. Given a 200 basis point immediate increase or decrease in market interest rates, net interest income may not change by more than 15% for a one-year period.

Economic value of equity simulation. Economic value of equity is the present value of the Corporation's existing assets less the present value of the Corporation's existing liabilities. Given a 200 basis point immediate and permanent increase or decrease in market interest rates, economic value of equity may not correspondingly decrease or increase by more than 20%.

These guidelines take into consideration the current interest rate environment, the Corporation's financial asset and financial liability product mix and characteristics and liquidity sources among other factors. Given the current rate environment, a drop in short-term market interest rates of 200 basis points immediately or over a one-year horizon would seem unlikely. This should be considered in evaluating modeling results outlined in the table below.

Table of Contents

The following table presents the simulated impact of a 100 basis point or 200 basis point upward or downward shift of market interest rates on net interest income for the years ended December 31, 2018 and 2017, respectively. This analysis was done assuming that the interest-earning asset and interest-bearing liability levels at December 31, 2018 remained constant. The impact of the market rate movements on net interest income was developed by simulating the effects of rates changing immediately for a one-year period from the December 31, 2018 levels for net interest income.

	Increase		Decrease	
	+100 BP	+200 BP	-100 BP	-200 BP
2018 Net interest income - increase (decrease)	0.26%	0.30%	(0.15%)	(3.98%)
2017 Net interest income - increase (decrease)	0.78%	0.90%	0.55 %	(2.96%)

The expected increase in 2017 and 2018 net interest income in the rising rate scenarios shown in the table above resulted from the Corporation having an excess of immediately repricing interest-earning assets over immediately repricing interest-bearing liabilities.

Impact of Inflation and Changing Prices

The consolidated financial statements of the Corporation and related notes presented herein have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) which require the measurement of financial condition and operating results in terms of historical dollars, without considering changes in the relative purchasing power of money over time due to inflation.

Unlike most industrial companies, substantially all of the assets and liabilities of a financial institution are monetary in nature. As a result, interest rates have a more significant impact on a financial institution’s performance than the effects of general levels of inflation. Interest rates do not necessarily move in the same direction or in the same magnitude as the prices of goods and services since such prices are affected by inflation to a larger degree than interest rates. In the current interest rate environment, liquidity and the maturity structure of the Corporation’s assets and liabilities are critical to the maintenance of acceptable performance levels.

Capital Resources

Total stockholders' equity increased $20.9 million, or 35.4%, to $80.0 million at December 31, 2018 from $59.1 million at December 31, 2017 primarily due to $15.6 million of common stock and $4.2 million of preferred stock issued in connection with the acquisition of CFB. Net income of $4.2 million in 2018 represented a decrease in earnings of $66,000, or 1.5%, compared to 2017. The Corporation's capital to assets ratio increased to 8.9% at December 31, 2018 from 7.9% at December 31, 2017.

While continuing to sustain a strong capital position, dividends on common stock increased to $2.7 million in 2018 from $2.4 million in 2017. In addition, stockholders have taken part in the Corporation's dividend reinvestment plan introduced during 2003 with 41% of registered shareholder accounts active in the plan at December 31, 2018. Dividend reinvestment is achieved through the purchase of common shares on the secondary market.

Capital adequacy is intended to enhance the Corporation's ability to support growth while protecting the interest of stockholders and depositors and to ensure that capital ratios are in compliance with regulatory minimum requirements. Regulatory agencies have developed certain capital ratio requirements that are used to assist them in monitoring the safety and soundness of financial institutions. At December 31, 2018, the Bank was in excess of all regulatory capital requirements. See Note 10 on page F-25 to the Corporation's consolidated financial statements attached hereto.

Liquidity

The Corporation's primary sources of funds generally have been deposits obtained through the offices of the Bank, borrowings from the FHLB, and amortization and prepayments of outstanding loans and maturing securities. During 2018, the Corporation used its sources of funds primarily to fund loan commitments. As of December 31, 2018, the Corporation had outstanding loan commitments, including undisbursed loans and amounts available under credit lines, totaling $104.5 million, and standby letters of credit totaling $1.0 million, net of cash collateral maintained by the Bank. The Bank has established policies to monitor and manage liquidity levels to ensure the Bank's ability to meet demands for customer withdrawals and the repayment of borrowings.

At December 31, 2018, time deposits amounted to $221.6 million, or 29.1%, of the Corporation's total consolidated deposits, including approximately $71.5 million scheduled to mature within the next year. Management believes that the Corporation has adequate resources to fund all of its commitments, that all of its commitments will be funded as required by related maturity dates and that, based upon past experience and current pricing policies, it can adjust the rates of time deposits to retain a substantial portion of maturing liabilities.

Table of Contents

Aside from liquidity available from customer deposits or through sales and maturities of securities, the Corporation and the Bank have alternative sources of funds. These sources include a line of credit for the Corporation with a correspondent bank, the Bank’s line of credit and term borrowing capacity from the FHLB and, to a more limited extent, through the sale of loans. At December 31, 2018, the Bank’s borrowing capacity with the FHLB, net of funds borrowed and irrevocable standby letters of credit issued to secure certain deposit accounts, was $167.7 million.

The Corporation pays a regular quarterly cash dividend. The Corporation paid dividends of $0.28 and $0.27 per common share for each of the four quarters of 2018 and 2017, respectively. On February 22, 2019, the Corporation declared a quarterly dividend of $0.29 per common share payable on March 22, 2019 to shareholders of record on March 4, 2019. The determination of future dividends on the Corporation’s common stock will depend on conditions existing at that time with consideration given to the Corporation’s earnings, capital and liquidity needs, among other factors.

Management is not aware of any conditions, including any regulatory recommendations or requirements, which would adversely impact its liquidity or its ability to meet funding needs in the ordinary course of business.

Critical Accounting Policies

The Corporation’s consolidated financial statements are prepared in accordance with GAAP and follow general practices within the industry in which it operates. Application of these principles requires management to make estimates or judgments that affect the amounts reported in the financial statements and accompanying notes. These estimates are based on information available as of the date of the financial statements; accordingly, as this information changes, the financial statements could reflect different estimates or judgments. Certain policies inherently have a greater reliance on the use of estimates, and as such, have a greater possibility of producing results that could be materially different than originally reported. Estimates or judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the value of an asset not carried on the financial statements at fair value warrants an impairment write-down or valuation reserve to be established, or when an asset or liability needs to be recorded contingent upon a future event. Carrying assets and liabilities at fair value inherently results in more financial statement volatility. The fair values and the information used to record valuation adjustments for certain assets and liabilities are based either on quoted market prices or are provided by third-party sources, when available. When third-party information is not available, valuation adjustments are estimated in good faith by management primarily though the use of internal cash flow modeling techniques.

The most significant accounting policies followed by the Corporation are presented in Note 1 to the consolidated financial statements beginning on page F-8. These policies, along with the disclosures presented in the other financial statement notes, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined. Management views critical accounting policies to be those which are highly dependent on subjective or complex judgments, estimates and assumptions, and where changes in those estimates and

assumptions could have a significant impact on the financial statements. Management has identified the following as critical accounting policies:

Allowance for loan losses. The Corporation considers that the determination of the allowance for loan losses involves a higher degree of judgment and complexity than other significant accounting policies. The balance in the allowance for loan losses is determined based on management’s review and evaluation of the loan portfolio in relation to past loss experience, the size and composition of the portfolio, current economic events and conditions and other pertinent factors, including management’s assumptions as to future delinquencies, recoveries and losses. All of these factors may be susceptible to significant change. Among the many factors affecting the allowance for loan losses, some are quantitative while others require qualitative judgment. Although management believes its process for determining the allowance adequately considers all of the potential factors that could potentially result in credit losses, the process includes subjective elements and may be susceptible to significant change. To the extent actual outcomes differ from management’s estimates, additional provisions for loan losses may be required that would adversely impact the Corporation’s financial condition or earnings in future periods.

Other-than-temporary impairment. Management evaluates debt securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic, market or other concerns warrant such evaluation. Consideration is given to: (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions and (4) whether the Corporation has the intent to sell the security or more likely than not will be required to sell the security before its anticipated recovery.

Table of Contents

Goodwill and intangible assets. Goodwill represents the excess cost over fair value of assets acquired in a business combination. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but instead tested for impairment at least annually. Intangible assets with estimable useful lives are amortized over their respective estimated useful lives to their estimated residual values. Goodwill is subject to ongoing periodic impairment tests based on the fair value of the reporting unit compared to its carrying amount, including goodwill. Impairment exists when a reporting unit's carrying amount exceeds its fair value. At November 30, 2018, the required annual impairment test of goodwill was performed and no impairment existed as of the valuation date. If for any future period it is determined that there has been impairment in the carrying value of our goodwill balances, the Corporation will record a charge to earnings, which could have a material adverse effect on net income, but not risk based capital ratios.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Information required by this item is included in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Item 7.

Item 8. Financial Statements and Supplementary Data

Information required by this item is included beginning on page F-1.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

The Corporation maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Corporation's Exchange Act reports is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Corporation's management, including its CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure based on the definition of "disclosure controls and procedures" in Rule 13a-15(e).

As of December 31, 2018, the Corporation carried out an evaluation, under the supervision and with the participation of the Corporation's management, including the Corporation's CEO and CFO, of the effectiveness of the design and operation of the Corporation's disclosure controls and procedures. Based on the foregoing, the Corporation's CEO and CFO concluded that the Corporation's disclosure controls and procedures were effective.

During the fourth quarter of fiscal year 2018, there has been no change made in the Corporation's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the Corporation's internal control over financial reporting.

There have been no significant changes in the Corporation's internal controls or in other factors that could significantly affect the internal controls subsequent to the date the Corporation completed its valuation.

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Corporation. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Management's Report on Internal Control Over Financial Reporting

Management completed an assessment of the Corporation's internal control over financial reporting as of December 31, 2018. This assessment was based on criteria for evaluating internal control over financial reporting established in the 2013 *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management concluded that the Corporation's internal control over financial reporting was effective as of December 31, 2018.

Item 9B. Other Information

None.

Report of Independent Registered Public Accounting Firm

Shareholders and the Board of Directors of Emclaire Financial Corp

Emlenton, Pennsylvania

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Emclaire Financial Corp (the "Corporation") as of December 31, 2018 and 2017, the related consolidated statements of net income, comprehensive income, stockholders' equity, and cash flows for each of the years then ended, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Corporation as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the years then ended, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on the Corporation's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Corporation in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Corporation is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Corporation's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included

examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Crowe LLP

We have served as the Corporation's auditor since 2010.

Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies

Basis of Presentation and Consolidation. The consolidated financial statements include the accounts of Emclaire Financial Corp (the Corporation) and its wholly owned subsidiaries, The Farmers National Bank of Emlenton (the Bank) and Emclaire Settlement Services, LLC (the Title Company). All significant intercompany balances and transactions have been eliminated in consolidation.

Nature of Operations. The Corporation provides a variety of financial services to individuals and businesses through its offices in Western Pennsylvania. Its primary deposit products are checking, savings and term certificate accounts and its primary lending products are residential and commercial mortgages, commercial business loans and consumer loans.

Use of Estimates and Classifications. In preparing consolidated financial statements in conformity with U.S. generally accepted accounting principles (GAAP), management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Certain amounts previously reported may have been reclassified to conform to the current year financial statement presentation. Such reclassifications did not affect net income or stockholders’ equity.

Significant Group Concentrations of Credit Risk. Most of the Corporation’s activities are with customers located within the Western Pennsylvania region of the country. Note 2 discusses the type of securities that the Corporation invests in. Note 3 discusses the types of lending the Corporation engages in. The Corporation does not have any significant concentrations to any one industry or customer.

Cash and Cash Equivalents. For purposes of the consolidated statements of cash flows, cash and cash equivalents include cash on hand, cash items, interest-earning deposits with other financial institutions and federal funds sold and due from correspondent banks. Interest-earning deposits are generally short-term in nature and are carried at cost. Federal funds are generally sold or purchased for one day periods. Net cash flows are reported for loan and deposit transactions, short term borrowings and purchases and redemptions of federal bank stocks.

Dividend Restrictions. Banking regulations require maintaining certain capital levels and may limit the dividends paid by the Bank to the Corporation or by the Corporation to stockholders.

Securities Available for Sale. Debt securities are classified as available for sale when they might be sold before maturity. Debt securities available for sale are carried at fair value, with unrealized holding gains and losses reported in other comprehensive income, net of tax. Equity securities with readily determinable fair values are classified as available for sale. Equity securities are also carried at fair value, however, the holding gains or losses are reported in net income.

Interest income from securities includes amortization of purchase premium or discount. Premiums and discounts on securities are amortized using the level yield method over the term of the securities. Gains and losses on sales are recorded on the trade date and determined using the specific identification method.

Management evaluates debt securities for other-than-temporary impairment (OTTI) at least on a quarterly basis, and more frequently when economic, market or other concerns warrant such evaluation. Consideration is given to: (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions and (4) whether the Corporation has the intent to sell the security or more likely than not will be required to sell the security before the recovery of its amortized cost basis. If the Corporation intends to sell an impaired security, or if it is more likely than not the Corporation will be required to sell the security before its anticipated recovery, the Corporation records an other-than-temporary loss in an amount equal to the entire difference between fair value and amortized cost through earnings. Otherwise, only the credit portion of the estimated loss on debt securities is recognized in earnings, with the other portion of the loss recognized in other comprehensive income.

Loans Receivable. The Corporation grants mortgage, commercial and consumer loans to customers. A substantial portion of the loan portfolio is represented by loans collateralized by real estate located throughout Western Pennsylvania. The ability of the Corporation's debtors to honor their contracts is dependent upon real estate and general economic conditions in this area.

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at their outstanding unpaid principal balances adjusted for charge-offs, the allowance for loan losses, and any deferred fees or costs on originated loans or premiums or discounts on purchased loans. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, and premiums and discounts are deferred and recognized in interest income as an adjustment of the related loan yield using the interest method.

Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies (continued)

The accrual of interest on all classes of loans is typically discontinued at the time the loan is 90 days past due unless the credit is well secured and in the process of collection. At 120 days past due, all loans are considered nonaccrual. Loans are placed on nonaccrual status or charged-off at an earlier date if collection of principal or interest is considered doubtful. Nonaccrual loans and loans past due 90 days still on accrual include both smaller balance homogeneous loans that are collectively evaluated for impairment and individually classified as impaired loans. All interest accrued but not collected for loans that are placed on nonaccrual status or charged-off is reversed against interest income. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for a return to accrual status. Loans are returned to accrual status when all principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Allowance for Loan Losses. The allowance for loan losses is established for probable incurred credit losses through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are typically credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectability of loans in light of historic experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral, prevailing economic conditions and other factors. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

A loan is considered impaired when, based on current information and events, it is probable that the Corporation will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Loans for which the terms have been modified resulting in a concession, and for which the borrower is experiencing financial difficulties, are considered troubled debt restructurings (TDR) and classified as impaired.

Factors considered by management in determining impairment on all loan classes include demonstrated ability to repay, payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis,

taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Impairment is measured on a loan by loan basis for commercial loans by either the present value of expected future cash flows discounted at the loans effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent. Large groups of small balance homogeneous loans are collectively evaluated for impairment. Accordingly, the Corporation does not separately identify individual consumer and residential mortgage loans for impairment disclosures, unless such loans are the subject of a restructuring agreement.

TDRs are separately identified for impairment disclosures and are measured at the present value of estimated future cash flows using the loan's effective rate at inception. If a TDR is considered to be a collateral dependent loan, the loan is reported, net, at the fair value of collateral. For TDRs that subsequently default, the Corporation determines the amount of reserves in accordance with accounting policies for the allowance for loan losses.

The allowance consists of specific and general components. The specific component relates to loans that are individually classified as impaired. The general component covers non-impaired loans and is based on historical loss experience adjusted for qualitative factors. The historical loss experience is determined by portfolio segment and is based on the actual loss history experienced by the Corporation over the prior 12 quarters. Qualitative factors considered by management include national and local economic and business conditions, changes in the nature and volume of the loan portfolio, quality of loan review systems, and changes in trends, volume and severity of past due, nonaccrual and classified loans, and loss and recovery trends. The Corporation's portfolio segments are as follows:

Residential mortgages: Residential mortgage loans are loans to consumers utilized for the purchase, refinance or construction of a residence. Changes in interest rates or market conditions may impact a borrower's ability to meet contractual principal and interest payments.

Home equity loans and lines of credit: Home equity loans and lines of credit are credit facilities extended to homeowners who wish to utilize the equity in their property in order to borrow funds for almost any consumer purpose. Property values may fluctuate due to economic and other factors.

Table of Contents

Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies (continued)

Commercial real estate: Commercial real estate loans are subject to underwriting standards and processes similar to commercial loans. These loans are viewed primarily as cash flow loans and the repayment of these loans is largely dependent on the successful operation of the property. Loan performance may be adversely affected by factors impacting the general economy or conditions specific to real estate markets such as geographic location and property type.

Commercial business: Commercial credit is extended to business customers for use in normal operations to finance working capital needs, equipment purchases or other projects. The majority of these borrowers are customers doing business within our geographic region. These loans are generally underwritten individually and secured with the assets of the company and the personal guarantee of the business owners. Commercial loans are made based primarily on the historical and projected cash flow of the borrower and the underlying collateral provided by the borrower. The cash flows of borrowers, however, may not behave as forecasted and collateral securing loans may fluctuate in value due to economic or individual performance factors.

Consumer: Consumer loans are loans to an individual for non-business purposes such as automobile purchases or debt consolidation. These loans are originated based primarily on credit scores and debt-to-income ratios which may be adversely affected by economic or individual performance factors.

Loans Held for Sale. Mortgage loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or fair value, as determined by outstanding commitments from investors. Net unrealized losses, if any, are recorded as a valuation allowance and charged to earnings. Mortgage loans held for sale are generally sold with servicing retained. The carrying value of mortgage loans sold is reduced by the amount allocated to the servicing right. Gains and losses on sales of mortgages are based on the difference between the selling price and the carrying value of the related loan sold.

Federal Bank Stocks. The Bank is a member of the Federal Home Loan Bank of Pittsburgh (FHLB) and the Federal Reserve Bank of Cleveland (FRB). As a member of these federal banking systems, the Bank maintains an investment in the capital stock of the respective regional banks. These stocks are held at cost and classified as restricted stock. These stocks are purchased and redeemed at par as directed by the federal banks and levels maintained are based primarily on borrowing and other correspondent relationships. These stocks are periodically evaluated for impairment based on ultimate recovery of par value. Both cash and stock dividends are reported as income.

Bank-Owned Life Insurance (BOLI). The Bank purchased life insurance policies on certain key officers and employees. BOLI is recorded at the amount that can be realized under the insurance contract at the balance sheet date, which is the cash surrender value adjusted for other charges or other amounts due that are probable at settlement.

Premises and Equipment. Land is carried at cost. Premises, furniture and equipment, and leasehold improvements are carried at cost less accumulated depreciation or amortization. Depreciation is calculated on a straight-line basis over the estimated useful lives of the related assets, which are twenty-five years to forty years for buildings and three to ten years for furniture and equipment. Amortization of leasehold improvements is computed using the straight-line method over the shorter of their estimated useful life or the expected term of the leases. Expected terms include lease option periods to the extent that the exercise of such option is reasonably assured. Premises and equipment are reviewed for impairment when events indicate their carrying amount may not be recoverable from future undiscounted cash flows. If impaired, assets are recorded at fair value.

Goodwill and Intangible Assets. Goodwill results from business acquisitions and represents the excess of the purchase price over the fair value of acquired assets and liabilities. Core deposit intangible assets arise from whole bank or branch acquisitions and are measured at fair value and then are amortized over their estimated useful lives. Customer relationship intangible assets arise from the purchase of a customer list from another company or individual and then are amortized on a straight-line basis over two years. Goodwill is not amortized but is assessed at least annually for impairment. Any such impairment will be recognized in the period identified. The Corporation has selected November 30 as the date to perform the annual impairment test. Goodwill is the only intangible asset with an indefinite life on the Corporation's balance sheet.

Servicing Assets. Servicing assets represent the allocated value of retained servicing rights on loans sold. Servicing assets are expensed in proportion to, and over the period of, estimated net servicing revenues. Impairment is evaluated based on the fair value of the assets, using groupings of the underlying loans as to interest rates. Fair value is determined using prices for similar assets with similar characteristics, when available, or based upon discounted cash flows using market-based assumptions. Any impairment of a grouping is reported as a valuation allowance, to the extent that fair value is less than the capitalized amount for a grouping.

Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies (continued)

Other Real Estate Acquired Through Foreclosure (OREO). Real estate properties acquired through foreclosure are initially recorded at fair value less cost to sell when acquired, thereby establishing a new cost basis for the asset. These assets are subsequently accounted for at the lower of carrying amount or fair value less cost to sell. If fair value declines subsequent to foreclosure, a valuation allowance is recorded through expense. Revenue and expenses from operations of the properties, gains and losses on sales and additions to the valuation allowance are included in operating results. Real estate acquired through foreclosure is classified in prepaid expenses and other assets and totaled $701,000 and $492,000 at December 31, 2018 and 2017, respectively. Loans secured by residential real estate properties for which formal foreclosure proceedings are in process totaled $811,000 and $948,000 at December 31, 2018 and 2017, respectively.

Treasury Stock. Common stock purchased for treasury is recorded at cost. At the date of subsequent reissue, the treasury stock account is reduced by the cost of such stock on the first-in, first-out basis.

Income Taxes. Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are the expected future tax amounts for the temporary differences between carrying amounts and tax bases of assets and liabilities, computed using enacted tax rates. A valuation allowance, if needed, reduces deferred tax assets to the amount expected to be realized. A tax position is recognized as a benefit only if it is “more likely than not” that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the “more likely than not” test, no tax benefit is recorded. The Corporation recognizes interest and/or penalties related to income tax matters in income tax expense.

Earnings Per Common Share (EPS). Basic EPS excludes dilution and is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted EPS includes the dilutive effect of additional potential common shares issuable under stock options and restricted stock awards.

Comprehensive Income. Comprehensive income includes net income and other comprehensive income. Other comprehensive income (loss) is comprised of unrealized holding gains and losses on securities available for sale and

changes in the funded status of pension which are also recognized as separate components of equity.

Operating Segments. Operations are managed and financial performance is evaluated on a corporate-wide basis. Accordingly, all financial services operations are considered by management to be aggregated in one reportable operating segment.

Retirement Plans. The Corporation maintains a noncontributory defined benefit plan covering eligible employees and officers. Effective January 1, 2009 the plan was closed to new participants. The Corporation provided the requisite notice to plan participants on March 12, 2013 of the determination to freeze the plan (curtailment). While the freeze was not effective until April 30, 2013, the Corporation determined that participants would not satisfy, within the provisions of the plan, 2013 eligibility requirements based on minimum hours worked for 2013. Therefore, employees ceased to earn benefits as of January 1, 2013. This amendment to the plan will not affect benefits earned by the participant prior to the date of the freeze. The Corporation also maintains a 401(k) plan, which covers substantially all employees, and a supplemental executive retirement plan for key executive officers.

Stock Compensation Plans. Compensation expense is recognized for stock options and restricted stock awards issued based on the fair value of these awards at the date of grant. A Black-Scholes model is utilized to estimate the fair value of stock options, while the market price of the Corporation’s common stock at the date of grant is used for restricted stock awards. Compensation expense is recognized over the required service period, generally defined as the vesting period. It is the Corporation’s policy to issue shares on the vesting date for restricted stock awards. Unvested restricted stock awards do not receive dividends declared by the Corporation.

Transfers of Financial Assets. Transfers of financial assets are accounted for as sales when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Corporation, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Corporation does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Off-Balance Sheet Financial Instruments. In the ordinary course of business, the Corporation has entered into off-balance sheet financial instruments consisting of commitments to extend credit, commitments under line of credit lending arrangements and letters of credit. Such financial instruments are recorded in the financial statements when they are funded.

Table of Contents

Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies (continued)

Fair Value of Financial Instruments. Fair values of financial instruments are estimated using relevant market information and other assumptions, as more fully disclosed in a separate note. Fair value estimates involve uncertainties and matters of significant judgment regarding interest rates, credit risk, prepayments, and other factors, especially in the absence of broad markets for particular items. Changes in assumptions or in market conditions could significantly affect these estimates.

Loss Contingencies. Loss contingencies, including claims and legal actions arising in the ordinary course of business, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated. Management does not believe there currently are such matters that will have a material effect on the financial statements.

Newly Issued Not Yet Effective Accounting Standards. In February 2016, the FASB issued ASU 2016-02 "Leases". This ASU requires lessees to record most leases on their balance sheet but recognize expenses in the income statement in a manner similar to current accounting treatment. This ASU changes the guidance on sale-leaseback transactions, initial direct costs and lease execution costs, and, for lessors, modifies the classification criteria and the accounting for sales-type and direct financing leases. ASU 2016-02 is effective for annual periods beginning after December 15, 2018, and interim periods therein. In January 2018, the FASB issued ASU 2018-01, which allows entities the option to apply the provisions of the new lease guidance at the effective date without adjusting the comparative periods presented. Upon adoption of this ASU, the Corporation has estimated the right-of-use asset and lease liability to be approximately $1.7 million and does not expect the adoption to have any material impact to net income.

In June 2016, the FASB issued ASU 2016-13, “Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments”. ASU 2016-13 significantly changes the way impairment of financial instruments is recognized by requiring immediate recognition of estimated credit losses expected to occur over the remaining life of the financial instruments. The main provisions of the guidance include (1) replacing the “incurred loss” approach under current GAAP with an “expected loss” model for instruments measured at amortized cost, (2) requiring entities to record an allowance for available-for-sale debt securities rather than reduce the carrying amount of the investments, as is required by the other-than-temporary impairment model under current GAAP, and (3) a simplified accounting model for purchased credit-impaired debt securities and loans. The ASU is effective for interim and annual reporting periods beginning after December 15, 2019, although early adoption is permitted. Management is currently in the developmental stages of collecting available historical information and has established a working group to assess the information available to determine the impact of the adoption of ASU 2016-13 on the Corporation's

financial statements. The Corporation is currently unable to reasonably estimate the impact of adoption, but expects that the impact of adoption could result in changes in the level of allowance for credit losses, shareholders' equity and regulatory capital based on the composition of the assets within the scope and prevailing economic conditions and forecasts as of the adoption date. The Corporation plans to perform several parallel runs of the new methodology in 2019 prior to the adoption of the ASU.

In January 2017, FASB ASU 2017-04, "Simplifying the Test for Goodwill Impairment". This ASU simplifies the measurement of goodwill by eliminating Step 2 from the goodwill impairment test. Instead, under this amendment, an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount. An entity should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value; however, the loss should not exceed the total amount of goodwill allocated to that reporting unit. The amendments are effective for public business entities for the first interim and annual reporting periods beginning after December 15, 2019. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The Corporation has goodwill from prior and current year business combinations and performs an annual impairment test or more frequently if changes or circumstances occur that would more likely than not reduce the fair value of the reporting unit below its carrying value. The Corporation's most recent annual impairment assessment determined that the Corporation's goodwill was not impaired. Although the Corporation cannot anticipate future goodwill impairment assessments, based on the most recent assessment it is unlikely that an impairment amount would need to be calculated and, therefore, does not anticipate a material impact from these amendments to the Corporation's financial position and results of operations. The current accounting policies and processes are not anticipated to change, except for the elimination of the Step 2 analysis.

In March 2017, the FASB issued ASU 2017-08, "Receivable - Nonrefundable Fees and Other Costs (Subtopic 310-20) Premium Amortization on Purchased Callable Debt Securities." ASU 2017-08 amends guidance on the amortization period of premiums on certain purchased callable debt securities to shorten the amortization period of premiums on certain purchased callable debt securities to the earliest call date. The amendments are effective for public business entities for fiscal years beginning after December 15, 2018, and interim periods within fiscal years beginning after December 15, 2020. Early adoption is permitted, including adoption in an interim period. The Corporation is currently evaluating the potential impact of ASU 2017-08 on its financial statements and disclosures.

Table of Contents

Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies (continued)

In August 2017, the FASB issued ASU 2017-12, "Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities." The amendments in this Update are to better reflect the economic results of hedging in the financial statements along with simplification of certain hedge accounting requirements. Specifically, the entire change in the fair value of the hedging instrument is required to be presented in the same income statement line as and in the same period that the earnings effect of the hedged item is recognized. Therefore, hedge ineffectiveness will not be reported separately or in a different period. In addition, hedge effectiveness can be determined qualitatively in periods following inception. The amendments permit an entity to measure the change in fair value of the hedged item on the basis of the benchmark rate component. They also permit an entity to measure the hedged item in a partial-term fair value hedge of interest rate risk by assuming the hedged item has a term that reflects only the designated cash flows being hedged. For a closed portfolio of prepayable financial assets, an entity is permitted to designate the amount that is not expected to be affected by prepayments or defaults as the hedged item. For public business entities, the new guidance is effective for fiscal years beginning after December 15, 2018, and interim periods therein. Early adoption is permitted. The Corporation currently does not have derivative or hedging instruments so this guidance will have no impact on consolidated financial statements.

In August 2018, the FASB issued ASU 2018-13 "Fair Value Measurement". ASU 2018-13 eliminates, adds and modifies certain disclosure requirements for fair value measurements. Disclosures for transfers between Level 1 and Level 2, the policy for timing of transfers between levels, and the valuation processes for Level 3 fair value measurement will be removed. Additional disclosures will be required relating to (a) changes in unrealized gains/losses in OCI for Level 3 fair value measurements for assets held at the end of the reporting period, and (b) the process of calculating weighted average for significant unobservable inputs used to develop Level 3 fair value measurements. The amendments in this update become effective for annual periods and interim periods within those annual periods beginning after December 15, 2019. Early adoption is permitted. The Corporation is currently evaluating the potential impact of ASU 2018-13 on its financial statements and disclosures.

In August 2018, the FASB issued ASU 2018-14 "Compensation - Retirement Benefits - Defined Benefit Plans". ASU 2018-14 removes disclosures pertaining to (a) the amounts of AOCI expected to be recognized as pension costs over the next fiscal year, (b) the amount and timing of plan assets expected to be returned to the employer, and (c) the effect of one-percentage-point change in the assumed health care trends on (i) service and interest costs and (ii) post-retirement health care benefit obligation. A disclosure will be added requiring an explanation of the reasons for significant gains and losses related to changes in the benefit obligation for the period. The amendments in this update are effective retrospectively for annual periods and interim periods within those annual periods beginning after December 15, 2020. Early adoption is permitted. The Corporation is currently evaluating the potential impact of ASU 2018-14 on its financial statements and disclosures.

Adoption of New Accounting Policies. In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-9 “Revenue from Contracts with Customers”. ASU 2014-9 provides guidance that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. The guidance does not apply to revenue associated with financial instruments, including loans and securities. The Corporation has evaluated the nature of its contracts with customers and determined that further disaggregation of revenue from contract with customers into more granular categories beyond what is presented in the Consolidated Statements of Income was not necessary. The Corporation generally fully satisfies its performance obligations on its contracts with customers as services are rendered and the transaction prices are typically fixed; charged either on a periodic basis or based on activity. The Corporation has evaluated revenue streams within noninterest income to assess the applicability of this guidance and determined that service charges on deposits and electronic banking fees are within the scope of this ASU. Because performance obligations are satisfied as services are rendered and the fees are fixed, there is little judgment involved in applying the guidance that significantly affects the determination of the amount and timing of revenue from contracts with customers. The adoption of this guidance on January 1, 2018 did not have a material impact on the Corporation's financial statements. See Note 21 for further detail related to the adoption of this standard.

In January 2016, the FASB issued ASU 2016-1 “Recognition and Measurement of Financial Assets and Financial Liabilities”. ASU 2016-1 revises the accounting for the classification and measurement of investments in equity securities and revises the presentation of certain fair value changes for financial liabilities measured at fair value. For equity securities, the guidance in ASU 2016-1 requires equity investments to be measured at fair value with changes in fair value recognized in net income. For financial liabilities that are measured at fair value in accordance with the fair value option, the guidance requires presenting in other comprehensive income the change in fair value that relates to a change in instrument-specific credit risk. ASU 2016-1 also eliminates the disclosure of assumptions used to estimate fair value for financial instruments measured at amortized cost and requires use of an exit price notion in determining the fair value of financial instruments measured at amortized cost. ASU 2016-1 was effective for interim and annual periods beginning after December 15, 2017. The adoption of this guidance on January 1, 2018 did not have a material impact on the Corporation's financial statements.

Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies (continued)

In August 2016, the FASB issued ASU 2016-15, “Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments (a consensus of the FASB Emerging Issues Task Force”. ASU 2016-15 clarifies the presentation of specific types of cash flow receipts and payments, including the payment of debt prepayment or debt extinguishment costs, contingent consideration cash payments paid subsequent to the acquisition date and proceeds from settlement of BOLI policies. This guidance was effective for fiscal years beginning after December 15, 2017. The adoption of ASU 2016-15 did not have an impact on the Corporation's financial statements and disclosures.

In March 2017, the FASB issued ASU 2017-07, "Compensation – Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost." The amendments in this update require that an employer disaggregate the service cost component from the other components of net benefit cost. The amendments also provide explicit guidance on how to present the service cost component and the other components of net benefit cost in the income statement and allow only the service cost component of net benefit cost to be eligible for capitalization. The amendments in this update improve the consistency, transparency, and usefulness of financial information to users that have communicated that the service cost component generally is analyzed differently from the other components of net benefit cost. The amendments in this update become effective for annual periods and interim periods within those annual periods beginning after December 15, 2017. The adoption of the guidance did not have a material impact on the consolidated financial statements.

2. Securities

Equity Securities. The Corporation held equity securities with fair values of $7,000 and $1.8 million as of December 31, 2018 and 2017, respectively. Beginning January 1, 2018, with the adoption of ASU 2016-01, changes in the fair value of these securities are included in other income on the consolidated statements of net income as opposed to accumulated other comprehensive loss on the consolidated balance sheets. During 2018, the Corporation recognized a loss of $10,000 on the equity securities held at December 31, 2018. During 2018, the Corporation sold $1.3 million of equity securities with a realized net loss of $43,000. On October 1, 2018 the Corporation acquired Community First Bancorp, Inc. (CFB). At the time of the acquisition, the Corporation held 18,000 shares of CFB's common stock which were retired resulting in a realized gain of $690,000.

Debt Securities - Available for Sale. The following table summarizes the Corporation’s securities as of December 31:

(Dollar amounts in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Available for sale:				
December 31, 2018:				
U.S. Treasury and federal agency	$4,532	$ -	$ (87)	$4,445
U.S. government sponsored entities and agencies	17,052	30	(299)	16,783
U.S. agency mortgage-backed securities: residential	27,666	-	(490)	27,176
U.S. agency collateralized mortgage obligations: residential	19,440	34	(810)	18,664
State and political subdivisions	22,943	13	(224)	22,732
Corporate debt securities	8,006	9	(97)	7,918
Total securities available-for-sale	$99,639	$ 86	$ (2,007)	$97,718
December 31, 2017:				
U.S. Treasury and federal agency	$4,541	$ -	$ (69)	$4,472
U.S. government sponsored entities and agencies	14,136	2	(212)	13,926
U.S. agency mortgage-backed securities: residential	20,904	7	(153)	20,758
U.S. agency collateralized mortgage obligations: residential	22,607	25	(708)	21,924
State and political subdivisions	29,249	87	(96)	29,240
Corporate debt securities	9,009	38	(17)	9,030
Total securities available-for-sale	$100,446	$ 159	$ (1,255)	$99,350

Securities with carrying values of $20.6 million and $21.8 million as of December 31, 2018 and 2017, respectively, were pledged to secure public deposits and for other purposes required or permitted by law.

Notes to Consolidated Financial Statements

2. Securities (continued)

Gains on sales of available for sale debt securities for the years ended December 31 were as follows:

(Dollar amounts in thousands)	2018	2017
Proceeds	$11,482	$18,360
Gains	17	350
Losses	(26)	(4)
Tax (benefit) provision related to gains (21%, 34%)	(2)	118

During 2017, management determined that an other than temporary impairment existed on a corporate debt security due to deterioration in the credit quality of the issuer that would likely result in the non-collection of contractual principal and interest. This security was written down to its fair market value and the resulting impairment loss of $508,000 was recognized in earnings.

The following table summarizes scheduled maturities of the Corporation’s debt securities as of December 31, 2018. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties. Mortgage-backed securities and collateralized mortgage obligations are not due at a single maturity and are shown separately.

(Dollar amounts in thousands)	Available for sale	
	Amortized Cost	Fair Value
Due in one year or less	$1,924	$1,918
Due after one year through five years	31,969	31,517
Due after five through ten years	15,893	15,747
Due after ten years	2,747	2,696
Mortgage-backed securities: residential	27,666	27,176
Collateralized mortgage obligations: residential	19,440	18,664
Total	$99,639	$97,718

Information pertaining to securities with gross unrealized losses at December 31, 2018 and 2017 aggregated by investment category and length of time that individual securities have been in a continuous loss position are included

in the table below:

(Dollar amounts in thousands)	Less than 12 Months		12 Months or More		Total	
Description of Securities	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
December 31, 2018:						
U.S. Treasury and federal agency	$-	$ -	$4,445	$ (87)	$4,445	$ (87)
U.S. government sponsored entities and agencies	2,472	(30)	10,337	(269)	12,809	(299)

Notes to Consolidated Financial Statements

2. Securities (continued)

Management evaluates debt securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic, market or other conditions warrant such evaluation. Consideration is given to: (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions and (4) whether the Corporation has the intent to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis. If the Corporation intends to sell an impaired security, or if it is more likely than not the Corporation will be required to sell the security before its anticipated recovery, the Corporation records an other-than-temporary loss in an amount equal to the entire difference between fair value and amortized cost. Otherwise, only the credit portion of the estimated loss on debt securities is recognized in earnings, with the other portion of the loss recognized in other comprehensive income.

There were 112 debt securities in an unrealized loss position as of December 31, 2018, of which 80 were in an unrealized loss position for more than 12 months. Of these 112 securities, 45 were state and political subdivisions securities, 25 were collateralized mortgage obligations (issued by U.S. government sponsored entities), 18 were mortgage-backed securities, 12 were U.S. government sponsored entities and agencies securities, 7 were corporate securities and 5 were U.S. Treasury securities. The unrealized losses associated with these securities were not due to the deterioration in the credit quality of the issuer that is likely to result in the non-collection of contractual principal and interest, but rather have been caused by a rise in interest rates from the time the securities were purchased. Based on that evaluation and other general considerations, and given that the Corporation's current intention is not to sell any impaired securities and it is more likely than not it will not be required to sell these securities before the recovery of its amortized cost basis, the Corporation does not consider the debt securities with unrealized losses as of December 31, 2018 to be other-than-temporarily impaired.

3. Loans Receivable and Related Allowance for Loan Losses

The following table summarizes the Corporation's loans receivable as of December 31:

	December 31,	December 31,

(Dollar amounts in thousands)	**2018**	**2017**
Mortgage loans on real estate:		
Residential first mortgages	$295,405	$221,823
Home equity loans and lines of credit	103,752	99,940
Commercial real estate	238,734	193,068
Total	637,891	514,831
Other loans:		
Commercial business	66,009	58,941
Consumer	11,272	9,589
Total	77,281	68,530
Total loans, gross	715,172	583,361
Less allowance for loan losses	6,508	6,127
Total loans, net	$708,664	$577,234

Included in total loans above are net deferred costs of $2.2 million and $1.5 million at December 31, 2018 and 2017, respectively.

An allowance for loan losses (ALL) is maintained to absorb probable incurred losses from the loan portfolio. The ALL is based on management's continuing evaluation of the risk characteristics and credit quality of the loan portfolio, assessment of current economic conditions, diversification and size of the portfolio, adequacy of collateral, past and anticipated loss experience and the amount of nonperforming loans.

Management reviews the loan portfolio on a quarterly basis using a defined, consistently applied process in order to make appropriate and timely adjustments to the ALL. When information confirms all or part of specific loans to be uncollectible, these amounts are promptly charged off against the ALL.

Table of Contents

Notes to Consolidated Financial Statements

3. Loans Receivable and Related Allowance for Loan Losses (continued)

Following is an analysis of the changes in the ALL for the years ended December 31:

(Dollar amounts in thousands)	2018	2017
Balance at the beginning of the year	$6,127	$5,545
Provision for loan losses	1,280	903
Charge-offs	(989)	(366)
Recoveries	90	45
Balance at the end of the year	$6,508	$6,127

The following table details activity in the ALL and the recorded investment by portfolio segment based on impairment method at December 31, 2018 and 2017:

(Dollar amounts in thousands)	Residential Mortgages	Home Equity & Lines of Credit	Commercial Real Estate	Commercial Business	Consumer	Total
December 31, 2018:						
Beginning Balance	$2,090	$646	$2,753	$585	$53	$6,127
Charge-offs	(71)	(155)	(484)	-	(279)	(989)
Recoveries	3	14	48	1	24	90
Provision	176	143	789	(86)	258	1,280
Ending Balance	$2,198	$648	$3,106	$500	$56	$6,508
Ending ALL balance attributable to loans:						
Individually evaluated for impairment	$12	$-	$-	$-	$-	$12

Acquired loans	20,300	10,873	27,404	1,451	2,893	62,921
Collectively evaluated for impairment	201,098	89,059	164,750	56,921	6,696	518,524
Total	$221,823	$99,940	$193,068	$58,941	$9,589	$583,361

Table of Contents

Notes to Consolidated Financial Statements

3. Loans Receivable and Related Allowance for Loan Losses (continued)

The allowance for loan losses is based on estimates, and actual losses will vary from current estimates. Management believes that the granularity of the homogeneous pools and the related historical loss ratios and other qualitative factors, as well as the consistency in the application of assumptions, result in an ALL that is representative of the risk found in the components of the portfolio at any given date.

At December 31, 2018 and 2017, there was no allowance for loan losses allocated to loans acquired in the acquisition of CFB in October 2018, Northern Hancock Bank and Trust Co. (NHB) in September 2017 (see Note 20).

The following tables present impaired loans by class, segregated by those for which a specific allowance was required and those for which a specific allowance was not necessary as of December 31:

(Dollar amounts in thousands)

	Impaired Loans with Specific Allowance					
	As of December 31, 2018			For the year ended December 31, 2018		
	Unpaid Principal Balance	Recorded Investment	Related Allowance	Average Recorded Investment	Interest Income Recognized in Period	Cash Basis Interest Recognized in Period
Residential first mortgages	$74	$ 74	$ 12	$74	$ 2	$ 2
Home equity and lines of credit	6	6	-	7	-	-
Commercial real estate	-	-	-	-	-	-
Commercial business	-	-	-	-	-	-
Consumer	-	-	-	-	-	-
Total	$80	$ 80	$ 12	$81	$ 2	$ 2

Impaired Loans with No Specific Allowance

As of December 31, 2018	For the year ended December 31, 2018		
		Interest	Cash Basis

	Unpaid Principal Balance	Recorded Investment	Average Recorded Investment	Income Recognized in Period	Interest Recognized in Period

Total	$83	$ 83	$ 7	$319	$ 3	$3

	Impaired Loans with No Specific Allowance				
	As of December 31, 2017		For the year ended December 31, 2017		
	Unpaid Principal Balance	Recorded Investment	Average Recorded Investment	Interest Income Recognized in Period	Cash Basis Interest Recognized in Period
Residential first mortgages	$461	$ 350	$289	$ 8	$8
Home equity and lines of credit	-	-	-	-	-
Commercial real estate	1,089	914	855	3	3
Commercial business	569	569	498	3	3
Consumer	-	-	-	-	-
Total	$2,119	$ 1,833	$1,642	$ 14	$14

Unpaid principal balance includes any loans that have been partially charged off but not forgiven. Accrued interest is not included in the recorded investment in loans presented above or in the tables that follow based on the amounts not being material.

Troubled debt restructurings (TDR). The Corporation has certain loans that have been modified in order to maximize collection of loan balances. If, for economic or legal reasons related to the customer's financial difficulties, management grants a concession compared to the original terms and conditions of the loan that it would not have otherwise considered, the modified loan is classified as a TDR. Concessions related to TDRs generally do not include forgiveness of principal balances. The Corporation has no legal obligation to extend additional credit to borrowers with loans classified as TDRs.

At December 31, 2018 and 2017, the Corporation had $394,000 and $433,000, respectively, of loans classified as TDRs, which are included in impaired loans above. At December 31, 2018 and 2017, the Corporation had $12,000 and $7,000, respectively, of the allowance for loan losses allocated to these specific loans.

During the year ended December 31, 2018, the Corporation did not modify any loans as TDRs. During the year ended December 31, 2017, the Corporation modified one residential mortgage loan with a recorded investment of $323,000 due to a bankruptcy order. At December 31, 2017, the Corporation did not have any allowance for loan losses allocated to this specific loan. The modification did not have a material impact on the Corporation's income statement during the period.

A loan is considered to be in payment default once it is 30 days contractually past due under the modified terms. During the year ended December 31, 2018 and 2017, there were no loans classified as TDRs which defaulted within twelve months of their modification.

3. Loans Receivable and Related Allowance for Loan Losses (continued)

Credit Quality Indicators. Management categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information and current economic trends, among other factors.

Commercial real estate and commercial business loans not identified as impaired are evaluated as risk rated pools of loans utilizing a risk rating practice that is supported by a quarterly special asset review. In this review process, strengths and weaknesses are identified, evaluated and documented for each criticized and classified loan and borrower, strategic action plans are developed, risk ratings are confirmed and the loan's performance status reviewed.

Management has determined certain portions of the loan portfolio to be homogeneous in nature and assigns like reserve factors for the following loan pool types: residential real estate, home equity loans and lines of credit, and consumer installment and personal lines of credit. These homogeneous loans are not rated unless identified as impaired.

Management uses the following definitions for risk ratings:

Pass: Loans classified as pass typically exhibit good payment performance and have underlying borrowers with acceptable financial trends where repayment capacity is evident. These borrowers typically would have sufficient cash flow that would allow them to weather an economic downturn and the value of any underlying collateral could withstand a moderate degree of depreciation due to economic conditions.

Special Mention: Loans classified as special mention are characterized by potential weaknesses that could jeopardize repayment as contractually agreed. These loans may exhibit adverse trends such as increasing leverage, shrinking profit margins and/or deteriorating cash flows. These borrowers would inherently be more vulnerable to the application of economic pressures.

Substandard: Loans classified as substandard exhibit weaknesses that are well-defined to the point that repayment is jeopardized. Typically, the Corporation is no longer adequately protected by both the apparent net worth and repayment capacity of the borrower.

Doubtful: Loans classified as doubtful have advanced to the point that collection or liquidation in full, on the basis of currently ascertainable facts, conditions and value, is highly questionable or improbable.

The following table presents the classes of the loan portfolio summarized by the aggregate pass and the criticized categories of special mention, substandard and doubtful within the Corporation’s internal risk rating system as of December 31, 2018 and 2017:

(Dollar amounts in thousands)

	Not Rated	Pass	Special Mention	Substandard	Doubtful	Total
December 31, 2018:						
Residential first mortgages	$293,919	$-	$-	$ 1,486	$ -	$295,405
Home equity and lines of credit	102,869	-	-	883	-	103,752
Commercial real estate	-	222,335	5,942	10,457	-	238,734
Commercial business	-	62,022	542	3,445	-	66,009
Consumer	11,157	-	-	115	-	11,272
Total	$407,945	$284,357	$6,484	$ 16,386	$ -	$715,172
December 31, 2017:						
Residential first mortgages	$220,730	$-	$-	$ 1,093	$ -	$221,823

Notes to Consolidated Financial Statements

3. Loans Receivable and Related Allowance for Loan Losses (continued)

Management further monitors the performance and credit quality of the loan portfolio by analyzing the age of the portfolio as determined by the length of time a required payment is past due. The following table presents the classes of the loan portfolio summarized by the aging categories of performing loans and nonperforming loans as of December 31, 2018 and 2017:

(Dollar amounts in thousands)

	Performing			Nonperforming		
	Accruing	Accruing	Accruing	Accruing		
	Loans Not	30-59 Days	60-89 Days	90 Days +		Total
	Past Due	Past Due	Past Due	Past Due	Nonaccrual	Loans
December 31, 2018:						
Residential first mortgages	$289,732	$ 3,586	$ 747	$485	$ 855	$295,405
Home equity and lines of credit	101,920	707	351	287	487	103,752
Commercial real estate	232,865	5,013	231	19	606	238,734
Commercial business	65,538	50	247	-	174	66,009
Consumer	10,961	160	36	-	115	11,272
Total loans	$701,016	$ 9,516	$ 1,612	$791	$ 2,237	$715,172
December 31, 2017:						
Residential first mortgages	$218,515	$ 1,936	$ 357	$159	$ 856	$221,823
Home equity and lines of credit	98,112	598	370	334	526	99,940
Commercial real estate	190,451	1,026	430	197	964	193,068

Notes to Consolidated Financial Statements

4. Federal Bank Stocks

The Bank is a member of the FHLB and the FRB. As a member of these federal banking systems, the Bank maintains an investment in the capital stock of the respective regional banks, which are carried at cost. These stocks are purchased and redeemed at par as directed by the federal banks and levels maintained are based primarily on borrowing and other correspondent relationships. The Bank's investment in FHLB and FRB stocks was $5.0 million and $1.3 million, respectively, at December 31, 2018, and $3.3 million and $1.3 million, respectively, at December 31, 2017.

5. Premises and Equipment

Premises and equipment at December 31 are summarized by major classification as follows:

(Dollar amounts in thousands)	2018	2017
Land	$5,129	$4,986
Buildings and improvements	15,008	14,328
Leasehold improvements	1,519	1,056
Furniture, fixtures and equipment	9,157	8,506
Software	3,347	3,272
Construction in progress	576	517
Total	34,736	32,665
Less: accumulated depreciation and amortization	15,825	14,655
Net premises and equipment	$18,911	$18,010

Depreciation and amortization expense for the years ended December 31, 2018 and 2017 were $1.2 million and $1.2 million, respectively.

Rent expense under non-cancelable operating lease agreements for the years ended December 31, 2018 and 2017 was $208,000 and $234,000, respectively. Rent commitments under non-cancelable operating lease agreements for certain branch offices for the years ended December 31, are as follows, before considering renewal options that are generally present:

(Dollar amounts in thousands)	Amount
2019	$214
2020	195
2021	163
2022	134
2023	124
Thereafter	267
Total	$1,097

6. Goodwill and Intangible Assets

The following table summarizes the Corporation's acquired goodwill and intangible assets as of December 31:

(Dollar amounts in thousands)	December 31, 2018		December 31, 2017	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Goodwill	$19,448	$ -	$10,288	$ -
Core deposit intangibles	5,634	4,211	4,426	3,945
Total	$25,082	$ 4,211	$14,714	$ 3,945

Notes to Consolidated Financial Statements

6. Goodwill and Intangible Assets (continued)

Goodwill resulted from five acquisitions. During 2018, the Corporation recorded $9.2 million of goodwill related to the acquisition of CFB (see Note 20). Goodwill represents the excess of the total purchase price paid for the acquisitions over the fair value of the identifiable assets acquired, net of the fair value of the liabilities assumed. Goodwill is not amortized but is evaluated for impairment on an annual basis or whenever events or changes in circumstances indicate the carrying value may not be recoverable. Impairment exists when a reporting unit's carrying amount exceeds its fair value. The Corporation has selected November 30 as the date to perform the annual impairment test. No goodwill impairment charges were recorded in 2018 or 2017. Goodwill is the only intangible asset with an indefinite life on the Corporation's balance sheet.

The core deposit intangible asset, resulting from three acquisitions, is amortized over a weighted average estimated life of the related deposits and is not estimated to have a significant residual value. The Corporation recorded intangible amortization expense totaling $266,000 and $246,000 in 2018 and 2017, respectively.

The estimated amortization expense of the core deposit intangible for the years ending December 31 is as follows:

(Dollar amounts in thousands)	Amortization Expense
2019	$ 176
2020	164
2021	154
2022	149
2023	149
Thereafter	631
Total	$ 1,423

7. Related Party Balances and Transactions

In the ordinary course of business, the Bank maintains loan and deposit relationships with employees, principal officers and directors and their affiliates. The Bank has granted loans to principal officers and directors and their affiliates amounting to $5.3 million and $5.1 million at December 31, 2018 and 2017, respectively. During 2018, there was $453,000 in principal additions as a result of the additional directors subsequent to the acquisition of Community First Bancorp, Inc. Total principal reductions associated with these loans were $112,000. Deposits from principal officers and directors and their affiliates held by the Bank at December 31, 2018 and 2017 totaled $3.2 million and $3.6 million, respectively.

In addition, directors and their affiliates may provide certain professional and other services to the Corporation and the Bank in the ordinary course of business. During 2018, one director was paid an immaterial amount for consulting services. The Corporation did not pay directors or their affiliates for any such services in 2017.

8. Deposits

The following table summarizes the Corporation's deposits as of December 31:

(Dollar amounts in thousands)	2018			2017		
Type of accounts	Weighted average rate	Amount	Percent	Weighted average rate	Amount	Percent
Non-interest bearing deposits	—	$148,893	19.6 %	—	$126,263	19.3 %
Interest bearing demand deposits	0.52%	391,054	51.4 %	0.44%	357,693	54.6 %
Time deposits	1.84%	221,599	29.1 %	1.58%	170,687	26.1 %
Total	0.80%	$761,546	100.0%	0.65%	$654,643	100.0%

Notes to Consolidated Financial Statements

8. Deposits (continued)

Scheduled maturities of time deposits for the next five years and thereafter are as follows:

(Dollar amounts in thousands)	Amount	%
2019	$71,493	32.3 %
2020	47,799	21.5 %
2021	42,734	19.3 %
2022	11,588	5.2 %
2023	33,410	15.1 %
Thereafter	14,575	6.6 %
Total	$221,599	100.0%

The Corporation had a total of $61.2 million and $39.0 million in time deposits of $250,000 or more at December 31, 2018 and 2017, respectively. Scheduled maturities of time deposits of $250,000 or more at December 31, 2018 are as follows:

(Dollar amounts in thousands)	Amount
Three months or less	$4,367
Over three months to six months	3,891
Over six months to twelve months	9,183
Over twelve months	43,744
Total	$61,185

9. Borrowed Funds

The following table summarizes the Corporation’s borrowed funds as of and for the year ended December 31:

(Dollar amounts in thousands)	2018			2017		
	Balance	Average Balance	Average Rate	Balance	Average Balance	Average Rate
Short-term borrowed funds	$12,850	$5,660	3.70%	$2,500	$4,588	2.82%
Long-term borrowed funds	32,500	18,590	2.43%	23,500	35,949	3.03%
Total	$45,350	$24,250		$26,000	$40,537	

Short-term borrowed funds at December 31, 2018 consisted of $10.8 million in overnight advances with a rate of 2.62% and $2.1 million outstanding on a $7.0 million unsecured line of credit with a correspondent bank with a rate of 5.75%, compared to $2.5 million outstanding on a $6.0 million unsecured line of credit with a correspondent bank with a rate of 4.75% at December 31, 2017.

Long-term borrowed funds at December 31, 2018 consisted of six $5.0 million FHLB term advances totaling $30.0 million, maturing between 2019 and 2023 and having fixed interest rates between 1.94% and 2.85%. This compares to four $5.0 million FHLB advances totaling $20.0 million at December 31, 2017. All borrowings from the FHLB are secured by a blanket lien of qualified collateral. Qualified collateral at December 31, 2018 totaled $343.2 million. In addition, the Corporation has a five year unsecured term advance with a correspondent bank. The term advance has a fixed rate of 4.75% and principal payments of $250,000 are due on the first day of each quarter until maturity. At December 31, 2018 and 2017, the outstanding balance on this term advance was $2.5 million and $3.5 million, respectively.

Notes to Consolidated Financial Statements

9. Borrowed Funds (continued)

Scheduled maturities of borrowed funds for the next five years are as follows:

(Dollar amounts in thousands)	Amount
2019	$ 17,850
2020	5,000
2021	12,500
2022	—
2023	10,000
Thereafter	—
Total	$ 45,350

The Bank maintains a credit arrangement with the FHLB as a source of additional liquidity. The total maximum borrowing capacity with the FHLB, excluding loans outstanding of $40.8 million and irrevocable standby letters of credit issued to secure certain deposit accounts of $134.8 million at December 31, 2018 was $167.7 million. In addition, the Corporation has $4.9 million of funds available on a line of credit through a correspondent bank.

10. Regulatory Matters

Restrictions on Dividends, Loans and Advances

The Bank is subject to a regulatory dividend restriction that generally limits the amount of dividends that can be paid by the Bank to the Corporation. Prior regulatory approval is required if the total of all dividends declared in any calendar year exceeds net profits (as defined in the regulations) for the year combined with net retained earnings (as defined) for the two preceding calendar years. In addition, dividends paid by the Bank to the Corporation would be prohibited if the effect thereof would cause the Bank’s capital to be reduced below applicable minimum capital requirements. As of December 31, 2018, $3.9 million of undistributed earnings of the Bank was available for

distribution of dividends without prior regulatory approval.

Loans or advances from the Bank to the Corporation are limited to 10% of the Bank's capital stock and surplus on a secured basis. Funds available for loans or advances by the Bank to the Corporation amounted to approximately $6.0 million. During 2018, the Corporation paid off a $2.2 million commercial line of credit available at the Bank for the primary purpose of purchasing qualified equity investments. At December 31, 2017, the Corporation had an outstanding balance on this line of $1.0 million.

Minimum Regulatory Capital Requirements

Banks and bank holding companies are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations, involve quantitative measures of assets, liabilities, and certain off-balance sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators. Failure to meet capital requirements can initiate regulatory action.

In 2018, the Board of Governors of the Federal Reserve System amended its Small Bank Holding Company Policy Statement by increasing the policy's consolidated assets threshold from $1 billion to $3 billion. The primary benefit of being deemed a "small bank holding company" is the exemption from the requirement to maintain consolidated regulatory capital ratios; instead, regulatory capital ratios only apply at the subsidiary bank level.

The final rules implementing Basel Committee on Banking Supervision's capital guidelines for U.S. banks (BASEL III rules) became effective for the Bank on January 1, 2015 with full compliance with all of the requirements being phased in over a multi-year schedule, and fully phased in by January 1, 2019. Under the BASEL III rules, the Bank must hold a capital conservation buffer above the adequately capitalized risk-based capital ratios. The capital conservation buffer is being phased in from 0.0% for 2015 to 2.50% by 2019. The capital conservation buffer for 2018 was 1.875% and was 1.25% for 2017. Amounts recorded to accumulated other comprehensive income are not included in computing regulatory capital. Management believes as of December 31, 2018, the Bank meets all capital adequacy requirements to which they are subject.

Table of Contents

Notes to Consolidated Financial Statements

10. Regulatory Matters (continued)

Prompt corrective action regulations provide five classifications: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized, although these terms are not used to represent overall financial condition. If adequately capitalized, regulatory approval is required to accept brokered deposits. If undercapitalized, capital distributions are limited, as is asset growth and expansion, and capital restoration plans are required. At year-end 2018 and 2017, the most recent regulatory notifications categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. There are no conditions or events since that notification that management believes have changed the institution's category.

The following table sets forth certain information concerning the Bank's regulatory capital as of the dates presented. The capital adequacy ratios disclosed below are exclusive of the capital conservation buffer.

(Dollar amounts in thousands)	December 31, 2018		December 31, 2017	
	Amount	Ratio	Amount	Ratio
Total capital to risk-weighted assets:				
Actual	$76,344	12.93%	$64,221	12.96%
For capital adequacy purposes	47,252	8.00 %	39,630	8.00 %
To be well capitalized	59,065	10.00%	49,537	10.00%
Tier 1 capital to risk-weighted assets:				
Actual	$69,836	11.82%	$58,088	11.73%
For capital adequacy purposes	35,439	6.00 %	29,722	6.00 %
To be well capitalized	47,252	8.00 %	39,630	8.00 %
Common equity Tier 1 capital to risk-weighted assets:				
Actual	$69,836	11.82%	$58,088	11.73%
For capital adequacy purposes	26,579	4.50 %	22,292	4.50 %
To be well capitalized	38,393	6.50 %	32,199	6.50 %
Tier 1 capital to average assets:				
Actual	$69,836	7.95 %	$58,088	7.71 %
For capital adequacy purposes	35,126	4.00 %	30,117	4.00 %
To be well capitalized	43,908	5.00 %	37,647	5.00 %

11. Commitments and Legal Contingencies

In the ordinary course of business, the Corporation has various outstanding commitments and contingent liabilities that are not reflected in the accompanying consolidated financial statements. In addition, the Corporation is involved in certain claims and legal actions arising in the ordinary course of business. The outcome of these claims and actions are not presently determinable; however, in the opinion of the Corporation's management, after consulting legal counsel, the ultimate disposition of these matters will not have a material adverse effect on the consolidated financial statements.

12. Income Taxes

The Corporation and the Bank file a consolidated federal income tax return. The provision for income taxes for the years ended December 31 is comprised of the following:

(Dollar amounts in thousands)	2018	2017
Current	$298	$1,423
Deferred	335	691
Total	$633	$2,114

Notes to Consolidated Financial Statements

12. Income Taxes (continued)

A reconciliation between the provision for income taxes and the amount computed by multiplying operating results before income taxes by the statutory federal income tax rate of 21% for the year ended December 31, 2018 and 34% for the years ended December 31, 2017 is as follows:

(Dollar amounts in thousands)	2018		2017	
	Amount	% Pre-tax Income	Amount	% Pre-tax Income
Provision at statutory tax rate	$1,017	21.0%	$2,173	34.0%
Increase (decrease) resulting from:				
Tax free gain on bargain purchase	-	-	(447)	(7.0%)
Tax free gain on retirement of CMFP shares	(145)	(3.0%)	-	-
Tax free interest, net of disallowance	(234)	(4.8%)	(446)	(7.0%)
Earnings on bank-owned life insurance	(71)	(1.5%)	(113)	(1.8%)
Federal tax rate change	-	-	827	12.9%
Other, net	66	1.4%	120	2.0%
Provision	$633	13.1%	$2,114	33.1%

The tax effects of temporary differences between the financial reporting basis and income tax basis of assets and liabilities that are included in the net deferred tax asset as of December 31 relate to the following:

(Dollar amounts in thousands)	2018	2017
Deferred tax assets:		
Allowance for loan losses	$1,351	$1,287
Funded status of pension plan	1,287	1,286
Net unrealized loss on securities	401	180
Deferred compensation	391	272
Accrued incentive compensation	148	136
Nonaccrual loan interest income	75	53
Securities impairment	70	199
Stock compensation	69	77
Business combination adjustments	-	38

Other	17	35
Gross deferred tax assets	3,809	3,563
Deferred tax liabilities:		
Accrued pension liability	1,044	939
Depreciation	619	652
Deferred loan fees and costs	461	307
Intangible assets	215	204
Business combination adjustments	68	-
Other	53	52
Gross deferred tax liabilities	2,460	2,154
Net deferred tax asset	$1,349	$1,409

In accordance with relevant accounting guidance, the Corporation determined that it was not required to establish a valuation allowance for deferred tax assets since it is more likely than not that the deferred tax asset will be realized through future taxable income, future reversals of existing taxable temporary differences and tax strategies. The Corporation’s net deferred tax asset or liability is recorded in the consolidated financial statements as a component of other assets or other liabilities.

On December 22, 2017, H.R. 1, commonly known as the Tax Cuts and Jobs Act (the Act) was signed into law. The Act reduced the corporate federal income tax rate from a maximum of 35% to a flat 21% effective January 1, 2018. As a result, the Corporation was required to re-measure, through income tax expense, deferred tax assets and liabilities using the enacted rate at which they are expected to be recovered or settled. The re-measurement of the Corporation's net deferred tax asset resulted in additional income tax expense in 2017 of $827,000.

Table of Contents

12. Income Taxes (continued)

Also on December 22, 2017, the SEC released Staff Accounting Bulletin No. 118 (SAB 118) to address any uncertainty or diversity in practice in accounting for the income tax effects of the Act in situations where a registrant does not have the necessary information available, prepared or analyzed in reasonable detail to complete this accounting in the reporting period that includes the enactment date. SAB 118 allows for a measurement period not to extend beyond one year from the Act's enactment date to complete the necessary accounting.

The Corporation recorded provisional amounts of deferred income taxes using reasonable estimates in one area where the information necessary to complete reasonable accounting was not available, prepared or analyzed. The one area is the deferred tax liability for temporary differences between the tax and financial reporting bases of fixed assets principally due to the accelerated depreciation under the Act which allows for full expensing of qualified property purchased and placed in service after September 27, 2017.

The Corporation completed the calculation for the provisional item with the completion of the 2017 tax return. The impact of the completed calculation did not result in a material re-measurement of the deferred tax liability so nothing was recorded in 2018.

At December 31, 2018 and December 31, 2017, the Corporation had no unrecognized tax benefits. The Corporation does not expect the total amount of unrecognized tax benefits to significantly increase within the next twelve months. The Corporation recognizes interest and penalties on unrecognized tax benefits in income taxes expense in its Consolidated Statements of Income.

The Corporation and the Bank are subject to U.S. federal income tax, a capital-based franchise tax in the Commonwealth of Pennsylvania as well as a corporate income tax in West Virginia based on earnings derived from business activity in the state. The Corporation and the Bank are no longer subject to examination by taxing authorities for years before 2015.

Table of Contents

Notes to Consolidated Financial Statements

13. Employee Benefit Plans

Defined Benefit Plan

The Corporation provides pension benefits for eligible employees through a defined benefit pension plan. Substantially all employees participate in the retirement plan on a non-contributing basis, and are fully vested after three years of service. Effective January 1, 2009, the plan was closed to new participants. The Corporation provided the requisite notice to plan participants on March 12, 2013 of the determination to freeze the plan (curtailment). While the freeze was not effective until April 30, 2013, management determined that participants would not satisfy, within the provisions of the plan, 2013 eligibility requirements based on minimum hours worked for 2013. Therefore, employees ceased to earn benefits as of January 1, 2013. This amendment to the plan will not affect benefits earned by the participant prior to the date of the freeze. The Corporation measures the funded status of the plan as of December 31.

Information pertaining to changes in obligations and funded status of the defined benefit pension plan for the years ended December 31 is as follows:

(Dollar amounts in thousands)	2018	2017
Change in plan assets:		
Fair value of plan assets at beginning of year	$10,159	$9,331
Actual return on plan assets	(479)	1,218
Employer contribution	500	-
Benefits paid	(698)	(390)
Fair value of plan assets at end of year	9,482	10,159
Change in benefit obligation:		
Benefit obligation at beginning of year	11,801	10,609
Interest cost	423	438
Actuarial loss	85	71
Effect of change in assumptions	(983)	1,073
Benefits paid	(698)	(390)
Benefit obligation at end of year	10,628	11,801
Funded status (plan assets less benefit obligation)	$(1,146)	$(1,642)
Amounts recognized in accumulated other comprehensive loss consists of:		
Accumulated net actuarial loss	$6,126	$6,125

Accumulated prior service benefit	-	-
Amount recognized, end of year	$6,126	$6,125

Notes to Consolidated Financial Statements

13. Employee Benefit Plans (continued)

The following table presents the Corporation's pension plan assets measured and recorded at estimated fair value on a recurring basis and their level within the estimated fair value hierarchy as described in Note 15:

(Dollar amounts in thousands)		(Level 1)	(Level 2)	(Level 3)
		Quoted Prices in Active Markets for Identical	Significant Other Observable	Significant Unobservable Inputs
Description	Total	Assets	Inputs	
December 31, 2018:				
Money markets	$77	$77	$ -	$ -
Mutual funds - debt	4,183	4,183	-	-
Mutual funds - equity	4,373	4,373	-	-
Emclaire stock	849	849	-	-
	$9,482	$9,482	$ -	$ -
December 31, 2017:				
Money markets	$720	$720	$ -	$ -
Mutual funds - debt	3,368	3,368	-	-
Mutual funds - equity	5,221	5,221	-	-
Emclaire stock	850	850	-	-
	$10,159	$10,159	$ -	$ -

There were no transfers between Level 1 and Level 2 during 2018.

The accumulated benefit obligation for the defined benefit pension plan was $10.6 million and $11.8 million at December 31, 2018 and 2017, respectively.

The components of the periodic pension costs and other amounts recognized in other comprehensive income for the

years ended December 31 are as follows:

(Dollar amounts in thousands)	2018	2017
Interest cost	$423	$438
Expected return on plan assets	(672)	(661)
Amortization of prior service beneft and net loss	252	239
Net periodic pension benefit	3	16
Amortization of prior service benefit and net loss	(252)	(239)
Net loss	253	588
Total recognized in other comprehensive loss	1	349
Total recognized in net periodic benefit and other comprehensive loss	$4	$365

The estimated net loss and prior service benefit for the defined benefit pension plan that will be amortized from accumulated other comprehensive income into net periodic benefit cost over the next fiscal year is $253,000 as of December 31, 2018.

Weighted-average actuarial assumptions for the years ended December 31 include the following:

	2018	2017
Discount rate for net periodic benefit cost	3.62%	4.19%
Discount rate for benefit obligations	4.26%	3.62%
Expected rate of return on plan assets	6.75%	7.25%

Table of Contents

Notes to Consolidated Financial Statements

13. Employee Benefit Plans (continued)

The Corporation's pension plan asset allocation at December 31, 2018 and 2017, target allocation for 2019, and expected long-term rate of return by asset category are as follows:

Asset Category	Target Allocation	Percentage of Plan Assets at Year End		Weighted-Average Expected Long-Term Rate of Return
	2019	2018	2017	2018
Equity securities	55%	55%	56%	5.02%
Debt securities	37%	44%	37%	1.70%
Money markets	8%	1%	7%	0.03%
	100%	100%	100%	6.75%

Investment Strategy

The intent of the pension plan is to provide a range of investment options for building a diversified asset allocation strategy that will provide the highest likelihood of meeting the aggregate actuarial projections. In selecting the options and asset allocation strategy, the Corporation has determined that the benefits of reduced portfolio risk are best achieved through diversification. The following asset classes or investment categories are utilized to meet the Pension plan's objectives: Small company stock, International stock, Mid-cap stock, Large company stock, Diversified bond, Money Market/Stable Value and Cash. The pension plan does not prohibit any certain investments.

The Corporation does currently not expect to make a contribution to its pension plan in 2019.

Estimated future benefit payments, which reflect expected future service, as appropriate, are as follows:

(Dollar amounts in thousands) For year ended December 31,	Pension Benefits
2019	$397
2020	444
2021	448
2022	490
2023	493
2024-2028	2,718
Thereafter	5,638
Benefit Obligation	$10,628

Defined Contribution Plan

The Corporation maintains a defined contribution 401(k) Plan. Employees are eligible to participate by providing tax-deferred contributions up to 20% of qualified compensation. Employee contributions are vested at all times. The Corporation provides a matching contribution of up to 4% of the participant's salary. For the years ended 2018 and 2017, matching contributions were $235,000 and $206,000, respectively. The Corporation may also make, at the sole discretion of its Board of Directors, a profit sharing contribution. For the years ended 2018 and 2017, the Corporation made profit sharing contributions of $124,000 and $109,000, respectively.

Supplemental Executive Retirement Plan

The Corporation maintains a Supplemental Executive Retirement Plan (SERP) to provide certain additional retirement benefits to participating officers. The SERP is subject to certain vesting provisions and provides that the officers shall receive a supplemental retirement benefit if the officer's employment is terminated after reaching the normal retirement age of 65, with benefits also payable upon death, disability, a change of control or a termination of employment prior to normal retirement age. As of December 31, 2018 and 2017, the Corporation's SERP liability was $1.8 million and $1.2 million, respectively. For the years ended December 31, 2018 and 2017, the Corporation recognized expense of $156,000 and $167,000, respectively, related to the SERP.

Table of Contents

Notes to Consolidated Financial Statements

14. Stock Compensation Plans

In April 2014, the Corporation adopted the 2014 Stock Incentive Plan (the 2014 Plan), which is shareholder approved and permits the grant of restricted stock awards and options to its directors, officers and employees for up to 176,866 shares of common stock, of which 37,783 shares of restricted stock and 88,433 stock options remain available for issuance under the plan.

Incentive stock options, non-incentive or compensatory stock options and share awards may be granted under the Plans. The exercise price of each option shall at least equal the market price of a share of common stock on the date of grant and have a contractual term of ten years. Options shall vest and become exercisable at the rate, to the extent and subject to such limitations as may be specified by the Corporation. Compensation cost related to share-based payment transactions must be recognized in the financial statements with measurement based upon the fair value of the equity instruments issued.

During 2018 and 2017, the Corporation granted restricted stock awards of 14,750 and 13,250 shares, respectively, with a face value of $456,000 and $416,000, respectively, based on the weighted-average grant date stock prices of $30.90 and $31.37, respectively. These restricted stock awards are 100% vested on the third anniversary of the date of grant, except in the event of death, disability or retirement. Nonvested restricted stock is not included in common shares outstanding on the consolidated balance sheets. It is the Corporation's policy to issue shares on the vesting date for restricted stock awards. Unvested restricted stock awards do not receive dividends declared by the Corporation. There were no stock options granted during 2018 or 2017. For the year ended December 31, 2018 and 2017 the Corporation recognized $269,000 and $230,000, respectively, in stock compensation expense.

A summary of the status of the Corporation’s nonvested restricted stock awards as of December 31, 2018, and changes during the period then ended is presented below:

	Shares	Weighted-Average Grant-date Fair Value
Nonvested at January 1, 2018	33,400	$ 27.70
Granted	14,750	30.90
Vested	(8,400)	23.53

Forfeited	(2,500)		27.17
Nonvested as of December 31, 2018	37,250	$	29.94

As of December 31, 2018, there was $785,000 of total unrecognized compensation expense related to nonvested share-based compensation arrangements granted under the plans. That expense is expected to be recognized over the next three years.

15. Fair Values of Financial Instruments

The fair value hierarchy requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. An asset or liability's level is based on the lowest level of input that is significant to the fair value measurement. There are three levels of inputs that may be used to measure fair value.

Level 1:	Quoted prices (unadjusted) for identical assets or liabilities in active markets that the Corporation has the ability to access at the measurement date.
Level 2:	Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.
Level 3:	Significant unobservable inputs that reflect the Corporation’s own assumptions about the assumptions that market participants would use in pricing an asset or liability.

Notes to Consolidated Financial Statements

15. Fair Values of Financial Instruments (continued)

Management uses its best judgment in estimating the fair value of the Corporation's financial instruments; however, there are inherent weaknesses in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates herein are not necessarily indicative of the amounts the Corporation could have realized in a sale transaction or exit price on the date indicated. The estimated fair value amounts have been measured as of their respective year-ends and have not been re-evaluated or updated for purposes of these financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at year-end.

Assets measured at fair value on a recurring basis. The Corporation used the following methods and significant assumptions to estimate the fair value of the following assets:

Debt securities available for sale, equity securities – The fair value of all investment securities are based upon the assumptions market participants would use in pricing the security. If available, investment securities are determined by quoted market prices (Level 1). Level 1 includes U.S. Treasury, federal agency securities and certain equity securities. For investment securities where quoted market prices are not available, fair values are calculated based on market prices on similar securities (Level 2). Level 2 includes U.S. Government sponsored entities and agencies, mortgage-backed securities, collateralized mortgage obligations, state and political subdivision securities and certain corporate debt securities. For investment securities where quoted prices or market prices of similar securities are not available, fair values are calculated by using unobservable inputs (Level 3) and may include certain corporate debt and equity securities held by the Corporation. The Level 3 corporate debt securities consist of certain subordinated notes which are priced a par because management has determined that the par value approximates the fair value of these instruments. The Level 3 equity security valuations were supported by an analysis prepared by the Corporation which relies on inputs such as the security issuer's publicly attainable financial information, multiples derived from prices in observed transactions involving comparable businesses and other market, financial and nonfinancial factors.

For assets measured at fair value on a recurring basis, the fair value measurements by level within the fair value hierarchy are as follows:

(Dollar amounts in thousands)	(Level 1) Quoted Prices in	(Level 2) Significant	(Level 3)

Description	Total	Active Markets for Identical Assets	Other Observable Inputs	Significant Unobservable Inputs
December 31, 2018:				
Securities available for sale				
U.S. Treasury and federal agency	$4,445	$ 4,445	$ -	$ -
U.S. government sponsored entities and agencies	16,783	-	16,783	-
U.S. agency mortgage-backed securities: residential	27,176	-	27,176	-
U.S. agency collateralized mortgage obligations: residential	18,664	-	18,664	-
State and political subdivision	22,732	-	22,732	-
Corporate debt securities	7,918	-	4,418	3,500
Total	$97,718	$ 4,445	$ 89,773	$ 3,500
Equity securities	$7	$ 7	$ -	$ -
December 31, 2017:				
Securities available for sale				
U.S. Treasury and federal agency	$4,472	$ 4,472	$ -	$ -
U.S. government sponsored entities and agencies	13,926	-	13,926	-
U.S. agency mortgage-backed securities: residential	20,758	-	20,758	-
U.S. agency collateralized mortgage obligations: residential	21,924	-	21,924	-
State and political subdivisions	29,240	-	29,240	-
Corporate debt securities	9,030	-	1,032	7,998
Total	$99,350	$ 4,472	$ 86,880	$ 7,998
Equity securities	$1,817	$ 1,683	$ -	$ 134

Notes to Consolidated Financial Statements

15. Fair Values of Financial Instruments (continued)

The Corporation's policy is to transfer assets or liabilities from one level to another when the methodology to obtain the fair value changes such that there are more or fewer unobservable inputs as of the end of the reporting period. During 2018, the Corporation reclassified a restricted bank stock from the equity security portfolio to other assets and certain corporate securities from Level 3 to Level 2. Also during 2018, $25,000 in Level 3 equity securities were sold from the portfolio. During 2017, certain corporate debt securities with a fair value of $8.0 million as of December 31, 2017 were transferred out of Level 2 and into Level 3 because of a lack of observable market data. The following table presents changes in Level 3 assets measured on a recurring basis for the years ended December 31, 2018 and 2017:

(Dollar amounts in thousands)	**2018**	**2017**
Balance at the beginning of the period	$8,132	$136
Total gains or losses (realized/unrealized):		
Included in earnings	—	—
Included in other comprehensive income	1	(2)
Issuances	—	—
Sales	(25)	—
Acquired	—	—
Transfers in and/or out of Level 3	(4,608)	7,998
Balance at the end of the period	$3,500	$8,132

Assets measured at fair value on a non-recurring basis. The Corporation used the following methods and significant assumptions to estimate the fair value of the following assets:

Impaired loans – At the time a loan is considered impaired, it is valued at the lower of cost or fair value. Impaired loans carried at fair value generally receive a specific allowance for loan losses. For collateral dependent loans, fair value is commonly based on real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. Non-real estate collateral may be valued using an appraisal, net book value per the borrower's financial statements, or aging reports, adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business, resulting in a Level 3 classification. Impaired loans are evaluated on a quarterly basis for additional

impairment and adjusted accordingly. As of December 31, 2018 and 2017, the Corporation did not have any impaired loans carried at fair value measured using the fair value of collateral. There was no additional provision for loan losses recorded for impaired loans during 2018 or 2017.

Other real estate owned (OREO) – Assets acquired through or instead of foreclosure are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. These assets are subsequently accounted for at lower of cost or fair value less estimated costs to sell. Fair value is commonly based on recent real estate appraisals. Management’s ongoing review of appraisal information may result in additional discounts or adjustments to the valuation based upon more recent market sales activity or more current appraisal information derived from properties of similar type and/or locale. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. As of December 31, 2018, OREO measured at fair value less costs to sell had a net carrying amount of $160,000, which consisted of the outstanding balance of $415,000 less write-downs of $255,000. As of December 31, 2017, the Corporation did not have any OREO measured at fair value.

Appraisals for both collateral-dependent impaired loans and OREO are performed by certified general appraisers (for commercial properties) or certified residential appraisers (for residential properties) whose qualifications and licenses have been reviewed by the Corporation. Once received, management reviews the assumptions and approaches utilized in the appraisal as well as the overall resulting fair value in comparison with independent data sources such as recent market data or industry-wide statistics. On an annual basis, the Corporation compares the actual selling price of OREO that has been sold to the most recent appraised value to determine what additional adjustment should be made to the appraisal value to arrive at fair value. The most recent analysis performed indicated that a discount of 10% should be applied.
