Form 10-K
March 29, 2013

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K

(Mark One)

ANNUAL REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the Fiscal Year Ended December 31, 2012

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT 1934

For the transition period from _____ to _____

Commission file number: 000-53554

DAIS ANALYTIC CORPORATION
(Exact name of registrant as specified in its charter)

New York
(State or Other Jurisdiction of
Incorporation or Organization)

14-1760865
(I.R.S. Employer
Identification No.)

11552 Prosperous Drive
Odessa, Florida
(Address of Principal Executive
Offices)

33556
(Zip Code)

Registrant's telephone number, including area code: (727) 375-8484

Securities registered pursuant to Section 12(b) of the Act:
None

Securities registered pursuant to Section 12 (g) of the Act:
Common Stock, par value \$0.01 per share

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Edgar Filing: DAIS ANALYTIC CORP - Form 10-K

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No "

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405) during the preceding 12 months. Yes x No "

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. "

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act): Yes " No x

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant was approximately \$2,868,928 as of the last business day of the registrant's most recently completed second fiscal quarter, based upon the closing sale price on the OTC:BB reported for such date. Shares of common stock held by each officer and director and by each person who owns 10% or more of the outstanding common stock have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

As of March 29, 2013, the Registrant had 55,509,884 outstanding shares of its common stock, \$0.01 par value.

Documents incorporated by reference: none

INTRODUCTORY NOTE

FORWARD-LOOKING STATEMENTS

Information contained or incorporated by reference in this Annual Report may include forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. This information may involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements to be materially different from the future results, performance or achievements expressed or implied by any forward-looking statements. Forward-looking statements, which involve assumptions and describe our future plans, strategies and expectations, are generally identifiable by use of the words “may,” “should,” “expect,” “anticipate,” “estimate,” “believe,” “intend” or “project” or the negative of these words or other variations on these words or comparable terminology.

This Annual Report on Form 10-K contains forward-looking statements, including statements regarding, among other things:

- our ability to continue as a going concern;
- our ability to achieve and maintain profitability;
- the price volatility of the common stock;
- the historically low trading volume of the common stock;
- our ability to produce, manage and fund our growth;
- our ability to attract and retain qualified personnel;
- unanticipated litigation;
- our ability to do business overseas;
- our ability to compete with current and future competitors;
- the ability of our licensees to sell our products;
- our ability to obtain additional financing;
- general economic and business conditions;
- other risks and uncertainties included in the section of this document titled “Risk Factors”; and
- other factors discussed in our other filings made with the Commission.

These statements may be found under “Management’s Discussion and Analysis” and “Description of Business,” as well as in other sections of this Annual Report generally. Actual events or results may differ materially from those discussed in forward-looking statements as a result of various factors, including, without limitation, the risks outlined under “Risk Factors” and matters described in this Annual Report generally. In light of these risks and uncertainties, there can be no assurance that the forward-looking statements contained in this Annual Report will in fact occur. We have no obligation to publicly update or revise these forward-looking statements to reflect new information, future events, or otherwise, except as required by applicable Federal securities laws, and we caution you not to place undue reliance on these forward-looking statements.

Third Party Data

This Form 10K also contains estimates and other information concerning our industry, including market size and growth rates, which are based on industry publications, surveys and forecasts, including those generated by us. This information involves a number of assumptions and limitations, and you are cautioned not to give undue weight to these estimates. Although we believe the information in these industry publications, surveys and forecasts is reliable, we have not independently verified the accuracy or completeness of the information. The industry in which we operate is subject to a high degree of uncertainty and risk due to a variety of factors, including those described in “Risk Factors”.

ITEM 1. BUSINESS

Dais Analytic Corporation is a nano-structure polymer technology materials company that has developed and is commercializing applications using its materials. The first commercial product is called ConsERV™, a fixed plate energy recovery ventilator which we believe is useful in meeting building indoor fresh air requirements while saving energy and lowering emissions for most forms of Heating, Ventilation and Air Conditioning (HVAC) equipment. We are developing other nano-structure polymer technology applications including (i) “NanoAir”, a water based packaged heating and cooling system and (ii) “NanoClear”, a water clean-up process useful in the creation of potable water from sea, brackish or waste water. We further believe that our nano-structure polymer technology may be useful in developing an ultra-capacitor, a device that may be capable of greater energy density and power per pound than traditional capacitors or batteries.

Formation History

We were incorporated as a New York corporation on April 8, 1993 as Dais Corporation. We subsequently changed our name to Dais Analytic Corporation on December 13, 1999. We were formed to develop new, cost-effective polymer materials for various applications, including providing a lower cost membrane material for Polymer Electrolyte Membrane (“PEM”) fuel cells. We believe our research on materials science has yielded technological advances in the field of selective ion transport polymer materials.

In December 1999, we purchased the assets of Analytic Power Corporation, which was founded in 1984 to provide fuel cell and fuel processor design and consulting services, systems integration and analysis services to develop integrated fuel cell power systems, and we were re-named Dais Analytic Corporation. Analytic Power Corporation developed a portfolio of fuel cell and related fuel cell component technologies, including fuel cell stack designs, a membrane electrode assembly process, and natural gas, propane, diesel and ammonia fuel processors for use in creating integrated fuel cell systems.

In March 2002, we sold substantially all of our fuel cell assets to a large U.S. oil company for a combination of cash and the assumption by such company of certain of our obligations. After we sold a substantial portion of our fuel cell assets, we focused on expanding our nano-structured polymer platform, having already identified the Energy Recovery Ventilator (“ERV”) application as our first commercial product.

Recent Developments

On July 13, 2012, we repaid \$1,724,416 in principal and interest due pursuant to a secured convertible promissory note ("Secured Note") in the amount of \$1,500,000 issued by the Company and secured by all patents, patent applications and similar protections of the Company and all rents, royalties, license fees and "accounts" with respect to such intellectual property assets. On October 29, 2012, Company repaid \$1,323,561 (consisting of principal and interest) to satisfy and terminate an unsecured convertible promissory note (the "Convertible Note") issued to Platinum-Montaur Life Sciences, LLC ("Platinum-Montaur"). With the repayment of the Convertible Note, we also terminated a forbearance agreement, dated June 15, 2012 (the "Forbearance Agreement"), with Platinum Montaur.

In October of 2012, we entered into a License and Supply Agreement with MGE Energy LLC ("MGE"). Pursuant to the agreement, effective October 26, 2012, we licensed certain intellectual property and improvements thereto to MG Energy, for use in the manufacture and sale of energy recovery ventilators ("ERV") and certain other HVAC systems for installation in commercial, residential or industrial buildings in North America and South America. MG Energy also agreed to purchase its requirements of certain products including, but not limited to, our ConsERV™ energy recovery ventilator cores from us for MG Energy's use, pursuant to the terms and conditions of the agreement. As a result of this agreement, we expect both revenue and costs of goods sold will decrease in the first quarter of 2013. Energy recovery ventilators are mechanical equipment, of which an energy recovery ventilator air to air exchanger core is a component, that assists in the recovery of energy from the exhaust air expelled by an HVAC system for the purpose of pre-conditioning the incoming outdoor air's components prior to supplying the conditioned air to a residential or commercial building, either directly or as part of an air-conditioning system. Under the agreement, MG Energy retired the US \$2,000,000 Secured Promissory Note, dated July 13, 2012, including all interest accrued thereon, issued by the us to Michael Gostomski (the "Investor"), who assigned the Secured Promissory Note. This retirement is nonrefundable and noncreditable. Pursuant to this Agreement, MG Energy has also agreed to pay a royalty on the net sales price on products sold using our intellectual property.

Technology

We use proprietary nano-technology to reformulate thermoplastic materials called polymers. Nano-technology involves studying and working with matter on an ultra-small scale. One nanometer is one-millionth of a millimeter and a single human hair is around 80,000 nanometers in width. Polymers are chemical, plastic-like compounds used in diverse products such as Dacron, Teflon, and polyurethane. A thermoplastic is a material that is plastic or deformable, melts to a liquid when heated and to a brittle, glassy state when cooled sufficiently.

These reformulated polymers have properties that allow them to be used in unique ways. We transform polymers from a hard, water impermeable substance into a material which water and similar liquids can, under certain conditions, diffuse (although there are no openings in the material) as molecules as opposed to liquid water. Water and similar liquids penetrate the thermoplastic material at the molecular level without oxygen and other atmospheric gases penetrating the material. It is believed this selectivity is dependent on the size and type of a particular molecule.

Products

ConsERV™

We currently have commercialized the ConsERV™ product. ConsERV™ is an HVAC energy conservation product which should, according to various tests, save an average of up to 30% on HVAC ventilation air operating costs, lower CO2 emissions and allow HVAC equipment to be up to 30% smaller, reducing peak energy usage by up to 20% while simultaneously improving indoor air quality. This product makes HVAC systems operate more efficiently and results, in many cases, in energy and cost savings. ConsERV™ attaches onto existing HVAC systems, typically in commercial buildings, to provide ventilation within the structure. It pre-conditions the incoming air by passing through our nano-technology polymer which has been formed into a heat exchanger core. The nano-technology heat exchanger uses the stale building air that must be simultaneously exhausted to transfer heat and moisture into or out of the incoming air. For summer air conditioning, the "core" removes some of the heat and humidity from the incoming air,

transferring it to the exhaust air stream thereby, under certain conditions, saving energy. For winter heating, the “core” transfers a portion of the heat and humidity into the incoming air from the exhaust air stream thereby often saving energy.

Our ConsERV™ product has been the primary focus of our resources and commercialization efforts. When compared to similar competitive products, we believe based on test results conducted by the Air-Conditioning, Heating and Refrigeration Institute (AHRI), a leading industry association, ConsERV™ maintains an industry leading position in the management of latent heat. We expect ConsERV™ to continue to be our focused commercial product through 2013 with a growing emphasis on moving components of our Nano Clear and NanoAir technologies towards commercialization.

How ConsERV™ Works

Most building codes mandate commercial structures to provide certain levels of ventilation determined by use and occupancy. ERVs are systems used by HVAC manufacturers to increase energy efficiencies in HVAC units by transferring heat and humidity between air flows. They do this by capturing a portion of the energy already used to heat or cool air that is being released to the outside and use such released air to condition the incoming air stream. In an air conditioning application, heat and humidity that are part of the incoming air stream are transferred to the cool, dry exhaust air, thereby “pre-conditioning” the incoming air before it reaches the building’s air conditioning system. By pre-conditioning the incoming air, ERVs should increase the operating efficiency of the HVAC unit, thereby lowering the overall costs associated with heating and cooling buildings and potentially reducing the size and initial capital cost of the overall HVAC unit.

ConsERV™ has a “core” component made using our nano-structured material and may be described as a high-performance ERV. It is used in conjunction with a building’s HVAC equipment. The ConsERV™ energy recovery ventilator employs nano-technology based materials to create an exchange of sensible (temperature) and latent (humidity) energy between the two air streams using HVAC equipment to provide building ventilation. The first air stream typically exits a building at the temperature and relative humidity level set by the buildings air conditioning and heating equipment. The second air stream comes from the outside environment at a different temperature and relative humidity level and is used to bring outdoor air to the occupants of the building. The ConsERV™ product uses the energy found in the first air stream (air already cooler or heated) to condition the second air stream (the outdoor air coming in) before the second air stream (outside air) enters the HVAC equipment. The ConsERV™ product may save energy, in that it often reduces the required energy and size of the HVAC equipment and thereby may lower the cost of providing ventilation. In addition, it may lower carbon dioxide emissions because the HVAC equipment may not need to be used as frequently and often times can be reduced in size to provide the same levels of comfort indoors. The process is shown in the picture below.

Given third-party test data, our ConsERV™ product, with its nano-structured materials, offers better total performance than other fixed plate ERV products of which we are aware, with no moving parts and little or no cross-air stream contamination.¹ Our ConsERV™ core product has received UL 900 recognition and Air-Conditioning, Heating and Refrigeration Institute (“AHRI”) standard 1060 certification. Our ConsERV™ product is compatible with most commercial HVAC units and requires only a small amount of additional HVAC technical expertise to install. We believe the purchase and installation costs of our ConsERV™ product are comparable to the costs of many competing energy recovery products and our ConsERV™ product is more efficient in transferring moisture with lower life cycle maintenance costs.

¹ Air-Conditioning, Heating, and Refrigeration Institute (AHRI) – May 2008 test results. This study is publicly available and was not prepared for our benefit or funded by us.

Achieving increased sales revenue growth from our ConsERV™ products is predicated on success in seven key areas:

- Achieving continued engineering or technological improvements in key materials and assembly techniques to lower our ‘per unit’ cost structure.
 - Engineering of additional sizes of ConsERV products to meet market demands
 - Development of new core designs to meet broad spectrum of performance needs
-
- Continuing to implement ‘Lean Manufacturing’ techniques for in-house assembly processes as well as monitoring existing outsourced manufacturing and assembly relationships that lower our ‘per unit’ cost structure.
 - Securing additional depth in the sales channels including selling the ConsERV™ products into non-traditional application, as we are adding more independent sales representatives, licensees and distributors, supplying HVAC equipment manufacturers, as well as ERV Original Equipment Manufacturers (“OEM”), with presence in existing and evolving sales channels assisting our customers or partners to sell worldwide “in-country or region” to grow the ConsERV™ business.
 - Recruiting and retaining the necessary people and infrastructure to support sales growth of ConsERV™ and other products as they are introduced into their respective sales channels.
 - Access to sufficient working capital in a timely manner for the necessary steps outlined above to continue without interruption.

We are devoting growing amounts of time to other uses of our nano-structured products in ways which are not disruptive to the ConsERV™ effort. To date, only a small amount of revenue has been generated from these non-ConsERV™ related applications.

These product applications and activities include:

NanoAir™

Water Based packaged HVAC system or “NanoAir”: We expect this application would function to dehumidify and cool air in warm weather, or humidify and heat in cold weather. This NanoAir application may be capable of replacing a traditional refrigerant loop based heating/cooling system. The Company has a small prototype showing fundamental heating, cooling, humidification, and dehumidification operation of this evolving product. The NanoAir product is in the middle stage of prototype development. In 2010, the Company received a grant of \$681,322 from the US Department of Energy’s Advanced Research Projects Agency – Energy (“ARPA-E”), and grant of \$254,500 from Pasco County, Florida to assist us with progressing the NanoAir family of products. In addition, on January 23, 2013, ARPA-E announced that the Company was selected for negotiation of a supplemental award currently estimated as \$800,000, under the APRA-E/Naval Facilities Engineering Command Building Energy Efficiency Through Innovative Thermodynamics follow-on Funding Opportunity Announcement.

NanoClear™

Water Clean-up or “NanoClear”: We expect that this application would function to remove quantities of salt and other impurities from water to produce potable water using an environmentally friendly design that would use less energy and be less expensive than most other current methods. We have developed a series of functional demonstration units which highlight the basics of how this system works using the Company’s nano-structured materials to produce potable water from a number of types of contaminated water streams. The information accumulated from the demonstration units is being used as the basis for the product’s next planned inflexion point: the buildup of a 10m³ (approximately 26,500 gallons of clean water per day) pilot plant projected to be set up at a local County waste water treatment facility. The NanoClear product is currently in beta stage where it is to undergo further testing and scaling.

NanoCap™

Ultra-capacitor: Based on initial material tests conducted by two third parties, we believe that by applying a combination of our nano-materials we may be able to construct a device which stores energy similar to a battery with projected increases in energy density and lifetimes. We believe the key application for such a device would be in transportation. We have not invested significant resources to date in the development of this application.

The Company has identified other potential products for our materials and processes as well as accumulating basic data to support the needed functionality and market differentiation of these products based on using our nano-technology based inventions. Such applications may include immersion coatings and performance fabrics. These other products are based, in part, upon the known functionality of the Company’s materials and processes.

Patents

We own the rights to nine U.S. patents, one pending U.S. patent applications, and four Patent Cooperation Treaty (“PCT”) applications. National stage applications based on one of the PCT applications have been filed in the U.S., China, Hong Kong and Europe, national stage applications based on the second and third PCT application have been filed in the U.S. and China and a national stage application based on the fourth PCT application has been filed in the U.S and has been issued a notice of allowance. A divisional application based on one of the above national phase applications has been filed in China and Hong Kong. In addition, we co-own two PCT applications with Aegis Biosciences LLC, a biomaterials drug delivery technology company. National stage applications based on one of the co-owned PCT applications have been filed in the U.S., China, Hong Kong and Europe, and a National stage application based on the other co-owned PCT application has been filed in the U.S. These patents relate to, or are applications of, our nano-structured polymer materials that perform functions such as ion exchange and modification of surface properties. The polymers are selectively permeable to polar materials, such as water, in molecular form. Selective permeability allows these materials to function as a nano-filter in various transfer applications. These materials are made from base polymer resins available from a number of commercial firms worldwide and possess what we believe to be some unique and controllable properties, such as:

- **Selectivity:** Based on our research, we believe that when the polymer is made there are small channels created that are 5 to 30 nanometers in diameter. There are two types of these channels: hydrophilic (water permeable), and hydrophobic (water impermeable). The channels can be chemically tuned to be selective for the ions or molecules they transfer. The selectivity of the polymer can be adjusted to efficiently transfer water molecules from one face to the other using these channels.
- **High transfer rate:** Based on in-house testing protocols and related results, we have found that the channels created when casting the materials into a nano-structured membrane have a transfer rate of water, or flux, greater than 90% of an equivalent area of an open tube. This feature is fundamental to the material’s ability to transfer moisture at the molecular level while substantially allowing or disallowing the

transfer of certain other substances at a molecular level.

- Unique surface characteristic: The materials offer a surface characteristic that we believe inhibits the growth of bacteria, fungus and algae and prevents adhesives from attaching.

The molecular selectivity, transfer rate and surface coating properties, coupled with our ability to produce the nano-structured materials at what we believe is an affordable price, distinguishes our technology and value-added products. By incorporating our nano-structured materials into existing products, we strive to address current real-world market needs by offering what we believe to be higher efficiencies and improved price performance. For example, there are other energy recovery mechanisms available for HVAC that use coated paper or desiccant technology instead of our highly efficient nano-structured polymer materials.

Manufacturing

We do not have long term contractual relationships with any of our manufacturers or vendors. The only product or service which we could not have purchased elsewhere and used in the ConsERV™ business is the plastic based sheet good. In progress is a project aimed at lessening the Company's exposure in this sheet good area. Purchases to date of raw materials and related services have been on a purchase order basis using non-disclosure agreements. Our manufacturing process is described below.

Polymer Membrane

Commercially available polymer resin in flake form and industrial grade solvents are mixed together using a proprietary process involving heat, industrial mixers, and solvents. The resin and the solvents are commercially available from any number of chemical supply houses, or firms such as Dow and Kraton (formerly Shell Elastomers then part of Royal Dutch Shell). Our process changes the molecular properties of the starting polymer resins into a liquid material which we believe gives the attribute of being selective in what molecules it will allow through the plastic, which includes water molecules. This process, called 'sulfonation', is done at facilities around the world known as Toll Houses. These are firms which specialize in making small lot (by industry standards) runs of specialty chemicals.

Plastic Based Sheet Good

A thin coating of the liquid polymer material is applied on one side of the sheet good by a 'tape casting' firm of which there are many in the United States. The coated sheet good is heated in a process designed to bond the polymer solution and rolled sheet good together. The resulting 'modified sheet good' is then re-coiled into rolls and shipped to us. Currently one vendor provides the sheet good to us. We have not sought additional vendors for this component. However, we have identified other entities making similar types of products and believe such entities and products may provide alternatives should one be required. As noted above the Company is working on this project to lower its exposure.

The "Core"

The modified sheet good is cut into defined dimensions and glued to a PVC formed spacer. This 'spacer/glued modified sheet good' is a single layer. Multiple layers are stacked one on top the other until a certain height is achieved. Once the proper height is achieved, these layers are then fitted with a galvanized sheet metal plate on the top and bottom of the stack along with galvanized sheet metal 'Y' shaped bracket on each of the four corners of the assembly. This assembly is called a 'core'. The galvanized sheet metal is a world-wide commodity material formed to our specifications by local and out-of-town sheet metal forming companies. We have no long term contractual relationships with firms making the PVC spacers, supplying the glue, supplying rivets to hold the structure together, and the sheet metal firms making the top and bottom plate as well as the side rails.

Completion

For the complete ConsERV™ system, one or more cores are placed inside of aluminum or steel boxes built by a vendor, our licensees or us. The box may or may not also be fitted with an electric motor, fan, electric relay, and electrical disconnect. Inclusion or exclusion of the electric motor and fan is dictated by the customers' needs and current HVAC system. Once outfitted with cores, the energy recovery ventilator is complete. We have no long term contractual relationships with firms providing the aluminum or steel parts used to build the box, the motors, the fans, the relays, or

the electrical disconnects.

9

Licensing

In October of 2012, we entered into a License and Supply agreement with MGE Energy LLC (“MGE”) owned by a shareholder of the Company. Pursuant to the agreement, we granted MGE a license to use certain technology to manufacture, sell, lease and distribute certain products for use in energy recovery ventilators installed in commercial and residential buildings in North and South America. We are to receive a royalty based on MGE, and any sub-licensee’s sales. In addition, as part of the license agreement, MGE and any sublicensees are to purchase certain energy recovery ventilator products from us. While we have earned licensing revenue under agreements licensing our technology in the past, we may not receive material revenue from these agreements, including the one described above, in the near or foreseeable future.

Customers and Suppliers

We are dependent on third parties to manufacture the key components needed for our nano-structured based materials and value added products made with these materials. Accordingly, a supplier’s failure to supply components in a timely manner, or to supply components that meet our quality, quantity and cost requirements or our technical specifications, or the inability to obtain alternative sources of these components on a timely basis or on terms acceptable to us, would create delays in production of our products or increase our unit costs of production. Certain of the components contain proprietary products of our suppliers, or the processes used by our suppliers to manufacture these components are proprietary. If we are required to replace any of our suppliers, while we should be able to obtain comparable components from alternative suppliers at comparable costs, this would create a delay in production.

For each of the years ended December 31, 2012 and 2011, four customers accounted for approximately 60% (four customers represented the following percentages of sales 6%, 7%, 8%, and 39%) and 57% (four customers represented the following percentages of sales 18%, 15%, 12% and 12%) of the Company’s total revenue, respectively. These percentages may increase as a result of the License and Supply Agreement with MGE. At December 31, 2012 and 2011 amounts due from these customers was approximately 57% and 51% of total accounts receivable, respectively.

Research and Development

The Company has spent approximately \$521,100 and \$821,400 on research and development during the years ended December 31, 2012 and 2011, respectively. During the year ended December 31, 2012 and 2011, the Company received approximately \$67,200 and \$769,000, respectively, to offset the cost of research and development expenses as it relates to a project that is funded by grants from Pasco County and the Department of Energy, American Economic Investment and Recovery Act.

Key Relationships

We have strategic relationships with leaders in the energy industry who have entered into sales, marketing, distribution and product development arrangements with us and, in some cases, hold equity in our Company. They include:

Electric Power Research Institute (“EPRI”)

We have an on-going relationship with a number of utilities through EPRI. The EPRI participants include Public Service Company of New Mexico, Kansas City Power & Light, Reliant Energy Incorporated, Alliant Energy Company, Omaha Public Power District, Wisconsin Public Service Corporation, Southern California Gas Company, EDF Electricite de France, Consolidated Edison of New York, Tokyo Gas Co., Ltd., CINERGY Corporation, Northern States Power Company, American Electric Power Company, Inc., Sierra Pacific Power Company, Public Service Electric & Gas Company (“PSE&G”), and Tennessee Valley Authority. The EPRI users group has been helpful in creating opportunities for us to define specifications and applications for our nano-structured materials that address existing energy related challenges while possibly opening new sources of revenue.

ConsERV™ – Sales and Marketing Strategies

During 2012 we marketed our ConsERV™ product in North America principally through alliances with local independent manufacturer representatives. During that period we had approximately 39 independent commercial sales representatives in various locations throughout North America selling the ConsERV™ product. . In October of 2012, we entered into a License and Supply agreement with MGE Energy LLC (“MGE”). Pursuant to the agreement, we granted MGE a license to use certain technology to manufacture, sell, lease and distribute certain products for use in energy recovery ventilators installed in commercial and residential buildings in North and South America. As a result of this agreement, we expect both revenue and costs of goods sold will decrease in the first quarter of 2013. We are to receive a royalty on any sale by MGE and its sublicensees of product containing our technology in energy recovery ventilators. In addition, as part of the license agreement, MGE and any sublicensees are to purchase certain energy recovery ventilator components from us. In February 2013, MGE’s sublicensee commenced marketing, manufacturing and selling ConsERV™ in North and South America. We are currently supplying ConsERV™ cores to them in accordance with the License and Supply Agreement.

We also have secured and continue to discuss relationships with other leading industry HVAC manufacturers, HVAC product distributors, energy service companies and ERV manufacturers outside of North and South America. In addition we are discussing relationships for use of our ConsERV™ products in other applications outside of energy recovery ventilation world-wide. We continue to leverage our relationship with EPRI and a group of 16 utility companies (consisting of EPRI members and some of our minority shareholders) into expected sources of future product sales.

Future Products – Sales and Marketing Strategies

Our intended sales and marketing strategy will require us to create alliances with companies having strong, existing channel presence in the target industries. We intend to bring industry seasoned executive talent into the Company at the appropriate time to influence the product’s feature set, and to then to establish and grow the market development and revenue generation of the NanoAir, and NanoClear product. We believe working with OEM’s who are industry leaders during development allows us to better address the market’s needs and possibly accelerate the time to market cycle.

Competition and Barriers to Entry

We believe the efficacy of our value-added products and technology has the ability to decrease sales of competing products, thus taking business away from more established firms using older technology. We believe that our ConsERV™ product may become a functional component of newer, more efficient OEM products. A key challenge is to educate channel decision makers of the benefits of products made using our materials and processes to overcome the strength of the current product sales.

There are a number of companies located in the United States, Canada, Europe and Asia that have been developing and selling technologies and products in the energy recovery industry, including but not limited to: Semco, Greenheck, Venmar, Bry-Air, dPoint, Renewaire and AirXchange.

We will experience significant competition regarding our products because certain competing companies possess greater financial and personal resources than us. Future product competitors include, but are not limited to:

Products	Current and Future Competitors
ConsERV	Semco, Greenheck, Venmar, Bry-Air, dPoint, Renewaire and AirXchange.
NanoClear	Dow, Siemens, GE
NanoAir	AAON, Trane, Carrier, York, Haair, Mitsubishi, LG
Ultracapacitor	Maxwell, Ioxus, B&D

We believe that the combination of our nano-material platform's characteristics (high selectivity, high flux rate, manufacturability, et al.), growing patent position, are competitive advantages, which may allow us time to execute our business plan. The majority of our competitors may experience barriers to entry in these markets primarily related to the lack of similarly performing proprietary materials and processes.

Intellectual Property

As stated above, we have nine U.S. patents, including patents covering the composition and structure of a family of ion conducting polymers and membranes and certain applications of the polymer. We believe some of these patents make reference to applications relating to the materials we are developing. Please see the “Risk Factors” Section. A list of our existing patents follows:

1. Patent No. 6,841,601– Cross-linked polymer electrolyte membranes for heat and moisture exchange devices. This patent was issued on January 11, 2005 and expires on or about March 12, 2022.
2. Patent No. 6,413,298 – Water and ion-conducting membranes and uses thereof. This patent was issued on July 2, 2002 and expires on or about July 27, 2020.
3. Patent No. 6,383,391 – Water and ion-conducting membranes and uses thereof. This patent was issued on May 7, 2002 and expires on or about July 27, 2020.
4. Patent No. 6,110,616 – Ion-conducting membrane for fuel cell. This patent was issued on August 29, 2000 and expires on or about January 29, 2018.
5. Patent No. 5,679,482 – Fuel Cell incorporating novel ion-conducting membrane. This patent was issued on October 21, 1997 and expires on or about October 20, 2014.
6. Patent No. 5,468,574 – Fuel Cell incorporating novel ion-conducting membrane. This patent was issued on October 21, 1995 and expires on or about May 22, 2014.
7. Patent No. 7,179,860 – Cross-linked polymer electrolyte membranes for heat, ion and moisture exchange devices. This patent was issued on February 20, 2007 and expires on or about March 11, 2022.
8. Patent No. 7,990,679 – Nanoparticle Ultra Capacitor. This patent was issued on August 2, 2011 and expires on or about November 22, 2029.
9. U.S. Patent No. 8,222,346B2 -Novel Coblock Polymers and Method for Making Same. This patent was issued on July 17, 2012 and expires on or about September 28, 2027

We have provisional and patent applications in the following areas: Advanced Polymer Synthesis Processes, Anionic Exchange Electrolyte Polymers, Energy Storage Devices, Reversible Liquid to Air Enthalpy Core Applications and Construction, and Water Treatment and Desalination.

The following is a partial list of the patent applications publicly visible:

1. WO/2008/039779 – Enhanced HVAC System and Method
2. WO/2008/089484 – Multiphase selective Transport Through a Membrane
3. WO/2008/141179 – Molecule Sulphonation Process *
4. WO/2009/002984 – Stable and Compatible Polymer Blends*
5. WO2012/033827 A1- Fluid Treatment Systems and Methods of Using Selective Transfer Membranes
6. WO2011/085186 - Anionic Exchange Electrolyte Polymer Membranes
WO 2011/085917- Energy Storage Devices Including a solid Multilayer Electrolyte

* Patent applications jointly owned with Aegis Biosciences, LLC.

Patents may or may not be granted on these applications. As noted above, some of these applications are jointly owned with Aegis Biosciences, LLC. We also seek to protect our proprietary intellectual property, including intellectual property that may not be patented or patentable, in part by entering into confidentiality agreements with our current and prospective strategic partners and employees.

Government Regulation

We do not believe the sale, installation or use of our current nano-structured products will be subject to any government regulation, other than perhaps adherence to building codes, and water safety regulations. We do not believe that the cost of complying with such codes and regulations, to the extent applicable to our products, will be prohibitive.

We do not know the extent to which any existing or new regulations may affect our ability to distribute, install and service any of our products. Once our other products reach the commercialization stage and we begin distributing them to our target markets, federal, state or local governmental entities may seek to impose regulations.

We are also subject to various international, federal, state and local laws and regulations relating to, among other things, land use, safe working conditions, and environmental regulations regarding handling and disposal of hazardous and potentially hazardous substances and emissions of pollutants into the atmosphere. Our business may expose us to the risk of harmful substances escaping into the environment, resulting in potential personal injury or loss of life, damage to or destruction of property, and natural resource damage. Depending on the nature of any claim, our current insurance policies may not adequately reimburse us for costs incurred in settling environmental damage claims, and in some instances, we may not be reimbursed at all. To date, we are not aware of any claims or liabilities under these existing laws and regulations that would materially affect our results of operations or financial condition.

Employees

As of December 31, 2012, we employed 33 full-time employees and one part time employee in our Odessa, Florida facility. Of the 34 employees, we have 20 technicians, 1 product managers, a polymer chemist, a polymer engineer, 5 engineers, , a General Manager of Operations, 1 administrative assistant, 1 administrators, a Vice President of Sales, a Chief Financial Officer and a President and Chief Executive Officer. None of the employees are subject to a collective bargaining agreement. We consider our relations with our employees to be good.

Principal Offices

Our principal office is located at 11552 Prosperous Drive, Odessa, FL 33556.

ITEM 1A. RISK FACTORS

You should carefully consider the risks described below. Our business, financial condition, results of operations or cash flows could be materially adversely affected by any of the events or circumstances described in these risks. The valuation for the Company could also decline due to any of these events or circumstances, and you may lose all or part of your investment. This document also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of several factors, including the risks faced by us described below and elsewhere in this Annual Report. In assessing these risks, you should also refer to the other information contained in this Annual Report, including our financial statements and related notes.

Risks Related to Our Business

Our independent registered public accounting firm has issued an unqualified opinion with an explanatory paragraph to the effect that there is substantial doubt about our ability to continue as a going concern.

Our independent registered public accounting firm has issued an unqualified opinion with an explanatory paragraph to the effect that there is substantial doubt about our ability to continue as a going concern. This unqualified opinion with an explanatory paragraph could have a material adverse effect on our business, financial condition, results of operations and cash flows. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources” and Footnotes to our financial statements for the fiscal year ended December 31, 2012, included elsewhere in this filing.

We have no committed sources of capital and do not know whether additional financing will be available when needed on terms that are acceptable, if at all. This going concern statement from our independent registered public accounting firm may discourage some investors from purchasing our stock or providing alternative capital financing. The failure to satisfy our capital requirements will adversely affect our business, financial condition, results of operations and prospects.

Unless we raise additional funds, either through the sale of our securities or one or more collaborative arrangements, we will not have sufficient funds to continue operations. Even if we take these actions, they may be insufficient, particularly if our costs are higher than projected or unforeseen expenses arise.

We have a history of operating losses, and we expect our operating losses to continue for the foreseeable future. If we fail to obtain financing we will be unable to execute our business plan and/or we may not be able to continue as a going concern.

We have incurred substantial losses since we were funded in 1993 and have achieved profitability in only one year to date. We have developed a family of nano-structured polymers and processes and are marketing our first product application, ConsERV™. In October of 2012, we entered into a License and Supply agreement with MGE Energy LLC (“MGE”). Pursuant to the agreement, we granted MGE a license to use certain technology to manufacture, sell, lease and distribute certain products for use in energy recovery ventilators installed in commercial and residential buildings in North and South America. We are to receive a royalty on any sale by MGE and its sub-licensees of product containing our technology in energy recovery ventilators (“ConsERV™ Products”). In addition, as part of the license agreement, MGE and any sublicensees are to purchase ConsERV™ Products from us. In January 2013, MGE’s sub-licensee commenced marketing, manufacturing and selling products under the license. We are currently supplying ConsERV™ cores to this sublicensee in accordance with the License and Supply Agreement. We also have sales relationships with entities outside of North and South America for use our ConsERV™ products in energy recovery ventilators in commercial and residential buildings and are actively discussing similar relationships with additional entities. In addition, we are discussing relationships for use of our ConsERV™ products in other applications outside of energy recovery ventilation. However, prior to October of 2012, the majority of our efforts were centered on the North American market and therefore revenues from sales outside of North America have not been material. Thus, we anticipate, least the near future, to be dependent on sales to and royalty payments from the above licensee for the majority for our revenues. The other listed applications in this document may take at least 12 to 36 months to develop. Thus, we expect our operating losses to continue for the foreseeable future as we continue to expend substantial resources to expand the ConsERV™ business while working to bring the other identified applications to the market including research and development, design and testing, obtaining third party validations, identifying and securing collaborative partnerships, executing to enter into strategic relationships, or selling materials or value-added components. Furthermore, even if we were to sell a greater number of ConsERV™ products in 2013, we anticipate that we will continue to incur losses until we can cost-effectively produce and sell our products to a wider market. Our accumulated deficit was \$37,951,827 as of December 31, 2012. It is possible that we will never generate sufficient revenue to sustain profitability. Even if we have achieved profitability in 2012, we may not be able to sustain or increase profitability in 2013 or any future years.

We financed our operations since inception primarily through private sales of our common stock and preferred stock, issuance of convertible promissory notes; issuance of unsecured promissory notes, cash received in connection with exercise of warrants, license fees and the sale of certain fuel cell assets in 2002. As of December 31, 2012, we had \$1,145,380 in current assets.

Even if we are successful in raising additional equity capital to fund our operations, we will still be required to raise an additional substantial amount of capital in the future to fund our development initiatives and to achieve profitability. Our ability to fund our future operating requirements will depend on many factors, including the

following:

- ability to obtain funding from third parties;
- progress on research and development programs;
- time and cost required to gain third party approvals;
- cost of manufacturing, marketing and distributing our products;
- cost of filing, prosecuting and enforcing patents, patent applications, patent claims and trademarks;
- status of competing products; and
- market acceptance and third-party reimbursement of our products, if successfully developed.

There are no assurances that future funding will be available on favorable terms or at all. If additional funding is not obtained, we will need to reduce, defer or cancel development programs and planned initiatives, to the extent necessary. The failure to fund our capital requirements would have a material adverse effect on our business, financial condition and results of operations.

Failure to achieve and maintain effective internal controls in accordance with Section 404 of the Sarbanes-Oxley Act of 2002 could have a material adverse effect on our business and operating results. In addition, current and potential stockholders could lose confidence in our financial reporting, which could have a material adverse effect on our stock price.

Effective internal controls are necessary for us to provide reliable financial reports and effectively prevent fraud. If we cannot provide reliable financial reports or prevent fraud, our operating results could be harmed. We are required to document and test our internal control procedures in order to satisfy the requirements of Section 404 of the Sarbanes-Oxley Act, which requires annual management assessments of the effectiveness of our internal controls over financial reporting. During the course of our testing, we may identify deficiencies which we may not be able to remediate in time for compliance with the requirements of Section 404. In addition, if we fail to maintain the adequacy of our internal controls, as such standards are modified, supplemented or amended from time to time; we may not be able to ensure that we can conclude on an ongoing basis that we have effective internal controls over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act. Failure to achieve and maintain an effective internal control environment could also cause investors to lose confidence in our reported financial information, which could have a material adverse effect on our stock price.

We cannot provide assurance as to the result of these efforts. We cannot be certain that any measures we take will ensure that we implement and maintain adequate internal controls in the future. Any failure to implement required new or improved controls, or difficulties encountered in their implementation, could harm our operating results or cause us to fail to meet our reporting obligations.

In the event the lease on our corporate office and production space is terminated, we may not be able to acquire a lease on another suitable property, or a lease on a suitable property at a comparable cost.

Ethos Business Ventures, LLC is our landlord. Our CEO, Mr. Tangredi, is a principal owner of this entity. We note that under the terms of our lease agreement for our corporate office and production space, the lease may be terminated upon 30 days prior written notice by landlord and 90 days prior written notice by us. If this lease is terminated, or if for any reason Mr. Tangredi should become unable to continue to lease this space to us, we may not be able to acquire another lease for another suitable property or a lease on a suitable property at a comparable cost in a timely manner, which could materially disrupt our operations. Even if we are able to relocate into another suitable property at a comparable cost in a timely manner, we would incur significant moving expenses.

Any future indebtedness could adversely affect our financial health.

In the past we incurred a significant amount of indebtedness to finance our operations and growth. This debt has been satisfied. However, in the future, we may need to incur debt to finance our operations and growth and any such indebtedness could result in negative consequences to us, including:

- increasing our vulnerability to general adverse economic and industry conditions;
- requiring a portion of our cash flow from operations be used for the payment of interest on any debt we may incur, thereby reducing our ability to use our cash flow to fund working capital, capital expenditures and general corporate requirements;
- limiting our ability to obtain additional financing to fund future working capital, capital expenditures and general corporate requirements;
- limiting our flexibility in planning for, or reacting to, changes in our business;
- placing us at a competitive disadvantage to competitors who have less indebtedness;
- and
-

if our assets are pledged under any such debt, the failure to meet the terms and conditions of any such debt instruments, could result in us having no access to our technology.

The economic downturn has affected, and is likely to continue to adversely affect, our operations and financial condition potentially impacting our ability to continue as a going concern.

The economic downturn has resulted in a reduction in new construction and less than favorable credit markets, both of which may adversely affect us. Certain vendors from which we currently secure parts for our ConsERV™ products have and may continue to either reduce or eliminate payment terms. Hence, more capital is required to secure parts necessary to produce our products. In addition, our products are often incorporated in new construction which has experienced a marked down turn in project starts over the past year and such trend may continue in 2013. Although the portion of new construction most affected is home sales, which represents a minority of our sales, commercial construction has also experienced a reduction in starts with some projects being delayed and possibly eliminated. If the commercial construction market stagnates or decreases in volume or project size, our operations and financial condition could be negatively impacted. Various economic stimulus measures by the federal and state governments appear to have targeted energy products. ConsERV™ may qualify under said programs and we may potentially benefit. However, when and if we will experience any increase in sales or investment due to these programs is uncertain. As noted above, we intend to continue to finance operations, primarily through license and supply agreements and private sales of debt and equity securities. In light of the recent economic downturn we may not be able to secure additional financing on acceptable terms, if at all. Unfavorable terms for a financing transaction would adversely impact our business, financial condition and/or results of operations. In the event we are unable to secure additional financing our business may fail.

We are dependent on a few customers and if these customers do not purchase our products, we will not generate a profit.

We are dependent on third parties to manufacture the key components needed for our nano-structured based materials and value added products made with these materials. Accordingly, a supplier's failure to supply components in a timely manner, or to supply components that meet our quality, quantity and cost requirements or our technical specifications, or the inability to obtain alternative sources of these components on a timely basis or on terms acceptable to us, would create delays in production of our products or increase our unit costs of production. Certain of the components contain proprietary products of our suppliers, or the processes used by our suppliers to manufacture these components are proprietary. If we are required to replace any of our suppliers, while we should be able to obtain comparable components from alternative suppliers at comparable costs, this would create a delay in production.

If we fail to successfully address the challenges, risks and uncertainties associated with operating as a public company, our business, results of operations and financial condition would be materially harmed.

We have and will continue to incur a significant increase in costs as a result of operating as a public company, and our management has and will be required to devote substantial time to new compliance initiatives. Until November of 2008 we had never operated as a public company. In preparation for and since reporting as a public company, we have and expect to continue to incur significant legal, accounting and other expenses that we did not incur as a non-reporting company. In addition, the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act"), as well as new rules subsequently implemented by the Securities and Exchange Commission (the "SEC") and various stock exchanges, has imposed many new requirements on public companies, including requiring changes in corporate governance practices. Our management and other personnel have and will continue to devote a substantial amount of time to these new compliance procedures.

As a public company, we are now subject to the reporting requirements of the Securities and Exchange Act of 1934, as amended (the "Exchange Act"), the Sarbanes-Oxley Act and the rules promulgated by the SEC and AMEX, if and when accepted, in response to the Sarbanes-Oxley Act. The Exchange Act requires, among other things, that we file annual, quarterly and current reports with respect to our business and financial condition. The Sarbanes-Oxley Act

requires, among other things, that we maintain effective disclosure controls and procedures and internal controls for financial reporting.

If we or our independent registered public accounting firm identifies deficiencies in our internal controls that are deemed to be material weaknesses, the market price of our stock could decline and we could be subject to sanctions or investigations by SEC or other regulatory authorities, which would entail expenditure of additional financial and management resources.

These rules and regulations could also make it more difficult for us to attract and retain qualified independent members of our Board of Directors. Additionally, we have found these rules and regulations make it more difficult and more expensive for us to obtain director and officer liability insurance. We have, and may be required once again, to accept reduced policy limits and/or coverage or incur substantially higher costs to obtain the same or similar coverage.

Our ConsERV™ products are in small volume production, we have no long term experience manufacturing our products on a commercial basis and may not be able to achieve cost effective large volume production.

Our ability to expand commercial production of our ConsERV™ products is subject to significant uncertainties, including: completion of necessary product automation, developing experience in manufacturing and assembly on a large commercial scale; assuring the availability of raw materials and key component parts from third party suppliers; and developing effective means of marketing and selling our product. We are assembling our ConsERV™ products at our facility in Odessa, Florida. Initial production costs of these products are high with no or a lower than desired profit margin. As a result, we believe we will need to reduce unit production costs, including the nano-structured materials themselves made to our specifications by third parties, over time in order to offer our products at a profitable basis on a commercial scale. Our ability to achieve cost reductions in all areas of nano-structured materials and value added products depends on entering into suitable manufacturing relationships with component suppliers, as well as increasing sales volumes so that we can achieve economies of scale. A failure to achieve a lower cost structure through economies of scale and improvements in engineering and manufacturing in a timely manner would have a material adverse effect on our business and financial results. There can be no assurance that we will obtain higher production levels or that the anticipated sales prices of our products will ever allow an adequate profit margin.

We may not be able to meet our product development and commercialization milestones.

We have established internal product and commercialization milestones and dates for achieving development goals related to technology and design improvements of our products. To achieve these milestones we must complete substantial additional research, development and testing of our products and technologies. Except for our ConsERV™ product, we anticipate that it will take at least 12 to 36 months to develop and ready our other products for scaled production. Product development and testing are subject to unanticipated and significant delays, expenses and technical or other problems. We cannot guarantee that we will successfully achieve our milestones. Our business strategy depends on acceptance of our products by key market participants and end-users.

Our plans and ability to achieve profitability depend on acceptance by key market participants, such as vendors and marketing partners, and potential end-users of our products. We continue to educate designers and manufacturers, including those of HVAC equipment, with respect to our ConsERV™ product. More generally, the commercialization of our products may also be adversely affected by many factors that are out of our control, including:

- willingness of market participants to try a new product and the perceptions of these market participants of the safety, reliability and functionality of our products;
- emergence of newer, possibly more effective technologies;
- future cost and availability of the raw materials and components needed to manufacture and use our products;
- cost competitiveness of our products; and
- adoption of new regulatory or industry standards which may adversely affect the use or cost of our products;
- ability of our licensees to market and sell sufficient quantities of our ConsERV™ product in their respective territories

Accordingly, we cannot predict with any certainty that there will be acceptance of our products on a scale sufficient to support development of mass markets for those products.

Our Expansion into New Products, Services, Technologies and Geographic Regions Subjects Us to Additional Business, Legal, Financial and Competitive Risks

We may have limited or no experience in our newer market segments. These offerings may present new and difficult technology challenges, and we may be subject to claims if customers of these offerings experience disruptions or failures or other quality issues. In addition, profitability, if any, in our newer activities may not exist or be lower than in our other activities, and we may not be successful enough in these newer activities to recoup our investments in them. If any of this were to occur, it could damage our reputation, limit or curtail our growth and negatively affect our operating results.

We are dependent on third party suppliers and vendors for the supply of key components for our products.

We are dependent on third parties to manufacture the key components needed for our nano-structured based materials and value added products made with these materials. Accordingly, a supplier's failure to supply components in a timely manner, or to supply components that meet our quality, quantity and cost requirements, technical specifications, or the inability to obtain alternative sources of these components on a timely basis or on terms acceptable to us, would create delays in production of our products or increase unit costs of production. Certain of the components contain proprietary products of our suppliers, or the processes used by our suppliers to manufacture these components are proprietary. If we are required to replace any of our suppliers, while we should be able to obtain comparable components from alternative suppliers at comparable costs, this would create a delay in production. If we experience such delays or our third party suppliers and vendors fail to supply us with components that meet our quality, quantity, or cost standards, we may lose our customers or be subject to product liability claims. Our applications require extensive commercial testing and will take long periods of time to commercialize.

Our nano-structured materials and associated applications need to undergo extensive testing before becoming commercial products. Consequently, the commercialization of our products could be delayed significantly or rendered impractical. Moreover, much of the commercial process testing will be dependent on the efforts of others. Any failure in a manufacturing step or an assembly process may render a given application or our nano-structured materials unsuitable or impractical for commercialization. Testing and required development of the manufacturing process will require the expenditure of funds and take time and effort.

We have not devoted any significant resources towards the marketing and sale of our products, we expect to face intense competition in the markets in which we do business, and we have and expect to continue to rely, to a significant extent, on the marketing and sales efforts of third parties that we do not control.

To date, we primarily focused on the sale of ConsERV™ products and, while we have sold increasing quantities of our products on a yearly basis, even after adding staff experienced in the industry we continue to experience a learning curve in the marketing and sale of products on a commercial basis. We expect that the marketing and sale of the ConsERV product will continue to be conducted by a combination of independent manufactures representatives, licensees, third-party strategic partners, distributors, or OEMs. Consequently, commercial success of our products will depend to a great extent on the efforts of others. We have and intend to continue to enter into additional strategic marketing and distribution agreements or other collaborative relationships to market and sell our nano-structured materials and value added products. However, we may not have identified or established appropriate relationships or be able to identify or establish appropriate relationships in the future. To the extent we have or will in the future enter into these types of relationships, we cannot assure you that the distributors, licensees or OEMs with which we have or will form relationships will focus adequate resources on selling our products or will be successful in selling them. In addition, our chosen third-party distributors, licensees or OEMs have or may require us to provide volume price discounts and other allowances, customize our products or provide other concessions which could reduce the potential profitability of these relationships. To the extent any strategic relationships that we have or may establish in the future

are exclusive, we may not be able to enter into other arrangements at a time when the distributor, licensee or OEM with which we have or will form a relationship is not successful in selling our products or has reduced its commitment to marketing our products. Failure to develop sufficient distribution and marketing relationships in our target markets will adversely affect our commercialization schedule and, to the extent we have entered or enter into such relationships, the failure of our distributors, licensees and other third parties to assist us with the marketing and distribution of our products or to meet their monetary obligations to us may adversely affect our financial condition and results of operations.

We will face intense competition in the markets of our product applications for our nano-structured materials and value-added products. We will compete directly with currently available products, some of which may be less expensive. The companies that make these other products may have established sales relationships and more name-brand recognition in the market than we do. In addition, some of those companies may have significantly greater financial, marketing, manufacturing and other resources.

Our future results could be harmed by economic, political, regulatory and other risks associated with international sales and operations.

We have begun and intend to continue marketing, distributing and servicing our products on an international basis and expect to derive a significant portion of our revenue in coming years from international sales. If we fail to successfully sell our products internationally, our ability to increase our future revenue and grow our business would be impaired. We have limited experience developing, and no experience manufacturing, our products to comply with the commercial, regulatory and legal requirements of international markets. Our success in those markets will depend on our ability to secure relationships with foreign resellers, establish and operate subsidiaries, or secure joint venture agreements and our ability to manufacture products that meet foreign regulatory and commercial requirements. We anticipate that it will be costly to establish, develop and maintain any international operations should they be required. Any international operations may not be profitable at a given time or from time to time. In addition, our planned international operations could be harmed by a variety of factors, including but not limited to:

- increased costs associated with maintaining international marketing efforts;
- compliance with potential United States Department of Commerce export controls;
- increases in duty rates or other adverse changes in tax laws;
- trade protection measures and import or export licensing requirements;
- fluctuations in currency exchange rates;
- political and economic conditions including but not limited to, any instability in foreign countries;
- difficulties in securing and enforcing intellectual property rights, foreign (where filed and obtained) or domestic, and time and complexities of vetting and establishing relations with foreign resellers or licensees including, but not limited to, designing, validating and marketing a product geared specifically to a particular market segment;
- government regulation, other restrictive governmental actions (such as trade protection measures, including export duties and quotas and custom duties and tariffs), nationalization and restrictions on foreign ownership;
- restrictions on sales or distribution of certain products or services and uncertainty regarding liability for products and services, including uncertainty as a result of less friendly legal systems, local laws, lack of legal precedent, and varying rules, regulations, and practices regarding the products and enforcement of intellectual property rights;
- business licensing or certification requirements;
- limitations on the repatriation and investment of funds and foreign currency exchange restrictions and fluctuation;
- limited fulfillment and infrastructure;
- shorter payable and longer receivable cycles and the resultant negative impact on cash flow;
- laws and regulations regarding restrictions on pricing or discounts;
- lower levels of use of the products;
- difficulty in staffing, developing and managing foreign operations as a result of distance, language and cultural differences;
- different employee/employer relationships and the existence of workers' councils and labor unions;
- laws and policies of the U.S. and other jurisdictions affecting trade, foreign investment, loans and taxes; and
- geopolitical events, including war and terrorism

- Local companies may have a substantial competitive advantage because of their greater understanding of, and focus on, the local customer, as well as their more established local brand names. We may not be able to hire, train, retain, and manage required personnel, which may limit our international growth.

We depend on our intellectual property and failure to protect it could enable competitors to market products with similar features that may reduce demand for our products.

We currently have nine United States patents, twelve patent applications and co-own five patent applications, some of which apply to the composition and structure of a family of ion conducting polymers and membranes. These patents and patent applications often make reference to applications for, and in some instances, are application patents relating to materials we are developing. Our patent applications may or may not mature into issued patents.

Our success depends, to a significant extent, on the technology that is incorporated in our product. Although some of the inventions which we have obtained or applied for patent protection are no longer suitable for use with our planned products, we believe that some of the other inventions covered by the patents and patent applications are important to the success of our products. If we are unable to protect our intellectual property, competitors could use our intellectual property to market products similar to our products, which could reduce demand for our products. We may be unable to prevent unauthorized parties from attempting to copy or otherwise obtain and use our products or technology. Policing unauthorized use of our technology is difficult, and we may not be able to prevent misappropriation of our technology, particularly in foreign countries where the laws may not protect our intellectual property as fully as those in the United States. Others may circumvent trade secrets, trademarks and copyrights that we own or may own. Any such infringements, or any alleged infringements, could have a material adverse effect on our business, results of operations, and financial condition.

Any of the United States patents or foreign patents owned by us or subsequently issued to us may be invalidated, circumvented, challenged or rendered unenforceable. We may not be issued any patents as a result of our pending and future patent applications and any patents we are issued may not have the claim coverage sought by us or necessary to prevent others from introducing similar products. Any litigation surrounding our patent rights could force us to divert significant financial and other important resources away from our business operations.

Some of our intellectual property is not covered by any patent or patent application. We seek to protect this proprietary intellectual property, which includes intellectual property that may not be patented or patentable, in part by confidentiality agreements with our distributors and employees. These agreements afford only limited protection and may not provide us with adequate remedies for any breach or prevent other persons or institutions from asserting rights to intellectual property arising out of these relationships. In addition, we cannot assure you that these agreements will not be breached, that we will have adequate remedies for any such breach or that the parties to such agreements will not assert rights to intellectual property arising out of these relationships.

Members of any scientific advisory board we had in the past or may have in the future have been or may be employed by entities other than us, some of which may compete with us. While we intend to enter into non-competition agreements with our scientific advisors, if any of them were to consult with or become employed by any of our competitors, our business could be negatively affected.

We have entered into agreements with various third parties that may affect our intellectual property rights.

We have entered into agreements with various third parties in connection with the development of various applications for our technology. In some instances such agreements provide that a third party will own any resulting intellectual property rights and for the grant of a license to us relating to those rights. We cannot assure you that the terms of any such licenses will not limit our ability to apply such rights to specific applications in competition with the relevant third party, which may adversely affect our business.

Our products employ technology that may unknowingly infringe on the proprietary rights of others, and, as a result, we could become liable for significant damages and suffer other harm.

We cannot assure you that our technologies and products do not or will not infringe on the proprietary rights of third parties or that third parties will not assert infringement claims against us in the future. We are aware of some patents in the nano-materials field held by potential competitors and other third parties. We cannot assure you that a third party will not claim infringement by us with respect to these patents, other patents or proprietary rights, or that we would prevail in any such proceeding. Any such infringement claim, whether meritorious or not, could:

- be time-consuming;
- result in costly litigation or arbitration and the diversion of technical and management personnel, as well as the diversion of financial resources from business operations;
- require us to develop non-infringing technology or seek to enter into royalty or licensing agreements; or
- require us to cease use of any infringing technology.

We may not be successful in developing non-infringing technologies. Royalty or licensing agreements, if required, may not be available on terms acceptable to us, or at all, and could significantly harm our business and operating results. A successful claim of infringement arising from the existence of a ‘submarine patent’ or another existing patent against us or our failure or inability to license the infringed or similar technology could require us to pay substantial damages and could harm our business. In addition, to the extent we agree to indemnify customers or other third parties against infringement of the intellectual property rights of others, a claim of infringement could disrupt or terminate their ability to use, market or sell our products and we may be liable for the related losses that may incur which could adversely affect our results financial condition and prevent us from growing or continuing the business.

We may not be able to control our warranty exposure, which could increase our expenses.

We currently offer and expect to continue to offer a warranty with respect to certain ConsERV™ product and we anticipate offering a warranty with each of our future product applications. If the cost of warranty claims exceeds any reserves we may establish for such claims, our results of operations and financial condition could be adversely affected.

We may be exposed to lawsuits and other claims if our products malfunction, which could increase our expenses, harm our reputation and prevent us from growing our business.

Any liability for damages resulting from malfunctions of our products could be substantial, increase our expenses and prevent us from growing or continuing our business. Potential customers may rely on our products for critical needs, such as backup power. A malfunction of our products could result in warranty claims or other product liability. In addition, a well-publicized actual or perceived problem could adversely affect the market’s perception of our products. This could result in a decline in demand for our products, which would reduce revenue and harm our business. Further, since our products are used in devices that are manufactured by other manufacturers, we may be subject to product liability claims even if our products do not malfunction.

Our key employees are critical to our success and the loss of any key employees could impair our ability to execute our strategy and grow our business.

Our future success depends, to a significant extent, on the continued service of our executive officers and other key technical, sales and management personnel and their ability to execute our growth strategy. All of our personnel have

non-compete agreements with us however such agreements may not withstand court review if litigation were to occur. The loss of the services of certain management or other key employees could harm our business. Our future performance will depend, in part, on our ability to retain key management personnel and for our executive officers to work together effectively. Our executive officers may not be successful in carrying out their duties or running our business. Any dissent among executive officers could impair our ability to make strategic decisions.

We have, when required, reduced the salaries of our employees. Such salary reductions may have an adverse effect on our ability to retain key employees.

If we fail to attract, retain and motivate qualified employees, we may be unable to execute our business strategy.

Our future success will depend in part on our ability to attract and retain highly qualified individuals, including researchers, engineers, sales and marketing personnel and management. Competition for these individuals may become intense, and it may become increasingly difficult to attract, assimilate and retain these highly qualified persons. Competitors and others may attempt to recruit our employees. Should we experience attrition or need to augment our staff, the cost of securing personnel may be significantly higher than currently experienced and thus negatively impact our financial position.

Our failure to manage our growth could harm our business.

We may grow in the number of our employees, the size of our physical facilities and the scope of our operations. In addition, we intend to focus greater resource on ConsERV™ margins, channel expansion, and marketplace education. Any expansion would likely place a significant strain on our senior management team and other internal and external resources. Furthermore, we may be required to hire additional senior management personnel. Our ability to manage growth will depend in part on our ability to continue to enhance our operating, financial and management information systems. Our personnel, systems and controls may be unable to support any growth we may experience and as a result, our financial results would suffer.

Any acquisitions we make could disrupt our business and harm our financial condition.

As part of our growth strategy we may review opportunities to acquire other businesses or technologies that would complement our products, expand the breadth of our target markets or enhance our technical capabilities. Acquisitions entail a number of risks that could materially and adversely affect our business and operating results, including but not limited to:

- problems integrating the acquired operations, technologies or products with our existing businesses and products;
- constraints arising from increased expenses and working capital requirements;
- constraints on our ability to incur debt;
- dilution of our stock if we issue additional securities;
- disruption of our ongoing business, diversion of capital and distraction of our management;
- difficulties in retaining business relationships with suppliers and customers of acquired companies;
- difficulties in coordinating and integrating overall business strategies, sales, marketing, research and development efforts;
- potential liabilities in businesses and facilities acquired;
- difficulties in maintaining corporate cultures, controls, procedures and policies;
- difficulties evaluating risks associated with entering markets in which we lack prior experience; and
- potential loss of key employees.

Our revenue and operating results may fluctuate significantly as a result of factors outside of our control, which could cause the value of our business to decline.

Unless and until we establish a predictable sales record for our products, we expect our revenue and operating results to vary significantly from quarter to quarter. As a result, quarterly comparisons of our financial results are not necessarily meaningful and you should not rely on them as an indication, in any manner, of our future performance. In addition, due to our stage of development, we cannot predict our future revenue or results of operations accurately. As a consequence, our operating results may fall below the expectations of investors, which could cause the valuation of our company to decline.

We expect to make significant investments in all areas of our business, particularly in research and product development and in expanding in-house or outsourced manufacturing capability. Because the investments associated with these activities are relatively fixed in the short-term, we may be unable to adjust our spending quickly enough to offset any unexpected shortfall in our revenue growth. In addition, because we are in the early stages of commercializing the ConsERV™ application and anticipate that it will take at least an additional 12 to 36 months to develop our other products for commercial sales, we expect our order flow to be uneven from period to period.

Risks Related to Our Industry

If our products fail to meet certain technical standards, we could be subject to claims, fines or other penalties and we may be curtailed from conducting our business operations.

Our nano-structured membrane products are designed for specific applications with specific technical objectives and standards. If these membranes, or the hardware device(s) used to make the membranes work, fail to meet those technical objectives and/or standards, we could be liable for potential personal injury, loss of life and damages (including consequential damages). Depending on the nature of the claim, our current insurance policies may not adequately reimburse us for costs incurred by reason of said claims, including, but not limited to, environmental damage claims, and in certain instances, we may not be reimbursed at all. Our business may be or become subject to numerous federal, state and local laws, regulations and policies that govern environmental protection. These laws and regulations have changed frequently in the past and may continue to do so in the future. Our operations may not comply with such changes and we may be required to make significant unanticipated capital and operating expenditures to comply with such changes. If we fail to comply with any such applicable environmental laws and regulations, governmental authorities may seek to impose fines or other penalties on us or to revoke or deny the issuance or renewal of certain permits issued to us. Accordingly, we might be subject to damage claims or penalties, and we may be curtailed from conducting our business operations.

We could become liable for environmental damages resulting from our research, development and manufacturing operations.

Our business may expose us to the potential risk of harmful substances escaping into the environment, resulting in potential personal injury or loss of life, damage to or destruction of property, and natural resource damage. Depending on the nature of the claim, our current insurance policies may not adequately reimburse us for costs incurred in settling environmental damage claims, and in certain instances, we may not be reimbursed at all.

Future government regulation may impair our ability to market and sell our products.

Our current and planned products are potentially subject to federal, state, local and foreign laws and regulations governing, among other things, emissions to air as well as laws relating to occupational health and safety. As these products are introduced commercially, it is possible that governmental authorities will adopt new regulations that will

limit or curtail our ability to market and sell such products. We may also incur substantial costs or liabilities in complying with such new governmental regulations. Our potential customers and distributors, some of which operate in highly regulated industries, may also be required to comply with new laws and regulations applicable to products such as ours, which could adversely affect their interest in our products.

Alternatives to our technology could render our systems obsolete prior to commercialization.

Our nano-structured materials and their identified uses are one of a number of products being developed today as potential answers to perceived market needs such as additional water sources, energy and emissions savings with regard to HVAC operation, alternative energy storage and “clean” power sources. Improvements are also being made to existing products. Technological advances in all fields and improvements in key targeted application areas with existing or different new technology may render our nano-structured material approach obsolete before or during commercialization.

Risks Related to an Investment in Our Securities

Our common stock has traded only sporadically and is expected to experience significant price and volume volatility in the future which substantially increases the risk of loss to persons owning our common stock.

We cannot predict the extent to which an active public market for our common stock will develop or be sustained.

Our common stock has been quoted on OTC Market Group Inc.'s OTC Pink Market since November 15, 2005 and the Over the Counter Bulletin Board since November 24, 2008. The market price of our common stock has been and will likely continue to be subject to fluctuations. In addition, the stock market in general and the market for technology companies in particular, have from time to time experienced significant price and volume fluctuations that have been often unrelated or disproportionate to the operating performance of such companies. These broad market and industry factors may cause our common stock to materially decline, regardless of our operating performance. Because of the limited trading market for our common stock, meaning that the number of persons interested in purchasing our common shares at or near bid prices at any given time may be relatively small or non-existent, and the possible price volatility given our status as a relatively small company with a small and thinly traded “float”, you may not be able to sell your shares of common stock when you desire to do so. The inability to sell your shares in a rapidly declining market may substantially increase your risk of loss because of such illiquidity and because the price for our common stock may suffer greater declines because of its price volatility.

Volatility in our common share price may subject us to securities litigation.

The market for our common stock is characterized by significant price volatility, and we expect that our share price will continue to be volatile for the indefinite future. In the past, following periods of volatility in the stock market and the market price of a particular company’s securities, securities litigation has often been instituted against that company. Litigation of this type could result in substantial legal fees and other costs, potential liabilities and a diversion of management’s attention and resources.

We have not and do not intend to pay dividends on our common stock.

The payment of dividends upon our capital stock is solely within the discretion of our board of directors and dependent upon our financial condition, results of operations, capital requirements, restrictions contained in our future financing instruments and any other factors our board of directors may deem relevant. We have never declared or paid a dividend on our common stock and, because we have very limited resources, we do not anticipate declaring or paying any dividends on our common stock in the foreseeable future. Rather, we intend to retain any future earnings for the continued operation and expansion of our business. It is unlikely, therefore, that the holders of our common stock will have an opportunity to profit from anything other than potential appreciation in the value of our common shares held by them.

Our executive officers and directors have significant shareholdings, which may lead to conflicts with other shareholders over corporate governance matters.

As of March 29, 2013, our directors and officers, as a group, beneficially own approximately 21.6% of our outstanding common stock, including shares of common stock issuable upon exercise of warrants and options they hold. Acting together, these shareholders would be able to significantly influence all matters that our shareholders vote upon, including the election of directors, mergers or other business combinations.

Unless an active trading market develops for our securities, shareholders may have difficulty or be unable to sell their shares of common stock.

We cannot predict the extent to which an active public market for our common stock will develop or be sustained.

Our common stock is currently quoted on the OTC Bulletin Board under the symbol "DLYT." However, currently there is not an active trading market for our common stock, meaning that the number of persons interested in purchasing shares of our common stock at or near ask prices at any given time may be relatively small or non-existent, and there can be no assurance that an active trading market may ever develop or, if developed, that it will be maintained. There are a number of factors that contribute to this situation, including, without limitation, the fact that we are a small development-stage company that is relatively unknown to stock analysts, stock brokers, institutional investors and others in the investment community that generate or influence sales volume, and even if we came to the attention of such persons, they tend to be risk-averse and would be reluctant to follow an unproven, development-stage company such as ours or purchase or recommend the purchase of shares of our common stock until such time we become more seasoned and viable.

As a consequence, our stock may be characterized by a lack of liquidity, sporadic trading, larger spreads between bid and ask quotations, and other conditions that may affect shareholders' ability to re-sell our securities. Moreover, there may be periods of several days or more when trading activity in our shares is minimal or non-existent, as compared to a seasoned issuer which has a large and steady volume of trading activity that will generally support continuous sales without an adverse effect on share price. Unless an active trading market for our common stock is developed and maintained, shareholders may be unable to sell their common stock and any attempted sale of such shares may have the effect of lowering the market price of our common stock and a shareholder's investment could be a partial or complete loss.

Since our common stock is thinly traded, it is more susceptible to extreme rises or declines in price and shareholders may not be able to sell their shares at or above the price paid.

Since our common stock is thinly traded, its trading price is likely to be highly volatile and could be subject to extreme fluctuations in response to various factors, many of which are beyond our control, including:

- the trading volume of our shares whether large or small;
- the number of securities analysts, market-makers and brokers following our common stock;
- new products or services introduced or announced by us or our competitors;
- actual or anticipated variations in quarterly operating results;
- conditions or trends in our business industries;
- announcements by us of significant contracts, acquisitions, strategic partnerships, joint ventures or capital commitments;
- additions or departures of key personnel;
- sales of our common stock;

- general stock market price and volume fluctuations of publicly-quoted, and particularly microcap, companies that tend to have products or services in development or have yet to be tested in the market;
- material legal action.

Shareholders, including but not limited to those who hold shares as a result of the exercise or conversion of our convertible securities and warrants, may have difficulty reselling shares of our common stock, either at or above the price paid, or even at fair market value. The stock markets often experience significant price and volume changes that are not related to the operating performance of individual companies, and because our common stock is thinly traded it is particularly susceptible to such changes. These broad market changes may cause the market price of our common stock to decline regardless of how well we perform as a company. Price fluctuations in such shares are particularly volatile and subject to manipulation by market-makers, short-sellers and option traders.

Our common stock is currently and may in the future be subject to the “penny stock” regulations, which are likely to make it more difficult to sell.

The trading price of our common stock is currently below \$5 per share and therefore is currently subject to the “penny stock” rules. The SEC has adopted rules that regulate broker-dealer practices in connection with transactions in penny stocks. These rules generally have the result of reducing trading in such stocks, restricting the pool of potential investors for such stocks, and making it more difficult for investors to sell their shares once acquired. Prior to a transaction in a penny stock, a broker-dealer is required to:

- deliver to a prospective investor a standardized risk disclosure document that provides information about penny stocks and the nature and level of risks in the penny stock market;
- provide the prospective investor with current bid and ask quotations for the penny stock;
- explain to the prospective investor the compensation of the broker-dealer and its salesperson in the transaction;
- provide investors monthly account statements showing the market value of each penny stock held in their account; and
- make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser’s written agreement to the transaction.

These requirements may have the effect of reducing the level of trading activity in the secondary market for a stock that is subject to the penny stock rules. Since our common stock is subject to the penny stock rules, investors in our common stock may find it more difficult to sell their shares.

Shares eligible for future sale may adversely affect the market.

From time to time, certain of our stockholders may be eligible to sell all or some of their shares of common stock by means of ordinary brokerage transactions in the open market pursuant to Rule 144, promulgated under the Securities Act, subject to certain limitations. In general, pursuant to Rule 144, non-affiliate stockholders may sell freely after six months subject only to the current public information requirement (which disappears after one year). Affiliates may sell after six months subject to the Rule 144 volume, manner of sale (for equity securities), current public information and notice requirements. Of the 55,509,884 shares of our common stock outstanding as of March 29, 2013, approximately 28,689,278 shares are held by non-affiliates and are, or will be, freely tradable without restriction, and the remaining shares are held by our affiliates, as of such date. Any substantial sale of our common stock pursuant to Rule 144 or pursuant to any resale prospectus (including sales by investors of securities acquired in connection with the above mentioned effective registration statement) may have a material adverse effect on the market price of our common stock.

As of March 29, 2013, the Company has issued options and warrants which could result in the issuance of up to 38,643,710 shares of common stock from time to time, consisting of:

18,647,332 shares under options; and
19,996,378 shares under warrants.

If these shares are issued and available for sale or actually sold in the public market, the market could be adversely impacted and the market price depressed.

A large number of shares may be sold in the market following an equity offering, which may depress the market price of our common stock.

A large number of shares may be sold in the market following an equity offering which may depress the market price of our common stock. Sales of a substantial number of shares of our common stock in the public market following an equity offering could cause the market price of our common stock to decline. If there are more shares of common stock offered for sale than buyers are willing to purchase, then the market price of our common stock may decline to a market price at which buyers are willing to purchase the offered shares. Assuming the sale of all shares issuable pursuant to options and warrants outstanding we will have approximately 94,153,594 shares of our common stock outstanding as of March 29, 2013.

If we cannot raise sufficient funds from a private offering of equity securities, we may not be able to achieve our business objectives.

We cannot assure you that we will be able to complete any private offering of equity securities. If we are unable to complete such a sale of equity securities, our ability to achieve our objectives could be adversely affected.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

We currently lease a 7,200 square feet of combined office and production space located at 11552 Prosperous Drive, Odessa, FL 33556. We lease the site from Ethos Business Ventures, LLC, a limited liability company in which our Chief Executive Officer, Timothy N. Tangredi, has a controlling financial interest (See Certain Relationships and Related Transactions, and Director Independence).

The lease for our corporate headquarters began on March 18, 2005. The lease term will terminate upon 30 days' written notice from landlord or 90 days written termination from us. The current monthly rent is \$4,066, including sales tax. We also pay all taxes and utilities as well as most repairs relating to our office. Most of the Company functions are performed at this site including corporate, marketing, administration, on-going product and nano-structured polymer development, and product assembly and shipping. Key polymer synthesis and casting is out-sourced and not done at this facility.

We do not anticipate investing in real estate or interests in real estate, real estate mortgages, or securities of or interests in persons primarily engaged in real estate activities. We currently have no formal investment policy and do not intend to undertake investments in real estate as a part of our normal operations.

ITEM 3. LEGAL PROCEEDINGS

We are not currently a party to any pending legal proceedings. In the ordinary course of business, we may become a party to various legal proceedings generally involving contractual matters, infringement actions, product liability claims and other matters.

From time to time, claims are made against us in the ordinary course of our business, which could result in litigation. Claims and associated litigation are subject to inherent uncertainties and unfavorable outcomes could occur, such as monetary damages, fines, penalties or injunctions prohibiting us from selling one or more products or engaging in other activities. The occurrence of an unfavorable outcome in any specific period could have a material adverse effect on our results of operations for that period or future periods.

ITEM 4. MINE SAFETY DISCLOSURE

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock was traded from November 15, 2005 to November 23, 2008 on the Pink Sheets and from November 24, 2008 to present on the Over the Counter Bulletin Board under the trading symbol "DLYT." The following table sets forth the range of reported high and low sales prices of our common stock during the periods indicated. Such quotations reflect prices between dealers in securities and do not include any retail mark-up, mark-down or commission, and may not necessarily represent actual transactions. Trading in our common stock should not be deemed to constitute an "established trading market."

	High	Low
For the year ending December 31, 2012:		
First Quarter	\$ 0.35	\$ 0.19
Second Quarter	\$ 0.245	\$ 0.095
Third Quarter	\$ 0.11	\$ 0.061
Fourth Quarter	\$ 0.12	\$ 0.081
For the year ending December 31, 2011:		
First Quarter	\$ 0.50	\$ 0.27
Second Quarter	\$ 0.44	\$ 0.35
Third Quarter	\$ 0.60	\$ 0.22
Fourth Quarter	\$ 0.48	\$ 0.25

Transfer Agent

Our transfer agent is Clear Trust Transfer located at 17961 Hunting Bow Circle, Suite 102, Lutz, Florida 33558, telephone (813) 235-4490.

Holders

As of December 31, 2012 there were approximately 203 shareholders of record of our common stock.

Dividend Policy

We have not declared or paid any dividends and do not intend to pay any dividends in the foreseeable future to the holders of our common stock. We intend to retain future earnings, if any, for use in the operation and expansion of our business. Any future decision to pay dividends on common stock will be at the discretion of our board of directors and will depend on our financial condition, results of operations, capital requirements and other factors our board of directors may deem relevant.

Equity Compensation Plan Information

The following table sets forth information regarding our 2000 Incentive Compensation Plan (the “2000 Plan”) and the 2009 Long-Term Incentive Plan (the 2009 Plan”) under which our securities are authorized for issuance as of December 31, 2012:

Plan Category	(a) Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights	(b) Weighted Average Exercise Price of Outstanding Options, Warrants and Rights	(c) Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans Excluding Securities Reflected in Column (a)
Equity compensation plans approved by security holders:	18,647,332	\$ 0.29	6,975,000

In June 2000 and November 2009, our board of directors adopted, and our shareholders approved, the 2000 Plan and 2009 Plan; respectively (together the “Plans”). The Plans provide for the grant of stock options, incentive stock options, stock appreciation rights, restricted stock, restricted stock units and bonus stock and other awards to eligible persons, as defined in said plans, including, but not limited to, officers, directors and employees of the Company. Certain awards under the Plans may be subject to performance conditions.

Number of Shares of Common Stock Available Under the Plans. As of December 31, 2007, our board of directors approved and made available 6,093,882 shares of common stock to be issued pursuant to the 2000 Plan. Subsequently, our board of directors approved and made available an additional 5,000,000 shares of our common stock for issuance under the 2000 Plan. The 2000 Plan permits grants of options to purchase common shares authorized and approved by the Company’s Board of Directors and shareholders for issuance prior to the enactment of the 2000 Plan. On November 5, 2009, our board of directors approved and made available a total of 15,000,000 shares of common stock to be issued pursuant to the 2009 Plan.

Administration of the Plans. The Plans are administered by a committee of two or more directors designated by the board of directors to administer the Plans (the “Committee”) or, in the absence of such Committee, by the board of directors. Currently, the Plans are administered by our board of directors. The board of directors has the authority to select the participants to whom awards under Plans will be granted, grant awards, determine the type, number and other terms and conditions of, and all other matters relating to, awards granted under the Plans and to prescribe the rules and regulations for the administration of the Plans. No option or stock appreciation rights granted under the Plans shall be exercisable, however, more than ten years after the date of the grant.

Exercise Price. The Plans require the Committee to grant qualified options with an exercise price per share not less than the fair market price of a share of common stock on the date of grant of the option.

Transferability. Awards granted under the Plans are generally not transferable by the optionee otherwise than by will or the laws of descent and distribution and generally exercisable during the lifetime of the optionee only by the optionee.

Change in Control. All awards granted under the 2000 Plan which were not previously exercisable and vested shall become fully exercisable and vested upon a change of control of the Company, which includes the consummation of a merger or consolidation of the Company with or into any other entity, sale of all or substantially all of our assets, replacement of a majority of our board of directors, acquisition by any person of securities representing 20% or more of the voting power of our then outstanding securities (other than securities issued by us) or any other event which the board of directors determines would materially alter our structure or ownership.

Options Granted to Non-Employee Directors. Non-employee directors of the Company are usually granted options each year, which generally become exercisable upon the date of grant, and generally expire on the earlier of ten years from the date of grant or up to three years after the date that the optionee ceases to serve as a director.

Stand-Alone Grants

Our board of directors may grant common share purchase options or warrants to selected directors, officers, employees, consultants and advisors in payment of goods or services provided by such persons on a stand-alone basis outside of any of our Plans. The terms of these grants may be individually negotiated.

RECENT SALES OF UNREGISTERED SECURITIES

The Company did not issue any securities during the quarters ended March 31, 2012, June 30, 2012, and September 30, 2012. During the quarter ended December 31, 2012, the Company issued, in connection with a private offering, 17,500,000 shares of common stock to one purchaser at \$0.10 per share for cash proceeds of \$1,750,000 and the Company has recorded a common stock payable of \$19,255. In addition, under the terms of the private placement offering, this investor also received a warrant to purchase 4,375,000 shares of the Company's common stock with an exercise period of five years from the date of issue at an exercise price of \$0.30 per share.

In 2013, pursuant to the terms and conditions of the GVI offering, the Company sold and issued 492,280 shares of common stock to GVI together with a warrant to purchase 123,070 shares of the Company's common stock with an exercise period of five years from the date of issue at an exercise price of \$0.30 per share for a cash payment of \$49,228 of which \$19,255 was received during 2012.

Recent Repurchases of Common Stock

There were no repurchases of our common stock during 2012.

ITEM 6. SELECTED FINANCIAL DATA

We are a smaller reporting company as defined by Rule 12b-2 of the Securities Exchange Act 1934, as amended, and are not required to provide the information under this item.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our financial statements and related notes appearing elsewhere in this Report. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. The actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including, but not limited to, those which are not within our control.

OVERVIEW

We have developed and patented a nano-structure polymer technology, which is being commercialized in products based on the functionality of these materials. We believe the applications of our technology have promise in a number of diverse market segments and products.

The initial product focus of the Company is ConsERV, an energy recovery ventilator. Our primary focus is to expand our marketing and sales of our ConsERV products world-wide. We also have new product applications in various stages of development. We believe that three of these product applications, including an advanced air conditioning system which is projected to be more energy efficient and have lower emissions compared to current HVAC equipment, a sea-water desalination product and an electrical energy storage device, may be brought to market in the foreseeable future if we receive adequate capital funding.

We expect ConsERV™ to continue to be our focused commercial product through 2013 with a growing emphasis on moving the development of the NanoClear and NanoAir technologies towards commercialization.

REVENUES

We generate our revenues primarily from the sale of our ConsERV™ products in largely commercial HVAC markets with a small amount of revenue coming from residential sales to HVAC distributors. Sales channels for our ConsERV™ products include OEMs, our North and South America licensee, distributors and retailers. We also occasionally license our technology to other strategic partners and sell various prototypes of other product applications that use our polymer technology.

Our near term revenue growth is dependent on continued sales from (i) more seasoned independent sales representatives world-wide, (ii) a greater number of independent sales representatives in certain areas, (iii) the growth of our licensees sales in North and South America (iv) fulfilling the ventilation needs of the growing "energy consultant" marketplace which work to lower their client's energy costs and emissions, and (v) from the Company's own 'customer direct' sales activities, all of which focus on the sale of product primarily into the commercial user marketplace. As a result of the License and Supply Agreement with MGE, however, we expect both revenue and cost of goods sold to decrease in the first quarter of 2013. In addition, the Company, its licensee and its independent sales representative sales force will work to secure orders for ConsERV™ "core only" sales from HVAC equipment manufacturers and from distribution firms servicing the equipment needs of the HVAC installer community. We are also working to create license/supply relationships with HVAC or ERV OEMs preferably having a dominant presence in existing direct related sales channels world-wide.

COST OF SALES

Our cost of sales consists primarily of materials (including freight), direct labor, and outsourced manufacturing expenses incurred to produce our ConsERV™ products.

We are dependent on third parties to manufacture the key components needed for our nano-structured based materials and value added products made with these materials. Accordingly, a supplier's failure to supply components in a timely manner, or to supply components that meet our quality, quantity and cost requirements or our technical specifications, or the inability to obtain alternative sources of these components on a timely basis or on terms acceptable to us, would create delays in production of our products or increase our unit costs of production. Certain of the components contain proprietary products of our suppliers, or the processes used by our suppliers to manufacture these components are proprietary. If we are required to replace any of our suppliers, while we should be able to obtain comparable components from alternative suppliers at comparable costs, it would create a delay in production.

Our cost of sales may fluctuate due to a number of factors, including, but not limited to:

- A change in key suppliers or the prices that they charge for the fundamental components of our ConsERV™ products;
- An increase in the labor resources needed to expand the production of our ConsERV™ products;
- Commercialization of new product applications of our polymer technology;
- Continued technological improvements in key materials or configuration(s) to reduce our 'per unit' cost structure; and
- Additional outsourcing of our manufacturing and assembly processes with strategic partners to reduce our 'per unit' cost structure.

SELLING, GENERAL AND ADMINISTRATIVE EXPENSES

Our selling, general and administrative expenses consist primarily of payroll and related benefits, share-based compensation, professional fees, marketing and channel support costs, and other infrastructure costs such as insurance, information technology and occupancy expenses.

Our selling, general and administrative expenses may fluctuate due to a variety of factors, including, but not limited to:

- Additional expenses as a result of being a reporting company including, but not limited to, director and officer insurance, director fees, SEC reporting and compliance expenses, transfer agent fees, additional staffing, professional fees and similar expenses;
- Additional infrastructure needed to support the expanded commercialization of our ConsERV™ products and/or new product applications of our polymer technology for, among other things, administrative personnel, physical space, marketing and channel support and information technology; and

- The fair value of new share-based awards, which is based on various assumptions including, among other things, the volatility of our stock price

RESULTS OF OPERATIONS

The following table sets forth, for the periods indicated, certain data derived from our Statements of Operations:

	Year Ended December 31,	
	2012	2011
Revenues	\$ 3,656,080	\$ 3,504,054
Percentage of revenues	100.0%	100.0%
Cost of goods sold	\$ 2,434,610	\$ 2,563,250
Percentage of revenues	66.6%	73.2%
Research and development expenses, net grant revenue	\$ 453,927	\$ 52,275
Percentage of revenues	12.4%	1.5%
Selling, general and administrative expenses	\$ 1,938,553	\$ 2,992,156
Percentage of revenues	53.0%	85.4%
Impairment of equipment	\$ 62,288	\$ --
Percentage of revenues	1.7%	0.0%
Amortization of discount on convertible note payable	\$ 358,555	\$ 1,141,445
Percentage of revenues	9.8%	32.6%
Interest expense	\$ 278,091	\$ 297,010
Percentage of revenues	7.6%	8.5%
Change in fair value of warrant liability	\$ (1,888,218)	\$ (1,204,483)
Percentage of revenues	51.6%	34.4%
Net income (loss)	\$ 21,339	\$ (2,335,204)
Percentage of revenues	0.6%	(66.6)%

DECEMBER 31, 2012 COMPARED TO DECEMBER 31, 2011

REVENUES: Total revenues for the year ended December 31, 2012 and 2011 were \$3,656,080 and \$3,504,054, respectively, an increase of \$152,026, or 4.3%. The increase in revenues for 2012 is primarily attributable to the overall increase in the number of sales of engineered ConsERV products in 2012 and a recognition of \$150,000 of deferred revenue related to the Genertec Agreement. During each of the years ended December 31, 2012 and 2011, four customers accounted for approximately 60% and 57% of revenues, respectively.

COST OF GOODS SOLD: Cost of goods sold was \$2,434,610 and \$2,563,250 or 67% and 73% of revenues for the years ended December 31, 2012 and 2011, respectively. The decrease in 2012 of \$128,640 is due to the reduction in the number of management personnel involved in production. Gross profit margin increased to 30% in 2012, excluding \$150,000 deferred revenue recognized in 2012 related to the Genertec Agreement, from 27% in 2011. The increase in the gross profit margin was due to the reduction in personnel costs allocated to production.

SELLING, GENERAL AND ADMINISTRATIVE EXPENSES: Selling, general and administrative expenses were \$1,938,553 for the year ended December 31, 2012, compared to \$2,992,156 for the year ended December 31, 2011, a decrease of \$1,053,603 or 35%. This decrease is primarily due to a decrease in stock based compensation of approximately \$621,000, a decrease in professional fees of approximately \$158,000, a decrease in travel expenses of \$56,500 and a \$122,000 decrease in payroll costs.

IMPAIRMENT OF EQUIPMENT: Loss on impairment of equipment was \$62,288 for the year ended December 31, 2012, as compared to \$0 for the year ended December 31, 2011. The increase in impairment is due to the disassembly of a prototype unit that was not functional.

AMORTIZATION OF DISCOUNT ON NOTE PAYABLE: Amortization of discount on note payable was \$358,555 for the year ended December 31, 2012 compared to \$1,141,445 for the same period of 2011, a decrease of \$782,890 or 69%. During the year ended December 31, 2011, the Company had recorded a discount and embedded beneficial conversion feature on a convertible note which was amortized over the life of the related note, these amounts were fully amortized in 2012.

INTEREST EXPENSE: Interest expense was \$278,091 for the year ended December 31, 2012 compared to \$297,010 for the same period of 2011, a decrease of \$18,919 or 6%. During the year ended December 31, 2011, there was an additional \$1.5 million of debt outstanding which was all repaid during 2012 resulting in a lower interest expense in 2012.

CHANGE IN FAIR VALUE OF WARRANT LIABILITY: The change in the fair value of warrant liability increased by \$683,735 for the year ended December 31, 2012 to income of \$1,888,218 from \$1,204,483 in the prior year due to the change in the fair value of the underlying warrant liability based on the Black-Scholes option pricing model. See Note 11 in the Financial Statements for further explanation.

NET INCOME (LOSS): Net income for the year ended December 31, 2012 increased by \$2,356,543 to \$21,339 from (\$2,335,204) for the year ended December 31, 2011. The increase in net income is primarily due to the increase in sales and decreases in cost of sales, general and administrative expenses and interest expense as well as the increase in the change in fair value of the warrant liability.

LIQUIDITY AND CAPITAL RESOURCES

The Company finances its operations primarily through sales of its ConsERV™ products, sales of its common stock, the issuance of convertible promissory notes, unsecured promissory notes and license agreements.

Our historical revenues have not been sufficient to sustain our operations. We have achieved profitability in only one year since inception and we expect to continue to incur net losses and negative cash flow from operations until we can produce sufficient revenues to cover our costs, which are not expected for several years. Furthermore, even if we achieve our goal of selling a greater number of ConsERV™ products, we anticipate that we will continue to incur losses until we can cost-effectively produce and sell our products to a wider market. Our profitability will require the successful commercialization of our ConsERV™ products and any future products we develop. No assurances can be given when this will occur.

On October 17, 2012, Dais Analytic Corporation (the “Company”) entered into a Securities Purchase Agreement (the “SPA”) with an investor, Green Valley International Investment Management Company Limited (the “Investor”) pursuant to which the Company will offer up to \$7.0 million of the Company’s common stock, \$0.01 par value per share (the “Common Stock”), and warrants (the “Warrants”) to purchase up to 17,500,000 shares of Common Stock (such offer being the “Offering”). Pursuant to the terms and conditions of the SPA, Company will issue the Common Stock and Warrants in three tranches. Upon the receipt of the funds for the first tranche on or about October 26, 2012, the Company will issue \$2.0 million of newly issued Common Stock for \$0.10 per share and receive warrants for 5,000,000 Warrants. Upon the receipt of the funds for the second tranche on or about November 20, 2012, the Company will issue \$2.0 million of newly issued Common Stock for \$0.10 per share and receive warrants for 5,000,000 Warrants. Upon the receipt of the funds for the third tranche on or about December 28, 2012, the Company will issue \$3.0 million of newly issued Common Stock for \$0.10 per share and receive warrants for 7,500,000 Warrants. The Warrants are exercisable for 60 months beginning on the date of their issuance. The warrants have an exercise price of \$0.30, and are subject to standard anti-dilution adjustments for stock splits and other subdivisions. Pursuant to terms of the Offering, officers of the Company and the Investor have signed lock-up agreements restricting the sale of Common Stock. The Investor does not have any registration rights with respect to the Common Stock or Warrants. No underwriter or placement agent was used in the sale of the Common Stock or Warrants. On December 28, 2012, Dais Analytic Corporation (the “Company”) amended its Securities Purchase Agreement, dated October 17, 2012 (the “Securities Purchase Agreement”), with Green Valley International Investment Management Company Limited (the “Investor”) pursuant to which the Investor will purchase up to \$7.0 million of the Company’s common stock, \$0.01 par value per share (the “Common Stock”), and warrants (the “Warrants”) to purchase up to 17,500,000 shares of Common Stock. Pursuant to the terms of the Securities Purchase Agreement, the Investor has purchased \$1,750,000 of Common Stock and Warrants and the Company as recorded a common stock payable for an additional amount of \$19,255. The amendment requires the Purchaser to purchase the remaining Common Stock and Warrants on or before January 31, 2013. This extension will allow the Company and the Investor to create and capitalize a wholly owned subsidiary to be organized and located in China (the “Dais China Subsidiary”). Pursuant to the amendment, the Company shall use \$4.0 million of the aggregate proceeds from the sale of Common Stock and Warrants for capital expenditures, working capital, and general business purposes. The Company shall use the remaining proceeds from the sale of the Common Stock and Warrants to create and capitalize the Dais China Subsidiary. In 2012, the Company sold and issued, in connection with the SPA, 17,500,000 shares of its common stock to GVI for \$1,750,000. In addition, as part of the purchase it issued GVI a warrant to purchase 4,375,000 shares of the Company’s common stock with an exercise period of five years from the date of issue at an exercise price of \$.30 per share. In 2013, pursuant to the terms and conditions of the above offering, Company sold and issued 492,280 shares of common stock to GVI for \$49,228 in cash together with a warrant to purchase 123,070 shares of the Company’s common stock. The warrant has an exercise period of five years from the date of issue at an exercise price of \$0.30 per share. The SPA expired, per its terms and conditions, on January 31, 2013. The parties are in discussions to permit GVI to purchase securities on similar terms and conditions.

Unsecured Note

In December 2009, the Company entered into a \$1,000,000 unsecured note payable with an investor which carried interest at 10% per annum. On March 22, 2011, the Company entered into a securities amendment and exchange agreement and an amended and restated convertible promissory note (collectively "Exchange Agreements") with the investor. Pursuant to the terms and subject to the conditions set forth in the Exchange Agreements, the Company and the investor amended and restated the \$1,000,000 unsecured promissory note to, among other things, add a conversion option and extend the maturity date (as amended and restated, the "2011 Convertible Note"). The initial conversion price is \$0.26 per share, which is subject to adjustment for standard anti-dilution provisions. Interest in the amount of 10% per annum, commencing on December 17, 2009 and calculated on a 365 day year, and the principal amount of \$1,000,000 was due in full on March 22, 2012, which was subsequently extended to May 7, 2012. The Company did not repay the 2011 Convertible Note by May 7, 2012 and on June 15, 2012, the Company entered into a forbearance agreement with the investor as discussed below. On October 29, 2012, we paid in full all principal and interest due on this note.

On March 22, 2011, in connection with the above Exchange Agreements, the Company entered into amendments to existing warrant agreements with the investor to extend the terms of the existing stock purchase warrants, dated on or about December 31, 2007 and March 12, 2009, respectively, to March 22, 2016 and to provide for cashless exercise unless such warrant shares are registered for resale under a registration statement. In addition, on March 22, 2011, the Company issued an additional stock purchase warrant to the investor. Subject to the terms of the warrant, the investor may purchase 1,000,000 shares of the Company's common stock at \$0.45 per share, exercisable commencing on the earliest of the consummation of the qualified offering (as defined in the Exchange Agreements), the date of conversion of the 2011 Convertible Note in full, or the date of conversion of the Convertible Note by the investor in the greatest number of shares of the Company's common stock not to exceed 9.99% beneficial ownership of Company outstanding common stock and terminating on March 22, 2016.

The 2011 Convertible Note is a hybrid financial instruments that blends characteristics of both debt and equity securities. The note embodies settlement alternatives to the holder providing for either redemption of principal and interest in cash (forward component) or conversion into the Company's common stock (embedded conversion feature). The forward component was valued using the present value of discounted cash flows arising from the contractual principal and interest payment terms and the embedded conversion feature was valued using the Monte Carlo simulation method. The fair value of the 2011 Convertible Note was estimated to be \$1,964,905 on the date of the exchange, which resulted in a loss on extinguishment of debt of \$964,905. Further, in accordance with ASC 470-20-25 and ASC 470-50-40, the net premium of \$964,905 associated with the 2011 Convertible Note was reclassified to capital in excess of par value under the presumption that such net premium represented a capital contribution. Consequently, the 2011 Convertible Note is being carried at face value. The fair value of the additional warrant to purchase 1,000,000 shares and the value associated with the previously issued warrants that were amended was determined to be \$716,890 using the Black-Scholes option model and is included in the aggregate loss on extinguishment of \$1,681,795. Since the loan is held by a related party, the loss on extinguishment has been treated as a capital transaction and, as a result, this transaction had no net effect on capital in excess of par value.

Secured Note

Also, on March 22, 2011, the Company entered into a 10% note and warrant purchase agreement, secured convertible promissory note (the "Secured Note") and a patent security agreement ("Financing Agreements") with the investor. Pursuant to the terms and subject to the conditions set forth in the Financing Agreements, the investor provided a loan in the principal amount of \$1,500,000 to the Company, which was secured by all patents, patent applications and similar protections of the Company and all rents, royalties, license fees and "accounts" with respect to such intellectual property assets. The initial conversion price is \$0.26 per share, which is subject to adjustment for standard anti-dilution provisions. Interest in the amount of 10% per annum, calculated on a 365 day year, and the principal amount of \$1,500,000 was due and payable on March 22, 2012, subsequently extended to May 7, 2012. The Company

did not repay the Secured Note by May 7, 2012 and on June 15, 2012, the Company entered into a forbearance agreement with the investor as discussed below. On July 13, 2012, we paid in full all principal and interest due pursuant to this note.

On March 22, 2011, in connection with the Financing Agreements, the Company issued a stock purchase warrant to the investor to purchase 3,000,000 shares of the Company's common stock at \$0.45 per share, exercisable until March 22, 2016. The Warrant was fair valued on the date of issuance, which amounted to \$1,204,787. The warrant value was recorded as a debt discount based on the relative fair value of the warrant to the total proceeds received, which amounted to \$435,240. The warrant was fair valued using the Black-Scholes-Merton valuation model. In addition, the debt contained a beneficial conversion feature, which was valued at the date of issuance at \$1,762,163; however, since this amount is in excess of the net value of the debt less the warrant discount, the beneficial conversion feature will be limited to \$1,064,760 and recorded as a discount on the loan. The total debt discount of \$1,500,000 is being amortized using the effective interest method over the 12-month term of the Secured Note. For the years ended December 31, 2012 and 2011, the Company recognized \$358,555 and \$1,141,445, respectively, in additional expense representing amortization of this debt discount, respectively.

The fair value of warrants issued in 2011 related to the above debt transactions were calculated using the Black-Scholes model with the following assumptions: Expected life in years: 5-10 years; Estimated volatility 115%-117%, Risk-free interest rate: 1.89%-2.07%; Dividend yield: 0%.

Forbearance Agreement

On June 15, 2012, we entered into a forbearance agreement (the "Forbearance Agreement"), with the investor. Under the Forbearance Agreement, the investor agreed to forebear from disposing of or selling any collateral secured by the patent security agreement until the earliest of: (i) July 15, 2012; (ii) two business days after our receipt of a written notice after any subsequent event of default, (iii) two business days after our receipt of a written notice that any representations, warranties or information we provided to the investor in any document or instrument in connection with the Forbearance Agreement is materially false, incomplete or misleading, (iv) two business days after our receipt of a written notice that a proceeding or other action has been commenced by any creditor against us, other than the investor (v) the date on which a court enters an order for relief or take any similar action in respect of us in an involuntary case under any applicable bankruptcy law, or (vi) the date on which a petition for relief under any applicable bankruptcy, is filed by or against us, each as further described in the Forbearance Agreement.

In connection with the Forbearance Agreement, interest on the 2011 Convertible Note and the Secured Note was increased to 20% per annum effective June 14, 2012.

On July 13, 2012 we paid in full all principal and interest due pursuant to the Secured Note and the patent security agreement was terminated. On October 29, 2012 we paid in full all principal and interest due pursuant to the 2011 Convertible Note. Upon payment of the 2011 Convertible Note the Forbearance Agreement was terminated.

2012 Secured Convertible Promissory Note

On July 13, 2012, the Company issued a secured convertible promissory note and patent security agreement (collectively, the "Agreements") to an investor who is a shareholder of the Company. Pursuant to the terms and subject to the conditions set forth in the Agreements, the investor provided a loan in the amount of \$2,000,000 to the Company, which is secured by all current and future patents, patent applications and similar protections of the Company and all rents, royalties, license fees and "accounts" with respect to such intellectual property assets. Pursuant to the secured convertible promissory note (the "2012 Note"), interest in the amount of 6% per annum, calculated on a 365 day year, and the principal amount of \$2,000,000 and accrued interest will be paid on or before October 15, 2012, subsequently extended to October 26, 2012. The investor has the right to convert principal and accrued interest into the Company's common stock at \$0.26 per share. The initial conversion price may be adjusted pursuant to standard anti-dilution provisions. The proceeds of this 2012 Note were used in part to pay, in full, all outstanding principal and interest due pursuant to the Secured Note issued March 22, 2011.

The Company performed an analysis pursuant to ASC 815 in order to determine whether the embedded conversion option included in the 2012 Note is required to be accounted for separately from the host contract and recorded on the balance sheet at fair value. The Company concluded that the embedded conversion option did not meet the requirements for such classification.

Pursuant to the patent security agreement, the Company shall not, without the Investor's prior consent, sell, dispose or otherwise transfer all or any portion of the Collateral, except for license grants in the ordinary course of business. In addition, the Company will take all actions reasonably necessary to prosecute to allowance applications for patents and maintain all patents, and to seek to recover damages for infringement, misappropriation or dilution of the Collateral with limited exceptions.

On October 30, 2012, the Company and MG Energy LLC, a Delaware limited liability company ("MG Energy"), entered into the License and Supply Agreement (the "Agreement"), effective October 26, 2012 as discussed in Note 12,

As consideration for the Agreement, MG Energy agreed to retire the 2012 Note including all interest accrued thereon, issued by the Company to the investor, who assigned the 2012 Note to MG Energy, a company in which a shareholder of the Company holds a position. This retirement is nonrefundable and noncreditable. Coincident with the retirement of the 2012 Note, the related patent security agreement was terminated. In accordance with ASC Subtopic 470-50, Debt Modifications and Extinguishments, the Company determined the reacquisition price of the debt to be equal to the fair value of the debt as it was more clearly evident than the fair value of the License and Supply Agreement. The fair value of the debt approximated its carrying value and, accordingly, there was no gain or loss on the extinguishment of the debt.

Other Notes and Accrued Interest

During the year ended December 31, 2012, the Company entered into an agreement with a related party to borrow \$50,000 which was due on demand and bears interest at 4%. We paid all interest and principal due under this note on August 1, 2012.

Accrued interest on the above notes was \$0 and \$320,548 at December 31, 2012 and 2011, respectively.

Any future financing may result in substantial dilution to existing shareholders, and future debt financing, if available, may include restrictive covenants or may require us to grant a lender a security interest in any of our assets not already subject to an existing security interest. If we secure debt financing in the future, we may not be able to repay all or any of such debt when due without severely impacting our ability to continue operations and we may not be able to secure additional financing to repay such financing on acceptable terms, if at all. Should we be unable to repay or renegotiate any such financing, as an alternative, management could attempt to renegotiate the repayment terms and seek extension of the maturity dates. There is no guarantee that, if we should need to renegotiate any such future debt, any negotiated terms we may be able to secure would be favorable to the Company. To the extent that we attempt to raise additional funds through third party collaborations and/or licensing arrangements, we may be required to relinquish some rights to our technologies or products currently in various stages of development, or grant licenses or other rights on terms that are not favorable to us. Any failure by us to timely procure additional financing or investment adequate to fund our ongoing operations, including planned product development initiatives and commercialization efforts, will have material adverse consequences on our financial condition, results of operations and cash flows as could any unfavorable terms.

We will be dependent upon our existing cash of \$294,150 at December 31, 2012, product sales and additional debt and equity issuances to finance our operations through the next 12 months. These operational expenses include other contractual obligations amounting to \$91,446.

We must raise additional capital in the amount of approximately \$8.9 million, net of expenses, during the next eighteen months in order to secure new patents for innovative applications of our core technology, purchase equipment, and fund our working capital requirements in accordance with our existing plans through July 2014. This additional capital could be provided by a successful completion of an offering of equity securities or by entering into licensing agreements. If we are unable to raise these funds, we may be required to delay our development plans and

curtail our expenditures.

39

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. For the year ended December 31, 2012, the Company incurred net income of \$21,339, however; the Company has incurred significant losses since inception and without the noncash gain from the change in fair value of the warrant liability of \$1,888,218 we would have a net loss for the current year. As of December 31, 2012, the Company has an accumulated deficit of \$37,951,827, positive working capital of \$245,365 and a stockholders' deficit of \$2,928,934. The Company used \$1,167,650 and \$1,329,734 of cash from operations during 2012 and 2011, respectively, which was funded by proceeds from debt and equity financings. There is no assurance that such financing will be available in the future. In view of these matters, there is substantial doubt that the Company will continue as a going concern. The Company is currently pursuing the following sources of short and long-term working capital:

1. We are currently holding preliminary discussions with parties who are interested in licensing, purchasing the rights to, or establishing a joint venture to commercialize, certain applications of our technology.
2. We are seeking growth capital from certain strategic and/or government (grant) related sources. In addition to said capital, these sources may, pursuant to any agreements that may be developed in conjunction with such funding, assist in the product definition and design, roll-out, and channel penetration of our products.

The Company's ability to continue as a going concern is highly dependent on our ability to obtain additional sources of cash flow sufficient to fund our working capital requirements. However, there can be no assurance that the Company will be successful in its efforts to secure such cash flow. Any failure by us to timely procure additional financing or investment adequate to fund our ongoing operations, including planned product development initiatives and commercialization efforts, will have material adverse consequences on our financial condition, results of operations and cash flows.

The financial statements of the Company do not include any adjustments relating to the recoverability and classification of recorded assets, or the amounts and classifications of liabilities that might be necessary should the Company be unable to continue as a going concern.

Statements of Cash Flows

Cash and cash equivalents as of December 31, 2012 was \$294,150 compared to \$262,740 as of December 31, 2011. Cash is primarily used to fund our working capital requirements.

As of December 31, 2012, the Company had an increase in working capital of \$3,467,528, resulting in working capital of \$245,365 compared to \$3,222,163 of working capital deficit as of December 31, 2011. During the year ended 2012, we used approximately \$1,167,650 of cash to fund our operations, \$2,565,000 to repay debt, and approximately \$48,200 to purchase property and equipment and patent costs. These uses of cash are partially offset by approximately \$3,819,300 of proceeds received during 2012 in connection with the issuance of debt and common stock.

Net cash used in operating activities was approximately \$1,167,650 for the year ended December 31, 2012 compared to approximately \$1,329,700 for the same period in 2011. During the year ended December 31, 2012, we used additional cash for our working capital requirements of approximately \$1,189,000 compared to \$1,005,500 for the same period in 2011.

Net cash used in investing activities was approximately \$45,200 for the year ended December 31, 2012 compared to approximately \$108,000 for the same period in 2011. During the year ended December 31, 2012, we decreased our purchases of equipment by approximately \$70,000 and increased our patent costs by approximately \$10,000.

Net cash provided by financing activities was approximately \$1,244,300 for the year ended December 31, 2012 compared to approximately \$1,396,200 for the same period in 2011. During the year ended December 31, 2012, we received net proceeds of \$2,050,000 from the issuance of debt net of \$2,565,000 of payments on notes payable and \$1,759,255 of net proceeds from the issuance of common stock.

ECONOMY AND INFLATION

We have not experienced any significant cancellation of orders due to the downturn in the economy and only a small number of customer requested delays in delivery or production of orders in process.

Our management believes that inflation has not had a material effect on our results of operations

CONTRACTUAL OBLIGATIONS

As of December 31, 2012, we have contractual obligations of \$91,446 as indicated below:

Contractual Obligations	Total	Less than 1 Year	1-3 Years	3-5 Years
Purchase obligations	91,446	91,446	—	—
Tot	\$ 91,446	\$ 91,446	\$ —	—

OFF-BALANCE SHEET ARRANGEMENTS

We do not have any off balance sheet arrangements that are reasonably likely to have a current or future effect on our financial condition, revenues, results of operations, liquidity or capital expenditures.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of the accompanying financial statements and related disclosures in conformity with U.S. GAAP requires us to make judgments, assumptions and estimates that affect the amounts reported in the accompanying financial statements and the accompanying notes. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. When making these estimates and assumptions, we consider our historical experience, our knowledge of economic and market factors and various other factors that we believe to be reasonable under the circumstances. Actual results could differ from these estimates. Management has discussed the selection of critical accounting policies and estimates with our Board of Directors, and the Board of Directors has reviewed our disclosure relating to critical accounting policies and estimates in this annual report on Form 10-K. The following critical accounting policies are significantly affected by judgments, assumptions and estimates used in the preparation of the financial statements:

The significant accounting policies followed are:

Revenue Recognition

Generally, the Company recognizes revenue for its products upon shipment to customers, provided no significant obligations remain and collection is probable. This policy applies to all of our customers, including Genertec America (a distribution agreement) and CAST Systems Control Technology Co. (an agreement for the purchase of specific goods).

Our 2012 ConsERV energy recovery ventilator product typically carried a warranty of two years for all parts contained therein with the exception of the energy recovery ventilator core which typically carried a 10 year warranty. Under the typical 2012 warranty, in the event of a defective part, Company will provide a replacement. The Company has recorded an accrual of approximately \$92,800 and \$47,400 for future warranty expenses at December 31, 2012 and 2011, respectively.

Revenue derived from the sale of licenses is deferred and recognized as revenue on a straight-line basis over the life of the license, or until the license arrangement is terminated. The Company recognized revenue of \$103,640 and \$82,000 from license agreements for the years ended December 31, 2012 and 2011, respectively.

The Company accounts for revenue arrangements with multiple elements under the provisions of the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 605-25, "Revenue Recognition—Multiple-Element Arrangements." In order to account for these agreements, the Company must identify the deliverables included within the agreement and evaluate which deliverables represent separate units of accounting based on if certain criteria are met, including whether the delivered element has stand-alone value to the collaborator. The consideration received is allocated among the separate units of accounting, and the applicable revenue recognition criteria are applied to each of the separate units.

Accounts receivable

Accounts receivable consist primarily of receivables from the sale of our ERV products. The Company regularly reviews accounts receivable for any bad debts based on an analysis of the Company's collection experience, customer credit worthiness, and current economic trends.

Impairment of Long-Lived and Intangible Assets

Long-lived and intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the book value of the asset may not be recoverable. The Company periodically evaluates whether events and circumstances have occurred that indicate possible impairment. When impairment indicators exist, the Company uses market quotes, if available, or an estimate of the future undiscounted net cash flows of the related asset or asset group over the remaining life in measuring whether or not the asset values are recoverable. During the years ended December 31, 2012 and 2011, the Company recognized \$62,288 and \$0, respectively, in impairment costs.

Stock-Based Compensation

The Company recognizes all share-based payments to employees, including grants of employee stock options, as compensation expense in the financial statements based on their fair values. That expense is recognized over the period during which an employee is required to provide services in exchange for the award, known as the requisite service period (usually the vesting period).

The value of each grant is estimated at the grant date using the Black-Scholes option model with the following assumptions for options granted during the years ended December 31, 2012 and 2011:

	Years Ended December 31,	
	2012	2011
Dividend rate	0%	0%
Risk free interest rate	0.61% – 1.04%	1.45% – 2.93%
Expected term	5 – 6.5 years	6.5 – 10 years
Expected volatility	123% – 125%	180% – 189%

The basis for the above assumptions are as follows: the dividend rate is based upon the Company's history of dividends; the risk-free interest rate for periods within the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of grant; the expected term was calculated based on the Company's historical pattern of options granted and the period of time they are expected to be outstanding; and expected volatility was calculated based upon historical trends in the Company's common stock as well as a peer company's historical common stock activity.

Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Based on historical experience of forfeitures, the Company estimated forfeitures at 0% for the each of the years ended December 31, 2012 and 2011.

Derivative Financial Instruments

The Company does not use derivative instruments to hedge exposure to cash flow, market or foreign currency risk. Terms of convertible promissory note instruments are reviewed to determine whether or not they contain embedded derivative instruments that are required under ASC 815 "Derivative and Hedging" (ASC 815) to be accounted for separately from the host contract, and recorded on the balance sheet at fair value. The fair value of derivative liabilities, if any, is required to be revalued at each reporting date, with corresponding changes in fair value recorded in current period operating results.

Freestanding warrants issued by the Company in connection with the issuance or sale of debt and equity instruments are considered to be derivative instruments and are evaluated and accounted for in accordance with the provisions of ASC 815. Pursuant to ASC 815, an evaluation of specifically identified conditions is made to determine whether fair value of warrants issued is required to be classified as equity or as a derivative liability.

Taxes

Income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due plus deferred taxes resulting from temporary differences. Such temporary differences result from differences in the carrying value of assets and liabilities for tax and financial reporting purposes. The deferred tax assets and liabilities represent the future tax consequences of those differences, which will either be taxable or deductible when the assets and liabilities are recovered or settled. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized.

As of December 31, 2012, the Company had no unrecognized tax benefits or related interest and penalties. We will include future interest and penalties associated with any unrecognized benefits within provision for income taxes on the Statements of Operations, if applicable. We do not anticipate any unrecognized benefits in the next 12 months that would result in a material change to our financial position.

RECENT ACCOUNTING PRONOUNCEMENTS

For a description of recent accounting standards, including the expected dates of adoption and estimated effects, if any, on our financial statements, see “Note 3: Significant Accounting Policies: Recent Accounting Standards” in Part II, Item 8 of this Form 10-K.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

Our financial statements and the related notes begin on Page 72, which are included in this Annual Report on Form 10-K.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A(T). CONTROLS AND PROCEDURES.

Disclosure Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act. Management conducted its evaluation based on the framework in Internal Control Over Financial Reporting Guidance for Smaller Public Companies issued by the Committee on Sponsoring Organizations of the Treadway Commission (COSO). Based on that evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that, at December 31, 2012, such disclosure controls and procedures were effective.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure.

Limitations on the Effectiveness of Controls

Our disclosure controls and procedures are designed to provide reasonable, not absolute, assurance that the objectives of our disclosure control system are met. Because of inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues, if any, within a company have been detected. Based on their evaluation as of the end of the period covered by this report, management concluded that our disclosure controls and procedures were sufficiently effective to provide reasonable assurance that the objectives of our disclosure control system were met.

Management's Annual Report on Internal Control over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act). Internal control over financial reporting is a process, including policies and procedures, designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with U.S. generally accepted accounting principles. Our management assessed our internal controls over financial reporting based on the Internal Control Over Financial Reporting Guidance for Smaller Public Companies issued by the COSO. Based on the results of this assessment, our management concluded that our internal controls over financial reporting were effective as of December 31, 2012.

Auditor's Report on Internal Control over Financial Reporting

This Annual Report does not include an attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this Annual Report.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting identified in connection with our evaluation that occurred during the quarter ended December 31, 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

NONE

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The following table sets forth the names and ages of all of our directors and executive officers as of the date of this Annual Report. Also provided herein is a brief description of the business experience of each director and executive officer during the past five years and an indication of directorships held by each director in other companies subject to the reporting requirements under the Federal securities laws. All of the directors will serve until the next annual meeting of shareholders and until their successors are elected and qualified, or until their earlier death, retirement, resignation or removal. There are no arrangements or understandings between any director or executive officer and any other person pursuant to which the director or executive officer was selected.

Name	Age	Position
Timothy N. Tangredi	57	President, Chief Executive Officer and Chairman of the Board of Directors
Judith C. Norstrud	44	Chief Financial Officer, Secretary and Treasurer
Robert W. Schwartz	68	Director
Ira William McCollum, Jr.	68	Director

Directors and Executive Officers

The following are the Company's directors and executive officers:

Timothy N. Tangredi has been our Chief Executive Officer since 1996. Mr. Tangredi joined the Company in 1996, and was appointed a member of our board of directors in 1997. In 1999 and 2000, respectively, Mr. Tangredi initiated and executed the strategic purchases of the assets of Analytic Power and American Fuel Cell Corporation. From 1979 to 1990, Mr. Tangredi worked for AT&T, as a member of the Leadership Continuity Program working in technical marketing, network operations, and project management. Mr. Tangredi earned his BS from Siena College and MBA from Rensselaer Polytechnic Institute. He is a founder and member of the board of directors of Aegis BioSciences, LLC ("Aegis"). Aegis, created in 1995, is a licensee of the Company's nano-structured intellectual property and materials in the biomedical and healthcare fields. Mr. Tangredi spends approximately one to two days per month on Aegis business and is compensated by Aegis for his time and contribution.

Judith C. Norstrud, CPA was appointed Chief Financial Officer and Treasurer on October 14, 2009 and Secretary in September of 2012. In March 2002, Ms. Norstrud founded Norco Accounting & Consulting, Inc., a firm that provides various accounting and consulting services to small companies on an as needed basis. She continues her consulting work with Norco Accounting & Consulting concurrently with her services to the Company as our CFO and Treasurer. From July 1999 to June 2002, Ms. Norstrud served as a manager with Pender, Newkirk and Company, CPAs. While at Pender, Ms. Norstrud served a variety of companies from start up enterprises to mid-sized publicly traded companies. Previously, from August 1996 to July 1999, Ms. Norstrud was an Audit Senior with PricewaterhouseCoopers, LLP. Ms. Norstrud graduated from the University of South Florida's College of Business Administration with a Master of Accountancy degree in 1992.

Non-Employee Directors

Robert W. Schwartz was appointed to our board of directors in 2001. Mr. Schwartz founded the Schwartz-Heslin Group (“SHG”) in 1985 and serves as one of its Managing Directors. Mr. Schwartz specializes in corporate planning, finance and development. Prior to starting SHG, he was a founder, President and Chief Executive Officer of a venture-funded high tech telecommunications company (WindsorSource, Inc.). In addition, he was the President and Chief Operating Officer of an AMEX listed company (Coradian Corporation). He was also the Chief Financial Officer of a major manufacturer of outdoor power equipment (Troy Built Products, Troy, NY). His earlier experience was with KPMG as a management consultant and with IBM. Mr. Schwartz received a Bachelor of Science from Cornell University in 1967 and attended graduate courses at the University of New York Albany. He currently serves on the boards of five corporations, including ours. Mr. Schwartz’s experience in financial planning and reporting provides assistance to us in these areas and he is considered to be a financial expert to the company.

The Board members serve for the latter of a period of one year or until the next annual meeting of Company’s shareholders.

Ira William McCollum, Jr. joined our board on March 25, 2013. In 2011, Mr. McCollum joined as a partner in SNR Denton’s Public Policy and Regulation practice. He joined the firm following his term as the 36th attorney general of the state of Florida. Mr. McCollum served as attorney general from 2007 to 2011. Prior to becoming the Florida Attorney General in 2007, McCollum was a partner with Baker & Hostetler’s Government Policy practice from 2001-2007. Between 1981-2001, McCollum was a Member of the US House of Representatives representing Florida’s 8th District where he served on the Judiciary, Banking and Financial Services, and Intelligence Committees. He also held a number of leadership positions, including Chairman of the Judiciary Subcommittee on Crime, Vice Chairman for six years of the Banking and Financial Services Committee, ranking Member of the subcommittee overseeing the Federal Reserve, and Vice Chairman of the House of Republican Conference for three terms (one of eight House GOP leadership positions). Mr. McCollum’s expertise in federal and state government and regulations is an asset to the board.

Involvement in Certain Legal Proceedings

None of our directors or executive officers has been, during the past ten years:

- (i) involved in any bankruptcy petition filed by or against such person or any business of which such person was a general partner or executive officer, either at the time of the bankruptcy or within two years prior to that time;
- (ii) convicted of any criminal proceeding or subject to a pending criminal proceeding (excluding traffic violations and other minor offenses);
- (iii) subject to any order, judgment, or decree, not subsequently reversed, suspended or vacated, of any court of competent jurisdiction, permanently or temporarily enjoined, barred, suspended or otherwise limited from involvement in any type of business, securities, futures, commodities or banking activities;
- (iv) found by a court of competent jurisdiction (in a civil action), the Securities and Exchange Commission or the Commodity Futures Trading Commission to have violated a federal or state securities or commodities law, and the judgment has not been reversed, suspended, or vacated
- (v) found by a court of competent jurisdiction in a civil action or by the Commission to have violated any Federal or State securities law, and the judgment in such civil action or finding by the Commission has not been subsequently reverse, suspended, or vacated;
- (vi) subject of, or a party to, any Federal or State judicial or administrative order, judgment, decree, or finding, not subsequently reversed, suspended or vacated, related to an alleged violation of securities or commodities law or regulation; any law or regulation respecting financial institutions or insurance companies; or any law or regulation prohibiting mail or wire fraud or fraud in connection with any business entity; or
- (viii) the subject of, or a party to, any sanction or order, not subsequently reversed, suspending or vacated, of any self-regulatory any registered entity of the Commodity Exchange Act or any equivalent exchange, association,

entity or organization that has disciplinary authority over its members or persons associated with a member.

Director Independence

We have determined that our board of directors currently has one member who qualifies as “independent” as the term is used in Item 407 of Regulation S-K as promulgated by the SEC and as that term is defined under NASDAQ Rule 4200(a)(15). As of the date of this report, our independent director is Robert W. Schwartz. On the basis of information solicited from Mr. Schwartz, he has no material relationship with us and is independent within the meaning of such rules. In making this determination, the board evaluated responses to a questionnaire completed by Mr. Schwartz regarding relationships and possible conflicts of interest between himself, the company and management. In its review of director independence, the board considered all commercial, industrial, banking, consulting, legal, accounting, charitable, and familial relationships any director may have with the company or management.

Board Meetings and Committees; Annual Meeting Attendance

Although we intend to establish an audit committee and compensation committee, our board of directors has not adopted any committees to the board of directors. Our board of directors held one formal meeting during the most recently completed fiscal year. Other proceedings of the board of directors were conducted by resolutions consented to in writing by all the directors and filed with the minutes of the proceedings of the directors. Such resolutions consented to in writing by the directors entitled to vote on that resolution at a meeting of the directors are, according to the corporate laws of the State of New York and our bylaws, as valid and effective as if they had been passed at a meeting of the directors duly called and held.

At each annual meeting of shareholders, directors will be elected by the holders of common stock to succeed those directors whose terms are expiring. Directors will be elected annually and will serve until successors are duly elected and qualified or until a director’s earlier death, resignation or removal. Our bylaws provide that the authorized number of directors may be changed by action of the majority of the board of directors or by a vote of the shareholders of our Company. Vacancies in our board of directors may be filled by a majority vote of the board of directors with such newly appointed director to serve until the next annual meeting of shareholders, unless sooner removed or replaced. We currently do not have a policy regarding the attendance of board members at the annual meeting of shareholders.

Code of Ethics

We have adopted a code of ethics that applies to our officers, directors and employees in accordance with applicable federal securities laws. We have filed a copy of our code of ethics as an exhibit to our Annual Report on Form 10-K as filed on March 31, 2009. This document may be reviewed by accessing our public filings at the SEC’s web site at www.sec.gov. In addition, a copy of the code of ethics will be provided without charge upon request to us. We intend to disclose any amendments to or waivers of certain provisions of our code of ethics in a Current Report on Form 8-K.

Compliance with Section 16(a) of the Exchange Act

Section 16(a) of the Exchange Act requires our executive officers and directors, and persons who own more than 10% of any publicly traded class of our equity securities, to file reports of ownership and changes in ownership of our equity securities with the SEC. Officers, directors, and greater than ten percent stockholders are required by SEC regulation to furnish the Company with copies of all Section 16(a) forms that they file. Based solely on the reports received and on the representations of the reporting persons, we believe that these persons have complied with all applicable filing requirements of Section 16(a) of the Exchange Act during fiscal 2012.

ITEM 11. EXECUTIVE COMPENSATION

The table below summarizes the total compensation earned by or paid to our principal executive officer, our principal financial officer and each of our two other executive officers other than our principal executive officer and principal financial officer for the fiscal years ended December 31, 2012 And 2011. The amounts represented in the “Options Award” column reflect the stock compensation expense recorded pursuant to the ASC Topic 718 and does not

necessarily equate to the income that will ultimately be realized by the named executive for such awards.

	2011	\$ 170,000	—	—	\$ 91,754	—	—	—	\$ 261,754
David E. Longacre Vice President of Sales and Marketing	2012	\$ 125,000	\$ —	—	\$ 10,082	—	—	—	\$ 135,082
	2011	\$ 125,000	\$ —	—	\$ 29,529	—	—	—	\$ 154,529
Scott G. Ehrenberg Chief Technology Officer and Secretary(3)	2012	\$ 73,750	—	—	\$ —	—	—	—	\$ 73,750
	2011	\$ 105,000	—	—	\$ 214,056	—	—	—	\$ 319,056
Judith C. Norstrud Chief Financial Officer, Secretary, and Treasurer	2012	\$ 72,000	—	—	\$ 28,987	—	—	—	\$ 100,987
	2011	\$ 68,333	—	—	\$ 95,606	—	—	—	\$ 163,939

(1) Mr. Tangredi received a salary of \$200,000 per year, effective September 14, 2011, and may receive a bonus in an amount not to exceed 100% of his salary, which bonus shall

be measured by meeting certain performance goals as determined in the sole discretion of our board of directors. In 2012 and 2011, Mr. Tangredi was paid \$170,000 and \$156,667, respectively and has accrued unpaid salary of \$30,000 for 2012 and \$20,833 for 2011. Additional accruals have been made for the years prior to 2010. As of December 31, 2012, we owed Mr. Tangredi accrued compensation in the aggregate amount of \$1,085,384.

- (2) The amounts included in these columns are the aggregate dollar amounts of the grant date fair value of option awards granted in the indicated year as adjusted to disregard the effects of any estimate of forfeitures related to service-based vesting, in accordance with Accounting Standards Codification 718, Compensation-Stock Compensation, for the fiscal years ended December 31, 2012 and December 31, 2011. For information on the valuation assumptions used in calculating these dollar amounts, see Note 1 to our audited financial statements included in this Report for the fiscal years ended December 31, 2012 and December 31, 2011. These amounts reflect our accounting expense for these awards and do not correspond to the actual value that may be recognized by the individuals upon option exercise.
- (3) Mr. Ehrenberg's resignation was accepted by the Board of Directors in August 2012.

Narrative Disclosure to Summary Compensation Table

Timothy N. Tangredi. We are party to an employment agreement with Mr. Tangredi, our President, Chief Executive Officer, and director, which was amended and restated on September 14, 2011. Mr. Tangredi's employment agreement provides for an initial term of three years commencing on September 14, 2011 with the term extending on the second anniversary thereof for an additional two-year period and on each subsequent anniversary of the commencement date for an additional year period. Mr. Tangredi's initial base salary is \$200,000. Mr. Tangredi's base salary shall be increased annually, if applicable, by a sum equal to his current base salary multiplied by one third of the percentage increase in our yearly revenue compared to our prior fiscal year revenue; provided however any annual increase in Mr. Tangredi's base salary shall not exceed a maximum of 50% for any given year. Any further increase in Mr. Tangredi's base salary shall be at the sole discretion of our board of directors or compensation committee (if applicable). In addition, Mr. Tangredi will be eligible for bonus compensation at the discretion of board of directors, as well as option-based compensation under our 2009 Plan. Among the option grants Mr. Tangredi is eligible to receive under this agreement is a grant to purchase up to 520,000 shares of common stock upon the successful completion of a secondary public offering. For a full description of the terms of our agreement with Mr. Tangredi, please refer to the section below entitled "Certain Relationships and Related Party Transactions —Employment Agreements."

Scott G. Ehrenberg.. In January and April of 2011, our Board granted Mr. Ehrenberg an option to purchase 625,000 shares at an exercise price of \$.30 per share and 75,000 shares of our common stock at an exercise price of \$0.40. The value of these options were \$184,557 and \$29,499, respectively. The above options were granted pursuant to the terms and conditions of the 2009 Long Term Incentive Plan. On May 24, 2011 we entered into an employment agreement with Mr. Ehrenberg. Mr. Ehrenberg's employment agreement provides for an initial term of two years with the term extending on the second anniversary thereof for an additional one year period and on each subsequent anniversary of the agreement for an additional year period. Mr. Ehrenberg's initial base salary is \$110,000, with an increase to \$165,000 per annum after the date on which we obtain \$10 million or more in equity financing ("Offering"). Additionally, at the discretion of our board of directors and its compensation committee, Mr. Ehrenberg was eligible for an annual bonus which amount, if any, was not to be below 50% of his effective base salary and not exceeding 100% of his then effective base salary; provided that, under certain extraordinary circumstances, Mr. Ehrenberg was to be eligible for an annual bonus greater than 150% of his then effective base salary. After the completion of an Offering, Mr. Ehrenberg was to be eligible to receive a one-time payment of \$20,000 for each U.S. patent of which he was the originator and the first name listed on the patent as inventor of the intellectual property described in such patent. In addition to any other compensation which Mr. Ehrenberg received under the agreement, he was to be granted a stock option to purchase 40,000 shares of common stock at the end of each year or on the annual anniversary of the agreement, whichever is mutually acceptable to the Company and Mr. Ehrenberg. The Board of Directors accepted Mr. Ehrenberg's resignation in August of 2012.

David Longacre. Mr. Longacre receives a salary of \$125,000 per year and may receive a bonus which is measured by meeting certain performance goals.. In January of 2011, Mr. Longacre was granted an option to purchase up to 100,000 shares of common stock at an exercise price of \$0.27 per shares and a value of \$29,529. In December of 2012, Mr. Longacre was granted an option to purchase up to 100,000 shares of common stock at an exercise price of \$0.12 per share and a value of \$10,082. All options granted to Mr. Longacre were granted pursuant to the terms and conditions of the 2009 Long Term Incentive Plan. Following our license of ConsERV products in North and South America to MG Energy, Mr. Longacre accepted employment with MG Energy's sublicensee, MultiStack in February 2013.

Judith Norstrud. In 2011, Ms. Norstrud salary was increased to \$72,000. In addition, during that year, Ms. Norstrud received three option awards to purchase 100,000, 137,500 and 35,000 shares of our common stock at exercise prices of \$0.30, \$0.40 and \$0.35 per share, respectively. The value of these options are \$29,529, \$54,082 and \$12,064, respectively. In 2012, Ms. Norstrud was granted an option to purchase up to 300,000 shares of common stock at an

exercise price of \$0.115 per shares and a value of \$28,987. The options were granted pursuant to the terms and conditions of the 2009 Long Term Incentive Plan.

Outstanding Equity Awards

The following table summarizes outstanding unexercised options, unvested stocks and equity incentive plan awards held by each of our name executive officers as of December 31, 2012.

- (1) The April 2008 warrant grant to Mr. Tangredi for 3,000,000 shares was made by the Board of Directors in recognition for Mr. Tangredi's achievement of the following goals: negotiating conversion of the convertible notes issued in the Additional Financing, securing a release with respect to the consulting agreement with Gray Capital Partners, Inc., securing and closing upon the Financing. All stock options issued to Mr. Tangredi prior to December 31, 2009 were issued under the 2000 Plan. The remaining options were issued under the 2009 Plan.
- (2) All stock options issued to Ms. Norstrud prior to December 31, 2009 were issued under the 2000 Plan. The remaining options were issued under the 2009 Plan.

Director Compensation

The following table sets forth the compensation awarded to, earned by or paid to the directors during the fiscal year ended December 31, 2012.

Name (a)		Fees Earned or Paid in		Option Awards (d)	Non-Equity Incentive Plan Compensation (e)	Change in Pension Value and Non-qualified Deferred Compensation Earnings (f)	All Other Compensation (g)	Total (h)
		Cash (b)	Stock Awards (c)					
Raymond Kazyaka Sr., Director(1)	2012	—	—\$	24,156	—	—	—\$	24,156
Robert W. Schwartz, Director(2)	2012	—	—\$	24,156	—	—	—\$	24,156

(1) At December 31, 2012, Mr. Kazyaka had options to purchase 1,424,600 shares and no stock awards outstanding. Mr. Kazyaka passed away on March 18, 2013.

(2) At December 31, 2012, Mr. Schwartz had options to purchase 1,394,600 shares and no stock awards outstanding.

We do not have a plan pursuant to which our directors are compensated and directors currently do not receive cash compensation for their services on the Board of Directors although they do receive stock options as determined by the full board of directors with each director abstaining from any such vote involving himself or a member of his immediate family. Timothy N. Tangredi, Raymond Kazyaka Sr. and Robert W. Schwartz were each granted an option on November 30, 2012 to purchase 200,000, 250,000 and 250,000 shares of common stock, respectively, at an exercise price of \$0.115 per share. Each option vests immediately upon issuance and is exercisable for a period of ten years. This option grant to Mr. Tangredi as a director is contained in the table summarizing grants made to our officers.

Our non-employee directors are currently compensated with the issuance of stock options, which generally become exercisable upon the date of grant, and which generally expire on the earlier of ten years from the date of grant or up to three years after the date that the optionee ceases to serve as a director. Non-employee directors are also reimbursed for out-of-pocket expenses associated with attending to our business.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS.

Securities Authorized for Issuance under Equity Compensation Plans

The following table sets forth information regarding our 2000 Incentive Compensation Plan (the “2000 Plan”) and our Long-Term Incentive Plan of 2009 (the “2009 Plan”) under which our securities are authorized for issuance as of December 31, 2012.

Security Ownership of Certain Beneficial Owners

The following table sets forth information as of the date of this prospectus as to each person or group who is known to us to be the beneficial owner of more than 5% of our outstanding voting securities and as to the security and percentage ownership of each of our executive officers and directors and of all of our officers and directors as a group.

Beneficial ownership is determined under the rules of the SEC and generally includes voting or investment power over securities. The number of shares shown as beneficially owned in the tables below are calculated pursuant to Rule 13d-3(d)(1) of the Exchange Act. Under Rule 13d-3(d)(1), shares not outstanding that are subject to options, warrants, rights or conversion privileges exercisable within 60 days are deemed outstanding for the purpose of calculating the number and percentage owned by such person, but not deemed outstanding for the purpose of calculating the percentage owned by each other person listed. Except in cases where community property laws apply or as indicated in the footnotes to this table, we believe that each shareholder identified in the table possesses sole voting and investment power over all of the shares of common stock shown as beneficially owned by the shareholder.

The address for each of the persons named below is 11552 Prosperous Drive, Odessa, FL 33556, unless otherwise indicated.

Applicable percentage ownership in the following table is based on approximately 55,509,884 shares of common stock outstanding as of March 29, 2013 plus, for each individual, any securities that individual has the right to acquire within 60 days of March 29, 2013.

Name of Beneficial Owner	Common Stock Beneficially Owned Number of Shares of Common Stock	Percentage of Class
Timothy N. Tangredi (Officer and Chairman) (1)*	12,910,477	18.9%
Judith Norstrud (Officer) (2)*	922,500	1.6%
Ira William McCollum (Director) *	0	0.0%
Robert W. Schwartz (Director) (3)*	1,394,600	2.5%
Executive officers, directors, as a group (4 persons)	15,227,577	21.6%
Michael Gostomski (4) 1666 Valley View Dr. Winona, MN 55987	2,961,785	5.3%
Louis M. Jaffe (5) 1500 S. Ocean Blvd #5201 Boca Raton, FL 33432	3,132,186	5.6%

Green Valley Investment Management Company Limited (9) 951 Old Country Road, Belmont, CA 94002	22,490,350	37.5%

- * Address is Company's principal office at 11552 Prosperous Driver, Odessa, Florida 33556
- (1) Includes 9,620,058 shares of common stock issuable upon exercise of stock options and warrants and 3,283,358 shares beneficially owned by Mr. Tangredi's wife, Patricia Tangredi. 3,135,558 of Ms. Tangredi's shares are issuable upon the exercise of stock options.
 - (2) Includes 922,500 shares of common stock issuable upon exercise of stock options.
 - (3) Includes 1,394,600 shares of common stock issuable upon exercise of stock options.
 - (4) Includes 413,337 common shares issuable upon exercise of certain warrants.
 - (5) Includes 166,500 shares of common stock issuable upon exercise of certain outstanding warrants issued in connection with the Financing to Louis M. Jaffe 2004 Intangible Asset Mgmt. TR U/A DTD 5/24/04 and 298,077 shares of common stock issuable upon exercise of certain outstanding warrants issued in connection with a purchase of Company's common stock in 2009. Also includes 1,819,715 shares held by the aforementioned trust, 250,004 shares held by the Louis Jaffe TTEE Irrevocable Trust – Jennifer Jaffe and 250,004 shares held by the Louis Jaffe TTEE Irrevocable Trust – Lara Jaffe Taylor. The natural person with voting power and investment power on behalf each of the aforementioned trusts is Louis M. Jaffe. Also includes 100,000 shares held by the Diana G. Jaffe Revocable Trust Dated 8/4/99 and 50,000 shares held by Ashlin Trevor Jaffe under the Florida Uniform Gift to Minors Act for which Diana G. Jaffe, Louis M. Jaffe's wife, is the natural person with voting power and investment power on behalf of the trusts and 250,000 shares of common stock issuable on exercise of a certain outstanding warrant issued to Louis M. Jaffe pursuant to a consulting agreement.
 - (6) Includes 3,238,204 shares of common stock, and 2,556,000 shares issuable upon the exercise of certain outstanding warrants. The natural person with voting power and investment power on behalf of Platinum Montaur Life Sciences, LLC is Mark Nordlicht. Platinum Montaur Life Sciences, LLC holds warrants for the purchase of up to 7,999,000 shares of common stock. Among these warrants, excluded from the above table are 5,443,000 shares of common stock issuable upon exercise of those warrants. The warrants as amended have certain limitations on exercise and conversion to the extent the shares resulting from such exercise, when aggregated with its other holdings, would result in Platinum Montaur Life Sciences, LLC holding in excess of 9.99% of all our common stock on a beneficially converted basis. These limitations on exercise of certain warrants may be waived by the holder. For purposes of this beneficial ownership table, we have assumed the exercise by Platinum Montaur Life Sciences, LLC of its warrants for the maximum number of shares it may acquire and hold at one time (9.99%).
 - (7) Includes 155,000 shares of common stock issuable upon exercise of certain outstanding warrants. All of the foregoing warrants are held in the name of Leah Kaplan-Samuels and Leonard Samuels JTWROS. The natural persons with voting power and investment power on behalf of Leah Kaplan-Samuels and Leonard Samuels JTWROS are Leah Kaplan-Samuels and Leonard Samuels. Also includes 5,860,969 shares of common stock and 1,237,500 shares of common stock issuable upon exercise of certain outstanding warrants issued to shareholder RBC Dain – Custodian for Leonard Samuels IRA.
 - (8) Includes 155,000 shares of common stock issuable upon exercise of warrants. All of the foregoing warrants are held in the name of Leah Kaplan-Samuels and Leonard Samuels JTWROS. The natural persons with voting power and investment power on behalf of Leah Kaplan-Samuels and Leonard Samuels JTWROS are Leah Kaplan-Samuels and Leonard Samuels.
 - (9) Includes 4,498,070 shares issuable upon the exercise of certain outstanding warrants. The natural person with voting power and investment power on behalf of Green Valley International Investment Management Company Limited is Fuying Yu.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE.

We rent a building on a month to month basis from a related party which is wholly-owned by two shareholders of the Company, one of which is Timothy N. Tangredi, our Chief Executive Officer. The base monthly rent expense is \$4,066 per month, including sales tax. We also pay the taxes, insurance and most repairs on the building. For the years ended December 31, 2012, 2011 and 2010, we recorded \$48,792 and \$48,792, in rent expense to this related party, respectively. At December 31, 2012 and December 31, 2011, \$82,195 and \$58,991, respectively, were included in accounts payable for amounts owed to these shareholders for rent.

Timothy N. Tangredi, our Chief Executive Officer and Chairman, is a founder and a member of the board of directors of Aegis BioSciences, LLC (“Aegis”). Mr. Tangredi currently owns 52% of Aegis’ outstanding equity and spends approximately one to two days per month on Aegis business for which he is compensated by Aegis. Aegis has two exclusive, world-wide licenses from us under which it has the right to use and sell products containing our polymer technologies in biomedical and health care applications. As a result of a \$150,000 payment made by Aegis, the first license is considered fully paid and as such no additional license revenue will be forthcoming. Pursuant to the second license Aegis made an initial one-time payment of \$50,000 and is to make royalty payments of 1.5% of the net sales price it receives with respect to any personal hygiene product, surgical drape or clothing products (the latter when employed in medical and animal related fields) and license revenue it receives should Aegis grant a sublicense to a third party. To date Aegis has sold no such products nor has it received any licensing fees requiring a royalty payment be made to us.

In November of 2012, the Company issued, in connection with a private offering, 17,500,000 shares to Green Valley International Investment Management Company Limited (“GVI”) for \$1,750,000 in cash and the Company has recorded a common stock payable for an additional amount of \$19,255 of cash received. In addition, under the terms of the private placement offering, GVI also received a warrant to purchase 4,375,000 shares of the Company’s common stock with an exercise period of five years from the date of issue at an exercise price of \$.30 per share. In 2013, pursuant to the terms and conditions of this offering, Company sold and issued 492,280 shares of common stock to GVI together with a warrant to purchase 123,070 shares of the Company’s common stock with an exercise period of five years from the date of issue at an exercise price of \$.30 per share for a cash payment of \$49,228.

On October 30, 2012, the Company and MG Energy LLC, a Delaware limited liability company (“MG Energy”), entered into the License and Supply Agreement (the “Agreement”), effective October 26, 2012 as discussed in Note 12.

As consideration for the Agreement, MG Energy agreed to retire the 2012 Note including all interest accrued thereon, issued by the Company to the investor, who assigned the 2012 Note to MG Energy, a company in which a shareholder of the Company holds a position. This retirement is nonrefundable and noncreditable. Coincident with the retirement of the 2012 Note, the related patent security agreement was terminated. In accordance with ASC Subtopic 470-50, Debt Modifications and Extinguishments, the Company determined the reacquisition price of the debt to be equal to the fair value of the debt as it was more clearly evident than the fair value of the License and Supply Agreement. The fair value of the debt approximated its carrying value and, accordingly, there was no gain or loss on the extinguishment of the debt.

On July 13, 2012, the Company issued a secured convertible promissory note and patent security agreement (collectively, the “Agreements”) to an investor who is a shareholder of the Company. Pursuant to the terms and subject to the conditions set forth in the Agreements, the investor provided a loan in the amount of \$2,000,000 to the Company, which is secured by all current and future patents, patent applications and similar protections of the Company and all rents, royalties, license fees and “accounts” with respect to such intellectual property assets. Pursuant to the secured convertible promissory note (the “2012 Note”), interest in the amount of 6% per annum, calculated on a

365 day year, and the principal amount of \$2,000,000 and accrued interest will be paid on or before October 15, 2012, subsequently extended to October 26, 2012. The investor has the right to convert principal and accrued interest into the Company's common stock at \$0.26 per share. The initial conversion price may be adjusted pursuant to standard anti-dilution provisions. The proceeds of this 2012 Note were used in part to pay, in full, all outstanding principal and interest due pursuant to the Secured Note issued March 22, 2011.

The Company performed an analysis pursuant to ASC 815 in order to determine whether the embedded conversion option included in the 2012 Note is required to be accounted for separately from the host contract and recorded on the balance sheet at fair value. The Company concluded that the embedded conversion option did not meet the requirements for such classification.

Pursuant to the patent security agreement, the Company shall not, without the Investor's prior consent, sell, dispose or otherwise transfer all or any portion of the Collateral, except for license grants in the ordinary course of business. In addition, the Company will take all actions reasonably necessary to prosecute to allowance applications for patents and maintain all patents, and to seek to recover damages for infringement, misappropriation or dilution of the Collateral with limited exceptions.

In December 2009, the Company entered into \$1,000,000 unsecured note payable with an investor which carried interest at 10% per annum. On March 22, 2011, the Company entered into a securities amendment and exchange agreement and an amended and restated convertible promissory note (collectively "Exchange Agreements") with the investor. Pursuant to the terms and subject to the conditions set forth in the Exchange Agreements, the Company and the investor amended and restated the \$1,000,000 unsecured promissory note to, among other things, add a conversion option and extend the maturity date (as amended and restated, the "2011 Convertible Note"). The initial conversion price is \$0.26 per share, which is subject to adjustment for standard anti-dilution provisions. Interest in the amount of 10% per annum, commencing on December 17, 2009 and calculated on a 365 day year, and the principal amount of \$1,000,000 was due in full on March 22, 2012, which was subsequently extended to May 7, 2012. The Company did not repay the 2011 Convertible Note by May 7, 2012 and on June 15, 2012, the Company entered into a forbearance agreement with the investor as discussed below.

On March 22, 2011, in connection with the above Exchange Agreements, the Company entered into amendments to existing warrant agreements with the investor to extend the terms of the existing stock purchase warrants, dated on or about December 31, 2007 and March 12, 2009, respectively, to March 22, 2016 and to provide for cashless exercise unless such warrant shares are registered for resale under a registration statement. In addition, on March 22, 2011, the Company issued an additional stock purchase warrant to the investor. Subject to the terms of the warrant, the investor may purchase 1,000,000 shares of the Company's common stock at \$0.45 per share, exercisable commencing on the earliest of the consummation of the qualified offering (as defined in the Exchange Agreements), the date of conversion of the 2011 Convertible Note in full, or the date of conversion of the Convertible Note by the investor in the greatest number of shares of the Company's common stock not to exceed 9.99% beneficial ownership of Company outstanding common stock and terminating on March 22, 2016.

The 2011 Convertible Note is a hybrid financial instruments that blends characteristics of both debt and equity securities. The note embodies settlement alternatives to the holder providing for either redemption of principal and interest in cash (forward component) or conversion into the Company's common stock (embedded conversion feature). The forward component was valued using the present value of discounted cash flows arising from the contractual principal and interest payment terms and the embedded conversion feature was valued using the Monte Carlo simulation method. The fair value of the 2011 Convertible Note was estimated to be \$1,964,905 on the date of the exchange, which resulted in a loss on extinguishment of debt of \$964,905. Further, in accordance with ASC 470-20-25 and ASC 470-50-40, the net premium of \$964,905 associated with the 2011 Convertible Note was reclassified to capital in excess of par value under the presumption that such net premium represented a capital contribution. Consequently, the 2011 Convertible Note is being carried at face value. The fair value of the additional warrant to purchase 1,000,000 shares and the value associated with the previously issued warrants that were amended was determined to be \$716,890 using the Black-Scholes option model and is included in the aggregate loss on extinguishment of \$1,681,795. Since the loan is held by a related party, the loss on extinguishment has been treated as a capital transaction and, as a result, this transaction had no net effect on capital in excess of par value.

Also, on March 22, 2011, the Company entered into a 10% note and warrant purchase agreement, secured convertible promissory note (the "Secured Note") and a patent security agreement ("Financing Agreements") with the investor. Pursuant to the terms and subject to the conditions set forth in the Financing Agreements, the investor provided a loan in the principal amount of \$1,500,000 to the Company, which was secured by all patents, patent applications and similar protections of the Company and all rents, royalties, license fees and "accounts" with respect to such intellectual property assets. The initial conversion price is \$0.26 per share, which is subject to adjustment for standard anti-dilution provisions. Interest in the amount of 10% per annum, calculated on a 365 day year, and the principal amount of \$1,500,000 was due and payable on March 22, 2012, subsequently extended to May 7, 2012. The Company did not repay the Secured Note by May 7, 2012 and on June 15, 2012, the Company entered into a forbearance agreement with the investor as discussed below.

On March 22, 2011, in connection with the Financing Agreements, the Company issued a stock purchase warrant to the investor to purchase 3,000,000 shares of the Company's common stock at \$0.45 per share, exercisable until March 22, 2016. The Warrant was fair valued on the date of issuance, which amounted to \$1,204,787. The warrant value was recorded as a debt discount based on the relative fair value of the warrant to the total proceeds received, which amounted to \$435,240. The warrant was fair valued using the Black-Scholes-Merton valuation model. In addition, the debt contained a beneficial conversion feature, which was valued at the date of issuance at \$1,762,163; however, since this amount is in excess of the net value of the debt less the warrant discount, the beneficial conversion feature will be limited to \$1,064,760 and recorded as a discount on the loan. The total debt discount of \$1,500,000 is being amortized using the effective interest method over the 12-month term of the Secured Note. For the years ended December 31, 2012 and 2011, the Company recognized \$358,555 and \$1,141,445, respectively, in additional expense representing amortization of this debt discount, respectively.

The fair value of warrants issued in 2011 related to the above debt transactions were calculated using the Black-Scholes model with the following assumptions: Expected life in years: 5-10 years; Estimated volatility 115%-117%, Risk-free interest rate: 1.89%-2.07%; Dividend yield: 0%.

Forbearance Agreement

On June 15, 2012, we entered into a forbearance agreement (the "Forbearance Agreement"), with the investor. Under the Forbearance Agreement, the investor agreed to forebear from disposing of or selling any collateral secured by the patent security agreement until the earliest of: (i) July 15, 2012; (ii) two business days after our receipt of a written notice after any subsequent event of default, (iii) two business days after our receipt of a written notice that any representations, warranties or information we provided to the investor in any document or instrument in connection with the Forbearance Agreement is materially false, incomplete or misleading, (iv) two business days after our receipt of a written notice that a proceeding or other action has been commenced by any creditor against us, other than the investor (v) the date on which a court enters an order for relief or take any similar action in respect of us in an involuntary case under any applicable bankruptcy law, or (vi) the date on which a petition for relief under any applicable bankruptcy, is filed by or against us, each as further described in the Forbearance Agreement.

In connection with the Forbearance Agreement, interest on the 2011 Convertible Note and the Secured Note was increased to 20% per annum effective June 14, 2012.

On July 13, 2012 we paid in full all principal and interest due pursuant to the Secured Note and the patent security agreement was terminated. On October 29, 2012 we paid in full all principal and interest due pursuant to the 2011 Convertible Note. Upon payment of the 2011 Convertible Note the Forbearance Agreement was terminated.

Employment Agreements

In addition we have the following employment agreements with our officers and significant employees:

Timothy N. Tangredi. We are party to an employment agreement with Mr. Tangredi, our President, Chief Executive Officer, and director. The employment agreement, as amended and restated on September 14, 2011, sets forth Mr. Tangredi's compensation level and eligibility for salary increases, bonuses, benefits, and option grants. Mr. Tangredi's employment agreement provides for an initial term of three years commencing on September 14, 2011 with the term extending on the second anniversary thereof for an additional two-year period and on each subsequent anniversary of the commencement date for an additional year period. Mr. Tangredi's initial base salary is \$200,000. Mr. Tangredi's base salary shall be increased annually, if applicable, by a sum equal to his current base salary multiplied by one third of the percentage increase in our yearly revenue compared to our prior fiscal year revenue; provided however any annual increase in Mr. Tangredi's base salary shall not exceed a maximum of 50% for any given year. Any further increase in Mr. Tangredi's base salary shall be at the sole discretion of our board of directors or compensation committee (if applicable). Additionally, at the discretion of our board of directors and its compensation committee, Mr. Tangredi may be eligible for an annual bonus, if any, of up to 100% of his then-effective base salary, if he meets or exceeds certain annual performance goals established by the board of directors. In addition to this bonus, Mr. Tangredi may be eligible for a separate merit bonus if approved by the board of directors, for specific extraordinary events or achievements such as a sale of a division, major license or distribution arrangement or merger. Mr. Tangredi is entitled to medical, disability and life insurance, as well as four weeks of paid vacation annually, an automobile allowance, reimbursement of all reasonable business expenses, automobile insurance and maintenance, and executive conference or educational expenses. Under his employment agreement, in addition to any other compensation which he may receive, if we complete a secondary public offering Mr. Tangredi will be granted an option under our 2009 Plan to purchase up to 520,000 shares of our common stock with an exercise price equal to the fair market value per share on the date of grant. This option will become vested and exercisable in thirds, with one third vested upon grant, another third at the one-year anniversary of the grant, and another third upon the second anniversary of the grant. The option shall have a term of ten years, shall be exercisable for up to three years after termination of employment (unless termination is for cause, in which event it shall expire on the date of termination), shall have a "cashless" exercise feature, and shall be subject to such additional terms and conditions as are then applicable to options granted under such plan provided they do not conflict with the terms set forth in the agreement.

If Mr. Tangredi's employment is terminated for any reason, we will be obligated to pay him his accrued but unpaid base salary, bonus and accrued vacation pay, and any unreimbursed expenses ("Accrued Sums").

In addition to any Accrued Sums owed, if Mr. Tangredi's employment is terminated by us in the event of his disability or without cause or by Mr. Tangredi for good reason, he shall be entitled to:

- (i) an amount equal to the sum of (A) the greater of 150% of the base salary then in effect or \$320,000 plus (B) the cash bonus and/or merit bonus, if any, awarded for the most recent year;
- (ii) health and life insurance, a car allowance and other benefits set forth in the agreement until two years following termination of employment, and thereafter to the extent required by COBRA or similar statute; and
- (iii) all stock options, to the extent they were not exercisable at the time of termination of employment, shall become exercisable in full.

In addition to any Accrued Sum owed, in the event of termination upon death, Mr. Tangredi shall be entitled to (i) and (iii) above.

In addition to any Accrued Sums owed, in the event that Mr. Tangredi elects to terminate employment within one year following a change in control, he shall receive a lump sum payment equal to the sum of (a) the greater of his then current base salary or \$210,000 plus (b) the cash bonus and merit bonus, if any, awarded in the most recent year. In addition, he will be entitled to (ii) and (iii) above.

The employment agreement also contains customary covenants restricting the use of our confidential information and solicitation of employees, which are similarly applicable to our other executive officers. In addition we are obligated to indemnify Mr. Tangredi for any claims made against him in connection with his employment with us, to advance indemnification expenses, and maintain his coverage under our directors' and officers' liability insurance policy.

Under the employment agreement, we and Mr. Tangredi have agreed that we will retain an independent compensation consultant, whose recommendations shall be obtained by January 31, 2012 which may modify the compensation program for Mr. Tangredi and other officers, subject to certain conditions including approval of the board of directors. Notwithstanding the recommendation and board consideration, Mr. Tangredi has the right to continue the current terms of the employment agreement. No amendment has been made as of the date of this filing.

Patricia K. Tangredi. We are a party to an employment agreement with Patricia Tangredi, wife of Timothy Tangredi, our Chief Executive Officer. The employment agreement, as amended and restated on April 8, 2011, sets forth Ms. Tangredi's compensation level and eligibility for salary increases, bonuses, benefits, and option grants. Ms. Tangredi's employment agreement provides for an initial term of four years with the term extending on the fourth anniversary thereof for an additional one year period and on each subsequent anniversary of the agreement for an additional year period. Ms. Tangredi's initial base salary is \$120,000, with an increase to \$150,000 per annum or such higher sum as our board of directors may set after the date on which we obtain \$10 million or more in equity or debt financing. Ms. Tangredi is entitled to, and we will pay 50% of her, medical, vision, dental, accidental death and travel insurance as provided under company plans. In addition, Ms. Tangredi is eligible to receive four weeks of paid vacation annually. In addition to any other compensation which she may receive under the agreement, Ms. Tangredi shall be granted options to purchase a minimum of 50,000 shares of our common stock which shall be issued at year end or upon the anniversary of this agreement, as the parties shall agree. These options shall be immediately exercisable, have a term of ten years, shall be exercisable for up to three years after termination of employment (unless termination is for cause, in which event they shall expire on the date of termination), and shall be subject to such additional terms and conditions as are then applicable to options granted under such plan provided they do not conflict with the terms set forth in the agreement.

If Ms. Tangredi's employment is terminated for any reason, we will be obligated to pay her accrued but unpaid base salary, bonus and accrued vacation pay, and any unreimbursed expenses ("Accrued Sums").

In addition to any Accrued Sums owed, if Ms. Tangredi's employment is terminated by us in the event of her disability or without cause or by Ms. Tangredi for good reason, Ms. Tangredi shall also be entitled to:

- (i) an amount equal to the greater of the base salary then in effect or \$150,000;
- (ii) continuation of the health and other insurance coverage and other benefits set forth in the agreement until one year following termination of employment or resignation, and beyond such one year period to the extent required by COBRA or similar statute; and
- (iii) all stock options, to the extent they were not exercisable at the time of termination of employment, shall become exercisable in full and shall remain exercisable for a period of three years following the date of termination or resignation.

In addition to any Accrued Sum owed, in the event of termination upon death, Ms. Tangredi shall be entitled to (i) and (iii) above.

In addition to any Accrued Sums owed, in the event that Ms. Tangredi elects to terminate employment within six months following a change in control, she shall receive a lump sum payment equal to three times the sum of the greater of her then current base salary or \$150,000. In addition, she will be entitled to (ii) and (iii) above.

The employment agreement also contains customary covenants restricting the use of our confidential information and solicitation of employees, which are similarly applicable to our other executive officers. In addition we are obligated to indemnify Ms. Tangredi for any claims made against her in connection with her employment with us, to advance indemnification expenses, and maintain her coverage under our directors' and officers' liability insurance policy.

There are no material relationships between us and our directors or executive officers except as previously discussed herein.

Since the beginning of our last fiscal year, we have not been a participant in any transaction, or proposed transaction, not disclosed herein in which any related person had or will have a direct or indirect material interest and in which the amount involved exceeds the lesser of \$120,000 or one percent of our total assets at year end for the last two completed fiscal years.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES.

Audit Fees

The aggregate audit fees billed for the years ended December 31, 2012 and 2011 was \$60,450 and \$42,000, respectively. Audit services include the audits of the financial statements included in the Company's annual reports on Form 10-K and reviews of interim financial statements included in the Company's quarterly reports on Form 10-Q.

Audit-Related Fees

None.

Tax Fees

None

All Other Fees

Aggregate other fees billed for the year ended December 31, 2012 and 2011 was \$10,919 and \$20,571, respectively for general consulting services related to the filing of our registration statements and other general questions.

Audit Committee Pre-Approval Policies and Procedures

We do not have an audit committee and, as a result, our Board of Directors evaluates the scope and cost of the engagement before the auditor renders audit or non-audit services. The Board of Directors has considered the services provided by CFR as disclosed above in the captions audit fees and all other fees and has concluded that such services are compatible with the independence of CFR as our principal accountant.

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders
Dais Analytic Corporation
Odessa, Florida

We have audited the accompanying balance sheets of Dais Analytic Corporation (“the Company”) as of December 31, 2012 and 2011, and the related statements of operations, stockholders’ deficit, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal controls over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Dais Analytic Corporation as of December 31, 2012 and 2011, and the results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 2, the Company has incurred significant losses since inception and has a stockholders’ deficit of \$2,928,934 at December 31, 2012. These factors raise substantial doubt about the Company’s ability to continue as a going concern. Management’s plans in regard to these matters are also discussed in Note 2. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

The accompanying notes are an integral part of these financial statements.

Dais Analytic Corporation
Notes to Financial Statements
Years Ended December 31, 2012 and 2011

1. Background Information

Dais Analytic Corporation (the “Company”), a New York corporation, has developed and is commercializing applications using its nano-structure polymer technology. The first commercial product is an energy recovery ventilator (“ERV”) (cores and systems) for use in commercial Heating, Ventilating, and Air Conditioning (HVAC) applications. In addition to direct sales, the Company licenses its nano-structured polymer technology to strategic partners in the aforementioned application and is in various stages of development with regard to other applications employing its base technologies. The Company was incorporated in April of 1993 with its corporate headquarters located in Odessa, Florida.

The Company is dependent on third parties to manufacture the key components needed for our nano-structured based materials and value added products made with these materials. Accordingly, a supplier’s failure to supply components in a timely manner, or to supply components that meet our quality, quantity and cost requirements or our technical specifications, or the inability to obtain alternative sources of these components on a timely basis or on terms acceptable to us, would create delays in production of our products or increase our unit costs of production. Certain of the components contain proprietary products of our suppliers, or the processes used by our suppliers to manufacture these components are proprietary. If we are required to replace any of our suppliers, while we should be able to obtain comparable components from alternative suppliers at comparable costs, this would create a delay in production.

For each of the years ended December 31, 2012 and 2011, four customers accounted for approximately 60% (four customers represented the following percentages of sales 6%, 7%, 8%, and 39%) and 57% (four customers represented the following percentages of sales 18%, 15%, 12% and 12%) of the Company’s total revenue, respectively. At December 31, 2012 and 2011 amounts due from these customers was approximately 57% and 51% of total accounts receivable, respectively.

2. Going Concern and Management’s Plans

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. For the year ended December 31, 2012, the Company generated net income of \$21,339 however; the Company has incurred significant losses since inception and without the noncash gain from the change in the fair value of the warrant liability of \$1,888,218, we would have a net loss for the current year. As of December 31, 2012, the Company has an accumulated deficit of \$37,951,827, positive working capital of \$245,365 and a stockholders’ deficit of \$2,928,934. The Company used \$1,167,650 and \$1,329,734 of cash in operations during 2012 and 2011, respectively, which was funded by proceeds from debt and equity financings. There is no assurance that such financing will be available in the future. In view of these matters, there is substantial doubt that the Company will continue as a going concern. The Company is currently pursuing the following sources of short and long-term working capital:

1. We are currently holding preliminary discussions with parties who are interested in licensing, purchasing the rights to, or establishing a joint venture to commercialize certain applications of our technology.
2. We are seeking growth capital from certain strategic and/or government (grant) related sources. In addition to said capital, these sources may, pursuant to any agreements that may be developed in conjunction with such funding, assist in the product definition and design, roll-out, and channel penetration of our products.

The Company's ability to continue as a going concern is highly dependent on our ability to obtain additional sources of cash flow sufficient to fund our working capital requirements. However, there can be no assurance that the Company will be successful in its efforts to secure such cash flow. Any failure by us to timely procure additional financing or investment adequate to fund our ongoing operations, including planned product development initiatives and commercialization efforts, will have material adverse consequences on our financial condition, results of operations and cash flows.

The financial statements of the Company do not include any adjustments relating to the recoverability and classification of recorded assets, or the amounts and classifications of liabilities that might be necessary should the Company be unable to continue as a going concern.

3. Significant Accounting Policies

The significant accounting policies followed are:

Use of estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and cash equivalents - For purposes of the Statements of Cash Flows, the Company considers all highly liquid debt instruments with a maturity of three months or less to be cash equivalents. Cash and cash equivalents are maintained at financial institutions and, at times, balances may exceed federally insured limits. The Company has never experienced any losses related to these balances. All non-interest bearing cash balances were fully insured at December 31, 2012 due to a temporary federal program in effect from December 31, 2010 through December 31, 2012. Under the program, there is no limit to the amount of insurance for eligible accounts. Beginning 2013, insurance coverage will revert to \$250,000 per depositor at each financial institution, and the Company's non-interest bearing cash balances may again exceed federally insured limits.

Accounts receivable - Accounts receivable consist primarily of receivables from the sale of our ERV products. The Company regularly reviews accounts receivable for any bad debts based on an analysis of the Company's collection experience, customer credit worthiness, and current economic trends. After all attempts to collect a receivable have failed, the receivable is written off against the allowance. Based on management's review of accounts receivable, we have recorded an allowance for doubtful accounts of \$2,576 and \$24,771 at December 31, 2012 and 2011.

Inventory - Inventory consists of raw materials and work-in-process and is stated at the lower of cost, determined by first-in, first-out method, or market. Market is determined based on the net realizable value, with appropriate consideration given to obsolescence, excessive levels, deterioration and other factors. At December 31, 2012 and 2011, the Company had \$90,124 and \$9,344 of in-process inventory, respectively. A reserve is recorded for any inventory deemed excessive or obsolete. No reserve is considered necessary at December 31, 2012 and 2011.

Property and equipment - Property and equipment are recorded at cost. Depreciation is calculated using the straight-line method over the estimated useful lives of the assets ranging from 5 to 7 years. Depreciation expense was approximately \$36,000 for each of the years ended December 31, 2012 and 2011, respectively. Gains and losses upon disposition are reflected in the statement of operations in the period of disposition. Maintenance and repair expenditures are charged to expense as incurred.

Intangible assets - Identified intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. The Company's existing intangible assets consist solely of patents. Patents are amortized over their estimated useful or economic lives of 17 years. Patent amortization expense was approximately \$24,800 and \$16,700 for the years ended December 31, 2012 and 2011, respectively. Total patent amortization expense for the next five years is estimated to be approximately \$25,000 per year.

Long-lived assets - Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the book value of the asset may not be recoverable. The Company periodically evaluates whether events and circumstances have occurred that indicate possible impairment. When impairment indicators exist, the Company uses market quotes, if available or an estimate of the future undiscounted net cash flows of the related asset or asset group over the remaining life in measuring whether or not the asset values are recoverable. During the years ended December 31, 2012 and 2011, the Company recognized \$62,288 and \$0, respectively, in impairment costs.

Research and development expenses, and grant proceeds - Expenditures for research, development, and engineering of products are expensed as incurred. For the years ended December 31, 2012 and 2011, the Company incurred research and development costs of approximately \$521,100 and \$821,400, respectively. The Company accounts for proceeds received from government grants for research as a reduction in research and development costs. For the years ended December 31, 2012 and 2011, the Company recorded approximately \$67,200 and \$769,200, respectively, in grant proceeds against research and development expenses on the statements of operations.

On September 17, 2010, the U.S. Department of Energy approved a grant of up to \$681,322 to the Company for the funding of a project to scale up, in size and field trial, a dehumidification system similar to the Company's NanoAir prototype. The grant is conditioned upon the Company contributing \$171,500 of the proposed total project cost of \$852,822. For the years ended December 31, 2012 and 2011, the Company has incurred \$781 and \$601,059, respectively, in expenses and recognized the same amount as a reduction to research and development expense related to this grant award. This grant has been fully expended as of December 31, 2012.

In December 2010, Pasco County Florida approved a grant of \$254,500 to the Company for the funding of the NanoAir product into commercialization. The grant from Pasco County requires us to pay the county 2% of the gross sales of products using a certain unique pump assembly for 5 years or for a total of \$1,000,000 whichever comes first. For the years ended December 31, 2012 and 2011, the Company has incurred \$66,459 and \$168,095, respectively, in expenses and recognized the same amount as a reduction to research and development expense related to this grant award. This grant has been fully expended as of December 31, 2012.

Stock issuance costs - Stock issuance costs are recorded as a reduction of the related proceeds through a charge to stockholders' equity.

Common stock - The Company records common stock issuances when all of the legal requirements for the issuance of such common stock have been satisfied.

Revenue recognition - Generally, the Company recognizes revenue for its products upon shipment to customers, provided no significant obligations remain and collection is probable.

Our ConsERV product typically carries a warranty of two years for all parts contained therein with the exception of the energy recovery ventilator core which typically carries a 10 year warranty. The warranty includes replacement of defective parts. The Company has recorded an accrual of approximately \$92,800 and \$47,400 for future warranty expenses at December 31, 2012 and 2011, respectively.

Revenue derived from the sale of licenses is deferred and recognized as revenue on a straight-line basis over the life of the license, or until the license arrangement is terminated. The Company recognized revenue of \$103,640 and \$82,000, respectively, from license agreements for the years ended December 31, 2012 and 2011.

The Company accounts for revenue arrangements with multiple elements under the provisions of the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 605-25, "Revenue Recognition—Multiple-Element Arrangements." In order to account for these agreements, the Company must identify the deliverables included within the agreement and evaluate which deliverables represent separate units of accounting based on if certain criteria are met, including whether the delivered element has stand-alone value to the licensee. The consideration received is allocated among the separate units of accounting, and the applicable revenue recognition criteria are applied to each of the separate units.

Government Grants - Grants are recognized when there is reasonable assurance that the grant will be received and that any conditions associated with the grant will be met. When grants are received related to property and equipment, the Company reduces the basis of the assets on the balance sheet, resulting in lower depreciation expense over the life of the associated asset. Grants received related to expenses are reflected as a reduction of the associated expense in the period in which the expense is incurred.

Stock based compensation - The Company recognizes all share-based payments to employees, including grants of employee stock options, as compensation expense in the financial statements based on their fair values. That expense will be recognized over the period during which an employee is required to provide services in exchange for the award, known as the requisite service period (usually the vesting period).

The value of each grant is estimated at the grant date using the Black-Scholes option model with the following assumptions for options granted during the years ended December 31, 2012 and 2011:

	Years Ended December 31,			
	2012		2011	
Dividend rate	0	%	0	%
	.61%	–	1.45%	–
Risk free interest rate	1.04	%	2.93	%
Expected term	5 – 6.5 years		6.5 – 10 years	
	123%	–	180%	–
Expected volatility	125	%	189	%

The basis for the above assumptions are as follows: the dividend rate is based upon the Company's history of dividends; the risk-free interest rate for periods within the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of grant; the expected term was calculated based on the Company's historical pattern of options granted and the period of time they are expected to be outstanding; and expected volatility was calculated based upon historical trends in the Company's common stock, as well as a peer company's historical common stock activity.

Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Based on historical experience of forfeitures, the Company estimated forfeitures at 0% for each of the years ended December 31, 2012 and 2011.

Non-employee stock-based compensation - The Company's accounting policy for equity instruments issued to consultants and vendors in exchange for goods and services follows the provisions of ASC 505-50 Equity-Based Payments to Non-Employees. Stock-based compensation related to non-employees is accounted for based on the fair value of the related stock or options or the fair value of the services, whichever is more readily determinable. The measurement date for the fair value of the equity instruments issued is determined at the earlier of (i) the date at which a commitment for performance by the consultant or vendor is reached or (ii) the date at which the consultant or vendor's performance is complete. In the case of equity instruments issued to consultants, the fair value of the equity instrument is recognized over the term of the consulting agreement.

The fair value of stock options issued to consultants in 2012 was calculated using the Black-Scholes model with the following assumptions: Expected life in years: 10 years; Estimated volatility 110%; Risk-free interest rate: 1.62%; Dividend yield: 0%. There was no stock-based compensation issued to non-employees in conjunction with selling goods or services during the year ended December 31, 2011.

Financial instruments - The Company accounts for financial instruments in accordance with FASB Accounting Standards Codification (ASC) 820 "Fair Value Measurements and Disclosures" (ASC 820). ASC 820 (as amended in May 2011) defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. ASC 820 was amended to clarify the application of existing fair value measurements and to change certain fair value measurement and disclosure requirements. Amendments that change measurement and disclosure requirements relate to (i) fair value measurement of financial instruments that are managed within a portfolio, (ii) application of premiums and discounts in a fair value measurement, and (iii) additional disclosures about fair value measurements categorized in Level 3 of the fair value hierarchy. ASC 820 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC 820 also establishes a fair value hierarchy that distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (2) an entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

Level 1 - Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates); and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs that are both significant to the fair value measurement and unobservable.

Fair value estimates discussed herein are based upon certain market assumptions and pertinent information available to management as of December 31, 2012. The Company uses the market approach to measure fair value for its Level 1 financial assets and liabilities, which include cash equivalents of \$372 at December 31, 2012. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets

and liabilities.

The respective carrying value of certain on-balance sheet financial instruments approximated their fair values due to the short-term nature of these instruments. These financial instruments include cash, accounts receivable, other receivables, accounts payable, accrued compensation and accrued expenses. The fair value of the Company's non convertible notes payable is estimated based on current rates that would be available for debt of similar terms which is not significantly different from its stated value. The fair value of the Company's convertible notes payable is discussed in Note 7.

The Company's financial liabilities measured at fair value consisted of the following as of December 31, 2012 and were valued as discussed in Note 11. Due to the fact that as of December 31, 2012 there is only one month remaining until the warrants expire, and therefore, changes to unobservable inputs would not result in a significantly higher or lower fair value measurement.

82

Fair Value Measurements at December 31, 2012

	Total carrying value	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Warrant liability	\$ —	\$ —	\$ —	\$ —

A reconciliation of the beginning and ending fair values of financial instruments valued using significant unobservable inputs (Level 3) is presented as follows:

	Warrant Liability
Balance at December 31, 2011	\$ 1,888,218
Changes in fair value	(1,888,218)
Balance at December 31, 2012	\$ —

Income taxes - Income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due plus deferred taxes resulting from temporary differences. Such temporary differences result from differences in the carrying value of assets and liabilities for tax and financial reporting purposes. The deferred tax assets and liabilities represent the future tax consequences of those differences, which will either be taxable or deductible when the assets and liabilities are recovered or settled. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized.

The Company identifies and evaluates uncertain tax positions, if any, and recognizes the impact of uncertain tax positions for which there is a less than more-likely-than-not probability of the position being upheld when reviewed by the relevant taxing authority. Such positions are deemed to be unrecognized tax benefits and a corresponding liability is established on the balance sheet. The Company has not recognized a liability for uncertain tax positions. If there were an unrecognized tax benefit, the Company would recognize interest accrued related to unrecognized tax benefits in interest expense and penalties in operating expenses. The Company's remaining open tax years subject to examination by the Internal Revenue Service include the years ended December 31, 2009 through 2012.

Earnings (loss) per share - Basic income (loss) per share is computed by dividing net income (loss) attributable to common stockholders by the weighted average common shares outstanding for the period. Diluted income (loss) per share is computed giving effect to all potentially dilutive common shares. Potentially dilutive common shares may consist of incremental shares issuable upon the exercise of stock options and warrants and the conversion of notes payable to common stock. In periods in which a net loss has been incurred, all potentially dilutive common shares are considered anti-dilutive and thus are excluded from the calculation. Common share equivalents of 36,966,415 and 54,641,797 were excluded from the computation of diluted earnings per share for the years ended December 31, 2012 and 2011, respectively, because their effect is anti-dilutive.

The following sets forth the computation of basic and diluted net earnings (loss) per common share for the years ended December 31, 2012 and 2011:

	For the Years Ended December 31,	
Numerator:	2012	2011

Edgar Filing: DAIS ANALYTIC CORP - Form 10-K

Net income (loss)	\$	21,339	\$	(2,335,204))
Denominator:				
Weighted average basic shares outstanding		40,022,085		35,793,914
Potential shares under stock options		4,184,058		—
Less shares assumed repurchased under the treasury stock method		(2,926,152)		—
Weighted average fully diluted shares outstanding		41,279,991		35,793,914
Net income (loss) per common share - basic	\$	0.00	\$	(0.07))
Net income (loss) per common share - diluted	\$	0.00	\$	(0.07))

83

Derivative Financial Instruments - The Company does not use derivative instruments to hedge exposure to cash flow, market or foreign currency risk. Terms of convertible promissory note instruments are reviewed to determine whether or not they contain embedded derivative instruments that are required under ASC 815 "Derivative and Hedging" (ASC 815) to be accounted for separately from the host contract, and recorded on the balance sheet at fair value. The fair value of derivative liabilities, if any, is required to be revalued at each reporting date, with corresponding changes in fair value recorded in current period operating results.

Freestanding warrants issued by the Company in connection with the issuance or sale of debt and equity instruments are considered to be derivative instruments and are evaluated and accounted for in accordance with the provisions of ASC 815. Pursuant to ASC 815, an evaluation of specifically identified conditions is made to determine whether fair value of warrants issued is required to be classified as equity or as a derivative liability.

Reclassification

Certain reclassifications have been made to the financial statements as of and for the year ended December 31, 2011 to conform to the presentation as of and for the year ended December 31, 2012.

Recent Accounting Pronouncements

Recent accounting pronouncements issued by the Financial Accounting Standards Board (FASB) did not or are not believed by management to have a material impact on the Company's present or future financial statements.

4. Property and Equipment

Property and equipment consist of the following:

	December 31,	
	2012	2011
Furniture and fixtures	\$ 38,764	\$ 38,764
Computer equipment	66,980	66,980
Demonstration equipment	106,841	169,129
Office and lab equipment	217,523	225,523
	430,108	500,396
Less accumulated depreciation	334,551	312,234
	\$ 95,557	\$ 188,162

5. Prepaid Expenses and Other Current Assets

Prepaid expenses and other current assets consist of the following:

	December 31,	
	2012	2011
Prepaid expenses	\$ 10,496	\$ 5,695
Prepaid insurance	35,449	34,012
Deferred loan costs and deferred offering costs	—	175,389
	\$ 45,945	\$ 215,096

6. Accrued Expenses, Other

Accrued expenses, other consists of the following:

	December 31,	
	2012	2011
Accrued expenses, other	\$ 29,946	\$ 18,296
Accrued registration rights penalty	5,000	5,000
Accrued interest, related party	—	320,548
Accrued warranty costs	92,829	47,365
Contractual obligation	13,200	13,200
	\$ 140,975	\$ 404,409

7. Notes Payable

Notes payable consist of the following:

	December 31,	
	2012	2011
Convertible note payable, related party; interest at 10% per annum; repaid during 2012	—	1,000,000
Secured convertible note payable, related party; interest at 10% per annum; repaid during 2012	—	1,500,000
	—	2,500,000
Less unamortized discount	—	(358,555)
Less amounts currently due, net of unamortized discount	—	(2,141,445)
Long-term portion	\$ —	\$ —

Unsecured Note

In December 2009, the Company entered into a \$1,000,000 unsecured note payable with an investor which carried interest at 10% per annum. On March 22, 2011, the Company entered into a securities amendment and exchange agreement and an amended and restated convertible promissory note (collectively "Exchange Agreements") with the investor. Pursuant to the terms and subject to the conditions set forth in the Exchange Agreements, the Company and the investor amended and restated the \$1,000,000 unsecured promissory note to, among other things, add a conversion option and extend the maturity date (as amended and restated, the "2011 Convertible Note"). The initial conversion price is \$0.26 per share, which is subject to adjustment for standard anti-dilution provisions. Interest in the amount of 10% per annum, commencing on December 17, 2009 and calculated on a 365 day year, and the principal amount of \$1,000,000 was due in full on March 22, 2012, which was subsequently extended to May 7, 2012. The Company did not repay the 2011 Convertible Note by May 7, 2012 and on June 15, 2012, the Company entered into a forbearance agreement with the investor as discussed below.

On March 22, 2011, in connection with the above Exchange Agreements, the Company entered into amendments to existing warrant agreements with the investor to extend the terms of the existing stock purchase warrants, dated on or about December 31, 2007 and March 12, 2009, respectively, to March 22, 2016 and to provide for cashless exercise unless such warrant shares are registered for resale under a registration statement. In addition, on March 22, 2011, the Company issued an additional stock purchase warrant to the investor. Subject to the terms of the warrant, the investor may purchase 1,000,000 shares of the Company's common stock at \$0.45 per share, exercisable commencing on the earliest of the consummation of the qualified offering (as defined in the Exchange Agreements), the date of conversion of the 2011 Convertible Note in full, or the date of conversion of the Convertible Note by the investor in the greatest number of shares of the Company's common stock not to exceed 9.99% beneficial ownership of Company outstanding common stock and terminating on March 22, 2016.

The 2011 Convertible Note is a hybrid financial instruments that blends characteristics of both debt and equity securities. The note embodies settlement alternatives to the holder providing for either redemption of principal and interest in cash (forward component) or conversion into the Company's common stock (embedded conversion feature). The forward component was valued using the present value of discounted cash flows arising from the contractual principal and interest payment terms and the embedded conversion feature was valued using the Monte Carlo simulation method. The fair value of the 2011 Convertible Note was estimated to be \$1,964,905 on the date of the exchange, which resulted in a loss on extinguishment of debt of \$964,905. Further, in accordance with ASC 470-20-25 and ASC 470-50-40, the net premium of \$964,905 associated with the 2011 Convertible Note was reclassified to capital in excess of par value under the presumption that such net premium represented a capital contribution. Consequently, the 2011 Convertible Note is being carried at face value. The fair value of the additional warrant to purchase 1,000,000 shares and the value associated with the previously issued warrants that were amended was determined to be \$716,890 using the Black-Scholes option model and is included in the aggregate loss on extinguishment of \$1,681,795. Since the loan is held by a related party, the loss on extinguishment has been treated as a capital transaction and, as a result, this transaction had no net effect on capital in excess of par value.

Secured Note

Also, on March 22, 2011, the Company entered into a 10% note and warrant purchase agreement, secured convertible promissory note (the "Secured Note") and a patent security agreement ("Financing Agreements") with the investor. Pursuant to the terms and subject to the conditions set forth in the Financing Agreements, the investor provided a loan in the principal amount of \$1,500,000 to the Company, which was secured by all patents, patent applications and similar protections of the Company and all rents, royalties, license fees and "accounts" with respect to such intellectual property assets. The initial conversion price is \$0.26 per share, which is subject to adjustment for standard anti-dilution provisions. Interest in the amount of 10% per annum, calculated on a 365 day year, and the principal amount of \$1,500,000 was due and payable on March 22, 2012, subsequently extended to May 7, 2012. The Company did not repay the Secured Note by May 7, 2012 and on June 15, 2012, the Company entered into a forbearance

agreement with the investor as discussed below.

86

On March 22, 2011, in connection with the Financing Agreements, the Company issued a stock purchase warrant to the investor to purchase 3,000,000 shares of the Company's common stock at \$0.45 per share, exercisable until March 22, 2016. The Warrant was fair valued on the date of issuance, which amounted to \$1,204,787. The warrant value was recorded as a debt discount based on the relative fair value of the warrant to the total proceeds received, which amounted to \$435,240. The warrant was fair valued using the Black-Scholes-Merton valuation model. In addition, the debt contained a beneficial conversion feature, which was valued at the date of issuance at \$1,762,163; however, since this amount is in excess of the net value of the debt less the warrant discount, the beneficial conversion feature will be limited to \$1,064,760 and recorded as a discount on the loan. The total debt discount of \$1,500,000 is being amortized using the effective interest method over the 12-month term of the Secured Note. For the years ended December 31, 2012 and 2011, the Company recognized \$358,555 and \$1,141,445, respectively, in additional expense representing amortization of this debt discount, respectively.

The fair value of warrants issued in 2011 related to the above debt transactions were calculated using the Black-Scholes model with the following assumptions: Expected life in years: 5-10 years; Estimated volatility 115%-117%, Risk-free interest rate: 1.89%-2.07%; Dividend yield: 0%.

Forbearance Agreement

On June 15, 2012, we entered into a forbearance agreement (the "Forbearance Agreement"), with the investor. Under the Forbearance Agreement, the investor agreed to forebear from disposing of or selling any collateral secured by the patent security agreement until the earliest of: (i) July 15, 2012; (ii) two business days after our receipt of a written notice after any subsequent event of default, (iii) two business days after our receipt of a written notice that any representations, warranties or information we provided to the investor in any document or instrument in connection with the Forbearance Agreement is materially false, incomplete or misleading, (iv) two business days after our receipt of a written notice that a proceeding or other action has been commenced by any creditor against us, other than the investor (v) the date on which a court enters an order for relief or take any similar action in respect of us in an involuntary case under any applicable bankruptcy law, or (vi) the date on which a petition for relief under any applicable bankruptcy, is filed by or against us, each as further described in the Forbearance Agreement.

In connection with the Forbearance Agreement, interest on the 2011 Convertible Note and the Secured Note was increased to 20% per annum effective June 14, 2012.

On July 13, 2012 we paid in full all principal and interest due pursuant to the Secured Note and the patent security agreement was terminated. On October 29, 2012 we paid in full all principal and interest due pursuant to the 2011 Convertible Note. Upon payment of the 2011 Convertible Note the Forbearance Agreement was terminated.

2012 Secured Convertible Promissory Note

On July 13, 2012, the Company issued a secured convertible promissory note and patent security agreement (collectively, the "Agreements") to an investor who is a shareholder of the Company. Pursuant to the terms and subject to the conditions set forth in the Agreements, the investor provided a loan in the amount of \$2,000,000 to the Company, which is secured by all current and future patents, patent applications and similar protections of the Company and all rents, royalties, license fees and "accounts" with respect to such intellectual property assets. Pursuant to the secured convertible promissory note (the "2012 Note"), interest in the amount of 6% per annum, calculated on a 365 day year, and the principal amount of \$2,000,000 and accrued interest will be paid on or before October 15, 2012, subsequently extended to October 26, 2012. The investor has the right to convert principal and accrued interest into the Company's common stock at \$0.26 per share. The initial conversion price may be adjusted pursuant to standard anti-dilution provisions. The proceeds of this 2012 Note were used in part to pay, in full, all outstanding principal and interest due pursuant to the Secured Note issued March 22, 2011.

The Company performed an analysis pursuant to ASC 815 in order to determine whether the embedded conversion option included in the 2012 Note is required to be accounted for separately from the host contract and recorded on the balance sheet at fair value. The Company concluded that the embedded conversion option did not meet the requirements for such classification.

Pursuant to the patent security agreement, the Company shall not, without the investor's prior consent, sell, dispose or otherwise transfer all or any portion of the Collateral, except for license grants in the ordinary course of business. In addition, the Company will take all actions reasonably necessary to prosecute to allowance applications for patents and maintain all patents, and to seek to recover damages for infringement, misappropriation or dilution of the Collateral with limited exceptions.

On October 30, 2012, the Company and MG Energy LLC, a Delaware limited liability company ("MG Energy"), entered into the License and Supply Agreement (the "Agreement"), effective October 26, 2012 as discussed in Note 12. As consideration for the Agreement, MG Energy agreed to retire the 2012 Note including all interest accrued thereon, issued by the Company to the investor, who assigned the 2012 Note to MG Energy, a company in which a shareholder of the Company holds a position. This retirement is nonrefundable and noncreditable. Coincident with the retirement of the 2012 Note, the related patent security agreement was terminated. In accordance with ASC Subtopic 470-50, Debt Modifications and Extinguishments, the Company determined the reacquisition price of the debt to be equal to the fair value of the debt as it was more clearly evident than the fair value of the License and Supply Agreement. The fair value of the debt approximated its carrying value and, accordingly, there was no gain or loss on the extinguishment of the debt.

Other Notes and Accrued Interest

During the year ended December 31, 2012, the Company entered into an agreement with a related party to borrow \$50,000 which was due on demand and bears interest at 4%. We paid all interest and principal due under this note on August 1, 2012.

Accrued interest on the above notes was \$0 and \$320,548 at December 31, 2012 and 2011, respectively.

8. Related Party Transactions

Timothy N. Tangredi, our Chief Executive Officer and Chairman, is a founder and a member of the board of directors of Aegis BioSciences, LLC ("Aegis"). Mr. Tangredi currently owns 52% of Aegis' outstanding equity and spends approximately one to two days per month on Aegis business for which he is compensated by Aegis. Aegis has two exclusive, world-wide licenses from us under which it has the right to use and sell products containing our polymer technologies in biomedical and health care applications. As a result of a \$150,000 payment made by Aegis, the first license is considered fully paid and as such no additional license revenue will be forthcoming. Pursuant to the second license Aegis made an initial one-time payment of \$50,000 and is to make royalty payments of 1.5% of the net sales price it receives with respect to any personal hygiene product, surgical drape or clothing products (the latter when employed in medical and animal related fields) and license revenue it receives should Aegis grant a sublicense to a third party. To date Aegis has sold no such products nor has it received any licensing fees requiring a royalty payment be made to us. All obligations for such payments will end on the earlier of June 2, 2015 or upon the aggregate of all sums paid to us by Aegis under the agreement reaching \$1 million. The term of each respective license runs for the duration of the patented technology.

The Company rents a building that is owned by two stockholders of the Company, one of which is the Chief Executive Officer. Rent expense for this building is \$4,066 per month, including sales tax. The Company recognized rent expense of approximately \$49,000 in each of the years ended December 31, 2012 and 2011. At December 31, 2012 and 2011, \$82,195 and \$58,991, respectively, were included in accounts payable for amounts owed to these stockholders for rent.

The Company also has accrued compensation due to the Chief Executive Officer and two other employees for deferred salaries earned and unpaid as of December 31, 2012 and 2011 of \$1,494,739 and \$1,405,606, respectively. During 2012, the Company determined that a portion of the accrued payroll, \$1,484,739, is a long term liability, as the

Company does not believe it will repaid within the next year.

The above terms and amounts are not necessarily indicative of the terms and amounts that would have been incurred had comparable transactions been entered into with independent parties.

9. Equity Transactions

Preferred Stock

The Company's Board of Directors has authorized 10,000,000 million shares of preferred stock with a par value of \$0.01 to be issued in series with terms and conditions to be determined by the Board of Directors. The Company has designated 400,000 shares of Series A convertible preferred stock; 1,000,000 shares of Series B convertible preferred stock; 500,000 shares of Series C convertible preferred stock; and 1,100,000 shares of Series D convertible preferred stock. The Series A through D convertible preferred stock rank senior to the common stock as to dividends and liquidation. Each share of Series A through D convertible preferred stock is convertible into one share of common stock, except in specified circumstances as defined by the Company's Certificate of Incorporation, and is automatically converted into common stock upon the occurrence of an initial public offering that meets certain criteria. No dividend or distribution may be paid on any shares of the Company's common stock unless an equivalent dividend or distribution is paid on the Series A through D convertible preferred stock.

Common Stock

In November of 2012, the Company issued, in connection with a private offering, 17,500,000 shares of common stock to Green Valley International Investment Management Company Limited ("GVI") at \$0.10 per share for cash proceeds of \$1,750,000 and the Company has recorded a common stock payable for \$19,255. In addition, under the terms of the private placement offering, GVI also received a warrant to purchase 4,375,000 shares of the Company's common stock with an exercise period of five years from the date of issue at an exercise price of \$0.30 per share.

During the year ended December 31, 2012, the Company issued options to purchase 250,000 shares of common stock to a consultant for its services related to the private placement. The options vest immediately and may be exercised through November 30, 2022 at a price of \$0.12 per share. The \$26,577 value of the options which was determined using the Black-Scholes model is considered an offering cost of the private placement and, as a result, has no effect on capital in excess of par value.

10. Stock Options and Warrants

In June 2000 and November 2009, our Board of Directors adopted, and our shareholders approved, the 2000 Incentive Compensation Plan ("2000 Plan") and the 2009 Long-Term Incentive Plan ("2009 Plan"), respectively (together the "Plans"). The Plans provide for the granting of options to qualified employees of the Company, independent contractors, consultants, directors and other individuals. The Company's Board of Directors approved and made available 11,093,882 and 15,000,000 shares of common stock to be issued pursuant to the 2000 Plan and the 2009 Plan, respectively. The 2000 Plan permits grants of options to purchase common shares authorized and approved by our Board of Directors and shareholders for issuance prior to the enactment of the 2000 Plan. The Plans permit grants of options to purchase common shares authorized and approved by the Company's Board of Directors.

The average fair value of options granted at market during 2012 and 2011 was \$0.12 and \$0.32 per option, respectively. The total intrinsic value of options exercised during the years ended December 31, 2012 and 2011 was \$0 and \$0, respectively.

The following summarizes the information relating to outstanding stock options under the Plans during 2012 and 2011:

	Common Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value
Outstanding at December 31, 2010	14,897,757	\$ 0.25	7.19	\$ 946,754
Granted	2,825,000	\$ 0.32		
Forfeited or expired	(320,000)	\$ 0.22		
Outstanding at December 31, 2011	17,402,757	\$ 0.32	6.66	\$ 352,065
Granted	2,700,000	\$ 0.12		
Forfeited or expired	(1,455,425)	\$ 0.33		
Outstanding at December 31, 2012	18,647,332	\$ 0.29	6.06	\$ 26,345
Exercisable at December 31, 2012	17,411,777	\$ 0.29	5.84	\$ 25,519
Exercisable at December 31, 2011	16,308,521	\$ 0.32	6.51	\$ 351,701

Stock compensation expense was approximately \$296,000 for the year ended December 31, 2012 and \$917,000 for the year ended December 31, 2011. The total fair value of shares vested during the years ended December 31, 2012 and 2011 was approximately \$370,100 and \$817,000, respectively.

As of December 31, 2012, there was approximately \$153,000 of unrecognized employee stock-based compensation expense related to non vested stock options, of which \$94,400, \$36,500 and \$26,400 is expected to be recognized for the years ended December 31, 2013, 2014 and 2015, respectively.

The following table represents our non vested share-based payment activity with employees for the year ended December 31, 2012 and 2011:

	Number of Options	Weighted Average Grant Date Fair Value
Nonvested options - December 31, 2010	1,063,194	\$ 0.25
Granted	2,825,000	\$ 0.32
Forfeited	(2,643,958)	\$ 0.31
Vested	(150,000)	\$ 0.29
Nonvested options - December 31, 2011	1,094,236	\$ 0.29
Granted	2,700,000	\$ 0.12
Vested	(2,415,070)	\$ 0.14
Forfeited	(143,611)	\$ 0.32
Nonvested options - December 31, 2012	1,235,555	\$ 0.16

Warrants

At December 31, 2012, the Company had outstanding warrants to purchase the Company's common stock which were issued in connection with multiple financing arrangements and consulting agreements. Information relating to these warrants is summarized as follows:

	Remaining Number Outstanding	Weighted Average Remaining Life (Years)	Weighted Average Exercise Price
Warrants			
Warrants-Additional Financing	218,500	.08	\$ 0.55
Warrants-Robb Trust Note	10,000	.11	\$ 0.55
Warrants-Financing	9,000,000	3.11	\$ 0.31
Warrants-Placement Agent Warrants	401,333	.08	\$ 0.20
Warrants-Tangredi	3,000,000	.25	\$ 0.36
Warrants-Ehrenberg	250,000	.59	\$ 0.30
Warrants-Consulting Agreement	825,000	1.77	\$ 0.30
Warrants-Note Conversions	2,302,538	1.42	\$ 0.39
Warrants-Stock Purchases	6,095,770	4.20	\$ 0.33
Warrants-Services	400,000	2.06	\$ 0.50
Total	22,503,141		

Common Stock Issued For Services

The Company issued 207,692 shares of common stock during the year ended December 31, 2011 valued at \$74,769 for legal services. For the year ended December 31, 2011, the Company has recorded \$74,769 as legal expense related to these services in its statements of operations.

The Company issued 17,500 shares of common stock during the year ended December 31, 2011 valued at \$6,475 for consulting services.

On September 6, 2011, the Company issued 202,703 shares of common stock valued at \$75,000 to legal counsel, Richardson and Patel, LLP, in settlement of accounts payable for services rendered.

The Company entered into an agreement for consulting services in April 2010. The term of the agreement is for seventeen months and calls for the Company to issue the consultant 100,000 shares of common stock upon execution of the agreement and an additional 100,000 shares of common stock after six months of service. The agreement also calls for a monthly cash payment of \$6,000 for the first six months and \$7,500 per month for the remainder of the agreement. The Company has fair valued the initial 100,000 shares of common stock at \$53,000 and the additional 100,000 shares of common stock at \$36,000 and is expensing the fair value of those shares over life of the agreement. For the year ended December 31, 2011, the Company has recorded \$21,000 as consulting expense on its statement of operations.

11. Derivative Financial Instruments

The Company has accounted for certain warrants in accordance with ASC 815-10, Derivatives and Hedging (ASC 815-10). ASC 815-10 provides guidance for determining whether an equity-linked financial instrument (or embedded feature) is indexed to an entity's own stock. This applies to any freestanding financial instrument or embedded feature that has all the characteristics of a derivative under ASC 815-10, including any freestanding financial instrument that is potentially settled in an entity's own stock.

Due to certain adjustments that may be made to the exercise price of the warrants issued in December 2007, January 2008 and August 2008, if the Company issues or sell shares of its common stock at a price which is less than the then current warrant exercise price, these warrants have been classified as a liability as opposed to equity in accordance ASC 815-10 as it was determined that these warrants were not indexed to the Company's stock. During the year ended December 31, 2012, the Company, in connection with a private offering, sold shares of its common stock at \$0.10, which was less than the exercise price of the warrants and therefore, caused the Company to reprice these warrants in accordance with the terms of the agreement. As a result, the fair market value of these warrants is remeasured at each financial reporting period. The change in fair value of the warrants is recorded in the statements of operations and is estimated using the Black-Scholes option-pricing model with the following assumptions:

	For the Years Ended December 31,	
	2012	2011
Exercise price	\$ 0.20	\$ 0.25
Market value of stock at end of period	\$ 0.12	\$ 0.25
Expected dividend rate	N/A	N/A
Expected volatility	29%	143% – 146%
Risk-free interest rate	0.04%	0.12% – 0.25%
Expected life in years	0.08	0.95 – 1.08
Shares underlying warrants outstanding classified as liabilities	2,401,333	13,401,333

All warrants issued by the Company other than the above noted warrants are classified as equity.

12. Deferred Revenue

The Company entered into a licensing agreement during the year ended December 31, 2003 and received an initial fee of \$770,000. This fee is deferred and recognized on a straight-line basis over the life of the license agreement of 10 years. In addition, the Company received royalties of \$100,000 in each of the first three years of the agreement. The Company recognized revenue of approximately \$77,000 for this agreement during each of the years ended December 31, 2012 and 2011.

The Company entered into a licensing agreement with a biomedical entity during the year ended December 31, 2005 and received an initial license fee of \$50,000. This fee is deferred and recognized on a straight-line basis over the life of the license agreement of 7 years. The Company recognized revenue of approximately \$5,000 for this agreement during each of the years ended December 31, 2012 and 2011.

On October 30, 2012, the Company and MG Energy LLC, a Delaware limited liability company (“MG Energy”), a company in which a shareholder of the Company holds a position, entered into a License and Supply Agreement (the “Agreement”), effective October 26, 2012, pursuant to which the Company licensed certain intellectual property and improvements thereto to MG Energy, for use in the manufacture and sale of energy recovery ventilators (“ERV”) and certain other HVAC systems for installation in commercial, residential or industrial buildings in North America and South America in exchange for the cancellation of \$2,034,521 of debt due to MG Energy (see Note 7). MG Energy also agreed to purchase its requirements of certain ConsERV products from the Company for MG Energy’s use, pursuant to the terms and conditions of the Agreement. MG Energy will also pay royalties, as defined, to the Company on the net sales of each product or system sold. The term of the Agreement will expire upon the last to expire of the underlying patent rights for the licensed technology.

The Company has identified all of the deliverables under the Agreement and has determined significant deliverables to be the license for the intellectual property and the supply services. In determining the units of accounting, the Company evaluated whether the license has stand alone value to MG Energy based upon consideration of the relevant facts and circumstances of the Agreement. The Company determined that the license does not have stand alone value to the licensee and, therefore, should be combined with the supply agreement as one unit of accounting. The initial payment for the license agreement will be treated as an advance payment and recognized over the performance period of the supply agreement. Royalties will be recognized as revenue when earned. The Company recognized revenue of \$21,640 for this Agreement during the year ended December 31, 2012.

13. Commitments and Contingencies

The Company has employment agreements with some of its key employees and executives. These agreements provide for minimum levels of compensation during current and future years. In addition, these agreements call for grants of stock options and for payments upon termination of the agreements.

Timothy Tangredi. The Company entered into an amended and restated employment agreement with Mr. Timothy N. Tangredi, our President, Chief Executive Officer, and director, dated as of September 14, 2011. Mr. Tangredi’s employment agreement provides for an initial term of three years commencing on September 14, 2011 with the term extending on the second anniversary thereof for an additional two year period and on each subsequent anniversary of the commencement date for an additional year. Mr. Tangredi’s initial base salary is \$200,000. Mr. Tangredi’s base salary shall be increased annually, if applicable, by a sum equal to his current base salary multiplied by one third of the percentage increase in our yearly revenue compared to our prior fiscal year revenue; provided however any annual increase in Mr. Tangredi’s base salary shall not exceed a maximum of 50% for any given year. Any further increase in Mr. Tangredi’s base salary shall be at the sole discretion of our board of directors or compensation committee (if applicable). Additionally, at the discretion of our board of directors and its compensation committee, Mr. Tangredi may be eligible for an annual bonus, if any, of up to 100% of his then-effective base salary, if he meets or exceeds certain annual performance goals established by the board of directors. In addition to this bonus, Mr. Tangredi may be eligible for a separate merit bonus if approved by the board of directors, for specific extraordinary events or achievements such as a sale of a division, major license or distribution arrangement or merger. Mr. Tangredi is entitled to medical, disability and life insurance, as well as four weeks of paid vacation annually, an automobile allowance, reimbursement of all reasonable business expenses, automobile insurance and maintenance, and executive conference or educational expenses.

Under his employment agreement, in addition to any other compensation which he may receive, if we complete a secondary Public Offering, Mr. Tangredi will be granted an option under our 2009 Plan to purchase up to 520,000 shares of our common stock with an exercise price equal to the fair market value per share on the date of grant. This option will become vested and exercisable in thirds, with one third vested upon grant, another third at the one-year anniversary of the grant, and another third upon the second anniversary of the grant. The option shall have a term of

ten years, shall be exercisable for up to three years after termination of employment (unless termination is for cause, in which event it shall expire on the date of termination), shall have a “cashless” exercise feature, and shall be subject to such additional terms and conditions as are then applicable to options granted under such plan provided they do not conflict with the terms set forth in the agreement.

If Mr. Tangredi's employment is terminated for any reason, we will be obligated to pay him his accrued but unpaid base salary, bonus and accrued vacation pay, and any unreimbursed expenses ("Accrued Sums").

In addition to any Accrued Sums owed, if Mr. Tangredi's employment is terminated by us in the event of his disability or without cause or by Mr. Tangredi for good reason, he shall be entitled to:

- (i) an amount equal to the sum of (A) the greater of 150% of the base salary then in effect or \$320,000 plus (B) the cash bonus and/or merit bonus, if any, awarded for the most recent year;
- (ii) health and life insurance, a car allowance and other benefits set forth in the agreement until two years following termination of employment, and thereafter to the extent required by COBRA or similar statute; and
- (iii) all stock options, to the extent they were not exercisable at the time of termination of employment, shall become exercisable in full.

In addition to any Accrued Sum owed, in the event of termination upon death, Mr. Tangredi shall be entitled to (i) and (iii) above.

In addition to any Accrued Sums owed, in the event that Mr. Tangredi elects to terminate employment within one year following a change in control, he shall receive a lump sum payment equal to the sum of (a) the greater of his then current base salary or \$210,000 plus (b) the cash bonus and merit bonus, if any, awarded in the most recent year. In addition, he will be entitled to (ii) and (iii) above.

The employment agreement also contains customary covenants restricting the use of our confidential information and solicitation of employees, which are similarly applicable to our other executive officers. In addition we are obligated to indemnify Mr. Tangredi for any claims made against him in connection with his employment with us, to advance indemnification expenses, and maintain his coverage under our directors' and officers' liability insurance policy.

Under the employment agreement, we and Mr. Tangredi have agreed that we will retain an independent compensation consultant, whose recommendations shall be obtained by January 31, 2012 which may modify the compensation program for Mr. Tangredi and other officers, subject to certain conditions including approval of the board of directors. Notwithstanding the recommendation and board consideration, Mr. Tangredi has the right to continue the current terms of the employment agreement. No amendment has been made as of the date of this filing.

Patricia Tangredi. In April 2011, the Company entered into an employment agreement with the Company's General Counsel, Patricia Tangredi. The employment term is for four years with automatic renewals. The agreement includes an annual base salary of \$120,000 with an increase to \$150,000 upon completion of a successful Secondary Public Offering of at least \$10 million. The agreement also provides for a minimum of 50,000 options to be awarded annually along with other standard employment benefits.

Litigation

The Company is not currently a party to any pending legal proceedings. In the ordinary course of business the Company may become a party to various legal proceedings generally involving contractual matters, infringement actions, product liability claims and other matters.

14. Income Taxes

There is no current or deferred income tax expense or benefit for the years ended December 31, 2012 and 2011.

The provision for income taxes is different from that which would be obtained by applying the statutory federal income tax rate to income before income taxes. The items causing this difference are as follows:

	Year ended December 31,	
	2012	2011
Tax (benefit) at U.S. statutory rate	\$ 7,000	\$ (794,000)
State income tax (benefit), net of federal benefit	1,000	(85,000)
Effect of non-deductible expenses	—	1,000
Employee stock-based compensation	101,000	312,000
Change in warrant valuation	(642,000)	(410,000)
Amortization of debt discount	87,000	275,000
Other adjustments	(13,000)	26,000
Expiration of net operating loss	81,000	—
Change in valuation allowance	(378,000)	675,000
	\$ —	\$ —

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities are as follows:

	December 31,	
	2012	2011
Deferred tax assets (liabilities), current:		
Allowance for doubtful accounts	\$ 1,000	\$ 9,300
Bonus payable	—	108,300
Accrued deferred compensation payable	—	420,600
Accrued shareholder interest	—	120,600
Stock warrant consideration and other	119,300	102,200
Deferred license revenue	70,600	21,400
Valuation allowance	(190,900)	(782,400)
	\$ —	\$ —
Deferred tax assets (liabilities), noncurrent:		
Deferred license revenue	\$ 713,500	\$ 36,100
Depreciation	3,400	3,400
Bonus payable	108,300	—
Accrued deferred compensation payable	446,900	—
Net operating loss carryforward	7,836,600	8,100,500
Valuation allowance	(9,108,700)	(8,140,000)
	\$ —	\$ —

As of December 31, 2012 and 2011, the Company had federal and state net operating loss carry-forwards totaling approximately \$21,000,000 and \$21,500,000, respectively, which begin expiring in 2012. The Company has established a valuation allowance to fully reserve all deferred tax assets at December 31, 2012 and 2011 because it is more likely than not that the Company will not be able to utilize these assets. The change in the valuation allowance for the years ended December 31, 2012 and 2011 was an increase of \$378,000 and \$675,000, respectively.

As of December 31, 2012, the Company has not performed an IRC Section 382 study to determine the amount, if any, of its net operating losses that may be limited as a result of the ownership change percentages during 2012. However, the Company will complete the study prior to the utilization of any of its recorded net operating losses.

15. Terminated Sales Agreements

On August 21, 2009, we entered into an Exclusive Distribution Agreement with Genertec, under which we are to supply and Genertec is to distribute, on an exclusive basis, three of our nanotechnology-based membrane products and related products in Greater China, including mainland China, Hong Kong, Macau and Taiwan. The agreement provides that during the initial five year term of the agreement, Genertec will order and purchase these products in the aggregate amount of \$200 million. A minimum quantity of said products is to be purchased by Genertec during each contract year of the initial term.

In April of 2010, the Company entered into a technical and sales agreement with CAST Systems Control Technology Co., Ltd. ("CAST") and Genertec with a value of up to approximately \$48 million over a twelve month period. Under the terms of the Agreement, the Company will supply to CAST, through Genertec, key system components of its nanotechnology clean water process.

During 2011, Genertec expressed a desire to limit its participation in this endeavor as they find NanoAir and NanoClear to have engineering requirements they are not best suited to undertake. As a result, the Company wrote off a \$56,356 receivable from CAST that was deemed to be uncollectible. During the year ended December 31, 2012, we terminated the Genertec and CAST agreements and recognized \$150,000 nonrefundable deposit received from Genertec as revenue.

16. Subsequent Events

In 2013, pursuant to the terms and conditions of the GVI offering, Company sold and issued 492,280 shares of common stock to GVI together with a warrant to purchase 123,070 shares of the Company's common stock with an exercise period of five years from the date of issue at an exercise price of \$0.30 per share for a cash payment of \$49,228 of which \$19,255 was received in 2012.

No other material events have occurred subsequent to December 31, 2012 that require recognition or disclosure in these financial statements.
