WATERSTONE FINANCIAL, INC. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(Unaudited)

Note 1 — Basis of Presentation

On June 6, 2013, the Board of Directors of Lamplighter Financial, MHC ("MHC") and the Board of Directors of Waterstone Financial, Inc., a federal corporation, ("Waterstone-Federal") adopted a Plan of Conversion and Reorganization (the "Plan"). Pursuant to the Plan, Waterstone Financial, Inc., a Maryland corporation, ("New Waterstone") was organized and the MHC converted from the mutual holding company form of organization to the fully public form on January 22, 2014. As part of the conversion, the MHC's ownership interest of Waterstone-Federal was offered for sale in a public offering. A total of 25,300,000 shares were sold in the offering at a price \$10.00 per share, resulting in gross proceeds of \$253.0 million. Expenses related to the offering totaled approximately \$4.7 million. The existing publicly held shares of Waterstone-Federal were exchanged for new shares of common stock of New Waterstone at a conversion ratio of 1.0973-to-one. The exchange ratio ensured that immediately after the conversion and public offering, the public shareholders of Waterstone-Federal owned the same aggregate percentage of New Waterstone common stock that they owned immediately prior to that time (excluding shares purchased in the stock offering and cash received in lieu of fractional shares). When the conversion and public offering was completed, New Waterstone became the holding company of WaterStone Bank SSB and succeeded to all of the business and operations of Waterstone-Federal and each of Waterstone-Federal and Lamplighter Financial, MHC ceased to exist. Approximately 34,405,458 shares of New Waterstone common stock were outstanding after the completion of the offering and exchange. The words "Waterstone Financial," "we" and "our" thus are intended to refer to Waterstone-Federal and its subsidiaries with respect to matters and time periods occurring on or before January 22, 2014, and to New Waterstone and its subsidiaries with respect to matters and time periods occurring thereafter.

The unaudited interim consolidated financial statements include the accounts of Waterstone Financial, Inc. (the "Company") and the Company's subsidiaries.

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles ("GAAP") for interim financial information, Rule 10-01 of Regulation S-X and the instructions to Form 10-Q. The financial statements do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments (consisting of normal recurring accruals) necessary to present fairly the financial position, results of operations, changes in shareholders' equity, and cash flows of the Company for the periods presented.

The accompanying unaudited consolidated financial statements and related notes should be read in conjunction with the Company's December 31, 2014 Annual Report on Form 10-K. Operating results for the three months ended March 31, 2015 are not necessarily indicative of the results that may be expected for the year ending December 31, 2015 or for any other period.

The preparation of the unaudited consolidated financial statements requires management of the Company to make a number of estimates and assumptions relating to the reported amount of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the period. Significant items subject to such estimates and assumptions include the allowance for loan losses, deferred income taxes and real estate owned. Actual results could differ from those estimates.

Certain prior period amounts have been reclassified to conform to current period presentation. These reclassifications did not result in any changes to previously reported net income or shareholders' equity.

## Note 2— Securities Available for Sale

The amortized cost and fair values of the Company's investment in securities available for sale follow:

	March 31, 2015			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
	(In Thousands)			
Mortgage-backed securities	\$109,606	2,433	(33 )	112,006

Debt securities	90,191	1,603	(447 )	91,347
Certificates of deposit	5,880	17	-	5,897
	\$270,562	3,522	(641 )	273,443

The Company's mortgage-backed securities and collateralized mortgage obligations issued by government sponsored enterprises are guaranteed by Fannie Mae, Freddie Mac or Ginnie Mae. At March 31, 2015, \$95.2 million of the Company's mortgage related securities were pledged as collateral to secure repurchase agreement obligations of the Company. As of March 31, 2015, \$1.3 million of municipal securities were pledged as collateral to secure mortgage banking related activities. At December 31, 2014, \$98.2 million of the Company's government sponsored enterprise bonds and \$1.3 million of the Company's mortgage related securities were pledged as collateral to secure mortgage banking related activities.

The amortized cost and fair values of investment securities by contractual maturity at March 31, 2015 are shown below. Actual maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Fair Value
	(In Thousands)	
Debt and other securities		
Due within one year	\$8,972	9,075
Due after one year through five years	21,609	21,931
Due after five years through ten years	42,149	42,696
Due after ten years	21,533	22,564
Mortgage-related securities	175,860	178,841
	\$270,123	275,107

Gross unrealized losses on securities available for sale and the fair value of the related securities, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position were as follows:

March 31, 2015		12 months or longer		Total	
Fair value	Unrealized loss	Fair value	Unrealized loss	Fair value	Unrealized loss

Certificates of deposit	490	-	-	-	-	490	-	-	
	\$47,545	(148	)	36,803	(493	)	84,348	(641	)

The Company reviews the investment securities portfolio on a quarterly basis to monitor its exposure to other-than-temporary impairment. In evaluating whether a security's decline in market value is other-than-temporary, management considers the length of time and extent to which the fair value has been less than cost, financial condition of the issuer and the underlying obligors, quality of credit enhancements, volatility of the fair value of the security, the expected recovery period of the security and ratings agency evaluations. In addition the Company may also evaluate payment structure, whether there are defaulted payments or expected defaults, prepayment speeds and the value of any underlying collateral.

As of March 31, 2015, the Company held two municipal securities that had previously been deemed to be other-than-temporarily impaired. Both securities were issued by a tax incremental district in a municipality located in Wisconsin. During the year ended December 31, 2012, the Company received audited financial statements with respect to the municipal issuer that called into question the ability of the underlying taxing district that issued the securities to operate as a going concern. During the year ended December 31, 2012, the Company's analysis of these securities resulted in \$100,000 in credit losses that were charged to earnings with respect to these two municipal securities. An additional \$17,000 credit loss that was charged to earnings during the year ended December 31, 2014 for these municipal bonds. During the year ended December 31, 2014, there were sales in the market of municipal issuer bonds at a discounted price that resulted in the Company recording additional credit losses. As of March 31, 2015, these securities had a combined amortized cost of \$198,000 and a combined estimated fair value of \$264,000.

As of March 31, 2015, the Company had 14 municipal securities, five mortgage-backed securities, one government sponsored enterprise issued, and one government sponsored enterprise bonds which had been in an unrealized loss position for twelve months or longer. These securities were determined not to be other-than-temporarily impaired as of March 31, 2015. The Company has determined that the decline in fair value of these securities is primarily attributable to an increase in market interest rates compared to the stated rates on these securities and is not attributable to credit deterioration. As the Company does not intend to sell nor is it more likely than not that it will be required to sell these securities before recovery of the amortized cost basis, these securities are not considered other-than-temporarily impaired.

Continued deterioration of general economic market conditions could result in the recognition of future other than temporary impairment losses within the investment portfolio and such amounts could be material to our consolidated financial statements.

During the three months ended March 31, 2015, proceeds from the sale of securities totaled \$1.0 million and resulted in gains totaling \$44,000. The \$44,000 included in gain on sale of available for sale securities in the consolidated statements of income during the three months ended March 31, 2015 was reclassified from accumulated other comprehensive income. There were no sales of securities during the three months ended March 31, 2014.

The following table presents the change in other-than-temporary credit related impairment charges on securities available for sale for which a portion of the other-than-temporary impairments related to other factors was recognized in other comprehensive loss.

	(In Thousands)
Credit-related impairments on securities as of December 31, 2013	\$ 100
Credit-related impairments related to securities for which an other- than-temporary impairment was not previously recognized	-
Increase in credit-related impairments related to securities for which an other-than-temporary impairment was previously recognized	17
Reduction for sales of securities for which other-than-temporary was previously recognized	-
Credit-related impairments on securities as of December 31, 2014	117

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

Credit-related impairments related to securities for which an other- than-temporary impairment was not previously recognized	-
Increase in credit-related impairments related to securities for which an other-than-temporary impairment was previously recognized	-
Credit-related impairments on securities as of March 31, 2015	\$ 117

Note 3 - Loans Receivable

Loans receivable at March 31, 2015 and December 31, 2014 are summarized as follows:

	March 31, 2015	December 31, 2014
	(In Thousands)	
Mortgage loans:		
Residential real estate:		
One- to four-family	\$397,114	411,979
Multi-family	509,673	522,281
Home equity	27,442	29,207
Construction and land	13,678	17,081
Commercial real estate	95,504	94,771
Consumer	268	200
Commercial loans	21,079	19,471
	\$1,064,758	1,094,990

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

The Company provides several types of loans to its customers, including residential, construction, commercial and consumer loans. Significant loan concentrations are considered to exist for a financial institution when there are amounts loaned to one borrower or to multiple borrowers engaged in similar activities that would cause them to be similarly impacted by economic or other conditions. While credit risks are geographically concentrated in the Company's Milwaukee metropolitan area, there are no concentrations with individual or groups of related borrowers. While the real estate collateralizing these loans is residential in nature, it ranges from owner-occupied single family homes to large apartment complexes.

Qualifying loans receivable totaling \$855.7 million and \$844.2 million at March 31, 2015 and December 31, 2014, respectively, are pledged as collateral against \$350.0 million in outstanding Federal Home Loan Bank of Chicago advances under a blanket security agreement.

As of March 31, 2015 and December 31, 2014, there are no loans that are 90 or more days past due and still accruing interest.

An analysis of past due loans receivable as of March 31, 2015 and December 31, 2014 follows:

As of March 31, 2015

---

Factors that are important to managing overall credit quality include sound loan underwriting and administration, systematic monitoring of existing loans and commitments, effective loan review on an ongoing basis, early identification of potential problems, an allowance for loan losses, and sound non-accrual and charge-off policies. Our underwriting policies require an officers' loan committee to review and approve all loans in excess of \$500,000. Our ability to manage credit risk depends in large part on our ability to properly identify and manage problem loans. To do so, we maintain an independent loan review system under which our credit management personnel review non-owner occupied one- to four-family, multi-family, construction and land, commercial real estate and commercial loans that individually, or as part of an overall borrower relationship, exceed \$1.0 million in potential exposure. Loans meeting these criteria are reviewed on an annual basis, or more frequently if the loan renewal is less than one year. With respect to loans subject to the annual review, the review process is contingent on the receipt of updated financial information from the borrower. To the extent that updated information is not received on a timely basis, the review is deferred and the credit is monitored until such time as the updated financial information is obtained. With respect to this review process, management has determined that pass loans include loans that exhibit acceptable financial statements, cash flow and leverage. Watch loans have potential weaknesses that deserve management's attention and, if left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the credit. Substandard loans are considered inadequately protected by the current net worth and paying capacity of the obligor or the collateral pledged. These loans generally have a well-defined weakness that may jeopardize liquidation of the debt and are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. Finally, a loan is considered to be impaired when it is probable that the Company will not be able to collect all amounts due according to the contractual terms of the loan agreement. Management has determined that all non-accrual loans and loans modified under troubled debt restructurings meet the definition of an impaired loan.

The Company's procedures dictate that an updated valuation must be obtained with respect to underlying collateral at the time a loan is deemed impaired. Updated valuations may also be obtained upon transfer from loans receivable to real estate owned based upon the age of the prior appraisal, changes in market conditions or known changes to the physical condition of the property.

Estimated fair values are reduced to account for sales commissions, broker fees, unpaid property taxes and additional selling expenses to arrive at an estimated net realizable value. The adjustment factor is based upon the Company's actual experience with respect to sales of real estate owned over the prior two years. An additional adjustment factor is applied by appraisal vintage to account for downward market pressure since the date of appraisal. The additional adjustment factor is based upon relevant sales data available for our general operating market as well as company-specific historical net realizable values as compared to the most recent appraisal prior to disposition.

With respect to multi-family income-producing real estate, appraisals are reviewed and estimated collateral values are adjusted by updating significant appraisal assumptions to reflect current real estate market conditions. Significant assumptions reviewed and updated include the capitalization rate, rental income and operating expenses. These adjusted assumptions are based upon recent appraisals received on similar properties as well as on actual experience related to real estate owned and currently under Company management.

The following tables present data on impaired loans at March 31, 2015 and December 31, 2014.

	As of or for the Three Months Ended March 31, 2015				Average

The difference between a loan's recorded investment and the unpaid principal balance represents a partial charge-off resulting from a confirmed loss when the value of the collateral securing the loan is below the loan balance and management's assessment that the full collection of the loan balance is not likely.

When a loan is considered impaired, interest payments received are treated as interest income on a cash basis as long as the remaining book value of the loan (i.e., after charge-off of all identified losses) is deemed to be fully collectible. If the remaining book value is not deemed to be fully collectible, all payments received are applied to unpaid principal. Determination as to the ultimate collectability of the remaining book value is supported by an updated credit department evaluation of the borrower's financial condition and prospects for repayment, including consideration of the borrower's sustained historical repayment performance and other relevant factors.

The determination as to whether an allowance is required with respect to impaired loans is based upon an analysis of the value of the underlying collateral and/or the borrower's intent and ability to make all principal and interest payments in accordance with contractual terms. The evaluation process is subject to the use of significant estimates and actual results could differ from estimates. This analysis is primarily based upon third party appraisals and/or a discounted cash flow analysis. In those cases in which no allowance has been provided for an impaired loan, the Company has determined that the estimated value of the underlying collateral exceeds the remaining outstanding balance of the loan. Of the total \$26.6 million of impaired loans as of March 31, 2015 for which no allowance has

been provided, \$3.9 million in charge-offs have been recorded to reduce the unpaid principal balance to an amount that is commensurate with the loans' net realizable value, using the estimated fair value of the underlying collateral. To the extent that further deterioration in property values continues, the Company may have to reevaluate the sufficiency of the collateral servicing these impaired loans resulting in additional provisions to the allowance for loans losses or charge-offs.

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

At March 31, 2015, total impaired loans includes \$23.1 million of troubled debt restructurings. Troubled debt restructurings involve granting concessions to a borrower experiencing financial difficulty by modifying the terms of the loan in an effort to avoid foreclosure. The vast majority of debt restructurings include a modification of terms to allow for an interest only payment and/or reduction in interest rate. The restructured terms are typically in place for six to twelve months. At December 31, 2014, total impaired loans included \$26.1 million of troubled debt restructurings.

The following presents data on troubled debt restructurings:

	As of March 31, 2015					
	Accruing		Non-accruing		Total	
	Amount	Number	Amount	Number	Amount	Number
	(dollars in thousands)					
One- to four-family	\$4,702	8	\$9,848	54	\$14,550	62
Multi-family	2,915	2	2,147	6	5,062	8
Home equity	-	-	98	1	98	1
Construction and land	1,866	2	-	-	1,866	2
Commercial real estate	1,306	1	170	1	1,476	2
	\$10,789	13	\$12,263	62	\$23,052	75

	As of December 31, 2014					
	Accruing		Non-accruing		Total	
	Amount	Number	Amount	Number	Amount	Number
	(dollars in thousands)					
One- to four-family	\$4,724	8	\$10,233	55	\$14,957	63
Multi-family	2,923	2	4,797	7	7,720	9
Home equity	-	-	98	1	98	1
Construction and land	1,866	2	-	-	1,866	2
Commercial real estate	1,306	1	170	1	1,476	2
	\$10,819	13	\$15,298	64	\$26,117	77

At March 31, 2015, \$23.1 million in loans had been modified in troubled debt restructurings and \$12.3 million of these loans were included in the non-accrual loan total. The remaining \$10.8 million, while meeting the internal requirements for modification in a troubled debt restructuring, were current with respect to payments under their original loan terms at the time of the restructuring and thus, continued to be included with accruing loans. Provided these loans perform in accordance with the modified terms, they will continue to be accounted for on an accrual basis.

All loans that have been modified in a troubled debt restructuring are considered to be impaired. As such, an analysis has been performed with respect to all of these loans to determine the need for a valuation reserve. When a loan is expected to perform in accordance with the restructured terms and ultimately return to and perform under contract terms, a valuation allowance is established for an amount equal to the excess of the present value of the expected future cash flows under the original contract terms as compared with the modified terms, including an estimated default rate. When there is doubt as to the borrower's ability to perform under the restructured terms or ultimately return to and perform under market terms, a valuation allowance is established equal to the impairment when the carrying amount exceeds fair value of the underlying collateral. As a result of the impairment analysis, a \$1.3 million valuation allowance has been established as of March 31, 2015 with respect to the \$23.1 million in troubled debt restructurings. As of December 31, 2014, a \$1.5 million valuation allowance had been established with respect to the \$26.1 million in troubled debt restructurings.

After a troubled debt restructuring reverts to market terms, a minimum of six consecutive contractual payments must be received prior to consideration for a return to accrual status. If an updated credit department review indicates no other evidence of elevated credit risk, the loan is returned to accrual status at that time.

Note 4— Real Estate Owned

Real estate owned is summarized as follows:

	March 31, 2015	December 31, 2014
	(In Thousands)	
One- to four-family	\$ 10,920	10,796
Multi-family	2,984	2,210
Construction and land	5,375	5,400
Commercial real estate	300	300
	\$ 19,579	18,706

The following table presents the activity in the Company's real estate owned:

	Three months ended March 31, 2015 2014	
	(In Thousands)	
Real estate owned at beginning of the period	\$ 18,706	22,663
Transferred from loans receivable	6,898	3,511
Sales (net of gains / losses)	(5,932 )	(3,507 )
Write downs	(175 )	(163 )
Other	82	39
Real estate owned at the end of the period	\$ 19,579	22,543

Note 5— Mortgage Servicing Rights

The following table presents the activity in the Company's mortgage servicing rights:

	Three months ended March 31, 2015 2014	
	(In Thousands)	
Mortgage servicing rights at beginning of the period	\$ 2,521	3,377
Additions	571	866
Amortization	(167 )	(121 )
Sales	(28 )	(2,189)
Mortgage servicing rights at end of the period	2,897	1,933
Valuation allowance at end of period	(20 )	-
Mortgage servicing rights at end of the period, net	\$ 2,877	1,933

During the three months ended March 31, 2015, \$399.0 million in residential loans were originated for sale. During the same period, sales of loans held for sale totaled \$379.1 million, generating mortgage banking income of \$21.0 million. The unpaid principal balance of loans serviced for others was \$384.7 million and \$308.1 million at March 31,

2015 and December 31, 2014 respectively. These loans are not reflected in the consolidated statements of financial condition.

During the three months ended March 31, 2015, the Company sold mortgage servicing rights related to \$4.0 million in loans receivable and with a book value of \$28,000 for \$34,000 resulting in a gain on sale of \$6,000. During the three months ended March 31, 2014, the Company sold mortgage servicing rights related to \$392.8 million in loans receivable and with a book value of \$2.2 million for \$4.0 million resulting in a gain on sale of \$1.8 million.

- 17 -

---

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

The following table shows the estimated future amortization expense for mortgage servicing rights for the periods indicated:

	(In Thousands)
Estimate for the period ended December 31: 2015	\$ 364
2016	423
2017	383
2018	343
2019	303
Thereafter	1,061
Total	\$ 2,877

Note 6— Deposits

At March 31, 2015 and December 31, 2014, time deposits with balances greater than \$250,000 amount to \$35.0 million and \$34.6 million, respectively.

A summary of the contractual maturities of time deposits at March 31, 2015 is as follows:

	(In Thousands)
Within one year	\$ 464,590
More than one to two years	140,918
More than two to three years	23,866
More than three to four years	7,135
More than four through five years	2,692
	\$ 639,201

Note 7— Borrowings

Borrowings consist of the following:

	March 31, 2015		December 31, 2014	
	Weighted Average Balance	Rate	Weighted Average Balance	Rate
	(Dollars in Thousands)			
Federal Home Loan Bank, Chicago advances maturing:				
2016	\$220,000	4.34 %	220,000	4.34 %
2017	65,000	3.19 %	65,000	3.19 %
2018	65,000	2.97 %	65,000	2.97 %
Repurchase agreements maturing	2017 84,000	3.96 %	84,000	3.96 %
	\$434,000	3.89 %	434,000	3.89 %

The \$220.0 million in advances due in 2016 consist of eight advances with fixed rates ranging from 4.01% to 4.82% callable quarterly until maturity.

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

The \$65.0 million in advances due in 2017 consist of three advances with fixed rates ranging from 3.09% to 3.46% callable quarterly until maturity.

The \$65.0 million in advances due in 2018 consist of three advances with fixed rates ranging from 2.73% to 3.11% callable quarterly until maturity.

The \$84.0 million in repurchase agreements have fixed rates ranging from 2.89% to 4.31% callable quarterly until their maturity in 2017. The repurchase agreements are collateralized by securities available for sale with an estimated fair value of \$95.2 million at March 31, 2015 and \$98.2 million at December 31, 2014.

The Company selects loans that meet underwriting criteria established by the Federal Home Loan Bank Chicago (FHLBC) as collateral for outstanding advances. The Company's borrowings at the FHLBC are limited to 75% of the carrying value of unencumbered one- to four-family mortgage loans, 40% of the carrying value of home equity loans and 70% of the carrying value of multi-family loans. In addition, these advances are collateralized by FHLBC stock of \$17.5 million at both March 31, 2015 and December 31, 2014. In the event of prepayment, the Company is obligated to pay all remaining contractual interest on the advance.

- 18 -

---

## Note 8 – Regulatory Capital

The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements, or overall financial performance deemed by the regulators to be inadequate, can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Company's and Bank's assets, liabilities, and certain off-balance-sheet items, as calculated under regulatory accounting practices. The Company's and Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

As disclosed in the Company's Form 10-K filed with the Securities and Exchange Commission, in July 2013, the Federal Reserve Board and the FDIC issued final rules implementing the Basel III regulatory capital framework and related Dodd-Frank Wall Street Reform and Consumer Protection Act changes. The rules revise minimum capital requirements and adjust prompt corrective action thresholds. The final rules revise the regulatory capital elements, add a new common equity Tier I capital ratio, increase the minimum Tier 1 capital ratio requirements and implement a new capital conservation buffer. The rules also permit certain banking organizations to retain, through a one-time election, the existing treatment for accumulated other comprehensive income. The Company and the Bank have made the election to retain the existing treatment for accumulated other comprehensive income. The final rules took effect for the Company and the Bank on January 1, 2015, subject to a transition period for certain parts of the rules.

The table below includes the new regulatory capital ratio requirements that became effective on January 1, 2015. Beginning in 2016, an additional capital conservation buffer will be added to the minimum requirements for capital adequacy purposes, subject to a three year phase-in period. The capital conservation buffer will be fully phased-in on January 1, 2019 at 2.5 percent. A banking organization with a conservation buffer of less than 2.5 percent (or the required phase-in amount in years prior to 2019) will be subject to limitations on capital distributions, including dividend payments and certain discretionary bonus payments to executive officers. At the present time, the ratios for the Company and the Bank are sufficient to meet the fully phased-in conservation buffer.

The actual and required capital amounts and ratios for the Company and Bank as of March 31, 2015 and December 31, 2014 are presented in the table below:

	March 31, 2015				To Be Well-Capitalized Under Prompt Corrective Action Provisions

- 19 -

## Note 9 - Stock Based Compensation

Stock-Based Compensation Plan

In 2015, the Company's shareholders approved the 2015 Equity Incentive Plan. A total of 2,530,000 stock options and 1,012,000 restricted shares were approved for award.

Accounting for Stock-Based Compensation Plan

The fair value of stock options granted is estimated on the grant date using a Black-Scholes pricing model. The fair value of restricted shares is equal to the quoted NASDAQ market close price on the date of grant. The fair value of stock grants is recognized as compensation expense on a straight-line basis over the vesting period of the grants. Compensation expense is included in compensation, payroll taxes and other employee benefits in the consolidated statements of income.

Assumptions are used in estimating the fair value of stock options granted. The weighted average expected life of the stock options represent the period of time that the options are expected to be outstanding and is based on the historical results from the previous awards. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant. The expected volatility is based on the actual volatility of a peer group including Waterstone Financial, Inc. stock from five years prior to issuance date March 4, 2015. The following assumptions were used in estimating the fair value of options granted in the year ended 2015.

	2015
Dividend yield	1.57 %
Risk-free interest rate	1.60 %
Expected volatility	31.88 %
Weighted average expected life	5 years
Weighted average per share value of options	\$3.24

The Company estimates potential forfeitures of stock grants and adjusts compensation expense recorded accordingly. The forfeitures will be adjusted over the requisite service period to the extent that actual forfeitures differ, or are expected to differ, from such estimates. Changes in estimated forfeitures will be recognized in the period of change and will also impact the amount of stock compensation expense to be recognized in future periods.

The 535,000 stock options granted to employees under this plan vest over a period of five years. The 600,000 stock option awards granted to directors under this plan vest over a period of eight years. The exercise price for all stock options granted is equal to the quoted NASDAQ market close price on the date that the awards were granted and expire ten years after the grant date, if not exercised. The unrecognized expense related to this award is \$3.6 million over the next 8 years.

The 355,500 restricted stock awards granted to employees under this plan vest in five periods over four years with one period vesting immediately. The 184,000 stock awards granted to directors under this plan vest in eight periods over seven years with one period vesting immediately. The fair value of the award was \$12.75. The value of restricted stock awards is equal to the quoted NASDAQ market close price on the vest date. The unrecognized expense related to this award is \$5.6 million over the next 7 years.

Note 10 – Income Taxes

Income tax expense increased from \$1.0 million during the three months ended March 31, 2014 to \$1.7 million for the three months ended March 31, 2015. This increase was due to the increase in our income before income taxes, which increased from \$2.9 million during the three months ended March 31, 2014 to \$4.7 million during the three months ended March 31, 2015. Income tax expense is recognized on the statement of income during the three months ended March 31, 2015 at an effective rate of 35.9% of pretax income compared to 34.5% during the three months ended March 31, 2014.

- 20 -

---

## Note 11 – Offsetting of Assets and Liabilities

The Company enters into agreements under which it sells securities subject to an obligation to repurchase the same or similar securities. In addition, the Company enters into agreements under which it sells loans held for sale subject to an obligation to repurchase the same loans. Under these arrangements, the Company may transfer legal control over the assets but still retain effective control through an agreement that both entitles and obligates the Company to repurchase the assets. As a result, these repurchase agreements are accounted for as collateralized financing arrangements (i.e., secured borrowings) and not as a sale and subsequent repurchase of assets. The obligation to repurchase the assets is reflected as a liability in the Company's consolidated statements of condition, while the securities and loans held for sale underlying the repurchase agreements remain in the respective investment securities and loans held for sale asset accounts. In other words, there is no offsetting or netting of the investment securities or loans held for sale assets with the repurchase agreement liabilities. One of the Company's two short-term repurchase agreements and all of the Company's long-term repurchase agreements are subject to master netting agreements, which sets forth the rights and obligations for repurchase and offset. Under the master netting agreement, the Company is entitled to set off the collateral placed with a single counterparty against obligations owed to that counterparty.

The following table presents the liabilities subject to an enforceable master netting agreement as of March 31, 2015 and December 31, 2014.

	Gross Recognize Liabilities (In Thousands)	Gross Amounts Offset	Net Amounts Presented	Gross Amounts Not Offset	Net Amount
March 31, 2015					
Repurchase Agreements					
Short-term	\$-	-	-	-	-

Long-term	84,000	-	84,000	84,000	-
	\$84,000	-	84,000	84,000	-

## Note 12– Financial Instruments with Off-Balance Sheet Risk

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amounts recognized in the consolidated balance sheets. The contract or notional amounts of those instruments reflect the extent of involvement the Company has in particular classes of financial instruments.

March  
31,  
2015

December  
31, 2014

(In Thousands)

Financial instruments whose contract amounts represent potential credit risk:

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

Commitments to extend credit under amortizing loans (1)	\$30,220	18,889
Commitments to extend credit under home equity lines of credit	15,173	14,775
Unused portion of construction loans	13,369	12,333
Unused portion of business lines of credit	10,709	11,599
Standby letters of credit	645	766

---

(1) Excludes commitments to originate loans held for sale, which are discussed in the following footnote.

- 21 -

---

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements of the Company. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the counterparty. Collateral obtained generally consists of mortgages on the underlying real estate.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Company holds mortgages on the underlying real estate as collateral supporting those commitments for which collateral is deemed necessary.

The Company has determined that there are no probable losses related to commitments to extend credit or the standby letters of credit as of March 31, 2015 and December 31, 2014.

#### Note 13 – Derivative Financial Instruments

In connection with its mortgage banking activities, the Company enters into derivative financial instruments as part of its strategy to manage its exposure to changes in interest rates. Mortgage banking derivatives include interest rate lock commitments provided to customers to fund mortgage loans to be sold in the secondary market and forward commitments for the future delivery of such loans to third party investors. It is the Company's practice to enter into forward commitments for the future delivery of residential mortgage loans when interest rate lock commitments are entered into in order to economically hedge the effect of future changes in interest rates on its commitments to fund the loans as well as on its portfolio of mortgage loans held for sale. The Company's mortgage banking derivatives have not been designated as being in hedge relationships. These instruments are used to manage the Company's exposure to interest rate movements and other identified risks but do not meet the strict hedge accounting requirements of ASC 815. Changes in the fair value of derivatives not designated in hedging relationships are recorded as a component of mortgage banking income in the Company's consolidated statements of operations. The Company does not use derivatives for speculative purposes.

Forward commitments to sell mortgage loans represent commitments obtained by the Company from a secondary market agency to purchase mortgages from the Company at specified interest rates and within specified periods of time. Commitments to sell loans are made to mitigate interest rate risk on interest rate lock commitments to originate loans and loans held for sale. At March 31, 2015, the Company had forward commitments to sell mortgage loans with an aggregate notional amount of approximately \$287.9 million and interest rate lock commitments with an aggregate notional amount of approximately \$229.2 million. The fair value of the forward commitments to sell mortgage loans at March 31, 2015 included a loss of \$1.3 million that is reported as a component of other liabilities on the Company's consolidated statement of financial condition. The fair value of the interest rate locks at March 31, 2015 included a gain of \$3.6 million that is reported as a component of other assets on the Company's consolidated statements of financial condition.

In determining the fair value of its derivative loan commitments, the Company considers the value that would be generated by the loan arising from exercise of the loan commitment when sold in the secondary mortgage market. That value includes the price that the loan is expected to be sold for in the secondary mortgage market. The fair value of these commitments is recorded on the consolidated statements of financial condition with the changes in fair value recorded as a component of mortgage banking income.

Residential mortgage loans sold to others are predominantly conventional residential first lien mortgages. The Company's agreements to sell residential mortgage loans in the normal course of business usually require certain representations and warranties on the underlying loans sold related to credit information, loan documentation and collateral, which if subsequently are untrue or breached, could require the Company to repurchase certain loans affected. The Company has only been required to make insignificant repurchases as a result of its representations and warranties. The Company's agreements to sell residential mortgage loans also contain limited recourse provisions. The recourse provisions are limited in that the recourse provision ends after certain payment criteria have been met. With respect to these loans, repurchase could be required if defined delinquency issues arose during the limited recourse period. Given that the underlying loans delivered to buyers are predominantly conventional first lien mortgages and that historical experience shows negligible losses and insignificant repurchase activity, management believes that losses and repurchases under the limited recourse provisions will continue to be insignificant.

- 22 -

---

## Note 14 – Earnings Per Share

Earnings per share are computed using the two-class method. Basic earnings per share is computed by dividing net income allocated to common shares by the weighted average number of common shares outstanding during the applicable period, excluding outstanding participating securities. Participating securities include unvested restricted stock awards. Unvested restricted stock awards are considered participating securities because holders of these securities have the right to receive dividends at the same rate as holders of the Company's common stock. Diluted earnings per share is computed by dividing net income by the weighted average number of common shares outstanding adjusted for the dilutive effect of all potential common shares.

Presented below are the calculations for basic and diluted earnings per share:

	Three months ended March 31,	
	2015	2014
Net income	\$3,016	1,883
Net income available to unvested restricted shares	44	2
Net income available to common stockholders	\$2,972	1,881
Weighted average shares outstanding	32,369	34,264
Effect of dilutive potential common shares	\$281	239
Diluted weighted average shares outstanding	\$32,650	34,503
Basic earnings per share	\$0.09	0.05
Diluted earnings per share	\$0.09	0.05

## Note 15 – Fair Value Measurements

The FASB issued an accounting standard (subsequently codified into ASC Topic 820, "Fair Value Measurements and Disclosures") which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. This accounting standard applies to reported balances that are required or permitted to be measured at fair value under existing accounting pronouncements. The standard also emphasizes that fair value (i.e., the price that would be received in an orderly transaction that is not a forced liquidation or distressed sale at the measurement date), among other things, is based on exit price versus entry price, should include assumptions about risk such as nonperformance risk in liability fair values, and is a market-based measurement, not an entity-specific measurement. When considering the assumptions that market participants would use in pricing the asset or liability, this accounting standard establishes a fair value hierarchy that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within Levels 1 and 2 of the hierarchy) and the reporting entity's own assumptions about market participant assumptions (unobservable inputs classified within Level 3 of the hierarchy).

The fair value hierarchy prioritizes inputs used to measure fair value into three broad levels.

Level 1 inputs - In general, fair values determined by Level 1 inputs use quoted prices in active markets for identical assets or liabilities that we have the ability to access.

Level 2 inputs - Fair values determined by Level 2 inputs use inputs other than quoted prices included in Level 1 inputs that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets

where there are few transactions and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 inputs - Level 3 inputs are unobservable inputs for the asset or liability and include situations where there is little, if any, market activity for the asset or liability.

In instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

- 23 -

---

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

The following table presents information about our assets recorded in our consolidated statement of financial position at their fair value on a recurring basis as of March 31, 2015 and December 31, 2014, and indicates the fair value hierarchy of the valuation techniques utilized to determine such fair value.

Municipal securities	77,108	-	77,108	-
Other debt securities	7,528	2,550	4,978	-
Certificates of deposit	5,897	-	5,897	-
Loans held for sale	125,073	-	125,073	-
Mortgage banking derivative assets	1,644	-	-	1,644
Mortgage banking derivative liabilities	645	-	-	645

The following summarizes the valuation techniques for assets recorded in our consolidated statements of financial condition at their fair value on a recurring basis:

Available for sale securities – The Company's investment securities classified as available for sale include: mortgage-backed securities, collateralized mortgage obligations, government sponsored enterprise bonds, municipal securities and other debt securities. The fair value of mortgage-backed securities, collateralized mortgage obligations and government sponsored enterprise bonds are determined by a third party valuation source using observable market data utilizing a matrix or multi-dimensional relational pricing model. Standard inputs to these models include observable market data such as benchmark yields, reported trades, broker quotes, issuer spreads, benchmark securities, prepayment models and bid/offer market data. For securities with an early redemption feature, an option adjusted spread model is utilized to adjust the issuer spread. These model and matrix measurements are classified as Level 2 in

the fair value hierarchy. The fair value of municipal securities is determined by a third party valuation source using observable market data utilizing a multi-dimensional relational pricing model. Standard inputs to this model include observable market data such as benchmark yields, reported trades, broker quotes, rating updates and issuer spreads. These model measurements are classified as Level 2 in the fair value hierarchy. The fair value of other debt securities, which includes a trust preferred security issued by a financial institution, is determined through quoted prices in active markets and is classified as Level 1 in the fair value hierarchy.

Loans held for sale – The Company carries loans held for sale at fair value under the fair value option model. Fair value is generally determined by estimating a gross premium or discount, which is derived from pricing currently observable in the secondary market, principally from observable prices for forward sale commitments. Loans held-for-sale are considered to be Level 2 in the fair value hierarchy of valuation techniques.

---

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

Mortgage banking derivatives - Mortgage banking derivatives include interest rate lock commitments to originate residential loans held for sale to individual customers and forward commitments to sell residential mortgage loans to various investors. The Company relies on a valuation model to estimate the fair value of its interest rate lock commitments to originate residential mortgage loans held for sale, which includes applying a pull through rate based upon historical experience and the current interest rate environment and then multiplying by quoted investor prices. The Company also relies on a valuation model to estimate the fair value of its forward commitments to sell residential loans, which includes matching specific terms and maturities of the forward commitments against applicable investor pricing available. While there are Level 2 and 3 inputs used in the valuation models, the Company has determined that one or more of the inputs significant in the valuation of both of the mortgage banking derivatives fall within Level 3 of the fair value hierarchy.

The table below presents reconciliation for all assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during 2015 and 2014.

	Mortgage banking derivatives, net (In Thousands)
Balance at December 31, 2013	\$ 1,189
Mortgage derivative loss, net	(190 )
Balance at December 31, 2014	\$ 999
Mortgage derivative gain, net	1,290
Balance at March 31, 2015	\$ 2,289

There were no transfers in or out of Level 1, 2 or 3 measurements during the periods.

Assets Recorded at Fair Value on a Non-recurring Basis

The following table presents information about our assets recorded in our consolidated statement of financial position at their fair value on a non-recurring basis as of March 31, 2015 and December 31, 2014, and indicates the fair value hierarchy of the valuation techniques utilized to determine such fair value.

	Fair Value Measurements Using			
	March 31, 2015	Level

---

(1) Represents collateral-dependent impaired loans, net, which are included in loans.

Loans – We do not record loans at fair value on a recurring basis. On a non-recurring basis, loans determined to be impaired are analyzed to determine whether a collateral shortfall exists, and if such a shortfall exists, are recorded on our consolidated statements of financial condition at net realizable value of the underlying collateral. Fair value is determined based on third party appraisals. Appraised values are adjusted to consider disposition costs and also to take into consideration the age of the most recent appraisal. Given the significance of the adjustments made to appraised values necessary to estimate the fair value of impaired loans, loans that have been deemed to be impaired are considered to be Level 3 in the fair value hierarchy of valuation techniques. At March 31, 2015, loans determined to be impaired with an outstanding balance of \$18.1 million were carried net of specific reserves of \$3.3 million for a fair value of \$14.8 million. At December 31, 2014, loans determined to be impaired with an outstanding balance of \$22.5 million were carried net of specific reserves of \$3.7 million for a fair value of \$18.8 million. Impaired loans collateralized by assets which are valued in excess of the net investment in the loan do not require any specific reserves.

Real estate owned – On a non-recurring basis, real estate owned, is recorded in our consolidated statements of financial condition at the lower of cost or fair value. Fair value is determined based on third party appraisals and, if less than the carrying value of the foreclosed loan, the carrying value of the real estate owned is adjusted to the fair value.

Appraised values are adjusted to consider disposition costs and also to take into consideration the age of the most recent appraisal. Given the significance of the adjustments made to appraised values necessary to estimate the fair value of the properties, real estate owned is considered to be Level 3 in the fair value hierarchy of valuation techniques. Changes in the value of real estate owned totaled \$175,000 and \$163,000 during the three months ended March 31, 2015 and 2014, respectively and are recorded in real estate owned expense. At March 31, 2015 and December 31, 2014, real estate owned totaled \$19.6 million and \$18.7 million, respectively.

Mortgage servicing rights - The Company utilizes an independent valuation from a third party which uses a discounted cash flow model to estimate the fair value of mortgage servicing rights. The model utilizes prepayment assumptions to project cash flows related to the mortgage servicing rights based upon the current interest rate environment, which is then discounted to estimate an expected fair value of the mortgage servicing rights. The model considers characteristics specific to the underlying mortgage portfolio, such as: contractually specified servicing fees, prepayment assumptions, delinquency rates, late charges and costs to service. Given the significance of the unobservable inputs utilized in the estimation process, mortgage servicing rights are classified as Level 3 within the fair value hierarchy. The Company records the mortgage servicing rights at the lower of amortized cost or fair value. At March 31, 2015 and December 31, 2014, the company determined that \$990,000 and \$9,000, respectively of mortgage servicing rights were partially impaired, and as a result, recorded an impairment valuation allowance of \$20,000 and \$10,000, respectively.

For Level 3 assets and liabilities measured at fair value on a recurring or non-recurring basis as of March 31, 2015, the significant unobservable inputs used in the fair value measurements were as follows:

	Fair Value at March 31, 2015	Valuation Technique	Significant Unobservable Inputs	Significant Unobservable Input Value	
				Minimum Value	Maximum Value
Mortgage banking derivatives	\$2,289	Pricing models	Pull through rate	66.1 %	100.0 %
Impaired loans	14,828	Market approach	Discount rates applied to appraisals	15.0 %	30.0 %
Real estate owned	19,579	Market approach	Discount rates applied to appraisals	0 %	89.4 %
Mortgage servicing rights	990	Pricing models	Prepayment rate	6.1 %	38.5 %
			Discount rate	10.0 %	11.0 %
			Cost to service	\$76.98	\$ 161.60

The significant unobservable inputs used in the fair value measurement of the Company's mortgage banking derivatives, including interest rate lock commitments is the loan pull through rate. This represents the percentage of loans currently in a lock position which the Company estimates will ultimately close. Generally, the fair value of an interest rate lock commitment will be positively (negatively) impacted when the prevailing interest rate is lower (higher) than the interest rate lock commitment. Generally, an increase in the pull through rate will result in the fair value of the interest rate lock increasing when in a gain position, or decreasing when in a loss position. The pull through rate is largely dependent on the loan processing stage that a loan is currently in and the change in prevailing interest rates from the time of the rate lock. The pull through rate is computed using historical data and the ratio is periodically reviewed by the Company.

The significant unobservable inputs used in the fair value measurement of collateral for collateral-dependent impaired loans and real estate owned included in the above table primarily relate to discounting criteria applied to independent appraisals received with respect to the collateral. Discounts applied to the appraisals are dependent on the vintage of the appraisal as well as the marketability of the property. The discount factor is computed using actual realization rates on properties that have been foreclosed upon and liquidated in the open market.

The significant unobservable inputs used in the fair value measurement of mortgage servicing rights include the prepayment rate, note rate, and cost to service. The prepayment rate represents the assumed rate of prepayment of the outstanding principal balance of the underlying mortgage notes. Generally, the fair value of mortgage servicing rights will be positively (negatively) impacted when the prepayment rate (decreases) increases. The note rate represents the contractual rate on the underlying mortgages.

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

Fair value information about financial instruments follows, whether or not recognized in the consolidated statements of financial condition, for which it is practicable to estimate that value. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the instrument. Certain financial instruments and all nonfinancial instruments are excluded from its disclosure requirements. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company.

The carrying amounts and fair values of the Company's financial instruments consist of the following:

	March 31, 2015					December 31, 2014				
	Carrying amount	Fair Value Total	Level 1	Level 2	Level 3	Carrying amount	Fair Value Total	Level 1	Level 2	Level 3

Mortgage banking derivative liabilities	1,299	1,299	-	-	1,299	645	645	-	-	645

The following methods and assumptions were used by the Company in determining its fair value disclosures for financial instruments.

Cash and Cash Equivalents

The carrying amount reported in the consolidated statements of financial condition for cash and cash equivalents is a reasonable estimate of fair value.

Securities

The fair value of securities is determined by a third party valuation source using observable market data utilizing a matrix or multi-dimensional relational pricing model. Standard inputs to these models include observable market data such as benchmark yields, reported trades, broker quotes, issuer spreads, benchmark securities and bid/offer market data. For securities with an early redemption feature, an option adjusted spread model is utilized to adjust the issuer spread. Prepayment models are used for mortgage related securities with prepayment features.

- 27 -

---

#### Loans Held for Sale

Fair value is estimated using the prices of the Company's existing commitments to sell such loans and/or the quoted market price for commitments to sell similar loans.

#### Loans Receivable

Loans determined to be impaired are analyzed to determine whether a collateral shortfall exists, and if such a shortfall exists, are recorded on our consolidated statements of financial condition at fair value. Fair value is determined based on third party appraisals. Appraised values are adjusted to consider disposition costs and also to take into consideration the age of the most recent appraisal. With respect to loans that are not considered to be impaired, fair value is estimated by discounting the future contractual cash flows using discount rates that reflect a current rate offered to borrowers of similar credit standing for the remaining term to maturity. This method of estimating fair value does not incorporate the exit-price concept of fair value prescribed by ASC 820-10 and generally produces a higher fair value.

#### FHLBC Stock

For FHLBC stock, the carrying amount is the amount at which shares can be redeemed with the FHLBC and is a reasonable estimate of fair value.

#### Deposits and Advance Payments by Borrowers for Taxes

The fair values for interest-bearing and noninterest-bearing negotiable order of withdrawal accounts, savings accounts, and money market accounts are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). The fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates of similar remaining maturities to a schedule of aggregated expected monthly maturities of the outstanding certificates of deposit. The advance payments by borrowers for taxes are equal to their carrying amounts at the reporting date.

#### Borrowings

Fair values for borrowings are estimated using a discounted cash flow calculation that applies current interest rates to estimated future cash flows of the borrowings.

#### Accrued Interest Payable and Accrued Interest Receivable

For accrued interest payable and accrued interest receivable, the carrying amount is a reasonable estimate of fair value.

#### Commitments to Extend Credit and Standby Letters of Credit

Commitments to extend credit and standby letters of credit are generally not marketable. Furthermore, interest rates on any amounts drawn under such commitments would be generally established at market rates at the time of the draw. Fair values for the Company's commitments to extend credit and standby letters of credit are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements, the counterparty's credit standing, and discounted cash flow analyses. The fair value of the Company's commitments to extend credit is not material at March 31, 2015 and December 31, 2014.

#### Mortgage Banking Derivative Assets and Liabilities

Mortgage banking derivatives include interest rate lock commitments to originate residential loans held for sale to individual customers and forward commitments to sell residential mortgage loans to various investors. The Company relies on a valuation model to estimate the fair value of its interest rate lock commitments to originate residential mortgage loans held for sale, which includes applying a pull through rate based upon historical experience and the current interest rate environment, and then multiplying by quoted investor prices. The Company also relies on a valuation model to estimate the fair value of its forward commitments to sell residential loans, which includes matching specific terms and maturities of the forward commitments against applicable investor pricing available. On the Company's Consolidated Statements of Condition, instruments that have a positive fair value are included in prepaid expenses and other assets, and those instruments that have a negative fair value are included in other liabilities.

## Note 16 – Segment Reporting

Selected financial and descriptive information is required to be provided about reportable operating segments, considering a "management approach" concept as the basis for identifying reportable segments. The management approach is based on the way that management organizes the segments within the enterprise for making operating decisions, allocating resources, and assessing performance. Consequently, the segments are evident from the structure of the enterprise's internal organization, focusing on financial information that an enterprise's chief operating decision-makers use to make decisions about the enterprise's operating matters. The Company has determined that it has two reportable segments: community banking and mortgage banking. The Company's operating segments are presented based on its management structure and management accounting practices. The structure and practices are specific to the Company and therefore, the financial results of the Company's business segments are not necessarily comparable with similar information for other financial institutions.

## Community Banking

The Community Banking segment provides consumer and business banking products and services to customers primarily within Southeastern Wisconsin along with a loan production office in Minneapolis, Minnesota. Within this segment, the following products and services are provided: (1) lending solutions such as residential mortgages, home equity loans and lines of credit, personal and installment loans, real estate financing, business loans, and business lines of credit; (2) deposit and transactional solutions such as checking, credit, debit and pre-paid cards, online banking and bill pay, and money transfer services; (3) investable funds solutions such as savings, money market deposit accounts, IRA accounts, certificates of deposit, and (4) fixed and variable annuities, insurance as well as trust and investment management accounts.

Consumer products include loan and deposit products: mortgage, home equity loans and lines, personal term loans, demand deposit accounts, interest bearing transaction accounts and time deposits. Consumer products also include personal investment services. Business banking products include secured and unsecured lines and term loans for working capital, inventory and general corporate use, commercial real estate construction loans, demand deposit accounts, interest bearing transaction accounts and time deposits.

## Mortgage Banking

The Mortgage Banking segment provides residential mortgage loans for the purpose of sale on the secondary market. Mortgage banking products and services are provided by offices in 17 states.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Information

This Form 10-Q contains or incorporates by reference various forward-looking statements, which can be identified by the use of words such as "estimate," "project," "believe," "intend," "anticipate," "plan," "seek," "expect" and similar expressions and verbs in the future tense, are intended to identify forward-looking statements. These forward-looking statements include, but are not limited to:

- Statements of our goals, intentions and expectations;
- Statements regarding our business plans, prospects, growth and operating strategies;
- Statements regarding the quality of our loan and investment portfolio;
- Estimates of our risks and future costs and benefits.

These forward-looking statements are based on current beliefs and expectations of our management and are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control. In addition, these forward-looking statements are subject to assumptions with respect to future business strategies and decisions that are subject to change.

The following factors, among others, could cause actual results to differ materially from the anticipated results or other expectations expressed in the forward-looking statements.

- general economic conditions, either nationally or in our market area, that are worse than expected;
- competition among depository and other financial institutions;
- inflation and changes in the interest rate environment that reduce our margins and yields, our mortgage banking revenues or reduce the fair value of financial instruments or reduce the origination levels in our lending business, or
- increase the level of defaults, losses or prepayments on loans we have made and make whether held in portfolio or sold in the secondary markets;
- adverse changes in the securities or secondary mortgage markets;
- changes in laws or government regulations or policies affecting financial institutions, including changes in regulatory fees and capital requirements;
- our ability to manage market risk, credit risk and operational risk in the current economic conditions;
- our ability to enter new markets successfully and capitalize on growth opportunities;
- our ability to successfully integrate acquired entities;
- changes in consumer spending, borrowing and savings habits;
- changes in accounting policies and practices, as may be adopted by the bank regulatory agencies, the Financial Accounting Standards Board, the Securities and Exchange Commission or the Public Company Accounting Oversight Board;
- our ability to retain key employees;
- significant increases in our loan losses; and
- changes in the financial condition, results of operations or future prospects of issuers of securities that we own.

See also the factors referred to in reports filed by the Company with the Securities and Exchange Commission (particularly those under the caption "Risk Factors" in Item 1A of the Company's 2014 Annual Report on Form 10-K).

## Overview

The following discussion and analysis is presented to assist the reader in the understanding and evaluation of the Company's financial condition and results of operations. It is intended to complement the unaudited consolidated financial statements, footnotes, and supplemental financial data appearing elsewhere in this Form 10-Q and should be read in conjunction therewith. The detailed discussion in the sections below focuses on the results of operations for the three months ended March 31, 2015 and 2014 and the financial condition as of March 31, 2015 compared to the financial condition as of December 31, 2014.

As described in the notes to consolidated financial statements, we have two reportable segments: community banking and mortgage banking. The Community Banking segment provides consumer and business banking products and services to customers. Consumer products include loan products, deposit products, and personal investment services. Business banking products include loans for working capital, inventory and general corporate use, commercial real estate construction loans, and deposit accounts. Mortgage banking, which is conducted through Waterstone Mortgage Corporation, consists of originating residential mortgage loans for sale in the secondary market.

Our community banking segment generates the significant majority of our consolidated net interest income and requires the significant majority of our provision for loan losses. Our mortgage banking segment generates the significant majority of our non-interest income and a majority of our non-interest expense. We have provided below a discussion of the material results of operations for each segment on a separate basis for the three months ended March 31, 2015 and 2014, which focuses on a discussion of non-interest income and non-interest expense. We have also provided a discussion of the consolidated operations of Waterstone Financial, which includes the consolidated operations of WaterStone Bank and Waterstone Mortgage Corporation, for the same periods.

### Comparison of Community Banking Segment for the Three Months Ended March 31, 2015 and 2014

Net income for the three months ended March 31, 2015 totaled \$1.6 million compared to net income of \$1.8 million for the three months ended March 31, 2014. Net interest income decreased \$128,000 to \$9.2 million for the three months ended March 31, 2015 compared to \$9.4 million the three months ended March 31, 2014. Compensation, payroll taxes, and other employee benefits expense increased offset by a reduction in other expenses for the three months ended March 31, 2015 compared to the three months ended March 31, 2014.

### Comparison of Mortgage Banking Segment Operations for the Three Months Ended March 31, 2015 and 2014

Net income totaled \$1.4 million for the three months ended March 31, 2015, compared to \$30,000 during the three months ended March 31, 2014. Mortgage banking segment revenues increased \$4.7 million, or 28.0%, to \$21.3 million for the three months ended March 31, 2015 compared to \$16.7 million for the three months ended March 31, 2014. The increase in revenue was attributable to an increase in volume. While revenue increased 28.0%, noninterest expense increased \$2.3 million, or 13.6%, to \$19.0 million for the three months ended March 31, 2015 compared to \$16.8 million for the three months ended March 31, 2014. The improvement is due to ongoing expense control efforts.

## Average Balance Sheets, Interest and Yields/Costs

The following tables set forth average balance sheets, annualized average yields and costs, and certain other information for the periods indicated. Non-accrual loans were included in the computation of the average balances of loans receivable and held for sale. The yields set forth below include the effect of deferred fees, discounts and premiums that are amortized or accreted to interest income or expense. Yields on interest-earning assets are computed on a fully tax-equivalent yield, where applicable.

---	----------	----------

---

(1) Interest income includes net deferred loan fee amortization income of \$117,000 and \$138,000 for the three months ended March 31, 2015 and 2014, respectively.

(2) Average balance of mortgage related and debt securities are based on amortized historical cost.

(3) Interest income from tax exempt securities is computed on a taxable equivalent basis using a tax rate of 35% for all periods presented. The yields on debt securities, federal funds sold and short-term investments before tax-equivalent adjustments were 1.14% and 0.80% for the three months ended March 31, 2015 and 2014, respectively.

(4) Net interest rate spread represents the difference between the yield on average interest-earning assets and the cost of average interest-bearing liabilities and is presented on a fully tax equivalent basis.

(5) Net interest-earning assets represent total interest-earning assets less total interest-bearing liabilities.

(6) Net interest margin represents net interest income divided by average total interest-earning assets.

## Rate/Volume Analysis

The following table sets forth the effects of changing rates and volumes on our net interest income for the periods indicated. The rate column shows the effects attributable to changes in rate (changes in rate multiplied by prior volume). The volume column shows the effects attributable to changes in volume (changes in volume multiplied by prior rate). The net column represents the sum of the prior columns. For purposes of this table, changes attributable to changes in both rate and volume that cannot be segregated have been allocated proportionately based on the changes due to rate and the changes due to volume.

	Three months ended March 31, 2015 versus 2014 Increase (Decrease) due to		
	Volume	Rate	Net
	(In Thousands)		
Interest income:			
Loans receivable and held for sale (1)(2)	\$321	(677)	(356)
Mortgage related securities (3)	268	12	280
Other earning assets (3) (4)	(608)	700	92
Total interest-earning assets	(19 )	35	16
Interest expense:			
Demand accounts	(4 )	5	1
Money market and savings accounts	(27 )	25	(2 )
Time deposits	111	183	294
Total interest-earning deposits	80	213	293
Borrowings	(128)	64	(64 )
Total interest-bearing liabilities	(48 )	277	229
Net change in net interest income	\$29	(242)	(213)

(1) Interest income includes net deferred loan fee amortization income of \$117,000 and \$138,000 for the three months ended March 31, 2015 and 2014, respectively.

(2) Non-accrual loans have been included in average loans receivable balance.

(3) Includes available for sale securities. Average balance of available for sale securities is based on amortized historical cost.

(4) Interest income from tax exempt securities is computed on a taxable equivalent basis using a tax rate of 35% for all periods presented.

Net interest income decreased \$264,000, or 2.7%, to \$9.4 million during the three months ended March 31, 2015 compared to \$9.7 million during the three months ended March 31, 2014.

Interest income on loans decreased due to a 17 basis point decrease in average yield on loans.

Interest income from mortgage-related securities increased due to an increase in the average balance of

mortgage-related securities. Funds received from the second step offering completed in January 2014 were used to purchase additional securities throughout 2014.

Interest income from other interest earning assets (comprised of debt securities, federal funds sold and short-term investments) increased slightly due to an increase in higher yielding municipal securities balance in 2015 compared to cash being held in 2014. The decrease in average balance reflects utilization of the \$248.3 million in net proceeds that were received from our stock offering during January 2014 to purchase securities and fund loans held for sale.

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

Interest expense on deposits increased primarily due to an increase in the average cost of time deposits of 16 basis points along with a higher average balance.

Interest expense on borrowings decreased slightly due to the decreased use of short-term repurchase agreements within our mortgage banking segment to fund loan originations to be sold in the secondary market during the three months ended March 31, 2015.

- 33 -

---

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

Provision for Loan Losses – Our provision for loan losses increased \$85,000, or 34.0%, to \$335,000 during the three months ended March 31, 2015, from \$250,000 during the three months ended March 31, 2014.

The provision is primarily a function of the Company's reserving methodology and assessments of certain quantitative and qualitative factors which are used to determine an appropriate allowance for loan losses for the period. See further discussion regarding the allowance for loan losses in the "Asset Quality" section for an analysis of charge-offs, nonperforming assets, specific reserves and additional provisions and the "Allowance for Loan Loss" section.

Noninterest Income

	Three months ended March 31,				
	2015	2014	\$ Change	% Change	
	(Dollars in Thousands)				
Service charges on loans and deposits	\$406	254	152	59.8	%
Increase in cash surrender value of life insurance	207	146	61	41.8	%
Mortgage banking income	21,039	14,503	6,536	45.1	%
Gain on sale of available for sale securities	44	-	44	N/	M
Other	337	2,155	(1,818 )	(84.4 )	%
Total noninterest income	\$22,033	17,058	4,975	29.2	%
N/M - Not meaningful					

Total noninterest income increased \$5.0 million, or 29.2%, to \$22.0 million during the three months ended March 31, 2015 compared to \$17.1 million during the three months ended March 31, 2014. The increase resulted primarily from an increase in mortgage banking income offset by a decrease in other noninterest income.

The increase in mortgage banking income was the result of an increase in origination volumes. The volume increased \$103.7 million, or 35.1%, to \$399.0 million during the three months ended March 31, 2015 compared to a \$295.3 million during the three months ended March 31, 2014.

The decrease in other noninterest income is primarily due to a decrease on the sale of mortgage servicing rights which resulted in a \$6,000 gain during the three months ended March 31, 2015 compared to a \$1.8 million gain during the three months ended March 31, 2014.

The Company sold one municipal security at a gain in the current period compared to none in the prior year period.

Noninterest Expense

	Three months ended March 31,				
	2015	2014	\$ Change	% Change	
	(Dollars in Thousands)

## Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

Total noninterest expense increased \$2.8 million, or 11.8%, to \$26.4 million during the three months ended March 31, 2015 compared to \$23.6 million during the three months ended March 31, 2014.

Compensation, payroll taxes and other employee benefit expense increased \$2.1 million due to an increase in loan origination activity, total compensation, payroll taxes and other benefits at our mortgage banking subsidiary. The increase in compensation at our mortgage banking subsidiary correlates to the increase in mortgage banking income due to the commission-based compensation structure in place for our mortgage banking loan officers.

Compensation, payroll taxes and other employee benefit expense increased \$1.0 million at the Community Banking segment primarily due to stock awards granted in 2015, which included restricted awards granted, a portion which vested immediately, resulting in an additional year's \$1.2 million in expense for the period.

Occupancy expense decreased resulting from less snow removal expense in the current compared to prior year.

Other noninterest expense decreased primarily due to a reduced provision for mortgage banking segment branch losses due to increased revenue with high mortgage volumes and continued focus on controlling expenses.

Income Taxes – Driven by an increase in pre-tax income, income tax expense increased \$697,000, or 70.2%, to \$1.7 million during the three months ended March 31, 2015, compared to \$993,000 during the three months ended March 31, 2014. Income tax expense was recognized during the three months ended March 31, 2015 at an effective rate of 35.9% compared to an effective rate of 34.5% during the three months ended March 31, 2014.

### Comparison of Financial Condition at March 31, 2015 and December 31, 2014

Total Assets - Total assets decreased by \$17.3 million, or 1.0%, to \$1.77 billion at March 31, 2015 from \$1.78 billion at December 31, 2014. The decrease in total assets primarily reflects a decrease in loans receivable.

Cash and Cash Equivalents – Cash and cash equivalents decreased \$30.4 million, or 17.6%, to \$142.4 million at March 31, 2015, compared to \$172.8 million at December 31, 2014. The decrease in cash and cash equivalents primarily reflects the slight decrease in deposits, increase in loans held for sale, and repurchase of shares. Offsetting these reductions to cash and cash equivalents, loans receivable decreased from December 31, 2014.

Securities Available for Sale – Securities available for sale increased slightly at March 31, 2015 compared to December 31, 2014. This increase reflects purchases of government sponsored enterprise issued collateralized mortgage obligations and appreciation of securities offset by paydowns in mortgage-related securities.

Loans Held for Sale - Loans held for sale increased at March 31, 2015 due to increased volumes at our mortgage subsidiary compared to the fourth quarter of 2014.

Loans Receivable - Loans receivable held for investment decreased \$30.2 million, or 2.8%, to \$1.06 billion at March 31, 2015 from \$1.09 billion at December 31, 2014. The decrease in total loans receivable was primarily attributable to decreases in retail and multi-family loans, as prepayments occurred more frequently in the first three months of the year, and loans that were transferred to real estate owned.

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

The following table shows loan origination, loan purchases, principal repayment activity, transfers to real estate owned, charge-offs and sales during the periods indicated.

	As of or for the Three months ended March 31,		As of or for the Year Ended December 31, 2014
	2015	2014	
	(In Thousands)		
Total gross loans receivable and held for sale at beginning of period	\$1,220,063	1,189,697	1,189,697
Real estate loans originated for investment:			
Residential			
One- to four-family	6,808	9,582	48,325
Multi-family	10,993	18,182	88,958
Home equity	1,576	349	4,177
Construction and land	529	497	8,806
Commercial real estate	2,394	9,066	29,294
Total real estate loans originated for investment	22,300	37,676	179,560
Consumer loans originated for investment	73	-	10
Commercial business loans originated for investment	1,917	3,222	7,863
Total loans originated for investment	24,290	40,898	187,433
Principal repayments	(45,521 )	(25,709 )	(159,619 )
Transfers to real estate owned	(6,898 )	(3,511 )	(16,645 )
Loan principal charged-off	(2,103 )	(1,778 )	(8,855 )
Net activity in loans held for investment	(30,232 )	9,900	2,314
Loans originated for sale	398,990	295,266	1,661,376
Loans sold	(359,215 )	(285,438 )	(1,633,324)
Net activity in loans held for sale	39,775	9,828	28,052
Total gross loans receivable and held for sale at end of period	\$1,229,606	1,209,425	1,220,063

Allowance for Loan Losses - The allowance for loan losses decreased at March 31, 2015 from December 31, 2014. The decrease resulted from the charge-off of specific reserves and improvement of key loan quality metrics. The decrease was primarily in the multi-family and one- to four-family categories. The remaining categories were consistent with the amounts at December 31, 2014.

Real Estate Owned - Total real estate owned increased from December 31, 2014. During the three months ended March 31, 2015, \$6.9 million was transferred from loans receivable to real estate owned upon completion of foreclosure. During the same period, sales of real estate owned totaled \$6.0 million. Declines in property values evidenced by updated appraisals, responses to list prices on properties held for sale and/or deterioration in the condition of properties resulted in minimal write downs during the three months ended March 31, 2015.

Deposits - Total deposits decreased \$9.2 million to \$854.7 million at March 31, 2015 from December 31, 2014. The decrease was driven by a decrease in time deposits partially offset by an increase in transaction accounts.

Borrowings - Total borrowings remained constant at \$434.0 million at March 31, 2015 and December 31, 2014. The use of short-term repurchase agreements to finance loans held for sale are used less frequently as loans held for sale

are mostly funded internally.

- 36 -

---

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

Advance Payments by Borrowers for Taxes - Advance payments by borrowers for taxes increased. The increase was the result of payments received from borrowers for their real estate taxes and is seasonally normal, as balances increase during the course of the calendar year until real estate tax obligations are paid out in the fourth quarter.

Other Liabilities - Other liabilities decreased \$11.3 million at March 31, 2015 compared to December 31, 2014. Of the total decrease, \$9.2 million related to a seasonal decrease in outstanding checks related to advance payments by borrowers for taxes. The Company receives payments from borrowers for their real estate taxes during the course of the calendar year until real estate tax obligations are paid out in the fourth quarter. At the time at which the disbursements are made, the outstanding checks are classified as other liabilities. These amounts remain classified as other liabilities until settled.

Shareholders' Equity - Shareholders' equity decreased by \$916,000 to \$449.3 million at March 31, 2015 from December 31, 2014. The decrease in shareholders' equity was due to the stock repurchase program initiated in the first quarter and the dividend declared. This decrease was offset by net income, the stock compensation awards, and the increase in accumulated other comprehensive income.

ASSET QUALITY

	At March 31, 2015	At December 31, 2014		
	(Dollars in Thousands)			
Non-accrual loans:				
Residential				
One- to four-family	\$24,655	23,918		
Multi-family	6,970	12,001		
Home equity	421	445		
Construction and land	483	401		
Commercial real estate	439	947		
Commercial	37	299		
Consumer	-	-		
Total non-accrual loans	33,005	38,011		
Real estate owned				
One- to four-family	10,920	10,796		
Multi-family	2,984	2,210		
Construction and land	5,375	5,400		
Commercial real estate	300	300		
Total real estate owned	19,579	18,706		
Total nonperforming assets	\$52,584	56,717		
Total non-accrual loans to total loans, net	3.10	%	3.47	%
Total non-accrual loans to total assets	1.87	%	2.13	%
Total nonperforming assets to total assets	2.98	%	3.18	%

All loans that exceed 90 days past due with respect to principal and interest are recognized as non-accrual. Troubled debt restructurings that are non-accrual either due to being past due greater than 90 days or which have not yet performed under the modified terms for a reasonable period of time, are included in the table above. In addition, loans that are past due less than 90 days are evaluated to determine the likelihood of collectability given other credit risk factors such as early stage delinquency, the nature of the collateral or the results of a borrower review. When the collection of all contractual principal and interest is determined to be unlikely, the loan is moved to non-accrual status and an updated appraisal of the underlying collateral is ordered. This process generally takes place between contractual past due dates 60 to 90 days. Upon determining the updated estimated value of the collateral, a loan loss provision is recorded to establish a specific reserve to the extent that the outstanding principal balance exceeds the updated estimated net realizable value of the collateral. When a loan is determined to be uncollectible, typically coinciding with the initiation of foreclosure action, the specific reserve is reviewed for adequacy, adjusted if necessary, and charged-off.

- 37 -

---

The following table sets forth activity in our non-accrual loans for the periods indicated.

	At or for the Three Months Ended March 31, 2015      2014 (In Thousands)	
Balance at beginning of period	\$38,011	50,961
Additions	4,034	4,151
Transfers to real estate owned	(6,898 )	(3,511 )
Charge-offs	(673 )	(1,439 )
Returned to accrual status	(258 )	(1,181 )
Principal paydowns and other	(1,211 )	(1,664 )
Balance at end of period	\$33,005	47,317

Total non-accrual loans decreased by \$5.0 million, or 13.2%, to \$33.0 million as of March 31, 2015 compared to \$38.0 million as of December 31, 2014. The ratio of non-accrual loans to total loans receivable was 3.10% at March 31, 2015 compared to 3.47% at December 31, 2014. During the three months ended March 31, 2015, \$6.9 million were transferred to real estate owned, \$673,000 in loan principal was charged off, \$258,000 in loans were returned to accrual status and approximately \$1.2 million in principal payments were received. Offsetting this activity, \$4.0 million in loans were placed on non-accrual status during the three months ended March 31, 2015.

Of the \$33.0 million in total non-accrual loans as of March 31, 2015, \$31.6 million in loans have been specifically reviewed to assess whether a specific valuation allowance is necessary. A specific valuation allowance is established for an amount equal to the impairment when the carrying value of the loan exceeds the present value of expected future cash flows, discounted at the loan's original effective interest rate or the fair value of the underlying collateral with an adjustment made for costs to dispose of the asset. Based upon these specific reviews, a total of \$5.2 million in cumulative partial charge-offs have been recorded with respect to these loans as of March 31, 2015. Partially charged-off loans measured for impairment based upon net realizable collateral value are maintained in a "non-performing" status and are disclosed as impaired loans. In addition, specific reserves totaling \$2.8 million have been recorded as of March 31, 2015. The remaining \$1.4 million of non-accrual loans were reviewed on an aggregate basis and \$344,000 in general valuation allowance was deemed necessary related to those loans as of March 31, 2015. The \$344,000 in general valuation allowance is based upon a migration analysis performed with respect to similar non-accrual loans in prior periods.

Our largest non-accrual loan was collateralized by single-family residential real estate located in Colorado. This loan had a principal balance of \$2.2 million at March 31, 2015, as well as a specific reserve of \$384,000. Our second largest non-accrual loan was collateralized by multi-family residential real estate located in southeastern Wisconsin. This loan had a principal balance of \$1.5 million, which is net of life-to-date charge-offs of \$454,000, at March 31, 2015, as well as a specific reserve of \$77,000. Our third largest non-accrual loan as of March 31, 2015 was collateralized by single-family residential real estate located in southeastern Wisconsin. This loan had a principal balance of \$1.4 million, which is net of life-to-date charge-offs of \$815,000 at March 31, 2015, as well as a specific reserve of \$43,000. Our fourth largest non-accrual loan as of March 31, 2015 was collateralized by single-family real estate located in southeastern Wisconsin with a principal balance of \$1.3 million, and a specific valuation of \$120,000. Our next largest non-accrual loan as of March 31, 2015 was collateralized by multi-family residential real estate located in southeastern Wisconsin. This loan had a principal balance of \$1.2 million, which is net of life-to-date charge-offs of \$948,000, at March 31, 2015. Together, these five largest non-accrual loans comprised 23.2% of total non-accrual loans at March 31, 2015.

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

For the three months ended March 31, 2015, gross interest income that would have been recorded had our non-accruing loans been current in accordance with their original terms was \$508,000. We recognized \$321,000 of interest income on such loans during the three months ended March 31, 2015.

There were no accruing loans past due 90 days or more during the three months ended March 31, 2015 or 2014.

---

## TROUBLED DEBT RESTRUCTURINGS

The following table summarizes information with respect to the accrual status of our troubled debt restructurings is provided in the following table:

	As of March 31, 2015		
	Accruing	Non-accruing	Total
	(In Thousands)		
One- to four-family	\$4,702	9,848	14,550
Multi-family	2,915	2,147	5,062
Home equity	-	98	98
Construction and land	1,866	-	1,866
Commercial real estate	1,306	170	1,476
	\$10,789	12,263	23,052
	As of December 31, 2014		
	Accruing	Non-accruing	Total
One- to four-family	\$4,724	10,233	14,957
Multi-family	2,923	4,797	7,720
Home equity	-	98	98
Construction and land	1,866	-	1,866
Commercial real estate	1,306	170	1,476
	\$10,819	15,298	26,117

All troubled debt restructurings are considered to be impaired and are risk rated as either substandard or watch and are included in the internal risk rating tables disclosed in the notes to the financial statements. Specific reserves have been established to the extent that collateral-based impairment analyses indicate that a collateral shortfall exists.

We do not participate in government-sponsored troubled debt restructuring programs. Our troubled debt restructurings are short-term modifications. Typical initial restructured terms include six to twelve months of principal forbearance, a reduction in interest rate or both. Restructured terms do not include a reduction of the outstanding principal balance unless mandated by a bankruptcy court. Troubled debt restructuring terms may be renewed or further modified at the end of the initial term for an additional period if performance has been acceptable and the short-term borrower difficulty persists.

If a restructured loan is current in all respects and a minimum of six consecutive restructured payments have been received, it can be considered for return to accrual status. After a restructured loan that is current in all respects reverts to contractual/market terms, if a credit department review indicates no evidence of elevated market risk, the loan is removed from the troubled debt restructuring classification.

## LOAN DELINQUENCY

The following table summarizes loan delinquency in total dollars and as a percentage of the total loan portfolio

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

	At March 31, 2015	At December 31, 2014		
	(Dollars in Thousands)			
Loans past due less than 90 days	\$6,666	9,022		
Loans past due 90 days or more	20,066	25,112		
Total loans past due	\$26,732	34,134		
Total loans past due to total loans receivable	2.51	%	3.12	%

Past due loans decreased by \$7.4 million, or 21.7%, to \$26.7 million at March 31, 2015 from \$34.1 million at December 31, 2014. Loans past due 90 days or more decreased by \$5.0 million, or 20.1%, during the three months ended March 31, 2015 and loans past due less than 90 days decreased by \$2.4 million, or 26.1%. The \$5.0 million decrease in loans past due 90 days or more was primarily due to \$6.9 million in loans transferred to real estate owned during the three months ended March 31, 2015 offset by additional loans which were included in the less than 90 day group in the previous period. The \$2.4 million decrease in loans past due less than 90 days or more was primarily attributable to a decrease in delinquent loans collateralized by one- to four-family loans as one significant relationship entered the past 90 days due category.

## REAL ESTATE OWNED

Total real estate owned increased by \$873,000, or 4.7%, to \$19.6 million at March 31, 2015, compared to \$18.7 million at December 31, 2014. During the three months ended March 31, 2015, \$6.9 million was transferred from loans to real estate owned upon completion of foreclosure including a \$1.5 million relationship in the current quarter. Declines in property values evidenced by updated appraisals, responses to list prices on properties held for sale and/or deterioration in the condition of properties resulted in write-downs totaling \$175,000 during the three months ended March 31, 2015. During the same period, sales of real estate owned totaled \$5.9 million, resulting in a net gain of \$416,000. New appraisals received on real estate owned and collateral dependent impaired loans are based upon an "as is value" assumption. During the period of time in which we are awaiting receipt of an updated appraisal, loans evaluated for impairment based upon collateral value are measured by the following:

- Applying an updated adjustment factor (as described previously) to an existing appraisal;
- Confirming that the physical condition of the real estate has not significantly changed since the last valuation date;
- Comparing the estimated current value of the collateral to that of updated sales values experienced on similar collateral;
- Comparing the estimated current value of the collateral to that of updated values seen on current appraisals of similar collateral; and
- Comparing the estimated current value to that of updated listed sales prices on our real estate owned and that of similar properties (not owned by the Company).

Virtually all habitable real estate owned is managed with the intent of attracting a lessee to generate revenue. Foreclosed properties are recorded at the lower of carrying value or fair value, less costs to sell, with charge-offs, if any, charged to the allowance for loan losses upon transfer to real estate owned. The fair value is primarily based upon updated appraisals in addition to an analysis of current real estate market conditions.

## ALLOWANCE FOR LOAN LOSSES

	At or for the Three Months Ended March 31, 2015      2014 (Dollars in Thousands)	
Balance at beginning of period	\$18,706	24,264
Provision for loan losses	335	250
Charge-offs:		
Mortgage		
One- to four-family	769	628
Multi-family	1,243	848
Home equity	48	12
Commercial real estate	43	-
Construction and land	-	46
Consumer	-	-
Commercial	-	243

Edgar Filing: Waterstone Financial, Inc. - Form 10-Q

Total charge-offs	2,103	1,777
Recoveries:		
Mortgage		
One- to four-family	229	592
Multi-family	520	3
Home equity	60	3
Commercial real estate	5	6
Construction and land	13	48
Consumer	2	1
Commercial	-	1
Total recoveries	829	654
Net charge-offs	1,274	1,123
Allowance at end of period	\$17,767	23,391

Ratios:

Allowance for loan losses to non-accrual loans at end of period	53.83 %	49.43 %
Allowance for loan losses to loans receivable at end of period	1.67 %	2.12 %
Net charge-offs to average loans outstanding (annualized)	0.48 %	0.39 %
Current period provision for loan losses to net charge-offs	26.30 %	22.25 %
Net charge-offs (annualized) to beginning of the period allowance	27.62 %	18.78 %

At March 31, 2015, the allowance for loan losses was \$17.8 million, compared to \$18.7 million at December 31, 2014. The decrease in the allowance for loan losses during the three months ended March 31, 2015 reflects improvement in both the quality of the loan portfolio as well as stabilization the overall local real estate market. The Company has experienced improvement in a number of key loan-related loan quality metrics compared to December 31, 2014, including impaired loans, substandard loans, loans contractually past due and non-accrual loans.

Net charge-offs totaled \$1.3 million, or an annualized 0.48% of average loans for the three months ended March 31, 2015, compared to \$1.1 million, or an annualized 0.39% of average loans for the three months ended March 31, 2014. Of the \$1.3 million in net charge-offs during the three months ended March 31, 2015, approximately 73.6% of the activity related to loans secured by multi-family and single-family residential loans.

Our underwriting policies and procedures emphasize the fact that credit decisions must rely on both the credit quality of the borrower and the estimated value of the underlying collateral. Credit quality is assured only when the estimated value of the collateral is objectively determined and is not subject to significant fluctuation. The quantified deterioration of the credit quality of our loan portfolio as described above is the direct result of borrowers who were not financially strong enough to make regular interest and principal payments or maintain their properties when the economic environment no longer allowed them the option of converting estimated real estate value increases into short-term cash flow.

The allowance for loan losses has been determined in accordance with GAAP. We are responsible for the timely and periodic determination of the amount of the allowance required. Future provisions for loan losses will continue to be based upon our assessment of the overall loan portfolio and the underlying collateral, trends in nonperforming loans, current economic conditions and other relevant factors. To the best of management's knowledge, all probable losses have been provided for in the allowance for loan losses.

The establishment of the amount of the loan loss allowance inherently involves judgments by management as to the appropriateness of the allowance, which ultimately may or may not be correct. Higher than anticipated rates of loan default would likely result in a need to increase provisions in future years. See "Critical Accounting Policies" above for a discussion on the use of judgment in determining the amount of the allowance for loan losses.

### Liquidity and Capital Resources

We maintain liquid assets at levels we consider adequate to meet our liquidity needs. Our liquidity ratio averaged 11.2% and 16.3% for the three months ended March 31, 2015 and 2014, respectively. The liquidity ratio is equal to average daily cash and cash equivalents for the period divided by average total assets. We adjust our liquidity levels to fund loan commitments, repay our borrowings, fund deposit outflows and pay real estate taxes on mortgage loans. We also adjust liquidity as appropriate to meet asset and liability management objectives. The operational adequacy of our liquidity position at any point in time is dependent upon the judgment of the senior management as supported by the Asset/Liability Committee. Liquidity is monitored on a daily, weekly and monthly basis using a variety of measurement tools and indicators.

Our primary sources of liquidity are deposits, amortization and repayment of loans, sales of loans held for sale, maturities of investment securities and other short-term investments, and earnings and funds provided from operations. While scheduled principal repayments on loans are a relatively predictable source of funds, deposit flows and loan repayments are greatly influenced by market interest rates, economic conditions, and rates offered by our competitors. We set the interest rates on our deposits to maintain a desired level of total deposits. In addition, we invest excess funds in short-term, interest-earning assets, which provide liquidity to meet lending requirements. Additional sources of liquidity used for the purpose of managing long- and short-term cash flows include advances from the FHLB.

During the three months ended March 31, 2015 primary uses of cash and cash equivalents included: \$399.0 funding loans held for sale, \$10.5 million in purchases of mortgage related securities, \$9.2 million related to a decrease in

deposits, and \$5.4 million for the purchase of common stock. During the three months ended March 31, 2015, primary sources of cash and cash equivalents included: \$379.1 million from proceeds from the sale of loans held for sale, \$8.9 million in principal repayments on mortgage related securities, \$22.1 million decrease in loans receivable, and \$6.2 from real estate owned sales. During the three months ended March 31, 2014 primary uses of cash and cash equivalents included: \$295.3 million in originations of loans held for sale, \$141.9 million in funds returned to stock subscribers, \$25.0 million related to a decrease in deposits, \$14.5 million in loan originations, net of principal payments, \$11.1 million in repayments of short-term borrowings and \$9.5 million in purchases of mortgage related securities. During the three months ended March 31, 2014, primary sources of cash and cash equivalents included: \$298.1 million in proceeds from the sale of loans held for sale, \$6.2 million from principal repayments on mortgage related securities and \$3.8 million from maturities of debt securities.

A portion of our liquidity consists of cash and cash equivalents, which are a product of our operating, investing and financing activities. At March 31, 2015 and 2014, respectively, \$142.4 million and \$229.3 million of our assets were invested in cash and cash equivalents. At March 31, 2015 cash and cash equivalents are comprised of the following: \$100.2 million in cash held at the Federal Reserve Bank and other depository institutions and \$42.2 million in federal funds sold and short-term investments. Our primary sources of cash are principal repayments on loans, proceeds from the calls and maturities of debt and mortgage-related securities, increases in deposit accounts and advances from the FHLBC.

- 41 -

---

Liquidity management is both a daily and longer-term function of business management. If we require funds beyond our ability to generate them internally, borrowing agreements exist with the FHLBC which provide an additional source of funds. At March 31, 2015, we had \$350.0 million in advances from the FHLBC with contractual maturity dates in 2016, 2017 or 2018. All advances are callable quarterly until maturity. As an additional source of funds, we also enter into repurchase agreements. At March 31, 2015, we had \$84.0 million in repurchase agreements. The repurchase agreements mature at various times in 2017, however, all are callable quarterly until maturity. At March 31, 2015, we had outstanding commitments to originate loans receivable of \$30.2 million. In addition, at March 31, 2015 we had unfunded commitments under construction loans of \$13.4 million, unfunded commitments under business lines of credit of \$10.7 million and unfunded commitments under home equity lines of credit and standby letters of credit of \$15.8 million. At March 31, 2015 certificates of deposit scheduled to mature in one year or less totaled \$464.6 million. Based on prior experience, management believes that, subject to the Bank's funding needs, a significant portion of such deposits will remain with us, although there can be no assurance that this will be the case. In the event a significant portion of our deposits is not retained by us, we will have to utilize other funding sources, such as FHLBC advances, in order to maintain our level of assets. However, we cannot assure that such borrowings would be available on attractive terms, or at all, if and when needed. Alternatively, we could reduce our level of liquid assets, such as our cash and cash equivalents and securities available-for-sale in order to meet funding needs. In addition, the cost of such deposits may be significantly higher if market interest rates are higher or there is an increased amount of competition for deposits in our market area at the time of renewal.

#### Capital

Shareholders' equity decreased by \$916,000 to \$449.3 million at March 31, 2015 from \$450.2 million December 31, 2014. The decrease in shareholders' equity was due to the \$5.3 million in stock repurchased during the first quarter and \$1.6 million for the cash dividend. This decrease was offset by \$3.0 million in net income, \$1.4 million in stock compensation, \$1.3 million increase in accumulated other comprehensive income, and an increase due to ESOP shares committed to be released.

The Company's Board of Directors authorized a stock repurchase program in the first quarter of 2015. The Company intends to purchase up to 1,721,170 of its issued and outstanding shares of common stock, which represents approximately 5.0% of the Company's issued and outstanding shares. The timing of the purchases will depend on certain factors, including but not limited to, market conditions and prices, available funds and alternative uses of capital. The stock repurchase program may be carried out through open-market purchases, block trades, negotiated private transactions and pursuant to a trading plan that will be adopted in accordance with Rule 10b5-1 under the Securities Exchange Act of 1934. Repurchased shares are held by the Company as authorized but unissued shares.

The Company repurchased a total of 381,000 shares in the first quarter at an average price of \$12.97. The Company is authorized to purchase up to 1.3 million additional shares under the current approved stock repurchase program.

WaterStone Bank is subject to various regulatory capital requirements, including a risk-based capital measure. The risk-based capital guidelines include both a definition of capital and a framework for calculating risk-weighted assets by assigning assets and off-balance sheet items to broad risk categories. At March 31, 2015, WaterStone Bank exceeded all regulatory capital requirements and is considered "well capitalized" under regulatory guidelines. See "Notes to Consolidated Financial Statements - Regulatory Capital."

The net proceeds from the stock offering significantly increased our liquidity and capital resources. Over time, the initial level of liquidity will be reduced as net proceeds from the stock offering are used for general corporate purposes, including the funding of loans. Our financial condition and results of operations will be enhanced by the net proceeds from the stock offering, resulting in increased net interest-earning assets and net interest income. However, due to the increase in equity resulting from the net proceeds from the stock offering, our return on assets and return on equity will continue to be adversely affected following the stock offering.

Contractual Obligations, Commitments and Contingent Liabilities

The following tables present information indicating various contractual obligations and commitments of the Company as of March 31, 2015 and the respective maturity dates.

	Total	One Year or Less	More than One Year Through Three Years	More than Three years Through Five Years	Over Five Years
	(In Thousands)				
Demand deposits (4)	\$96,806	96,806	-	-	-
Money market and savings deposits (4)	118,727	118,727	-	-	-
Time deposit (4)	639,201	464,590	164,784	9,827	-
Federal Home Loan Bank advances (1)	350,000	50,000	250,000	50,000	-
Repurchase agreements (2)(4)	84,000	-	84,000	-	-
Operating leases (3)	9,764	2,464	3,192	1,894	2,214
Salary continuation agreements	383	170	213	-	-
	\$1,298,881	732,757	502,189	61,721	2,214

(1) Secured under a blanket security agreement on qualifying assets, principally, mortgage loans. Excludes interest which will accrue on the advances.

All Federal Home Loan Bank advances with maturities exceeding one year are callable on a quarterly basis.

(2) The repurchase agreements are callable on a quarterly basis until maturity.

(3) Represents non-cancelable operating leases for offices and equipment.

(4) Excludes interest.

## Off-Balance Sheet Commitments

The following table details the amounts and expected maturities of significant off-balance sheet commitments as of March 31, 2015.

	Total	One Year or Less	More than One Year Through Three Years	More than Three years Through Five Years	Over Five Years
	(In Thousands)				
Real estate loan commitments (1)	\$30,220	30,220	-	-	-
Unused portion of home equity lines of credit (2)	15,173	15,173	-	-	-
Unused portion of construction loans (3)	13,369	13,369	-	-	-
Unused portion of business lines of credit	10,709	10,709	-	-	-
Standby letters of credit	645	645	-	-	-
Total Other Commitments	\$70,116	70,116	-	-	-

General: Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract and generally have fixed expiration dates or other termination clauses.

(1) Commitments for loans are extended to customers for up to 90 days after which they expire.

(2) Unused portions of home equity loans are available to the borrower for up to 10 years.

(3) Unused portions of construction loans are available to the borrower for up to 1 year.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Following are the Company's monthly common stock purchases during the first quarter of 2015.

Period	Total Number of Shares Purchased <sup>(a)</sup>	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Maximum Number of Shares that May Yet Be Purchased Under the Plan <sup>(b)</sup>
January 1, 2015 - January 31, 2015	—	\$ —	—	—
February 1, 2015 - February 28, 2015	—	—	—	—
March 1, 2015 - March 31, 2015	381,000	12.97	381,000	1,340,170
Total	381,000	\$ 12.97	381,000	1,340,170

(a) During the first quarter of 2015, the Company repurchased 30,662 shares for minimum tax withholding settlements on equity compensation. These purchases are not included in the monthly common stock purchases table above and do not count against the maximum number of shares that may yet be purchased under the Board of Directors'

authorization.

(b) On March 6, 2015, the Board of Directors authorized the repurchase of up to 1,721,170 shares of common stock.

- 43 -

---

Item 3. Quantitative and Qualitative Disclosures about Market Risk

## Management of Market Risk

General. The majority of our assets and liabilities are monetary in nature. Consequently, our most significant form of market risk is interest rate risk. Our assets, consisting primarily of mortgage loans, have longer maturities than our liabilities, consisting primarily of deposits. As a result, a principal part of our business strategy is to manage interest rate risk and reduce the exposure of our net interest income to changes in market interest rates. Accordingly, WaterStone Bank's board of directors has established an Asset/Liability Committee which is responsible for evaluating the interest rate risk inherent in our assets and liabilities, for determining the level of risk that is appropriate given our business strategy, operating environment, capital, liquidity and performance objectives, and for managing this risk consistent with the guidelines approved by the board of directors. Management monitors the level of interest rate risk on a regular basis and the Asset/Liability Committee meets at least weekly to review our asset/liability policies and interest rate risk position, which are evaluated quarterly.

We have sought to manage our interest rate risk in order to minimize the exposure of our earnings and capital to changes in interest rates. We have implemented the following strategies to manage our interest rate risk: (i) emphasizing variable rate loans including variable rate one- to four-family, and commercial real estate loans as well as three to five year commercial real estate balloon loans; (ii) reducing and shortening the expected average life of the investment portfolio; and (iii) whenever possible, lengthening the term structure of our deposit base. These measures should reduce the volatility of our net interest income in different interest rate environments.

Income Simulation. Simulation analysis is an estimate of our interest rate risk exposure at a particular point in time. At least quarterly we review the potential effect changes in interest rates may have on the repayment or repricing of rate sensitive assets and funding requirements of rate sensitive liabilities. Our most recent simulation uses projected repricing of assets and liabilities at March 31, 2015 on the basis of contractual maturities, anticipated repayments and scheduled rate adjustments. Prepayment rate assumptions may have a significant impact on interest income simulation results. Because of the large percentage of loans and mortgage-backed securities we hold, rising or falling interest rates may have a significant impact on the actual prepayment speeds of our fixed-rate mortgage related assets that may in turn affect our interest rate sensitivity position. When interest rates rise, prepayment speeds slow and the average expected lives of our fixed-rate assets would tend to lengthen more than the expected average lives of our liabilities and therefore would most likely have a negative impact on net interest income and earnings. This effect is offset by the impact that variable-rate assets have on net interest income as interest rates rise and fall.

	Percentage Increase (Decrease) in Estimated Annual Net Interest Income Over 12 Months	
400 basis point gradual rise in rates	11.11	%
300 basis point gradual rise in rates	8.63	%
200 basis point gradual rise in rates	5.96	%
100 basis point gradual rise in	2.95	%

rates		
Unchanged rate scenario	0.00	%
100 basis point gradual decline in rates (1)	2.19	%

(1) Given the current low point in the interest rate cycle, down scenarios in excess of 100 basis points are not meaningful.

WaterStone Bank's Asset/Liability policy limits projected changes in net average annual interest income to a maximum decline of 25% for various levels of interest rate changes measured over a 12-month period when compared to the flat rate scenario. In addition, projected changes in the economic value of equity are limited to a maximum decline of 30% for interest rate movements of up to 400 basis points when compared to the flat rate scenario. These limits are re-evaluated on a periodic basis and may be modified, as appropriate. At March 31, 2015, 100 basis point gradual increase in interest rates had the effect of increasing forecast net interest income by 2.95% while a 100 basis point decrease in rates had the effect of decreasing net interest income by 2.19%. At March 31, 2015, a 100 basis point gradual increase in interest rates had the effect of decreasing the economic value of equity by 0.94% while a 100 basis point decrease in rates had the effect of increasing the economic value of equity by 1.08%. While we believe the assumptions used are reasonable, there can be no assurance that assumed prepayment rates will approximate actual future mortgage-backed security and loan repayment activity.

Item 4. Controls and Procedures

Disclosure Controls and Procedures : Company management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this report. Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, the Company's disclosure controls and procedures are effective.

Internal Control Over Financial Reporting : There have been no changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

## PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is not involved in any pending legal proceedings as a defendant other than routine legal proceedings occurring in the ordinary course of business. At March 31, 2015, the Company believes that any liability arising from the resolution of any pending legal proceedings will not be material to its financial condition or results of operations.

Item 1A. Risk Factors

See "Risk Factors" in Item 1A of the Company's annual report on Form 10-K for the year ended December 31, 2014.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Following are the Company's monthly common stock purchases during the first quarter of 2015.

Period	Total Number of Shares Purchased <sup>(a)</sup>	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Maximum Number of Shares that May Yet Be Purchased Under the Plan <sup>(b)</sup>
January 1, 2015 - January 31, 2015	—	\$ —	—	—
February 1, 2015 - February 28, 2015	—	—	—	—
March 1, 2015 - March 31, 2015	381,800	12.97	381,800	1,339,370
Total	381,800	\$ 12.97	381,800	1,339,370

(a) During the first quarter of 2015, the Company repurchased 30,662 shares for minimum tax withholding settlements on equity compensation. These purchases are not included in the monthly common stock purchases table above and do not count against the maximum number of shares that may yet be purchased under the Board of Directors' authorization.

(b) On March 6, 2015, the Board of Directors authorized the repurchase of up to 1,721,170 shares of common stock.
