Form 10-Q  
May 08, 2018  
Table of Contents

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

FORM 10-Q  
(Mark One)

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934  
For the quarterly period ended March 31, 2018

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission File Number: 001-35543  
Western Asset Mortgage Capital Corporation  
(Exact name of Registrant as specified in its charter)  
Delaware 27-0298092  
(State or other jurisdiction of (IRS Employer  
incorporation or organization) Identification Number)

Western Asset Mortgage Capital Corporation  
385 East Colorado Boulevard  
Pasadena, California 91101  
(Address of Registrant's principal executive offices)

(626) 844-9400  
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act (check one).

Large accelerated filer  Accelerated filer

Non-accelerated filer  Smaller reporting company   
(Do not check if a smaller reporting company)

Emerging growth company

Edgar Filing: Western Asset Mortgage Capital Corp - Form 10-Q

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 under the Securities Exchange Act of 1934). Yes  No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practical date.

As of May 4, 2018, there were 41,616,379 shares, par value \$0.01, of the registrant's common stock outstanding.

## Table of Contents

Western Asset Mortgage Capital Corporation and Subsidiaries  
Notes to Consolidated Financial Statements (Unaudited)  
(in thousands- except share and per share data)

The following defines certain of the commonly used terms in these Notes to Consolidated Financial Statements: “Agency” or “Agencies” refer to a federally chartered corporation, such as the Federal National Mortgage Association (“Fannie Mae” or “FNMA”) or the Federal Home Loan Mortgage Corporation (“Freddie Mac” or “FHLMC”), or an agency of the U.S. Government, such as the Government National Mortgage Association (“Ginnie Mae” or “GNMA”); references to “MBS” refer to mortgage backed securities, including residential mortgage-backed securities or “RMBS,” commercial mortgage-backed securities or “CMBS,” and “Interest-Only Strips” (as defined herein); “Agency MBS” refer to RMBS, CMBS and Interest-Only Strips issued or guaranteed by the Agencies while “Non-Agency MBS” refer to RMBS, CMBS and Interest-Only Strips that are not issued or guaranteed by the Agencies; references to “ARMs” refers to adjustable rate mortgages; references to “Interest-Only Strips” refer to interest-only (“IO”) and inverse interest-only (“IIO”) securities issued as part of or collateralized with MBS; references to “TBA” refer to To-Be-Announced Securities; and references to “Residential Whole-Loans”, “Residential Bridge Loans” and “Commercial Loans” (collectively “Whole-Loans”) refer to individual mortgage loans secured by single family, multifamily and commercial properties.

### Note 1 — Organization

Western Asset Mortgage Capital Corporation, a Delaware corporation, and its subsidiaries (the “Company”), commenced operations in May 2012. The Company invests in, finances and manages a diversified portfolio of real estate related securities, whole-loans and other financial assets. The Company’s portfolio is comprised of Agency CMBS, Agency RMBS (including TBAs), Non-Agency RMBS, Non-Agency CMBS, Residential Whole Loans, Residential Bridge Loans and Commercial Loans. In addition, and to a significantly lesser extent, the Company has invested in other securities including certain Agency obligations that are not technically MBS as well as certain Non U.S. CMBS and in asset-backed securities (“ABS”) investments secured by a portfolio of private student loans. The Company’s investment strategy is based on Western Asset Management Company’s (the “Manager”) perspective of which mix of portfolio assets it believes provides the Company with the best risk-reward opportunities at any given time. The Manager will vary the allocation among various asset classes subject to maintaining the Company’s qualification as a REIT and maintaining its exemption from the Investment Company Act of 1940 (the “1940 Act”). These restrictions limit the Company’s ability to invest in non-qualifying MBS, non-real estate assets and/or assets which are not secured by real estate. Accordingly, the Company’s portfolio will continue to be principally invested in qualifying MBS, Whole-Loans and other real estate related assets.

The Company is externally managed by the Manager, an investment advisor registered with the Securities and Exchange Commission (“SEC”). The Manager is a wholly-owned subsidiary of Legg Mason, Inc. The Company operates and has elected to be taxed as a real estate investment trust or “REIT” commencing with its taxable year ended December 31, 2012.

### Note 2 — Summary of Significant Accounting Policies

#### Basis of Presentation and Consolidation

The accompanying unaudited financial statements and related notes have been prepared in conformity with generally accepted accounting principles in the United States of America (“GAAP”) for interim financial reporting in accordance with Article 10 of Regulation S-X and the instructions to Form 10-Q. Certain prior period amounts have been reclassified to conform to the current period’s presentation. In the opinion of management, all adjustments (which include only normal recurring adjustments) necessary have been made to state fairly the Company’s financial position, results of operations and cash flows. The results of operations for the period ended March 31, 2018, are not

necessarily indicative of the results to be expected for the full year or any future period. These consolidated financial statements should be read in conjunction with the Company's annual report on Form 10-K for the year ended December 31, 2017, filed with the SEC on March 29, 2018.

The consolidated financial statements include the accounts of the Company, its wholly-owned subsidiary and variable interest entities ("VIEs") in which it is considered the primary beneficiary. All intercompany amounts between the Company and its subsidiary and consolidated VIEs have been eliminated in consolidation.

## Table of Contents

### Variable Interest Entities

VIEs are defined as entities that by design either lack sufficient equity for the entity to finance its activities without additional subordinated financial support or are unable to direct the entity's activities or are not exposed to the entity's losses or entitled to its residual returns. The Company evaluates all of its interests in VIEs for consolidation. When the interests are determined to be variable interests, the Company assesses whether it is deemed the primary beneficiary. The primary beneficiary of a VIE is determined to be the party that has both the power to direct the activities of a VIE that most significantly impact the VIE's economic performance and the obligation to absorb losses or the right to receive benefits of the VIE that could potentially be significant to the VIE.

To assess whether the Company has the power to direct the activities of a VIE that most significantly impact the VIE's economic performance, it considers all facts and circumstances, including its role in establishing the VIE and its ongoing rights and responsibilities. This assessment includes first, identifying the activities that most significantly impact the VIE's economic performance; and second, identifying which party, if any, has power over those activities. In general, the parties that make the most significant decisions affecting the VIE or have the right to unilaterally remove those decision makers is deemed to have the power to direct the activities of a VIE.

To assess whether the Company has the obligation to absorb losses of the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE, it considers all of its economic interests. This assessment requires the Company to apply judgment in determining whether these interests, in the aggregate, are considered potentially significant to the VIE. Factors considered in assessing significance include: the design of the VIE, including its capitalization structure; subordination of interests; payment priority; relative share of interests held across various classes within the VIE's capital structure; and the reasons why the interests are held by the Company.

In instances where the Company and its related parties have variable interests in a VIE, the Company considers whether there is a single party in the related party group that meets both the power and losses or benefits criteria on its own as though no related party relationship existed. If one party within the related party group meets both these criteria, such reporting entity is the primary beneficiary of the VIE and no further analysis is needed. If no party within the related party group on its own meets both the power and losses or benefits criteria, but the related party group as a whole meets these two criteria, the determination of primary beneficiary within the related party group requires significant judgment. The analysis is based upon qualitative as well as quantitative factors, such as the relationship of the VIE to each of the members of the related-party group, as well as the significance of the VIE's activities to those members, with the objective of determining which party is most closely associated with the VIE.

Ongoing assessments of whether an enterprise is the primary beneficiary of a VIE are required.

### Use of Estimates

The preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

### Earnings (Loss) Per Share

GAAP requires use of the two-class method in computing earnings per share for all periods presented for each class of common stock and participating securities as if all earnings for the period had been distributed. Under the two-class method, during periods of net income, the net income is first reduced for dividends declared on all classes of securities to arrive at undistributed earnings. During periods of net losses, the net loss is reduced for dividends declared on

participating securities only if the security has the right to participate in the earnings of the entity and an objectively determinable contractual obligation to share in net losses of the entity. The Company's participating securities are not allocated a share of the net loss, as the participating securities do not have a contractual obligation to share in the net losses of the Company.

The remaining earnings are allocated to common stockholders and participating securities, to the extent that each security shares in earnings, as if all of the earnings for the period had been distributed. Each total is then divided by the applicable number of weighted average outstanding common shares to arrive at basic earnings per share. For the diluted earnings, the denominator includes the weighted average outstanding common shares and all potential common shares assumed issued if they are dilutive.

## Table of Contents

The numerator is adjusted for any changes in income or loss that would result from the assumed conversion of these potential common shares.

### Offering Costs

Offering costs borne by the Company in connection with common stock offerings and private placements are reflected as a reduction of additional paid-in-capital. Offering costs borne by the Company in connection with its shelf registration will be deferred and recorded in "Other assets" until such time the Company completes a common stock offering where all or a portion will be reclassified and reflected as a reduction of additional paid-in-capital. The deferred offering costs will be expensed upon the expiration of the shelf if the Company does not complete an equity offering.

### Cash and Cash Equivalents

The Company considers all highly-liquid short term investments with original maturities of 90 days or less when purchased to be cash equivalents. Cash and cash equivalents are exposed to concentrations of credit risk. The Company places its cash and cash equivalents with what it believes to be high credit quality institutions. At times such investments may be in excess of the Federal Deposit Insurance Corporation insurance limit.

### Restricted Cash

Restricted cash represents cash held by the trustee or servicer for mortgage escrows in connection with the Company's securitized loan and commercial loan investments held in two consolidated VIE's. These escrows consist of capital improvement reserves, repair reserves, real estate tax and insurance reserves and tenant reserves. The corresponding liability is recorded in "Other liabilities" in the Consolidated Balance Sheets. The restricted cash is not available for general corporate use.

### Valuation of Financial Instruments

The Company discloses the fair value of its financial instruments according to a fair value hierarchy (Levels I, II, and III, as defined below). ASC 820, "Fair Value Measurement and Disclosures" establishes a framework for measuring fair value and expands financial statement disclosure requirements for fair value measurements. ASC 820 further specifies a hierarchy of valuation techniques, which is based on whether the inputs into the valuation technique are observable or unobservable. The hierarchy is as follows:

Level I — Quoted prices in active markets for identical assets or liabilities.

Level II — Quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable or whose significant value drivers are observable.

Level III — Prices are determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable, for example, when there is little or no market activity for an investment at the end of the period, unobservable inputs may be used.

The level in the fair value hierarchy within which a fair value measurement in its entirety falls is based on the lowest level input that is significant to the fair value measurement in its entirety. Transfers between levels are determined by the Company at the end of the reporting period. Refer to Note 3 - "Fair Value of Financial Instruments".

### Mortgage-Backed Securities and Other Securities

The Company's mortgage-backed securities and other securities portfolio primarily consists of Agency RMBS, Non-Agency RMBS, Agency CMBS, Non-Agency CMBS, ABS and other real estate related assets. These investments are recorded in accordance with ASC 320, "Investments - Debt and Equity Securities", ASC 325-40, "Beneficial Interests in Securitized Financial Assets" or ASC 310-30, "Loans and Debt Securities Acquired with Deteriorated Credit Quality". The Company has chosen to make a fair value election pursuant to ASC 825, "Financial Instruments" for its mortgage-backed securities and other securities portfolio. Electing the fair value option allows the Company to record changes in fair value in the Consolidated Statements of Operations as a component of "Unrealized gain (loss), net".

## Table of Contents

If the Company purchases securities with evidence of credit deterioration, it will analyze to determine if the guidance found in ASC 310-30, "Loans and Debt Securities Acquired with Deteriorated Credit Quality" is applicable.

The Company evaluates securities for other-than-temporary impairment ("OTTI") on at least a quarterly basis. The determination of whether a security is other-than-temporarily impaired involves judgments, estimates and assumptions based on subjective and objective factors. As a result, the timing and amount of an OTTI constitutes an accounting estimate that may change materially over time.

When the fair value of an investment security is less than its amortized cost at the balance sheet date, the security is considered impaired, and the impairment is designated as either "temporary" or "other-than-temporary." When a security is impaired, an OTTI is considered to have occurred if (i) the Company intends to sell the security (i.e., a decision has been made as of the reporting date) or (ii) it is more likely than not that the Company will be required to sell the security before recovery of its amortized cost basis. If the Company intends to sell the security or if it is more likely than not that the Company will be required to sell the real estate security before recovery of its amortized cost basis, the entire amount of the impairment loss, if any, is recognized in earnings as OTTI and the cost basis of the security is adjusted to its fair value. Additionally, for securities accounted for under ASC 325-40 an OTTI is deemed to have occurred when there is an adverse change in the expected cash flows to be received and the fair value of the security is less than its carrying amount. In determining whether an adverse change in cash flows occurred, the present value of the remaining cash flows, as estimated at the initial transaction date (or the last date previously revised), is compared to the present value of the expected cash flows at the current reporting date. The estimated cash flows reflect those a "market participant" would use and are discounted at a rate equal to the current yield used to accrete interest income. Any resulting OTTI adjustments are reflected in the "Other than temporary impairment" in the Consolidated Statements of Operations.

Increases in interest income may be recognized on a security on which the Company previously recorded an OTTI charge if the cash flow of such security subsequently improves.

In addition, unrealized losses on the Company's Agency securities, with explicit guarantee of principal and interest by the governmental sponsored entity ("GSE"), are not credit losses but rather were due to changes in interest rates and prepayment expectations. These securities would not be considered other than temporarily impaired provided we did not intend to sell the security.

### Residential Whole-Loans

Investments in Residential Whole-Loans are recorded in accordance with ASC 310-20, "Nonrefundable Fees and Other Costs". The Company has chosen to make the fair value election pursuant to ASC 825 for its Residential Whole-Loan portfolio. Residential Whole-Loans are recorded at fair value with periodic changes in fair value being recorded in earnings as a component of "Unrealized gain (loss), net". All other costs incurred in connection with acquiring Residential Whole-Loans or committing to purchase these loans are charged to expense as incurred.

On a quarterly basis, the Company evaluates the collectability of both interest and principal of each loan, if circumstances warrant, to determine whether such loan is impaired. A loan is impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the existing contractual terms. When a loan is impaired, the Company does not record an allowance for loan loss as the Company has elected the fair value option. However, income recognition is suspended for loans at the earlier of the date at which payments become 90-days past due or when, in the opinion of management, a full recovery of income and principal becomes doubtful. When the ultimate collectability of the principal of an impaired loan is in doubt, all payments are applied to principal under the cost recovery method. When the ultimate collectability of the principal of an impaired loan is not in doubt, contractual interest is recorded as interest income when received, under the cash

basis method until an accrual is resumed when the loan becomes contractually current and performance is demonstrated to be resumed. A loan is written off when it is no longer realizable and/or legally discharged.

#### Residential Bridge Loans

For the Bridge Loans acquired prior to October 25, 2017, the Company did not elect the fair value option pursuant to ASC 825. These loans are recorded at their principal amount outstanding, net of any premium or discount.

Commencing with purchases on October 25, 2017, the Company decided to elect the fair value option pursuant to ASC 825 to be consistent with the accounting of its other investments, which are all carried at fair value. These loans are recorded at fair value with periodic changes in fair market value being recorded in earnings as a component of "Unrealized gain (loss), net". All other costs incurred in connection with acquiring the Residential Bridge Loans or committing to purchase these loans are charged to expense as incurred.

## Table of Contents

A loan is impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the existing contractual terms. The Company evaluates each of its Residential Bridge Loans that it did not elect the fair value option on a quarterly basis. These loans are individually specific as they relate to the borrower, collateral type, interest rate, LTV and term as well as geographic location. The Company evaluates the collectability of both principal and interest of each loan. When a loan is impaired, the impairment is then measured based on fair value of the collateral, since these loans are collateral dependent. Upon measurement of impairment, the Company records an allowance to reduce the carrying value of the loan with a corresponding charge to earnings. Significant judgments are required in determining impairment, including assumptions regarding the value of the loan, the value of the underlying collateral and other provisions such as guarantees. The Company will not record an allowance for loan loss for the Residential Bridge Loans that it has elected the fair value option.

Income recognition is suspended for loans at the earlier of the date at which payments become 90-days past due or when, in the opinion of management, a full recovery of income and principal becomes doubtful. When the ultimate collectability of the principal of an impaired loan is in doubt, all payments are applied to principal under the cost recovery method. When the ultimate collectability of the principal of an impaired loan is not in doubt, contractual interest is recorded as interest income when received, under the cash basis method until an accrual is resumed when the loan becomes contractually current and performance is demonstrated to be resumed. A loan is written off when it is no longer realizable and/or it is legally discharged.

### Securitized Commercial Loans

Securitized commercial loans are comprised of commercial loans of consolidated variable interest entities which were sponsored by third parties. These loans are recorded in accordance with ASC 310-20, "Nonrefundable Fees and Other Costs". The Company has chosen to make the fair value election pursuant to ASC 825. Accordingly, these loans are recorded at fair value with periodic changes in fair value being recorded in earnings as a component of "Unrealized gain (loss), net".

The securitized commercial loans are typically collateralized by commercial real estate. As a result, the Company regularly evaluates the extent and impact of any credit migration associated with the performance and or value of the underlying collateral property as well as the financial and operating capability of the borrower on a loan by loan basis. On a quarterly basis, the Company evaluates the collectability of both interest and principal of each loan, if circumstances warrant, to determine whether such loan is impaired. A loan is impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the existing contractual terms. When a loan is impaired, the Company does not record an allowance for loan loss as the Company has elected the fair value option. However, income recognition is suspended for loans at the earlier of the date at which payments become 90-days past due or when, in the opinion of management, a full recovery of income and principal becomes doubtful. When the ultimate collectability of the principal of an impaired loan is in doubt, all payments are applied to principal under the cost recovery method. When the ultimate collectability of the principal of an impaired loan is not in doubt, contractual interest is recorded as interest income when received, under the cash basis method until an accrual is resumed. Interest income accrual is resumed when the loan becomes contractually current and performance is demonstrated. A loan is written off when it is no longer realizable and/or legally discharged.

### Commercial Loans

Investments in Commercial Loans, which are comprised of commercial mortgage loans and commercial mezzanine loans, are recorded in accordance with ASC 310-20, "Nonrefundable Fees and Other Costs". The Company has chosen to make the fair value election pursuant to ASC 825 for its Commercial Loan portfolio. Accordingly, these loans are recorded at fair value with periodic changes in fair value being recorded in earnings as a component of

"Unrealized gain (loss), net". All other costs incurred in connection with acquiring the Commercial Loans or committing to purchase these loans are charged to expense as incurred.

The Company's loans are typically collateralized by commercial real estate. As a result, the Company regularly evaluates the extent and impact of any credit migration associated with the performance and or value of the underlying collateral property as well as the financial and operating capability of the borrower on a loan by loan basis. On a quarterly basis, the Company evaluates the collectability of both interest and principal of each loan, if circumstances warrant, to determine whether such loan is impaired. A loan is impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the existing contractual terms. When a loan is impaired, the Company does not record an allowance for loan loss as the Company has elected the fair value option. However, income recognition is suspended for loans at the earlier of the date at which payments become 90-days past due or when, in the opinion of management, a full recovery of income and principal becomes doubtful. When the ultimate collectability of the principal of an impaired loan is in doubt, all payments are applied to principal under the cost recovery method. When the ultimate collectability of the principal of an impaired loan is not in doubt, contractual interest is recorded as interest income when received, under the cash basis method until an accrual is resumed.

## Table of Contents

Interest income accrual is resumed when the loan becomes contractually current and performance is demonstrated. A loan is written off when it is no longer realizable and/or legally discharged.

### Interest Income Recognition

Agency MBS, Non-Agency MBS and other securities, excluding Interest-Only Strips, rated AA and higher at the time of purchase

Interest income on mortgage-backed and other securities is accrued based on the respective outstanding principal balances and corresponding contractual terms. The Company records interest income in accordance with ASC subtopic 835-30 "Imputation of Interest", using the effective interest method. As such premiums and discounts associated with Agency MBS, Non-Agency MBS and other securities, excluding Interest-Only Strips, are amortized into interest income over the estimated life of such securities. Adjustments to premium and discount amortization are made for actual prepayment activity. The Company estimates prepayments at least quarterly for its securities and, as a result, if the projected prepayment speed increases, the Company will accelerate the rate of amortization on premiums or discounts and make a retrospective adjustment to historical amortization. Alternatively, if projected prepayment speeds decrease, the Company will reduce the rate of amortization on the premiums or discounts and make a retrospective adjustment to historical amortization.

Non-Agency MBS and other securities that are rated below AA at the time of purchase and Interest-Only Strips that are not classified as derivatives

Interest income on Non-Agency MBS and other securities that are rated below AA at the time of purchase and Interest-Only Strips that are not classified as derivatives are also recognized in accordance with ASC 835, using the effective yield method. The effective yield on these securities is based on the projected cash flows from each security, which is estimated based on the Company's observation of the then current information and events, where applicable, and will include assumptions related to interest rates, prepayment rates and the timing and amount of credit losses. On at least a quarterly basis, the Company reviews and, if appropriate, makes adjustments to its cash flow projections based on input and analysis received from external sources, internal models, and its judgment about interest rates, prepayment rates, the timing and amount of credit losses, and other factors. Changes in cash flows from those originally projected, or from those estimated at the last evaluation, may result in a prospective change in the yield/interest income recognized on such securities. Actual maturities of the securities are affected by the contractual lives of the underlying collateral, periodic payments of scheduled principal, and prepayments of principal. Therefore, actual maturities of the securities will generally be shorter than stated contractual maturities.

Based on the projected cash flow of such securities purchased at a discount to par value, the Company may designate a portion of such purchase discount as credit protection against future credit losses and, therefore, not accrete such amount into interest income. The amount designated as credit discount may be adjusted over time, based on the actual performance of the security, its underlying collateral, actual and projected cash flow from such collateral, economic conditions and other factors. If the performance of a security with a credit discount is more favorable than forecasted, a portion of the amount designated as credit discount may be accreted into interest income prospectively.

### Loan Portfolio

Interest income on the Company's residential loan portfolio and commercial loan portfolio is recorded using the effective interest method based on the contractual payment terms of the loan. Any premium amortization or discount accretion will be reflected as a component of "Interest income" in the Consolidated Statements of Operations.

### Purchases and Sales of Investments

The Company accounts for a contract for the purchase or sale of securities, or other securities that do not yet exist on a trade date basis, which it intends to take possession and thus recognizes the acquisition or disposition of the securities at the inception of the contract.

Sales of investments are driven by the Company's portfolio management process. The Company seeks to mitigate risks including those associated with prepayments and will opportunistically rotate the portfolio into securities and/or other investments the Company's Manager believes have more favorable attributes. Strategies may also be employed to manage net capital gains, which need to be distributed for tax purposes. Realized gains or losses on sales of investments, including Agency Interest-Only Strips not characterized as derivatives, are a component of "Realized gain (loss) on sale of investments, net" in the Consolidated Statements of Operations, and are recorded at the time of disposition. Realized gains or losses on Interest-Only Strips which are

## Table of Contents

characterized as derivatives are a component of "Gain (loss) on derivative instruments, net" in the Consolidated Statements of Operations.

### Foreign Currency Transactions

The Company has and expects to continue to enter into transactions denominated in foreign currency from time to time. At the date the transaction is recognized, the asset and/or liability will be measured and recorded using the exchange rate in effect at the date of the transaction. At each balance sheet date, such foreign currency assets and liabilities are re-measured using the exchange rate in effect at the date of the balance sheet, resulting in unrealized foreign currency gains or losses, which are recorded in "Other, net" in the Consolidated Statements of Operations.

### Due From Counterparties / Due To Counterparties

"Due from counterparties" represents cash posted by the Company with its counterparties as collateral for the Company's interest rate and/or currency derivative financial instruments, repurchase agreements, and TBAs. "Due to counterparties" represents cash posted with the Company by its counterparties as collateral under the Company's interest rate and/or currency derivative financial instruments, repurchase agreements, and TBAs. Included in "Due from counterparties" and/or "Due to counterparties" are daily variation margin settlement amounts with counterparties which are based on the price movement of the Company's futures contracts. However, commencing in 2017, daily variation margin on only the Company's centrally cleared derivatives were treated as a settlement and classified as either "Derivative assets, at fair value" or "Derivative liability, at fair value" in the Consolidated Balance Sheets. In addition, as provided below, "Due to counterparties" may include non-cash collateral in which the Company has the obligation to return and which the Company has either sold or pledged. To the extent the Company receives collateral other than cash from its counterparties such assets are not included in the Company's Consolidated Balance Sheets. Notwithstanding the foregoing, if the Company either rehypothecates such assets or pledges the assets as collateral pursuant to a repurchase agreement, the cash received and the corresponding liability are reflected in the Consolidated Balance Sheets.

### Derivatives and Hedging Activities

Subject to maintaining its qualification as a REIT for U.S. federal income tax purposes, the Company as part of its hedging strategy, may enter into, interest rate swaps, including forward starting swaps, interest rate swaptions, U.S. Treasury options, Eurodollar, Volatility Index and U.S. Treasury futures, TBAs, total return swaps, credit default swaps and foreign currency swaps and forwards to hedge the interest rate and currency risk associated with its portfolio and related borrowings. Derivatives, subject to REIT requirements, are used for hedging purposes rather than speculation. The Company has also entered into a total return swap, which transfers the total return of the referenced security to the Company. The Company determines the fair value of its derivative positions and obtains quotations from third parties, including the Chicago Mercantile Exchange or CME, to facilitate the process of determining such fair values. The Company does not necessarily seek to hedge all such risks. In addition, if the Company's hedging activities do not achieve the desired results, reported earnings may be adversely affected.

GAAP requires an entity to recognize all derivatives as either assets or liabilities on the balance sheet and to measure those instruments at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative. The fair value adjustment will affect either other comprehensive income in stockholders' equity until the hedged item is recognized in earnings or net income depending on whether the derivative instrument is designated and qualifies as a hedge for accounting purposes and if so, the nature of the hedging activity. The Company elected not to apply hedge accounting for its derivative instruments. Accordingly, the Company records the change in fair value of its derivative instruments, which includes net interest rate swap payments/receipts (including accrued amounts) and net currency payments/receipts (including accrued amounts) related to interest rate swaps and currency

swaps, respectively, in "Gain (loss) on derivative instruments, net" in its Consolidated Statements of Operations.

In January 2017, the CME amended its rulebooks to legally characterize variation margin payments and receipts for over-the-counter derivatives they clear as settlements of the derivatives' exposure rather than collateral against exposure. As a result of the change in legal characterization, effective January 1, 2017, variation margin is no longer classified as collateral in the Consolidated Balance Sheets in either "Due from counterparties" or "Due to counterparties", but rather a component of the respective "Derivative asset, at fair value" or "Derivative liability, at fair value" in the Consolidated Balance Sheets. The variation margin is now considered partial settlements of the derivative contract and will result in realized gains or losses which prior to January 1, 2017 were classified as unrealized gains or losses on derivatives. Prior to the CME rulebook change variation margin was included in financing activities in the Company's Consolidated Statement of Cash Flows in either "Due from counterparties, net" or "Due to counterparties, net". Commencing in January 2017, cash postings for variation margin are included in operating activities in the Consolidated Statements of Cash Flows.

## Table of Contents

In the Company's Consolidated Statements of Cash Flows, premiums received or paid on termination of its interest rate swaps are included in cash flows from operating activities. Notwithstanding the foregoing, proceeds and payments on settlement of swaptions, mortgage put options, futures contracts and TBAs are included in cash flows from investing activities. Proceeds and payments on settlement of forward contracts are reflected in cash flows from financing activities in the Company's Consolidated Statements of Cash Flows. For Agency and Non-Agency Interest-Only Strips accounted for as derivatives, the purchase, sale and recovery of basis activity is included with MBS and other securities under cash flows from investing activities in the Company's Consolidated Statements of Cash Flows.

The Company evaluates the terms and conditions of its holdings of Agency and Non-Agency Interest-Only Strips, interest rate swaptions, currency forwards, futures contracts and TBAs to determine if these instruments have the characteristics of an investment or should be considered a derivative under GAAP. In determining the classification of its holdings of Interest-Only Strips, the Company evaluates the securities to determine if the nature of the cash flows have been altered from that of the underlying mortgage collateral. Interest-Only Strips, for which the underlying mortgage collateral has been included into a structured security that alters the cash flows from the underlying mortgage collateral, are accounted for as derivatives. The carrying value of the Agency and Non-Agency Interest-Only Strips, accounted for as derivatives, is included in "Mortgage-backed securities and other securities, at fair value" in the Consolidated Balance Sheets. The carrying value of interest rate swaptions, currency forwards, futures contracts and TBAs is included in "Derivative assets, at fair value" or "Derivative liability, at fair value" in the Consolidated Balance Sheets. Interest earned or paid along with the change in fair value of these instruments accounted for as derivatives is recorded in "Gain (loss) on derivative instruments, net" in its Consolidated Statements of Operations.

The Company evaluates all of its financial instruments to determine if such instruments are derivatives or contain features that qualify as embedded derivatives. An embedded derivative is separated from the host contract and accounted for separately when all of the guidance criteria are met. Hybrid instruments that are remeasured at fair value through earnings, including the fair value option are not bifurcated. Derivative instruments, including derivative instruments accounted for as liabilities, are recorded at fair value and are re-valued at each reporting date, with changes in the fair value together with interest earned or paid (including accrued amounts) reported in "Gain (loss) on derivative instruments, net" in the Consolidated Statements of Operations.

### Repurchase Agreements and Reverse Repurchase Agreements

Investments sold under repurchase agreements are treated as collateralized financing transactions, unless they meet all the criteria for sales treatment. Securities financed through a repurchase agreement remain in the Company's Consolidated Balance Sheets as assets and cash received from the lender is recorded in the Company's Consolidated Balance Sheets as a liability. Interest payable in accordance with repurchase agreements is recorded as "Accrued interest payable" in the Consolidated Balance Sheets. Interest paid (including accrued amounts) in accordance with repurchase agreements is recorded as interest expense.

The Company may borrow securities under reverse repurchase agreements to deliver a security owned and sold by the Company but pledged to a different counterparty under a separate repurchase agreement when in the Manager's view terminating the outstanding repurchase agreement is not in the Company's best interest. Cash paid to the borrower is recorded in the Company's Consolidated Balance Sheets as an asset. Interest receivable in accordance with reverse repurchase agreements is recorded as accrued interest receivable in the Consolidated Balance Sheets. The Company reflects all proceeds on reverse repurchase agreement and repayment of reverse repurchase agreement, on a net basis in the Consolidated Statements of Cash Flows. Upon sale of a pledged security, the Company recognizes an obligation to return the borrowed security in the Consolidated Balance Sheet in "Due to counterparties". The

Company establishes haircuts to ensure the market value of the underlying asset remains sufficient to protect the Company in the event of default by the counterparty. Realized gains and losses associated with the sale of the security are recognized in "Realized gain (loss) on sale of investments, net" in the Consolidated Statements of Cash Flows.

#### Convertible Senior Unsecured Notes

Convertible senior unsecured notes include unsecured convertible debt that is carried at its unpaid principal balance, net of any unamortized deferred issuance costs, in the Company's Consolidated Balance Sheets. Interest on the notes is payable semiannually until such time the notes mature or are converted into shares of the Company's common stock. ASC 470-20 "Debt-Debt with Conversion and Other Options" requires that convertible debt instruments with cash settlement features, including partial cash settlement, account for the liability component and equity component (conversion feature) of the instrument separately. The initial value of the liability component will reflect the present value of the discounted cash flows using the nonconvertible debt borrowing rate at the time of issuance. The debt discount represents the difference between the proceeds received from the issuance and the initial carrying value of the liability component, which is accreted back to the notes principal amount through interest expense over the life of the notes.

## Table of Contents

### Securitized Debt

Securitized debt was issued by consolidating securitization trusts. The Company has chosen to make the fair value election pursuant to ASC 825 for the debt. The debt is recorded at fair value in the Consolidated Balance Sheets with the periodic change in fair value recorded in current period earnings in the Consolidated Statements of Operations as a component of "Unrealized gain (loss), net".

### Share-based Compensation

The Company accounts for share-based compensation to its independent directors, its Manager and to employees of its Manager and its affiliates using the fair value based methodology prescribed by GAAP. Compensation cost related to restricted common stock issued to the Company's independent directors and any employee of the Company including any such restricted stock which is subject to a deferred compensation program is measured at its fair value at the grant date, and amortized into expense over the service period on a straight-line basis. Compensation cost related to restricted common stock issued to the Manager and to employees of the Manager, including officers and certain directors, of the Company who are employees of the Manager and its affiliates is initially measured at fair value at the grant date, and amortized into expense over the vesting period on a straight-line basis and re-measured on subsequent dates to the extent the awards are unvested.

### Warrants

For the Company's warrants, the Company uses a variation of the adjusted Black-Scholes option valuation model to record the financial instruments at their relative fair values at issuance. The warrants issued with the Company's common stock in the private placement to certain accredited institutional investors on May 15, 2012, were evaluated by the Company and were recorded at their relative fair value as a component of equity at the date of issuance.

### Income Taxes

The Company operates and has elected to be taxed as a REIT commencing with its taxable year ended December 31, 2012. Accordingly, the Company will generally not be subject to corporate U.S. federal or state income tax to the extent that the Company makes qualifying distributions to stockholders, and provided that the Company satisfies, on a continuing basis, through actual investment and operating results, the REIT requirements including certain asset, income, distribution and stock ownership tests. If the Company fails to qualify as a REIT, and does not qualify for certain statutory relief provisions, the Company will be subject to U.S. federal, state and local income taxes and may be precluded from qualifying as a REIT for the subsequent four taxable years following the year in which the Company lost its REIT qualification. Accordingly, the failure to qualify as a REIT could have a material adverse impact in the Company's results of operations and amounts available for distribution to stockholders.

As a REIT, if the Company fails to distribute in any calendar year (subject to specific timing rules for certain dividends paid in January) at least the sum of (i) 85% of its ordinary income for such year, (ii) 95% of its capital gain net income for such year, and (iii) any undistributed taxable income from the prior year, the Company would be subject to a non-deductible 4% excise tax on the excess of such required distribution over the sum of (i) the amounts actually distributed and (ii) the amounts of income retained and on which the Company has paid corporate income tax.

The dividends paid deduction for qualifying dividends paid to stockholders is computed using the Company's taxable income as opposed to net income reported in the Consolidated Statements of Operations. Taxable income, generally, will differ from net income reported in the Consolidated Statements of Operations because the determination of taxable income is based on tax regulations and not GAAP.

The Company may create and elect to treat certain subsidiaries as Taxable REIT Subsidiaries ("TRS"). In general, a TRS may hold assets and engage in activities that the Company cannot hold or engage in directly and generally may engage in any real estate or non-real estate-related business. A domestic TRS is subject to U.S. federal, state and local corporate income taxes, and its value may not exceed 20% of the value of the Company. If the TRS generates net income it may declare dividends to the Company, which will be included in the Company's taxable income and necessitate a distribution to its stockholders. Conversely, if the Company retains earnings at the TRS level, no distribution is required and it can increase book equity of the consolidated entity. As of March 31, 2018, the Company has a single wholly-owned subsidiary which it has elected to treat as a domestic TRS.

Current and deferred taxes are recorded on earnings (losses) recognized by the Company's TRS. Deferred income tax assets and liabilities are calculated based upon temporary differences between the Company's U.S. GAAP consolidated financial

Table of Contents

statements and the federal and state basis of assets and liabilities as of the Consolidated Balance Sheet date. The Company evaluates the realizability of its deferred tax assets and recognizes a valuation allowance if, based on available evidence, it is more likely than not that some or all of its deferred tax assets will not be realized. In evaluating the realizability of the deferred tax asset, the Company will consider the expected future taxable income, existing and projected book to tax differences as well as tax planning strategies. This analysis is inherently subjective, as it is based on forecasted earning and business and economic activity. Changes in estimates of deferred tax asset realizability, if any, are included in "Income tax provision (benefit)" in the Consolidated Statements of Operations.

## Comprehensive Income (Loss)

The Company has none of the components of comprehensive income (loss) and therefore comprehensive income (loss) is not presented.

## Recently adopted accounting pronouncements

Description	Adoption Date	Effect on Financial Statements
<p>In May 2014, the FASB issued ASU 2014-9, "Revenue from Contracts with Customers (Topic 606)." The guidance changes an entity's recognition of revenue from contracts with customers. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, the new guidance requires improved disclosures to enable users of financial statements to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. In March 2016, the FASB issued implementation guidance which clarifies principal versus agent considerations in reporting revenue gross versus net (ASU 2016-8). In April 2016, the FASB issued implementation guidance which clarifies the identification of performance obligations (ASU 2016-10). In May 2016, the FASB issued amendments that affect only the narrow aspects of Topic 606 (ASU2016-12).</p>	<p>First quarter 2018.</p>	<p>The Company's revenue is mainly derived from interest income on our investments and to a lesser extent gains on sales of investments, which are not impacted by this standard. Therefore, the adoption of this standard did not have a material impact on the Company's consolidated financial statements.</p>
<p>In January 2016, the FASB issued ASU 2016-1, "Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities." The guidance improves certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. In February 2018, the FASB issued a separate Update for technical corrections and improvements related to the ASU 2016-01 to increase stakeholders' awareness of the amendments and to expedite the improvements (ASU 2018-3).</p>	<p>First quarter 2018.</p>	<p>The standard does not change the guidance for classifying and measuring investments in debt securities and loans as well nonrecourse liabilities of consolidated collateralized financing entities. Therefore, the adoption of this standard did not have a material impact on the Company's consolidated</p>

		financial statements.
In August 2016, the FASB issued ASU 2016-15, "Statement of Cash Flows - Classification of Certain Cash Receipts and Cash Payments (Topic 230)." The guidance is intended to reduce diversity in practice in how certain transactions are classified on the statement of cash flows.	First quarter 2018 and requires retrospective adoption.	The adoption of this standard did not have a material impact on its Consolidated Statements of Cash Flows.
In November 2016, the FASB issued ASU 2016-18 "Statement of Cash Flows (Topic 230): Restricted Cash, a consensus of the FASB's Emerging Issues Task Force." The guidance requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents as well as disclose information about the nature of the restrictions on its cash and cash equivalents.	First quarter 2018 and requires retrospective adoption.	The adoption of this standard did not have a material impact on its Consolidated Statements of Cash Flows.
In January 2017, the FASB issued ASU 2017-01 "Business Combinations (Topic 805): Clarifying the Definition of a Business." This ASU provides a more robust framework to use in determining when a set of assets and activities constitutes a business.	First quarter 2018. The guidance should be applied prospectively on or after the effective date.	The adoption of this standard did not have a material impact on its Consolidated Statements of Cash Flows.
In May 2017, the FASB issued ASU 2017-09 "Compensation-Stock Compensation (Topic 718): Scope of Modification Accounting." The amendments in this update provide guidance about which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting in Topic 718.	First quarter 2018.	There are no changes to the terms and conditions of the Company's share-based compensation. The adoption of this standard did not have a material impact on the Company's consolidated financial statements.

Recently issued accounting pronouncements

Description	Effective Date	Effect on Financial Statements
<p>In June 2016, the FASB issued ASU 2016-13, "Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments." This standard significantly changes how an entity will measure credit losses for most financial assets and certain other instruments that aren't measured at fair value through the income statement. The standard will replace the current "incurred loss" approach with an "expected loss" model for instruments measured at amortized cost. For available for sale debt securities, entities will be required to record an allowance rather than reduce the carrying amount, as is currently done under the other than temporary impairment model. It also simplifies the accounting model for purchased credit impaired debt securities and loans.</p>	<p>First quarter 2020.</p>	<p>The Company is currently evaluating the impact the standard may have on its consolidated financial statements when adopted.</p>
<p>In July 2017, the FASB issued ASU 2017-11 "Earnings Per Share (Topic 260), Distinguishing Liabilities from Equity (Topic 480), Derivative and Hedges (Topic 815): Part I - Accounting for Certain Financial Instruments with Down Round Features and Part II - Replacement of the Indefinite Deferral for Mandatory Redeemable Financial Instruments of Certain Nonpublic Entities and Certain Mandatory Redeemable Noncontrolling Interest with a Scope Exception". Part I of this update changes the classification analysis of certain financial instruments (such as warrants and convertible instruments) with down round features. Down round features are features of certain equity-linked financial instruments (or embedded features) that result in the strike price being reduced on the basis of the pricing of future equity offerings. When determining whether certain financial instruments should be classified as liabilities or equity instruments, a down round feature no longer precludes equity classification when assessing whether the instrument is indexed to an entity's own stock. Entities that present earnings per share are required to recognize the effect of the down round feature when it is triggered. The amendments in Part II of this update recharacterize the indefinite deferral of certain provisions of Topic 480 that now are presented as pending content in the Codification, to a scope exception. Those amendments do not have an accounting effect.</p>	<p>First quarter 2019.</p>	<p>The Company is evaluating the impact this standard may have on its consolidated financial statements.</p>

When available, the Company uses quoted market prices to determine the fair value of an asset or liability. If quoted market prices are not available, the Company will use independent pricing services and if the independent pricing service cannot price a particular asset or liability, the Company will obtain third party broker quotes. The Manager's pricing group, which functions independently from its portfolio management personnel, reviews the third party broker quotes by comparing the broker quotes for reasonableness to alternate sources when available. If independent pricing service, or third party broker quotes are not available, the Company determines the fair value of the securities using valuation techniques that use, when possible, current market-based or independently-sourced market parameters, such as interest rates and when applicable, estimates of prepayments and credit losses.

In instances when the Company is required to consolidate a VIE that is determined to be a qualifying collateralized financing entity ("CFE"), under GAAP, the Company will measure both the financial assets and financial liabilities of the VIE using the fair value of either the VIE's financial assets or financial liabilities, whichever is more observable.

Mortgage-backed securities and other securities

19

---

## Table of Contents

In determining the proper fair value hierarchy or level, the Company considers the amount of available observable market data for each security. Agency RMBS given the amount of available observable market data are classified in Level II. For Non-Agency RMBS, CMBS and other securities, to determine whether a security should be a Level II, the securities are grouped by security type and the Manager reviews the internal trade history, for the quarter, for each security type. If there is sufficient trade data above a predetermined threshold of a security type, the Manager determines it has sufficient observable market data and the security will be categorized as a Level II.

Values for the Company's securities are based upon prices obtained from independent third party pricing services. The valuation methodology of the third party pricing services incorporates a commonly used market pricing method. Depending on the type of asset and the underlying collateral, the primary inputs to the model include yields for TBAs, Agency RMBS, the U.S. Treasury market and floating rate indices such as LIBOR, the Constant Maturity Treasury rate and the prime rate as a benchmark yield. In addition, the model may incorporate the current weighted average maturity and additional pool level information such as prepayment speeds, default frequencies and default severities, if applicable. When the third party pricing service cannot adequately price a particular security, the Company utilizes a broker's quote which is reviewed for reasonableness by the Manager's pricing group.

### Residential Whole-Loans and Residential Bridge Loans

Values for the Company's Residential Whole-Loans and Bridge Loans are based upon prices obtained from an independent third party pricing service that specializes in loan valuation, utilizing a valuation model that is calibrated to recent loan trade execution. Their valuation methodology incorporates commonly used market pricing methods, including loan to value ("LTV"), debt to income, maturity, interest rates, collateral location, and unpaid principal balance, prepayment penalties, FICO scores, lien position and times late. Due to the inherent uncertainty of such valuation, the fair values established for residential loans held by the Company may differ from the fair values that would have been established if a readily available market existed for these loans. Accordingly, the Company's loans are classified as Level III.

### Commercial Loans

Values for the Company's Commercial Loans are based upon either prices obtained from an independent third party pricing service that specializes in loan valuation, utilizing a valuation model that is calibrated to recent loan trade execution or a broker quote. The third party pricing service uses a valuation methodology incorporates commonly used market pricing methods, including loan to value ("LTV"), debt to income, maturity, interest rates, collateral location, and unpaid principal balance, prepayment penalties, lien position and times late. Due to the inherent uncertainty of such valuation, the fair values established for commercial loans held by the Company may differ from the fair values that would have been established if a readily available market existed for these loans. Accordingly, the Company's commercial loans are classified as a Level III.

### Securitized commercial loans

Values for the Company's securitized commercial loans are based on the CFE valuation methodology. Since there is an extremely limited market for the securitized commercial loans, the Company determined the the securitized debt is more actively traded and therefore was more observable. Due to the inherent uncertainty of such valuation the Company classifies its securitized commercial loan and securitized debt as Level III.

### Securitized debt

In determining the proper fair value hierarchy or level, the Company considers the amount of available observable market data for each security. Since the securitized debt represents traded debt securities, the Manager's pricing team

reviews the trade activity during the quarter for each security to determine the appropriate level within the fair value hierarchy. If there is sufficient trade data above a predetermined threshold, the Manager determines it has sufficient observable market data and the debt security will be categorized as a Level II. If there is not sufficient observable market data the debt security will be categorized as a Level III.

#### Derivatives

Values for the Company's derivatives are based upon prices from third party pricing services, whose pricing is subject to review by the Manager's pricing committee. In valuing its over-the-counter interest rate derivatives, such as swaps and swaptions, its currency derivatives, such as swaps and forwards and credit derivatives such as total return swaps, the Company considers the creditworthiness of both the Company and its counterparties, along with collateral provisions contained in each derivative

Table of Contents

agreement, from the perspective of both the Company and its counterparties. No credit valuation adjustment was made in determining the fair value of interest rate and/or currency derivatives for the periods ended March 31, 2018 and December 31, 2017.

The Company performs quarterly reviews of the independent third party pricing data. These reviews may consist of a review of the daily change in the prices provided by the independent pricing vendor which exceed established tolerances or comparisons to executed transaction prices, utilizing the Manager's pricing group. The Manager's pricing group, which functions independently from its portfolio management personnel, reviews the price differences or changes in price by comparing the vendor price to alternate sources including other independent pricing services or broker quotations. If the price change or difference cannot be corroborated, the Manager's pricing group consults with the portfolio management team for market color in reviewing such pricing data as warranted. To the extent that the Manager has information, typically in the form of broker quotations that would indicate that a price received from the independent pricing service is outside of a tolerance range, the Manager generally challenges the independent pricing service price.

Table of Contents

For Agency MBS, Non-Agency MBS, Other securities, Residential Whole-Loans, Residential Bridge Loans, Commercial Loans and Securitized commercial loan classified as Level III at March 31, 2018, the Company recorded gross unrealized gains of approximately \$257 thousand, \$5 thousand, \$0, \$343 thousand, \$692 thousand, \$41 thousand and \$5.3 million, respectively, and gross unrealized losses of \$0, \$7 thousand, \$29 thousand, \$995 thousand, \$615 thousand, \$0 and \$5 thousand, respectively, for the three months ended March 31, 2018. For

(1) Agency MBS, Non-Agency MBS, Other securities, Residential Whole-Loans, Residential Bridge Loans and Securitized commercial loan classified as Level III at March 31, 2017, the Company recorded gross unrealized gains of approximately \$261 thousand, \$0, \$0, \$699 thousand, \$0 and \$275 thousand, respectively, and gross unrealized losses of approximately \$0, \$0, \$219 thousand, \$172 thousand, \$0 and \$0, respectively, for the three months ended March 31, 2017. These gains and losses are included in "Unrealized gain (loss), net" in the Consolidated Statements of Operations.

For securitized debt classified as Level III at March 31, 2018, the Company recorded gross unrealized gains of \$0 and gross unrealized losses of \$0 for the three months ended March 31, 2018. For securitized debt and derivative liability classified as Level III at March 31, 2017, the Company recorded gross unrealized gains of \$0 and \$1.2 million, respectively, and gross unrealized losses of \$121 thousand and \$0, respectively, for the three months ended March 31, 2017. These gains and losses are included in "Unrealized gain (loss), net" and "Gain (loss) on derivative instruments, net" in the Consolidated Statements of Operations, respectively.

Transfers between hierarchy levels during operations for the three months ended March 31, 2018 and March 31, 2017 were based on the availability of sufficient observable inputs to meet Level II versus Level III criteria. The leveling of these assets was based on information received from a third party pricing service which, along with the back-testing of historical sales transactions performed by the Manager provided the sufficient observable data for the movement from Level III to Level II. The Company did not have transfers between Level I and Level II for the three months ended March 31, 2018 and March 31, 2017.

## Other Fair Value Disclosures

Certain Residential Bridge Loans, repurchase agreement borrowings and convertible senior unsecured notes are not carried at fair value in the consolidated financial statements. The following table presents the carrying value and estimated fair value of the Company's financial instruments that are not carried at fair value as of March 31, 2018 and December 31, 2017 in the consolidated financial statements (dollars in thousands):

	March 31, 2018		December 31, 2017	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
<b>Assets</b>				
Residential Bridge Loans	\$30,177	\$29,886	\$42,147	\$42,881
Total	\$30,177	\$29,886	\$42,147	\$42,881
<b>Liabilities</b>				
Borrowings under repurchase agreements	\$3,556,920	\$3,557,564	\$3,251,686	\$3,257,956
Convertible senior unsecured notes	109,072	115,695	108,743	114,819
Total	\$3,665,992	\$3,673,259	\$3,360,429	\$3,372,775

"Due from counterparties" and "Due to counterparties" in the Company's Consolidated Balance Sheets are reflected at cost which approximates fair value.

## Residential Bridge Loans

The fair values of the Residential Bridge Loans are based upon prices obtained from an independent third party pricing service that specializes in loan valuation, utilizing a valuation model that is calibrated to recent loan trade execution.. Their valuation methodology incorporates commonly used market pricing methods, including loan to value (“LTV”), debt to income, maturity, interest rates, collateral location, and unpaid principal balance, prepayment penalties, FICO scores, lien position and times late. Due to the inherent uncertainty of such valuation, the fair values established for residential bridge loans held by the Company may differ from the fair values that would have been established if a readily available market existed for these loans. Accordingly, the Company's loans are classified as Level III.

#### Borrowings under repurchase agreements

The fair values of the borrowings under repurchase agreements are based on a net present value technique. This method discounts future estimated cash flows using rates the Company determined best estimates current market interest rates that would be offered for loans with similar characteristics and credit quality. The use of different market assumptions or estimation methodologies could have a material effect on the fair value amounts. This fair value measurement is based on observable inputs, and as such, are classified as Level II.

Table of Contents

## Convertible senior unsecured notes

The fair value of the convertible senior unsecured notes is based on quoted market prices. Accordingly, the Company's convertible senior unsecured notes are classified as Level I.

## Note 4 – Mortgage-Backed Securities and other securities

(1) Os and IIOs have no principal balances and bear interest based on a notional balance. The notional balance is used solely to determine interest distributions on interest-only class of securities. At March 31, 2018, the notional balance for Agency RMBS IOs and IIOs, Non-Agency RMBS IOs and IIOs, Agency RMBS IOs and IIOs, accounted for as derivatives, Agency CMBS IOs and IIOs, accounted for as derivatives and Agency CMBS IOs and IIOs was \$186.9 million, \$866.6 million, \$113.8 million, \$184.6 million and \$1.8 million, respectively. At December 31, 2017, the

notional balance for Agency RMBS IOs and IIOs, Non-Agency RMBS IOs and IIOs, Agency RMBS IOs and IIOs, accounted for as derivatives, Agency CMBS IOs and IIOs, accounted for as derivatives and Agency CMBS IOs and IIOs was \$165.5 million, \$278.4 million, \$122.0 million, \$192.5 million and \$3.3 million, respectively.

(2) Interest on these securities is reported as a component of "Gain (loss) on derivative instruments, net" in the Consolidated Statements of Operations.

(3) Other securities include residual interests in asset-backed securities which have no principal balance and an amortized cost of approximately \$21.6 million and \$22.9 million, as of March 31, 2018 and December 31, 2017, respectively.

Table of Contents

As of March 31, 2018 and December 31, 2017 the weighted average expected remaining term of the MBS and other securities investment portfolio was 8.4 years and 8.6 years, respectively.

The following table presents the changes in the components of the Company's purchase discount and amortizable premium on its Non-Agency RMBS, Non-Agency CMBS and other securities for the three months ended March 31, 2018 and March 31, 2017 (dollars in thousands):

	Three months ended March 31, 2018			Three months ended March 31, 2017		
	Discount Designated as Credit Reserve and OTTI	Accretible Discount <sup>(1)</sup>	Amortizable Premium <sup>(1)</sup>	Discount Designated as Credit Reserve and OTTI	Accretible Discount <sup>(1)</sup>	Amortizable Premium <sup>(1)</sup>
Balance at beginning of period	\$(72,915)	\$(68,438 )	\$ 20,872	\$(130,484)	\$(109,822 )	\$ 44,527
Accretion of discount	—	2,383	—	—	3,232	—
Amortization of premium	—	—	(141 )	—	—	(642 )
Realized credit losses	126	—	—	1,781	—	—
Purchases	(7,182 )	(6,473 )	435	(1,724 )	(668 )	1,522
Sales	2,574	787	(130 )	87,741	29,620	(30,471 )
Net impairment losses recognized in earnings	(2,746 )	—	—	(4,372 )	—	—
Transfers/release of credit reserve <sup>(2)</sup>	669	(1,127 )	458	(459 )	(935 )	1,394
Balance at end of period	\$(79,474)	\$(72,868 )	\$ 21,494	\$(47,517 )	\$(78,573 )	\$ 16,330

(1) Together with coupon interest, accretible purchase discount and amortizable premium is recognized as interest income over the life of the security.

(2) Subsequent reductions of a security's non-accretible discount results in a corresponding reduction in its amortizable premium.

---

Table of Contents

Generally, the Company's records OTTI when the credit quality of the underlying collateral deteriorates and or the scheduled payments are faster than previously projected. The credit deterioration could be as a result of, but not limited to, increased projected realized losses, foreclosures, delinquencies and the likelihood of the borrower being able to make payments in the future. Generally, a prepayment occurs when a loan has a higher interest rate relative to current interest rates and lenders are willing to extend credit at the lower current interest rate or the underlying collateral for the loan is sold or transferred. Refer to Note 2 "Summary of Significant Accounting Policies - Mortgage-Backed Securities and Other Securities."

The following table presents the OTTI the Company recorded on its securities portfolio (dollars in thousands):

	Three months ended March 31, 2018	Three months ended March 31, 2017

## Table of Contents

### Unconsolidated CMBS VIEs

The Company's economic interests held in unconsolidated CMBS VIEs are limited in nature to those of a passive holder of CMBS issued by securitization trusts; the Company was not involved in the design or creation of the securitization trusts which issued its investments in MBS. The Company evaluates the CMBS VIE's for consolidation in which it owns the most subordinate tranche or a portion of the controlling class. As of March 31, 2018, the Company held four variable interest in CMBS VIE's and had three variable interests in CMBS VIE's as of December 31, 2017, in which it either owned the most subordinate class or a portion of the controlling class. The Company determined it was not the primary beneficiary and accordingly, the CMBS VIEs were not consolidated in the Company's consolidated financial statements. As of March 31, 2018 and December 31, 2017, the Company's maximum exposure to loss from these variable interests did not exceed the carrying value of these investments of \$81.2 million and \$62.1 million. These investments are classified in "Non-Agency mortgage-backed securities, at fair value" in the Company's Consolidated Balance Sheets. Further, as of March 31, 2018 and December 31, 2017, the Company had not guaranteed any obligations of unconsolidated entities or entered into any commitment or intent to provide funding to any such entities.

### Note 5 — Residential Whole-Loans and Bridge Loans

#### Residential Whole-Loan Trust

The consolidated financial statements include the consolidation of a residential whole-loan trust that met the definition of a VIE related to the acquisition of Residential Whole-Loans in which the Company has determined itself to be the primary beneficiary of such trust. The Company determined that it was the primary beneficiary of the Residential Whole-Loan trust because it was involved in certain aspects of the design of the trust, has certain oversight rights on defaulted assets and has other significant decision making powers. In addition, the Company has the obligation to absorb losses to the extent of its ownership interest and the right to receive benefits from the trust that could potentially be significant to the trust. The trust has issued a trust certificate that is wholly owned by the Company and represents the entire beneficial interest in pools of Residential Whole-Loans held by the trust. As of March 31, 2018, the Company financed the trust certificate with \$232.4 million of repurchase borrowings, which is a liability held outside the trust. The Company classifies the underlying Residential Whole-Loans owned by the trust in "Residential Whole-Loans, at fair value" in the Consolidated Balance Sheets and has eliminated the intercompany trust certificate in consolidation.

#### Residential Bridge Loan Trust

In February 2017, Revolving Mortgage Investment Trust 2017-BRQ1 ("RMI Trust") issued a trust certificate to the Company, which represents the beneficial interest in pools of Residential Bridge Loans held by the trust. Residential Bridge Loans are mortgage loans secured by residences, typically short-term. The Company determined that RMI Trust was a VIE and itself the primary beneficiary because it was involved in certain aspects of the design of the trust, has certain oversight rights on defaulted assets and has other significant decision making powers. In addition, the Company has the obligation to absorb losses to the extent of its ownership interest and the right to receive benefits from the trust that could potentially be significant to the trust. As of March 31, 2018, the Company financed the trust certificate with \$153.9 million of repurchase borrowings, which is a liability held outside the trust. The Company classifies both the underlying Residential Bridge Loans carried at amortized cost and the Residential Bridge Loans that it elected the fair value option in "Residential Bridge Loans" in the Consolidated Balance Sheets. The Company has eliminated the intercompany trust certificate in consolidation.

#### Consolidated Residential Whole-Loan and Residential Bridge Loan Trusts

The Company assesses modifications to VIEs on an ongoing basis to determine if a significant reconsideration event has occurred that would change the Company's initial consolidation assessment. The consolidated Residential Whole-Loan Trust holds 731 Residential Whole-Loans and the consolidated Bridge Loan Trust holds 528 Residential Bridge Loans and 13 Residential Whole-Loans as of March 31, 2018.

The following table presents a summary of the assets and liabilities of the consolidated Residential Whole-Loan and Residential Bridge Loan trusts included in the Consolidated Balance Sheets as of March 31, 2018 and December 31, 2017 (dollars in thousands).

Table of Contents

	March 31, December 31,	
	2018	2017
Cash and cash equivalents	\$227	\$ —
Residential Whole-Loans, at fair value (\$296,719 and \$237,423 pledged as collateral, at fair value, respectively)	296,719	237,423
Residential Bridge Loans (\$129,469 and \$64,526 at fair value and \$159,646 and \$106,673 pledged as collateral, respectively)	159,646	106,673
Investment related receivable	18,825	7,665
Accrued interest receivable	4,408	3,197
Other assets	57	—
Total assets	\$479,882	\$ 354,958
Accounts payable and accrued expenses	449	188
Other liabilities	730	—
Total liabilities	\$1,179	\$ 188

The Company's risk with respect to its investment in each residential loan trust is limited to its direct ownership in the trust. The Residential Whole-Loans and Residential Bridge Loans held by the consolidated trusts are held solely to satisfy the liabilities of the trust, and creditors of the trust have no recourse to the general credit of the Company. The Company is not contractually required and has not provided any additional financial support to the trusts for the three months ended March 31, 2018 and March 31, 2017.

The following table presents the components of the carrying value of Residential Whole-Loans and Residential Bridge Loans as of March 31, 2018 and December 31, 2017 (dollars in thousands):

	Residential Whole-Loans, at Fair Value		Residential Bridge Loans, at Fair Value <sup>(1)</sup>		Residential Bridge Loans, at Amortized Cost <sup>(1)</sup>	
	March 31, 2018	December 31, 2017	March 31, 2018	December 31, 2017	March 31, 2018	December 31, 2017
Principal balance	\$291,161	\$ 232,270	\$ 128,640	\$ 63,802	\$30,138	\$42,066

Gross unrealized losses	(641 )	(141 )	(583 )	(96 )	N/A	N/A
Fair value	\$296,719	\$ 237,423	\$ 129,469	\$ 64,526	N/A	N/A

(1) These loans are classified in Residential Bridge Loans in the consolidated balance sheets

## Residential Whole-Loans

The Residential Whole-Loans are comprised of non-qualifying, mostly adjustable rate mortgages with low loan to values (or "LTV"). The following tables present certain information about the Company's Residential Whole-Loan investment portfolio at March 31, 2018 and December 31, 2017 (dollars in thousands):

Table of Contents

March 31, 2018

Current Coupon Rate	Number of Loans	Principal Balance	Weighted Average		Expected Life (years)	Contractual Maturity (years)	Coupon Rate
			Original LTV	Original FICO Score <sup>(1)</sup>

Non-performing Loans

## Table of Contents

### Residential Whole-Loans

As of March 31, 2018, there was one Residential Whole-Loan in non-accrual status with a current unpaid principal balance of \$579 thousand and a fair value of \$569 thousand. This nonperforming loan represents approximately 0.2% of the total outstanding principal balance. No allowance and provision for credit losses was recorded for this loan as of and for the three months ended March 31, 2018 since the Company elected the fair value option. The Company stopped accruing interest income for this loan when it became contractually 90 days delinquent.

### Residential Bridge Loans

As of March 31, 2018, there were 13 Residential Bridge Loans, which are carried at amortized cost, in non-accrual status with an unpaid principal balance of approximately \$3.4 million. These nonperforming loans represent approximately 2.1% of the total outstanding principal balance. These loans are collateral dependent with a weighted average original LTV of 76%. No allowance and provision for credit losses was recorded for these loans as of and for the three months ended March 31, 2018 since the fair value of the collateral balance less the cost to sell was in excess of the outstanding principal and interest balances.

## Note 6 — Commercial Real Estate Investments

### Securitized Commercial Loans

Securitized commercial loans is comprised of commercial loans from consolidated third party sponsored CMBS VIE's. At March 31, 2018 the Company had variable interests in two CMBS VIE's CMSC Trust 2015 - Longhouse MZ and RETL 2018- RVP that it determined it was the primary beneficiary and was required to consolidate. The commercial loans that serves as collateral for the securitized debt issued by these VIE's and can only be used to settle the securitized debt. Refer to Note 7 - "Financings" for details on the associated securitized debt. The Company assesses modifications to VIEs on an ongoing basis to determine if a significant reconsideration event has occurred that would change the Company's initial consolidation assessment.

### CMSC Trust 2015 - Longhouse MZ

In November 2015, the Company acquired a \$14.0 million interest in the trust certificate issued by CMSC Trust 2015 - Longhouse MZ ("CMSC Trust"), with a fair value of \$13.9 million at March 31, 2018. The Company determined that CMSC Trust was a VIE and itself the primary beneficiary because it was involved in certain aspects of the design of the trust, has certain oversight rights on defaulted assets and has other significant decision making powers. In addition, the Company has the obligation to absorb losses to the extent of its ownership interest and the right to receive benefits from the trust that the Company believes could potentially be significant to the trust. As the primary beneficiary the Company was required to consolidate CMSC Trust and accordingly its \$14.0 million investment in CMSC Trust was eliminated in consolidation. The CMSC Trust holds a \$24.8 million mezzanine loan collateralized by interests in commercial real estate. The mezzanine loan serves as collateral for the \$24.7 million of trust certificates issued. Refer to Note 7 - "Financings" for details on the associated securitized debt.

### RETL 2018-RVP

In March 2018, the Company acquired a \$67.8 million interest in the trust certificate issued by RETL 2018-RVP ("RETL Trust"), which represents the 5% eligible horizontal residual interest under the Credit Risk Retention Rules of Section 15G of the Exchange Act. Under the credit risk retention rules the Company must retain its investment for five years and is limited in its ability to finance and hedge its investment. The trust certificate's pass-through rate is

one month LIBOR plus 9.5%. The fair value of the Company's interest in the trust is \$68.1 million at March 31, 2018. The Company determined that RETL Trust was a VIE and itself the primary beneficiary because its Manager was involved in certain aspects of the design of the trust and the Company together with other related party entities own more than 50% of the controlling class. The owner of 50% or more of the controlling class has certain oversight rights on defaulted assets and has other significant decision making powers. In addition, the Company has the obligation to absorb losses to the extent of its ownership interest from the trust that the Company believes could potentially be significant to the trust. As the primary beneficiary the Company was required to consolidate RETL and accordingly its \$67.8 million investment in RETL was eliminated in consolidation. The RETL Trust holds a \$1.35 billion commercial loan collateralized by first mortgages, deeds of trusts and interests in commercial real estate. The loan's stated maturity date is February 9, 2021 (subject to the borrower's option to extend the initial stated maturity date for two successive one-year terms) and bears an interest

Table of Contents

rate of one month LIBOR plus 3.15%. The commercial loan serves as collateral for the \$1.35 billion of securitized debt issued. Refer to Note 7 - "Financings" for details on the associated securitized debt.

## Commercial Loans

## Revolving Small Balance Commercial Trust 2018-1

In March 2018, the Company formed the Revolving Small Balance Commercial Trust 2018-1 ("RSBC Trust") to acquire a \$20.6 million first lien commercial mortgage loan collateralized by three senior care living facilities. The loan matures on March 6, 2019 and bears an interest rate of one month LIBOR plus 4.75%. The Company determined that the wholly owned RSBC Trust was a VIE and itself the primary beneficiary because it was involved in the design of the trust and holds significant decision making powers. In addition, the Company has the obligation to absorb losses to the extent of its ownership interest and the right to receive benefits from the trust that could potentially be significant to the trust. As of March 31, 2018, the Company financed the trust certificate with \$12.3 million of repurchase borrowings, which is a liability held outside the trust.

## Commercial Mezzanine Loan

In March 2018, the Company acquired a \$20.0 million mezzanine loan secured by partnership interest in an entity that owns a hotel. The mezzanine loan has a maturity date of December 9, 2019 with three one year extension options and bears an interest rate of one month LIBOR plus 6.5%.

## Consolidated Commercial Loan Trusts

The Company assesses modifications to VIEs on an ongoing basis to determine if a significant reconsideration event has occurred that would change the Company's initial consolidation assessment. The three consolidated commercial loan trusts, CMSC Trust, RETL Trust and RSBC Trust collectively hold three commercial loans as of March 31, 2018.

The following table presents a summary of the assets and liabilities of the three consolidated commercial loan trusts included in the Consolidated Balance Sheets as of March 31, 2018 and December 31, 2017 (dollars in thousands).

	March 31, 2018	December 31, 2017
Restricted cash	\$37,034	\$ —
Securitized commercial loans, at fair value	1,383,044	24,876
Commercial Loans, at fair value	20,534	—
Accrued interest receivable	1,181	161
Total assets	\$1,441,793	\$ 25,037
Securitized debt, at fair value	\$1,301,050	\$ 10,945
Accrued interest payable	887	70
Accounts payable and accrued expenses	6	1
Other liabilities	37,034	—
Total liabilities	\$1,338,977	\$ 11,016

The Company's risk with respect to its investment in each commercial loan trust is limited to its direct ownership in the trust. The commercial loans held by the consolidated trusts are held solely to satisfy the liabilities of the trust, and creditors of the trust have no recourse to the general credit of the Company. The assets of a consolidated trust can only be used to satisfy the obligations of that trust. The Company is not contractually required and has not provided any

additional financial support to the trusts for the three months ended March 31, 2018 and March 31, 2017. The Company did not deconsolidate any trusts during the three months ended March 31, 2018 and March 31, 2017.

The following table presents the components of the carrying value of the commercial real estate loans as of March 31, 2018 and December 31, 2017 (dollars in thousands):

## Note 7— Financings

## Borrowings Under Repurchase Agreements

The Company primarily finances its investment acquisitions with repurchase agreements. The repurchase agreements bear interest at a contractually agreed-upon rate and typically have terms ranging from one month to three months. The Company's repurchase agreement borrowings are accounted for as secured borrowings when the Company maintains effective control of the financed assets. Under the repurchase agreements, the respective counterparties retain the right to determine the fair value of the underlying collateral. A reduction in the value of pledged assets requires the Company to post additional securities as collateral, pay down borrowings or establish cash margin accounts with the counterparties in order to re-establish the agreed-upon collateral requirements, and is referred to as a margin call. The inability of the Company to post adequate collateral for a margin call by a counterparty, in a timeframe as short as the close of the same business day, could result in a condition of default under the Company's repurchase agreements, thereby enabling the counterparty to liquidate the collateral pledged by the Company, which may have a material adverse effect on the Company's financial position, results of operations and cash flows. Under the terms of the repurchase agreements the Company may rehypothecate pledged U.S. Treasury securities it receives from its repurchase agreement as incremental collateral in order to increase the Company's cash position. At March 31, 2018 and December 31, 2017, the Company did not have any rehypothecated U.S. Treasury securities.

Certain of the repurchase agreements provide the counterparty with the right to terminate the agreement if the Company does not maintain certain equity and leverage metrics, the most restrictive of which include a limit on leverage based on the composition of the Company's portfolio. For all the repurchase agreements with outstanding borrowings, the Company was in compliance with the terms of such financial tests as of March 31, 2018.

As of March 31, 2018, the Company had master repurchase agreements with 28 counterparties. As of March 31, 2018, the Company had borrowings under repurchase agreements with 17 counterparties. The following table summarizes certain characteristics of the Company's repurchase agreements at March 31, 2018 and December 31, 2017 (dollars in thousands):

Table of Contents

Securities Pledged	March 31, 2018			December 31, 2017

Borrowings under repurchase agreements	\$3,556,920	2.31 %	55	\$3,251,686	1.86 %	51

(1) Repurchase agreement borrowings on loans owned are through trust certificates. The trust certificates are eliminated upon consolidation.

For the three months ended March 31, 2018 and the year ended December 31, 2017, the Company had average borrowings under its repurchase agreements of approximately \$3.3 billion and \$2.7 billion, respectively, and had a maximum month-end balance during the periods of approximately \$3.6 billion and \$3.3 billion, respectively. The Company had accrued interest payable at March 31, 2018 and December 31, 2017 of approximately \$9.0 million and \$6.3 million, respectively.

At March 31, 2018 and December 31, 2017, repurchase agreements collateralized by investments had the following remaining maturities:

(dollars in thousands)	March 31, 2018	December 31, 2017
Overnight	\$—	\$—
1 to 29 days	744,227	1,387,599

Cash <sup>(2)</sup>	36,642	—	36,642	23,591	—	23,591
Total	\$3,952,251	\$15,343	\$ 3,967,594	\$3,557,294	\$12,617	\$ 3,569,911

<sup>(1)</sup> Loans owned through trust certificates are pledged as collateral. The trust certificates are eliminated upon consolidation.

<sup>(2)</sup> Cash posted as collateral is included in "Due from counterparties" in the Company's Consolidated Balance Sheets.

A reduction in the value of pledged assets typically results in the repurchase agreement counterparties initiating a margin call. At March 31, 2018 and December 31, 2017, investments held by counterparties as security for repurchase agreements totaled approximately \$3.9 billion and approximately \$3.5 billion, respectively. Cash collateral held by counterparties at March 31, 2018 and December 31, 2017 was approximately \$36.6 million and approximately \$23.6 million, respectively. Cash posted by repurchase agreement counterparties at March 31, 2018 and December 31, 2017, was \$0 and approximately \$1.5 million, respectively. In addition, at March 31, 2018 and December 31, 2017, the Company held securities with a fair value of \$2.2 million and \$306 thousand, respectively, received as collateral from its repurchase agreement counterparties to satisfy margin requirements. The Company has the ability to repledge collateral received from its repurchase counterparties.

#### Convertible Senior Unsecured Notes

In October 2017, the Company issued \$115.0 million aggregate principal amount of 6.75% convertible senior unsecured notes, which included the underwriter's option to purchase \$15.0 million aggregate principal amount of the notes for net proceeds of \$111.1 million. The notes mature on October 1, 2022, unless earlier converted, redeemed or repurchased by the holders pursuant to their terms, and are not redeemable by the Company except during the final three months prior to maturity.

The notes are convertible into, at the Company's election, cash, shares of the Company's common stock or a combination of both, subject to the satisfaction of certain conditions and during specified periods. The conversion rate is subject to adjustment upon the occurrence of certain specified events and the holders may require the Company to repurchase all or any portion of their notes for cash equal to 100% of the principal amount of the notes, plus accrued and unpaid interest, if the Company undergoes a fundamental change as specified in the agreement. The initial conversion rate was 83.1947 shares of common stock per \$1,000 principal amount of notes and represented a conversion price of \$12.02 per share of common stock.

Securitized Debt

CMSC Trust 2015 - Longhouse MZ

38

---

Table of Contents

CMSC Trust issued \$25.0 million in commercial pass-through certificates. The outstanding balance of the trust certificates was \$24.7 million at March 31, 2018, with a fair value of \$24.7 million. The trust certificates bear a fixed interest rate of 8.9% and mature on July 6, 2020. The Company owns \$13.9 million of the trust certificates which was eliminated in consolidation and the remaining \$10.9 million is held by related parties and is carried at a fair value of \$10.9 million.

## RETL 2018-RVP

The following table summarizes RETL Trust's commercial mortgage pass-through certificates at March 31, 2018 (dollars in thousands):

Classes	Principal Balance	Coupon	Fair Value	Contractual Maturity

Class HRR	67,800	11.3 %	68,122	2/15/2021
Class X-CP <sup>(1)</sup>	N/A	2.6 %	2,972	3/11/2019
Class X-EXT <sup>(1)</sup>	N/A	—	12	2/15/2021
	\$1,350,000		\$1,358,273	

(1) Class X-CP and Class X-EXT are interest only classes with a notional balance of \$121.0 million each.

The Company owns the HRR certificates which are eliminated in consolidation. Of the remaining \$1.28 billion in trust certificates, \$356.7 million is owned by related parties and \$925.5 million owned by third parties. The securitized debt of the RETL Trust can only be settled with the commercial loan that serves as collateral for the securitized debt and is non-recourse to the Company.

## Note 8 — Derivative Instruments

The Company's derivatives may include interest rate swaps, options, futures contracts, currency swaps and forwards, TBAs, Agency and Non-Agency Interest-Only Strips that are classified as derivatives, credit default swaps and total return swaps.

Table of Contents

The following table summarizes the Company's derivative instruments at March 31, 2018 and December 31, 2017 (dollars in thousands):

Derivative Instrument	Accounting Designation	Consolidated Balance Sheets Location	March 31, 2018		December 31, 2017
			Notional Amount	Fair Value	Notional Amount
Interest rate swaps, asset	Non-Hedge	Derivative assets, at fair value	\$600,000	\$113	\$—
Options, asset	Non-Hedge	Derivative assets, at fair value	400,000	63	320,000
Futures contracts, asset	Non-Hedge	Derivative assets, at fair value	238,200	1,555	480,200

At March 31, 2018 and December 31, 2017, the Company had cash pledged as collateral for derivatives which represents upfront cash collateral upon the Company entering into the derivative transaction and cash collateral for derivatives not cleared through the CME, of approximately \$59.8 million and approximately \$63.3 million, respectively, which is reported in "Due from counterparties" in the Consolidated Balance Sheets. Effective in January 2017, variation margin of CME cleared derivatives are treated as settlements of the derivative contract as opposed to cash collateral. The Company also held cash collateral against derivatives of \$300 thousand and \$0 at March 31, 2018 and December 31, 2017, respectively, which is reported in "Due to counterparties" in the Consolidated Balance Sheets.

## Interest rate swaps and interest rate swaptions

The Company enters into interest rate swaps and interest rate swaptions to mitigate its exposure to higher short-term interest rates in connection with its repurchase agreements. Interest rate swaps generally involve the receipt of variable-rate amounts from a counterparty in exchange for the Company making fixed-rate payments over the life of the interest rate swap without exchange of the underlying notional amount. Notwithstanding the foregoing, in order to manage its hedge position with regard to its liabilities, the Company on occasion will enter into interest rate swaps which involve the receipt of fixed-rate amounts from a counterparty in exchange for the Company making variable-rate payments over the life of the interest rate swap without exchange of the underlying notional amount. The Company also enters into forward starting swaps and interest rate swaptions to help mitigate the effects of changes in interest rates on a portion of its borrowings under repurchase agreements. Interest rate swaptions provide the

Company the option to enter into an interest rate swap agreement for a predetermined notional amount, stated term and pay and receive interest rates in the future. On occasion the Company may enter into a MAC interest rate swap in which it may receive or make a payment at the time of entering such interest rate swap to compensate for the out of the market nature of such interest rate swap. Similar to all other interest rate swaps, these interest rate swaps are also subject to margin requirements as previously described.

Table of Contents

The Company has not elected to account for its interest rate swaps as “hedges” under GAAP, accordingly the change in fair value of the interest rate swaps not designated in hedging relationships are recorded together with periodic net interest settlement amounts in "Gain (loss) on derivatives instruments, net" in the Consolidated Statements of Operations.

## Interest Rate Swaps

In April 2017, the Company restructured its hedge positions, effectively terminating fixed-pay interest rate swaps with a notional value of approximately \$3.2 billion and variable-pay interest rate swaps with a notional value of approximately \$2.0 billion to effectively hedge its debt and reduce swap related interest expense.

The following tables summarize the average fixed pay rate, average floating receive rate and average maturity for the Company’s interest rate swaps as of March 31, 2018 and December 31, 2017 (dollars in thousands):

Remaining Interest Rate Swap Term	March 31, 2018						Forward Starting (1)	
	Notional Amount	Average Fixed Pay Rate	Floating Receive Rate	Average Maturity (Years)				
Greater than 1 year and less than 3 years	\$600,000	1.6 %	2.0 %	1.6	—	%		
Greater than 3 years and less than 5 years	850,000	2.0 %	1.8 %	4.1	—	%		
Greater than 5 years	1,757,300	2.5 %	1.8 %	10.2	88.3	%		
Total	\$3,207,300	2.2 %	1.8 %	7.0	48.4	%		

  

Remaining Interest Rate Swap Term	December 31, 2017						Forward Starting (1)	
	Notional Amount	Average Fixed Pay Rate	Floating Receive Rate	Average Maturity (Years)				
Greater than 1 year and less than 3 years	\$600,000	1.6 %	1.5 %	1.8	—	%		
Greater than 3 years and less than 5 years	960,000	2.0 %	1.4 %	4.3	—	%		
Greater than 5 years	1,692,200	2.5 %	1.4 %	10.5	90.2	%		
Total	\$3,252,200	2.2 %	1.4 %	7.1	46.9	%		

(1) Represents the percentage of notional that is forward starting.

As of March 31, 2018 and December 31, 2017, the Company has entered into fixed-pay forward starting interest rate swaps of approximately \$1.6 billion and \$1.5 billion, respectively, which have weighted average forward starting dates of 1.0 month and 4.0 months, respectively.

## Options

The Company may enter into options on U.S. Treasuries and Eurodollar. As of March 31, 2018, the Company had long position options on Eurodollar with a notional amount of \$400.0 million and a fair value in an asset position of \$63 thousand and short position options on Eurodollar with a notional amount of \$400.0 million and a fair value in a liability position of \$50 thousand. As of December 31, 2017, the Company had long position options on U.S. Treasuries with a notional amount of \$320.0 million and a fair value in an asset position of \$100 thousand and short position options on U.S. Treasuries with a notional amount of \$320.0 million and a fair value in a liability position of

\$50 thousand.

#### Futures Contracts

The Company may enter into Eurodollar, Volatility Index, and U.S. Treasury futures. As of March 31, 2018, the Company had entered into contracts to buy or long positions for U.S. Treasuries with a notional amount of \$119.7 million, a fair value in an asset position of \$1.5 million and an expiration date of June 2018. As of March 31, 2018, the Company entered into contracts to sell or short positions for U.S. Treasuries with a notional amount of \$480.0 million, a fair value in an asset position of \$49 thousand

42

---

Table of Contents

and an expiration date of June 2018. In addition, the Company entered into contracts to sell or short positions for Eurodollar with a notional amount of \$400.0 million, a fair value in a liability position of \$400 thousand and an expiration date of December 2018 at March 31, 2018. As of December 31, 2017, the Company had entered into contracts to buy or long positions for U.S. Treasuries with a notional amount of \$480.0 million, a fair value in an asset position of \$628 thousand and an expiration date of March 2018.

## Currency Swaps and Forwards

The Company has invested in and, in the future, may invest in additional securities which are denominated in a currency or currencies other than U.S. dollars. Similarly, it has and may in the future, finance such assets in a currency or currencies other than U.S. dollars. In order to mitigate the impact to the Company, the Company may enter into derivative financial instruments, including foreign currency swaps and foreign currency forwards, to manage fluctuations in the valuation between U.S. dollars and such foreign currencies. Foreign currency swaps involve the payment of a foreign currency at fixed interest rate on a fixed notional amount and the receipt of U.S. dollars at a fixed interest rate on a fixed notional amount. Foreign currency forwards provide for the payment of a fixed amount of a foreign currency in exchange for a fixed amount of U.S. dollars at a date certain in the future. The carrying value of foreign currency swaps and forwards is included in "Derivative assets, at fair value" and "Derivative liability, at fair value" in the Consolidated Balance Sheets with changes in valuation included in "Gain (loss) on derivative instruments, net" in the Consolidated Statements of Operations.

The Company had no foreign currency swaps and forwards at March 31, 2018 and December 31, 2017.

## To-Be-Announced Securities

The Company purchased or sold TBAs during the three months ended March 31, 2018 and the year ended December 31, 2017. The following is a summary of the Company's long and short TBA positions as of March 31, 2018 and December 31, 2017 reported in "Derivative assets, at fair value" and "Derivative liability, at fair value" in the Consolidated Balance Sheets (dollars in thousands):

	March 31, 2018		December 31, 2017	
	Notional Amount	Fair Value	Notional Amount	Fair Value
Purchase contracts, asset	\$700,000	\$478	\$—	\$—
Sale contracts, asset	(350,000 )	144	—	—
TBA securities, asset	350,000	622	—	—
Purchase contracts, liability	—	—	125,000	(10 )
Sale contracts, liability	(350,000 )	(157 )	—	—
TBA securities, liability	(350,000 )	(157 )	125,000	(10 )
TBA securities, net	\$—	\$465	\$125,000	\$(10)

The following table presents additional information about the Company's contracts to purchase and sell TBAs for the three months ended March 31, 2018 and the year ended December 31, 2017 (dollars in thousands):

	Notional Amount December 31, 2017	Additions	Settlement, Termination, or Exercise	Expiration	Notional Amount March 31, 2018
Purchase of TBAs	\$125,000	\$1,425,000	\$ (850,000	)	\$700,000

Edgar Filing: Western Asset Mortgage Capital Corp - Form 10-Q

Sale of TBAs	\$—	\$1,550,000	\$ (850,000	)	\$700,000
	Notional Amount December 31, 2016	Additions	Settlement, Termination, Expiration or Exercise		Notional Amount December 31, 2017

Table of Contents

## Interest-Only Strips

The Company also invests in Interest-Only Strips. In determining the classification of its holdings of Interest-Only Strips, the Company evaluates the securities to determine if the nature of the cash flows has been altered from that of the underlying mortgage collateral. Generally, Interest-Only Strips for which the security represents a strip off of a mortgage pass through security will be considered a hybrid instrument classified as a MBS investment in the Consolidated Balance Sheets utilizing the fair value option. Alternatively, those Interest-Only Strips, for which the underlying mortgage collateral has been included into a structured security that alters the cash flows from the underlying mortgage collateral, are accounted for as derivatives at fair value with changes recognized in "Gain (loss) on derivative instruments, net" in the Consolidated Statements of Operations, along with any interest received. The carrying value of these Interest-Only Strips is included in "Mortgage-backed securities and other securities, at fair value" in the Consolidated Balance Sheets.

## Credit Default Swaps

In 2017, the Company entered into credit default swaps with a notional amount of \$14.8 million and a maturity date of May 2063. In the future, the Company may continue to enter into these type of credit derivatives. As of March 31, 2018 and December 31, 2017, the credit default swaps had a fair value in a liability position of \$110 thousand and \$95 thousand. Under these instruments, the Company makes a monthly premium payment over the term of the contract in exchange for the counterparty making a payment to the Company for losses of the reference securities, upon the occurrence of a specified credit event.

## Note 9 — Offsetting Assets and Liabilities

The following tables present information about certain assets and liabilities that are subject to master netting agreements (or similar agreements) and can potentially be offset in the Company's Consolidated Balance Sheets at March 31, 2018 and December 31, 2017 (dollars in thousands):

Description	March 31, 2018		Gross Amounts Not		Net Amount
	Gross Amounts	Net Amounts of Assets presented in the Consolidated Balance Sheets	Gross Amounts Offset in the Consolidated Balance Sheets	Gross Amounts Not Offset in the Consolidated Balance Sheets	
<b>Derivative Assets</b>					
Agency and Non-Agency Interest-Only Strips, accounted for as derivatives included in MBS	\$ 15,051	\$ —	\$ 15,051	\$(12,755 ) \$—	\$ 2,296
Derivative asset, at fair value <sup>(2)</sup>	2,353	—	2,353	(746 ) (144 )	1,463
Total derivative assets	\$ 17,404	\$ —	\$ 17,404	\$(13,501 ) \$(144 )	\$ 3,759
<b>Derivative Liabilities and Repurchase Agreements</b>					
Derivative liability, at fair value <sup>(2)(3)</sup>	\$ 3,689	\$ —	\$ 3,689	\$(746 ) \$(2,943 )	\$ —
Repurchase Agreements <sup>(4)</sup>	3,556,920	—	3,556,920	(3,556,920 ) —	—

Total derivative liability	\$3,560,609	\$	—\$ 3,560,609	\$(3,557,666)	\$(2,943)	\$	—
----------------------------	-------------	----	---------------	---------------	-----------	----	---

- Amounts disclosed in the Financial Instruments column of the tables above represent securities, Whole-Loans and securitized commercial loan collateral pledged and derivative assets that are available to be offset against liability
- (1) balances associated with repurchase agreement and derivative liabilities. Amounts disclosed in the Cash Collateral column of the tables above represents amounts pledged or received as collateral against derivative transactions.
  - (2) Derivative asset, at fair value and Derivative liability, at fair value includes interest rate swaps, interest rate swaptions, mortgage put options, currency forwards, futures contracts, foreign currency swaps and TBAs.
  - (3) Cash collateral pledged against the Company's derivative counterparties was approximately \$59.8 million as of March 31, 2018.
  - (4) The carrying value of investments pledged against the Company's repurchase agreements was approximately \$3.9 billion as of March 31, 2018.

management fee equal to 1.50% per annum of the Company's stockholders' equity (as defined in the Management Agreement), calculated and payable (in cash) quarterly in arrears. For purposes of calculating the management fee, "stockholders' equity" means the sum of the net proceeds from any issuances of the Company's equity securities since inception (allocated on a pro rata daily basis for such issuances during the fiscal quarter of any such issuance), plus retained earnings, calculated in accordance with GAAP, at the end of the most recently completed fiscal quarter (without taking into account any non-cash equity compensation expense incurred in current or prior periods), less any amount paid for repurchases of the Company's shares of common stock, excluding any unrealized gains or losses on our investments and derivatives and other non-cash items (including OTTI charges prior to January 1, 2016) that have impacted stockholder's equity as reported in the Company's consolidated financial statements prepared in accordance with GAAP, regardless of whether such items are included in other comprehensive income or loss, or in net income, and excluding one-time events pursuant to changes in GAAP and certain other non-cash charges after discussions between the Manager and the Company's independent directors and after approval by a majority of the Company's independent directors. However, if the Company's stockholders' equity for any given quarter is negative based on the calculation described above, the Manager will not be entitled to receive any management fee for that quarter.

## Table of Contents

On August 3, 2016, the Company and the Manager entered into an amendment to the Management Agreement that amended the definition of "Equity" in the Management Agreement. Under the new definition, for all periods beginning on January 1, 2016, OTTI will reduce the Company's "Equity" for any completed fiscal quarter that OTTI was recognized, which in turn will reduce the Company's management fee from what would have been payable before the amendment.

In addition, the Company may be required to reimburse the Manager for certain expenses as described below, and shall reimburse the Manager for the compensation paid to the Company's CFO, controller and their staff. Expense reimbursements to the Manager are made in cash on a regular basis. The Company's reimbursement obligation is not subject to any dollar limitation. Because the Manager's personnel perform certain legal, accounting, due diligence tasks and other services that outside professionals or outside consultants otherwise would perform, the Manager may be paid or reimbursed for the documented cost of performing such tasks, provided that such costs and reimbursements are in amounts which are no greater than those which would be payable to outside professionals or consultants engaged to perform such services pursuant to agreements negotiated on an arm's-length basis.

The Management Agreement may be amended, supplemented or modified by agreement between the Company and the Manager. The Management Agreement expires on May 16, 2019. It is automatically renewed for one-year terms on each May 15th unless previously terminated as described below. The Company's independent directors review the Manager's performance and any fees payable to the Manager annually and, the Management Agreement may be terminated annually upon the affirmative vote of at least two-thirds (2/3) of the Company's independent directors, based upon: (i) the Manager's unsatisfactory performance that is materially detrimental to the Company; or (ii) the Company's determination that any fees payable to the Manager are not fair, subject to the Manager's right to prevent such termination due to unfair fees by accepting a reduction of management fees agreed to by at least two-thirds (2/3) of the Company's independent directors. The Company will provide the Manager 180 days prior notice of any such termination. Unless terminated for cause, the Company will pay the Manager a termination fee equal to three times the average annual management fee earned by the Manager during the prior 24-month period immediately preceding the date of termination, calculated as of the end of the most recently completed fiscal quarter prior to the date of termination.

The Company may also terminate the Management Agreement at any time, without the payment of any termination fee, with 30 days prior written notice from the Company's Board of Directors for cause, which will be determined by at least two-thirds (2/3) of the Company's independent directors, which is defined as: (i) the Manager's continued material breach of any provision of the Management Agreement (including the Manager's failure to comply with the Company's investment guidelines); (ii) the Manager's fraud, misappropriation of funds, or embezzlement against the Company; (iii) the Manager's gross negligence in the performance of its duties under the Management Agreement; (iv) the occurrence of certain events with respect to the bankruptcy or insolvency of the Manager, including an order for relief in an involuntary bankruptcy case or the Manager authorizing or filing a voluntary bankruptcy petition; (v) the Manager is convicted (including a plea of nolo contendere) of a felony; or (vi) the dissolution of the Manager.

For the three months ended March 31, 2018 and March 31, 2017, the Company incurred approximately \$2.2 million and approximately \$2.5 million in management fee, respectively.

In addition to the management fee, the Company is also responsible for reimbursing the Manager for certain expenses paid by the Manager on behalf of the Company as defined in the Management Agreement. For the three months ended March 31, 2018 and March 31, 2017, the Company recorded expenses included in general and administrative expenses totaling approximately \$208 thousand and approximately \$216 thousand, respectively, related to reimbursable employee costs. Any such expenses incurred by the Manager and reimbursed by the Company, including the employee compensation expense, are typically included in the Company's general and administrative expenses in the Consolidated Statements of Operations. At March 31, 2018 and December 31, 2017, approximately \$4.1 million

and approximately \$1.9 million, respectively, for management fees incurred but not yet paid was included in "Payable to affiliate" in the Consolidated Balance Sheets. In addition, at March 31, 2018 and December 31, 2017, approximately \$138 thousand and approximately \$99 thousand, respectively, of reimbursable costs incurred but not yet paid was included in "Payable to affiliate" in the Consolidated Balance Sheets.

Note 11 — Share-Based Payments

In conjunction with the Company's IPO and concurrent private placement, the Company's Board of Directors approved the Western Asset Mortgage Capital Corporation Equity Plan (the "Equity Plan") and the Western Asset Manager Equity Plan (the

Table of Contents

“Manager Equity Plan” and collectively the “Equity Incentive Plans”). The Equity Incentive Plans include provisions for grants of restricted common stock and other equity-based awards to the Manager, its employees and employees of its affiliates and to the Company’s directors, officers and employees. The Company can issue up to 3.0% of the total number of issued and outstanding shares of its common stock (on a fully diluted basis) at the time of each award (other than any shares previously issued or subject to awards made pursuant to one of the Company’s Equity Incentive Plans) under these Equity Incentive Plans. Approximately 725,969 of shares have been issued under the Equity Plans with 511,742 shares available for issuance, as of March 31, 2018.

Under the Equity Plan, the Company did not make any grants during the three months ended March 31, 2018 and it made the following grants during the year ended December 31, 2017:

On June 1, 2017, the Company granted a total of 15,536 (3,884 each) of restricted common stock under the Equity Plan to the Company’s four independent directors. These restricted shares will vest in full on June 1, 2018, the first anniversary of the grant date. Each of the independent directors has elected to defer the shares granted to him under the Company’s Director Deferred Fee Plan (the “Director Deferred Fee Plan”). The Director Deferred Fee Plan permits eligible members of the Company’s board of directors to defer certain stock awards made under its director compensation programs. The Director Deferred Fee Plan allows directors to defer issuance of their stock awards and therefore defer payment of any tax liability until the deferral is terminated, pursuant to the election form executed each year by each eligible director.

During the three months ended March 31, 2018 and March 31, 2017, 66,667 and 133,334 restricted common shares vested, respectively, including shares whose issuance has been deferred under the Director Deferred Fee Plan. The Company recognized stock-based compensation expense of approximately \$75 thousand and approximately \$362 thousand for the three months ended March 31, 2018 and March 31, 2017, respectively. In addition, the Company had unamortized compensation expense of \$27 thousand for equity awards and \$0 for liability awards and \$66 thousand for equity awards and approximately \$111 thousand for liability awards at March 31, 2018 and December 31, 2017, respectively.

All restricted common shares granted, other than those whose issuance has been deferred pursuant to the Director Deferred Fee Plan, possess all incidents of ownership, including the right to receive dividends and distributions currently, and the right to vote. Dividend equivalent payments otherwise allocable to restricted common shares under the Company’s Deferred Compensation Plan are deemed to purchase additional phantom shares of the Company’s common stock that are credited to each participant’s deferral account. The award agreements include restrictions whereby the restricted shares cannot be sold, assigned, transferred, pledged, hypothecated or otherwise disposed of prior to the lapse of restrictions under the respective award agreement. The restrictions lapse on the unvested restricted shares awarded when vested, subject to the grantee’s continuing to provide services to the Company as of the vesting date. Unvested restricted shares and rights to dividends thereon are forfeited upon termination of the grantee.

The following is a summary of restricted common stock vesting dates as of March 31, 2018 and December 31, 2017, including shares whose issuance has been deferred under the Director Deferred Fee Plan:

	March 31, 2018	December 31, 2017
Vesting Date	Shares	Vesting
March 2018	—	66,667
June 2018	17,008	16,488
	17,008	83,155

Table of Contents

The following table presents information with respect to the Company's restricted stock for the three months ended March 31, 2018, including shares whose issuance has been deferred under the Director Deferred Fee Plan:

	Shares of Restricted Stock	Weighted Average Grant Date Fair Value <sup>(1)</sup>
Outstanding at beginning of period	725,449	\$ 17.00
Granted <sup>(2)</sup>	520	9.84
Cancelled/forfeited	—	—
Outstanding at end of period	725,969	\$ 17.00
Unvested at end of period	17,008	\$ 10.28

(1) The grant date fair value of restricted stock awards is based on the closing market price of the Company's common stock at the grant date.

(2) Included 520 shares of restricted stock attributed to dividends on restricted stock under the Director Deferred Fee Plan.

## Note 12 — Stockholders' Equity

## Warrants

On May 9, 2012, the Company entered into agreements with certain institutional investors to sell 2,231,787 warrant units. Each warrant unit consists of one share of the Company's common stock and a warrant to purchase 0.5 of a share of the Company's common stock, subject to adjustment. As of March 31, 2018, the adjusted exercise price of the warrants was \$16.70 and there were a total of 1,232,916 warrant shares purchasable. The warrants expire on May 15, 2019.

## At-The-Market Program

In April 2017, the Company entered into an equity distribution agreement with JMP Securities LLC under which the Company may offer and sell up to \$100.0 million of common stock in an At-The-Market equity offering. The Company has not sold any shares under this agreement.

## Stock Repurchase Program

On December 21, 2017, the Board of Directors of the Company reauthorized its repurchase program of up to 2,100,000 shares of its common stock through December 31, 2019. The previous reauthorization announced on February 25, 2016 of the Company's repurchase program of up to 2,050,000 shares of its common stock expired on December 31, 2017. Purchases made pursuant to the program will be made in the open market, in privately negotiated transactions, or pursuant to any trading plan that may be adopted in accordance with Rules 10b5-1 and 10b-18 of the Securities and Exchange Commission. The authorization does not obligate the Company to acquire any particular amount of common shares and the program may be suspended or discontinued at the Company's discretion without prior notice. The timing, manner, price and amount of any repurchases will be determined by the Company in its discretion and will be subject to economic and market conditions, stock price, applicable legal requirements and other factors. The Company has repurchased 240,122 shares of common stock pursuant to the authorization as of March 31, 2018. The repurchased stock was not retired and will be accounted for as treasury stock.

Table of Contents

## Dividends

The following table presents cash dividends declared and paid by the Company on its common stock:

Declaration Date	Record Date	Payment Date	Amount per Share	Tax Characterization
2018				
March 22, 2018	April 2, 2018	April 26, 2018	\$ 0.31	Not yet determined
2017				
December 21, 2017	January 2, 2018	January 26, 2018	\$ 0.31	Return of capital
September 21, 2017	October 2, 2017	October 26, 2017	\$ 0.31	Return of capital
June 20, 2017	June 30, 2017	July 26, 2017	\$ 0.31	Return of capital
March 23, 2017	April 3, 2017	April 26, 2017	\$ 0.31	Ordinary income

## Note 13 — Net Income per Common Share

The table below presents basic and diluted net income per share of common stock using the two-class method for the three months ended March 31, 2018 and March 31, 2017 (dollars, other than shares and per share amounts, in thousands):

	For the three months ended March 31, 2018	For the three months ended March 31, 2017
Numerator:		
Net income attributable to common stockholders and participating securities for basic and diluted earnings per share	\$ 21,729	\$ 20,242
Less:		
Dividends and undistributed earnings allocated to participating securities	63	100
Net income allocable to common stockholders — basic and diluted	\$ 21,666	\$ 20,142
Denominator:		
Weighted average common shares outstanding for basic earnings per share	41,723,937	41,765,726
Weighted average common shares outstanding for diluted earnings per share	41,723,937	41,765,726
Basic earnings per common share	\$ 0.52	\$ 0.48
Diluted earnings per common share	\$ 0.52	\$ 0.48

For the three months ended March 31, 2018 and March 31, 2017, the Company excluded the effects of the warrants and the convertible senior unsecured notes from the computation of diluted earnings per share since the average market value per share of the Company's common stock was below the exercise price of the warrants and the convertible senior unsecured notes.

## Note 14 — Income Taxes

As a REIT, the Company is not subject to federal income tax to the extent that it makes qualifying distributions to its stockholders and satisfies on a continuing basis, through actual investment and operating results, the REIT requirements including certain asset, income and stock ownership tests.

Edgar Filing: Western Asset Mortgage Capital Corp - Form 10-Q

Based on the Company's analysis of any potential uncertain income tax positions, the Company concluded that it does not have any uncertain tax positions that meet the recognition or measurement criteria as of March 31, 2018. The Company files U.S. federal and state income tax returns. As of March 31, 2018, U.S. federal tax returns filed by the Company for 2016, 2015 and 2014 and state tax returns filed for 2016, 2015, 2014 and 2013 are open for examination pursuant to relevant statutes of limitation. In the event that the Company incurs income tax related interest and penalties, the Company's policy is to classify them as a component of its provision for income taxes.

## Table of Contents

### Income Tax Provision

Subject to the limitation under the REIT asset test rules, the Company is permitted to own up to 100% of the stock of one or more TRS. Currently, the Company owns one TRS that is taxable as a corporation and is subject to federal, state and local income tax on its net income at the applicable corporate rates. The TRS, which was formed in Delaware on July 28, 2014, is a limited liability company and a wholly-owned subsidiary of the Company. During the three months ended March 31, 2018 and March 31, 2017, the Company recorded a federal and state tax provision of approximately \$313 thousand and \$312 thousand, respectively, which is recorded in "Income tax provision" in the Consolidated Statements of Operations.

### Deferred Tax Asset

As of March 31, 2018, the Company recorded a deferred tax asset of approximately \$4.6 million relating to capital loss carryforward and temporary differences as a result of the timing of income recognition of certain investments held in the TRS. The capital loss carryforwards and temporary differences may only be recognized to the extent of capital gains. There is uncertainty as to the TRS ability to recognize capital gains in the future. As a result, the Company has concluded it is more likely than not the deferred tax asset will not be realized and has recorded a valuation allowance of \$4.6 million.

In addition, the REIT generated net operating losses ("NOL's") during the year ended December 31, 2017, related to its interest rate swap terminations, and for its California return a portion of the NOL's is apportioned to the TRS. The TRS can carryback these NOL's to each of the two preceding years and receive a refund for taxes paid. The Company recorded a deferred state tax asset relating to the NOL's of \$8.7 million in the REIT and \$755 thousand in the TRS as of March 31, 2018. As a result, the Company has concluded it is more likely than not the deferred tax asset relating to the NOL's will not be realized with the exception of the TRS carryback to 2015 and has recorded a combined valuation allowance of \$9.1 million. The Company also recorded a deferred federal tax liability of \$85 thousand in anticipation of the receipt of the state tax refund as a result of the carryback of the California NOL.

### Effective Tax Rate

The Company's effective tax rate differs from its combined federal and state income tax rate primarily due to the deduction of dividends distributions to be paid under Code Section 857(a).

### Tax Cuts and Jobs Act

On December 22, 2017, the President of the United States signed and enacted comprehensive tax legislation into law H.R. 1, commonly referred to as the Tax Cuts and Jobs Act (the "Tax Act"). The Tax Act significantly revises the U.S. corporate income tax by, among other things, lowering the corporate income tax rate from 35% to 21%. Shortly after the enactment of the Tax Act, the SEC issued guidance under Staff Accounting Bulletin No. 118, Income Tax Accounting Implications of the Tax Cuts and Jobs Act ("SAB 118"), which allows a Company to record provisional amounts during a measurement period not to extend beyond one year of the enactment date. The ultimate impact of the Tax Act may differ from these provisional amounts due to, among other things, additional analysis, changes in interpretations and assumptions the Company has made, additional regulatory guidance that may be issued, and actions the Company may take as a result of the Act. We expect to complete our analysis within the measurement period in accordance with SAB 118.

### Note 15 — Contingencies

From time to time, the Company may become involved in various claims and legal actions arising in the ordinary course of business. Management is not aware of any material contingencies at March 31, 2018.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

FORWARD-LOOKING INFORMATION

The Company makes forward-looking statements herein and will make forward-looking statements in future filings with the Securities and Exchange Commission (the "SEC"), press releases or other written or oral communications within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). For these statements, the Company claims the protections of the safe harbor for forward-looking statements contained in such sections. Forward-looking statements are subject to substantial risks and uncertainties, many of which are difficult to predict and are generally beyond the Company's control. These forward-looking statements include information about possible or assumed future results of the Company's business, financial condition, liquidity, results of operations, plans and objectives. When the Company uses the words "believe," "expect," "anticipate," "estimate," "plan," "continue," "intend," "should," "may" or similar expressions, the Company intends to identify forward-looking statements. Statements regarding the following subjects, among others, may be forward-looking: market trends in the Company's industry, interest rates, real estate values, the debt securities markets, the U.S. housing and the U.S. and foreign commercial real estate markets or the general economy or the market for residential and/or commercial mortgage loans; the Company's business and investment strategy; the Company's projected operating results; actions and initiatives of the U.S. Government and changes to U.S. Government policies and the execution and impact of these actions, initiatives and policies; the state of the U.S. and to a lesser extent, international economy generally or in specific geographic regions; economic trends and economic recoveries; the Company's ability to obtain and maintain financing arrangements, including under the Company's repurchase agreements, a form of secured financing, and securitizations; the current potential return dynamics available in residential mortgage-backed securities ("RMBS"), and commercial mortgage-backed securities ("CMBS" and collectively with RMBS, "MBS"); the level of government involvement in the U.S. mortgage market; the anticipated default rates on Non-Agency MBS (as defined herein), Residential and Commercial Whole-Loans and Residential Bridge Loans; the loss severity on Non-Agency MBS; the return of the Non-Agency RMBS, Non-Agency CMBS and asset-backed securities ("ABS") securitization markets; the general volatility of the securities markets in which the Company participates; changes in the value of the Company's assets; the Company's expected portfolio of assets; the Company's expected investment and underwriting process; interest rate mismatches between the Company's target assets and any borrowings used to fund such assets; changes in interest rates and the market value of the Company's target assets; changes in prepayment rates on the Company's target assets; effects of hedging instruments on the Company's target assets; rates of default or decreased recovery rates on the Company's target assets; the degree to which the Company's hedging strategies may or may not protect the Company from interest rate volatility; the impact of and changes in governmental regulations, tax law and rates, accounting guidance and similar matters; the Company's ability to maintain the Company's qualification as a real estate investment trust for U.S. federal income tax purposes; the Company's ability to maintain its exemption from registration under the Investment Company Act of 1940, as amended (the "1940 Act"); the availability of opportunities to acquire Agency RMBS, Non-Agency RMBS, CMBS, Residential and Commercial Whole-Loans, Residential and Commercial Bridge Loans and other mortgage assets; the availability of qualified personnel; estimates relating to the Company's ability to make distributions to its stockholders in the future; and the Company's understanding of its competition.

The forward-looking statements are based on the Company's beliefs, assumptions and expectations of its future performance, taking into account all information currently available to it. Forward-looking statements are not predictions of future events. These beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to the Company. Some of these factors, are described in "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" herein and in the Company's annual report on Form 10-K for the year ended December 31, 2017, filed with the SEC on March 29, 2018. These and other risks, uncertainties and factors, including those described in the annual, quarterly and current reports that the Company files with the SEC, could cause its actual results to differ materially from those included in any

forward-looking statements the Company makes. All forward-looking statements speak only as of the date they are made. New risks and uncertainties arise over time and it is not possible to predict those events or how they may affect the Company. Except as required by law, the Company is not obligated to, and does not intend to, update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

## Table of Contents

### Overview

Western Asset Mortgage Capital Corporation, a Delaware corporation, and Subsidiaries (the "Company" unless otherwise indicated or except where the context otherwise requires "we", "us" or "our") commenced operations in May 2012, focused on investing in, financing and managing a diversified portfolio of real estate related securities, whole-loans and other financial assets, which we collectively refer to as our target assets. We are externally managed by Western Asset Management (our "Manager") pursuant to the terms of a management agreement. We conduct our operations to qualify and be taxed as a real estate investment trust, or REIT, for U.S. federal income tax purposes. Accordingly, we generally will not be subject to U.S. federal income taxes on our taxable income that we distribute currently to our stockholders as long as we maintain our intended qualification as a REIT. However, certain activities that we may perform may cause us to earn income which will not be qualifying income for REIT purposes. We have designated our subsidiary as taxable REIT subsidiary, or TRS, to engage in such activities. We also intend to operate our business in a manner that permits us to maintain our exemption from registration under the 1940 Act, as amended, or the Investment Company Act. Our common stock is traded on the New York Stock Exchange, or the NYSE, under the symbol "WMC".

Our objective is to provide attractive risk adjusted returns to our shareholders primarily through an attractive dividend, supported with sustainable core earnings, as well as the potential for higher returns through capital appreciation. Our investment strategy is based on our Manager's perspective of which mix of our target assets it believes provides us with the best risk-reward opportunities at any given time. We also deploy leverage as part of our investment strategy to increase potential returns. We primarily finance our investments through short-term repurchase agreements.

### Factors Impacting Our Operating Results

Our operating results can be affected by a number of factors and primarily depend on, among other things, the size of our investment portfolio, our net interest income, changes in the market value of our investments, derivative instruments and to a lesser extent realized gains and losses on the sale of our investments and termination of our derivative instruments. Our overall performance is also impacted by the supply and demand for our target assets in the market, the terms and availability of financing for such assets, general economic conditions, the impact of U.S. Government actions that affect the real estate and mortgage sectors, and the unanticipated credit events experienced by borrowers whose loans are included in our MBS, as well as our Residential Whole and Bridge Loan borrowers.

Our net interest income, which includes the amortization of purchase premiums and accretion of discounts, will vary primarily as a result of changes in interest rates, defaults and loss severity rates, borrowing costs, and prepayment speeds on our MBS and other Target Assets (as defined herein) investments. Similarly, the overall value of our investment portfolio will be impacted by these factors as well as changes in the value of residential and commercial real estate and continuing regulatory changes.

See the caption "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2017, which is available on the SEC's website at [www.sec.gov](http://www.sec.gov) for additional factors that may impact our operating results.

### Recent Market Conditions

Our business is affected by general U.S. residential and commercial real estate fundamentals and the overall U.S. and international economic environment. In particular, our strategy is influenced by the specific characteristics of these markets, including but not limited to prepayment rates and interest rate levels. We expect the results of our operations to be affected by various factors, many of which are beyond our control.

Our Manager expects growth and inflation to improve from subdued levels, U.S. growth and inflation to be aided by fiscal stimulus, based in part on central banks signaling their path to normalization, and spread sectors to outperform in 2018 though margins are thin and emerging markets are expected to perform strongly. First quarter of 2018 experienced volatility, with steadily increasing short-term interest rates. We saw wider credit spreads and spreads on Agency MBS widened. We were prepared for the move in interest rates by actively limiting our duration gap. Our restructured hedge portfolio helped to minimize the impact of the movement in interest rates on our book value and economic return and will continue to limit our exposure to further rate increases. We believe the Agency RMBS sector is at risk for spread widening in the longer term.

## Table of Contents

Against this backdrop, the fundamentals in the U.S. housing market remain strong and spreads for most mortgages remained supported during the first quarter of 2018. Credit sensitive mortgage sectors have performed relatively well and are expected to continued to offer attractive returns.

The Federal Reserve expects inflation to meet the 2% target in 2018 and expects to gradually raise the federal funds rate to the normal level of 2%. At the March 2018 meeting, the FOMC raised the rate another quarter point from 1.5% to 1.75%, with two more rate hikes anticipated in 2018. The FOMC, as part of its balance sheet reduction plan, will allow \$12 billion of Treasury securities to mature without replacing them. It will do the same with \$8 billion of mortgage-backed securities. The Federal Reserve is gradually winding down the \$4 trillion in holdings it acquired during quantitative easing.

## Our Investment Strategy

Our Manager's investment philosophy, which developed from a singular focus in fixed-income asset management over a variety of credit cycles and conditions, is to provide clients with a diversified, long-term value-oriented portfolio. We benefit from the breadth and depth of our Manager's overall investment philosophy, which focuses on a macroeconomic analysis as well as an in-depth analysis of individual assets and their relative value. In making investment decisions on our behalf, our Manager seeks to identify assets across the broad mortgage universe with attractive risk adjusted returns, which incorporates its view on the outlook for the mortgage markets, including relative valuation, supply and demand trends, the level of interest rates, the shape of the yield curve, prepayment rates, financing and liquidity, commercial and residential real estate prices, delinquencies, default rates, recovery of various segments of the economy and vintage of collateral, subject to maintaining our REIT qualification and our exemption from registration under the 1940 Act.

Our target assets are comprised of Agency CMBS, Agency RMBS (including TBAs), Non-Agency CMBS, Non-Agency RMBS, Residential and Commercial Whole-Loans, Residential Bridge Loans, Commercial Mezzanine Loans, CMO's, GSE Risk Sharing Securities, Non U.S. CMBS and ABS, each of which is described below.

## Our Target Assets

**Agency CMBS.** — Fixed and floating rate CMBS, for which the principal and interest payments are guaranteed by a U.S. Government agency or U.S. Government-sponsored entity, but for which the underlying mortgage loans are secured by real property other than single family residences. These may include, but are not limited to Fannie Mae DUS (Delegated Underwriting and Servicing) MBS, Freddie Mac Multifamily Mortgage Participation Certificates, Ginnie Mae project loan pools, and/or CMOs structured from such collateral.

**Agency RMBS.** — Agency RMBS, which are RMBS for which the principal and interest payments are guaranteed by a U.S. Government agency, such as the Government National Mortgage Association ("GNMA" or "Ginnie Mae"), or a U.S. Government-sponsored entity ("GSE"), such as the Federal National Mortgage Association ("FNMA" or "Fannie Mae") or the Federal Home Loan Mortgage Corporation ("FHLMC" or "Freddie Mac"). The Agency RMBS we acquire can be secured by fixed-rate mortgages, adjustable-rate mortgages or hybrid adjustable-rate mortgages. Fixed-rate mortgages have interest rates that are fixed for the term of the loan and do not adjust. The interest rates on adjustable-rate mortgages generally adjust annually (although some may adjust more frequently) to an increment over a specified interest rate index. Hybrid adjustable-rate mortgages have interest rates that are fixed for a specified period of time (typically three, five, seven or ten years) and, thereafter, adjust to an increment over a specified interest rate index. Adjustable-rate mortgages and hybrid adjustable-rate mortgages generally have periodic and lifetime constraints on the amount by which the loan interest rate can change on any predetermined interest rate reset date.

Non-Agency RMBS. — RMBS that are not guaranteed by a U.S. Government agency or U.S. Government-sponsored entity, with an emphasis on securities that when originally issued were rated in the highest rating category by one or more of the nationally recognized statistical rating organizations. The mortgage loan collateral for Non-Agency RMBS consists of residential mortgage loans that do not generally conform to underwriting guidelines issued by a U.S. Government agency or U.S. Government-sponsored entity due to certain factors, including mortgage balances in excess of Agency underwriting guidelines, borrower characteristics, loan characteristics and/or level of documentation, and therefore are not issued or guaranteed by a U.S. Government agency or U.S. Government-sponsored entity. The mortgage loan collateral may be classified as subprime, Alternative-A or prime depending on the borrower's credit rating and the underlying level of documentation. Non-Agency RMBS collateral may also include reperforming loans, which are conventional mortgage loans that were current at the time of the securitization, but had been

Table of Contents

delinquent in the past. Non-Agency RMBS may be secured by fixed-rate mortgages, adjustable-rate mortgages or hybrid adjustable-rate mortgages.

Non-Agency CMBS. — Fixed and floating rate CMBS for which the principal and interest payments are not guaranteed by a U.S. Government agency or U.S. Government-sponsored entity. We do not have an established minimum current rating requirement for such investments.

Non U.S. CMBS. — CMBS which is not guaranteed by a U.S. Government agency or U.S. Government-sponsored entity and which is secured by commercial real estate located outside of the U.S. Although our Manager believes that these investments can provide attractive risk-reward opportunities and offer additional asset diversification, investing in international real estate has a number of additional risks, including but not limited to currency risk, political risk and the legal risk of investing in jurisdictions with varying laws and regulations and potential tax implications.

GSE Risk Sharing Securities Issued by Fannie Mae and Freddie Mac. — From time to time we have and may in the future continue to invest in risk sharing securities issued by Fannie Mae and Freddie Mac. Principal and interest payments on these securities are based on the performance of a specified pool of Agency residential mortgages. The payments due on these securities, however, are not secured by the referenced mortgages. The payments due are full faith and credit obligations of Fannie Mae or Freddie Mac respectively, but neither agency guarantees full payment of the underlying mortgages. Investments in these securities generally are not qualifying assets for purposes of the 75% real estate asset test applicable to REITs and generally do not generate qualifying income for purposes of the 75% real estate income test applicable to REITs. As a result, we may be limited in our ability to invest in such assets.

TBAs. — We may utilize TBAs, in order to invest in Agency RMBS. Pursuant to these TBAs, we agree to purchase (or deliver), for future settlement, Agency RMBS with certain principal and interest terms and certain underlying collateral, but the particular Agency RMBS to be delivered is not identified until shortly before the TBA settlement date. Our ability to invest in Agency RMBS through TBAs may be limited by the 75% real estate income and asset tests applicable to REITs.

Mortgage pass-through certificates. — Mortgage pass-through certificates are securities representing interests in “pools” of mortgage loans secured by residential real property where payments of both interest and scheduled principal, plus pre-paid principal, on the underlying loan pools are made monthly to holders of the securities, in effect “passing through” monthly payments made by the individual borrowers on the mortgage loans that underlie the securities, net of fees paid to the issuer/guarantor of the securities and servicers of the underlying mortgages.

Interest-Only Strips or IOs. — This type of security entitles the holder only to payments of interest based on a notional principal balance. The yield to maturity of Interest-Only Strips is extremely sensitive to the rate of principal payments (particularly prepayments) on the underlying pool of mortgages. We invest in these types of securities primarily to take advantage of particularly attractive prepayment-related or structural opportunities in the MBS markets, as well as to help manage the duration of our overall portfolio.

Inverse Interest-Only Strips or IIOs. — This type of security has a coupon with an inverse relationship to its index and is subject to caps and floors. Inverse Interest-Only MBS entitles the holder to interest only payments based on a notional principal balance, which is typically equal to a fixed rate of interest on the notional principal balance less a floating rate of interest on the notional principal balance that adjusts according to an index subject to set minimum and maximum rates. The current yield of Inverse Interest-Only MBS will generally decrease when its related index rate increases and increase when its related index rate decreases.

Agency and Non-Agency CMBS IO and IIO Securities. — Interest-Only and Inverse Interest-Only securities for which the underlying collateral is commercial mortgages the principal and interest on which may or may not be guaranteed

by a U.S Government agency or U.S. Government-sponsored entity. Unlike single family residential mortgages in which the borrower, generally, can prepay at any time, commercial mortgages frequently limit the ability of the borrower to prepay, thereby providing a certain level of prepayment protection. Common restrictions include yield maintenance and prepayment penalties, the proceeds of which are generally at least partially allocable to these securities, as well as, defeasance.

Principal-Only Strips or POs. — This type of security generally only entitles the holder to receive cash flows that are derived from principal repayments of an underlying loan pool, but in the case of Non-Agency Principal-Only Strips will also

## Table of Contents

include cash flows from default recoveries and excess interest. The yield to maturity of Principal-Only Strips is extremely sensitive to the rate of principal payments (particularly prepayments) on the underlying pool of mortgages. We invest in these types of securities primarily to take advantage of structural opportunities in the MBS markets.

**Residential Whole-Loans.** — Residential Whole-Loans are mortgages secured by single family residences held directly by us or through structured Non-Agency RMBS programs crafted specifically for us and other clients of our Manager. To date our Residential Whole-Loans have been mostly adjustable rate loans that do not qualify for the Consumer Finance Protection Bureau's (or CFPB) safe harbor provision for "qualifying mortgages". However, our Manager's review, relating to possible purchases of loans, includes an analysis of the loan originator's procedures and documentation for compliance with Ability to Repay requirements. These loans are held in consolidated trusts with us holding the beneficial interest in the trusts. We may in the future securitize the whole-loan interests, selling more senior interests in the pool of loans and retaining residual portions. The characteristics of our Residential Whole-Loans may vary going forward.

**Residential Bridge Loans.** — Residential Bridge Loans are mortgages secured by non owner occupied single family and multi-family residences, typically short-term, held directly by us or through structured Non-Agency RMBS programs crafted specifically for us and other clients of our Manager. These loans are held in a consolidated trust with us holding the beneficial interest in the trust.

**Commercial Whole-Loans.** - Commercial Whole Loans are generally small balance loans ranging from, \$2.5 million to \$25.0 million, secured by commercial real estate typically short-term, held by us or through a trust with us owning the beneficial interest in the trust.

**Commercial Mezzanine Loans.** — Commercial mezzanine loans are generally structured to represent a senior position in the borrower's equity in, and subordinate to a first mortgage loan, on a property. These loans are generally secured by pledges of ownership interests, in whole or in part, in entities that directly or indirectly own the real property. At times, mezzanine loans may be secured by additional collateral, including letters of credit, personal guarantees, or collateral unrelated to the property. Mezzanine loans may be structured to carry either fixed or floating interest rates as well as carry a right to participate in a percentage of gross revenues and a percentage of the increase in the fair market value of the property securing the loan. Mezzanine loans may also contain prepayment lockouts, penalties, minimum profit hurdles and other mechanisms to protect and enhance returns to the lender. Mezzanine loans usually have maturities that match the maturity of the related mortgage loan but may have shorter or longer terms.

**Collateralized Mortgage Obligations or CMOs.** — These are securities, which can be Agency or Non-Agency, that are structured from residential and/or commercial pass-through certificates, which receive monthly payments of principal and interest. CMOs divide the cash flows which come from the underlying mortgage pass-through certificates into different classes of securities that may have different maturities and different weighted average lives than the underlying pass-through certificates.

**ABS.** — Debt and/or equity tranches of securitizations backed by various asset classes including, but not limited to, aircrafts, automobiles, credit cards, equipment, franchises, recreational vehicles and student loans. Investments in ABS generally are not qualifying assets for purposes of the 75% real estate asset test applicable to REITs and generally do not generate qualifying income for purposes of the 75% real estate income test applicable to REITs. As a result, we may be limited in our ability to invest in such assets.

**Other investments.** — In addition to MBS, our principal investment, and ABS from time to time, we may also make other investments in securities, which our Manager believes will assist us in meeting our investment objective and are consistent with our overall investment policies. These investments will normally be limited by the REIT requirements that 75% our assets be real estate assets and that 75% of our income be generated from real estate, thereby limiting our

ability to invest in such assets.

#### Our Investment Portfolio

Our investment portfolio composition at March 31, 2018.

55

---

Table of Contents

The Company acquired a \$67.8 million Non-Agency CMBS security which resulted in the consolidation of a VIE and the recording of a \$1.4 billion securitized commercial loan and \$1.3 billion non-recourse securitized debt. Refer to Note 6 - "Commercial Real Estate Investments" for details. The following table reflect the portfolio including the \$67.8 million Non-Agency investment and excludes the \$1.4 billion securitized commercial loan.

Our Financing Strategy

We deploy leverage to increase potential returns to our stockholders and to fund the acquisition of our target assets. While we are not required to maintain any particular leverage ratio, excluding securitized debt, we expect to maintain a debt-to-equity ratio of three to ten times the amount of our stockholders' equity. To the extent the Agency MBS percentage of our portfolio decreases, our overall leverage is likely to decrease. The amount of leverage we use for our portfolio depends upon a variety of factors, such as, general economic, political and financial market conditions, the anticipated liquidity and price volatility of our assets, the availability and cost of financing the assets, the credit worthiness of financing counterparties and the health of the U.S.

## Table of Contents

residential mortgage and housing markets. At March 31, 2018, our aggregate debt-to-equity ratio was approximately 7.7 to 1 when we exclude our securitized debt and 10.5 to 1 when we include our securitized debt. The debt-to-equity ratio is not a comprehensive statement of overall investment portfolio leverage which is affected by any leverage embedded in TBAs and derivative instruments.

### Repurchase Agreements

We primarily finance our investments through repurchase agreements for which we pledge our assets. Our repurchase agreements have maturities generally ranging from one to three months, but in some cases longer. Repurchase agreements involve the transfer of the pledged collateral to a counterparty at an agreed upon price in exchange for such counterparty's simultaneous agreement to return the same security back to the borrower at a future date (i.e., the maturity of the borrowing). Under our repurchase agreements, we retain beneficial ownership of the pledged collateral, while the counterparty maintains custody of such collateral. At the maturity of a repurchase financing, unless the repurchase financing is renewed with the same counterparty, we are required to repay the loan, including any accrued interest, and concurrently reacquire custody of the pledged collateral or, with the consent of the counterparty, we may renew the repurchase financing at the then prevailing market interest rate and terms. The amount borrowed under our repurchase agreements is a specified percentage of the asset's applicable fair value, which is dependent on the collateral type. Our repurchase agreement counterparties generally require collateral in excess of the loan amount, or haircuts. As of March 31, 2018, our haircuts range from a low of 3.0% to a high of 5.0% for Agency RMBS, exclusive of IOs and IIOs for which the haircuts are as high as 25.0% and Agency CMBS haircuts are 5.0%, exclusive of IOs and IIOs for which haircuts are as high as 15.0%. For Non-Agency RMBS haircuts range from a low of 10.0% to a high of 50.0% and for Non-Agency CMBS, haircuts range from a low of 12.5% to a high of 35.0%. Haircuts for Whole-Loans range from a low of 20.0% to a high of 45.0% and other securities range from a low of 22.5% to a high of 50.0%.

A significant decrease in asset value, advance rate, or an increase in the haircut could result in us having to sell assets in order to meet additional margin calls by our repurchase agreement counterparties. Our inability to post adequate collateral for a margin call by the counterparty could result in a condition of default under our repurchase agreements. We expect to mitigate our risk to margin calls by deploying leverage at the portfolio level at amounts below our available financing under our repurchase agreements.

In order to reduce our exposure of risk associated with concentration to any one repurchase agreement counterparty, we seek to diversify our exposure by entering into repurchase agreements with multiple counterparties. At March 31, 2018, we had repurchase agreements with 28 counterparties and outstanding borrowings with 17 of such counterparties. Our total outstanding borrowings under our repurchase agreements was \$3.6 billion, with a maximum net exposure to any single repurchase agreement counterparty of \$72.9 million or 15.4% of equity.

### Convertible Senior Unsecured Notes

In October 2017, we issued \$115.0 million aggregate principal amount of 6.75% convertible senior unsecured notes, which included the underwriter's option to purchase \$15.0 million aggregate principal amount of the notes, for net proceeds to us of \$111.1 million. The notes mature on October 1, 2022, unless earlier converted, redeemed or repurchased by the holders pursuant to their terms, and are not redeemable by the Company except during the final three months prior to maturity. We view this financing as an attractive source of longer-term capital, which we believe was more cost efficient than issuing straight equity. We have and will continue to deploy the proceeds from the offering of the notes to acquire our target assets.

### Our Hedging Strategy

Our overall portfolio strategy is designed to generate attractive returns to our investors through various economic cycles. We believe our broad approach to investing in the real estate market, which considers all categories of real estate assets, allows us to invest in a diversified portfolio and help mitigate our portfolio from risks that arise from investing in a single or limited collateral type. In connection with our risk management activities, we enter into a variety of derivative and non-derivative instruments. Our primary objective for acquiring these derivatives and non-derivative instruments is to mitigate our exposure to future events that are outside our control. Our derivative instruments are designed to mitigate the effects market risk and cash flow volatility associated with interest rate risk, including associated prepayment risk. As part of our hedging strategy, we may enter into, but not limited to, interest rate swaps, including forward starting swaps, interest rate swaptions, U.S. Treasury options, future contracts, TBAs, total return swaps, credit default swaps and foreign current swaps and forwards.

## Table of Contents

### Critical Accounting Policies

The consolidated financial statements include our accounts, those of our wholly-owned TRS and certain variable interest entities (“VIEs”) in which we are the primary beneficiary. All intercompany amounts have been eliminated in consolidation. In accordance with GAAP, our consolidated financial statements require the use of estimates and assumptions that involve the exercise of judgment and use of assumptions as to future uncertainties. In accordance with SEC guidance, the following discussion addresses the accounting policies that we currently apply. Our most critical accounting policies will involve decisions and assessments that could affect our reported assets and liabilities, as well as our reported revenues and expenses. We believe that all of the decisions and assessments upon which our consolidated financial statements have been based were reasonable at the time made and based upon information available to us at that time. For a review of recent accounting pronouncements that may impact our results of operations, see Note 2 of our “Notes to Consolidated Financial Statements (Unaudited)”.

### Valuation of Financial Instruments

We disclose the fair value of our financial instruments according to a fair value hierarchy (Levels I, II, and III, as defined below). ASC 820 “Fair Value Measurements and Disclosures” establishes a framework for measuring fair value and expands financial statement disclosure requirements for fair value measurements. ASC 820 further specifies a hierarchy of valuation techniques, which is based on whether the inputs into the valuation technique are observable or unobservable. The hierarchy is as follows:

Level I — Quoted prices in active markets for identical assets or liabilities.

Level II — Quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable or whose significant value drivers are observable.

Level III — Prices are determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable, for example, when there is little or no market activity for an investment at the end of the period, unobservable inputs may be used.

The level in the fair value hierarchy within which a fair value measurement in its entirety falls is based on the lowest level input that is significant to the fair value measurement in its entirety. Transfers between levels are determined by us at the end of the reporting period.

In instances when we are required to consolidate a VIE that is determined to be a qualifying CFE, under GAAP, we will measure both the financial assets and financial liabilities of the VIE using the fair value of either the VIE’s financial assets or financial liabilities, whichever is more observable.

### Mortgage-Backed Securities and Other Securities

Our mortgage-backed securities and other securities portfolio primarily consists of Agency RMBS, Non-Agency RMBS, Agency CMBS, Non-Agency CMBS, ABS and other real estate related assets, these investments are recorded in accordance with ASC 320, “Investments - Debt and Equity Securities”, ASC 325-40, “Beneficial Interests in Securitized Financial Assets” or ASC 310-30, “Loans and Debt Securities Acquired with Deteriorated Credit Quality”. We have chosen to make a fair value election pursuant to ASC 825, “Financial Instruments” for our mortgage-backed securities and other securities portfolio. Electing the fair value option allows us to record changes in fair value in the Consolidated Statements of Operations as a component of “Unrealized gain (loss), net”.

If we purchase securities with evidence of credit deterioration, we will analyze to determine if the guidance found in ASC 310-30, “Loans and Debt Securities Acquired with Deteriorated Credit Quality” is applicable.

We evaluate securities for other-than-temporary impairment (“OTTI”) on at least a quarterly basis. The determination of whether a security is other-than-temporarily impaired involves judgments, estimates and assumptions based on subjective and objective factors. As a result, the timing and amount of an OTTI constitutes an accounting estimate that may change materially over time.

## Table of Contents

When the fair value of an investment security is less than its amortized cost at the balance sheet date, the security is considered impaired, and the impairment is designated as either “temporary” or “other-than-temporary.” When a security is impaired, an OTTI is considered to have occurred if (i) if we intend to sell the security (i.e., a decision has been made as of the reporting date) or (ii) it is more likely than not that we will be required to sell the security before recovery of its amortized cost basis. If we intend to sell the security or if it is more likely than not that we will be required to sell the security before recovery of its amortized cost basis, the entire amount of the impairment loss, if any, is recognized in earnings as OTTI and the cost basis of the security is adjusted to its fair value. Additionally, for securities accounted for under ASC 325-40 an OTTI is deemed to have occurred when there is an adverse change in the expected cash flows to be received and the fair value of the security is less than its carrying amount. In determining whether an adverse change in cash flows occurred, the present value of the remaining cash flows, as estimated at the initial transaction date (or the last date previously revised), is compared to the present value of the expected cash flows at the current reporting date. The estimated cash flows reflect those a “market participant” would use and are discounted at a rate equal to the current yield used to accrete interest income. Any resulting OTTI adjustments are reflected in “Other than temporary impairment” in our Consolidated Statements of Operations.

Increases in interest income may be recognized on a security on which we have previously recorded an OTTI charge if the cash flow of such security subsequently improves.

In addition, unrealized losses on our Agency securities, with explicit guarantee of principal and interest by the governmental sponsored entity (“GSE”), are not credit losses but rather were due to changes in interest rates and prepayment expectations. These securities would not be considered other than temporarily impaired provided we did not intend to sell the security.

### Residential Whole-Loans

Investments in Residential Whole-Loans are recorded in accordance with ASC 310-20, “Nonrefundable Fees and Other Costs”. We have chosen to make the fair value election pursuant to ASC 825 for our entire Residential Whole-Loan portfolio. Residential Whole-Loans are recorded at fair value with periodic changes in fair market value being recorded in earnings as a component of “Unrealized gain (loss), net”. All other costs incurred in connection with acquiring Residential Whole-Loans or committing to purchase these loans are charged to expense as incurred.

On a quarterly basis, we evaluate the collectability of both interest and principal of each loan, if circumstances warrant, to determine whether such loan is impaired. A loan is impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due according to the existing contractual terms. When a loan is impaired, we do not record an allowance for loan loss as we have elected the fair value option. However, income recognition is suspended for loans at the earlier of the date at which payments become 90-days past due or when, in the opinion of management, a full recovery of income and principal becomes doubtful. When the ultimate collectability of the principal of an impaired loan is in doubt, all payments are applied to principal under the cost recovery method. When the ultimate collectability of the principal of an impaired loan is not in doubt, contractual interest is recorded as interest income when received, under the cash basis method until an accrual is resumed when the loan becomes contractually current and performance is demonstrated to be resumed. A loan is written off when it is no longer realizable and/or legally discharged.

### Residential Bridge Loans

For the Bridge Loans acquired prior to October 25, 2017, we did not elect the fair value option pursuant to ASC 825 and accordingly these loans are recorded at their principal amount outstanding, net of any premium or discount in the Consolidated Balance Sheets. Commencing with purchases subsequent to October 25, 2017, we elected the fair value

option pursuant to ASC 825 to be consistent with the accounting of our other investments, which are all carried at fair value. These loans are recorded at fair value with periodic changes in fair market value being recorded in earnings as a component of "Unrealized gain (loss), net". All other costs incurred in connection with acquiring the Residential Bridge Loans or committing to purchase these loans are charged to expense as incurred.

A loan is impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due according to the existing contractual terms. We evaluate each of the Residential Bridge Loans that we did not elect the fair value option on a quarterly basis. These loans are individually specific as they relate to the borrower, collateral type, interest rate, LTV and term as well as geographic location. We evaluate the collectability of both principal and interest of each loan. When

## Table of Contents

a loan is impaired, the impairment is then measured based on fair value of the collateral, since these loans are collateral dependent. Upon measurement of impairment, we record an allowance to reduce the carrying value of the loan with a corresponding charge to net income. Significant judgments are required in determining impairment, including assumptions regarding the value of the loan, the value of the underlying collateral and other provisions such as guarantees. We will not record an allowance for loan loss for the Residential Bridge Loans that Company has elected the fair value option.

Income recognition is suspended for loans at the earlier of the date at which payments become 90-days past due or when, in the opinion of management, a full recovery of income and principal becomes doubtful. When the ultimate collectability of the principal of an impaired loan is in doubt, all payments are applied to principal under the cost recovery method. When the ultimate collectability of the principal of an impaired loan is not in doubt, contractual interest is recorded as interest income when received, under the cash basis method until an accrual is resumed when the loan becomes contractually current and performance is demonstrated to be resumed. A loan is written off when it is no longer realizable and/or it is legally discharged.

### Securitized Commercial Loans

Securitized commercial loans are comprised of commercial loans of consolidated variable interest entities which were sponsored by third parties. These loans are recorded in accordance with ASC 310-20, "Nonrefundable Fees and Other Costs". We have chosen to make the fair value election pursuant to ASC 825. Accordingly, these loans are recorded at fair value with periodic changes in fair value being recorded in earnings as a component of "Unrealized gain (loss), net".

The securitized commercial loans are typically collateralized by commercial real estate. As a result, we regularly evaluate the extent and impact of any credit migration associated with the performance and or value of the underlying collateral property as well as the financial and operating capability of the borrower on a loan by loan basis. On a quarterly basis, we evaluate the collectability of both interest and principal of each loan, if circumstances warrant, to determine whether such loan is impaired. A loan is impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due according to the existing contractual terms. When a loan is impaired, we do not record an allowance for loan loss as we have elected the fair value option. However, income recognition is suspended for loans at the earlier of the date at which payments become 90-days past due or when, in the opinion of management, a full recovery of income and principal becomes doubtful. When the ultimate collectability of the principal of an impaired loan is in doubt, all payments are applied to principal under the cost recovery method. When the ultimate collectability of the principal of an impaired loan is not in doubt, contractual interest is recorded as interest income when received, under the cash basis method until an accrual is resumed. Interest income accrual is resumed when the loan becomes contractually current and performance is demonstrated. A loan is written off when it is no longer realizable and/or legally discharged.

### Commercial Loans

Investments in Commercial Loans, which are comprised of commercial mortgage loans and commercial mezzanine loans, are recorded in accordance with ASC 310-20, "Nonrefundable Fees and Other Costs". We have chosen to make the fair value election pursuant to ASC 825 for our Commercial Loan portfolio. Accordingly, these loans are recorded at fair value with periodic changes in fair value being recorded in earnings as a component of "Unrealized gain (loss), net". All other costs incurred in connection with acquiring the Commercial Loans or committing to purchase these loans are charged to expense as incurred.

Our loans are typically collateralized by commercial real estate. As a result, we regularly evaluate the extent and impact of any credit migration associated with the performance and or value of the underlying collateral property as well as the financial and operating capability of the borrower on a loan by loan basis. On a quarterly basis, we evaluate the collectability of both interest and principal of each loan, if circumstances warrant, to determine whether such loan is impaired. A loan is impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due according to the existing contractual terms. When a loan is impaired, we do not record an allowance for loan loss as we have elected the fair value option. However, income recognition is suspended for loans at the earlier of the date at which payments become 90-days past due or when, in the opinion of management, a full recovery of income and principal becomes doubtful. When the ultimate collectability of the principal of an impaired loan is in doubt, all payments are applied to principal under the cost recovery method. When the ultimate collectability of the principal of an impaired loan is not in doubt, contractual interest is recorded as interest income when received, under the cash basis method until an accrual is resumed. Interest income accrual is resumed when the loan becomes contractually current and performance is demonstrated to be resumed. A loan is written off when it is no longer realizable and/or legally discharged.

## Table of Contents

### Interest Income Recognition

Agency MBS, Non-Agency MBS and other securities, excluding Interest-Only Strips, rated AA and higher at the time of purchase

Interest income on mortgage-backed and other securities is accrued based on the respective outstanding principal balances and corresponding contractual terms. We record interest income in accordance with ASC subtopic 835-30 "Imputation of Interest", using the effective interest method. As such premiums and discounts associated with Agency MBS, Non-Agency MBS and other securities, excluding Interest-Only Strips, rated AA and higher at the time of purchase, are amortized into interest income over the estimated life of such securities. Adjustments to premium and discount amortization are made for actual prepayment activity. We estimate prepayments at least quarterly for our securities and, as a result, if the projected prepayment speed increases, we will accelerate the rate of amortization on premiums or discounts and make a retrospective adjustment to historical amortization. Alternatively, if projected prepayment speeds decrease, we will reduce the rate of amortization on the premiums or discounts and make a retrospective adjustment to historical amortization.

Non-Agency MBS and other securities that are rated below AA at the time of purchase and Interest-Only Strips that are not classified as derivatives

Interest income on Non-Agency MBS and other securities that are rated below AA at the time of purchase and Interest-Only Strips that are not classified as derivatives are also recognized in accordance with ASC 835, using the effective yield method. The effective yield on these securities is based on the projected cash flows from each security, which is estimated based on our observation of the then current information and events, where applicable, and will include assumptions related to interest rates, prepayment rates and the timing and amount of credit losses. On at least a quarterly basis, we review and, if appropriate, make adjustments to our cash flow projections based on input and analysis received from external sources, internal models, and our judgment about interest rates, prepayment rates, the timing and amount of credit losses, and other factors. Where appropriate, we may include in our cash flow projections the U.S. Department of Justice's settlements with the major residential mortgage originators, regarding certain lending practices. Changes in cash flows from those originally projected, or from those estimated at the last evaluation, may result in a prospective change in the yield/interest income recognized on such securities. Actual maturities of the securities are affected by the contractual lives of the underlying collateral, periodic payments of scheduled principal, and prepayments of principal. Therefore, actual maturities of the securities will generally be shorter than stated contractual maturities.

Based on the projected cash flow of such securities purchased at a discount to par value, we may designate a portion of such purchase discount as credit protection against future credit losses and, therefore, not accrete such amount into interest income. The amount designated as credit discount may be adjusted over time, based on the actual performance of the security, its underlying collateral, actual and projected cash flow from such collateral, economic conditions and other factors. If the performance of a security with a credit discount is more favorable than forecasted, a portion of the amount designated as credit discount may be accreted into interest income prospectively.

### Loan Portfolio

Interest income on our residential loan portfolio and commercial loan portfolio is recorded in accordance with ASC 835 using the effective interest method based on the contractual payment terms of the loan. Any premium amortization or discount accretion will be reflected as a component of "Interest income" in our Consolidated Statements of Operations.

Variable Interest Entities (“VIEs”)

VIEs are defined as entities that by design either lack sufficient equity for the entity to finance its activities without additional subordinated financial support or are unable to direct the entity’s activities or are not exposed to the entity’s losses or entitled to its residual returns. We evaluate all of our interests in VIEs for consolidation. When the interests are determined to be variable interests, we assess whether we are deemed the primary beneficiary. The primary beneficiary of a VIE is determined to be the party that has both the power to direct the activities of a VIE that most significantly impact the VIE’s economic performance and the obligation to absorb losses or the right to receive benefits of the VIE that could potentially be significant to the VIE.

To assess whether we have the power to direct the activities of a VIE that most significantly impact the VIE’s economic performance, we consider all facts and circumstances, including our role in establishing the VIE and our ongoing rights and

## Table of Contents

responsibilities. This assessment includes first, identifying the activities that most significantly impact the VIE's economic performance; and second, identifying which party, if any, has power over those activities. In general, the parties that make the most significant decisions affecting the VIE or have the right to unilaterally remove those decision makers is deemed to have the power to direct the activities of a VIE.

To assess whether we have the obligation to absorb losses of the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE, we consider all of our economic interests. This assessment requires that we apply judgment in determining whether these interests, in the aggregate, are considered potentially significant to the VIE. Factors considered in assessing significance include: the design of the VIE, including its capitalization structure; subordination of interests; payment priority; relative share of interests held across various classes within the VIE's capital structure; and the reasons why the interests are held by us.

In instances where we and our related parties have variable interests in a VIE, we consider whether there is a single party in the related party group that meets both the power and losses or benefits criteria on its own as though no related party relationship existed. If one party within the related party group meets both these criteria, such reporting entity is the primary beneficiary of the VIE and no further analysis is needed. If no party within the related party group on its own meets both the power and losses or benefits criteria, but the related party group as a whole meets these two criteria, the determination of primary beneficiary within the related party group requires significant judgment. The analysis is based upon qualitative as well as quantitative factors, such as the relationship of the VIE to each of the members of the related-party group, as well as the significance of the VIE's activities to those members, with the objective of determining which party is most closely associated with the VIE.

Ongoing assessments of whether an enterprise is the primary beneficiary of a VIE is required.

## Derivatives and Hedging Activities

Subject to maintaining our qualification as a REIT for U.S. federal income tax purposes, as part of our hedging strategy, we may enter into, interest rate swaps, including forward starting swaps, interest rate swaptions, U.S. Treasury options, future contracts, TBAs, Agency and Non-Agency interest only strips total return swaps, credit default swaps and foreign current swaps and forwards. Derivatives, subject to REIT requirements, are used for hedging purposes rather than speculation. We determine the fair value of our derivative positions and obtain quotations from third parties, including the Chicago Mercantile Exchange or CME, to facilitate the process of determining such fair values. If our hedging activities do not achieve the desired results, reported earnings may be adversely affected.

GAAP requires an entity to recognize all derivatives as either assets or liabilities on the balance sheet and to measure those instruments at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative. The fair value adjustment will affect either other comprehensive income in stockholders' equity until the hedged item is recognized in earnings or net income depending on whether the derivative instrument is designated and qualifies as a hedge for accounting purposes and if so, the nature of the hedging activity. We have elected not to apply hedge accounting for our derivative instruments. Accordingly, we record the change in fair value of our derivative instruments, which includes net interest rate swap payments/receipts (including accrued amounts) and net currency payments/receipts (including accrued amounts) related to interest rate swaps and currency swaps, respectively in "Gain (loss) on derivative instruments, net" in our Consolidated Statements of Operations.

In January 2017, the CME amended its rulebooks to legally characterize variation margin payments and receipts for over-the-counter derivatives they clear as settlements of the derivatives' exposure rather than collateral against exposure. As a result of the change in legal characterization, effective January 1, 2017, variation margin is no longer classified as collateral in the Consolidated Balance Sheets in either "Due from counterparties" or "Due to

counterparties", but rather a component of the respective "Derivative asset, at fair value" or "Derivative liability, at fair value" in the Consolidated Balance Sheets. The variation margin is now considered partial settlements of the derivative contract and will result in realized gains or losses which prior to January 1, 2017 were classified as unrealized gains or losses on derivatives. Prior to the CME rulebook change variation margin was included in financing activities in our Consolidated Statement of Cash Flows in either "Due from counterparties, net" or "Due to counterparties, net". Commencing in January 2017, cash postings for variation margin are included in operating activities in the Consolidated Statements of Cash Flows.

Table of Contents

Proceeds and payments on settlement of swaptions, mortgage put options, futures contracts, credit default swaps and TBAs are included in cash flows from investing activities. Proceeds and payments on settlement of forward contracts are reflected in cash flows from financing activities in our Consolidated Statements of Cash Flows. For Agency and Non-Agency Interest-Only Strips accounted for as derivatives, the purchase, sale and recovery of basis activity is included with MBS and other securities under cash flows from investing activities in our Consolidated Statements of Cash Flows.

We evaluate the terms and conditions of our holdings of Agency and Non-Agency Interest-Only Strips, interest rate swaptions, currency forwards, futures contracts and TBAs to determine if these instruments have the characteristics of an investment or should be considered a derivative under GAAP. In determining the classification of our holdings of Interest-Only Strips, we evaluate the securities to determine if the nature of the cash flows has been altered from that of the underlying mortgage collateral. Interest-Only Strips, for which the underlying mortgage collateral has been included into a structured security that alters the cash flows from the underlying mortgage collateral, are accounted for as derivatives. The carrying value of our Agency and Non-Agency Interest-Only Strips, accounted for as derivatives, is included in "Mortgage-backed securities and other securities, at fair value" in our Consolidated Balance Sheets. The carrying value of interest rate swaptions, currency forwards, futures contracts and TBAs is included in "Derivative assets, at fair value" or "Derivative liability, at fair value" in our Consolidated Balance Sheets. Interest earned or paid along with the change in fair value of these instruments accounted for as derivatives is recorded in "Gain (loss) on derivative instruments, net" in our Consolidated Statements of Operations".

We evaluate all of our financial instruments to determine if such instruments are derivatives or contain features that qualify as embedded derivatives. An embedded derivative is separated from the host contract and accounted for separately when all of the guidance criteria are met. Hybrid instruments that are remeasured at fair value through earnings, including the fair value option, are not bifurcated. Derivative instruments, including derivative instruments accounted for as liabilities are recorded at fair value and are re-valued at each reporting date, with changes in the fair value together with interest earned or paid (including accrued amounts) reported in "Gain (loss) on derivative instruments, net" in our Consolidated Statements of Operations.

2018 Activity

Table of Contents

Investment Activity

We continually evaluate our investment portfolio, focusing on expected future prepayment trends, supply of and demand, costs of financing, costs of hedging, expected future interest rate volatility and the overall shape of the U.S. Treasury and interest rate swap yield curves. Based on our evaluation and our long-term views of the Agency RMBS sector, we expect to gradually reduce our exposure to Agency RMBS and deployed capital to acquire, Non-Agency CMBS, Residential Whole and Bridge Loans, Commercial Loans and Non-Agency RMBS collateralized by prime jumbo loan pools.

The following table presents our investing activity for the three months ended March 31, 2018 (dollars in thousands):

Investment Type	Balance at December 31, 2017	Principal Payments Purchases and Basis	Proceeds from Recovery Sales	Realized Gain/(Loss)	Unrealized Gain/(loss)	Premium and discount amortization, net	Balance at
