NEWS RELEASE

CN reports Q2-2015 net income of C\$886 million,
or C\$1.10 per diluted share

Adjusted diluted earnings per share (EPS) for Q2-2015 increased
by 12 per cent to C\$1.15 (1)

MONTREAL, July 20, 2015 — CN (TSX: CNR) (NYSE: CNI) today reported its financial and operating results for the second quarter ended June 30, 2015.

Second-quarter 2015 financial highlights

- Net income was C\$886 million, or C\$1.10 per diluted share, compared with net income of C\$847 million, or C\$1.03 per diluted share, for second-quarter 2014. The Q2-2015 results included a deferred income tax expense of C\$42 million (C\$0.05 per diluted share) resulting from the enactment of a higher provincial corporate income tax rate.
- Excluding the deferred income tax expense, Q2-2015 adjusted diluted EPS increased 12 per cent to C\$1.15 from year-earlier diluted EPS of C\$1.03. (1)
 - Q2-2015 operating income increased eight per cent to C\$1,362 million.
- Second-quarter 2015 revenues were flat at C\$3,125 million, carloadings decreased by three per cent, and revenue ton-miles declined by seven per cent.
 - CN's operating ratio for Q2-2015 improved by 3.2 points to 56.4 per cent from 59.6 per cent the year before.
- Free cash flow for the first six months of 2015 was C\$1,051 million, compared with C\$1,270 million for the year-earlier period. (1)

Claude Mongeau, president and chief executive officer, said: "I'm proud of our very solid second-quarter results, driven by the team's swift action to recalibrate resources and double-down on efficiency, while continuing to improve customer service.

"CN is pleased to reaffirm its outlook for double-digit adjusted EPS growth in 2015 versus last year's adjusted diluted EPS of C\$3.76 despite volume growth that remains constrained by weakness in several markets, as well as challenging year-over-year comparables. (2)

"We're focused on our long-term agenda and investing C\$2.7 billion in CN's capital program this year to support it, with an emphasis on the integrity and safety of the network."

Foreign currency impact on results

Although CN reports its earnings in Canadian dollars, a large portion of its revenues and expenses is denominated in U.S. dollars. The fluctuation of the Canadian dollar relative to the U.S. dollar affects the conversion of the Company's U.S.-dollar-denominated revenues and expenses. On a constant currency basis, CN's net income for the second quarter of 2015 would have been lower by C\$64 million, or C\$0.08 per diluted share. (1)

Second-quarter 2015 revenues, traffic volumes and expenses

Revenues for the second quarter of 2015 were flat at C\$3,125 million. Revenues increased for automotive (17 per cent), forest products (eight per cent), petroleum and chemicals (four per cent), and intermodal (two per cent). Revenues declined for metals and minerals (five per cent), grain and fertilizers (seven per cent), and coal (26 per cent).

The revenue performance was mainly attributable to the positive translation impact of the weaker Canadian dollar on U.S.-dollar-denominated revenues; freight rate increases; and strong overseas intermodal demand and higher volumes of finished vehicle traffic. These factors were almost entirely offset by a lower applicable fuel surcharge rate; lower volumes of Canadian grain versus the prior year's record crop; decreased shipments of coal due to weaker global demand; reduced shipments of energy-related commodities, including crude oil, frac sand, and drilling pipe; as well as lower volumes of semi-finished steel products and iron ore.

Carloadings for the quarter declined by three per cent to 1,414 thousand.

Revenue ton-miles, measuring the relative weight and distance of rail freight transported by CN, declined by seven per cent over the year-earlier quarter. Rail freight revenue per revenue ton-mile, a measurement of yield defined as revenue earned on the movement of a ton of freight over one mile, increased by seven per cent over the year-earlier period, driven by the positive translation impact of the weaker Canadian dollar and freight rate increases, partly offset by a lower applicable fuel surcharge rate and an increase in the average length of haul.

Operating expenses for the quarter decreased by five per cent to C\$1,763 million, mainly due to lower fuel costs and lower labor and fringe benefits expense, partly offset by the negative translation impact of a weaker Canadian dollar on U.S.-dollar-denominated expenses as well as increased purchased services and material expense.

Forward-Looking Statements

Certain information included in this news release constitutes "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 and under Canadian securities laws. CN cautions that, by their nature, these forward-looking statements involve risks, uncertainties and assumptions. The Company cautions that its assumptions may not materialize and that current economic conditions render such assumptions, although reasonable at the time they were made, subject to greater uncertainty. Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors which may cause the actual results or performance of the Company or the rail industry to be materially different from the outlook or any future results or performance implied by such statements. To the extent that CN has provided guidance that are non-GAAP financial measures, the Company may not be able to provide a reconciliation to the GAAP measures, due to unknown variables and uncertainty related to future results. Key assumptions used in determining forward-looking information are set forth below.

2015 key assumptions

CN has made a number of economic and market assumptions in preparing its 2015 outlook. The Company is now assuming that North American industrial production for the year will increase by approximately one per cent, compared with its April 20, 2015, assumption of three per cent, that U.S. housing starts will be in the range of 1.2 million units, and that U.S. motor vehicles sales will be approximately 16.7 million units. The 2014/2015 Canadian grain crop represented a significant reduction toward the historical trend line while the U.S. grain crop was above trend. CN assumes that the 2015/2016 grain crops in both Canada and the United States will be in-line with trend yields. CN is no longer counting on growth in customer shipments of energy-related commodities, namely crude oil and frac sand, compared with its previous assumption announced on April 20, 2015, of 40,000 carloads of growth. With these assumptions, CN now assumes total carloads for all freight categories in 2015 will be generally comparable with 2014, versus its April 20, 2015, forecast of three per cent growth. CN expects continued pricing

improvement above inflation. CN assumes that in 2015 the value of the Canadian dollar in U.S. currency will be approximately \$0.80, and that the average price of crude oil (West Texas Intermediate) will fluctuate around US\$50 per barrel. In 2015, CN plans to invest approximately C\$2.7 billion in its capital program, of which approximately C\$1.4 billion is targeted toward maintaining the safety and integrity of the network, particularly track infrastructure. The 2015 capital program also includes funds for projects supporting growth and productivity.

Important risk factors that could affect the forward-looking statements include, but are not limited to, the effects of general economic and business conditions, industry competition, inflation, currency and interest rate fluctuations, changes in fuel prices, legislative and/or regulatory developments, compliance with environmental laws and regulations, actions by regulators, various events which could disrupt operations, including natural events such as severe weather, droughts, floods and earthquakes, labor negotiations and disruptions, environmental claims, uncertainties of investigations, proceedings or other types of claims and litigation, risks and liabilities arising from derailments, and other risks detailed from time to time in reports filed by CN with securities regulators in Canada and the United States. Reference should be made to “Management’s Discussion and Analysis” in CN’s annual and interim reports, Annual Information Form and Form 40-F filed with Canadian and U.S. securities regulators, available on CN’s website, for a summary of major risk factors.

CN assumes no obligation to update or revise forward-looking statements to reflect future events, changes in circumstances, or changes in beliefs, unless required by applicable Canadian securities laws. In the event CN does update any forward-looking statement, no inference should be made that CN will make additional updates with respect to that statement, related matters, or any other forward-looking statement.

- 1) See discussion and reconciliation of non-GAAP adjusted performance measures in the attached supplementary schedule, Non-GAAP Measures.
- 2) See Forward-Looking statements for a summary of the key assumptions and risks regarding CN’s 2015 outlook.

CN is a true backbone of the economy, transporting more than C\$250 billion worth of goods annually for a wide range of business sectors, ranging from resource products to manufactured products to consumer goods, across a rail network spanning Canada and mid-America. CN – Canadian National Railway Company, along with its operating railway subsidiaries -- serves the cities and ports of Vancouver, Prince Rupert, B.C., Montreal, Halifax, New Orleans, and Mobile, Ala., and the metropolitan areas of Toronto, Edmonton, Winnipeg, Calgary, Chicago, Memphis, Detroit, Duluth, Minn./Superior, Wis., and Jackson, Miss., with connections to all points in North America. For more information on CN, visit the company’s website at www.cn.ca.

Canadian National Railway Company

Notes to Unaudited Consolidated Financial Statements

1 - Basis of presentation

In management's opinion, the accompanying unaudited Interim Consolidated Financial Statements and Notes thereto, expressed in Canadian dollars, and prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) for interim financial statements, contain all adjustments (consisting of normal recurring accruals) necessary to present fairly Canadian National Railway Company's ("CN" or the "Company") financial position as at June 30, 2015 and December 31, 2014, its results of operations and cash flows for the three and six months ended June 30, 2015 and 2014, as well as changes in shareholders' equity for the six months ended June 30, 2015 and 2014.

These unaudited Interim Consolidated Financial Statements and Notes thereto have been prepared using accounting policies consistent with those used in preparing the Company's 2014 Annual Consolidated Financial Statements and Notes thereto. While management believes that the disclosures presented are adequate to ensure that the information is not misleading, these unaudited Interim Consolidated Financial Statements and Notes thereto should be read in conjunction with the Company's 2014 Annual Consolidated Financial Statements and Notes thereto.

2 - Recent accounting pronouncement

On April 7, 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2015-03, Interest – Imputation of Interest. This ASU simplifies the presentation of debt issuance costs by requiring that such costs be presented in the balance sheet as a deduction from the carrying amount of debt. This standard is effective for annual and interim reporting periods beginning after December 15, 2015. Early adoption is permitted and the new guidance should be applied on a retrospective basis. The Company plans to implement this standard in the fourth quarter of 2015. The Company does not expect a significant impact to its Consolidated Financial Statements from the adoption of this standard.

On July 9, 2015, the FASB affirmed its proposal to defer the effective date of ASU 2014-09, Revenue from Contracts with Customers, by one year. As a result, this standard is effective for annual and interim reporting periods beginning after December 15, 2017. The FASB further affirmed its proposal to permit all entities to early adopt this standard, but not before the original effective date for annual and interim reporting periods beginning after December 15, 2016. The Company is evaluating the effect that ASU 2014-09 will have on its Consolidated Financial Statements, related disclosures, the transition method to apply and adoption period. The Company does not expect a significant impact to its Consolidated Financial Statements from the adoption of this standard.

3 - Other income

Included in Other income are gains and losses on the disposal of land and property, as well as foreign exchange gains and losses related to foreign exchange forward contracts (see Note 11 – Financial instruments) and the re-measurement of foreign currency denominated monetary assets and liabilities.

Disposal of property

2014

Deux-Montagnes

On February 28, 2014, the Company closed a transaction with Agence Métropolitaine de Transport to sell the Deux-Montagnes subdivision between Saint-Eustache and Montreal, Quebec, including the Mont-Royal tunnel, together with the rail fixtures (collectively the "Deux-Montagnes"), for cash proceeds of \$97 million before transaction costs. Under the agreement, the Company obtained the perpetual right to operate freight trains over the Deux-Montagnes at its then current level of operating activity, with the possibility of increasing its operating activity for additional consideration. The transaction resulted in a gain on disposal of \$80 million (\$72 million after-tax) that was recorded in Other income under the full accrual method of accounting for real estate transactions.

4 - Income taxes

The Company recorded income tax expense of \$387 million and \$646 million for the three and six months ended June 30, 2015, respectively, compared to \$322 million and \$521 million, respectively, for the same periods in 2014.

Included in the 2015 figures was a deferred income tax expense of \$42 million resulting from the enactment of a higher provincial corporate income tax rate, which was recorded in the second quarter.

Included in the 2014 figure was an income tax recovery of \$18 million resulting from a change in estimate of the deferred income tax liability related to properties, which was recorded in the first quarter.

Diluted earnings per share	\$ 1.10	\$ 1.03	\$ 1.96	\$ 1.77

6 - Financing activities

Revolving credit facility

The Company has an \$800 million revolving credit facility agreement with a consortium of lenders. The agreement, which contains customary terms and conditions, allows for an increase in the facility amount, up to a maximum of \$1.3 billion, as well as the option to extend the term by an additional year at each anniversary date, subject to the consent of individual lenders. On March 12, 2015, the Company exercised such option and extended the term of its agreement by one year to May 5, 2020. The credit facility is available for general corporate purposes, including back-stopping the Company's commercial paper program, and provides for borrowings at various interest rates, including the Canadian prime rate, bankers' acceptance rates, the U.S. federal funds effective rate and the London Interbank Offered Rate (LIBOR), plus applicable margins. The credit facility agreement has one financial covenant, which limits debt as a percentage of total capitalization, and with which the Company is in compliance. As at June 30, 2015 and December 31, 2014, the Company had no outstanding borrowings under its revolving credit facility and there were no draws during the six months ended June 30, 2015.

Commercial paper

The Company has a commercial paper program in Canada and a new commercial paper program was established in the U.S. during the second quarter of 2015. Both programs are back-stopped by the Company's revolving credit facility, enabling it to issue commercial paper up to a maximum aggregate principal amount of \$800 million, or the US dollar equivalent on a combined basis. As at June 30, 2015, the Company had total commercial paper borrowings of \$380 million (nil as at December 31, 2014) at a weighted-average interest rate of 0.87% presented in Current portion of long-term debt on the Consolidated Balance Sheet.

Accounts receivable securitization program

The Company has an agreement to sell an undivided co-ownership interest in a revolving pool of accounts receivable to unrelated trusts for maximum cash proceeds of \$450 million. On June 18, 2015, the Company extended the term of its agreement by one year to February 1, 2018. As at June 30, 2015, the Company had proceeds of \$50 million (\$50 million as at December 31, 2014) received under the accounts receivable securitization program presented in Current portion of long-term debt on the Consolidated Balance Sheet at a weighted-average interest rate of 0.96% (1.24% as at December 31, 2014) which is secured by, and limited to, \$56 million (\$56 million as at December 31, 2014) of accounts receivable.

Bilateral letter of credit facilities and Restricted cash and cash equivalents

The Company has a series of bilateral letter of credit facility agreements with various banks to support its requirements to post letters of credit in the ordinary course of business. On March 12, 2015, the Company extended the expiry date of its agreements by one year to April 28, 2018. Under these agreements, the Company has the option from time to time to pledge collateral in the form of cash or cash equivalents, for a minimum term of one month, equal to at least the face value of the letters of credit issued. As at June 30, 2015, the Company had letters of credit drawn of \$485 million (\$487 million as at December 31, 2014) from a total committed amount of \$517 million (\$511 million as at December 31, 2014) by the various banks. As at June 30, 2015, cash and cash equivalents of \$462 million (\$463 million as at December 31, 2014) were pledged as collateral and recorded as Restricted cash and cash equivalents on the Consolidated Balance Sheet.

Canadian National Railway Company

Notes to Unaudited Consolidated Financial Statements

Share purchases

Share repurchase programs

The Company may repurchase shares pursuant to a normal course issuer bid (NCIB) at prevailing market prices plus brokerage fees, or such other prices as may be permitted by the Toronto Stock Exchange. Under its current NCIB, the Company may repurchase up to 28.0 million common shares between October 24, 2014 and October 23, 2015. As at June 30, 2015, the Company had repurchased 16.3 million common shares for \$1,243 million under its current program.

The following table provides the information related to the share repurchase programs for the three and six months ended June 30, 2015 and 2014:

In millions, except per share data	Three months ended June 30		Six months ended June 30	
	2015	2014	2015	2014
Number of common shares repurchased (1)	5.3	5.6	10.7	11.9
Weighted-average price per share (2)	\$ 77.14	\$ 64.70	\$ 78.17	\$ 61.29
Amount of repurchase (3)	\$ 404	\$ 365	\$ 833	\$ 730

(1) Includes repurchases of common shares in the first quarters of 2015 and 2014 pursuant to private agreements between the Company and arm's length third-party sellers.

(2) Includes brokerage fees.

(3) Includes settlements in subsequent periods.

Share purchases by Share Trusts

In 2014, the Company established Employee Benefit Plan Trusts (the "Share Trusts") to purchase common shares on the open market, which will be used to deliver common shares under the Share Units Plan (see Note 8 - Stock-based compensation). For the three and six months ended June 30, 2015, the Share Trusts purchased 0.6 million common shares for \$44 million at a weighted-average price per share of \$74.39, including brokerage fees. Additional information relating to the share purchases by Share Trusts is provided in Note 13 – Share capital to the Company's 2014 Annual Consolidated Financial Statements.

7 - Pensions and other postretirement benefits

The Company has various retirement benefit plans under which substantially all of its employees are entitled to benefits at retirement age, generally based on compensation and length of service and/or contributions. Additional information relating to the retirement benefit plans is provided in Note 12 - Pensions and other postretirement benefits to the Company's 2014 Annual Consolidated Financial Statements.

Components of net periodic benefit cost (income) for pensions and other postretirement benefits (OPEB)

In millions	Three months ended June 30				Six months ended June 30			
	Pensions		OPEB		Pensions		OPEB	
	2015	2014	2015	2014	2015	2014	2015	2014
Current service cost	\$ 35	\$ 31	\$ -	\$ -	\$ 78	\$ 66	\$ 1	\$ 1
Interest cost	162	177	2	4	325	355	5	6
	(251)	(244)			(502)	(489)		

Expected return on plan assets									
Amortization of prior service cost	1	1	1	-	2	2	1	1	
Amortization of net actuarial loss (gain)	53	30	(1)	(1)	114	62	(2)	(2)	
Net periodic benefit cost (income) (1)	\$ -	\$ (5)	\$ 2	\$ 3	\$ 17	\$ (4)	\$ 5	\$ 6	

(1) In the second quarter of 2015, the Company revised its estimate of full year Net periodic benefit cost (income) for pensions to reflect updated plan demographic information.

Pension contributions for the six months ended June 30, 2015 and 2014 of \$92 million and \$100 million, respectively, primarily represent contributions to the Company's main pension plan, the CN Pension Plan, for the current service cost as determined under the Company's current actuarial valuations for funding purposes. In 2015, the Company expects to make total cash contributions of approximately \$115 million for all of the Company's pension plans.

Canadian National Railway Company

Notes to Unaudited Consolidated Financial Statements

8 - Stock-based compensation

The Company has various stock-based compensation plans for eligible employees. A description of the Company's major plans is provided in Note 14 – Stock plans to the Company's 2014 Annual Consolidated Financial Statements.

In millions	Three months ended June 30		Six months ended June 30

(1) Performance share unit (PSU) awards are granted under the Share Units Plan.

(2) Deferred share unit (DSU) awards are granted under the Voluntary Incentive Deferral Plan.

Equity settled awards

Share Units Plan

Under the Share Units Plan, the Company grants performance share unit (PSU) awards.

PSU-ROIC awards vest from 0% to 200%, subject to the attainment of a return on invested capital (ROIC) performance condition (previously from 0% to 150% for PSUs-ROIC outstanding as at December 31, 2014) over the plan period. Payout of PSU-ROIC awards is conditional upon the attainment of a minimum share price.

PSU-TSR awards, introduced in 2015, vest from 0% to 200%, subject to the attainment of a total shareholder return (TSR) market condition over the plan period of three years based on the Company's TSR relative to a Class I Railways peer group and components of the S&P/TSX 60 Index.

Equity settled PSUs are settled in common shares of the Company, subject to the attainment of their respective vesting conditions, by way of disbursement from the Share Trusts. The number of shares remitted to the participant upon settlement is equal to the number of PSUs awarded multiplied by their respective vesting factor less amounts withheld to satisfy the participant's minimum statutory withholding tax requirement.

The settlement of PSUs, for senior and executive management employees, is conditional on compliance with the conditions of their benefit plans, award or employment agreements, including but not limited to non-compete, non-solicitation and non-disclosure of confidential information.

Equity settled awards (excluding stock option awards)

	PSUs-ROIC (1)		PSUs-TSR (2)		DSUs (3)	
	Units In millions	Weighted- average grant date fair value	Units In millions	Weighted- average grant date fair value	Units In millions	Weighted- average grant date fair value
Outstanding at December 31, 2014	0.9	\$ 71.05	-	N/A	1.7	\$ 76.29
Granted	0.4	\$ 50.87	0.1	\$ 114.86	-	\$ 81.18
Outstanding at June 30, 2015	1.3	\$ 64.32	0.1	\$ 114.86	1.7	\$ 76.44

- (1) The grant date fair value of PSUs-ROIC granted in 2015 of \$22 million is calculated using a lattice-based valuation model. As at June 30, 2015, total unrecognized compensation cost related to non-vested PSUs-ROIC outstanding was \$30 million and is expected to be recognized over a weighted-average period of 1.7 years.
- (2) The grant date fair value of PSUs-TSR granted in 2015 of \$16 million is calculated using a Monte Carlo simulation model. As at June 30, 2015, the total unrecognized compensation cost related to non-vested PSUs-TSR outstanding was \$11 million and is expected to be recognized over a weighted-average period of 2.1 years.
- (3) The grant date fair value of DSUs granted in 2015 of \$2 million is calculated using an intrinsic value model and represents deferrals of the annual incentive bonus payment and other eligible incentive payments. As at June 30, 2015, the total unrecognized compensation cost related to non-vested DSUs outstanding was \$1 million. The remaining recognition period has not been quantified as it relates solely to the 25% Company grant, representing a minimal number of units. As at June 30, 2015, the aggregate intrinsic value of DSUs outstanding amounted to \$127 million.

Stock option awards

	Options outstanding	
	Number of options In millions	Weighted- average exercise price
Outstanding at December 31, 2014 (1)	7.5	\$ 37.37

Exercised	(0.4)	\$ 29.71
Outstanding at June 30, 2015 (1) (3) (4)	7.9	\$ 44.41
Exercisable at June 30, 2015 (1) (4)	5.6	\$ 35.14

- (1) Stock options with a US dollar exercise price have been translated into Canadian dollars using the foreign exchange rate in effect at the balance sheet date.
- (2) The grant date fair value of options awarded in 2015 of \$11 million (\$13.21 per unit) is calculated using the Black-Scholes option-pricing model.
- (3)

As at June 30, 2015, total unrecognized compensation cost related to non-vested options outstanding was \$12 million and is expected to be recognized over a weighted-average period of 2.1 years.

- (4) As at June 30, 2015, substantially all stock options were in-the-money. The weighted-average term to expiration of outstanding options was 5.7 years and the weighted-average term to expiration of exercisable stock options was 4.6 years. As at June 30, 2015, the aggregate intrinsic value of in-the-money stock options outstanding amounted to \$229 million and aggregate intrinsic value of stock options exercisable amounted to \$207 million.

Cash settled awards

Number of units - In millions	PSUs-ROIC (1)	DSUs (2)
Outstanding at December 31, 2014	1.6	0.5
Settled	(0.9)	(0.1)
Outstanding at June 30, 2015	0.7	0.4

- (1) As at June 30, 2015, total unrecognized compensation cost related to non-vested PSUs-ROIC outstanding was \$15 million and is expected to be recognized over a weighted-average period of 1.3 years. As at June 30, 2015 the PSU liability was \$52 million (\$157 million as at December 31, 2014).
- (2) As at June 30, 2015, total unrecognized compensation cost related to non-vested DSUs outstanding was minimal. The remaining recognition period has not been quantified as it relates solely to the 25% Company grant and the dividends earned thereon, representing a minimal number of units. As at June 30, 2015 the DSU liability was \$36 million (\$40 million as at December 31, 2014).

Canadian National Railway Company

14

Notes to Unaudited Consolidated Financial Statements

10 - Major commitments and contingencies

Commitments

As at June 30, 2015, the Company had commitments to acquire railroad ties, rail, freight cars, locomotives, and other equipment and services, as well as outstanding information technology service contracts and licenses, at an aggregate cost of \$1,525 million (\$1,054 million as at December 31, 2014). The Company also has estimated remaining commitments of approximately \$527 million (US\$422 million), in relation to the U.S. federal government legislative requirement to implement Positive Train Control (PTC).

In addition, the Company has estimated remaining commitments, through to December 31, 2016, of approximately \$60 million (US\$48 million), in relation to the acquisition of the principal lines of the former Elgin, Joliet and Eastern Railway Company. These commitments are for railroad infrastructure improvements, grade separation projects as well as commitments under a series of agreements with individual communities and a comprehensive voluntary mitigation program established to address surrounding municipalities' concerns.

Contingencies

In the normal course of business, the Company becomes involved in various legal actions seeking compensatory and occasionally punitive damages, including actions brought on behalf of various purported classes of claimants and claims relating to employee and third-party personal injuries, occupational disease and property damage, arising out of harm to individuals or property allegedly caused by, but not limited to, derailments or other accidents.

As at June 30, 2015, the Company had aggregate reserves for personal injury and other claims of \$305 million, of which \$49 million was recorded as a current liability (\$298 million as at December 31, 2014, of which \$48 million was recorded as a current liability).

Although the Company considers such provisions to be adequate for all its outstanding and pending claims, the final outcome with respect to actions outstanding or pending at June 30, 2015, or with respect to future claims, cannot be reasonably determined. When establishing provisions for contingent liabilities the Company considers, where a probable loss estimate cannot be made with reasonable certainty, a range of potential probable losses for each such matter, and records the amount it considers the most reasonable estimate within the range. However, when no amount within the range is a better estimate than any other amount, the minimum amount in the range is accrued. For matters where a loss is reasonably possible but not probable, a range of potential losses cannot be estimated due to various factors which may include the limited availability of facts, the lack of demand for specific damages and the fact that proceedings were at an early stage. Based on information currently available, the Company believes that the eventual outcome of the actions against the Company will not, individually or in the aggregate, have a material adverse effect on the Company's financial position. However, due to the inherent inability to predict with certainty unforeseeable future developments, there can be no assurance that the ultimate resolution of these actions will not have a material adverse effect on the Company's results of operations, financial position or liquidity in a particular quarter or fiscal year.

Environmental matters

The Company's operations are subject to numerous federal, provincial, state, municipal and local environmental laws and regulations in Canada and the U.S. concerning, among other things, emissions into the air; discharges into waters; the generation, handling, storage, transportation, treatment and disposal of waste, hazardous substances, and other materials; decommissioning of underground and aboveground storage tanks; and soil and groundwater contamination. A risk of environmental liability is inherent in railroad and related transportation operations; real estate ownership, operation or control; and other commercial activities of the Company with respect to both current and past operations.

The Company has identified 245 sites at which it is or may be liable for remediation costs, in some cases along with other potentially responsible parties, associated with alleged contamination and is subject to environmental clean-up and enforcement actions, including those imposed by the United States Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), also known as the Superfund law, or analogous state

laws. CERCLA and similar state laws, in addition to other similar Canadian and U.S. laws, generally impose joint and several liability for clean-up and enforcement costs on current and former owners and operators of a site, as well as those whose waste is disposed of at the site, without regard to fault or the legality of the original conduct. The Company has been notified that it is a potentially responsible party for study and clean-up costs at 7 sites governed by the Superfund law (and analogous state laws) for which investigation and remediation payments are or will be made or are yet to be determined and, in many instances, is one of several potentially responsible parties.

Canadian National Railway Company

Notes to Unaudited Consolidated Financial Statements

The ultimate cost of addressing these known contaminated sites cannot be definitively established given that the estimated environmental liability for any given site may vary depending on the nature and extent of the contamination; the nature of anticipated response actions, taking into account the available clean-up techniques; evolving regulatory standards governing environmental liability; and the number of potentially responsible parties and their financial viability. As a result, liabilities are recorded based on the results of a four-phase assessment conducted on a site-by-site basis. A liability is initially recorded when environmental assessments occur, remedial efforts are probable, and when the costs, based on a specific plan of action in terms of the technology to be used and the extent of the corrective action required, can be reasonably estimated. The Company estimates the costs related to a particular site using cost scenarios established by external consultants based on the extent of contamination and expected costs for remedial efforts. In the case of multiple parties, the Company accrues its allocable share of liability taking into account the Company's alleged responsibility, the number of potentially responsible parties and their ability to pay their respective share of the liability. Adjustments to initial estimates are recorded as additional information becomes available.

The Company's provision for specific environmental sites is undiscounted and includes costs for remediation and restoration of sites, as well as monitoring costs. Costs related to any unknown existing or future contamination will be accrued in the period in which they become probable and reasonably estimable.

As at June 30, 2015, the Company had aggregate accruals for environmental costs of \$133 million, of which \$67 million was recorded as a current liability (\$114 million as at December 31, 2014, of which \$45 million was recorded as a current liability). The Company anticipates that the majority of the liability at June 30, 2015 will be paid out over the next five years. However, some costs may be paid out over a longer period. Based on the information currently available, the Company considers its accruals to be adequate.

Guarantees and indemnifications

A list of indemnifications found in various types of contracts with third parties is provided in Note 16 – Major commitments and contingencies to the Company's 2014 Annual Consolidated Financial Statements.

Guarantees

(a) Guarantee of residual values of operating leases

The Company has guaranteed a portion of the residual values of certain of its assets under operating leases with expiry dates between 2015 and 2022, for the benefit of the lessor. If the fair value of the assets at the end of their respective lease term is less than the fair value, as estimated at the inception of the lease, then the Company must, under certain conditions, compensate the lessor for the shortfall. As at June 30, 2015, the maximum exposure in respect of these guarantees was \$195 million (\$194 million as at December 31, 2014). There are no recourse provisions to recover any amounts from third parties.

(b) Other guarantees

As at June 30, 2015, the Company, including certain of its subsidiaries, had granted \$485 million (\$487 million as at December 31, 2014) of irrevocable standby letters of credit and \$115 million (\$106 million as at December 31, 2014) of surety and other bonds, issued by highly rated financial institutions, to third parties to indemnify them in the event the Company does not perform its contractual obligations. As at June 30, 2015, the maximum potential liability under these guarantee instruments was \$600 million (\$593 million as at December 31, 2014), of which \$524 million (\$525 million as at December 31, 2014) related to workers' compensation and other employee benefit liabilities and \$76 million (\$68 million as at December 31, 2014) related to other liabilities. The letters of credit were drawn on the Company's bilateral letter of credit facilities. The guarantee instruments expire at various dates between 2015 and 2018.

The Company had not recorded a liability as at June 30, 2015 with respect to its guarantee instruments as they related to the Company's future performance and the Company did not expect to make any payments under its guarantee instruments.

Canadian National Railway Company

16

Notes to Unaudited Consolidated Financial Statements

11 - Financial instruments

Derivative financial instruments

The Company uses derivative financial instruments from time to time in the management of its foreign currency and interest rate exposures. The Company has limited involvement with derivative financial instruments in the management of its risks and does not hold or issue them for trading or speculative purposes. As at June 30, 2015, the Company had outstanding foreign exchange forward contracts with a notional value of US\$350 million (US\$350 million as at December 31, 2014). Changes in the fair value of forward contracts, resulting from changes in foreign exchange rates, are recognized in Other income in the Consolidated Statement of Income as they occur. For the three and six months ended June 30, 2015, the Company recorded a pre-tax loss of \$7 million and a pre-tax gain of \$29 million, respectively, related to foreign exchange forward contracts, compared to nil and a pre-tax gain of \$10 million, respectively, for the same periods in 2014. As at June 30, 2015, the Company recorded an unrealized gain of \$38 million (\$9 million as at December 31, 2014) related to foreign exchange forward contracts in Other current assets in the Consolidated Balance Sheet.

Fair value of financial instruments

The carrying amounts of Cash and cash equivalents, Restricted cash and cash equivalents, Accounts receivable, Other current assets, and Accounts payable and other, approximate fair value.

Included in Intangible and other assets are equity investments for which the carrying amount approximates the fair value, with the exception of certain cost investments for which the fair value is estimated based on the Company's proportionate share of the underlying net assets. Investments are classified as Level 3 as their fair value is based on significant unobservable inputs. As at June 30, 2015, the Company's investments had a carrying amount of \$63 million (\$58 million as at December 31, 2014) and a fair value of \$196 million (\$183 million as at December 31, 2014).

The fair value of the Company's debt is estimated based on the quoted market prices for the same or similar debt instruments, as well as discounted cash flows using current interest rates for debt with similar terms, company rating, and remaining maturity. The Company's debt is classified as Level 2. As at June 30, 2015, the Company's debt had a carrying amount of \$9,344 million (\$8,409 million as at December 31, 2014) and a fair value of \$10,488 million (\$9,767 million as at December 31, 2014).

Additional information related to the fair value of financial instruments, including a description of the fair value hierarchy which defines the criteria used to classify financial instruments as Level 1, Level 2 or Level 3 is provided in Note 17 – Financial instruments to the Company's 2014 Annual Consolidated Financial Statements.
