(Former name or former address, if changed since last report)

Item 12. Results of Operations and Financial Condition

On Tuesday, February 24, 2004 the Company disseminated a press release, a copy attached as Exhibit A, announcing the Company's operational results for the fourth quarter and year ending December 31, 2003.

As part of the press release there is a discussion of non-GAAP financial terms. Specifically, the non-GAAP financial terms are Net Loss from Continuing Operations Exclusive of Special Charges, Impairment Costs and After Tax LIFO Charges, (LIFO Loss, less Inventory Revaluation) . There is also a presentation of EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortization) exclusive of special charges, impairment costs and LIFO charges .

The Company is a distributor which has maintained its inventory on a LIFO basis since 1955. Liquidation of inventory, acquired at prices above current market levels, in recessionary times has a significant effect on reported current year income under GAAP.

To provide investors and shareholders with the level of information required for them to gain a full understanding of current year operations, the Company believes it is necessary to disclose the impact of impairments and special charges (both which are GAAP terms shown on the Consolidated Statement) and LIFO charges. This disclosure, in conjunction with the EBITDA which is an important term and concept used by professional investment community and the Company's primary lenders, is believed essential in order to present a proper understanding of the changes in the Company's earnings and to clarify the underlying operating and business trends.

FOR IMMEDIATE RELEASE
TUESDAY, FEBRUARY 24, 2004

COMPANY SEES INCREASING REVENUES
RESTRUCTURING INITIATIVE COMPLETED

FRANKLIN PARK, ILLINOIS, FEBRUARY 24, 2004 A. M. CASTLE & CO. (AMEX: CAS) , A North American distributor of highly engineered metals and plastics, today announced its operating results for the quarter and year ended December 31, 2003. In making the announcement G. Thomas McKane, Chairman and CEO stated that the fourth quarter of 2003 marked a key milestone at Castle. First, the restructuring of the Company has been completed and second, the Company is beginning to experience meaningful, top line growth.

For the year, the Company reported sales of \$543.0 million, up \$4.9 million, or 0.9% from \$538.1 million in 2002. Net losses from continuing operations totalled \$17.9 million compared with losses of \$9.3 million in the prior year. Assuming a 40% income tax rate, in 2003, the Company incurred after-tax special charges and impairment costs totalling \$6.9 million relating primarily to the sale or closure of four non-performing businesses. An after-tax inventory adjustment LIFO loss less Inventory Revaluation (LIFO charge) was made which totalled \$1.5 million in 2003 compared with \$0.8 million in 2002. Exclusive of special charges, impairment costs and LIFO charges, net losses from continuing operations totalled \$9.5 million for the current year compared with \$8.5 million in 2002.

The Company reported fourth quarter sales of \$132.5 million, a level 6.6% ahead of prior year results. Net losses from continuing operations totalled \$5.1 million, included an \$0.8 million after-tax impairment charge and a \$1.3 million LIFO charge. Exclusive of special charges, impairments and LIFO charges, net losses from continuing operations totalled \$3.0 million compared to \$4.4 million in the same

A.M. Castle & Co.
Add One

period of 2002. There were additional charges for facility relocation, reserve adjustments relating to the sale of its U.K. business in 2002 and other expense and inventory reserves totalling \$0.8 million after-tax which, in

management's judgement, are unlikely to reoccur in future periods.

"The restructuring, impairment and LIFO charges belie the underlying improvements in the Company's operations," said McKane. "EBITDA (earnings before interest, taxes, depreciation and amortization) exclusive of special charges, impairment costs and LIFO charges, totalled \$1.3 million in the fourth quarter of 2003 versus breakeven EBITDA levels in the prior year. For the second half of 2003, EBITDA, excluding special charges, impairment costs and LIFO charges, totalled \$2.3 million versus \$0.2 million in the second half of 2002, a positive turnaround of \$2.1 million."

Commenting further on the Company's fourth quarter results, Mr. McKane said, "Sales in the quarter were 6.6% above prior year levels. On a rate per working day basis, the increase was 8.4%. The metals business grew 5.1% for the quarter versus the prior year's fourth quarter, and 6.8% on a per working day basis. The order trend strengthened throughout the period, culminating in a very strong December and that strength continues into January and February. Sales for the first quarter 2004 are expected to show mid-single digit real increases as compared to the prior year. Our plastics business grew nearly 18% during the fourth quarter of 2003. New market penetration in both New York and Florida added significantly to the growth."

In discussing the LIFO charges, Edward F. Culliton, Vice President and CFO, stated, "We knew that reducing inventories during the deflationary period of 2002 and 2003 could result in unfavorable LIFO charges as we liquidated higher cost inventory. However, management and the Board believed this was the right move for the Company. Our inventories were too high relative to our sales volume. The inventory reduction, most of which focused on excess and slow moving items, is part of an overall improved inventory management program which has contributed to a \$43.3 million reduction in our debt levels since December 2000.

Over the last two years the Company has sold Castle U.K., Energy Alloys (a joint venture), Keystone Honing, Laser Precision (a joint venture) and closed its Keystone Services chrome plating operation. "These moves, in addition to the restructuring of the balance sheet in the fourth quarter of 2002, were costly and difficult," stated McKane, "but they eliminated operations which drained both cash and earnings, and added businesses which provide growth platforms for the future. We consider the restructuring phase to be behind us."

Looking ahead, the Company sees markets that are recovering driving expectations for high single digit growth in its core bar, plate and tubing product lines. Aerospace markets continue to be sluggish, but there is a modest optimism for later in the year. Plastics are expected to grow double digits for the year.

A.M. Castle & Co.
Add Two

In the metals markets, which account for almost 90% of the Company's sales, deflation turned to inflation in the last 60 days of 2003. Bar, plate and tubing lines, and all nickel alloys have experienced mill price increases in the range of 5 to 8% and in some cases more over the last four months and are expected to increase further in the second quarter. Plastics' pricing has remained relatively stable. There will be a lag between material cost increases and selling price increases, which vary by product line and by customer. The full impact will not be realized until the second quarter and the second half is still uncertain. However, the impact of price is expected to further enhance the real growth expectations.

Sales are running ahead of our 2003 daily levels by rates in the high teens, said Mr. McKane. Factoring out price increases, real growth is still in the double-digit range. With the lower expense base and higher productivity we've built into our business over the last three years, we expect to report first quarter results that show significant year-over-year increases in EBITDA and a return to profitability for the first time in a year and a half.

Edgar Filing: CASTLE A M & CO - Form 8-K

McKane also announced that the Company has reached agreement to acquire the remaining interest in its Castle de Mexico joint venture. "We are excited about the Mexican joint venture," said Stephen V. Hooks, newly appointed Chief Operating Office of Castle Metals. "Durable goods manufacturing in Mexico is a growth market and Castle de Mexico gives Castle the vehicle to serve U.S. manufacturing customers who migrate a portion of their operations to Mexico." The Mexican operations will be consolidated effective January 2004.

In closing, Mr. McKane stated that the Company expects to mail its annual report and 10-K to shareholders around March 15, 2004 and invited interested parties to listen to its conference call scheduled for 11:00 (EST) today, Tuesday, February 24, 2004. Connection is available at www.amcastle.com and will be available for 14 days following the call.

Founded in 1890, A. M. Castle & Co. provides highly engineered materials and value added services to a wide range of companies within the producer durable equipment sector of the economy. Its customer base includes many Fortune 500 companies as well as thousands of medium and smaller-sized firms spread across a wide spectrum of industries. Within its core metals business, it specializes in the distribution of carbon, alloy and stainless steels; nickel alloy; aluminum; titanium; copper and brass. Through its subsidiary, Total Plastics, Inc., the Company also distributes a broad range of value-added industrial plastics. Together, Castle operates over 40 locations throughout North America. Its common stock is traded on the American and Chicago Stock Exchange under the ticker symbol "CAS".

This release may contain forward-looking statements relating to future financial results. Actual results may differ materially as a result of factors over which the company has no control. These risk factors and additional information are included in the company's reports on file with the Securities and Exchange Commission.

Financial tables to follow.
