

VALLEY NATIONAL BANCORP
Form 10-Q
August 07, 2017

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, DC 20549

FORM 10-Q

(Mark One)

Quarterly Report Pursuant to Section 13 or 15 (d) of the Securities Exchange Act of 1934
For the Quarterly Period Ended June 30, 2017

OR

Transition Report Pursuant to Section 13 or 15 (d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____
Commission File Number 1-11277

VALLEY NATIONAL BANCORP
(Exact name of registrant as specified in its charter)

New Jersey 22-2477875
(State or other jurisdiction of (I.R.S. Employer
Incorporation or Organization) Identification Number)

1455 Valley Road 07470
Wayne, NJ
(Address of principal executive office) (Zip code)
973-305-8800
(Registrant's telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files.) Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act (check one):

Large accelerated filer Accelerated filer Emerging growth company

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date. Common Stock (no par value), of which 264,029,734 shares were outstanding as of August 3, 2017

VALLEY NATIONAL BANCORP
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1. Basis of Presentation

The unaudited consolidated financial statements of Valley National Bancorp, a New Jersey corporation ("Valley"), include the accounts of its commercial bank subsidiary, Valley National Bank (the "Bank"), and all of Valley's direct or indirect wholly-owned subsidiaries. All inter-company transactions and balances have been eliminated. The accounting and reporting policies of Valley conform to U.S. generally accepted accounting principles (U.S. GAAP) and general practices within the financial services industry. In accordance with applicable accounting standards, Valley does not consolidate statutory trusts established for the sole purpose of issuing trust preferred securities and related trust common securities.

In the opinion of management, all adjustments (which include only normal recurring adjustments) necessary to present fairly Valley's financial position, results of operations and cash flows at June 30, 2017 and for all periods presented have been made. The results of operations for the three and six months ended June 30, 2017 are not necessarily indicative of the results to be expected for the entire fiscal year.

In preparing the unaudited consolidated financial statements in conformity with U.S. GAAP, management has made estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the consolidated statements of financial condition and results of operations for the periods indicated. Material estimates that are particularly susceptible to change are: the allowance for loan losses; the evaluation of goodwill and other intangible assets, and investment securities for impairment; fair value measurements of assets and liabilities; and income taxes. Estimates and assumptions are reviewed periodically and the effects of revisions are reflected in the consolidated financial statements in the period they are deemed necessary. While management uses its best judgment, actual amounts or results could differ significantly from those estimates. The current economic environment has increased the degree of uncertainty inherent in these material estimates.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. GAAP and industry practice have been condensed or omitted pursuant to rules and regulations of the SEC. These financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in Valley's Annual Report on Form 10-K for the year ended December 31, 2016.

On April 27, 2017, Valley's shareholders approved an amendment to Valley's Restated Certificate of Incorporation to increase the authorized shares of common stock and preferred stock to 450,000,000 shares and 50,000,000 shares, respectively.

Note 2. Earnings Per Common Share

The following table shows the calculation of both basic and diluted earnings per common share for the three and six months ended June 30, 2017 and 2016.

| | Three Months Ended | | Six Months Ended | |
|--|---------------------------------------|-------------|------------------|-------------|
| | June 30, | | June 30, | |
| | 2017 | 2016 | 2017 | 2016 |
| | (in thousands, except for share data) | | | |
| Net income available to common shareholders | \$48,268 | \$ 37,230 | \$92,566 | \$ 71,620 |
| Basic weighted average number of common shares outstanding | 263,958,252 | 254,381,170 | 263,878,154 | 228,260 |
| Plus: Common stock equivalents | 819,950 | 390,043 | 784,760 | 347,613 |
| Diluted weighted average number of common shares outstanding | 264,778,202 | 254,771,213 | 264,662,914 | 254,575,873 |
| Earnings per common share: | | | | |
| Basic | \$0.18 | \$ 0.15 | \$0.35 | \$ 0.28 |
| Diluted | 0.18 | 0.15 | 0.35 | 0.28 |

Common stock equivalents represent the dilutive effect of additional common shares issuable upon the assumed vesting or exercise, if applicable, of performance-based restricted stock units, common stock options and warrants to purchase Valley's common shares. Common stock options and warrants with exercise prices that exceed the average market price of Valley's common stock during the periods presented have an anti-dilutive effect on the diluted earnings per common share calculation and therefore are excluded from the diluted earnings per share calculation. Anti-dilutive common stock options and warrants equaled approximately 3.3 million shares for both the three and six months ended June 30, 2017 and 4.6 million shares for both the three and six months ended June 30, 2016, respectively.

Note 3. Accumulated Other Comprehensive Loss

The following table presents the after-tax changes in the balances of each component of accumulated other comprehensive loss for the three and six months ended June 30, 2017.

| | Components of Accumulated Other Comprehensive Loss | | | | Total Accumulated Other Comprehensive Loss |
|--|---|---|--|------------------------------------|--|

| Balance at March 31, 2017 | \$(8,774) | \$ (616) | \$ (10,862) | \$ (18,834) | \$ (39,086) |
| Other comprehensive income before reclassifications | 1,896 | 21 | (873) | — | 1,044 |
| Amounts reclassified from other comprehensive income | (13) | (39) | 1,356 | 59 | 1,363 |
| Other comprehensive income, net | 1,883 | (18) | 483 | 59 | 2,407 |
| Balance at June 30, 2017 | \$(6,891) | \$ (634) | \$ (10,379) | \$ (18,775) | \$ (36,679) |

| | Components of Accumulated Other Comprehensive Loss | | | | Total Accumulated Other Comprehensive Loss |
|---|---|---|--|------------------------------------|--|
| | Unrealized Gains and Losses on Available for (AFS) Securities (in thousands) | Non-credit Impairment Losses on AFS Securities | Unrealized Gains and (Losses) on Derivatives | Defined Benefit Pension Plan | |
| Balance at December 31, 2016 | \$ (10,094) | \$ (642) | \$ (12,464) | \$ (18,893) | \$ (42,093) |
| Other comprehensive income before reclassifications | 3,203 | 134 | (746) | — | 2,591 |
| Amounts reclassified from other comprehensive income | — | (126) | 2,831 | 118 | 2,823 |
| Other comprehensive income, net | 3,203 | 8 | 2,085 | 118 | 5,414 |
| Balance at June 30, 2017 | \$ (6,891) | \$ (634) | \$ (10,379) | \$ (18,775) | \$ (36,679) |

The following table presents amounts reclassified from each component of accumulated other comprehensive loss on a gross and net of tax basis for the three and six months ended June 30, 2017 and 2016.

| Components of Accumulated Other Comprehensive Loss | Amounts Reclassified from Accumulated Other Comprehensive Loss | | | | Income Statement Line Item |
|--|--|-------------|------------------------------|-------------|--|
| | Three Months Ended June 30, | | Six Months Ended June 30, | | |
| | 2017 | 2016 | 2017 | 2016 | |
| | (in thousands) | | | | |
| Unrealized gains (losses) on AFS securities before tax | 22 | \$ (3) | (1) | 268 | Gains (losses) on securities transactions, net |
| Tax effect | (9) | 1 | 1 | (100) | |
| Total net of tax | 13 | (2) | — | 168 | |
| Non-credit impairment losses on AFS securities before tax: | | | | | |
| Accretion of credit loss impairment due to an increase in expected cash flows | 67 | — | 215 | 489 | Interest and dividends on investment securities (taxable) |
| Tax effect | (28) | — | (89) | (203) | |
| Total net of tax | 39 | — | 126 | 286 | |
| Unrealized losses on derivatives (cash flow hedges) before tax | (2,314) | (3,597) | (4,832) | (6,568) | Interest expense |
| Tax effect | 958 | 1,490 | 2,001 | 2,720 | |
| Total net of tax | (1,356) | (2,107) | (2,831) | (3,848) | |
| Defined benefit pension plan: | | | | | |
| Amortization of net loss | (101) | (72) | (202) | (144) | * |
| Tax effect | 42 | 29 | 84 | 58 | |
| Total net of tax | (59) | (43) | (118) | (86) | |
| Total reclassifications, net of tax | \$ (1,363) | \$ (2,152) | \$ (2,823) | \$ (3,480) | |

* Amortization of net loss is included in the computation of net periodic pension cost.

Note 4. New Authoritative Accounting Guidance

Accounting Standards Update (ASU) No. 2017-08, "Receivables—Nonrefundable Fees and Other Costs (Subtopic 310-20) Premium Amortization on Purchased Callable Debt Securities" shortens the amortization period for certain callable debt securities held at a premium. ASU No. 2017-08 requires the premium to be amortized to the earliest call date. The accounting for securities held at a discount does not change and the discount continues to be amortized as an adjustment to yield over the contractual life (to maturity) of the instrument. ASU No. 2017-08 is effective for Valley for the annual and interim reporting periods beginning January 1, 2018 with early adoption permitted, and is to be applied retrospectively. ASU No. 2017-08 is not expected to have a significant impact on Valley's consolidated financial statements.

ASU No. 2017-07, "Compensation—Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost" requires service cost to be reported in the same financial statement line item(s) as other current employee compensation costs. All other components of expense must be presented separately from service cost, and outside any subtotal of income from operations. Only the service cost component of expense is eligible to be capitalized. ASU No. 2017-07 is effective for Valley for its annual and interim reporting periods beginning January 1, 2018 with early adoption permitted. ASU No. 2017-07 is not expected to have a significant impact on the presentation on Valley's consolidated financial statements.

ASU No. 2017-04, "Intangibles—Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment" eliminates the requirement to calculate the implied fair value of goodwill (i.e., Step 2 of the current goodwill impairment test guidance) to measure a goodwill impairment charge. Instead, an entity will be required to record an impairment charge based on the excess of a reporting unit's carrying amount over its fair value (i.e., measure the charge based on Step 1 of the current guidance). In addition, ASU No. 2017-04 eliminates the requirements for any reporting unit with a zero or negative carrying amount to perform a qualitative assessment and, if it fails that qualitative test, to perform Step 2 of the goodwill impairment test. However, an entity will be required to disclose the amount of goodwill allocated to each reporting unit with a zero or negative carrying amount of net assets. An entity still has the option to perform the qualitative assessment for a reporting unit to determine if the quantitative impairment test is necessary. ASU No. 2017-04 is effective for Valley for its annual or any interim goodwill impairment tests in fiscal years beginning January 1, 2020 and is not expected to have a significant impact on the presentation of Valley's consolidated financial statements. Early adoption is permitted for annual and interim goodwill impairment testing dates after January 1, 2017.

ASU No. 2016-15, "Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments" clarifies on how certain cash receipts and cash payments should be classified and presented in the statement of cash flow. The ASU No. 2016-15 includes guidance on eight specific cash flow issues with the objective of reducing the existing diversity in practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. ASU No. 2016-15 is effective for Valley for annual and interim reporting periods beginning January 1, 2018 and it should be applied using a retrospective transition method to each period presented. ASU No. 2016-15 is not expected to have a significant impact on the presentation of Valley's consolidated statements of cash flows.

ASU No. 2016-13, "Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments" amends the accounting guidance on the impairment of financial instruments. The ASU No. 2016-13 adds to U.S. GAAP an impairment model (known as the current expected credit loss (CECL) model) that is based on expected losses rather than incurred losses. Under the new guidance, an entity is required to measure all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. ASU No. 2016-13 is effective for Valley for reporting periods beginning January 1, 2020. Management is currently evaluating the impact of the ASU on Valley's consolidated financial

statements. Valley expects that the new guidance will result in an increase in its allowance for credit losses due to several factors, including: (i) the allowance related to Valley loans will increase to include credit losses over the full remaining expected life of the portfolio, and will consider expected future changes in macroeconomic conditions, (ii) the nonaccretable difference (as defined in Note 7) on PCI loans will be recognized as an allowance,

offset by an increase in the carrying value of the related loans, and (iii) an allowance will be established for estimated credit losses on investment securities classified as held to maturity. The extent of the increase is under evaluation, but will depend upon the nature and characteristics of the Valley's loan and investment portfolios at the adoption date, and the economic conditions and forecasts at that date.

ASU No. 2016-09, "Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting" simplifies several aspects of the stock compensation guidance in Topic 718 and other related guidance. The amendments focus on income tax accounting upon vesting or exercise of share-based payments, award classification, liability classification exception for statutory tax withholding requirements, recognition methods for forfeitures within stock compensation expense, and the cash flow presentation. Amendments related to the presentation of employee taxes paid on the statement of cash flows when an employer withholds shares to meet the minimum statutory withholding requirement should be applied retrospectively. Amendments requiring recognition of excess tax benefits and tax deficiencies in the income statement and the practical expedient for estimating expected term should be applied prospectively. ASU No. 2016-09 became effective for Valley for reporting periods after January 1, 2017 and did not have a significant impact on Valley's consolidated financial statements. At adoption, Valley elected to apply the amendments related to the presentation of excess tax benefits on the statement of cash flows using the prospective transition method. Valley also elected to continue to estimate the forfeitures of stock awards as a component of total stock compensation expense based on the number of awards that are expected to vest.

ASU No. 2016-02, "Leases (Topic 842)" requires the recognition of a right of use asset and related lease liability by lessees for leases classified as operating leases under current GAAP. Topic 842, which replaces the current guidance under Topic 840, retains a distinction between finance leases and operating leases. The recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee also will not significantly change from current GAAP. For leases with a term of 12 months or less, a lessee is permitted to make an accounting policy election by class of underlying asset not to recognize right of use assets and lease liabilities. Topic 842 will be effective for Valley for reporting periods beginning January 1, 2019, with an early adoption permitted. Valley must apply a modified retrospective transition approach for the applicable leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The modified retrospective approach would not require any transition accounting for leases that expired before the earliest comparative period presented. Management is currently evaluating the impact of Topic 842 on Valley's consolidated financial statements by reviewing its existing lease contracts and service contracts that may include embedded leases. Valley expects a gross-up of its consolidated statements of financial condition as a result of recognizing lease liabilities and right of use assets; the extent of such gross-up is under evaluation. Valley does not expect material changes to the recognition of operating lease expense in its consolidated statements of income.

ASU No. 2016-01, "Financial Instruments - Overall (Subtopic 825-10) - Recognition and Measurement of Financial Assets and Financial Liabilities" requires that: (i) equity investments with readily determinable fair values must be measured at fair value with changes in fair value recognized in net income, (ii) equity investments without readily determinable fair values must be measured at either fair value or at cost adjusted for changes in observable prices minus impairment with changes in value under either of these methods recognized in net income, (iii) entities that record financial liabilities at fair value due to a fair value option election must recognize changes in fair value in other comprehensive income if it is related to instrument-specific credit risk, and (iv) entities must assess whether a valuation allowance is required for deferred tax assets related to available-for-sale debt securities. ASU No. 2016-01 is effective for Valley for reporting periods beginning January 1, 2018 and is not expected to have a material effect on Valley's consolidated financial statements.

ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)" implements a common revenue standard that clarifies the principles for recognizing revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or

services. In 2016, the Financial Accounting Standards Board issued ASU No. 2016-08, “Revenue from Contracts with Customers (Topic 606) - Principal versus Agent Considerations (Reporting Revenue Gross versus Net)” and ASU No. 2016-10, “Revenue from Contracts with Customers (Topic 606) - Identifying Performance Obligations

and Licensing,” to further clarify the new guidance under Topic 606. ASU No. 2014-09 and its aforementioned amendments are effective on January 1, 2018. While Valley has not identified any material changes in the timing of revenue recognition under the new guidance, its review is ongoing. However, Valley does not expect the new revenue guidance to have a significant impact on its consolidated financial statements.

Note 5. Fair Value Measurement of Assets and Liabilities

Accounting Standards Codification (ASC) Topic 820, “Fair Value Measurements and Disclosures,” establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

- Level 1 Unadjusted exchange quoted prices in active markets for identical assets or liabilities, or identical liabilities traded as assets that the reporting entity has the ability to access at the measurement date.
- Level 2 Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly (i.e., quoted prices on similar assets), for substantially the full term of the asset or liability.
- Level 3 Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

Assets and Liabilities Measured at Fair Value on a Recurring and Non-Recurring Basis

The following tables present the assets and liabilities that are measured at fair value on a recurring and nonrecurring basis by level within the fair value hierarchy as reported on the consolidated statements of financial condition at June 30, 2017 and December 31, 2016. The assets presented under “nonrecurring fair value measurements” in the table below are not measured at fair value on an ongoing basis but are subject to fair value adjustments under certain circumstances (e.g., when an impairment loss is recognized).

| | June 30, 2017 | Fair Value Measurements at Reporting Date Using: | | |

| Total | \$16,406 | \$ — | \$ — | \$ 16,406 |

Represents loans originated for sale (which consist of residential mortgage loans) that are carried at fair value and (1) had contractual unpaid principal balances totaling approximately \$17.5 million and \$58.2 million at June 30, 2017 and December 31, 2016, respectively.

(2) Derivative financial instruments are included in this category.

(3) Excludes PCI loans.

The changes in Level 3 assets measured at fair value on a recurring basis for the three and six months ended June 30, 2017 and 2016 are summarized below:

| | Available for Sale Securities | | | |
|---|-------------------------------|----------|---------------------------|----------|
| | Three Months Ended June 30, | | Six Months Ended June 30, | |
| | 2017 | 2016 | 2017 | 2016 |
| | (in thousands) | | | |
| Balance, beginning of the period | \$11,367 | \$12,949 | \$11,888 | \$13,793 |
| Total net (losses) gains included in other comprehensive income | (31) | 514 | 13 | (71) |
| Settlements, net | (606) | (362) | (1,171) | (621) |
| Balance, end of the period | \$10,730 | \$13,101 | \$10,730 | \$13,101 |

No changes in unrealized gains or losses on Level 3 securities were included in earnings during the three and six months ended June 30, 2017 and 2016. There were no transfers of assets into or out of Level 3, or between Level 1 and Level 2, during the three and six months ended June 30, 2017 and 2016.

There have been no material changes in the valuation methodologies used at June 30, 2017 from December 31, 2016.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following valuation techniques were used for financial instruments measured at fair value on a recurring basis. All the valuation techniques described below apply to the unpaid principal balance, excluding any accrued interest or dividends at the measurement date. Interest income and expense are recorded within the consolidated statements of income depending on the nature of the instrument using the effective interest method based on acquired discount or premium.

Available for sale securities.

All U.S. Treasury securities, certain corporate and other debt securities, and certain preferred equity securities are reported at fair value utilizing Level 1 inputs. The majority of other investment securities are reported at fair value utilizing Level 2 inputs. The prices for these instruments are obtained through an independent pricing service or dealer market participants with whom Valley has historically transacted both purchases and sales of investment securities. Prices obtained from these sources include prices derived from market quotations and matrix pricing. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things. Management reviews the data and assumptions used in pricing the securities by its third party provider to ensure the highest level of significant inputs are derived from market observable data. For certain securities, the inputs used by either dealer market participants or an independent pricing service may be derived from unobservable market information (Level 3 inputs). In these instances, Valley evaluates the appropriateness and quality of the assumption and the resulting price. In addition, Valley reviews the volume and level of activity for all available for sale and trading securities and attempts to identify transactions which may not be orderly or reflective of a significant level of activity and volume. For securities meeting these criteria, the quoted prices received from either market participants or an independent pricing service may be adjusted, as necessary, to estimate fair value and this results in fair values based on Level 3 inputs. In determining fair value, Valley utilizes unobservable inputs which reflect Valley's own assumptions about the inputs that market participants would use in pricing each security. In developing its assertion of market participant assumptions, Valley utilizes the best information that is both reasonable and available without undue cost and effort.

In calculating the fair value for the available for sale securities under Level 3, Valley prepared present value cash flow models for certain private label mortgage-backed securities. The cash flows for the residential mortgage-backed securities incorporated the expected cash flow of each security adjusted for default rates, loss severities and prepayments of the individual loans collateralizing the security.

The following table presents quantitative information about Level 3 inputs used to measure the fair value of these securities at June 30, 2017:

| Security Type | Valuation Technique | Unobservable Input | Range | Weighted Average |
|--|----------------------|--------------------|-------------|------------------|
| Private label mortgage-backed securities | Discounted cash flow | Prepayment rate | 6.2 - 31.6% | 19.8 % |
| | | Default rate | 2.6 - 36.7 | 7.5 |
| | | Loss severity | 47.2 - 66.0 | 60.4 |

Significant increases or decreases in any of the unobservable inputs in the table above in isolation would result in a significantly lower or higher fair value measurement of the securities. Generally, a change in the assumption used for the default rate is accompanied by a directionally similar change in the assumption used for the loss severity and a directionally opposite change in the assumption used for prepayment rates.

For the Level 3 available for sale residential mortgage-backed securities (consisting of 4 private label securities), cash flow assumptions incorporated independent third party market participant data based on vintage year for each security. The discount rate utilized in determining the present value of cash flows for the mortgage-backed securities was arrived at by combining the yield on orderly transactions for similar maturity government sponsored mortgage-backed securities with (i) the historical average risk premium of similar structured private label securities, (ii) a risk premium reflecting current market conditions, including liquidity risk, and (iii) if applicable, a forecasted loss premium derived from the expected cash flows of each security. The estimated cash flows for each private label mortgage-backed security were then discounted at the aforementioned effective rate to determine the fair value. The quoted prices received from either market participants or independent pricing services are weighted with the internal price estimate to determine the fair value of each instrument.

For the Level 3 available for sale trust preferred securities (consisting of one pooled security), the resulting estimated future cash flow was discounted at a yield determined by reference to similarly structured securities for which observable orderly transactions occurred. The discount rate was applied using a pricing matrix based on credit, security type and maturity characteristics to determine the fair value. The fair value calculation is received from an independent valuation adviser. In validating the fair value calculation from an independent valuation adviser, Valley reviews the accuracy of the inputs and the appropriateness of the unobservable inputs utilized in the valuation to ensure the fair value calculation is reasonable from a market participant perspective.

Loans held for sale. The conforming residential mortgage loans originated for sale are reported at fair value using Level 2 inputs. The fair values were calculated utilizing quoted prices for similar assets in active markets. To determine these fair values, the mortgages held for sale are put into multiple tranches, or pools, based on the coupon rate and maturity of each mortgage. The market prices for each tranche are obtained from both Fannie Mae and Freddie Mac. The market prices represent a delivery price, which reflects the underlying price each institution would pay Valley for an immediate sale of an aggregate pool of mortgages. The market prices received from Fannie Mae and Freddie Mac are then averaged and interpolated or extrapolated, where required, to calculate the fair value of each tranche. Depending upon the time elapsed since the origination of each loan held for sale, non-performance risk and changes therein were addressed in the estimate of fair value based upon the delinquency data provided to both Fannie Mae and Freddie Mac for market pricing and changes in market credit spreads. Non-performance risk did not materially impact the fair value of mortgage loans held for sale at June 30, 2017 and December 31, 2016 based on the

short duration these assets were held, and the high credit quality of these loans.

16

Derivatives. Derivatives are reported at fair value utilizing Level 2 inputs. The fair value of Valley's derivatives are determined using third party prices that are based on discounted cash flow analysis using observed market inputs, such as the LIBOR and Overnight Index Swap rate curves. The fair value of mortgage banking derivatives, consisting of interest rate lock commitments to fund residential mortgage loans and forward commitments for the future delivery of such loans (including certain loans held for sale at June 30, 2017 and December 31, 2016), is determined based on the current market prices for similar instruments provided by Fannie Mae and Freddie Mac. The fair values of most of the derivatives incorporate credit valuation adjustments, which consider the impact of any credit enhancements to the contracts, to account for potential nonperformance risk of Valley and its counterparties. The credit valuation adjustments were not significant to the overall valuation of Valley's derivatives at June 30, 2017 and December 31, 2016.

Assets and Liabilities Measured at Fair Value on a Non-recurring Basis

The following valuation techniques were used for certain non-financial assets measured at fair value on a nonrecurring basis, including impaired loans reported at the fair value of the underlying collateral, loan servicing rights and foreclosed assets, which are reported at fair value upon initial recognition or subsequent impairment as described below.

Impaired loans. Certain impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral and are commonly referred to as "collateral dependent impaired loans." Collateral values are estimated using Level 3 inputs, consisting of individual appraisals that may be adjusted based on certain discounting criteria. At June 30, 2017, certain appraisals were discounted based on specific market data by location and property type. During the quarter ended June 30, 2017, collateral dependent impaired loans were individually re-measured and reported at fair value through direct loan charge-offs to the allowance for loan losses and/or a specific valuation allowance allocation based on the fair value of the underlying collateral. The collateral dependent loan charge-offs to the allowance for loan losses totaled \$1.9 million and \$473 thousand for the three months ended June 30, 2017 and 2016, respectively, and \$2.1 million and \$952 thousand for the six months ended June 30, 2017 and 2016, respectively. At June 30, 2017, collateral dependent impaired loans with a total recorded investment of \$35.2 million were reduced by specific valuation allowance allocations totaling \$3.7 million to a reported total net carrying amount of \$31.5 million.

Loan servicing rights. Fair values for each risk-stratified group of loan servicing rights are calculated using a fair value model from a third party vendor that requires inputs that are both significant to the fair value measurement and unobservable (Level 3). The fair value model is based on various assumptions, including but not limited to, prepayment speeds, internal rate of return ("discount rate"), servicing cost, ancillary income, float rate, tax rate, and inflation. The prepayment speed and the discount rate are considered two of the most significant inputs in the model. At June 30, 2017, the fair value model used prepayment speeds (stated as constant prepayment rates) from 0 percent up to 25 percent and a discount rate of 8 percent for the valuation of the loan servicing rights. A significant degree of judgment is involved in valuing the loan servicing rights using Level 3 inputs. The use of different assumptions could have a significant positive or negative effect on the fair value estimate. Impairment charges are recognized on loan servicing rights when the amortized cost of a risk-stratified group of loan servicing rights exceeds the estimated fair value. Valley recorded net recoveries of net impairment charges on its loan servicing rights totaling \$50 thousand and \$51 thousand for the three and six months ended June 30, 2017, respectively, as compared to net impairment charges totaling \$265 thousand and \$457 thousand for three and six months ended June 30, 2016, respectively.

Foreclosed assets. Certain foreclosed assets (consisting of other real estate owned and other repossessed assets), upon initial recognition and transfer from loans, are re-measured and reported at fair value through a charge-off to the allowance for loan losses based upon the fair value of the foreclosed assets. The fair value of a foreclosed asset, upon initial recognition, is typically estimated using Level 3 inputs, consisting of an appraisal that is adjusted based on

certain discounting criteria, similar to the criteria used for impaired loans described above. There were no adjustments of the appraisals of foreclosed assets at June 30, 2017. At June 30, 2017, foreclosed assets included \$1.3 million of assets that were measured at fair value upon initial recognition or subsequently re-measured during

17

the quarter ended June 30, 2017. The foreclosed assets charge-offs to the allowance for loan losses totaled \$282 thousand and \$489 thousand for the three months ended June 30, 2017 and 2016, respectively, and \$994 thousand and \$922 thousand for six months ended June 30, 2017 and 2016, respectively. The re-measurement of foreclosed assets at fair value subsequent to their initial recognition resulted in net losses within non-interest expense of \$290 thousand for both the three and six months ended June 30, 2017, and \$295 thousand and \$912 thousand for three and six months ended June 30, 2016, respectively.

Other Fair Value Disclosures

ASC Topic 825, "Financial Instruments," requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis.

The fair value estimates presented in the following table were based on pertinent market data and relevant information on the financial instruments available as of the valuation date. These estimates do not reflect any premium or discount that could result from offering for sale at one time the entire portfolio of financial instruments. Because no market exists for a portion of the financial instruments, fair value estimates may be based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates are based on existing balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. For instance, Valley has certain fee-generating business lines (e.g., its mortgage servicing operation, trust and investment management departments) that were not considered in these estimates since these activities are not financial instruments. In addition, the tax implications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in any of the estimates.

The carrying amounts and estimated fair values of financial instruments not measured and not reported at fair value on the consolidated statements of financial condition at June 30, 2017 and December 31, 2016 were as follows:

| | Fair Value Hierarchy | June 30, 2017 | | December 31, 2016 | |
|--|----------------------|-----------------|------------|-------------------|------------|
| | | Carrying Amount | Fair Value | Carrying Amount | Fair Value |
| (in thousands) | | | | | |
| Financial assets | | | | | |
| Cash and due from banks | Level 1 | \$227,830 | \$ 227,830 | \$220,791 | \$ 220,791 |
| Interest bearing deposits with banks | Level 1 | 129,959 | 129,959 | 171,710 | 171,710 |
| Investment securities held to maturity: | | | | | |
| U.S. Treasury securities | Level 1 | 138,754 | 147,656 | 138,830 | 147,495 |
| U.S. government agency securities | Level 2 | 10,597 | 10,802 | 11,329 | 11,464 |
| Obligations of states and political subdivisions | Level 2 | 501,402 | 517,830 | 566,590 | 577,826 |
| Residential mortgage-backed securities | Level 2 | 1,070,137 | 1,062,008 | 1,112,460 | 1,102,802 |

| Long-term borrowings | Level 2 | 1,819,615 | 1,906,668 | 1,433,906 | 1,523,386 |
| Junior subordinated debentures issued to capital trusts | Level 2 | 41,658 | 46,298 | 41,577 | 45,785 |
| Accrued interest payable ⁽²⁾ | Level 1 | 10,931 | 10,931 | 10,675 | 10,675 |

(1) Included in other assets.

(2) Included in accrued expenses and other liabilities.

The following methods and assumptions were used to estimate the fair value of other financial assets and financial liabilities in the table above:

Cash and due from banks and interest bearing deposits with banks. The carrying amount is considered to be a reasonable estimate of fair value because of the short maturity of these items.

Investment securities held to maturity. Fair values are based on prices obtained through an independent pricing service or dealer market participants with whom Valley has historically transacted both purchases and sales of investment securities. Prices obtained from these sources include prices derived from market quotations and matrix pricing. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things (Level 2 inputs). Additionally, Valley reviews the volume and level of activity for all classes of held to maturity securities and attempts to identify transactions which may not be orderly or reflective of a significant level of activity and volume. For securities meeting these criteria, the quoted prices received from either market participants or an independent pricing service may be adjusted, as necessary. If applicable, the adjustment to fair value is derived based on present value cash flow model projections prepared by Valley utilizing assumptions similar to those incorporated by market participants.

Loans. Fair values of loans are estimated by discounting the projected future cash flows using market discount rates that reflect the credit and interest-rate risk inherent in the loan. The discount rate is a product of both the applicable index and credit spread, subject to the estimated current new loan interest rates. The credit spread component is static for all maturities and may not necessarily reflect the value of estimating all actual cash flows re-pricing. Projected future cash flows are calculated based upon contractual maturity or call dates, projected repayments and prepayments of principal. Fair values estimated in this manner do not fully incorporate an exit-price approach to fair value, but instead are based on a comparison to current market rates for comparable loans.

Accrued interest receivable and payable. The carrying amounts of accrued interest approximate their fair value due to the short-term nature of these items.

Federal Reserve Bank and Federal Home Loan Bank stock. Federal Reserve Bank and FHLB stock are non-marketable equity securities and are reported at their redeemable carrying amounts, which approximate fair value.

Deposits. The carrying amounts of deposits without stated maturities (i.e., non-interest bearing, savings, NOW, and money market deposits) approximate their estimated fair value. The fair value of time deposits is based on the discounted value of contractual cash flows using estimated rates currently offered for alternative funding sources of similar remaining maturity.

Short-term and long-term borrowings. The carrying amounts of certain short-term borrowings, including securities sold under agreements to repurchase and FHLB borrowings (and from time to time, federal funds purchased) approximate their fair values because they frequently re-price to a market rate. The fair values of other short-term and long-term borrowings are estimated by obtaining quoted market prices of the identical or similar financial instruments when available. When quoted prices are unavailable, the fair values of the borrowings are estimated by discounting the estimated future cash flows using current market discount rates of financial instruments with similar characteristics, terms and remaining maturity.

Junior subordinated debentures issued to capital trusts. The fair value of debentures issued to capital trusts is estimated utilizing the income approach, whereby the expected cash flows, over the remaining estimated life of the security, are discounted using Valley's credit spread over the current yield on a similar maturity of U.S. Treasury security or the three-month LIBOR for the variable rate indexed debentures (Level 2 inputs). The credit spread used to discount the expected cash flows was calculated based on the median current spreads for all fixed and variable publicly traded trust preferred securities issued by banks.

Note 6. Investment Securities

Held to Maturity

The amortized cost, gross unrealized gains and losses and fair value of securities held to maturity at June 30, 2017 and December 31, 2016 were as follows:

| | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |
|--|-------------------|------------------------------|-------------------------------|--------------|
| | (in thousands) | | | |
| June 30, 2017 | | | | |
| U.S. Treasury securities | \$ 138,754 | \$ 8,902 | \$— | \$ 147,656 |
| U.S. government agency securities | 10,597 | 205 | — | 10,802 |
| Obligations of states and political subdivisions: | | | | |
| Obligations of states and state agencies | 249,607 | 9,623 | (1,688) | 257,542 |
| Municipal bonds | 251,795 | 8,519 | (26) | 260,288 |
| Total obligations of states and political subdivisions | 501,402 | 18,142 | (1,714) | 517,830 |

| Trust preferred securities | 59,814 | 32 | (11,578) | 48,268 |
| Corporate and other debt securities | 41,559 | 927 | (318) | 42,168 |
| Total investment securities held to maturity | \$ 1,822,263 | \$ 35,866 | \$(29,397) | \$ 1,828,732 |
| December 31, 2016 | | | | |
| U.S. Treasury securities | \$ 138,830 | \$ 8,665 | \$— | \$ 147,495 |
| U.S. government agency securities | 11,329 | 135 | — | 11,464 |
| Obligations of states and political subdivisions: | | | | |
| Obligations of states and state agencies | 252,185 | 6,692 | (1,428) | 257,449 |
| Municipal bonds | 314,405 | 6,438 | (466) | 320,377 |
| Total obligations of states and political subdivisions | 566,590 | 13,130 | (1,894) | 577,826 |
| Residential mortgage-backed securities | 1,112,460 | 8,432 | (18,090) | 1,102,802 |
| Trust preferred securities | 59,804 | 40 | (12,554) | 47,290 |
| Corporate and other debt securities | 36,559 | 1,190 | (29) | 37,720 |
| Total investment securities held to maturity | \$ 1,925,572 | \$ 31,592 | \$(32,567) | \$ 1,924,597 |

The age of unrealized losses and fair value of related securities held to maturity at June 30, 2017 and December 31, 2016 were as follows:

| | Less than Twelve Months | | More than Twelve Months | | Total | |
|--|----------------------------|----------------------|----------------------------|----------------------|---------------|----------------------|
| | Fair Value | Unrealized Losses | Fair Value | Unrealized Losses | Fair Value | Unrealized Losses |
| | (in thousands) | | | | | |
| June 30, 2017 | | | | | | |
| Obligations of states and political subdivisions: | | | | | | |
| Obligations of states and state agencies | \$63,537 | \$(1,688) | \$— | \$— | \$63,537 | \$(1,688) |
| Municipal bonds | 4,664 | (26) | — | — | 4,664 | (26) |
| Total obligations of states and political subdivisions | 68,201 | (1,714) | — | — | 68,201 | (1,714) |
| Residential mortgage-backed securities | 622,527 | (11,860) | 156,974 | (3,927) | 779,501 | (15,787) |
| Trust preferred securities | — | — | 36,883 | (11,578) | 36,883 | (11,578) |
| Corporate and other debt securities | 4,682 | (318) | — | — | 4,682 | (318) |
| Total | \$695,410 | \$(13,892) | \$193,857 | \$(15,505) | \$889,267 | \$(29,397) |
| December 31, 2016 | | | | | | |
| Obligations of states and political subdivisions: | | | | | | |
| Obligations of states and state agencies | \$98,114 | \$(1,428) | \$— | \$— | \$98,114 | \$(1,428) |
| Municipal bonds | 27,368 | (466) | — | — | 27,368 | (466) |
| Total obligations of states and political subdivisions | 125,482 | (1,894) | — | — | 125,482 | (1,894) |
| Residential mortgage-backed securities | 692,108 | (14,420) | 114,505 | (3,670) | 806,613 | (18,090) |
| Trust preferred securities | — | — | 45,898 | (12,554) | 45,898 | (12,554) |
| Corporate and other debt securities | 2,971 | (29) | — | — | 2,971 | (29) |
| Total | \$820,561 | \$(16,343) | \$160,403 | \$(16,224) | \$980,964 | \$(32,567) |

The unrealized losses on investment securities held to maturity are primarily due to changes in interest rates (including, in certain cases, changes in credit spreads) and, in some cases, lack of liquidity in the marketplace. Within the held to maturity portfolio, the total number of security positions in an unrealized loss position was 121 at June 30, 2017 and 132 at December 31, 2016.

The unrealized losses within the residential mortgage-backed securities category of the held to maturity portfolio at June 30, 2017 mainly related to investment grade securities issued by Ginnie Mae.

The unrealized losses existing for more than twelve months for trust preferred securities at June 30, 2017 primarily related to four non-rated single-issuer trust preferred securities issued by bank holding companies. All single-issuer trust preferred securities classified as held to maturity are paying in accordance with their terms, have no deferrals of interest or defaults and, if applicable, the issuers meet the regulatory capital requirements to be considered “well-capitalized institutions” at June 30, 2017.

Management does not believe that any individual unrealized loss as of June 30, 2017 included in the table above represents other-than-temporary impairment as management mainly attributes the declines in fair value to changes in interest rates and market volatility, not credit quality or other factors. Based on a comparison of the present value of expected cash flows to the amortized cost, management believes there are no credit losses on these securities. Valley does not have the intent to sell, nor is it more likely than not that Valley will be required to sell, the securities contained in the table above before the recovery of their amortized cost basis or maturity.

As of June 30, 2017, the fair value of investments held to maturity that were pledged to secure public deposits, repurchase agreements, lines of credit, and for other purposes required by law, was \$997.2 million.

The contractual maturities of investments in debt securities held to maturity at June 30, 2017 are set forth in the table below. Maturities may differ from contractual maturities in residential mortgage-backed securities because the mortgages underlying the securities may be prepaid without any penalties. Therefore, residential mortgage-backed securities are not included in the maturity categories in the following summary.

| | June 30, 2017 | |
|--|----------------|-------------|
| | Amortized Cost | Fair Value |
| | (in thousands) | |
| Due in one year | \$53,859 | \$54,621 |
| Due after one year through five years | 210,615 | 218,428 |
| Due after five years through ten years | 325,933 | 343,717 |
| Due after ten years | 161,719 | 149,958 |
| Residential mortgage-backed securities | 1,070,137 | 1,062,008 |
| Total investment securities held to maturity | \$1,822,263 | \$1,828,732 |

Actual maturities of debt securities may differ from those presented above since certain obligations provide the issuer the right to call or prepay the obligation prior to scheduled maturity without penalty.

The weighted-average remaining expected life for residential mortgage-backed securities held to maturity was 7.5 years at June 30, 2017.

Available for Sale

The amortized cost, gross unrealized gains and losses and fair value of securities available for sale at June 30, 2017 and December 31, 2016 were as follows:

| | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |
|--|-------------------|------------------------------|-------------------------------|-------------|
| | (in thousands) | | | |
| June 30, 2017 | | | | |

| Municipal bonds | 42,573 | (506) | 11,081 | (261) | 53,654 | (767) |
| Total obligations of states and political subdivisions | 71,201 | (910) | 11,834 | (281) | 83,035 | (1,191) |
| Residential mortgage-backed securities | 788,030 | (11,889) | 132,718 | (4,457) | 920,748 | (16,346) |
| Trust preferred securities | — | — | 8,009 | (2,155) | 8,009 | (2,155) |
| Corporate and other debt securities | 32,292 | (294) | 15,192 | (228) | 47,484 | (522) |
| Equity securities | — | — | 14,883 | (761) | 14,883 | (761) |
| Total | \$942,713 | \$(14,532) | \$186,670 | \$(7,884) | \$1,129,383 | \$(22,416) |

The unrealized losses on investment securities available for sale are primarily due to changes in interest rates (including, in certain cases, changes in credit spreads) and, in some cases, lack of liquidity in the marketplace. The total number of security positions in the securities available for sale portfolio in an unrealized loss position at June 30, 2017 was 274 as compared to 298 at December 31, 2016.

The unrealized losses for the residential mortgage-backed securities category of the available for sale portfolio at June 30, 2017 largely related to several investment grade residential mortgage-backed securities mainly issued by Ginnie Mae.

The unrealized losses more than twelve months for trust preferred securities at June 30, 2017 in the table above largely relate to 2 pooled trust preferred securities with an amortized cost of \$7.8 million and a fair value of \$6.2 million. One of the two pooled trust preferred securities had unrealized loss of \$703 thousand and an investment grade rating at June 30, 2017.

As of June 30, 2017, the fair value of securities available for sale that were pledged to secure public deposits, repurchase agreements, lines of credit, and for other purposes required by law, was \$703.9 million.

The contractual maturities of investment securities available for sale at June 30, 2017 are set forth in the following table. Maturities may differ from contractual maturities in residential mortgage-backed securities because the mortgages underlying the securities may be prepaid without any penalties. Therefore, residential mortgage-backed securities are not included in the maturity categories in the following summary.

| | June 30, 2017 | |
|--|----------------|-------------|
| | Amortized Cost | Fair Value |
| | (in thousands) | |
| Due in one year | \$24,831 | \$24,752 |
| Due after one year through five years | 70,802 | 74,052 |
| Due after five years through ten years | 115,497 | 114,927 |
| Due after ten years | 80,109 | 78,821 |
| Residential mortgage-backed securities | 1,175,171 | 1,163,720 |
| Equity securities | 10,505 | 10,782 |
| Total investment securities available for sale | \$1,476,915 | \$1,467,054 |

Actual maturities of debt securities may differ from those presented above since certain obligations provide the issuer the right to call or prepay the obligation prior to scheduled maturity without penalty.

The weighted average remaining expected life for residential mortgage-backed securities available for sale was 9.1 years at June 30, 2017.

Other-Than-Temporary Impairment Analysis

Valley records impairment charges on its investment securities when the decline in fair value is considered other-than-temporary. Numerous factors, including lack of liquidity for re-sales of certain investment securities; decline in the creditworthiness of the issuer; absence of reliable pricing information for investment securities; adverse changes in business climate; adverse actions by regulators; prolonged decline in value of equity investments; or unanticipated changes in the competitive environment could have a negative effect on Valley's investment portfolio and may result in other-than-temporary impairment on certain investment securities in future periods. Valley's investment portfolios include private label mortgage-backed securities, trust preferred securities principally issued by bank holding companies (including two pooled trust preferred securities) and corporate bonds issued by banks. These investments may pose a higher risk of future impairment charges by Valley as a result of the unpredictable nature of the U.S. economy and its potential negative effect on the future performance of the security issuers and, if applicable, the underlying mortgage loan collateral of the security.

There were no other-than-temporary impairment losses on securities recognized in earnings for the three and six months ended June 30, 2017 and 2016. At June 30, 2017, four previously impaired private label mortgage-backed securities (prior to December 31, 2012) had a combined amortized cost and fair value of \$9.1 million and \$8.9 million, respectively, while one previously impaired pooled trust preferred security had an amortized cost and fair value of \$2.8 million and \$1.9 million, respectively. The previously impaired pooled trust preferred security was not accruing interest during the three and six months ended June 30, 2017 and 2016.

The following table presents the changes in the credit loss component of cumulative other-than-temporary impairment losses on debt securities classified as either held to maturity or available for sale that Valley has previously recognized in earnings, for which a portion of the impairment loss (non-credit factors) was recognized in other comprehensive income for the three and six months ended June 30, 2017 and 2016:

| | Three Months Ended June 30, 2017 | | Six Months Ended June 30, 2016 | |
|---|---|---------|---|---------|
| | 2017 | 2016 | 2017 | 2016 |
| | (in thousands) | | | |
| Balance, beginning of period | \$4,767 | \$5,348 | \$4,916 | \$5,837 |
| Accretion of credit loss impairment due to an increase in expected cash flows | (67) | — | (216) | (489) |
| Balance, end of period | \$4,700 | \$5,348 | \$4,700 | \$5,348 |

The credit loss component of the impairment loss represents the difference between the present value of expected future cash flows and the amortized cost basis of the security prior to considering credit losses. The beginning balance represents the credit loss component for debt securities for which other-than-temporary impairment occurred prior to each period presented. The credit loss component increases if other-than-temporary impairments (initial and subsequent) are recognized in earnings for credit impaired debt securities. The credit loss component is reduced if (i) Valley receives cash flows in excess of what it expected to receive over the remaining life of the credit impaired debt security, (ii) the security matures, (iii) the security is fully written down, or (iv) Valley sells, intends to sell or believes it will be required to sell previously credit impaired debt securities.

Realized Gains and Losses

Gross gains and losses realized on sales, maturities and other investment securities transactions included in earnings were immaterial for the three and six months ended June 30, 2017 and 2016.

Note 7. Loans

The detail of the loan portfolio as of June 30, 2017 and December 31, 2016 was as follows:

| | June 30, 2017 | | | December 31, 2016 | | |
|------------------------------------|------------------|---------------|--------------|-------------------|---------------|--------------|
| | Non-PCI Loans | PCI Loans* | Total | Non-PCI Loans | PCI Loans* | Total |
| | (in thousands) | | | | | |
| Loans: | | | | | | |
| Commercial and industrial | \$2,417,924 | \$213,388 | \$2,631,312 | \$2,357,018 | \$281,177 | \$2,638,195 |
| Commercial real estate: | | | | | | |
| Commercial real estate | 8,201,235 | 1,029,279 | 9,230,514 | 7,628,328 | 1,091,339 | 8,719,667 |
| Construction | 825,196 | 55,877 | 881,073 | 710,266 | 114,680 | 824,946 |
| Total commercial real estate loans | 9,026,431 | 1,085,156 | 10,111,587 | 8,338,594 | 1,206,019 | 9,544,613 |
| Residential mortgage | 2,569,500 | 155,277 | 2,724,777 | 2,684,195 | 183,723 | 2,867,918 |
| Consumer: | | | | | | |
| Home equity | 369,372 | 81,138 | 450,510 | 376,213 | 92,796 | 469,009 |
| Automobile | 1,150,217 | 126 | 1,150,343 | 1,139,082 | 145 | 1,139,227 |
| Other consumer | 635,847 | 6,384 | 642,231 | 569,499 | 7,642 | 577,141 |
| Total consumer loans | 2,155,436 | 87,648 | 2,243,084 | 2,084,794 | 100,583 | 2,185,377 |
| Total loans | \$16,169,291 | \$1,541,469 | \$17,710,760 | \$15,464,601 | \$1,771,502 | \$17,236,103 |

*PCI loans include covered loans (mostly consisting of residential mortgage and commercial real estate loans) totaling \$44.5 million and \$70.4 million at June 30, 2017 and December 31, 2016, respectively.

Total loans (excluding PCI covered loans) include net unearned premiums and deferred loan costs of \$16.7 million and \$15.3 million at June 30, 2017 and December 31, 2016, respectively. The outstanding balances (representing contractual balances owed to Valley) for PCI loans totaled \$1.7 billion and \$1.9 billion at June 30, 2017 and December 31, 2016, respectively.

Valley transferred \$225.5 million of residential mortgage loans from the loan portfolio to loans held for sale during the six months ended June 30, 2017. Exclusive of such transfers, there were no sales of loans from the held for investment portfolio during the three and six months ended June 30, 2017 and 2016.

Purchased Credit-Impaired Loans (Including Covered Loans)

PCI loans are accounted for in accordance with ASC Subtopic 310-30 and are initially recorded at fair value (as determined by the present value of expected future cash flows) with no valuation allowance (i.e., the allowance for loan losses), and aggregated and accounted for as pools of loans based on common risk characteristics. The difference between the undiscounted cash flows expected at acquisition and the initial carrying amount (fair value) of the PCI loans, or the “accretable yield,” is recognized as interest income utilizing the level-yield method over the life of each pool. Contractually required payments for interest and principal that exceed the undiscounted cash flows expected at acquisition, or the “non-accretable difference,” are not recognized as a yield adjustment, as a loss accrual or a valuation allowance. Reclassifications of the non-accretable difference to the accretable yield may occur subsequent to the loan acquisition dates due to increases in expected cash flows of the loan pools. Valley's PCI loan portfolio included covered loans (i.e., loans in which the Bank will share losses with the FDIC under loss-sharing agreements) totaling \$44.5 million and \$70.4 million at June 30, 2017 and December 31, 2016, respectively.

The following table presents changes in the accretable yield for PCI loans during the three and six months ended June 30, 2017 and 2016:

| | Three Months Ended | | Six Months Ended | |
|------------------------------|--------------------|-----------|------------------|-----------|
| | June 30, 2017 | 2016 | June 30, 2017 | 2016 |
| | (in thousands) | | | |
| Balance, beginning of period | \$269,831 | \$387,120 | \$294,514 | \$415,179 |
| Accretion | (23,553) | (31,519) | (48,236) | (59,578) |
| Balance, end of period | \$246,278 | \$355,601 | \$246,278 | \$355,601 |

FDIC Loss-Share Receivable

The receivable arising from the loss-sharing agreements with the FDIC is measured separately from the covered loan portfolio because the agreements are not contractually part of the covered loans and are not transferable should the Bank choose to dispose of the covered loans. The FDIC loss share receivable (which is included in other assets on Valley's consolidated statements of financial condition) totaled \$7.1 million and \$7.2 million at June 30, 2017 and December 31, 2016, respectively.

Credit Risk Management

For all of its loan types, Valley adheres to a credit policy designed to minimize credit risk while generating the maximum income given the level of risk. Management reviews and approves these policies and procedures on a regular basis with subsequent approval by the Board of Directors annually. Credit authority relating to a significant dollar percentage of the overall portfolio is centralized and controlled by the Credit Risk Management Division and by the Credit Committee. Valley closely monitors economic conditions and loan performance trends to manage and evaluate its exposure to credit risk. A reporting system supplements the management review process by providing management with frequent reports concerning loan production, loan quality, internal loan classification, concentrations of credit, loan delinquencies, non-performing, and potential problem loans. Loan portfolio diversification is an important factor utilized by Valley to manage its risk across business sectors and through cyclical economic circumstances.

Credit Quality

The following table presents past due, non-accrual and current loans (excluding PCI loans, which are accounted for on a pool basis, and non-performing loans held for sale) by loan portfolio class at June 30, 2017 and December 31, 2016:

| | Past Due and Non-Accrual Loans | | Accruing Loans 90 Days or More Past Due | Non-Accrual Loans | Total Past Due Loans | Current Non-PCI Loans | Total Non-PCI Loans |

Impaired loans. Impaired loans, consisting of non-accrual commercial and industrial loans and commercial real estate loans over \$250 thousand and all loans which were modified in troubled debt restructuring, are individually evaluated for impairment. PCI loans are not classified as impaired loans because they are accounted for on a pool basis.

Edgar Filing: VALLEY NATIONAL BANCORP - Form 10-Q

The following table presents the information about impaired loans by loan portfolio class at June 30, 2017 and December 31, 2016:

| | Recorded Investment With No Allowance | Recorded Investment With Related Allowance | Total Recorded Investment | Unpaid Contractual Principal Balance | Related Allowance |

Interest income recognized on a cash basis (included in the table above) was immaterial for the three and six months ended June 30, 2017 and 2016.

Troubled debt restructured loans. From time to time, Valley may extend, restructure, or otherwise modify the terms of existing loans, on a case-by-case basis, to remain competitive and retain certain customers, as well as assist other customers who may be experiencing financial difficulties. If the borrower is experiencing financial difficulties and a concession has been made at the time of such modification, the loan is classified as a troubled debt restructured loan (TDR). Valley's PCI loans are excluded from the TDR disclosures below because they are evaluated for impairment on a pool by pool basis. When an individual PCI loan within a pool is modified as a TDR, it is not removed from its pool. All TDRs are classified as impaired loans and are included in the impaired loan disclosures above.

The majority of the concessions made for TDRs involve lowering the monthly payments on loans through either a reduction in interest rate below a market rate, an extension of the term of the loan without a corresponding adjustment to the risk premium reflected in the interest rate, or a combination of these two methods. The concessions rarely result in the forgiveness of principal or accrued interest. In addition, Valley frequently obtains additional collateral or guarantor support when modifying such loans. If the borrower has demonstrated performance under the previous terms of the loan and Valley's underwriting process shows the borrower has the capacity to continue to perform under the restructured terms, the loan will continue to accrue interest. Non-accruing restructured loans may be returned to accrual status when there has been a sustained period of repayment performance (generally six consecutive months of payments) and both principal and interest are deemed collectible.

Performing TDRs (not reported as non-accrual loans) totaled \$109.8 million and \$85.2 million as of June 30, 2017 and December 31, 2016, respectively. Non-performing TDRs totaled \$15.8 million and \$10.6 million as of June 30, 2017 and December 31, 2016, respectively.

The following tables present loans by loan portfolio class modified as TDRs during the three and six months ended June 30, 2017 and 2016. The pre-modification and post-modification outstanding recorded investments disclosed in the table below represent the loan carrying amounts immediately prior to the modification and the carrying amounts at June 30, 2017 and 2016, respectively.

| Troubled Debt Restructurings | Three Months Ended June 30, 2017 | | Three Months Ended June 30, 2016 | |
|------------------------------|---|---|---|--|

| Total | 65 | \$ 71,827 | 17 | \$ 15,391 |

The total TDRs presented in the above table had allocated specific reserves for loan losses totaling \$5.3 million and \$2.1 million at June 30, 2017 and 2016, respectively. These specific reserves are included in the allowance for loan losses for loans individually evaluated for impairment disclosed in Note 8. One commercial and industrial TDR loan totaling \$209 thousand was fully charged-off during the six months ended June 30, 2016. There were no charge-offs related to TDR modifications during the three and six months ended June 30, 2017.

The following table presents non-PCI loans modified as TDRs within the previous 12 months for which there was a payment default (90 days or more past due) during the three and six months ended June 30, 2017 and 2016.

| | Three Months Ended June 30, 2017 | Three Months Ended June 30, 2016 |

Credit quality indicators. Valley utilizes an internal loan classification system as a means of reporting problem loans within commercial and industrial, commercial real estate, and construction loan portfolio classes. Under Valley's internal risk rating system, loan relationships could be classified as "Pass," "Special Mention," "Substandard," "Doubtful," and "Loss." Substandard loans include loans that exhibit well-defined weakness and are characterized by the distinct possibility that Valley will sustain some loss if the deficiencies are not corrected. Loans classified as Doubtful have all the weaknesses inherent in those classified as Substandard with the added characteristic that the weaknesses present make collection or liquidation in full, based on currently existing facts, conditions and values, highly questionable and improbable. Loans classified as Loss are those considered uncollectible with insignificant value and are charged-off immediately to the allowance for loan losses, and, therefore, not presented in the table below. Loans that do not currently pose a sufficient risk to warrant classification in one of the aforementioned categories, but pose weaknesses that deserve management's close attention are deemed Special Mention. Loans rated as Pass do not currently pose any identified risk and can range from the highest to average quality, depending on the degree of potential risk. Risk ratings are updated any time the situation warrants.

The following table presents the risk category of loans (excluding PCI loans) by class of loans at June 30, 2017 and December 31, 2016.

| Credit exposure - by internally assigned risk rating | Pass | Special Mention | Substandard | Doubtful | Total Non-PCI Loans |

| December 31, 2016 | | | | | |
| Commercial and industrial | \$2,246,457 | \$44,316 | \$64,649 | \$1,596 | \$2,357,018 |
| Commercial real estate | 7,486,469 | 57,591 | 84,268 | — | 7,628,328 |
| Construction | 708,070 | 200 | 1,996 | — | 710,266 |
| Total | \$10,440,996 | \$102,107 | \$150,913 | \$1,596 | \$10,695,612 |

For residential mortgages, automobile, home equity and other consumer loan portfolio classes (excluding PCI loans), Valley also evaluates credit quality based on the aging status of the loan, which was previously presented, and by payment activity.

The following table presents the recorded investment in those loan classes based on payment activity as of June 30, 2017 and December 31, 2016:

| Credit exposure - by payment activity | Performing Loans | Non-Performing Loans | Total Non-PCI Loans |
|---------------------------------------|---------------------|-------------------------|------------------------|
| | (in thousands) | | |
| June 30, 2017 | | | |
| Residential mortgage | \$2,556,675 | \$12,825 | \$2,569,500 |
| Home equity | 368,066 | 1,306 | 369,372 |
| Automobile | 1,150,114 | 103 | 1,150,217 |
| Other consumer | 635,847 | — | 635,847 |
| Total | \$4,710,702 | \$14,234 | \$4,724,936 |
| December 31, 2016 | | | |
| Residential mortgage | \$2,672,120 | \$12,075 | \$2,684,195 |
| Home equity | 375,185 | 1,028 | 376,213 |
| Automobile | 1,138,936 | 146 | 1,139,082 |
| Other consumer | 569,499 | — | 569,499 |
| Total | \$4,755,740 | \$13,249 | \$4,768,989 |

Valley evaluates the credit quality of its PCI loan pools based on the expectation of the underlying cash flows of each pool, derived from the aging status and by payment activity of individual loans within the pool. The following table presents the recorded investment in PCI loans by class based on individual loan payment activity as of June 30, 2017 and December 31, 2016.

| Credit exposure - by payment activity | Performing | Non-Performing | Total |
|---------------------------------------|----------------|----------------|-------------|
| | Loans | Loans | PCI Loans |
| | (in thousands) | | |
| June 30, 2017 | | | |
| Commercial and industrial | \$201,297 | \$ 12,091 | \$213,388 |
| Commercial real estate | 1,014,923 | 14,356 | 1,029,279 |
| Construction | 54,775 | 1,102 | 55,877 |
| Residential mortgage | 150,031 | 5,246 | 155,277 |
| Consumer | 86,728 | 920 | 87,648 |
| Total | \$1,507,754 | \$ 33,715 | \$1,541,469 |
| December 31, 2016 | | | |
| Commercial and industrial | \$272,483 | \$ 8,694 | \$281,177 |
| Commercial real estate | 1,080,376 | 10,963 | 1,091,339 |
| Construction | 113,370 | 1,310 | 114,680 |
| Residential mortgage | 179,793 | 3,930 | 183,723 |
| Consumer | 98,469 | 2,114 | 100,583 |
| Total | \$1,744,491 | \$ 27,011 | \$1,771,502 |

Other real estate owned (OREO) totaled \$10.2 million at both June 30, 2017 and December 31, 2016 (including \$558 thousand of OREO properties which are subject to loss-sharing agreements with the FDIC at December 31, 2016). There were no covered OREO properties at June 30, 2017. OREO included foreclosed residential real estate properties totaling \$2.3 million and \$1.6 million at June 30, 2017 and December 31, 2016, respectively. Residential mortgage and consumer loans secured by residential real estate properties for which formal foreclosure proceedings are in process totaled \$6.2 million and \$7.1 million at June 30, 2017 and December 31, 2016, respectively.

Note 8. Allowance for Credit Losses

The allowance for credit losses consists of the allowance for loan losses and the allowance for unfunded letters of credit. Management maintains the allowance for credit losses at a level estimated to absorb probable loan losses of the loan portfolio and unfunded letter of credit commitments at the balance sheet date. The allowance for loan losses is based on ongoing evaluations of the probable estimated losses inherent in the loan portfolio, including unexpected additional credit impairment of PCI loan pools subsequent to acquisition. There was no allowance allocation for PCI loan losses at June 30, 2017 and December 31, 2016.

The following table summarizes the allowance for credit losses at June 30, 2017 and December 31, 2016:

| | June 30, | December 31, |
|--|----------------|--------------|
| | 2017 | 2016 |
| | (in thousands) | |
| Components of allowance for credit losses: | | |
| Allowance for loan losses | \$116,446 | \$ 114,419 |
| Allowance for unfunded letters of credit | 2,175 | 2,185 |
| Total allowance for credit losses | \$118,621 | \$ 116,604 |

The following table summarizes the provision for credit losses for the periods indicated:

| | Three Months Ended June 30, 2017 | | Six Months Ended June 30, 2016 | |
|--|---|---------|---|---------|
| | 2017 | 2016 | 2017 | 2016 |
| | (in thousands) | | | |
| Components of provision for credit losses: | | | | |
| Provision for loan losses | \$3,710 | \$1,363 | \$6,112 | \$2,092 |
| Provision for unfunded letters of credit | (78) | 66 | (10) | 137 |
| Total provision for credit losses | \$3,632 | \$1,429 | \$6,102 | \$2,229 |

The following table details activity in the allowance for loan losses by portfolio segment for the three and six months ended June 30, 2017 and 2016:

| | Commercial and Industrial | Commercial Real Estate | Residential Mortgage | Consumer | Total |
|-------------------------------------|------------------------------|---------------------------|-------------------------|----------|-----------|
| | (in thousands) | | | | |
| Three Months Ended June 30, 2017 | | | | | |
| Allowance for loan losses: | | | | | |
| Beginning balance | \$51,288 | \$56,302 | \$3,592 | \$4,261 | \$115,443 |
| Loans charged-off | (2,910) | (139) | (229) | (1,011) | (4,289) |
| Charged-off loans recovered | 312 | 640 | 235 | 395 | 1,582 |
| Net (charge-offs) recoveries | (2,598) | 501 | 6 | (616) | (2,707) |
| Provision for loan losses | 2,927 | (1,348) | 588 | 1,543 | 3,710 |
| Ending balance | \$51,617 | \$55,455 | \$4,186 | \$5,188 | \$116,446 |
| Three Months Ended June 30, 2016 | | | | | |
| Allowance for loan losses: | | | | | |
| Beginning balance | \$48,417 | \$48,454 | \$4,209 | \$4,335 | \$105,415 |
| Loans charged-off | (493) | (414) | (151) | (697) | (1,755) |
| Charged-off loans recovered | 990 | 1,458 | 94 | 523 | 3,065 |
| Net recoveries (charge-offs) | 497 | 1,044 | (57) | (174) | 1,310 |
| Provision for loan losses | (889) | 2,379 | (657) | 530 | 1,363 |
| Ending balance | \$48,025 | \$51,877 | \$3,495 | \$4,691 | \$108,088 |

| | Commercial and Industrial (in thousands) | Commercial Real Estate | Residential Mortgage | Consumer | Total |
|------------------------------|--|---------------------------|-------------------------|----------|------------|
| Six Months Ended | | | | | |
| June 30, 2017 | | | | | |
| Allowance for loan losses: | | | | | |
| Beginning balance | \$ 50,820 | \$ 55,851 | \$ 3,702 | \$ 4,046 | \$ 114,419 |
| Loans charged-off | (4,624) | (553) | (359) | (2,132) | (7,668) |
| Charged-off loans recovered | 1,160 | 782 | 683 | 958 | 3,583 |
| Net (charge-offs) recoveries | (3,464) | 229 | 324 | (1,174) | (4,085) |
| Provision for loan losses | 4,261 | (625) | 160 | 2,316 | 6,112 |
| Ending balance | \$ 51,617 | \$ 55,455 | \$ 4,186 | \$ 5,188 | \$ 116,446 |

| | | | | | |
|------------------------------|-----------|-----------|----------|----------|------------|
| Six Months Ended | | | | | |
| June 30, 2016 | | | | | |
| Allowance for loan losses: | | | | | |
| Beginning balance | \$ 48,767 | \$ 48,006 | \$ 4,625 | \$ 4,780 | \$ 106,178 |
| Loans charged-off | (1,744) | (519) | (232) | (1,771) | (4,266) |
| Charged-off loans recovered | 1,516 | 1,547 | 109 | 912 | 4,084 |
| Net (charge-offs) recoveries | (228) | 1,028 | (123) | (859) | (182) |
| Provision for loan losses | (514) | 2,843 | (1,007) | 770 | 2,092 |
| Ending balance | \$ 48,025 | \$ 51,877 | \$ 3,495 | \$ 4,691 | \$ 108,088 |

The following table represents the allocation of the allowance for loan losses and the related loans by loan portfolio segment disaggregated based on the impairment methodology at June 30, 2017 and December 31, 2016.

| | Commercial and Industrial (in thousands) | Commercial Real Estate | Residential Mortgage | Consumer | Total |
|---|--|---------------------------|-------------------------|--------------|---------------|
| June 30, 2017 | | | | | |
| Allowance for loan losses: | | | | | |
| Individually evaluated for impairment | \$ 6,746 | \$ 2,969 | \$ 582 | \$ 51 | \$ 10,348 |
| Collectively evaluated for impairment | 44,871 | 52,486 | 3,604 | 5,137 | 106,098 |
| Total | \$ 51,617 | \$ 55,455 | \$ 4,186 | \$ 5,188 | \$ 116,446 |
| Loans: | | | | | |
| Individually evaluated for impairment | \$ 60,237 | \$ 66,016 | \$ 16,189 | \$ 3,551 | \$ 145,993 |
| Collectively evaluated for impairment | 2,357,687 | 8,960,415 | 2,553,311 | 2,151,885 | 16,023,298 |
| Loans acquired with discounts related to credit quality | 213,388 | 1,085,156 | 155,277 | 87,648 | 1,541,469 |
| Total | \$ 2,631,312 | \$ 10,111,587 | \$ 2,724,777 | \$ 2,243,084 | \$ 17,710,760 |
| December 31, 2016 | | | | | |
| Allowance for loan losses: | | | | | |
| Individually evaluated for impairment | \$ 5,864 | \$ 3,872 | \$ 725 | \$ 70 | \$ 10,531 |
| Collectively evaluated for impairment | 44,956 | 51,979 | 2,977 | 3,976 | 103,888 |
| Total | \$ 50,820 | \$ 55,851 | \$ 3,702 | \$ 4,046 | \$ 114,419 |
| Loans: | | | | | |
| Individually evaluated for impairment | \$ 30,640 | \$ 62,289 | \$ 18,356 | \$ 3,534 | \$ 114,819 |
| Collectively evaluated for impairment | 2,326,378 | 8,276,305 | 2,665,839 | 2,081,260 | 15,349,782 |
| Loans acquired with discounts related to credit quality | 281,177 | 1,206,019 | 183,723 | 100,583 | 1,771,502 |
| Total | \$ 2,638,195 | \$ 9,544,613 | \$ 2,867,918 | \$ 2,185,377 | \$ 17,236,103 |

Note 9. Goodwill and Other Intangible Assets

Goodwill totaled \$690.6 million at both June 30, 2017 and December 31, 2016. There were no changes to the carrying amounts of goodwill allocated to Valley's business segments, or reporting units thereof, for goodwill impairment analysis (as reported in Valley's Annual Report on Form 10-K for the year ended December 31, 2016). There was no impairment of goodwill during the three and six months ended June 30, 2017 and 2016.

The following table summarizes other intangible assets as of June 30, 2017 and December 31, 2016:

| | Gross Intangible Assets (in thousands) | Accumulated Amortization | Valuation Allowance | Net Intangible Assets |
|-------------------------------|---|-----------------------------|------------------------|-----------------------------|
| June 30, 2017 | | | | |
| Loan servicing rights | \$75,413 | \$ (54,253) | \$ (849) | \$ 20,311 |
| Core deposits | 43,396 | (21,941) | — | 21,455 |
| Other | 4,087 | (2,153) | — | 1,934 |
| Total other intangible assets | \$122,896 | \$ (78,347) | \$ (849) | \$ 43,700 |
| December 31, 2016 | | | | |
| Loan servicing rights | \$73,002 | \$ (52,634) | \$ (900) | \$ 19,468 |
| Core deposits | 61,504 | (37,562) | — | 23,942 |
| Other | 4,087 | (2,013) | — | 2,074 |
| Total other intangible assets | \$138,593 | \$ (92,209) | \$ (900) | \$ 45,484 |

Loan servicing rights are accounted for using the amortization method. Under this method, Valley amortizes the loan servicing assets in proportion to, and over the period of, estimated net servicing revenues. On a quarterly basis, Valley stratifies its loan servicing assets into groupings based on risk characteristics and assesses each group for impairment based on fair value. Impairment charges on loan servicing rights are recognized in earnings when the book value of a stratified group of loan servicing rights exceeds its estimated fair value. See the "Assets and Liabilities Measured at Fair Value on a Non-recurring Basis" section of Note 5 for additional information regarding the fair valuation and impairment of loan servicing rights.

Core deposits are amortized using an accelerated method and have a weighted average amortization period of 11 years. The line item labeled "Other" included in the table above primarily consists of customer lists and covenants not to compete, which are amortized over their expected lives generally using a straight-line method and have a weighted average amortization period of approximately 20 years. Valley evaluates core deposits and other intangibles for impairment when an indication of impairment exists. No impairment was recognized during the three and six months ended June 30, 2017 and 2016.

The following table presents the estimated future amortization expense of other intangible assets for the remainder of 2017 through 2021:

| | Loan Servicing Rights | Core Deposits | Other |
|----------------|-----------------------------|------------------|--------|
| (in thousands) | | | |
| 2017 | \$2,719 | \$ 2,356 | \$ 139 |
| 2018 | 4,503 | 4,215 | 249 |
| 2019 | 3,557 | 3,671 | 235 |
| 2020 | 2,813 | 3,127 | 220 |
| 2021 | 2,115 | 2,582 | 206 |

Valley recognized amortization expense on other intangible assets, including net impairment (or recovery of impairment) charges on loan servicing rights, totaling approximately \$2.6 million and \$2.9 million for the three

39

months ended June 30, 2017 and 2016, respectively, and \$5.1 million and \$5.8 million for the six months ended June 30, 2017 and 2016, respectively.

Note 10. Stock-Based Compensation

Valley currently has one active employee stock option plan, the 2016 Long-Term Stock Incentive Plan (the "2016 Stock Plan"), adopted by Valley's Board of Directors on January 29, 2016 and approved by its shareholders on April 28, 2016. The purpose of the 2016 Plan is to provide additional incentive to officers and key employees of Valley and its subsidiaries, whose substantial contributions are essential to the continued growth and success of Valley, and to attract and retain competent and dedicated officers and other key employees whose efforts will result in the continued and long-term growth of Valley's business.

Under the 2016 Stock Plan, Valley may award shares of common stock in the form of stock appreciation rights, both incentive and non-qualified stock options, restricted stock and restricted stock units (RSUs) to its employees and non-employee directors. As of June 30, 2017, 7.3 million shares of common stock were available for issuance under the 2016 Stock Plan. The essential features of each award are described in the award agreement relating to that award. The grant, exercise, vesting, settlement or payment of an award may be based upon the fair value of Valley's common stock on the last sale price reported for Valley's common stock on such date or the last sale price reported preceding such date, except for performance-based awards with a market condition. The grant date fair values of performance-based awards that vest based on a market condition are determined by a third party specialist using a Monte Carlo valuation model.

Restricted Stock. Restricted stock is awarded to key employees, providing for the immediate award of our common stock subject to certain vesting and restrictions under the 2016 Stock Plan. Compensation expense is measured based on the grant-date fair value of the shares. Valley awarded time-based restricted stock totaling 482 thousand shares and 498 thousand shares during the six months ended June 30, 2017 and 2016, respectively, to both executive officers and key employees of Valley. The majority of the awards have vesting periods of three years. Generally, the restrictions on such awards lapse at an annual rate of one-third of the total award commencing with the first anniversary of the date of grant. The average grant date fair value of the restricted stock awards granted during the six months ended June 30, 2017 and 2016 was \$11.71 per share and \$8.77 per share, respectively.

Restricted Stock Units. Valley granted 371 thousand shares and 431 thousand shares of performance-based RSUs to certain executive officers for the six months ended June 30, 2017 and 2016, respectively. The performance-based awards vest based on (i) growth in tangible book value per share plus dividends (75 percent of performance shares) and (ii) total shareholder return as compared to our peer group (25 percent of performance shares). The performance based awards "cliff" vest after three years based on the cumulative performance of Valley during that time period. The RSUs earn dividend equivalents (equal to cash dividends paid on Valley's common stock) over the applicable performance period. Dividend equivalents and accrued interest (if applicable), per the terms of the agreements, are accumulated and paid to the grantee at the vesting date, or forfeited if the performance conditions are not met. The grant date fair value of the RSUs granted during the six months ended June 30, 2017 and 2016 was \$11.05 per share and \$8.32 per share, respectively.

Valley recorded total stock-based compensation expense of \$2.7 million and \$2.8 million for the three months ended June 30, 2017 and 2016, respectively, and \$6.9 million and \$5.2 million for the six months ended June 30, 2017 and 2016, respectively. The fair values of stock awards are expensed over the shorter of the vesting or required service period. As of June 30, 2017, the unrecognized amortization expense for all stock-based employee compensation totaled approximately \$16.5 million and will be recognized over an average remaining vesting period of 2.1 years.

Note 11. Derivative Instruments and Hedging Activities

Valley enters into derivative financial instruments to manage exposures that arise from business activities that result in the payment of future known and uncertain cash amounts, the value of which are determined by interest rates.

Cash Flow Hedges of Interest Rate Risk. Valley's objectives in using interest rate derivatives are to add stability to interest expense and to manage its exposure to interest rate movements. To accomplish this objective, Valley uses interest rate swaps and caps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges involve the payment of either fixed or variable-rate amounts in exchange for the receipt of variable or fixed-rate amounts from a counterparty, respectively. Interest rate caps designated as cash flow hedges involve the receipt of variable-rate amounts from a counterparty if interest rates rise above the strike rate on the contract in exchange for an up-front premium.

Fair Value Hedges of Fixed Rate Assets and Liabilities. Valley is exposed to changes in the fair value of certain of its fixed rate assets or liabilities due to changes in benchmark interest rates based on one-month LIBOR. From time to time, Valley uses interest rate swaps to manage its exposure to changes in fair value. Interest rate swaps designated as fair value hedges involve the receipt of variable rate payments from a counterparty in exchange for Valley making fixed rate payments over the life of the agreements without the exchange of the underlying notional amount. For derivatives that are designated and qualify as fair value hedges, the gain or loss on the derivative as well as the loss or gain on the hedged item attributable to the hedged risk are recognized in earnings. Valley includes the gain or loss on the hedged items in the same income statement line item as the loss or gain on the related derivatives.

Non-designated Hedges. Derivatives not designated as hedges may be used to manage Valley's exposure to interest rate movements or to provide service to customers but do not meet the requirements for hedge accounting under U.S. GAAP. Derivatives not designated as hedges are not entered into for speculative purposes.

Under a program, Valley executes interest rate swaps with commercial lending customers to facilitate their respective risk management strategies. These interest rate swaps with customers are simultaneously offset by interest rate swaps that Valley executes with a third party, such that Valley minimizes its net risk exposure resulting from such transactions. As the interest rate swaps associated with this program do not meet the strict hedge accounting requirements, changes in the fair value of both the customer swaps and the offsetting swaps are recognized directly in earnings.

At June 30, 2017, Valley has one "steepener" swap with a total current notional amount of \$14.5 million where the receive rate on the swap mirrors the pay rate on the brokered deposits and the rate paid on these types of hybrid instruments are based on a formula derived from the spread between the long and short ends of the constant maturity swap (CMS) rate curve. Although these types of instruments do not meet the hedge accounting requirements, the change in fair value of both the bifurcated derivative and the stand alone swap tend to move in opposite directions with changes in three-month LIBOR rate and therefore provide an effective economic hedge.

Valley regularly enters into mortgage banking derivatives which are non-designated hedges. These derivatives include interest rate lock commitments provided to customers to fund certain residential mortgage loans to be sold into the secondary market and forward commitments for the future delivery of such loans. Valley enters into forward commitments for the future delivery of residential mortgage loans when interest rate lock commitments are entered into in order to economically hedge the effect of future changes in interest rates on Valley's commitments to fund the loans as well as on its portfolio of mortgage loans held for sale.

Amounts included in the consolidated statements of financial condition related to the fair value of Valley's derivative financial instruments were as follows:

| | June 30, 2017 | | | December 31, 2016 | | |
|---|----------------|-------------------|-----------------|-------------------|-------------------|-----------------|
| | Fair Value | | Notional Amount | Fair Value | | Notional Amount |
| | Other Assets | Other Liabilities | | Other Assets | Other Liabilities | |
| | (in thousands) | | | | | |
| Derivatives designated as hedging instruments: | | | | | | |
| Cash flow hedge interest rate caps and swaps | \$528 | \$ 31 | *\$707,000 | \$802 | \$ 15,641 | \$707,000 |
| Fair value hedge interest rate swaps | — | 836 | 7,889 | — | 986 | 7,999 |
| Total derivatives designated as hedging instruments | \$528 | \$ 867 | \$714,889 | \$802 | \$ 16,627 | \$714,999 |
| Derivatives not designated as hedging instruments: | | | | | | |
| Interest rate swaps and embedded derivatives | \$26,058 | \$ 22,870 | *\$1,288,274 | \$25,285 | \$ 25,284 | \$1,075,722 |
| Mortgage banking derivatives | 178 | 165 | 88,567 | 2,968 | 2,166 | 246,583 |
| Total derivatives not designated as hedging instruments | \$26,236 | \$ 23,035 | \$1,376,841 | \$28,253 | \$ 27,450 | \$1,322,305 |

* The fair value for the Chicago Mercantile Exchange cleared derivative positions is inclusive of accrued interest payable and the portion of the cash collateral representing the variation margin posted with (or by) the applicable counterparties.

Chicago Mercantile Exchange (CME) amended their rules to legally characterize the variation margin posted between counterparties to be classified as settlements of the outstanding derivative contracts instead of cash collateral. Effective January 1, 2017, Valley adopted the new rule on a prospective basis to classify its CME variation margin as a single-unit of account with the fair value of certain cash flow and non-designated derivative instruments. As a result, the fair value of the designated cash flow derivatives and non-designated interest rate swaps cleared with the CME were offset by variation margins totaling \$13.0 million and \$3.3 million, respectively, and reported in the table above on a net basis at June 30, 2017.

Losses included in the consolidated statements of income and in other comprehensive income, on a pre-tax basis, related to interest rate derivatives designated as hedges of cash flows were as follows:

| | Three Months Ended | | Six Months Ended | |
|---|--------------------|---------------|------------------|---------------|
| | June 30, 2017 | June 30, 2016 | June 30, 2017 | June 30, 2016 |
| | (in thousands) | | | |
| Amount of loss reclassified from accumulated other comprehensive loss to interest expense | \$(2,314) | \$(3,597) | \$(4,832) | \$(6,568) |
| Amount of loss recognized in other comprehensive income | (1,482) | (3,625) | (1,265) | (14,657) |

The net gains or losses related to cash flow hedge ineffectiveness were immaterial during the three and six months ended June 30, 2017 and 2016. The accumulated net after-tax losses related to effective cash flow hedges included in accumulated other comprehensive loss were \$10.4 million and \$12.5 million at June 30, 2017 and December 31, 2016, respectively.

Amounts reported in accumulated other comprehensive loss related to cash flow interest rate derivatives are reclassified to interest expense as interest payments are made on the hedged variable interest rate liabilities. Valley estimates that \$6.9 million will be reclassified as an increase to interest expense over the next 12 months.

Gains (losses) included in the consolidated statements of income related to interest rate derivatives designated as hedges of fair value were as follows:

| | Three Months Ended June 30, 2017 | | Six Months Ended June 30, 2016 | |
|-------------------------------------|--|---------|---|---------|
| | 2017 | 2016 | 2017 | 2016 |
| | (in thousands) | | | |
| Derivative - interest rate swaps: | | | | |
| Interest income | \$52 | \$ 2 | \$149 | \$(97) |
| Interest expense | — | 2,069 | — | 6,797 |
| Hedged item - loans and borrowings: | | | | |
| Interest income | \$(52) | \$(2) | \$(149) | \$97 |
| Interest expense | — | (2,060) | — | (6,779) |

The amounts recognized in non-interest expense related to ineffectiveness of fair value hedges were immaterial for the three and six months ended June 30, 2017 and 2016.

The net losses included in the consolidated statements of income related to derivative instruments not designated as hedging instruments were as follows:

| | Three Months Ended June 30, 2017 | | Six Months Ended June 30, 2016 | |
|--|--|--------|---|---------|
| | 2017 | 2016 | 2017 | 2016 |
| | (in thousands) | | | |
| Non-designated hedge interest rate derivatives | | | | |
| Other non-interest expense | \$70 | \$(92) | \$(790) | \$(389) |

Credit Risk Related Contingent Features. By using derivatives, Valley is exposed to credit risk if counterparties to the derivative contracts do not perform as expected. Management attempts to minimize counterparty credit risk through credit approvals, limits, monitoring procedures and obtaining collateral where appropriate. Credit risk exposure associated with derivative contracts is managed at Valley in conjunction with Valley's consolidated counterparty risk management process. Valley's counterparties and the risk limits monitored by management are periodically reviewed and approved by the Board of Directors.

Valley has agreements with its derivative counterparties providing that if Valley defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then Valley could also be declared in default on its derivative counterparty agreements. Additionally, Valley has an agreement with several of its derivative counterparties that contains provisions that require Valley's debt to maintain an investment grade credit rating from each of the major credit rating agencies from which it receives a credit rating. If Valley's credit rating is reduced below investment grade, or such rating is withdrawn or suspended, then the counterparty could terminate the derivative positions and Valley would be required to settle its obligations under the agreements. As of June 30, 2017, Valley was in compliance with all of the provisions of its derivative counterparty agreements. As of June 30, 2017, the fair value of derivatives in a net liability position, which includes accrued interest but excludes any adjustment for nonperformance risk related to these agreements, was \$10.5 million. Valley has derivative counterparty agreements that require minimum collateral posting thresholds for certain counterparties. At June 30, 2017, Valley had \$43.3 million in collateral posted with counterparties, net of CME variation margin.

Note 12. Balance Sheet Offsetting

Certain financial instruments, including derivatives (consisting of interest rate caps and swaps) and repurchase agreements (accounted for as secured long-term borrowings), may be eligible for offset in the consolidated balance sheet and/or subject to master netting arrangements or similar agreements. Valley is party to master netting arrangements with its financial institution counterparties; however, Valley does not offset assets and liabilities under these arrangements for financial statement presentation purposes. The master netting arrangements provide for a single

43

net settlement of all swap agreements, as well as collateral, in the event of default on, or termination of, any one contract. Collateral, usually in the form of cash or marketable investment securities, is posted by the counterparty with net liability positions in accordance with contract thresholds. Master repurchase agreements which include “right of set-off” provisions generally have a legally enforceable right to offset recognized amounts. In such cases, the collateral would be used to settle the fair value of the repurchase agreement should Valley be in default. The table below presents information about Valley’s financial instruments that are eligible for offset in the consolidated statements of financial condition as of June 30, 2017 and December 31, 2016.

| | Gross Amounts Recognized (in thousands) | Gross Amounts Offset | Net Amounts Presented | Gross Amounts Not Offset Financial Instruments | Cash Collateral | Net Amount |
|------------------------------|--|----------------------|-----------------------|---|---------------------------|------------|
| June 30, 2017 | | | | | | |
| Assets: | | | | | | |
| Interest rate caps and swaps | \$26,586 | \$ — | \$ 26,586 | \$(3,888) | \$ — | \$ 22,698 |
| Liabilities: | | | | | | |
| Interest rate caps and swaps | \$23,737 | \$ — | \$ 23,737 | \$(3,888) | \$(9,314) ⁽¹⁾ | \$ 10,535 |
| Repurchase agreements | 200,000 | — | 200,000 | — | (200,000) ⁽²⁾ | — |
| Total | \$223,737 | \$ — | \$ 223,737 | \$(3,888) | \$(209,314) | \$ 10,535 |
| December 31, 2016 | | | | | | |
| Assets: | | | | | | |
| Interest rate caps and swaps | \$26,087 | \$ — | \$ 26,087 | \$(5,268) | \$ — | \$ 20,819 |
| Liabilities: | | | | | | |
| Interest rate caps and swaps | \$41,911 | \$ — | \$ 41,911 | \$(5,268) | \$(36,643) ⁽¹⁾ | \$ — |
| Repurchase agreements | 165,000 | — | 165,000 | — | (165,000) ⁽²⁾ | — |
| Total | \$206,911 | \$ — | \$ 206,911 | \$(5,268) | \$(201,643) | \$ — |

Represents the amount of collateral posted with derivatives counterparties that offsets net liabilities. Actual cash (1) collateral posted with all counterparties totaled \$59.6 million and \$52.4 million at June 30, 2017 and December 31, 2016, respectively.

(2) Represents the fair value of non-cash pledged investment securities.

Note 13. Tax Credit Investments

Valley's tax credit investments are primarily related to investments promoting qualified affordable housing projects, and other investments related to community development and renewable energy sources. Some of these tax-advantaged investments support Valley's regulatory compliance with the Community Reinvestment Act (CRA). Valley's investments in these entities generate a return primarily through the realization of federal income tax credits, and other tax benefits, such as tax deductions from operating losses of the investments, over specified time periods. These tax credits and deductions are recognized as a reduction of income tax expense.

Valley's tax credit investments are carried in other assets on the consolidated statements of financial condition. Valley's unfunded capital and other commitments related to the tax credit investments are carried in accrued expenses and other liabilities on the consolidated statements of financial condition. Valley recognizes amortization of tax credit investments, including impairment losses, within non-interest expense of the consolidated statements of income using the equity method of accounting. An impairment loss is recognized when the fair value of the tax credit investment is less than its carrying value.

The following table presents the balances of Valley's affordable housing tax credit investments, other tax credit investments, and related unfunded commitments at June 30, 2017 and December 31, 2016.

| | June 30, December 31, 2017 2016 (in thousands) | |
|--|--|-----------|
| Other Assets: | | |
| Affordable housing tax credit investments, net | \$28,559 | \$ 29,567 |
| Other tax credit investments, net | 36,204 | 44,763 |
| Total tax credit investments, net | \$64,763 | \$ 74,330 |
| Other Liabilities: | | |
| Unfunded affordable housing tax credit commitments | \$4,690 | \$ 4,850 |
| Unfunded other tax credit commitments | 3,582 | 7,276 |
| Total unfunded tax credit commitments | \$8,272 | \$ 12,126 |

The following table presents other information relating to Valley's affordable housing tax credit investments and other tax credit investments for the three and six months ended June 30, 2017 and 2016:

| | Three Months Ended June 30, 2017 | | Six Months Ended June 30, 2016 | |
|---|---|---------|---|----------|
| | 2017 | 2016 | 2017 | 2016 |
| | (in thousands) | | | |
| Components of Income Tax Expense: | | | | |
| Affordable housing tax credits and other tax benefits | \$1,271 | \$1,065 | \$2,555 | \$2,130 |
| Other tax credit investment credits and tax benefits | 8,680 | 3,268 | 14,966 | 6,536 |
| Total reduction in income tax expense | \$9,951 | \$4,333 | \$17,521 | \$8,666 |
| Amortization of Tax Credit Investments: | | | | |
| Affordable housing tax credit investment losses | \$358 | \$775 | \$754 | \$1,359 |
| Affordable housing tax credit investment impairment losses | 130 | 60 | 254 | 200 |
| Other tax credit investment losses | 1,060 | 594 | 1,827 | 668 |
| Other tax credit investment impairment losses | 6,184 | 6,217 | 10,221 | 12,683 |
| Total amortization of tax credit investments recorded in non-interest expense | \$7,732 | \$7,646 | \$13,056 | \$14,910 |

Note 14. Litigation

In the normal course of business, Valley is a party to various outstanding legal proceedings and claims. In the opinion of management, the financial condition, results of operations and liquidity of Valley should not be materially affected by the outcome of such legal proceedings and claims. However, in the event of an unexpected adverse outcome in one or more of our legal proceedings, operating results for a particular period may be negatively impacted. Disclosure is required when a risk of material loss in a litigation or claim is more than remote, even when the risk of a material loss is less than likely. Unless an estimate cannot be made, disclosure is also required of the estimate of the reasonably possible loss or range of loss.

Although there can be no assurance as to the ultimate outcome, Valley has generally denied, or believes it has a meritorious defense and will deny liability in litigation pending against Valley and claims made, including the matter described below. Valley intends to defend vigorously each case against it. Liabilities are established for legal claims when payments associated with the claims become probable and the costs can be reasonably estimated.

Merrick Bank Corporation v. Valley National Bank and American Express Travel Related Services v. Valley National Bank litigation. For about a decade, Valley served as the depository bank for various charter operators under regulations of the Department of Transportation (DOT) and contracts entered into with charter operators under those regulations. The purported intent of the regulations is to afford some protection to the customers of the charter operators. A charter operator has several options with regard to fulfilling its obligations under the regulations, with one option requiring the charter operator to deposit the proceeds of tickets purchased for a charter flight into an FDIC insured bank account. The funds for a flight are released when the charter operator certifies that the flight has been completed. Valley stopped serving as a depository bank for the charter business due to the narrow profit in that business combined with the legal expenses incurred to defend itself in a prior case in which Valley was completely successful and the anticipated legal expenses from the following similar cases that are still pending.

Valley served as the depository bank for Myrtle Beach Direct Air (Direct Air) under a contract between Direct Air and Valley approved by the DOT under the DOT regulations. Direct Air commenced operations in 2007 but in March 2012 Direct Air ceased operations and filed for bankruptcy. Thereafter the United States Justice Department charged three of the principals of Direct Air with criminal fraud; that case is expected to go to trial in March 2018. Merrick Bank Corp. (Merrick) was the merchant bank for Direct Air and processed credit card purchases for Direct Air. Following the bankruptcy of Direct Air, Merrick incurred chargebacks in the approximate amount of \$26.2 million when the Direct Air customers whose flights had been canceled obtained a credit from their card issuing banks for the cost of the ticket or other item purchased from Direct Air. Merrick was not able to recover the chargebacks from Direct Air. Direct Air's depository account at Valley contained approximately \$1.0 million at the time Direct Air ceased operations.

Merrick filed an action against Valley with ten counts in December 2013. Valley moved to dismiss five of the counts and, in March 2015, the court dismissed four of the five counts. American Express Travel Related Services (American Express) filed a similar action against Valley claiming about \$3.0 million in chargebacks. Five of American Express' eleven counts have been dismissed. The two cases have now been consolidated in the Federal District Court of New Jersey.

During April 2017, all parties attended a mediation, however it was unsuccessful. Shortly before the mediation, Valley filed summary judgment motions on all of the remaining counts in both the Merrick and American Express cases. Merrick and American Express also filed summary judgment motions against Valley. Valley does not anticipate an immediate decision to be rendered on the motions.

At June 30, 2017, Valley could not estimate an amount or range of reasonably possible losses related to the matter described above. Based upon information currently available and advice of counsel, Valley believes that the eventual outcome of such claims will not have a material adverse effect on Valley's consolidated financial position. However, in the event of unexpected future developments, it is possible that the ultimate resolution of the matters, if unfavorable, may be material to Valley's results of operations for a particular period.

Note 15. Business Segments

The information under the caption "Business Segments" in Management's Discussion and Analysis of Financial Condition and Results of Operations is incorporated herein by reference.

Note 16. Subsequent Events

USAmeriBancorp, Inc. Merger Agreement

On July 26, 2017, Valley announced its entry into a merger agreement with USAmeriBancorp, Inc. (USAB) headquartered in Clearwater, Florida. USAB largely through its wholly-owned subsidiary, USAmeriBank, has approximately \$4.4 billion in assets, \$3.6 billion in loans and \$3.5 billion in deposits and maintains a branch network of 30 offices. The acquisition will expand Valley's Florida presence and establish a presence in Alabama. The common shareholders of USAB will receive 6.1 shares of Valley common stock for each USAB share they own, subject to adjustment in the event Valley's average stock price falls below \$11.50 or rises above \$13.00 prior to closing. Both Valley and USAB have walkaway rights if the volume-weighted average closing price is below \$11.00 and USAB has a walkaway right if the volume-weighted average closing price is above \$13.50. The transaction is valued at an estimated \$816 million, based on Valley's closing stock price on July 25, 2017. The acquisition is expected to close early in the first quarter of 2018, subject to standard regulatory approvals, shareholder approvals from Valley and USAB, as well as other customary conditions.

Issuance of Series B Preferred Stock

On August 3, 2017, Valley issued 4.0 million shares of its Fixed-to-Floating Rate Non-Cumulative Perpetual Preferred Stock, Series B, no par value per share, with a liquidation preference of \$25 per share for aggregate consideration of \$100 million. Dividends on the preferred stock will accrue and be payable quarterly in arrears, at a fixed rate per annum equal to 5.50 percent from the original issuance date to, but excluding, September 30, 2022, and thereafter at a floating rate per annum equal to three-month LIBOR plus a spread of 3.578 percent. Net proceeds to Valley after deducting underwriting discounts, commissions and offering expenses are expected to be approximately \$98.1 million.

Item 2. Management's Discussion and Analysis (MD&A) of Financial Condition and Results of Operations

The following MD&A should be read in conjunction with the consolidated financial statements and notes thereto appearing elsewhere in this report. The words "Valley," the "Company," "we," "our" and "us" refer to Valley National Bancorp and its wholly owned subsidiaries, unless we indicate otherwise. Additionally, Valley's principal subsidiary, Valley National Bank, is commonly referred to as the "Bank" in this MD&A.

The MD&A contains supplemental financial information, described in the sections that follow, which has been determined by methods other than U.S. generally accepted accounting principles (U.S. GAAP) that management uses in its analysis of our performance. Management believes these non-GAAP financial measures provide information useful to investors in understanding our underlying operational performance, our business and performance trends and facilitates comparisons with the performance of others in the financial services industry. These non-GAAP financial measures should not be considered in isolation or as a substitute for or superior to financial measures calculated in accordance with U.S. GAAP. These non-GAAP financial measures may also be calculated differently from similar measures disclosed by other companies.

Cautionary Statement Concerning Forward-Looking Statements

This Quarterly Report on Form 10-Q, both in the MD&A and elsewhere, contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are not historical facts and include expressions about management's confidence and strategies and management's expectations about new and existing programs and products, acquisitions, relationships, opportunities, taxation, technology, market conditions and economic expectations. These statements may be identified by such forward-looking terminology as "should," "expect," "believe," "view," "opportunity," "allow," "continues," "reflects," "typically," "usually," "anticipate," or similar statements or of such terms. Such forward-looking statements involve certain

risks and uncertainties and our actual results may differ materially from such forward-looking statements. Factors that may cause actual results to differ materially from those contemplated by such forward-looking statements in addition to those risk factors disclosed in Valley's Annual Report on Form 10-K for the year ended December 31, 2016, include, but are not limited to:

- failure to obtain shareholder or regulatory approval for the merger of USAB with Valley or to satisfy other conditions to the merger on the proposed terms and within the proposed timeframe;
- delays in closing the merger;
- the inability to realize expected cost savings and synergies from the merger of USAB with Valley in the amounts or in the timeframe anticipated;
- changes in the estimate of non-recurring charges;
- the diversion of management's time on issues relating to the merger;
- costs or difficulties relating to integration matters might be greater than expected;
- material adverse changes in Valley's or USAB's operations or earnings;
- an increase or decrease in the stock price of Valley during the 30 day pricing period prior to the closing of the merger which could cause an adjustment to the exchange ratio or give either Valley or USAB the right to terminate the merger agreement under certain circumstances;
- the inability to retain USAB's customers and employees;
- weakness or a decline in the economy, mainly in New Jersey, New York, Florida and Alabama, as well as an unexpected decline in commercial real estate values within our market areas;
- less than expected cost reductions and revenue enhancement from Valley's cost reduction plans including its earnings enhancement program called "LIFT";
- damage verdicts or settlements or restrictions related to existing or potential litigations arising from claims of breach of fiduciary responsibility, negligence, fraud, contractual claims, environmental laws, patent or trade mark infringement, employment related claims, and other matters;
- the loss of or decrease in lower-cost funding sources within our deposit base may adversely impact our net interest income and net income;
- cyber attacks, computer viruses or other malware that may breach the security of our websites or other systems to obtain unauthorized access to confidential information, destroy data, disable or degrade service, or sabotage our systems;
- results of examinations by the OCC, the FRB, the CFPB and other regulatory authorities, including the possibility that any such regulatory authority may, among other things, require us to increase our allowance for credit losses, write-down assets, require us to reimburse customers, change the way we do business, or limit or eliminate certain other banking activities;
- changes in accounting policies or accounting standards, including the new authoritative accounting guidance (known as the current expected credit loss (CECL) model) which may increase the required level of our allowance for credit losses after adoption on January 1, 2020;
- higher or lower than expected income tax expense or tax rates, including increases or decreases resulting from changes in tax laws, regulations and case law;
- our inability to pay dividends at current levels, or at all, because of inadequate future earnings, regulatory restrictions or limitations, and changes in our capital requirements;
- higher than expected loan losses within one or more segments of our loan portfolio;
- unanticipated loan delinquencies, loss of collateral, decreased service revenues, and other potential negative effects on our business caused by severe weather or other external events;
- unexpected significant declines in the loan portfolio due to the lack of economic expansion, increased competition, large prepayments, changes in regulatory lending guidance or other factors; and
- the failure of other financial institutions with whom we have trading, clearing, counterparty and other financial relationships.

Critical Accounting Policies and Estimates

Valley's accounting policies are fundamental to understanding management's discussion and analysis of its financial condition and results of operations. Our significant accounting policies are presented in Note 1 to the consolidated financial statements included in Valley's Annual Report on Form 10-K for the year ended December 31, 2016. We identified our policies on the allowance for loan losses, security valuations and impairments, goodwill and other intangible assets, and income taxes to be critical because management has to make subjective and/or complex judgments about matters that are inherently uncertain and because it is likely that materially different amounts would be reported under different conditions or using different assumptions. Management has reviewed the application of these policies with the Audit Committee of Valley's Board of Directors. Our critical accounting policies are described in detail in Part II, Item 7 in Valley's Annual Report on Form 10-K for the year ended December 31, 2016.

New Authoritative Accounting Guidance

See Note 4 to the consolidated financial statements for a description of new authoritative accounting guidance including the respective dates of adoption and effects on results of operations and financial condition.

Executive Summary

Company Overview. At June 30, 2017, Valley had consolidated total assets of approximately \$23.4 billion, total net loans of \$17.6 billion, total deposits of \$17.3 billion and total shareholders' equity of \$2.4 billion. Our commercial bank operations include branch office locations in northern and central New Jersey, the New York City Boroughs of Manhattan, Brooklyn, Queens, and Long Island, and Florida. Of our current 209 branch network, 67 percent, 18 percent and 15 percent of the branches are located in New Jersey, New York and Florida, respectively. We have grown significantly in asset size over the past several years primarily through bank acquisitions that expanded our operating footprint into several Florida markets in 2014 and 2015, as well as normal lending activity.

USAmeriBancorp, Inc. In July 2017, we announced our entry into a merger agreement with USAmeriBancorp, Inc. (USAB) headquartered in Clearwater, Florida. USAB largely through its wholly-owned subsidiary, USAmeriBank, has approximately \$4.4 billion in assets, \$3.6 billion in loans and \$3.5 billion in deposits and maintains a branch network of 30 offices. The acquisition represents a significant addition to Valley's Florida franchise, and will meaningfully enhance its presence in the Tampa Bay market, which is Florida's second largest metropolitan area by population. The acquisition will also bring Valley to the Birmingham, Montgomery, and Tallapoosa areas in Alabama, where USAmeriBank maintains 15 offices contributing approximately \$1.1 billion of deposits and \$520 million in loans.

Each USAB shareholder will receive 6.1 shares of Valley common stock for each share of USAB common stock if Valley's volume-weighted average closing price during the 30 day trading ending 5 days prior to closing is between \$11.50 and \$13.00. In the event that the volume-weighted average closing price is less than \$11.50, then the exchange ratio shall be \$69.00 divided by the volume-weighted average closing price. If Valley's volume-weighted average closing price is greater than \$13.00, then the exchange ratio shall be \$79.30 divided by the volume-weighted average closing price. Both Valley and USAB have walkaway rights if the volume-weighted average closing price is below \$11.00 and USAB has a walkaway right if the volume-weighted average closing price is above \$13.50. The transaction is valued at an estimated \$816 million, based on Valley's closing stock price on July 25, 2017. The acquisition is expected to close early in the first quarter of 2018, subject to standard regulatory approvals, shareholder approvals from Valley and USAB, as well as other customary conditions.

See Item 1 of Valley's Annual Report on Form 10-K for the year ended December 31, 2016 for more details regarding our other recent acquisitions.

Earnings Enhancement Program. In December 2016, Valley announced a company-wide earnings enhancement initiative called LIFT. The LIFT program is a review of our business practices with goals of improving our overall efficiency, targeting resources to more value-added activities and delivering on the financial banking experience expected by our customers. During July 2017, we completed the idea generation and approval phase of the LIFT program. As a result of these efforts, we plan to achieve approximately \$22 million in total cost reductions and revenue enhancements on an annualized pre-tax run-rate through a combination of workforce reduction and other efficiency and revenue initiatives. We estimate that these changes will result in employee severance and other implementation costs of approximately \$11 million, the majority of which will be recorded in the third quarter of 2017. The implementation phase of the initiative enhancements is currently underway and is expected to be fully phased-in over the next 24 months.

As part of the LIFT program and the normal on-going review of our business, we will evaluate the operational efficiency of our entire branch network (consisting of 110 leased and 99 owned office locations at June 30, 2017). This review will ensure the optimal performance of our retail operations, in conjunction with several other factors, including our customers' delivery channel preferences, branch usage patterns, and the potential opportunity to move existing customer relationships to another branch location without imposing a negative impact on their banking experience.

Preferred Stock Offering. On August 3, 2017, Valley issued 4.0 million shares of its Fixed-to-Floating Rate Non-Cumulative Perpetual Preferred Stock, Series B, no par value per share, with a liquidation preference of \$25 per share for aggregate consideration of \$100 million. Dividends on the preferred stock will accrue and be payable quarterly in arrears, at a fixed rate per annum equal to 5.50 percent from the original issuance date to, but excluding, September 30, 2022, and thereafter at a floating rate per annum equal to three-month LIBOR plus a spread of 3.578 percent. Valley intends to use the net proceeds for general corporate purposes and investments in Valley National Bank as regulatory capital. Net proceeds to Valley after deducting underwriting discounts, commissions and offering expenses are expected to be approximately \$98.1 million.

Quarterly Results. Net income for the second quarter of 2017 was \$50.1 million, or \$0.18 per diluted common share, compared to \$39.0 million, or \$0.15 per diluted common share, for the second quarter of 2016. The \$11.0 million increase in quarterly net income as compared to the same quarter one year ago was largely due to: (i) a \$17.5 million increase in our net interest income mostly due to higher average loan balances driven by both strong organic and purchased loan volume over the last 12 months and the modification of \$405 million of high cost long-term borrowings in the third quarter of 2016, (ii) a \$564 thousand decrease in non-interest expense mostly due to lower expense in several categories, including, but not limited to, advertising expense, professional and legal expense, operating losses, branch closing costs, and gains on other real estate owned, partially offset by higher salary and employee benefit expense, (iii) a \$426 thousand increase in non-interest income mostly caused by an increase in net gains on sales of residential mortgage loans, partially offset by (iv) a \$2.2 million increase in the provision for credit losses largely caused by loan growth, and (v) an increase in income tax expense mainly due to higher pre-tax income. See the "Net Interest Income," "Non-Interest Income," and "Non-Interest Expense" sections below for more details on the items above impacting our second quarter 2017 results, as well as other items discussed elsewhere in this MD&A. Economic Overview. During the second quarter of 2017, real gross domestic product (GDP) grew at a 2.6 percent annual rate after advancing 1.2 percent in the first quarter of 2017. The pace of hiring accelerated although wage growth remained somewhat subdued. Overall price growth decelerated notably from the beginning of the year, business fixed investment increased modestly, and residential fixed investment declined as borrowing costs remained higher compared to levels experienced in 2016.

The civilian unemployment rate decreased from 4.5 percent as of March 31, 2017 to 4.4 percent as of June 30, 2017 even as the number of people entering the workforce increased, demonstrating the continued strength of the labor market. The pace of hiring accelerated from a monthly average of 166 thousand for the first quarter of 2017 to 194 thousand in the second quarter of 2017. Measures of wage growth remain subdued relative to the level of slack in the labor market, as measured by the unemployment rate, which may be contributing to the softness in household consumption.

In the second quarter of 2017, the pace of U.S. existing home sales decreased compared to the previous quarter as inventory levels increased. Home prices have appreciated to a level above the prior peak experienced in 2007. In addition, borrowing costs remained higher compared to levels experienced in 2016. The average interest rate of a 30 year fixed rate mortgage during the second quarter of 2017 was 3.98 percent compared to 3.59 percent in 2016. Growth in personal consumption of goods and services continued to grow in the second quarter of 2017 although below the pace experienced in 2016. Although Valley's auto loan origination volumes were somewhat lower in the second quarter of 2017, U.S. automobile sales increased, reflecting confidence in the health of the consumer after a weaker first quarter of 2017. Household balance sheets continue to improve as equity and home prices rose in the second quarter of 2017. Further price appreciation may support consumer spending in the second half of 2017. The Federal Reserve's Open Market Committee (FOMC) raised the target range for the federal funds rate to 1.00 to 1.25 percent at their June 2017 meeting, although the Committee remained concerned about continued low levels of inflation and inflation expectations. In determining future policy actions, the FOMC will assess progress - both realized and expected - toward its objectives of maximum employment and 2-percent inflation. The FOMC has maintained its existing policy of reinvesting principal payments from its holdings of agency debt and agency mortgage-backed securities in agency mortgage-backed securities and will continue rolling over maturing Treasury securities at auction. This policy should help maintain accommodative financial conditions. The FOMC has continued to emphasize that changes in monetary policy will be data dependent.

The 10-year U.S. Treasury note yield ended the second quarter at 2.31 percent, 9 basis points lower compared with March 31, 2017. The spread between the 2- and 10-year U.S. Treasury note yields was 0.93 percentage at June 30, 2017, 20 basis points lower compared to March 31, 2017.

While we are currently witnessing slightly higher interest rates on pending loan originations within most of our loan pipelines in the early stages of the third quarter of 2017, we do see some offset potentially coming in the form of higher deposit and borrowing costs in our primary markets. To that end, despite strong loan demand, particularly in commercial real estate lending, our business operations and results could be challenged in the future due to several external factors, including, but not limited to, the decline in the spread between short- and long-term market interest rates and/or slower than expected economic activity within our markets.

Loans. Loans increased by \$261.3 million, or 6.0 percent on an annualized basis, to \$17.7 billion at June 30, 2017 from March 31, 2017 largely due to a net increase of \$259.3 million in total commercial real estate loans. The overall loan growth was partially offset by a decrease of \$20.7 million in residential mortgage loans caused by the transfer of approximately \$122 million of performing 30-year fixed rate mortgages to loans held for sale at June 30, 2017. The sale of these loans is expected to be completed during the third quarter of 2017 and result in a pre-tax gain of approximately \$4 million. See further details on our loan activities under the "Loan Portfolio" section below.

Asset Quality. Our past due loans and non-accrual loans, discussed further below, exclude PCI loans. Under U.S. GAAP, the PCI loans (acquired at a discount that is due, in part, to credit quality) are accounted for on a pool basis and are not subject to delinquency classification in the same manner as loans originated by Valley. As of June 30, 2017, PCI loans totaled \$1.5 billion and represented approximately 8.7 percent of our total loan portfolio.

Total non-PCI loan portfolio delinquencies (including loans past due 30 days or more and non-accrual loans) as a percentage of total loans decreased to 0.47 percent at June 30, 2017 as compared to 0.61 percent at March 31, 2017 mostly due to a decrease in commercial loans past due 30 to 59 days. Non-performing assets (including non-accrual loans) increased by 5.9 percent to \$54.6 million at June 30, 2017 as compared to \$51.5 million at March 31, 2017 due to a \$3.9 million increase in non-accrual loans, partially offset by a moderate decline in both foreclosed assets and non-accrual debt securities.

Our lending strategy is based on underwriting standards designed to maintain high credit quality and we remain optimistic regarding the overall future performance of our loan portfolio. However, due to the potential for future credit deterioration caused by the unpredictable future strength of the U.S. economy and the housing and labor markets, as well as other market factors that may continue to negatively impact the performance of our \$140.5

million taxi medallion loan portfolio, management cannot provide assurance that our non-performing assets will not increase from the levels reported as of June 30, 2017. See the "Non-Performing Assets" section below for further analysis of our asset quality.

Deposits and Other Borrowings. The mix of the deposit categories of total average deposits for the second quarter of 2017 remained relatively unchanged as compared to the first quarter of 2017. Non-interest bearing deposits represented approximately 30 percent of total average deposits for the three months ended June 30, 2017, while savings, NOW and money market accounts were 51 percent and time deposits were 19 percent of the total average deposits. Overall, average deposits totaled \$17.3 billion for the second quarter of 2017 and decreased by \$78.3 million as compared to the first quarter of 2017 due, in large part, to lower average savings, NOW and money market deposits, partially offset by higher average balances in the other deposit categories. Average savings, NOW and money market deposits declined \$246.4 million to \$8.8 billion for the second quarter of 2017 as compared to the first quarter of 2017 due to fluctuations in commercial and retail deposit accounts, as well as a decrease of approximately \$102 million in average brokered money market deposit account balances. Actual ending balances for deposits also decreased \$81.1 million, or 0.5 percent, to approximately \$17.3 billion at June 30, 2017 from March 31, 2017 mostly due to the aforementioned changes impacting average money market deposits during the second quarter of 2017. However, time deposits increased \$153.9 million to \$3.4 billion at June 30, 2017 as compared to March 31, 2017 largely due to new initiatives in our certificate of deposit portfolio which commenced in the second quarter of 2017. Average short-term borrowings increased \$274.8 million, or 17.6 percent, to \$1.8 billion for the second quarter of 2017 as compared to the first quarter of 2017 mostly due to our increased use of short-term FHLB advances for additional liquidity to fund new loan volumes starting in the first quarter. Actual ending balances for short-term borrowings increased \$89.5 million to \$1.7 billion at June 30, 2017 as compared to March 31, 2017 mostly due to a new \$100 million repo borrowing used as alternate funding in May 2017.

Average long-term borrowings (which include junior subordinated debentures issued to capital trusts which are presented separately on the consolidated statements of condition) increased to \$1.7 billion for the second quarter of 2017 and increased \$185.4 million as compared to the first quarter of 2017. Actual ending balances for long-term borrowings also increased \$185.6 million to \$1.8 billion at June 30, 2017 as compared to March 31, 2017. Both the increases in average and ending balances were primarily due to the new FHLB advances with contractual terms between 13 and 15 months.

Selected Performance Indicators. The following table presents our annualized performance ratios for the periods indicated:

| | Three Months Ended June 30, 2017 | | Six Months Ended June 30, 2016 | |
|---|---|--------|---|--------|
| Return on average assets | 0.86 % | 0.72 % | 0.83 % | 0.69 % |
| Return on average shareholders' equity | 8.27 | 6.97 | 7.98 | 6.75 |
| Return on average tangible shareholders' equity (ROATE) | 11.88 | 10.38 | 11.48 | 10.07 |

ROATE, which is a non-GAAP measure, is computed by dividing net income by average shareholders' equity less average goodwill and average other intangible assets, as follows:

| | Three Months Ended | | Six Months Ended | |
|--|--------------------|-------------|------------------|-------------|
| | June 30, 2017 | 2016 | June 30, 2017 | 2016 |
| | (\$ in thousands) | | | |
| Net income | \$50,065 | \$39,027 | \$96,160 | \$75,214 |
| Average shareholders' equity | 2,420,848 | 2,238,510 | 2,410,063 | 2,229,040 |
| Less: Average goodwill and other intangible assets | (734,616) | (735,115) | (735,393) | (735,276) |
| Average tangible shareholders' equity | \$1,686,232 | \$1,503,395 | \$1,674,670 | \$1,493,764 |
| Annualized ROATE | 11.88 | % 10.38 | % 11.48 | % 10.07 % |

Management believes the ROATE measure provides information useful to management and investors in understanding our underlying operational performance, our business and performance trends and the measure facilitates comparisons with the performance of others in the financial services industry. This non-GAAP financial measure should not be considered in isolation or as a substitute for or superior to financial measures calculated in accordance with U.S. GAAP. These non-GAAP financial measures may also be calculated differently from similar measures disclosed by other companies.

All of the above ratios are, from time to time, impacted by net gains and losses on securities transactions, net gains on sales of loans and net impairment losses on securities recognized in non-interest income. These amounts can vary widely from period to period due to, among other factors, the level of sales of our investment securities classified as available for sale, the amount of residential mortgage loans originated for sale, and the results of our quarterly impairment analysis of the held to maturity and available for sale investment portfolios. See the "Non-Interest Income" section below for more details.

Net Interest Income

Net interest income on a tax equivalent basis totaling \$171.1 million for the second quarter of 2017 increased \$17.6 million as compared to the second quarter of 2016 and increased \$6.4 million as compared to the first quarter of 2017. Interest income on a tax equivalent basis increased \$12.0 million to \$213.3 million for the second quarter of 2017 as compared to the first quarter of 2017 mainly due to a 16 basis point increase in the yield on average loans, and increases of \$388.6 million and \$131.4 million in average loans and taxable investments, respectively. The increase in yield on average loans for the second quarter of 2017 as compared to the linked first quarter was due to higher market interest rates on new loan originations, and a \$3.5 million increase in periodic commercial loan fee income related to derivative interest rate swaps executed with customers. Interest expense of \$42.2 million for the second quarter of 2017 increased \$5.6 million as compared to the first quarter of 2017. During the second quarter of 2017, our interest expense on deposits increased by approximately \$3.1 million from the linked first quarter largely due to an increase in short-term market interest rates, a \$101.7 million decrease in our average low cost brokered money market deposit account balances and one more day during the second quarter. Interest expense on short-term and long-term borrowings also increased \$1.6 million and \$840 thousand, respectively, in the second quarter of 2017 as compared to the first quarter of 2017 due, in part, to increases of \$274.8 million and \$185.4 million in the average balances, respectively. Average short-term and long-term borrowings increased as compared to the first quarter of 2017 mostly due to new FHLB borrowings used to offset a decline in deposits and fund new loans during the second quarter of 2017.

Average interest earning assets increased to \$21.4 billion for the second quarter of 2017 as compared to approximately \$19.5 billion for the second quarter of 2016 largely due to strong organic and purchased loan growth over the last 12 month period. The broad-based loan growth within several loan categories since June 30, 2016 was largely supplemented by purchased loans, primarily consisting of participations in multi-family loans and whole 1-4 family loans (that were a mix of qualifying and non-qualifying CRA loans with adjustable and fixed rates) over the last 12 months ended June 30, 2017. Compared to the first quarter of 2017, average interest earning assets increased by \$467.2 million from \$20.9 billion largely due to continued loan growth. Average loans increased \$388.6 million to \$17.7 billion for the second quarter of 2017 from the first quarter of 2017 mostly due to organic loan growth within

the commercial real estate and other consumer loan portfolios. Average total investments increased \$99.7 million during the second quarter of 2017 and helped drive a \$21.1 million decline in average overnight cash balances, along with normal

53

fluctuations in overnight cash balances due to the timing of loan originations and additional borrowings to fund such loans.

Average interest bearing liabilities increased \$1.3 billion to \$15.6 billion for the second quarter of 2017 as compared to the second quarter of 2016 mainly due to greater use of both low cost brokered money market deposits and short-term FHLB advances as part of our overall funding and liquidity strategy over the last 12 month period. Compared to the first quarter of 2017, average interest bearing liabilities increased \$325.8 million in the second quarter of 2017 mostly due to higher levels of FHLB borrowings and time deposit account balances, partially offset by lower money market deposit account balances. See additional information under "Deposits and Other Borrowings" in the Executive Summary section above.

Our net interest margin on a tax equivalent basis of 3.20 percent for the second quarter of 2017 increased by 6 basis points as compared to both the second quarter of 2016 and first quarter of 2017. The yield on average interest earning assets increased by 14 basis points on a linked quarter basis mostly due to the higher yield on average loans. The yield on average loans increased 16 basis points to 4.20 percent for the second quarter of 2017 and was positively impacted by the aforementioned increases in market interest rates and periodic commercial loan fees as compared to the first quarter of 2017. The yield on average taxable investment securities increased by 6 basis points to 2.84 percent for the second quarter of 2017 from the first quarter of 2017 largely due to a decline in premium amortization expense caused by lower principal repayments on residential mortgage-backed securities. The overall cost of average interest bearing liabilities increased by 12 basis points to 1.08 percent during the second quarter of 2017 from 0.96 percent in the linked first quarter of 2017. The increase was due, in part, to higher interest rates on most deposits and short-term borrowings and one more day during the second quarter of 2017, partially offset by a 19 basis point decrease in the cost of long-term borrowings mostly caused by new lower cost FHLB borrowings. Our cost of total deposits was 0.53 percent for the second quarter of 2017 as compared to 0.45 percent for the first quarter of 2017.

Looking forward, our net interest margin for the third quarter of 2017 may decline as compared to the second quarter of 2017 due to a decline in variable interest income items, such as derivative swap and loan fee income, as well as a multitude of conditional, and sometimes unpredictable, factors that can impact our actual margin results. For example, our margin may continue to face the risk of compression in the future due to, among other factors, the relatively low level of long-term market interest rates, further repayment of higher yielding interest earning assets, and the re-pricing risk related to interest bearing deposits and short-term borrowings due to a rise in short-term market interest rates.

Additionally, our investment portfolios include a large number of residential mortgage-backed securities purchased at a premium. The amortization of such premiums, which impacts both the yield and interest income recognized on such securities, may increase or decrease depending upon the level of principal prepayments and market interest rates. To manage these risks, we continuously explore ways to maximize our mix of interest earning assets on our balance sheet, while maintaining a low cost of funds to optimize our net interest margin and overall returns. The increase in both the U.S. and Valley prime rates (to 4.25 percent and 5.25 percent, respectively) in response to the Federal Reserve's 25 basis point increase in the targeted federal funds rate in mid-June 2017 should benefit both our future net interest income and margin. Additionally, potential future loan growth from both the commercial and consumer lending segments (based upon solid loan pipelines seen in the early stages of the third quarter of 2017) is anticipated to positively impact our future net interest income.

The following table reflects the components of net interest income for the three months ended June 30, 2017, March 31, 2017 and June 30, 2016:

Quarterly Analysis of Average Assets, Liabilities and Shareholders' Equity and Net Interest Income on a Tax Equivalent Basis

| | Three Months Ended | | | March 31, 2017 | | | June 30, 2016 | | |

| Short-term borrowings | 1,701,164 | 9,417 | 1.11 | 1,139,583 | 4,992 | 0.88 |
| Long-term borrowings (4) | 1,587,494 | 26,740 | 3.37 | 1,717,846 | 32,013 | 3.73 |
| Total interest bearing liabilities | 15,448,953 | 78,774 | 1.02 | 14,308,328 | 75,017 | 1.05 |
| Non-interest bearing deposits | 5,167,116 | | | 4,966,142 | | |
| Other liabilities | 171,245 | | | 201,818 | | |
| Shareholders' equity | 2,410,063 | | | 2,229,040 | | |
| Total liabilities and shareholders' equity | \$23,197,377 | | | \$21,705,328 | | |
| Net interest income/interest rate spread (5) | | \$335,788 | 2.89 % | | \$303,615 | 2.83 % |
| Tax equivalent adjustment | | (4,299) | | | (4,007) | |
| Net interest income, as reported | | \$331,489 | | | \$299,608 | |
| Net interest margin (6) | | | 3.13 % | | | 3.07 % |
| Tax equivalent effect | | | 0.04 % | | | 0.04 % |
| Net interest margin on a fully tax equivalent basis (6) | | | 3.17 % | | | 3.11 % |

(1)Interest income is presented on a tax equivalent basis using a 35 percent federal tax rate.

(2)Loans are stated net of unearned income and include non-accrual loans.

- (3) The yield for securities that are classified as available for sale is based on the average historical amortized cost.
- (4) Includes junior subordinated debentures issued to capital trusts which are presented separately on the consolidated statements of financial condition.
- (5) Interest rate spread represents the difference between the average yield on interest earning assets and the average cost of interest bearing liabilities and is presented on a fully tax equivalent basis.
- (6) Net interest income as a percentage of total average interest earning assets.

The following table demonstrates the relative impact on net interest income of changes in the volume of interest earning assets and interest bearing liabilities and changes in rates earned and paid by us on such assets and liabilities. Variances resulting from a combination of changes in volume and rates are allocated to the categories in proportion to the absolute dollar amounts of the change in each category.

Change in Net Interest Income on a Tax Equivalent Basis

| Short-term borrowings | 1,791 | 605 | 2,396 | 2,883 | 1,542 | 4,425 |
| Long-term borrowings and junior subordinated debentures | 517 | (1,996) | (1,479) | (2,326) | (2,947) | (5,273) |
| Total increase in interest expense | 3,520 | 1,094 | 4,614 | 2,760 | 997 | 3,757 |
| Total increase in net interest income | \$13,964 | \$3,652 | \$17,616 | \$30,491 | \$1,682 | \$32,173 |

*Interest income is presented on a tax equivalent basis using a 35 percent tax rate.

Non-Interest Income

The following table presents the components of non-interest income for the three and six months ended June 30, 2017 and 2016:

| | Three Months Ended June 30, | | Six Months Ended June 30, | |
|--|-----------------------------|----------|---------------------------|----------|
| | 2017 | 2016 | 2017 | 2016 |
| | (in thousands) | | | |
| Trust and investment services | \$2,800 | \$2,544 | \$5,544 | \$4,984 |
| Insurance commissions | 4,358 | 4,845 | 9,419 | 9,553 |
| Service charges on deposit accounts | 5,342 | 5,094 | 10,578 | 10,197 |
| Gains (losses) on securities transactions, net | 22 | (3) | (1) | 268 |
| Fees from loan servicing | 1,831 | 1,561 | 3,646 | 3,155 |
| Gains on sales of loans, net | 4,791 | 3,105 | 8,919 | 4,900 |
| Bank owned life insurance | 1,701 | 1,818 | 4,164 | 3,781 |
| Other | 3,845 | 5,300 | 7,480 | 8,874 |
| Total non-interest income | \$24,690 | \$24,264 | \$49,749 | \$45,712 |

Non-interest income increased \$426 thousand and \$4.0 million for the three and six months ended June 30, 2017, respectively, as compared with the same periods in 2016 primarily due to an increase in net gains on sales of loans, partially offset by lower other non-interest income.

Net gains on sales of loans increased \$1.7 million and \$4.0 million for the three and six months ended June 30, 2017, respectively, as compared to the same periods in 2016. The increase was largely driven by the completion of the sale of approximately \$104 million of performing 30-year fixed rate mortgages transferred to loans held for sale at March 31, 2017. During the second quarter of 2017, we sold a total of \$159.9 million of residential mortgage loans (including \$115.1 million of loans held for sale at March 31, 2017) as compared to \$54.0 million in the second quarter of 2016. During the six months ended June 30, 2017, we sold \$296.5 million of residential mortgage loans as compared to \$182.8 million for the same period one year ago. Our net gains on sales of loans for each period are comprised of both gains on sales of residential mortgages and the net change in the mark to market gains and losses on our loans originated for sale and carried at fair value at each period end. The net change in the fair value of loans held for sale resulted in net losses of \$157 thousand and \$849 thousand for the three months ended June 30, 2017 and 2016, respectively, and net gains of \$848 thousand and \$123 thousand for the six months ended June 30, 2017 and 2016, respectively. See further discussions of our residential mortgage loan origination activity under the “Loan Portfolio” section of this MD&A below.

Other non-interest income decreased \$1.5 million and \$1.4 million for the three and six months ended June 30, 2017 as compared to the same periods in 2016. The decrease was largely due to a decline in net gains on sales of assets for the second quarter of 2017 as compared to the same quarter in 2016 caused by net gains from the sale of two closed branch locations recognized in the second quarter of 2016.

Non-Interest Expense

The following table presents the components of non-interest expense for the three and six months ended June 30, 2017 and 2016:

| | Three Months Ended June 30, | | Six Months Ended June 30, | |
|---|-----------------------------|-----------|---------------------------|-----------|
| | 2017 | 2016 | 2017 | 2016 |
| | (in thousands) | | | |
| Salary and employee benefits expense | \$61,338 | \$56,072 | \$125,054 | \$116,331 |
| Net occupancy and equipment expense | 22,609 | 22,168 | 45,644 | 44,957 |
| FDIC insurance assessment | 4,928 | 5,095 | 10,055 | 10,194 |
| Amortization of other intangible assets | 2,562 | 2,928 | 5,098 | 5,777 |
| Professional and legal fees | 4,302 | 5,472 | 8,997 | 9,367 |
| Amortization of tax credit investments | 7,732 | 7,646 | 13,056 | 14,910 |
| Telecommunications expense | 2,707 | 2,294 | 5,366 | 4,680 |
| Other | 13,061 | 18,128 | 26,921 | 31,812 |
| Total non-interest expense | \$119,239 | \$119,803 | \$240,191 | \$238,028 |

Non-interest expense decreased \$564 thousand for the three months ended June 30, 2017 and increased \$2.2 million for the six months ended June 30, 2017 as compared with the same periods in 2016. The increase during the first half of 2017 as compared to the 2016 period was mainly due to higher salary and employee benefits expense, partially offset by decreases in other non-interest expense and amortization of tax credit investments.

Salary and employee benefits expense increased \$5.3 million and \$8.7 million for the three and six months ended June 30, 2017 as compared to the same periods in 2016 mainly due to increased salaries and cash incentive compensation for the three and six months ended June 30, 2017, respectively. In addition, health insurance expenses increased by \$728 thousand and \$985 thousand during the three and six months ended June 30, 2017, respectively, as compared with the same periods in 2016. Our health care expenses are at times volatile due to self-funding of a large portion of our insurance plan and these medical expenses can and will fluctuate in the future based on our plan experience. The increase in salary and employee benefits expense during the six months ended June 30, 2017 was also attributable to a \$1.6 million increase in stock-based compensation expense as compared to the same period of 2016.

Professional and legal fees decreased \$1.2 million for the three months ended June 30, 2017 as compared to the same period in 2016 largely due to a decrease in legal fees related to general corporate matters and litigation.

Amortization of tax credit investments decreased \$1.9 million for the six months ended June 30, 2017 as compared with the same period in 2016 mainly due to the lower level of net tax credit investments held at June 30, 2017 as compared to June 30, 2016. These investments, while negatively impacting the level of our operating expenses and efficiency ratio, produce tax credits that reduce our income tax expense and effective tax rate. See Note 13 to the consolidated financial statements for more details regarding our tax credit investments.

Other non-interest income expenses decreased \$5.1 million and \$4.9 million for the three and six months ended June 30, 2017, respectively, as compared with the same periods in 2016 mainly due to declines in both operating losses and branch closing costs and an increase in net gains on other real estate owned.

Efficiency Ratios

The efficiency ratio measures total non-interest expense as a percentage of net interest income plus total non-interest income. We believe this non-GAAP measure provides a meaningful comparison of our operational performance and

facilitates investors' assessments of business performance and trends in comparison to our peers in the banking industry. Our overall efficiency ratio, and its comparability to some of our peers, is negatively impacted by the amortization of tax credit investments within non-interest expense.

59

The following table presents our efficiency ratio and a reconciliation of the efficiency ratio adjusted for certain items during the three and six months ended June 30, 2017 and 2016:

| | Three Months Ended | | Six Months Ended | | |
|---|--------------------|------------|------------------|------------|---|
| | June 30, | | June 30, | | |
| | 2017 | 2016 | 2017 | 2016 | |
| | (\$ in thousands) | | | | |
| Total non-interest expense | \$ 119,239 | \$ 119,803 | \$ 240,191 | \$ 238,028 | |
| Less: Amortization of tax credit investments | 7,732 | 7,646 | 13,056 | 14,910 | |
| Total non-interest expense, adjusted | \$ 111,507 | \$ 112,157 | \$ 227,135 | \$ 223,118 | |
| Net interest income | \$ 168,960 | \$ 151,455 | \$ 331,489 | \$ 299,608 | |
| Total non-interest income | 24,690 | 24,264 | 49,749 | 45,712 | |
| Total net interest income and non-interest income | \$ 193,650 | \$ 175,719 | \$ 381,238 | \$ 345,320 | |
| Efficiency ratio | 61.57 | % 68.18 | % 63.00 | % 68.93 | % |
| Efficiency ratio, adjusted | 57.58 | % 63.83 | % 59.58 | % 64.61 | % |

Income Taxes

Income tax expense was \$20.7 million and \$15.5 million for the three months ended June 30, 2017 and 2016, respectively, and \$38.8 million and \$29.8 million for the six months ended June 30, 2017 and 2016, respectively. Our effective tax rate was 29.3 percent and 28.4 percent for the three months ended June 30, 2017 and 2016, respectively, and 28.7 percent and 28.4 percent for the six months ended June 30, 2017 and 2016, respectively.

U.S. GAAP requires that any change in judgment or change in measurement of a tax position taken in a prior annual period be recognized as a discrete event in the quarter in which it occurs, rather than being recognized as a change in effective tax rate for the current year. Our adherence to these tax guidelines may result in volatile effective income tax rates in future quarterly and annual periods. Factors that could impact management's judgment include changes in income, tax laws and regulations, and tax planning strategies. For the remainder of 2017, we anticipate that our effective tax rate will range from 28 percent to 31 percent. The effective tax rate is generally lower than the statutory rate primarily due to tax credits derived from our investments in qualified affordable housing projects and other investments related to community development and renewable energy sources, as well as earnings from other tax-exempt investments. See Note 13 to the consolidated financial statements for additional information regarding our tax credit investments.

Business Segments

We have four business segments that we monitor and report on to manage our business operations. These segments are consumer lending, commercial lending, investment management, and corporate and other adjustments. Our reportable segments have been determined based upon Valley's internal structure of operations and lines of business. Each business segment is reviewed routinely for its asset growth, contribution to income before income taxes and return on average interest earning assets and impairment (if events or circumstances indicate a possible inability to realize the carrying amount). Expenses related to the branch network, all other components of retail banking, along with the back office departments of our subsidiary bank are allocated from the corporate and other adjustments segment to each of the other three business segments. Interest expense and internal transfer expense (for general corporate expenses) are allocated to each business segment utilizing a "pool funding" methodology, which involves the allocation of uniform funding cost based on each segments' average earning assets outstanding for the period. The financial reporting for each segment contains allocations and reporting in line with our operations, which may not necessarily be comparable to any other financial institution. The accounting for each segment includes internal accounting policies designed to measure consistent and reasonable financial reporting, and may result in income and expense measurements that differ from amounts under U.S. GAAP. Furthermore,

changes in management structure or allocation methodologies and procedures may result in changes in reported segment financial data.

The following tables present the financial data for each business segment for the three months ended June 30, 2017 and 2016:

| | Three Months Ended June 30, 2017 | | | | | Total | |
|---|----------------------------------|--------------------|-----------------------|---------------------------------|-------|--------------|---|
| | Consumer Lending | Commercial Lending | Investment Management | Corporate and Other Adjustments | | | |
| | (\$ in thousands) | | | | | | |
| Average interest earning assets | \$5,125,615 | \$12,576,063 | \$3,714,993 | \$ — | | \$21,416,671 | |
| Income (loss) before income taxes | 15,055 | 58,387 | 9,864 | (12,527) | | 70,779 | |
| Annualized return on average interest earning assets (before tax) | 1.17 | % 1.86 | % 1.06 | % N/A | | 1.32 | % |
| | Three Months Ended June 30, 2016 | | | | | | |
| | Consumer Lending | Commercial Lending | Investment Management | Corporate and Other Adjustments | Total | | |
| | (\$ in thousands) | | | | | | |
| Average interest earning assets | \$5,099,474 | \$11,153,441 | \$3,284,657 | \$ — | | \$19,537,572 | |
| Income (loss) before income taxes | 14,160 | 47,425 | 5,359 | (12,457) | | 54,487 | |
| Annualized return on average interest earning assets (before tax) | 1.11 | % 1.70 | % 0.65 | % N/A | | 1.12 | % |
| Consumer Lending | | | | | | | |

This segment, representing approximately 28.0 percent of our loan portfolio at June 30, 2017, is mainly comprised of residential mortgage loans and automobile loans, and to a lesser extent, home equity loans, secured personal lines of credit and other consumer loans (including credit card loans). The duration of the residential mortgage loan portfolio (which represented 15.4 percent of our loan portfolio at June 30, 2017, including covered loans) is subject to movements in the market level of interest rates and forecasted prepayment speeds. The weighted average life of the automobile loans (representing 6.5 percent of total loans at June 30, 2017) is relatively unaffected by movements in the market level of interest rates. However, the average life may be impacted by new loans as a result of the availability of credit within the automobile marketplace and consumer demand for purchasing new or used automobiles. The consumer lending segment also includes the Wealth Management Division, comprised of trust, asset management, and insurance services.

Average interest earning assets in this segment increased \$26.1 million to \$5.1 billion for the three months ended June 30, 2017 as compared to the second quarter of 2016. The increase was largely due to solid organic growth in secured personal lines of credit and auto loans, partially offset by a decline in residential mortgage loans caused by a high volume of loan sales into the secondary market. Home equity loan volumes and customer usage of existing home equity lines of credit also steadily declined since June 30, 2016 despite the relatively favorable interest rate environment.

Income before income taxes generated by the consumer lending segment increased \$895 thousand to \$15.1 million for the second quarter of 2017 as compared to \$14.2 million for the second quarter of 2016 largely due to an increase in non-interest income of \$2.1 million and a decrease of \$1.4 million in internal transfer expense for the second quarter of 2017 as compared to the same period in 2016. The increase in non-interest income was mostly driven by a \$1.7 million increase in the net gains on sales of loans caused by the increased level of sales during second quarter of 2017.

The positive impact of the aforementioned items was partially offset by a \$2.3 million

61

increase in the provision for loan losses during the three months ended June 30, 2017 as compared to the second quarter of 2016. See further details in the "Allowance for Credit Losses" section.

The net interest margin on the consumer lending portfolio increased 2 basis points to 2.79 percent for the second quarter of 2017 as compared to the same quarter one year ago. The net interest margin was positively impacted by a 4 basis point increase in yield on average loans, partially offset by a 2 basis point increase in the costs associated with our funding sources. The increase in our cost of funds was largely due to higher interest rates on most deposits and short-term borrowings. The increase in the cost of short-term borrowings was mostly due to new FHLB borrowings used to offset a decline in deposits and fund new loans during the second quarter of 2017. See the "Executive Summary" and the "Net Interest Income" sections above for more details on our deposits and other borrowings.

Commercial Lending

The commercial lending segment is comprised of floating rate and adjustable rate commercial and industrial loans and construction loans, as well as fixed rate owner occupied and commercial real estate loans. Due to the portfolio's interest rate characteristics, commercial lending is Valley's business segment that is most sensitive to movements in market interest rates. Commercial and industrial loans totaled approximately \$2.6 billion and represented 14.8 percent of the total loan portfolio at June 30, 2017. Commercial real estate loans and construction loans totaled \$10.1 billion and represented 57.1 percent of the total loan portfolio at June 30, 2017.

Average interest earning assets in this segment increased \$1.4 billion to \$12.6 billion for the three months ended June 30, 2017 as compared to the second quarter of 2016. This increase was due, in part, to solid organic commercial real estate loan growth across many segments of borrowers and purchases of loan participations (mostly consisting of multi-family loans in New York City) totaling over \$551 million during the last 12 months.

For the three months ended June 30, 2017, income before income taxes for the commercial lending segment increased \$11.0 million to \$58.4 million as compared to the same quarter of 2016 mostly due to an increase in net interest income, partially offset by an increase in the internal transfer expense. Net interest income increased \$12.5 million to \$117.8 million for the second quarter of 2017 as compared to the same period in 2016 largely due to the aforementioned organic and purchased loan growth over the last 12 months. Internal transfer expense increased \$849 thousand during the second quarter of 2017 as compared to the same period in 2016.

The net interest margin for this segment decreased 3 basis points to 3.75 percent for the second quarter of 2017 as compared to the same quarter one year ago as a result of a 1 basis point decline in yield on average loans and a 2 basis point increase in the cost of our funding sources. The decrease in the yield on loans was primarily due to the new and refinanced commercial loan volumes at interest rates that are lower somewhat lower than compared to the overall portfolio yield for the second quarter of 2016.

Investment Management

The investment management segment generates a large portion of our income through investments in various types of securities and interest-bearing deposits with other banks. These investments are mainly comprised of fixed rate securities and, depending on our liquid cash position, federal funds sold and interest-bearing deposits with banks (primarily the Federal Reserve Bank of New York) as part of our asset/liability management strategies. The fixed rate investments are one of Valley's least sensitive assets to changes in market interest rates. However, a portion of the investment portfolio is invested in shorter-duration securities to maintain the overall asset sensitivity of our balance sheet. See the "Asset/Liability Management" section below for further analysis.

Average interest earning assets in this segment increased \$430.3 million during the second quarter of 2017 as compared to the second quarter of 2016. The increase was mainly due to purchases of residential mortgage-backed securities classified as held for maturity and available for sale in the last 12 months, partially offset by a \$98.8 million

decrease in average federal funds sold and other interest bearing deposits for the three months ended June 30, 2017 as compared to the same period in 2016.

62

For the quarter ended June 30, 2017, income before income taxes for the investment management segment increased \$4.5 million to \$9.9 million as compared to the second quarter in 2016 mainly due to a \$4.9 million increase in net interest income. The increase in net interest income was mainly driven by the higher average investment balances and higher yields on average investments in the second quarter of 2017 as compared to the same period in 2016.

The net interest margin for this segment increased 30 basis points to 2.22 percent for the second quarter of 2017 as compared to the same quarter one year ago largely due to a 32 basis point increase in the yield on average investments partially offset by a 2 basis point increase in costs associated with our funding sources. The increase in the yield on average investments was largely due to a decline in premium amortization expense caused by lower principal repayments on residential mortgage-backed securities.

Corporate and other adjustments

The amounts disclosed as “corporate and other adjustments” represent income and expense items not directly attributable to a specific segment, including net securities gains and losses not reported in the investment management segment above, interest expense related to subordinated notes, as well as income and expense from derivative financial instruments.

The pre-tax net loss for the corporate segment moderately increased \$70 thousand to \$12.5 million for the three months ended June 30, 2017 as compared to the three months ended June 30, 2016.

The following tables present the financial data for each business segment for the six months ended June 30, 2017 and 2016:

| | Six Months Ended June 30, 2017 | | | | | Total | |
|---|--------------------------------|--------------------|-----------------------|---------------------------------|--|--------------|---|
| | Consumer Lending | Commercial Lending | Investment Management | Corporate and Other Adjustments | | | |
| | (\$ in thousands) | | | | | | |
| Average interest earning assets | \$5,085,438 | \$12,423,025 | \$3,675,895 | \$ — | | \$21,184,358 | |
| Income (loss) before income taxes | 30,459 | 107,765 | 19,576 | (22,855) | | 134,945 | |
| Annualized return on average interest earning assets (before tax) | 1.20 | % 1.73 | % 1.07 | % N/A | | 1.27 | % |
| | Six Months Ended June 30, 2016 | | | | | | |
| | Consumer Lending | Commercial Lending | Investment Management | Corporate and Other Adjustments | | Total | |
| | (\$ in thousands) | | | | | | |
| Average interest earning assets | \$5,147,551 | \$10,975,678 | \$3,389,293 | \$ — | | \$19,512,522 | |
| Income (loss) before income taxes | 28,261 | 91,292 | 9,362 | (23,852) | | 105,063 | |
| Annualized return on average interest earning assets (before tax) | 1.10 | % 1.66 | % 0.55 | % N/A | | 1.08 | % |
| Consumer Lending | | | | | | | |

Average interest earning assets in this segment decreased \$62.1 million to \$5.1 billion for the six months ended June 30, 2017 as compared to the same period in 2016. The decrease was largely due to declines in residential mortgage loans and home equity loans. The decline in residential mortgage loans over the last 12 months was largely driven by normal repayment activity, a high percentage of loans originated for sale rather than investment, and the transfer and the sale of approximately \$170 million and \$104 million of performing fixed rate mortgages

from loans held for investment portfolio to loans held for sale in the fourth quarter of 2016 and the first quarter of 2017, respectively. The negative impact of the decline average residential mortgage loan balance was partially offset by higher auto and secured personal lines of credit loan volumes.

Income before income taxes generated by the consumer lending segment increased \$2.2 million to \$30.5 million for the six months ended June 30, 2017 as compared to \$28.3 million for the same period in 2016 largely due to an increase in non-interest income of \$5.5 million and a decrease of \$2.6 million in internal transfer expense for the six months ended June 30, 2017 as compared to the same period in 2016. The increase in non-interest income was mostly driven by a \$4.0 million increase in the net gains on sales of loans caused by a higher level of sales volumes during the six months ended June 30, 2017. The positive impact of the aforementioned items was partially offset by increases of \$2.8 million and \$2.5 million in the provision for loan losses and non-interest expense, respectively, for the six months ended June 30, 2017 as compared to the same period in 2016.

The net interest margin on the consumer lending portfolio remained unchanged at 2.78 percent for the six months ended June 30, 2017 as compared to the same period one year ago. However, the net interest margin results were comprised of a 2 basis point decline in yield on average loans which was offset by a 2 basis point decrease in the costs associated with our funding sources. The decrease in our cost of funds was primarily due to a 36 basis point decline in the cost of our average long-term borrowings as compared to six months ended June 30, 2016 largely due to modification and maturity of certain high cost borrowings in the second half of 2016. See the "Executive Summary" and the "Net Interest Income" sections above for more details on our deposits and other borrowings.

Commercial Lending

Average interest earning assets in this segment increased \$1.4 billion to \$12.4 billion for the six months ended June 30, 2017 as compared to the same period in 2016. This increase was due, in part, to solid organic commercial real estate loan volumes in New York, New Jersey and Florida and purchases of loan participations during the last 12 months.

For the six months ended June 30, 2017, income before income taxes for the commercial lending segment increased \$16.5 million to \$107.8 million as compared to the same period of 2016 mostly due to an increase in net interest income, partially offset by increases in the provision for credit losses and internal transfer expense. Net interest income increased \$23.4 million to \$230.2 million for the six months ended June 30, 2017 as compared to the same period in 2016 largely due to the aforementioned organic and purchased and loan growth over the last 12 months. The provision for credit losses increased \$1.1 million to \$3.4 million during the six months ended June 30, 2017 as compared to \$2.3 million for the same period in 2016. See further details in the "Allowance for Credit Losses" section. Internal transfer expense increased \$4.7 million during the six months ended June 30, 2017 as compared to the same period in 2016.

The net interest margin for this segment decreased 7 basis points to 3.70 percent for the six months ended June 30, 2017 as compared to the same period one year ago as a result of a 9 basis point decline in yield on average loans, partially offset by a 2 basis point decrease in the cost of our funding sources. The decrease in the yield on loans was primarily due to the new and refinanced loan volumes during the past 12 months at lower interest rates compared to the overall yield of our loan portfolio.

Investment Management

Average interest earning assets in this segment increased \$286.6 million for the six months ended June 30, 2017 as compared to the same period in 2016. The increase was mainly due to purchases of residential mortgage-backed securities classified as held for maturity and available for sale in the last 12 months, partially offset by a \$169.2 million decrease in average federal funds sold and other interest bearing deposits for the six months ended June 30, 2017 as compared to the same period in 2016.

For the six months ended June 30, 2017, income before income taxes for the investment management segment increased \$10.2 million to \$19.6 million as compared to the same period in 2016 mainly due to a \$10.0 million

64

increase in net interest income. The increase in net interest income was mainly driven by the higher average investment balances and higher yield on average investments during the six months ended June 30, 2017 as compared to the same period in 2016.

The net interest margin for this segment increased 40 basis points to 2.23 percent for the six months ended June 30, 2017 as compared to the same period one year ago mostly due to a 38 basis point increase in the yield on average investments and a 2 basis point decrease in costs associated with our funding sources. The increase in the yield on average investments was largely due to a decline in premium amortization expense caused by lower principal repayments on residential mortgage-backed securities during the six months ended June 30, 2017.

Corporate and other adjustments

The pre-tax net loss for the corporate segment decreased \$997 thousand to \$22.9 million for the six months ended June 30, 2017 as compared to \$23.9 million for the same period in 2016 mainly due to a \$2.3 million increase in internal transfer income and \$1.3 million decrease in non-interest expense, partially offset by \$1.8 million decrease in non-interest income. The increase in non-interest expense related to several general expense categories, including, but not limited to, salary and employee benefits expense and amortization of tax credit investments. Non-interest income decreased largely due to a decline in other non-interest income, as well as a \$269 thousand decrease in net gains on securities transactions for the six months ended June 30, 2017 as compared with the same period in 2016. See further details in the "Non-Interest Income" and "Non-Interest Expense" sections above.

ASSET/LIABILITY MANAGEMENT

Interest Rate Sensitivity

Our success is largely dependent upon our ability to manage interest rate risk. Interest rate risk can be defined as the exposure of our interest rate sensitive assets and liabilities to the movement in interest rates. Our Asset/Liability Management Committee is responsible for managing such risks and establishing policies that monitor and coordinate our sources and uses of funds. Asset/Liability management is a continuous process due to the constant change in interest rate risk factors. In assessing the appropriate interest rate risk levels for us, management weighs the potential benefit of each risk management activity within the desired parameters of liquidity, capital levels and management's tolerance for exposure to income fluctuations. Many of the actions undertaken by management utilize fair value analysis and attempts to achieve consistent accounting and economic benefits for financial assets and their related funding sources. We have predominately focused on managing our interest rate risk by attempting to match the inherent risk and cash flows of financial assets and liabilities. Specifically, management employs multiple risk management activities such as optimizing the level of new residential mortgage originations retained in our mortgage portfolio through increasing or decreasing loan sales in the secondary market, product pricing levels, the desired maturity levels for new originations, the composition levels of both our interest earning assets and interest bearing liabilities, as well as several other risk management activities.

We use a simulation model to analyze net interest income sensitivity to movements in interest rates. The simulation model projects net interest income based on various interest rate scenarios over a 12-month and 24-month period. The model is based on the actual maturity and re-pricing characteristics of rate sensitive assets and liabilities. The model incorporates certain assumptions which management believes to be reasonable regarding the impact of changing interest rates and the prepayment assumptions of certain assets and liabilities as of June 30, 2017. The model assumes immediate changes in interest rates without any proactive change in the composition or size of the balance sheet, or other future actions that management might undertake to mitigate this risk. In the model, the forecasted shape of the yield curve remains static as of June 30, 2017. The impact of interest rate derivatives, such as interest rate swaps and caps, is also included in the model.

Our simulation model is based on market interest rates and prepayment speeds prevalent in the market as of June 30, 2017. Although the size of Valley's balance sheet is forecasted to remain static as of June 30, 2017 in our model, the composition is adjusted to reflect new interest earning assets and funding originations coupled with rate

65

spreads utilizing our actual originations during the second quarter of 2017. The model also utilizes an immediate parallel shift in the market interest rates at June 30, 2017.

The assumptions used in the net interest income simulation are inherently uncertain. Actual results may differ significantly from those presented in the table below due to the frequency and timing of changes in interest rates and changes in spreads between maturity and re-pricing categories. Overall, our net interest income is affected by changes in interest rates and cash flows from our loan and investment portfolios. We actively manage these cash flows in conjunction with our liability mix, duration and interest rates to optimize the net interest income, while structuring the balance sheet in response to actual or potential changes in interest rates. Additionally, our net interest income is impacted by the level of competition within our marketplace. Competition can negatively impact the level of interest rates attainable on loans and increase the cost of deposits, which may result in downward pressure on our net interest margin in future periods. Other factors, including, but not limited to, the slope of the yield curve and projected cash flows will impact our net interest income results and may increase or decrease the level of asset sensitivity of our balance sheet.

Convexity is a measure of how the duration of a financial instrument changes as market interest rates change. Potential movements in the convexity of bonds held in our investment portfolio, as well as the duration of the loan portfolio may have a positive or negative impact on our net interest income in varying interest rate environments. As a result, the increase or decrease in forecasted net interest income may not have a linear relationship to the results reflected in the table above. Management cannot provide any assurance about the actual effect of changes in interest rates on our net interest income.

The following table reflects management's expectations of the change in our net interest income over the next 12-month period in light of the aforementioned assumptions. While an instantaneous and severe shift in interest rates was used in this simulation model, we believe that any actual shift in interest rates would likely be more gradual and would therefore have a more modest impact than shown in the table below.

| Changes in Interest Rates (in basis points) | Estimated Change in Future Net Interest Income | |
|--|---|----------------------|
| | Dollar Change (\$ in thousands) | Percentage Change |
| +200 | \$ (4,721) | (0.72)% |
| +100 | (830) | (0.13) |
| -100 | (23,033) | (3.50) |

As noted in the table above, a 100 basis point immediate increase in interest rates combined with a static balance sheet where the size, mix, and proportions of assets and liabilities remain unchanged is projected to decrease net interest income over the next 12 months by 0.13 percent. The Bank's sensitivity to changes in market rates changed in both size and direction as compared to December 31, 2016 (which was an increase of 0.03 percent in net interest income over a 12 month period). However, the change in sensitivity is not expected to materially impact Valley's ability to generate net interest income. In addition, we believe the balance sheet remains well-positioned to respond positively to a rising market interest rate environment. Our current asset sensitivity to a 100 basis point immediate increase in interest rates is impacted by, among other factors, asset cash flow and repricing characteristics, complemented by a funding structure that provides for very stable earnings and low volatility. Future changes including, but not limited to, the slope of the yield curve and projected cash flows will affect our net interest income results and may increase or decrease the level of net interest income sensitivity.

Our interest rate swaps and caps designated as cash flow hedging relationships are designed to protect us from upward movements in interest rates on certain deposits and other borrowings based on the prime rate (as reported by The Wall

Street Journal) or the three-month LIBOR rate. Our cash flow interest rate swaps had a total notional value of \$582 million at June 30, 2017 and currently pay fixed and receive floating rates. We also utilize fair value and non-designated hedge interest rate swaps to effectively convert fixed rate loans, and a much smaller amount of certain brokered certificates of deposit, to floating rate instruments. The cash flow hedges are expected to benefit

our net interest income in a rising interest rate environment. However, due to the prolonged low level of market interest rates and the strike rate of these instruments, the cash flow hedge interest rate swaps and cap negatively impacted our net interest income during the six months ended June 30, 2017. This negative trend will likely continue based upon the current market expectations regarding the Federal Reserve's monetary policies which are designed to impact the level of market interest rates. However, \$100 million of the \$582 million in notional value swaps expired in July 2017 and will reduce the overall negative impact of such instruments on our future net interest income. See Note 11 to the consolidated financial statements for further details on our derivative transactions.

Liquidity

Bank Liquidity

Liquidity measures the ability to satisfy current and future cash flow needs as they become due. A bank's liquidity reflects its ability to meet loan demand, to accommodate possible outflows in deposits and to take advantage of interest rate opportunities in the marketplace. Liquidity management is monitored by our Asset/Liability Management Committee and the Investment Committee of the Board of Directors of Valley National Bank, which review historical funding requirements, current liquidity position, sources and stability of funding, marketability of assets, options for attracting additional funds, and anticipated future funding needs, including the level of unfunded commitments. Our goal is to maintain sufficient liquidity to cover current and potential funding requirements.

The Bank has no required regulatory liquidity ratios to maintain; however, it adheres to an internal liquidity policy. The current policy maintains that we may not have a ratio of loans to deposits in excess of 125 percent or reliance on wholesale funding greater than 25 percent of total funding. The Bank was in compliance with the foregoing policies at June 30, 2017.

On the asset side of the balance sheet, the Bank has numerous sources of liquid funds in the form of cash and due from banks, interest bearing deposits with banks (including the Federal Reserve Bank of New York), investment securities held to maturity that are maturing within 90 days or would otherwise qualify as maturities if sold (i.e., 85 percent of original cost basis has been repaid), investment securities available for sale, loans held for sale, and, from time to time, federal funds sold and receivables related to unsettled securities transactions. These liquid assets totaled approximately \$2.1 billion, representing 9.7 percent of earning assets, at June 30, 2017 and \$1.8 billion, representing 8.9 percent of earning assets, at December 31, 2016. Of the \$2.1 billion of liquid assets at June 30, 2017, approximately \$704 million of various investment securities were pledged to counterparties to support our earning asset funding strategies. We anticipate the receipt of approximately \$364 million in principal from securities in the total investment portfolio over the next 12 months due to normally scheduled principal repayments and expected prepayments of certain securities, primarily residential mortgage-backed securities.

Additional liquidity is derived from scheduled loan payments of principal and interest, as well as prepayments received. Loan principal payments (including loans held for sale at June 30, 2017) are projected to be approximately \$4.5 billion over the next 12 months. As a contingency plan for significant funding needs, liquidity could also be derived from the sale of conforming residential mortgages from our loan portfolio, or from the temporary curtailment of lending activities.

On the liability side of the balance sheet, we utilize multiple sources of funds to meet liquidity needs, including retail and commercial deposits, brokered and municipal deposits, and short-term and long-term borrowings. Our core deposit base, which generally excludes fully insured brokered deposits and both retail and brokered certificates of deposit over \$250 thousand, represents the largest of these sources. Average core deposits totaled approximately \$15.3 billion and \$14.7 billion for the six months ended June 30, 2017 and for the year ended December 31, 2016, respectively, representing 72.1 percent and 73.9 percent of average earning assets for the respective periods. The level of interest bearing deposits is affected by interest rates offered, which is often influenced by our need for funds and

the need to match the maturities of assets and liabilities.

67

Additional funding may be provided through deposit gathering networks and in the form of federal funds purchased through our well established relationships with numerous correspondent banks. While there are no firm lending commitments currently in place, management believes that we could borrow approximately \$727 million for a short time from these banks on a collective basis. The Bank is also a member of the Federal Home Loan Bank of New York (FHLB) and has the ability to borrow from them in the form of FHLB advances secured by pledges of certain eligible collateral, including but not limited to U.S. government and agency mortgage-backed securities and a blanket assignment of qualifying first lien mortgage loans, consisting of both residential mortgage and commercial real estate loans. Furthermore, we are able to obtain overnight borrowings from the Federal Reserve Bank via the discount window as a contingency for additional liquidity. At June 30, 2017, our borrowing capacity under the Federal Reserve's discount window was \$1.1 billion.

We also have access to other short-term and long-term borrowing sources to support our asset base, such as repos (i.e., securities sold under agreements to repurchase). Our short-term borrowings increased \$654 million to \$1.7 billion at June 30, 2017 as compared to December 31, 2016 due to increases of \$625 million and \$29 million in FHLB advances and repo balances, respectively. The new FHLB advances were used as alternate funding for a decline in money market deposits during the first half of 2017, as well as for additional liquidity and loan funding purposes.

Corporation Liquidity

Valley's recurring cash requirements primarily consist of dividends to preferred and common shareholders and interest expense on subordinated notes and junior subordinated debentures issued to capital trusts. As part of our on-going asset/liability management strategies, Valley could also use cash to repurchase shares of its outstanding common stock under its share repurchase program or redeem its callable junior subordinated debentures. These cash needs are routinely satisfied by dividends collected from the Bank. Projected cash flows from the Bank are expected to be adequate to pay preferred and common dividends, if declared, and interest expense payable to subordinated note holders and capital trusts, given the current capital levels and current profitable operations of the bank subsidiary. In addition to dividends received from the Bank, Valley can satisfy its cash requirements by utilizing its own cash and potential new funds borrowed from outside sources or capital issuances. Valley also has the right to defer interest payments on the junior subordinated debentures, and therefore distributions on its trust preferred securities for consecutive quarterly periods up to five years, but not beyond the stated maturity dates, and subject to other conditions.

Investment Securities Portfolio

As of June 30, 2017, we had \$1.8 billion and \$1.5 billion in held to maturity and available for sale investment securities, respectively. Our total investment portfolio was comprised of U.S. Treasury securities, U.S. government agencies, tax-exempt issuances of states and political subdivisions, residential mortgage-backed securities (including 9 private label mortgage-backed securities), single-issuer trust preferred securities principally issued by bank holding companies (including 2 pooled securities), high quality corporate bonds and equity securities issued by banks at June 30, 2017. There were no securities in the name of any one issuer exceeding 10 percent of shareholders' equity, except for residential mortgage-backed securities issued by Ginnie Mae, Fannie Mae and Freddie Mac.

Among other securities, our investments in the private label mortgage-backed securities, trust preferred securities, equity securities, and bank issued corporate bonds may pose a higher risk of future impairment charges to us as a result of the uncertain economic environment and its potential negative effect on the future performance of the security issuers and, if applicable, the underlying mortgage loan collateral of the security.

Other-Than-Temporary Impairment Analysis

We may be required to record impairment charges on our investment securities if they suffer a decline in value that is considered other-than-temporary. Numerous factors, including lack of liquidity for re-sales of certain investment securities, absence of reliable pricing information for investment securities, adverse changes in business climate, adverse actions by regulators, or unanticipated changes in the competitive environment could have a negative effect on our investment portfolio and may result in other-than temporary impairment on our investment securities in future periods. See our Annual Report on Form 10-K for the year ended December 31, 2016, for additional information regarding our impairment analysis by security type.

The investment grades in the table below reflect the most current independent analysis performed by third parties of each security as of the date presented and not necessarily the investment grades at the date of our purchase of the securities. For many securities, the rating agencies may not have performed an independent analysis of the tranches owned by us, but rather an analysis of the entire investment pool. For this and other reasons, we believe the assigned investment grades may not accurately reflect the actual credit quality of each security and should not be viewed in isolation as a measure of the quality of our investment portfolio.

The following table presents the held to maturity and available for sale investment securities portfolios by investment grades at June 30, 2017.

| | June 30, 2017 | | | |
|--|-------------------|------------------------------|-------------------------------|-------------|
| | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |
| | (in thousands) | | | |
| Held to maturity investment grades:* | | | | |
| AAA Rated | \$1,368,246 | \$ 24,681 | \$(15,790) | \$1,377,137 |
| AA Rated | 241,927 | 9,331 | (26) | 251,232 |
| A Rated | 35,541 | 1,596 | — | 37,137 |
| Non-investment grade | 3,618 | 117 | (41) | 3,694 |
| Not rated | 172,931 | 141 | (13,540) | 159,532 |
| Total investment securities held to maturity | \$1,822,263 | \$ 35,866 | \$(29,397) | \$1,828,732 |
| Available for sale investment grades:* | | | | |
| AAA Rated | \$1,312,640 | \$ 2,986 | \$(15,403) | \$1,300,223 |
| AA Rated | 56,910 | 296 | (236) | 56,970 |
| A Rated | 21,994 | 13 | (57) | 21,950 |
| BBB Rated | 41,276 | 573 | (155) | 41,694 |
| Non-investment grade | 11,860 | 737 | (1,346) | 11,251 |
| Not rated | 32,235 | 491 | (760) | 31,966 |
| Total investment securities available for sale | \$1,476,915 | \$ 5,096 | \$(17,957) | \$1,464,054 |

Rated using external rating agencies (primarily S&P and Moody's). Ratings categories include the entire range. For *example, "A rated" includes A+, A, and A-. Split rated securities with two ratings are categorized at the higher of the rating levels.

The held to maturity portfolio includes \$172.9 million in investments not rated by the rating agencies with aggregate unrealized losses of \$13.5 million at June 30, 2017. The unrealized losses for this category primarily relate to 4 single-issuer bank trust preferred issuances with a combined amortized cost of \$35.9 million. All single-issuer trust preferred securities classified as held to maturity, including the aforementioned four securities, are paying in accordance with their terms and have no deferrals of interest or defaults. Additionally, we analyze the performance of each issuer on a quarterly basis, including a review of performance data from the issuer's most recent bank regulatory report to assess the company's credit risk and the probability of impairment of the contractual cash flows of the applicable security. Based upon our quarterly review at June 30, 2017, all of the issuers appear to meet the regulatory capital minimum requirements to be considered a "well-capitalized" financial institution and/or have maintained performance levels adequate to support the contractual cash flows of the security.

There was no other-than-temporary impairment recognized in earnings as a result of Valley's impairment analysis of its securities during the three and six months ended June 30, 2017 and 2016 as the collateral supporting much of the investment securities has improved or performed as expected.

Loan Portfolio

The following table reflects the composition of the loan portfolio as of the dates presented:

| | June 30, 2017 | March 31, 2017 | December 31, 2016 | September 30, 2016 | June 30, 2016 | |
|-------------------------------|-------------------|-------------------|----------------------|-----------------------|------------------|---|
| | (\$ in thousands) | | | | | |
| Loans | | | | | | |
| Commercial and industrial | \$2,631,312 | \$2,642,319 | \$2,638,195 | \$2,558,968 | \$2,528,749 | |
| Commercial real estate: | | | | | | |
| Commercial real estate | 9,230,514 | 9,016,418 | 8,719,667 | 8,313,855 | 8,018,794 | |
| Construction | 881,073 | 835,854 | 824,946 | 802,568 | 768,847 | |
| Total commercial real estate | 10,111,587 | 9,852,272 | 9,544,613 | 9,116,423 | 8,787,641 | |
| Residential mortgage | 2,724,777 | 2,745,447 | 2,867,918 | 2,826,130 | 3,055,353 | |
| Consumer: | | | | | | |
| Home equity | 450,510 | 458,891 | 469,009 | 476,820 | 485,730 | |
| Automobile | 1,150,343 | 1,150,053 | 1,139,227 | 1,121,606 | 1,141,793 | |
| Other consumer | 642,231 | 600,516 | 577,141 | 534,188 | 499,914 | |
| Total consumer loans | 2,243,084 | 2,209,460 | 2,185,377 | 2,132,614 | 2,127,437 | |
| Total loans ⁽¹⁾⁽²⁾ | \$17,710,760 | \$17,449,498 | \$17,236,103 | \$16,634,135 | \$16,499,180 | |
| As a percent of total loans: | | | | | | |
| Commercial and industrial | 14.8 | % 15.1 | % 15.3 | % 15.4 | % 15.3 | % |
| Commercial real estate | 57.1 | % 56.5 | % 55.4 | % 54.8 | % 53.3 | % |
| Residential mortgage | 15.4 | % 15.7 | % 16.6 | % 17.0 | % 18.5 | % |
| Consumer loans | 12.7 | % 12.7 | % 12.7 | % 12.8 | % 12.9 | % |
| Total | 100.0 | % 100.0 | % 100.0 | % 100.0 | % 100.0 | % |

(1) Includes covered loans subject to loss-sharing agreements with the FDIC (primarily consisting of residential mortgage loans and commercial real estate loans) totaling \$44.5 million, \$47.8 million, \$70.4 million, \$76.0 million, and \$81.1 million at June 30, 2017, March 31, 2017, December 31, 2016, September 30, 2016 and June 30, 2016, respectively.

(2) Includes net unearned premiums and deferred loan costs of \$16.7 million, \$15.7 million, \$15.3 million, \$10.5 million, and \$8.3 million, at June 30, 2017, March 31, 2017, December 31, 2016, September 30, 2016 and June 30, 2016, respectively.

Total loans increased \$261.3 million to approximately \$17.7 billion at June 30, 2017 from March 31, 2017. Our loan portfolio includes purchased credit-impaired (PCI) loans, which are loans acquired at a discount that is due, in part, to credit quality. At June 30, 2017, our PCI loan portfolio decreased \$113.2 million to \$1.5 billion as compared to March 31, 2017 primarily due to continued larger loan repayments, of which some resulted from continued efforts by management to encourage borrower prepayment. The increase in non-PCI loan portion of the loan portfolio (net of \$122 million in performing residential mortgage loans transferred to loans held for sale during the second quarter) was largely due to a \$259.3 million increase in total commercial real estate loans. During the second quarter of 2017, Valley also originated \$36.8 million of residential mortgage loans for sale rather than investment. Loans held for sale totaled \$139.6 million and \$115.1 million at June 30, 2017 and March 31, 2017, respectively. See additional information regarding our residential mortgage loan activities below.

Total commercial and industrial loans decreased \$11.0 million from March 31, 2017 to approximately \$2.6 billion at June 30, 2017. The loan volumes were outpaced by a \$30.8 million decline in the PCI loan portion of the portfolio during the second quarter of 2017. Exclusive of the decline in PCI loans, the non-PCI commercial and industrial loan portfolio increased by \$19.8 million, or approximately 3.3 percent on an annualized basis, to \$2.4 billion at June 30, 2017 from March 31, 2017. The second quarter growth in non-PCI loans was largely due to a secured commercial

lending arrangement with a large regional auto retailer. In addition to the PCI loan repayments, the level of loan growth within this portfolio continues to be challenged by strong market competition for both new and existing commercial loan borrowers within our primary markets.

71

Commercial real estate loans (excluding construction loans) increased \$214.1 million from March 31, 2017 to \$9.2 billion at June 30, 2017 mainly due to a \$250 million, or 12.6 percent on an annualized basis, increase in the non-PCI loan portfolio. The increase in non-PCI loans was primarily due to solid organic loan volumes in New York, New Jersey and Florida, particularly amongst our pre-existing long-term customer base, as well as approximately \$22 million of loan participations purchased in the second quarter of 2017. Each purchased participation loan is reviewed by Valley under its normal underwriting criteria and stress-tested to assure its credit quality. The organic loan volumes generated across a broad-based segment of borrowers within the commercial real estate portfolio were partially offset by a \$35.9 million decline in the acquired PCI loan portion of the portfolio. Construction loans increased \$45.2 million to \$881.1 million at June 30, 2017 from March 31, 2017. The increase was mostly due to advances on existing construction projects.

Total residential mortgage loans decreased \$20.7 million, or approximately 3.0 percent on an annualized basis, to approximately \$2.7 billion at June 30, 2017 from March 31, 2017 mostly due to the aforementioned transfer of \$122 million in mortgage loans to loans held for sale and new loans originated for sale rather than investment during the second quarter of 2017. Valley sold approximately \$136.6 million of residential mortgage loans (including \$115.1 million of loans held for sale at March 31, 2017) during the second quarter of 2017. New and refinanced residential mortgage loan originations totaled approximately \$194.4 million for the second quarter of 2017 as compared to \$163.7 million and \$177.7 million for the first quarter of 2017 and second quarter of 2016, respectively. Of the \$194.4 million in total originations, \$23.8 million, or 12.3 percent, represented new Florida residential mortgage loans. Home equity loans decreased \$8.4 million to \$450.5 million at June 30, 2017 as compared to March 31, 2017 mostly due to PCI loan repayment activity. New home equity loan volumes and customer usage of existing home equity lines of credit continue to be weak, despite the relatively favorable low interest rate environment.

Automobile loans increased by \$290 thousand to \$1.2 billion at June 30, 2017 as compared to March 31, 2017. The auto loan portfolio remained relatively unchanged as new auto loan origination volumes declined as compared to the first quarter of 2017 largely due to slower application activity during the first half of the second quarter of 2017. Our Florida dealership network contributed over \$23 million in auto loan originations, representing approximately 18 percent of Valley's total new auto loan production for the second quarter of 2017 as compared to approximately \$24 million, or 17 percent, of Valley's total auto originations for the first quarter of 2017.

Other consumer loans increased \$41.7 million, or 27.8 percent on an annualized basis, to \$642.2 million at June 30, 2017 as compared to \$600.5 million at March 31, 2017 mainly due to continued growth and customer usage of collateralized personal lines of credit.

Most of our lending is in northern and central New Jersey, New York City, Long Island and Florida, with the exception of smaller auto and residential mortgage loan portfolios derived from the other neighboring states of New Jersey, which could present a geographic and credit risk if there was another significant broad based economic downturn or a prolonged economic recovery within these regions. We are witnessing new loan activity across Valley's entire geographic footprint, including new loans and solid loan pipelines from our Florida lending operations. However, the New Jersey and New York Metropolitan markets continue to account for a disproportionately larger percentage of our lending activity. To mitigate these risks, we are making efforts to maintain a diversified portfolio as to type of borrower and loan to guard against a potential downward turn in any one economic sector. Geographically, we may make further inroads into the Florida lending market, through bank acquisitions (such as our recently announced merger agreement with USAB - See "Executive Summary" section above for details), select de novo branch efforts or adding lending staff.

Purchased Credit-Impaired Loans (Including Covered Loans)

PCI loans totaled \$1.5 billion and \$1.8 billion at June 30, 2017 and December 31, 2016, respectively, mostly consisting of loans acquired in business combinations subsequent to 2011 and covered loans in which the Bank will share losses with the FDIC under loss-sharing agreements. Our covered loans, consisting primarily of residential mortgage loans and commercial real estate loans, totaled \$44.5 million and \$70.4 million at June 30, 2017 and December 31, 2016, respectively. The decrease in covered loans was largely due to the expiration of a commercial loss-sharing agreement acquired from 1st United Bancorp, Inc. effective January 1, 2017 and the reclassification of such loans to non-covered PCI loans during the first quarter of 2017. Additional information regarding all of our loss-sharing agreements with the FDIC can be found in our Annual Report on Form 10-K for the year ended December 31, 2016.

PCI loans are accounted for in accordance with ASC Subtopic 310-30 and are initially recorded at fair value (as determined by the present value of expected future cash flows) with no valuation allowance (i.e., the allowance for loan losses), and aggregated and accounted for as pools of loans based on common risk characteristics. The difference between the undiscounted cash flows expected at acquisition and the initial carrying amount (fair value) of the PCI loans, or the “accretable yield,” is recognized as interest income utilizing the level-yield method over the life of each pool. Contractually required payments for interest and principal that exceed the undiscounted cash flows expected at acquisition, or the “non-accretable difference,” are not recognized as a yield adjustment, loss accrual or valuation allowance. Reclassifications of the non-accretable difference to the accretable yield may occur subsequent to the loan acquisition dates due to increases in expected cash flows of the loan pools.

We reevaluate expected and contractual cash flows on a quarterly basis. Unlike contractual cash flows which are determined based on known factors, significant management assumptions are necessary in forecasting the estimated cash flows. We attempt to ensure the forecasted expectations are reasonable based on the information currently available; however, due to the uncertainties inherent in the use of estimates, actual cash flow results may differ from our forecast and the differences may be significant. To mitigate such differences, we carefully prepare and review the assumptions utilized in forecasting estimated cash flows.

On a quarterly basis, we also analyze the actual cash flow versus the forecasts at the loan pool level and variances are reviewed to determine their cause. If a re-forecast of future estimated cash flow is necessary, we will adjust the credit loss expectations for the loan pools. These adjustments are based, in part, on actual loss severities recognized for each loan type, as well as changes in the probability of default. For periods in which we don't reforecast estimated cash flows, the prior reporting period's estimated cash flows are adjusted to reflect the actual cash received and credit events which transpired during the current reporting period.

For the pools with better than expected cash flows, the forecasted increase is recorded as a prospective adjustment to our interest income on these loan pools over future periods. The decrease in the FDIC loss-share receivable due to the increase in expected cash flows for covered loan pools, if applicable, is recognized on a prospective basis over the shorter period of the lives of the loan pools and the loss-share agreements accordingly with a corresponding reduction in non-interest income for the period. Conversely, an increase or decrease in expected future cash flows of covered loans since the acquisition dates will increase or decrease (if applicable) the clawback liability (the amount the FDIC requires us to pay back if certain thresholds are met) accordingly.

The following tables summarize the changes in the carrying amounts of PCI loans (net of the allowance for loan losses, if applicable), and the accretible yield on these loans for the three and six months ended June 30, 2017 and 2016.

| | Three Months Ended June 30, | | | |
|--------------------------------------|-----------------------------|---------------------|--------------------|---------------------|
| | 2017 | | 2016 | |

FDIC Loss-Share Receivable Related to Covered Loans and Foreclosed Assets

The receivable arising from the loss-sharing agreements with the FDIC is measured separately from the covered loan portfolio because the agreements are not contractually part of the covered loans and are not transferable should the Bank choose to dispose of the covered loans. The FDIC loss share receivable (which is included in other assets on Valley's consolidated statements of financial condition) totaled \$7.1 million and \$7.2 million at June 30, 2017 and December 31, 2016, respectively.

Non-performing Assets

Non-performing assets (excluding PCI loans) include non-accrual loans, other real estate owned (OREO), other repossessed assets (which mainly consist of automobiles) and non-accrual debt securities at June 30, 2017. Loans are generally placed on non-accrual status when they become past due in excess of 90 days as to payment of principal or interest. Exceptions to the non-accrual policy may be permitted if the loan is sufficiently collateralized and in the process of collection. OREO is acquired through foreclosure on loans secured by land or real estate. OREO and other repossessed assets are reported at the lower of cost or fair value, less cost to sell at the time of acquisition and at the lower of fair value, less estimated costs to sell, or cost thereafter. Our non-performing assets totaling \$54.6 million at June 30, 2017 increased 5.9 percent from March 31, 2017 primarily due to a moderate increase in non-accrual loans, but decreased 11.0 percent as compared to June 30, 2016 (as shown in the table below). Non-performing assets as a percentage of total loans and non-performing assets totaled 0.31 percent and 0.29 percent at June 30, 2017 and March 31, 2017, respectively. Overall, we believe total non-performing assets has remained relatively low as a percentage of

the total loan portfolio and non-performing assets over the last 12 month period and is reflective of our consistent approach to the loan underwriting criteria for both Valley originated loans and loans purchased from third parties.

74

Past due loans and non-accrual loans in the table below exclude PCI loans. Under U.S. GAAP, the PCI loans (acquired at a discount that is due, in part, to credit quality) are accounted for on a pool basis and are not subject to delinquency classification in the same manner as loans originated by Valley. For details regarding performing and non-performing PCI loans, see the "Credit quality indicators" section in Note 7 to the consolidated financial statements.

75

The following table sets forth by loan category accruing past due and non-performing assets on the dates indicated in conjunction with our asset quality ratios:

| | June 30, 2017 | March 31, 2017 | December 31, 2016 | September 30, 2016 | June 30, 2016 |
|---|-------------------|-------------------|----------------------|-----------------------|------------------|
| | (\$ in thousands) | | | | |
| Accruing past due loans: ⁽¹⁾ | | | | | |
| 30 to 59 days past due: | | | | | |
| Commercial and industrial | \$2,391 | \$29,734 | \$ 6,705 | \$ 4,306 | \$5,187 |
| Commercial real estate | 6,983 | 11,637 | 5,894 | 9,385 | 5,076 |
| Construction | — | 7,760 | 6,077 | — | — |

| Total non-accrual loans | 42,154 | 38,288 | 37,508 | 38,441 | 47,879 |
| Other real estate owned (OREO) ⁽²⁾ | 10,182 | 10,737 | 9,612 | 10,257 | 10,903 |
| Other repossessed assets | 342 | 475 | 384 | 307 | 369 |
| Non-accrual debt securities ⁽³⁾ | 1,878 | 2,007 | 1,935 | 2,025 | 2,118 |
| Total non-performing assets (NPAs) | \$54,556 | \$51,507 | \$ 49,439 | \$ 51,030 | \$61,269 |
| Performing troubled debt restructured loans | \$109,802 | \$80,360 | \$ 85,166 | \$ 81,093 | \$82,140 |
| Total non-accrual loans as a % of loans | 0.24 | % 0.22 | % 0.22 | % 0.23 | % 0.29 |
| Total NPAs as a % of loans and NPAs | 0.31 | 0.29 | 0.29 | 0.31 | 0.37 |
| Total accruing past due and non-accrual loans as a % of loans | 0.47 | 0.61 | 0.55 | 0.47 | 0.49 |
| Allowance for loan losses as a % of non-accrual loans | 276.24 | 301.51 | 305.05 | 287.97 | 225.75 |

(1) Past due loans and non-accrual loans exclude PCI loans that are accounted for on a pool basis.

This table excludes covered OREO properties related to FDIC-assisted transactions totaling \$558 thousand, \$1.0 million, and \$1.2 million at December 31, 2016, September 30, 2016, and June 30, 2016, respectively. There were no covered OREO properties at June 30, 2017 and March 31, 2017.

(3) Includes other-than-temporarily impaired trust preferred securities classified as available for sale, which are presented at carrying value, net of net unrealized losses totaling \$875 thousand, \$745 thousand, \$817 thousand, \$728 thousand, \$634 thousand at June 30, 2017, March 31, 2017, December 31, 2016, September 30, 2016 and June 30, 2016, respectively.

Loans past due 30 to 59 days decreased \$42.0 million to \$18.4 million at June 30, 2017 as compared to March 31, 2017. Within the past due category, commercial and industrial loans decreased \$27.3 million mainly due to \$19.2 million loans collateralized by New York City (NYC) taxi cab medallions reported in this delinquency category at March 31, 2017 which were current to their contractual payments at June 30, 2017, as well as normal fluctuations in this early stage delinquency category. Commercial real estate loans past due 30 to 59 days decreased by \$4.7 million largely due to migration of one internally classified relationship totaling \$5.9 million included from this delinquency category at March 31, 2017 to loans past due 60 to 89 days at June 30, 2017. There were no construction loans past due 30 to 59 days at June 30, 2017 as compared to \$7.8 million at March 31, 2017 due to a few previously past due loans that were current to their contractual payments at June 30, 2017.

Loans past due 60 to 89 days increased \$8.8 million to \$14.5 million at June 30, 2017 as compared to March 31, 2017 largely due to a \$7.9 million increase in past due commercial real estate loans caused, in part, by the aforementioned migration of one internally classified relationship totaling \$5.9 million reported within the 30 to 59 days past due delinquency category at March 31, 2017. Commercial and industrial loans also increased \$2.3 million to \$2.7 million at June 30, 2017 as compared to March 31, 2017 mostly due to three loans collateralized by NYC taxi cab medallions totaling \$2.4 million. Partially offsetting these increases, residential mortgage delinquencies declined \$2.5 million at June 30, 2017 as compared to March 31, 2017.

Loans past due 90 days or more and still accruing increased \$6.7 million to \$8.8 million at June 30, 2017 as compared to \$2.1 million at March 31, 2017 largely due to performing matured construction and commercial real estate loans in the normal process of renewal totaling \$5.2 million. All of the loans past due 90 days or more and still accruing are considered to be well secured and in the process of collection.

Non-accrual loans increased \$3.9 million to \$42.2 million at June 30, 2017 as compared to \$38.3 million at March 31, 2017 largely due to two impaired Chicago taxi medallion relationships (within the commercial and industrial category) with a combined total of \$5.6 million that were placed on non-accrual at June 30, 2017.

At June 30, 2017, our entire taxi medallion loan portfolio totaled \$140.5 million, consisting of \$130.4 million and \$10.1 million of NYC and Chicago taxi medallion loans, respectively. At June 30, 2017, the medallion portfolio included impaired loans of \$37.4 million with related reserves of \$3.7 million within the allowance for loan losses as compared to impaired loans of \$6.3 million with related reserves of \$2.6 million at March 31, 2017. At June 30, 2017, the impaired medallion loans largely consisted of performing troubled debt restructured (TDR) loans and the aforementioned non-accrual Chicago taxi cab medallion loans totaling \$5.6 million. Loans past due 30 to 59 days and loans past due 60 to 89 days include \$809 thousand and \$2.4 million of NYC taxi medallions at June 30, 2017, respectively, which are all outstanding to one borrower. We are currently renegotiating the terms of these past due loans. Valley's historical taxi medallion lending criteria has been conservative in regards to capping the loan amounts in relation to market valuations, as well as obtaining personal guarantees and other collateral whenever possible. However, we continue to closely monitor this portfolio's performance and the potential impact of the changes in

market valuation for taxi medallions due to competing car service providers and other factors.

OREO properties decreased \$555 thousand to \$10.2 million at June 30, 2017 from \$10.7 million at March 31, 2017. The residential mortgage and consumer loans secured by residential real estate properties for which formal foreclosure proceedings are in process totaled \$6.2 million at June 30, 2017.

77

Troubled debt restructured loans (TDRs) represent loan modifications for customers experiencing financial difficulties where a concession has been granted. Performing TDRs (i.e., TDRs not reported as loans 90 days or more past due and still accruing or as non-accrual loans) increased \$29.4 million to \$109.8 million at June 30, 2017 as compared to \$80.4 million at March 31, 2017 mainly due to taxi medallion loans totaling \$33.4 million that were restructured and classified as TDR during the second quarter of 2017. Performing TDRs consisted of 124 loans (primarily in the commercial and industrial loan and commercial real estate portfolios). On an aggregate basis, the \$109.8 million in performing TDRs at June 30, 2017 had a modified weighted average interest rate of approximately 4.53 percent as compared to a pre-modification weighted average interest rate of 4.30 percent. The increase in the modified weighted average interest rate of the performing TDRs as compared to the pre-modification weighted average interest rate was largely due to several loans restructured at higher current market interest rates, but with extended loan terms.

Despite the increase in taxi medallion loans classified as TDR and non-accrual loans during the second quarter of 2017, we believe our overall credit quality metrics continued to reflect our solid underwriting standards at June 30, 2017. However, we can provide no assurances as to the future level of our loan delinquencies.

Allowance for Credit Losses

The allowance for credit losses includes the allowance for loan losses and the reserve for unfunded commercial letters of credit. Management maintains the allowance for credit losses at a level estimated to absorb probable losses inherent in the loan portfolio and unfunded letter of credit commitments at the balance sheet dates, based on ongoing evaluations of the loan portfolio. Our methodology for evaluating the appropriateness of the allowance for loan losses includes:

- segmentation of the loan portfolio based on the major loan categories, which consist of commercial, commercial real estate (including construction), residential mortgage, and other consumer loans (including automobile and home equity loans);

- tracking the historical levels of classified loans and delinquencies;

- assessing the nature and trend of loan charge-offs;

- providing specific reserves on impaired loans; and

- evaluating the PCI loan pools for additional credit impairment subsequent to the acquisition dates.

Additionally, the qualitative factors, such as the volume of non-performing loans, concentration risks by size, type, and geography, new markets, collateral adequacy, credit policies and procedures, staffing, underwriting consistency, loan review and economic conditions are taken into consideration when evaluating the adequacy of the allowance for credit losses. The allowance for credit loss methodology and accounting policy are fully described in Part II, Item 7 and Note 1 to the consolidated financial statements in Valley's Annual Report on Form 10-K for the year ended December 31, 2016.

While management utilizes its best judgment and information available, the ultimate adequacy of the allowance for credit losses is dependent upon a variety of factors largely beyond our control, including the view of the OCC toward loan classifications, performance of the loan portfolio, and the economy. The OCC may require, based on their judgments about information available to them at the time of their examination, that certain loan balances be charged off or require that adjustments be made to the allowance for loan losses when their credit evaluations differ from those of management.

Edgar Filing: VALLEY NATIONAL BANCORP - Form 10-Q

The table below summarizes the relationship among loans, loans charged-off, loan recoveries, the provision for credit losses and the allowance for credit losses for the periods indicated.

| | Three Months Ended | | | Six Months Ended | | |
|---|--------------------|-------------------|------------------|------------------|------------------|---|

| Annualized ratio of net charge-offs (recoveries) to average loans outstanding | 0.06 | % 0.03 | % (0.03) |)% 0.05 | % 0.00 | % |
| Allowance for credit losses as a % of non-PCI loans | 0.73 | 0.75 | 0.76 | 0.73 | 0.76 | |
| Allowance for credit losses as a % of total loans | 0.67 | 0.67 | 0.67 | 0.67 | 0.67 | |

During the second quarter of 2017, we recognized net loan charge-offs of \$2.7 million as compared to \$1.4 million for the first quarter of 2017, and net loan recoveries of \$1.3 million the second quarter of 2016. The increase in net loan

charge-offs as compared to the first quarter of 2017 was largely due to one charged-off impaired loan totaling \$1.9 million within the commercial and industrial loan portfolio during the second quarter of 2017.

During the second quarter of 2017, we recorded a \$3.6 million provision for credit losses as compared to \$2.5 million and \$1.4 million for the first quarter of 2017 and the second quarter of 2016, respectively. The quarter over quarter increase in the provision was due, in part, to solid second quarter loan growth and an increase in allocated reserves for impaired loans at June 30, 2017.

The following table summarizes the allocation of the allowance for credit losses to specific loan portfolio categories and the allocations as a percentage of each loan category:

| Loan Category: | June 30, 2017 | | | March 31, 2017 | | | June 30, 2016 | | |
|------------------------------------|---------------------|------|----------|---------------------|------|----------|---------------------|------|----------|
| | Allocation | | | Allocation | | | Allocation | | |

| | Allocation | Loan | Category | Allocation | Loan | Category | Allocation | Loan | Category |
| | (\$ in thousands) | | | | | | | | |
| Commercial and Industrial loans* | \$53,792 | 2.04 | % | \$53,541 | 2.03 | % | \$50,351 | 1.99 | % |
| Commercial real estate loans: | | | | | | | | | |
| Commercial real estate | 37,180 | 0.40 | % | 38,146 | 0.42 | % | 35,869 | 0.45 | % |
| Construction | 18,275 | 2.07 | % | 18,156 | 2.17 | % | 16,008 | 2.08 | % |
| Total commercial real estate loans | 55,455 | 0.55 | % | 56,302 | 0.57 | % | 51,877 | 0.59 | % |
| Residential mortgage loans | 4,186 | 0.15 | % | 3,592 | 0.13 | % | 3,495 | 0.11 | % |
| Consumer loans: | | | | | | | | | |
| Home equity | 582 | 0.13 | % | 433 | 0.09 | % | 968 | 0.20 | % |
| Auto and other consumer | 4,606 | 0.26 | % | 3,828 | 0.22 | % | 3,723 | 0.23 | % |
| Total consumer loans | 5,188 | 0.23 | % | 4,261 | 0.19 | % | 4,691 | 0.22 | % |
| Total allowance for credit losses | \$118,621 | 0.67 | % | \$117,696 | 0.67 | % | \$110,414 | 0.67 | % |

*Includes the reserve for unfunded letters of credit.

The allowance for credit losses comprised of our allowance for loan losses and reserve for unfunded letters of credit, as a percentage of total loans was 0.67 percent at June 30, 2017, March 31, 2017 and June 30, 2016. At June 30, 2017, our allowance allocations for losses as a percentage of total loans remained relatively stable in most loan categories as compared to March 31, 2017, but declined 0.10 basis points for construction loans primarily due to the continued low level of recent loss experience in this portfolio. There were no construction loan charge-offs during the six months ended June 30, 2017 and the year ended December 31, 2016.

Our allowance for credit losses as a percentage of total non-PCI loans (excluding PCI loans with carrying values totaling approximately \$1.5 billion) was 0.73 percent at June 30, 2017, as compared to 0.75 percent and 0.76 percent at March 31, 2017 and June 30, 2016, respectively. PCI loans are accounted for on a pool basis and initially recorded net of fair valuation discounts related to credit which may be used to absorb future losses on such loans before any allowance for loan losses is recognized subsequent to acquisition. Due to the adequacy of such discounts, there were no allowance reserves related to PCI loans at June 30, 2017, March 31, 2017 and June 30, 2016.

Capital Adequacy

A significant measure of the strength of a financial institution is its shareholders' equity. At both June 30, 2017 and December 31, 2016, shareholders' equity totaled approximately \$2.4 billion and represented 10.3 percent and 10.4 percent of total assets, respectively. During the six months ended June 30, 2017, total shareholders' equity increased by \$46.7 million primarily due to (i) net income of \$96.2 million, (ii) a \$5.4 million decrease in our accumulated other comprehensive loss, (iii) a \$4.5 million increase attributable to the effect of our stock incentive plan, and (iv) net proceeds of \$2.2 million from the re-issuance of treasury and authorized common shares issued under our dividend

reinvestment plan totaling a combined 186 thousand shares. These positive changes were partially offset by cash dividends declared on common and preferred stock totaling a combined \$61.6 million. See Note 3 to the

80

consolidated financial statements for additional information regarding changes in our accumulated other comprehensive loss during the three and six months ended June 30, 2017.

Valley and Valley National Bank are subject to the regulatory capital requirements administered by the Federal Reserve Bank and the OCC. Quantitative measures established by regulation to ensure capital adequacy require Valley and Valley National Bank to maintain minimum amounts and ratios of common equity Tier 1 capital, total and Tier 1 capital to risk-weighted assets, and Tier 1 capital to average assets, as defined in the regulations.

Effective January 1, 2015, Valley implemented the Basel III regulatory capital framework and related Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank Act”). Basel III final rules require a new common equity Tier 1 capital to risk-weighted assets ratio of 4.5 percent, Tier 1 capital to risk-weighted assets of 6.0 percent, ratio of total capital to risk-weighted assets of 8.0 percent, and minimum leverage ratio of 4.0 percent. The new rule changes included the implementation of a new capital conservation buffer that is added to the minimum requirements for capital adequacy purposes. The capital conservation buffer is subject to a three year phase-in period that started on January 1, 2016, at 0.625 percent of risk-weighted assets and increases each subsequent year by 0.625 percent until reaching its final level of 2.5 percent when fully phased-in on January 1, 2019. As of June 30, 2017, and December 31, 2016, Valley and Valley National Bank exceeded all capital adequacy requirements with the capital conservation buffer under the Basel III Capital Rules (see tables below).

The following tables present Valley’s and Valley National Bank’s actual capital positions and ratios under Basel III risk-based capital guidelines at June 30, 2017 and December 31, 2016:

| | Actual | | Minimum Capital Requirements with Capital Conservation Buffer | | To Be Well Capitalized Under Prompt Corrective Action Provision | |
|------------------------------|-------------------|--------|---|--------|---|---------|
| | Amount | Ratio | Amount | Ratio | Amount | Ratio |
| | (\$ in thousands) | | | | | |
| As of June 30, 2017 | | | | | | |
| Total Risk-based Capital | | | | | | |
| Valley | \$2,132,436 | 11.99% | \$1,644,928 | 9.250% | N/A | N/A |
| Valley National Bank | 2,076,401 | 11.70 | 1,641,551 | 9.250 | \$ 1,774,650 | 10.00 % |
| Common Equity Tier 1 Capital | | | | | | |
| Valley | 1,631,680 | 9.18 | 1,022,523 | 5.750 | N/A | N/A |
| Valley National Bank | 1,857,730 | 10.47 | 1,020,423 | 5.750 | 1,153,522 | 6.50 |

| Valley National Bank | 1,807,201 | 8.25 | 876,026 | 4.00 | 1,095,032 | 5.00 |

The Dodd-Frank Act requires federal banking agencies to issue regulations that require banks with total consolidated assets of more than \$10.0 billion to conduct and publish company-run annual stress tests to assess the potential impact of different scenarios on the consolidated earnings and capital of each bank and certain related items over a nine-quarter forward-looking planning horizon, taking into account all relevant exposures and activities. On October 9, 2012, the FRB published final rules implementing the stress testing requirements for banks with total consolidated assets of more than \$10.0 billion but less than \$50.0 billion. These rules set forth the timing and type of stress test activities, as well as rules governing controls, oversight and disclosure.

In March 2014, the FRB, OCC, and FDIC issued final supervisory guidance for these stress tests. This joint final supervisory guidance discusses supervisory expectations for stress test practices, provides examples of practices that would be consistent with those expectations, and offers additional details about stress test methodologies. It also emphasizes the importance of stress testing as an ongoing risk management practice.

We submitted our latest stress testing results (utilizing data as of December 31, 2016) to the FRB on July 27, 2017. The full disclosure of the stress testing results, including the results for Valley National Bank, a summary of the supervisory severely adverse scenario and additional information regarding the methodologies used to conduct the stress test at December 31, 2016 will be available under the Shareholder Relations section of our website (www.valleynationalbank.com) under the Dodd-Frank Act Stress Test Reports section when the FRB discloses the results to the public in October 2017. The previous year results (utilizing data as of December 31, 2015) can currently be found on our website.

Tangible book value per common share is computed by dividing shareholders' equity less preferred stock, goodwill and other intangible assets by common shares outstanding as follows:

| | June 30, 2017 | December 31, 2016 |
|--|--|----------------------|
| | (\$ in thousands, except for share data) | |
| Common shares outstanding | 263,971,766 | 263,638,830 |
| Shareholders' equity | \$2,423,901 | \$ 2,377,156 |
| Less: Preferred stock | 111,590 | 111,590 |
| Less: Goodwill and other intangible assets | 734,337 | 736,121 |
| Tangible common shareholders' equity | \$1,577,974 | \$ 1,529,445 |
| Tangible book value per common share | \$5.98 | \$ 5.80 |
| Book value per common share | \$8.76 | \$ 8.59 |

Management believes the tangible book value per common share ratio provides information useful to management and investors in understanding our underlying operational performance, our business and performance trends and facilitates comparisons with the performance of others in the financial services industry. This non-GAAP financial measure should not be considered in isolation or as a substitute for or superior to financial measures calculated in accordance with U.S. GAAP. This non-GAAP financial measure may also be calculated differently from similar measures disclosed by other companies.

Typically, our primary source of capital growth is through retention of earnings. Our rate of earnings retention is derived by dividing undistributed earnings per common share by earnings (or net income available to common stockholders) per common share. Our retention ratio was 37.1 percent for the six months ended June 30, 2017 as compared to 30.2 percent for the year ended December 31, 2016. We expect our retention ratio to improve during the remainder of 2017 due to, among other factors, solid loan growth and potential earnings improvement from LIFT, our earnings enhancement initiative to review our business practices with the primary goal of improving Valley's overall efficiency.

Cash dividends declared amounted to \$0.22 per common share for both the six months ended June 30, 2017 and 2016. The Board is committed to examining and weighing relevant facts and considerations, including its commitment to shareholder value, each time it makes a cash dividend decision in this economic environment. The Federal Reserve has cautioned all bank holding companies about distributing dividends which may reduce the level of capital or not allow capital to grow in light of the increased capital levels as required under the Basel III rules. Prior to the date of this filing, Valley has received no objection or adverse guidance from the FRB or the OCC regarding the current level of its quarterly common stock dividend.

Off-Balance Sheet Arrangements, Contractual Obligations and Other Matters

For a discussion of Valley's off-balance sheet arrangements and contractual obligations see information included in Valley's Annual Report on Form 10-K for the year ended December 31, 2016 in the MD&A section - "Off-Balance Sheet Arrangements" and Notes 11 and 12 to the consolidated financial statements included in this report.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk refers to potential losses arising from changes in interest rates, foreign exchange rates, equity prices, and commodity prices. Valley's market risk is composed primarily of interest rate risk. See page 65 for a discussion of interest rate sensitivity.

Item 4. Controls and Procedures

Valley's Chief Executive Officer (CEO) and Chief Financial Officer (CFO), with the assistance of other members of Valley's management, have evaluated the effectiveness of Valley's disclosure controls and procedures (as defined in Rule 13a-15(e) or Rule 15d-15(e) under the Exchange Act) as of the end of the period covered by this Quarterly

Report on Form 10-Q. Based on such evaluation, Valley's CEO and CFO have concluded that Valley's disclosure controls and procedures are effective as of the end of the period covered by this report.

Valley's CEO and CFO have also concluded that there have not been any changes in Valley's internal control over financial reporting during the quarter ended June 30, 2017 that have materially affected, or are reasonably likely to materially affect, Valley's internal control over financial reporting.

Valley's management, including the CEO and CFO, does not expect that our disclosure controls and procedures or our internal controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, provides reasonable, not absolute, assurance that the objectives of the control system are met. The design of a control system reflects resource constraints and the benefits of controls must be considered relative to their costs. Because there are inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within Valley have been or will be detected.

These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns occur because of simple error or mistake. Controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events. There can be no assurance that any design will succeed in achieving its stated goals under all future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with the policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

In the normal course of business, we may be a party to various outstanding legal proceedings and claims. See Note 14 to the consolidated financial statements for further details.

Item 1A. Risk Factors

Other than the additional risk factor described below, there has been no material change in the risk factors previously disclosed under Part I, Item 1A of Valley's Annual Report on Form 10-K for the year ended December 31, 2016.

The acquisition of USAmeriBancorp, Inc. may not be successful, which may adversely affect our business, financial condition and results of operation.

In July 2017, we announced our entry into a merger agreement with USAmeriBancorp, Inc. (USAB) and its wholly-owned subsidiary, USAmeriBank, headquartered in Clearwater, Florida. The acquisition of USAB is subject to several conditions, including the receipt of necessary shareholder and regulatory approvals. The satisfaction of such conditions could delay the acquisition of USAB for a significant period or prevent it from occurring. In addition, both Valley and USAB may terminate the merger agreement under certain circumstances, including but not limited to, if Valley's share price falls below \$11.00 in the preclosing measurement period. If we do not complete the acquisition of USAB or if it is significantly delayed, the expected benefits of such acquisition may not be fully realized, if at all, and we may incur significant expenses and our business and results of operations may be materially adversely affected.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the quarter, we did not sell any equity securities not registered under the Securities Act of 1933, as amended. Purchases of equity securities by the issuer and affiliated purchasers during the three months ended June 30, 2017 were as follows:

ISSUER PURCHASES OF EQUITY SECURITIES

| Period | Total Number of Shares Purchased (1) | Average Price Paid Per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans (2) | Maximum Number of Shares that May Yet Be Purchased Under the Plans (2) |
|---------------------------------|--|------------------------------------|---|--|
| April 1, 2017 to April 30, 2017 | — | \$ — | — | 4,112,465 |
| May 1, 2017 to May 31, 2017 | 2,719 | 11.72 | — | 4,112,465 |
| June 1, 2017 to June 30, 2017 | — | — | — | 4,112,465 |
| Total | 2,719 | \$ 11.72 | — | |

(1) Represents repurchases made in connection with the vesting of employee restricted stock awards.

On January 17, 2007, Valley publicly announced its intention to repurchase up to 4.7 million outstanding common (2) shares in the open market or in privately negotiated transactions. The repurchase plan has no stated expiration date.

No repurchase plans or programs expired or terminated during the three months ended June 30, 2017.

Item 6. Exhibits

- (2) Plan of acquisition, reorganization, arrangement, liquidation or succession:
 - Agreement and Plan of Merger, dated July 26, 2017, by and between Valley National Bancorp and
 - (2.1) USAmeriBancorp, Inc., incorporated herein by reference to Exhibit 2.1 to the Registrant's Form 8-K Current Report filed on July 28, 2017.

- (3) Articles of Incorporation and By-laws:
 - (3.1) Certificate of Amendment to the Restated Certificate of Incorporation of the Registrant, incorporated herein by reference to Exhibit 3.1 of the Registrant's Form 10-Q Quarterly Report filed on May 8, 2017.
 - (3.2) Certificate of Amendment to the Restated Certificate of Incorporation of the Registrant, incorporated herein by reference to Exhibit 3.1 of the Registrant's Form 8-K Current Report filed on August 1, 2017.
 - (3.3) Restated Certificate of Incorporation of the Registrant, incorporated herein by reference to Exhibit 3.A of the Registrant's Form 10-K Annual Report filed on February 29, 2016.
 - (3.4) By-laws of the Registrant, as amended and restated, incorporated herein by reference to Exhibit 3.1 to the Registrant's Form 8-K Current Report filed on December 7, 2016.

- (10) Material Contracts:
 - Underwriting Agreement, dated July 27, 2017, by and between the Company and Keefe, Bruyette &
 - (10.1) Woods, Inc., as representative of the underwriters named therein, incorporated herein by reference to Exhibit 1.1 to the Registrant's Form 8-K Current Report filed on August 1, 2017.
 - (10.2) Amended and Restated Change in Control Agreement dated June 28, 2017 between Valley, Valley National Bank and Dianne M. Grenz.+*
 - (10.3) Severance Agreement dated June 28, 2017 between Valley, Valley National Bank and Dianne M. Grenz.+*

- (31.1) Certification pursuant to Securities Exchange Rule 13a-14(a)/15d-14(a) signed by Gerald H. Lipkin, Chairman of the Board and Chief Executive Officer of the Company.*
- (31.2) Certification pursuant to Securities Exchange Rule 13a-14(a)/15d-14(a) signed by Alan D. Eskow, Senior Executive Vice President and Chief Financial Officer of the Company.*
- (32) Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, signed by Gerald H. Lipkin, Chairman of the Board and Chief Executive Officer of the Company, and Alan D. Eskow, Senior Executive Vice President and Chief Financial Officer of the Company.*
