ITEM 1.01. ENTRY INTO A MATERIAL DEFINITIVE AGREEMENT

On March 16, 2007, CalAmp Corp. (the "Company") entered into an Asset Purchase Agreement with and among CalAmp DataCom, Inc. ("CalAmp DataCom"), AirIQ Inc., a publicly held Canadian company ("AirIQ"), and AirIQ U.S., Inc. ("AirIQ U.S.") pursuant to which the Company, through its wholly-owned subsidiary CalAmp DataCom, acquired the Vehicle Finance division of AirIQ (the "Business"), for cash consideration of \$19 million. The Business consists of certain assets of AirIQ's wholly-owned subsidiary, AirIQ U.S. The source of funds for the \$19 million purchase price was the Company's cash on hand.

The Business involves the sale of Global Positioning Satellite (GPS) and cellular-based wireless asset tracking products and services to vehicle lenders that specialize in automobile financing for high credit risk individuals. The Business, which has approximately 35 employees, will become part of the Company's Wireless DataCom Division, a new reporting segment that the Company plans to use commencing with its fiscal 2008 first quarter ending May 31, 2007.

The Business had revenues of approximately \$15 million and a gross profit margin of approximately 35% during calendar 2006 as reflected in the unaudited carve-out income statement of this AirIQ's operating unit.

The Company acquired the operations and customer base of the Business, as well as certain of its accounts receivable, prepaid expenses, fixed assets, intellectual property, a tradename and other intangible assets. The Company also assumed certain accounts payable and accrued liabilities in the acquisition. The Business' operating working capital at the time of acquisition amounted to approximately \$1 million.

The Company and AirIQ also entered into various service agreements pursuant to which AirIQ will, for various periods of time, provide technology and client care support for the customer base that was acquired by the Company in this transaction. The acquisition includes the transfer of two U.S. patents from AirIQ to the Company, both titled a "method for retrieving vehicular collateral", and the grant of a royalty-free license from the Company to AirIQ for the life of these patents. In addition, AirIQ has licensed a version of its host system software to the Company for use in the "Vehicle Finance" market and certain other markets that do not compete with AirIQ's other businesses. The Company will also assume the leased facility in Lake Forest, California, where the Business currently has its primary operations.

AirIQ entered into a five-year non-compete agreement with the Company. In addition, AirIQ agreed not to solicit any customer of the Business for a five year period, except that AirIQ can solicit customers of the Business for the purpose of providing products other than those provided by or that are competitive with the Business.

As part of the transaction, the parties also entered into an escrow agreement whereby \$1.9 million of the purchase price will be held in escrow for a period of 12 months from the closing date in support of certain representations and warranties made by AirIQ to the Company. AirIQ agreed to indemnify the Company from liabilities arising from the operation of the Business prior to the acquisition, and the Company agreed to indemnify AirIQ from liabilities arising from the operation of the Business subsequent to the acquisition. The indemnification period is 12 months, except that tax matters, environmental matters and employee benefit matters will survive for the applicable statute of limitations.

The Company holds approximately 5.9 million shares of AirIQ's common stock that it acquired in December 2006, which represents approximately 3.7%

of AirIQ's outstanding stock. Notwithstanding this equity interest, the Company's acquisition of AirIQ's Vehicle Finance Division was negotiated on an arms-length basis between the Company and AirIQ. There are no other relationships between the Company, or any of its affiliates, officers and directors, and AirIQ.
