UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549

SCHEDULE 14A
(RULE 14a-101)

INFORMATION REQUIRED IN
PROXY STATEMENT

Proxy Statement Pursuant to Section 14(a) of the
Securities Exchange Act of 1934
(Amendment No.)

Filed by the Registrant x
Filed by a Party other than the Registrant o

Check the appropriate box:

- o Preliminary Proxy Statement
- o Confidential, for Use of the Commission Only (as permitted by Rule 14a-6(e)(2))
- o Definitive Proxy Statement
- x Definitive Additional Materials
- o Soliciting Material Pursuant to §240.14a-12

Old Republic International Corporation
(Name of Registrant as Specified In Its Charter)

(Name of Person(s) Filing Proxy Statement, if other than the Registrant)

Payment of Filing Fee (Check the appropriate box):

- x No fee required.
- o Fee computed on table below per Exchange Act Rules 14a-6(i)(1) and 0-11.

- 1) Title of each class of securities to which transaction applies:
- 2) Aggregate number of securities to which transaction applies:
- 3) Per unit price or other underlying value of transaction computed pursuant of Exchange Act Rule 0-11
(set forth the amount of which the filing fee is calculated and state how it was determined):
- 4) Proposed maximum aggregate value of transaction:

5) Total fee paid:

o Check box if any part of the fee is offset as provided by Exchange Act Rule 0-11(a)(2) and identify the filing for which the offsetting fee was paid previously. Identify the previous filing by registration statement number, or the form or Schedule and the date of its filing.

Dear Old Republic International Corporation Shareholders:

Subject: BOARD OF DIRECTORS' RECOMMENDATION TO VOTE "AGAINST" THE CalPERS PROPOSAL SET FORTH IN PROXY ITEM #4

This year CalPERS is once again taking it upon itself to recommend that Old Republic change yet another feature of its overall system of corporate governance. This time CalPERS wants the Company to adopt a so-called "proxy access" feature as a part of its by-laws. CalPERS maintains that such a feature would foster director accountability and long-term value creation. In support of its recommendation, CalPERS specifically refers to an academic study published by the CFA Institute. This academic study has been criticized by commentators who suggest opposite views, particularly as it relates to the assertion that proxy access can raise overall U.S. market capitalization. Moreover, the Company does not believe that academic studies are necessarily linked to business realities on the one hand, nor are they necessarily based on irrefutable evidence supportive of their conclusions. Additionally, the Company's decades-long experience in interacting with serious investors in its stock or fixed income securities has rarely, if ever, shown any interest by them in the details or substance of its corporate governance. This governance system has been in place over the decades of the Company's existence as a publicly held institution. Instead, serious long and short-term investors have always been focused on basic, tradition-honed expectations for:

ØA business' ability to produce sustainable earnings over time;

ØA business' ability to grow the shareholders' equity account over time;

ØA business' ability to deliver a reliably steady return of cash dividends over time;

ØA business' long-term strategy for achieving these three critically important returns in an ethical and legal manner.

Old Republic's long-term record and success in meeting these basic expectations of serious investors is empirically self-evident. It is portrayed with absolute clarity in the two accompanying charts. The Company's long-term performance for the benefit of serious investors in its stock is foundational to the Board of Directors' conclusion that the entirety of the system of corporate governance is not broken and is not in need of theory-inspired change for the sake of change.

THE BOARD OF DIRECTORS THEREFORE BELIEVES THE CalPERS PROPOSAL IS NOT EMPIRICALLY PROVEN TO BE IN THE SHAREHOLDERS' BEST INTERESTS. ACCORDINGLY, THE BOARD OF DIRECTORS STRONGLY RECOMMENDS THAT OLD REPUBLIC'S SHAREHOLDERS VOTE AGAINST THIS PROPOSAL.

Please see the two attached schedules that show Old Republic's strong, index-beating performance over the decades. They provide clear evidence of its long-term benefits to serious investors. These investors have included the Directors, executives, and the vast majority of the Company's employees who together currently own nearly 10% of Old Republic's common stock.

Respectfully submitted on behalf of the Company's Board of Directors.

/s/ A. C. Zucaro

Aldo C. Zucaro
Chairman of the Board and Chief Executive Officer

Old Republic International Corporation – Total Book Return Compared S&P 500 - 50 Year Table

Old Republic International Corporation – Total Market Return Compared S&P 500 – 50 Year Table

The tables that follow reflect the Company's annual operating results over the past 50 years. To put them in perspective, the Company has included information on the stock market's valuation. The first table compares Old Republic's annual total book return with the total pretax annual return for the Standard & Poor's 500 Index. (The Company calculates total book return by taking the annual post-tax change in shareholders' equity per share, plus the pretax dividend yield on that account.) For this period, Old Republic's total book return averaged 14.7%, versus 11.1% for the S&P 500 Index.

The second table compares the Company's annual total market return on a per-share basis with the S&P 500's performance. (This is calculated by taking the year-to-year percentage change in the closing price of Old Republic's stock, plus the cash dividend as a percentage of the closing price per share at the beginning of each year.) During this time, Old Republic's shares posted an annual average return of 16.7% versus 11.1% for the S&P 500.

Both charts reflect the Company's poorer performance relative to the S&P 500 Index in the Great Recession years, as this recession seriously impacted the Company's Run-Off financial indemnity business. This relatively poorer performance is expected to turn more positive as Old Republic's recalibrated capital resources restore an earnings momentum driven by its General and Title insurance businesses. The Company has paid cash dividends without interruption for each of the 74 years since 1942, and the annual rate has been increased in each of the past 34 years through year end 2015.

OLD REPUBLIC INTERNATIONAL CORPORATON – Total Book Return Compared S&P 500

(a) Old Republic's per share statistics have been retroactively restated for stock dividends and splits. The data applicable to the Company are reported on a post-tax basis relative to book value, and on a pre-tax basis with respect to the dividend yield. 1967 and prior years' information is based on the statutory results of Old Republic Life Insurance Company, predecessor to Old Republic International Corporation. (b) Data for the Standard & Poor's 500 Index ("S&P 500") are calculated on a pre-tax basis. (c) In December, 2003 and 2005, special year-end cash dividends of \$.534 and \$.800 per common share were declared and paid. (d) Total book return represents the sum of each year's dividend yield as a percentage of beginning book value per share, plus the percentage change in each year's book value per share.

OLD REPUBLIC INTERNATIONAL CORPORATON – Total Market Return Compared S&P 500

(a) Old Republic's per share statistics have been retroactively restated for stock dividends and splits. 1967 and prior years' information is based on the statutory results of Old Republic Life Insurance Company, predecessor to Old Republic International Corporation. (b) Data for both the Company and the Standard & Poor's 500 Index ("S&P 500") are calculated on a pre-tax basis. (c) In December, 2003 and 2005, special year-end cash dividends of \$.534 and \$.800 per common share were declared and paid. (d) Total market return has been calculated as the sum of the year-to-year increase or decrease in the closing price and the dividend yield for each year as a percentage of the closing price at the end of the preceding year. The total return shown would be higher if an interest factor were also applied to the reinvestment of cash dividends.
