Variable rate demand notes are securities whose interest rates are reset periodically at market levels. These securities are payable on demand and are shown at their current rates as of February 28, 2013.

Floating rate securities' yields vary with a designated market index or market

rate, such as the coupon-equivalent of the U.S. Treasury Bill rate. These securities are shown at their current rate as of February 28, 2013.

The cost for federal income tax purposes was \$632,352,604. At February 28, 2013, net unrealized appreciation for all securities based on tax cost was \$120,861,063. This consisted of aggregate gross unrealized appreciation for

all securities in which there was an excess of value over tax cost of \$122,258,666 and aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value of \$1,397,603.

Securities represent the underlying municipal obligations of inverse floating rate obligations held by the Fund.

Security forms part of the below tender option bond trust. Principal Amount and Value shown take into account the leverage factor.

Fair Value Measurements

Various inputs are used in determining the value of the Fund's investments. These inputs are summarized in three broad levels. Level 1 includes quoted prices in active markets for identical securities. Level 2 includes other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, and credit risk). Level 3 includes significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments). The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of February 28, 2013 in valuing the Fund's investments.
