**SAPIENS TO BRING BUSINESS RULES TECHNOLOGY TO LINUX**

*Full cross platform portability and reduced cost of ownership*

**RESEARCH TRIANGLE PARK, N.C. November 15, 2004** Sapiens International Corporation N.V. (NASDAQ and TASE: SPNS), a leading global provider of business-rules based technology solutions announced at the 2004 Business Rules Forum, its planned support of Linux by its eMerge Business Integrity Server platform, as part of its new technology road-map, bringing the proven speed and scalability of Sapiens' technology to Linux. The addition of Linux provides a powerful, collaborative platform targeted at the estimated 40 percent of large financial service providers that, according to analysts, will have Linux as part of their infrastructure by 2005.

Sapiens' eMerge for Linux will provide enterprise customers with the scalability of the Business Integrity Server platform and the hardware flexibility of Linux-based solutions, extending the support of Sapiens eMerge-based solutions to computer platforms running the Linux operating system.

We recognize the potential strategic benefits of Linux in enterprise computing and its growing role within the business environment said Itzick Sharir, President and CEO of Sapiens International. Our eMerge on Linux offering will provide the Linux world with our Rapid Application Development (RAD) capabilities coupled with its Business Rule Engine (BRE) robust main-frame technology, leveraging our more than 20 years of application development experience.

We are proud to provide our existing customers with the ability to retain their long-term investments while enabling cross platform migrations at reduced cost-of-ownership. In the future, our Insurance solutions will provide interoperability and portability, ranging from PC to main-frame.

**About eMerge Business Integrity Server**

Sapiens' eMerge Business Integrity Server provides the mission-critical role of business logic server in enterprises worldwide. eMerge's rules-based development expedites solution delivery and enables application and systems integration to occur seamlessly.

Sapiens eMerge is based on a multi-level architecture and operates in multi-platform environments, encompassing many hardware vendors, operating system environments, and databases. Host-side platforms supported include IBM zSeries (z/OS and z/VM), iSeries (OS/400), Linux, and HP-UX. Sapiens eMerge supports databases such as DB2, IMS, VSAM, Oracle and Informix. Since Sapiens eMerge exemplifies open systems and cross-platform capabilities, solutions developed with it can be seamlessly migrated from platform to platform and from database to database.

### **About Sapiens International**

**SAPIENS IS RECOGNIZED AS A LEADING VENDOR IN THE GLOBAL LIFE INSURANCE SOLUTIONS MARKET**

***BY PROMINENT INDEPENDENT ANALYST FIRM - DATAMONITOR***

**RESEARCH TRIANGLE PARK, N.C. November 21, 2004** Sapiens International Corporation N.V. (NASDAQ and TASE: SPNS), a worldwide provider of insurance technology solutions, announced that it has been recognized as a leading vendor in the Global Life Insurance Solutions market in a new report entitled Policy Administration Systems in Global Life Insurance published by Datamonitor.

The report draws on Datamonitor's recent Insurance Technology Decision-Maker Panel survey of over 120 life insurers in Europe and North America which showed that policy administration will be a crucial area of investment for life and pensions providers. Insurers are rapidly realizing that, to obtain lower unit costs and faster time to market, it will be essential to improve the flexibility of their back office processing systems, by either re-engineering or replacing their technology systems.

In the report, Sapiens' INSIGHT™ was described as one of the stand-out vendors that have the potential to succeed in the market for future top-tier system replacement. Datamonitor believes the future-proofed technology offered by the vendors is likely to lead to long-term success in the marketplace.

"Sapiens Life & Pensions INSIGHT™, although a new system is fully componentized and web-enabled, with the capacity to run, pensions, health and savings on a single product platform...further development of its partnership with IBM should help cement its business transformation capability" notes the report.

"We are very proud to be well positioned amongst the seven leading companies in the market said David Ofek, Sapiens' Executive VP, Business Development and Marketing. This is a direct result of our domain expertise, and working closely with our customers to bring the best solutions to market.

Life & Pension INSIGHT™ offers a unique flexibility, accommodating new product definition, both individual and group policies and providing compliance with tax and other regulatory changes."

Sapiens INSIGHT™, installed in several insurance companies and being currently delivered at 2 new sites, is an innovative and powerful rules-based platform, modular in its architecture and serves companies administering life insurance, pension funds, health insurance and savings plans.

The full report, "Policy Administration Systems in Global Life Insurance", by S. Jones, published October, 2004, is available at [www.datamonitor.com](http://www.datamonitor.com).
