## Stock Exchange Announcement

5 March 2004

### Presentation of data on rFVIIa in the treatment of bleeding in severely injured trauma patients

As communicated in connection with the release of Novo Nordisk's financial results for 2003 the results of a key phase 2 study of rFVIIa (NovoSeven®) in the treatment of critically bleeding, multi-trauma patients will be presented at the 6th World Congress on Trauma, Shock, Inflammation and Sepsis in Munich, Germany.

The trauma study involved 280 patients in five continents, with critical bleeding related to either blunt or penetrating trauma. Patients that had been hospitalised with life-threatening bleeding, and who had already received transfusion of eight units of blood, were randomised to receive either rFVIIa or placebo, in addition to conventional treatment.

The key conclusions from the study were already announced by Novo Nordisk on 19 December 2003. Hence, the presentation will focus on the details regarding patient characteristics, effects on red blood cell transfusion (RBC), reduction in complications and the side effect profile.

#### CONFERENCE CALL

At 16.30 CET today, corresponding to 15.30 UK time and 10.30 am New York time, a brief conference call subsequent to the actual presentation at the conference will be held.
