DEAR SHAREHOLDER,

The economic environment in which your Fund operates reflects continuing but

uneven economic recovery. The U.S. and other major industrial countries are experiencing steady but comparatively low levels of economic growth, while emerging market countries are seeing a resumption of relatively strong economic expansion. The largest source of economic uncertainty is the potential impact of steps being considered by many governments to counteract the extraordinary governmental spending and credit expansion carried out to deal with the financial and economic crisis of 2008. Consequently, the implications for future tax rates, government spending, interest rates and the pace of economic recovery in the U.S. and other leading economies are extremely difficult to predict at the present time. The long term health of the global economy depends on restoring some measure of fiscal discipline around the world, but since all of the corrective steps require economic pain, it is not surprising that governments are reluctant to undertake them.

In the near term, governments remain committed to furthering economic recovery and realizing a meaningful reduction in their national unemployment rates. Such an environment should produce continued economic growth and, consequently, attractive investment opportunities. Over the longer term, the larger uncertainty mentioned earlier carries the risk of unexpected potholes in the road to sustained recovery. For this reason, Nuveen's investment management teams are working hard to balance return and risk by building well-diversified portfolios, among other strategies. I encourage you to read the following commentary on the management of your Fund. As always, I also encourage you to contact your financial consultant if you have any questions about your Nuveen Fund investment.

Over the last six months, the Nuveen leveraged municipal closed-end funds continued to make progress in refinancing their auction rate preferred shares (ARPS). By the fall of 2009, all of the Nuveen taxable closed-end Funds had completed redemption of their ARPS at par value. As of April 30, 2010, approximately 39% of the municipal ARPS issued by the Nuveen Funds also had been redeemed. Please consult the Nuveen web site for the most recent information on this issue and all recent developments on your Nuveen Funds at: www.nuveen.com.

On behalf of the other members of your Fund's Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

/S/ ROBERT P. BREMNER

Portfolio manager Cathryn Steeves discusses key investment strategies and the six-month performance of the Nuveen New York Funds. Cathryn, who joined Nuveen in 1996, assumed portfolio management responsibility for these six Funds in 2006.

WHAT KEY STRATEGIES WERE USED TO MANAGE THE NEW YORK FUNDS DURING THE SIX-MONTH REPORTING PERIOD ENDED MARCH 31, 2010?

Municipal market conditions began to show general signs of improvement throughout most of the period. This trend was bolstered by the reduced issuance of tax-exempt municipal debt in the marketplace, due in part to the introduction of the Build America Bond program in April 2009. Build America Bonds are a new class of taxable municipal debt created as part of the February 2009 economic stimulus package. These bonds currently offer municipal issuers a federal subsidy equal to 35% of the bonds' interest payments and therefore provide issuers with an attractive alternative to traditional tax-exempt debt. For the six-month period ended March 31, 2010, taxable Build America Bonds issuance totaled \$55.3 billion, accounting for almost 25% of new bonds in the municipal market nationwide.

In New York, the Build America Bond program had a significant impact on the availability of tax-exempt issuance, especially among the longer maturities that we typically seek to purchase for these Funds. For the six months ended March 31, 2010, Build America Bonds issuance in New York totaled \$7.4 billion, which ranked the state as the second largest user of these bonds (after California). Although total municipal issuance, which includes tax-exempt as well as taxable bonds, was up substantially in New York for this period, Build America Bonds made up approximately 31.5% of that supply. Since interest payments from Build America Bonds represent taxable income, we do not view these bonds as good investment opportunities for the New York Funds. This tighter supply situation was compounded for these Funds by the severe decline in the issuance of AAA rated insured bonds. Over the six-month period, new insured paper accounted for approximately 5% of national issuance, compared with about 10% during the same period a year earlier and historical levels of approximately 50%.

2 Nuveen Investments

Despite the constrained issuance of tax-exempt municipal bonds, we continued to find attractive value opportunities, taking a bottom-up approach to discovering undervalued sectors and individual credits with the potential to perform relatively well over the long term. Areas of the market where we found value during this period included New York City water bonds, housing bonds backed by the Federal Housing Administration and bonds issued for New York University. As of January 2010, the Funds' Board of Directors/Trustees approved changes to the Funds' investment policies that enable them to invest up to 20% of their net assets in uninsured investment-grade securities. Subsequent to this, we purchased A rated dedicated tax bonds (that is, bonds supported by a specific revenue stream, such as sales taxes) issued by Puerto Rico, since the income from these bonds is exempt from both federal and state taxes.

In general, our purchases during this period focused on bonds offering premium coupons as a defense against a potential rise in interest rates. Cash for new purchases was generated almost entirely from bond calls.

Edgar Filing: NUVEEN INSURED NEW YORK DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSRS

As of March 31, 2010, all six of these Funds continued to use inverse floating rate securities. (1) We employ inverse floaters as a form of leverage for a variety of reasons, including leverage, duration management and both income and total return enhancement.

HOW DID THE FUNDS PERFORM?

Individual results for the Nuveen New York Funds, as well as relevant index and peer group information, are presented in the accompanying table.

AVERAGE ANNUAL TOTAL RETURNS ON COMMON SHARE NET ASSET VALUE* FOR PERIODS ENDED 3/31/10

	6-MONTH	1-YEAR
NQN	0.82%	14.09%
NVN	0.69%	14.75%
NUN	0.68%	14.51%
NNF	0.65%	12.73%
NKO	0.55%	12.87%
NRK	0.95%	13.96%
Standard & Poor's (S&P) New York Municipal Bond Index (2)	0.53%	10.73%
Standard & Poor's (S&P) Insured National Municipal Bond Index (3)	-0.05%	10.66%
Lipper Single-State Insured Municipal Debt Funds Average (4)	-1.24%	18.17%

For the six months ended March 31, 2010, the cumulative returns on common share net asset value (NAV) for all six of these New York Funds outperformed the Standard & Poor's (S&P) New York Municipal Bond Index, the Standard & Poor's (S&P) Insured National Municipal Bond Index and the Lipper Single-State Insured Municipal Debt Funds Average.

Key management factors that influenced the Funds' returns during this period included yield curve and duration positioning, credit exposure and sector allocation. In addition, the use of leverage was an important factor affecting each Fund's performance over this period. The impact of leverage is discussed in more detail on page five.

* Six-month returns are cumulative; returns for one-year, five-year and ten-year are annualized.

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares.

For additional information, see the individual Performance Overview for your Fund in this report.

- (1) An inverse floating rate security, also known as an inverse floater, is a financial instrument designed to pay long-term tax-exempt interest at a rate that varies inversely with a short-term tax-exempt interest rate index. For the Nuveen Funds, the index typically used is the Securities Industry and Financial Markets (SIFM) Municipal Swap Index (previously referred to as the Bond Market Association Index or BMA). Inverse floaters, including those inverse floating rate securities in which the Funds invested during this reporting period, are further defined within

the Notes to Financial Statements and Glossary of Terms Used in this Report sections of this report.

- (2) The Standard & Poor's (S&P) New York Municipal Bond Index is an unleveraged, market value-weighted index designed to measure the performance of the investment-grade New York municipal bond market. This index does not reflect any initial or ongoing expenses and is not available for direct investment.
- (3) The Standard & Poor's (S&P) Insured National Municipal Bond Index is a national unleveraged, market value-weighted index designed to measure the performance of the insured U.S. municipal bond market. This index does not reflect any initial or ongoing expenses and is not available for direct investment.
- (4) The Lipper Single-State Insured Municipal Debt Funds Average is calculated using the returns of all closed-end funds in this category for each period as follows: six-month 33 funds, 1-year, 33 funds; 5-year, 33 funds; and 10-year, 18 funds. Lipper returns account for the effects of management fees and assume reinvestment of dividends, but do not reflect any applicable sales charges. The Lipper average is not available for direct investment.

Nuveen Investments 3

During this period, short and intermediate-term bonds generally outperformed credits with longer maturities, with bonds maturing in 20 years or more posting negative returns for the period. Overall, duration and yield curve positioning was slightly positive for the performances of these Funds, with the exception of NKO, where the impact from duration was neutral. Although the Funds benefited from being underweight in the underperforming longer end of the yield curve, this was offset to some degree by their underexposure to the shorter part of the curve that outperformed.

Credit exposure played an important role in performance of these Funds. The demand for municipal bonds increased during this period, driven by a variety of factors, including concerns about potential tax increases, the need to rebalance portfolio allocations, and a growing appetite for additional risk. At the same time, the supply of issuance of new tax-exempt municipal securities declined. As investors bid up municipal bond prices, bonds rated BBB or below generally outperformed those rated AAA. On the whole, the Funds' performance benefited from their allocations to lower quality credits. This was especially true in NQN and NRK, which had the heaviest weightings of bonds rated BBB or lower among these six Funds.

Holdings that generally contributed positively to the Fund's performance during this period included housing and health care bonds. These Funds tended to be overweight in both housing and health care credits, which enhanced their returns. Revenue bonds as a whole performed well, with resource recovery, electric utilities, leasing and transportation among the sectors also outperforming the general municipal market for this period. In addition, pre-refunded bonds, which are typically backed by U.S. Treasury securities, were among the stronger performers, primarily due to their shorter effective maturities. As of March 31, 2010, NRK had the largest allocation of pre-refunded bonds among these six Funds, which benefited its performance.

Zero coupon bonds, special tax credits, and general obligation (GO) bonds generally posted negative returns for this period, while education and water and sewer bonds failed to keep pace with the overall municipal market for the six months.

IMPACT OF THE FUNDS' CAPITAL STRUCTURES AND LEVERAGE STRATEGIES ON PERFORMANCE

One important factor impacting the returns of most of these Funds relative to the comparative indexes was the Funds' use of financial leverage. The Funds use leverage because their managers believe that, over time, leveraging provides opportunities for additional income and total returns for common shareholders. However, use of leverage also can expose common shareholders to additional volatility. For example, as the prices of securities held by a Fund decline, the negative impact of these valuation changes on common share net asset value and common shareholder total return is magnified by the use of leverage. Conversely, leverage may enhance common share returns during periods when bond prices generally are rising.

Leverage made a significant positive contribution to the performance of these Funds over this reporting period.

RECENT DEVELOPMENTS REGARDING THE FUNDS' LEVERAGED CAPITAL STRUCTURE

Shortly after their inceptions, each of the Funds issued auction rate preferred shares (ARPS) to create financial leverage. As noted in past shareholder reports, the ARPS issued by many closed-end funds, including these Funds, have been hampered by a lack of liquidity since February 2008. Since that time, more ARPS have been submitted for sale in each of their regularly scheduled auctions than there have been offers to buy. In fact, offers to buy have been almost completely non-existent since late February 2008. This means that these auctions have "failed to clear," and that many, or all, of the ARPS shareholders who wanted to sell their shares in these auctions were unable to do so. This lack of liquidity in ARPS did not lower the credit quality of these shares, and ARPS shareholders unable to sell their shares received distributions at the "maximum rate" applicable to failed auctions, as calculated in accordance with the pre-established terms of the ARPS. In the recent market, with short-term rates at multi-generational lows, those maximum rates also have been low.

One continuing implication for common shareholders from the auction failures is that each Fund's cost of leverage likely has been incrementally higher at times than it otherwise might have been had the auctions continued to be successful. As a result, each Fund's common share earnings likely have been incrementally lower at times than they otherwise might have been.

As noted in past shareholder reports, the Nuveen funds' Board of Directors/Trustees authorized several methods to refinance a portion of the Nuveen funds' outstanding ARPS. Some funds have utilized tender option bonds (TOBs), also known as floating rate securities for leverage purposes. The amount of TOBs that a fund may use varies according to the composition of each fund's portfolio. Some funds have a greater ability to use TOBs than others. As of March 31, 2010, some funds have issued Variable Rate Demand Preferred Shares (VRDP), but these issuances have been limited since it has been difficult to find liquidity providers on economically viable terms given the constrained credit environment. Some funds have issued MuniFund Term Preferred Shares (MTP), a fixed rate form of preferred stock with a mandatory redemption period of five years.

Nuveen Investments 5

While all these efforts have reduced the total amount of outstanding ARPS issued

Edgar Filing: NUVEEN INSURED NEW YORK DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSRS

by the Nuveen funds, the Funds cannot provide any assurance on when the remaining outstanding ARPS might be redeemed.

As of March 31, 2010, the amounts of ARPS redeemed at par by the following Funds are as shown in the accompanying table.

FUND	AUCTION RATE PREFERRED SHARES REDEEMED	% OF ORIGINAL AUCTION RATE PREFERRED SHARES
NQN	\$ 32,500,000	22.6%
NVN	\$ 29,100,000	15.1%
NUN	\$ 36,225,000	18.4%
NNF	\$ 14,650,000	22.5%
NKO	\$ 61,000,000	100.0%

Subsequent to the reporting period, NRK completed the issuance of \$27.68 million of 2.55%, Series 2015 MTP. The net proceeds from this offering were used to refinance the Fund's outstanding ARPS at par. The newly-issued MTP shares trade on the New York Stock Exchange (NYSE) under the symbol "NRK Pr C". MTP is a fixed-rate form of preferred stock with a mandatory redemption period, in this case, of five years. By issuing MTP, the Fund seeks to take advantage of the current historically low interest rate environment to lock in an attractive federally tax-exempt cost of leverage for a period as long as the term of the MTP. The Fund's managers believe that issuing MTP may help the Fund mitigate the risk of a significant increase in their cost of leverage should short-term interest rates rise sharply in the coming years.

Subsequent to the reporting period, NRK noticed for redemption at par all \$27.0 million of its outstanding ARPS using the proceeds from the issuance of MTP described above.

As of March 31, 2010, 82 out of the 84 Nuveen closed-end municipal funds that had issued ARPS have redeemed at par all or a portion of these shares. These redemptions bring the total amount of Nuveen's municipal closed-end funds' ARPS redemptions to approximately \$4.3 billion of the approximately \$11.0 billion originally outstanding.

On April 9, 2010, twenty-six Nuveen leveraged closed-end funds, including NUN, received a demand letter from a law firm on behalf of the each such fund's common shareholders, alleging that Nuveen and the fund's officers and Board of Directors breached their fiduciary duties related to the redemption at par of the fund's ARPS. The funds' independent Board is evaluating the demand letters for each fund.

RECENT CHANGES TO INVESTMENT POLICIES OF NUVEEN INSURED FUNDS

On May 3, 2010, after the close of this reporting period, the Funds' Board of Directors/Trustees approved changes to each Fund's investment policies. The Board took this action in response to the continuing challenges faced by municipal bond insurers. The changes to each Fund's investment policies are intended to increase the Funds' investment flexibility in pursuing their investment objective, while retaining the insured nature of its portfolio.

The changes, effective immediately, provide that under normal circumstances, the Funds invest at least 80% of their net assets (as defined in Footnote 7 - Management Fees and Other Transactions with Affiliates) in municipal securities that are covered by insurance guaranteeing the timely payment of principal and interest. For purposes of this 80%, insurers must have a claims paying ability rated at least "BBB-" at the time of purchase by at least one independent rating agency. In addition, each Fund invests at least 80% of its net assets in municipal securities that are rated at least "BBB-" at the time of purchase (based on the higher of the rating of the insurer, if any, or the underlying security) by at least one independent rating agency, or are unrated but judged to be of similar credit quality by the Nuveen Asset Management, or are backed by an escrow or trust account containing sufficient U.S. government or U.S. government agency securities or U.S. Treasury-issued State and Local Government Series securities to ensure timely payment of principal and interest. Inverse floating rate securities whose underlying bonds are covered by insurance are included for purposes of the 80%. Each Fund may also invest up to 20% of its net assets in municipal securities rated at least "BBB-" (based on the higher rating of the insurer, if any, or the underlying bond) or are unrated but judged to be of comparable quality by Nuveen Asset Management).

Nuveen Investments 7

Common Share Dividend
and Share Price Information

During the six-month reporting period ended March 31, 2010, NVN, NUN and NNF each had two monthly dividend increases, while NQN, NKO, and NRK each had one monthly dividend increase.

Due to normal portfolio activity, common shareholders of the following Funds received capital gains and net ordinary income distributions at the end of December 2009 as follows:

FUND	LONG-TERM CAPITAL GAINS (PER SHARE)	SHORT-TERM CAPITAL GAINS AND/OR ORDINARY INCOME (PER SHARE)
NKO	\$ 0.0019	\$ 0.0007
NRK	\$ 0.0407	\$ 0.0245

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of March 31, 2010, all of the Funds in this report had positive UNII balances, based upon our best estimate, for tax purposes, and positive UNII balances for financial reporting purposes.

COMMON SHARE REPURCHASES AND SHARE PRICE INFORMATION

 =====

At least 80% of the Fund's net assets are invested in municipal securities that guarantee the timely payment of principal and interest. See Notes to Financial Statements, Footnote 1 - Insurance, for more information.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
 - (2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
 - (3) Ratings: Using the higher of Standard & Poor's Group ("Standard & Poor's") or Moody's Investor Service, Inc. ("Moody's") rating. Ratings below BBB by Standard & Poor's or Baa by Moody's are considered to be below investment grade.
 - (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.
 - (5) Investment has a maturity of more than one year, but has variable rate and demand features which qualify it as a short-term investment. The rate disclosed is that in effect at the end of the reporting period. This rate changes periodically based on market conditions or a specified market index.
 - (6) Auction Rate Preferred Shares, at Liquidation Value as a percentage of Total Investments is 27.7%.
- N/A Not applicable.
- N/R Not rated.
- (ETM) Escrowed to maturity.
- (IF) Inverse floating rate investment.
- (UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to Financial Statements, Footnote 1 - Inverse Floating Rate Securities for more information.

 =====

At least 80% of the Fund's net assets are invested in municipal securities that guarantee the timely payment of principal and interest. See Notes to Financial Statements, Footnote 1 - Insurance, for more information.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings: Using the higher of Standard & Poor's Group ("Standard & Poor's") or Moody's Investor Service, Inc. ("Moody's") rating. Ratings below BBB by Standard & Poor's or Baa by Moody's are considered to be below investment grade.
- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.

At least 80% of the Fund's net assets are invested in municipal securities that guarantee the timely payment of principal and interest. See Notes to Financial Statements, Footnote 1 - Insurance, for more information.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
 - (2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
 - (3) Ratings: Using the higher of Standard & Poor's Group ("Standard & Poor's") or Moody's Investor Service, Inc. ("Moody's") rating. Ratings below BBB by Standard & Poor's or Baa by Moody's are considered to be below investment grade.
 - (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.
 - (5) Investment has a maturity of more than one year, but has variable rate and demand features which qualify it as a short-term investment. The rate disclosed is that in effect at the end of the reporting period. This rate changes periodically based on market conditions or a specified market index.
 - (6) Auction Rate Preferred Shares, at Liquidation Value as a percentage of Total Investments is 26.6%.

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The funds covered in this report and their corresponding Common share stock exchange symbols are Nuveen New York Investment Quality Municipal Fund, Inc. (NQN), Nuveen New York Select Quality Municipal Fund, Inc. (NVN), Nuveen New York Quality Income Municipal Fund, Inc. (NUN), Nuveen Insured New York Premium Income Municipal Fund, Inc. (NNF), Nuveen Insured New York Dividend Advantage Municipal Fund (NKO) and Nuveen Insured New York Tax-Free Advantage Municipal Fund (NRK) (collectively, the "Funds"). Common shares of New York Investment Quality (NQN), New York Select Quality (NVN), New York Quality Income (NUN) and Insured New York Premium Income (NNF) are traded on the New York Stock Exchange

("NYSE") while Common shares of Insured New York Dividend Advantage (NKO) and Insured New York Tax-Free Advantage (NRK) are traded on the NYSE Amex. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Each Fund seeks to provide current income exempt from both regular federal and New York state income taxes, and in the case of Insured New York Tax-Free Advantage (NRK) the alternative minimum tax applicable to individuals, by investing primarily in a portfolio of municipal obligations issued by state and local government authorities within the state of New York or certain U.S. territories.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with US generally accepted accounting principles.

Investment Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors/Trustees. Futures contracts are valued using the closing settlement price or, in the absence of such a price, at the mean of the bid and asked prices. When market price quotes are not readily available (which is usually the case for municipal securities), the pricing service or, in the absence of a pricing service for a particular investment or derivative instrument, the Board of Directors/Trustees of the Fund, or its designee, may establish fair value using a wide variety of market data including yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. Temporary investments in securities that have variable rate and demand features qualifying them as short-term investments are valued at amortized cost, which approximates value.

Investment Transactions

Investment transactions are recorded on a trade date basis. Realized gains and losses from transactions are determined on the specific identification method. Investments purchased on a when-issued/delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. At March 31, 2010, there were no such outstanding purchase commitments in any of the Funds.

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Investment income also includes paydown gains and losses, if any.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all of its net investment income and net capital gains to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions that will enable interest from municipal securities, which is exempt from regular federal and New York state income taxes, and in the case of Insured New York Tax-Free Advantage (NRK) the alternative minimum tax applicable to individuals, to retain such tax-exempt

status when distributed to shareholders of the Funds. Net realized capital gains and ordinary income distributions paid by the Funds are subject to federal taxation.

Nuveen Investments 63

| Notes to Financial Statements (Unaudited) (continued)

For all open tax years and all major taxing jurisdictions, management of the Funds has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Open tax years are those that are open for examination by taxing authorities (i.e., generally the last four tax year ends and the interim tax period since then). Furthermore, management of the Funds is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders at least annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from US generally accepted accounting principles.

Auction Rate Preferred Shares

The following Funds have issued and outstanding Auction Rate Preferred shares, \$25,000 stated value per share, as a means of effecting financial leverage. Each Fund's Auction Rate Preferred shares are issued in one or more Series. The dividend rate paid by the Funds on each Series is determined every seven days, pursuant to a dutch auction process overseen by the auction agent, and is payable at the end of each rate period. As of March 31, 2010, the number of Auction Rate Preferred shares outstanding, by Series and in total, for each Fund is as follows:

	NEW YORK INVESTMENT QUALITY (NQN)	NEW YORK SELECT QUALITY (NVN)	NEW YORK QUALITY INCOME (NUN)	INSURED NEW YORK PREMIUM INCOME (NNF)	INSURED NEW YORK TAX-FEE ADVANTAGE (NRK)

Number of shares:

Total	4,460	6,556	6,431	2,014	1,080
=====					

Beginning in February 2008, more shares for sale were submitted in the regularly scheduled auctions for the Auction Rate Preferred shares issued by the Funds

than there were offers to buy. This meant that these auctions "failed to clear," and that many Auction Rate Preferred shareholders who wanted to sell their shares in these auctions were unable to do so. Auction Rate Preferred shareholders unable to sell their shares received distributions at the "maximum rate" applicable to failed auctions as calculated in accordance with the pre-established terms of the Auction Rate Preferred shares. As of March 31, 2010, the aggregate amount of outstanding Auction Rate Preferred shares redeemed by each Fund is as follows:

	NEW YORK INVESTMENT QUALITY (NQN)	NEW YORK SELECT QUALITY (NVN)	NEW YORK QUALITY INCOME (NUN)	INSURED NEW YORK PREMIUM INCOME (NNF)
Auction Rate Preferred shares redeemed, at liquidation value	\$ 32,500,000	\$ 29,100,000	\$ 36,225,000	\$ 14,650,000

Variable Rate Demand Preferred Shares

Insured New York Dividend Advantage (NKO) has issued and outstanding 500 Series 1 Variable Rate Demand Preferred shares, \$100,000 liquidation value per share. Variable Rate Preferred shares were issued in a privately negotiated offering. Proceeds of this offering were used to redeem a portion of the Fund's outstanding Auction Rate Preferred shares. The Variable Rate Demand Preferred shares were offered to institutional buyers as defined pursuant to Rule 144A under the Securities Act of 1933, have a maturity date of August 1, 2038 and include a liquidity feature that allows the Variable Rate Demand Preferred shareholders to have their shares purchased by the liquidity provider in the event that sell orders are not matched with purchase orders in a remarketing. Dividends on the Variable Rate Demand Preferred shares (which are treated as interest payments for financial reporting purposes) are set weekly at a rate established by a remarketing agent; therefore, the liquidation value of the Variable Rate Demand Preferred shares approximates fair value.

Subject to certain conditions, Variable Rate Demand Preferred shares may be redeemed, in whole or in part, at any time at the option of the Fund. The Fund may also redeem certain of the Variable Rate Demand Preferred shares if the Fund fails to maintain certain asset coverage requirements and

64 Nuveen Investments

such failures are not cured by the applicable cure date. The redemption price per share is equal to the sum of the liquidation value per share plus any accumulated but unpaid dividends.

Insured New York Dividend Advantage (NKO) had all of its \$50,000,000 Variable Rate Demand Preferred shares outstanding during the six months ended March 31, 2010, with an annualized interest rate of 0.24%.

For financial reporting purposes only, the liquidation value of Variable Rate Demand Preferred shares is recorded as a liability on the Statement of Assets and Liabilities. Unpaid dividends on Variable Rate Preferred shares are recognized as "Interest payable" on the Statement of Assets and Liabilities. Dividends paid on the Variable Rate Demand Preferred shares are included as a

component of "Interest expense and amortization of offering costs" on the Statement of Operations. In addition to interest expense, the Fund also pays a per annum liquidity fee, which is recognized as "Liquidity fees" on the Statement of Operations.

Insurance

Under normal circumstances, and during the six months ended March 31, 2010, the Fund invest at least 80% of their net assets (as defined in Footnote 7 - Management Fees and Other Transactions with Affiliates) in municipal securities that are covered by insurance guaranteeing the timely payment of principal and interest. For purposes of this 80%, insurers must have a claims paying ability rated at least "A" at the time of purchase by at least one independent rating agency. In addition, each Fund invests at least 80% of its net assets in municipal securities that are rated at least "BBB" at the time of purchase (based on the higher of the rating of the insurer, if any, or the underlying security) by at least one independent rating agency, or are unrated but judged to be of similar credit quality by Nuveen Asset Management (the "Adviser"), a wholly-owned subsidiary of Nuveen Investments, Inc. ("Nuveen"), or are backed by an escrow or trust account containing sufficient U.S. government or U.S. government agency securities or U.S. Treasury-issued State and Local Government Series securities to ensure timely payment of principal and interest. Inverse floating rate securities whose underlying bonds are covered by insurance are included for purposes of the 80%. Each Fund may also invest up to 20% of its net assets in municipal securities rated at least "BBB" (based on the higher rating of the insurer, if any, or the underlying bond) or are unrated but judged to be of comparable quality by the Adviser.

Each insured municipal security is covered by Original Issue Insurance, Secondary Market Insurance or Portfolio Insurance. Such insurance does not guarantee the market value of the municipal securities or the value of the Funds' Common shares. Original Issue Insurance and Secondary Market Insurance remain in effect as long as the municipal securities covered thereby remain outstanding and the insurer remains in business, regardless of whether the Funds ultimately dispose of such municipal securities. Consequently, the market value of the municipal securities covered by Original Issue Insurance or Secondary Market Insurance may reflect value attributable to the insurance. Portfolio Insurance, in contrast, is effective only while the municipal securities are held by the Funds. Accordingly, neither the prices used in determining the market value of the underlying municipal securities nor the Common share net asset value of the Funds include value, if any, attributable to the Portfolio Insurance. Each policy of the Portfolio Insurance does, however, give the Funds the right to obtain permanent insurance with respect to the municipal security covered by the Portfolio Insurance policy at the time of its sale.

Inverse Floating Rate Securities

Each Fund is authorized to invest in inverse floating rate securities. An inverse floating rate security is created by depositing a municipal bond, typically with a fixed interest rate, into a special purpose trust created by a broker-dealer. In turn, this trust (a) issues floating rate certificates, in face amounts equal to some fraction of the deposited bond's par amount or market value, that typically pay short-term tax-exempt interest rates to third parties, and (b) issues to a long-term investor (such as one of the Funds) an inverse floating rate certificate (sometimes referred to as an "inverse floater") that represents all remaining or residual interest in the trust. The income received by the inverse floater holder varies inversely with the short-term rate paid to the floating rate certificates' holders, and in most circumstances the inverse floater holder bears substantially all of the underlying bond's downside investment risk and also benefits disproportionately from any potential appreciation of the underlying bond's value. The price of an inverse floating rate security will be more volatile than that of the underlying bond because the

interest rate is dependent on not only the fixed coupon rate of the underlying bond but also on the short-term interest paid on the floating rate certificates, and because the inverse floating rate security essentially bears the risk of loss of the greater face value of the underlying bond.

A Fund may purchase an inverse floating rate security in a secondary market transaction without first owning the underlying bond (referred to as an "externally-deposited inverse floater"), or instead by first selling a fixed-rate bond to a broker-dealer for deposit into the special purpose trust and receiving in turn the residual interest in the trust (referred to as a "self-deposited inverse floater"). The inverse floater held by a Fund gives the Fund the right (a) to cause the holders of the floating rate certificates to tender their notes at par, and (b) to have the broker transfer the fixed-rate bond held by the trust to the Fund, thereby collapsing the trust. An investment in an externally-deposited inverse floater is identified in the Portfolio of Investments as "(IF) - Inverse floating rate investment." An investment in a self-deposited inverse floater is accounted for as a financing transaction. In such instances, a fixed-rate bond deposited into a special purpose trust is identified in the Portfolio of Investments as "(UB) - Underlying bond of an inverse floating rate trust reflected as a financing transaction," with the Fund accounting for the short-term floating rate certificates issued by the trust as "Floating rate obligations" on the Statement of Assets and Liabilities. In addition, the Fund reflects in "Investment Income" the entire earnings of the underlying bond and recognizes the related interest paid to the holders of the short-term floating rate certificates as "Interest expense and amortization of offering costs" on the Statement of Operations.

Nuveen Investments 65

| Notes to Financial Statements (Unaudited) (continued)

During the six months ended March 31, 2010, each Fund invested in externally-deposited inverse floaters and/or self-deposited inverse floaters.

Each Fund may also enter into shortfall and forbearance agreements (sometimes referred to as a "recourse trust" or "credit recovery swap") (such agreements referred to herein as "Recourse Trusts") with a broker-dealer by which a Fund agrees to reimburse the broker-dealer, in certain circumstances, for the difference between the liquidation value of the fixed-rate bond held by the trust and the liquidation value of the floating rate certificates issued by the trust plus any shortfalls in interest cash flows. Under these agreements, a Fund's potential exposure to losses related to or on inverse floaters may increase beyond the value of a Fund's inverse floater investments as a Fund may potentially be liable to fulfill all amounts owed to holders of the floating rate certificates. At period end, any such shortfall is recognized as "Unrealized depreciation on Recourse Trusts" on the Statement of Assets and Liabilities.

At March 31, 2010, each Fund's maximum exposure to externally-deposited Recourse Trusts is as follows:

NEW YORK INVESTMENT QUALITY (NQN)	NEW YORK SELECT QUALITY (NVN)	NEW YORK QUALITY INCOME (NUN)	INSURED NEW YORK PREMIUM INCOME (NNF)

-------------------------------------	--------------	--------------	--------------	--------------

The average floating rate obligations outstanding and average annual interest rate and fees related to self-deposited inverse floaters during the six months ended March 31, 2010, were as follows:

	NEW YORK INVESTMENT QUALITY (NQN)	NEW YORK SELECT QUALITY (NVN)	NEW YORK QUALITY INCOME (NUN)	INSURED NEW YORK PREMIUM INCOME (NNF)
Average floating rate obligations outstanding	\$ 37,145,000	\$ 37,020,000	\$ 40,245,000	\$ 16,600,000
Average annual interest rate and fees	0.66%	0.62%	0.66%	0.66%

Futures Contracts

Each Fund is subject to interest rate risk in the normal course of pursuing its investment objectives and is authorized to invest in futures contracts in attempt to manage such risk. Upon entering into a futures contract, a Fund is required to deposit with the broker an amount of cash or liquid securities equal to a specified percentage of the contract amount. This is known as the "initial margin." Cash held by the broker to cover initial margin requirements on open futures contracts, if any, is recognized as "Deposits with brokers for open futures contracts" on the Statement of Assets and Liabilities. Subsequent payments ("variation margin") are made or received by a Fund each day, depending on the daily fluctuation of the value of the contract. Variation margin is recognized as a receivable or payable for "Variation margin on futures contracts" on the Statement of Assets and Liabilities, when applicable.

During the period the futures contract is open, changes in the value of the contract are recorded as an unrealized gain or loss by "marking-to-market" on a daily basis to reflect the changes in market value of the contract and is recognized as "Change in net unrealized appreciation (depreciation) of futures contracts" on the Statement of Operations. When the contract is closed or expired, a Fund records a realized gain or loss equal to the difference between the value of the contract on the closing date and value of the contract when originally entered into and is recognized as "Net realized gain (loss) from futures contracts" on the Statement of Operations.

Risks of investments in futures contracts include the possible adverse movement of the securities or indices underlying the contracts, the possibility that there may not be a liquid secondary market for the contracts and/or that a change in the value of the contract may not correlate with a change in the value of the underlying securities or indices. The Funds did not invest in futures contracts during the six months ended March 31, 2010.

Market and Counterparty Credit Risk

In the normal course of business each Fund may invest in financial instruments and enter into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the other party to the

transaction to perform (counterparty credit risk). The potential loss could exceed the value of the financial assets recorded on the financial statements. Financial assets, which potentially expose each Fund to counterparty credit risk, consist principally of cash due from counterparties on forward, option and swap transactions, when applicable. The extent of each Fund's exposure to counterparty credit risk in respect to these financial assets approximates their carrying value as recorded on the Statement of Assets and Liabilities. Futures contracts, when applicable, expose a Fund to minimal counterparty credit risk as they are exchange traded and the exchange's clearinghouse, which is counterparty to all exchange traded futures, guarantees the futures contracts against default.

66 Nuveen Investments

Each Fund helps manage counterparty credit risk by entering into agreements only with counterparties the Adviser believes have the financial resources to honor their obligations and by having the Adviser monitor the financial stability of the counterparties. Additionally, counterparties may be required to pledge collateral daily (based on the daily valuation of the financial asset) on behalf of each Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold. Reciprocally, when each Fund has an unrealized loss, the Funds have instructed the custodian to pledge assets of the Funds as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the valuations fluctuate, either up or down, by at least the predetermined threshold amount.

Zero Coupon Securities

Each Fund is authorized to invest in zero coupon securities. A zero coupon security does not pay a regular interest coupon to its holders during the life of the security. Tax-exempt income to the holder of the security comes from accretion of the difference between the original purchase price of the security at issuance and the par value of the security at maturity and is effectively paid at maturity. Such securities are included in the Portfolio of Investments with a 0.000% coupon rate in their description. The market prices of zero coupon securities generally are more volatile than the market prices of securities that pay interest periodically.

Offering Costs

Costs incurred by Insured New York Dividend Advantage (NKO) in connection with its offering of the Variable Rate Demand Preferred shares (\$675,000) were recorded as a deferred charge which will be amortized over the 30-year life of the shares and are included as a component of "Interest expense and amortization of offering costs" on the Statement of Operations.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by net credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments. Credits for cash balances may be offset by charges for any days on which a Fund overdraws its account at the custodian bank.

Indemnifications

Under the Funds' organizational documents, their officers and directors/trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the

Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

Use of Estimates

The preparation of financial statements in conformity with US generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

2. FAIR VALUE MEASUREMENTS

In determining the value of each Fund's investments, various inputs are used. These inputs are summarized in the three broad levels listed below:

- Level 1 - Quoted prices in active markets for identical securities.
- Level 2 - Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).
- Level 3 - Significant unobservable inputs (including management's assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities. The following is a summary of each Fund's fair value measurements as of March 31, 2010:

NEW YORK INVESTMENT QUALITY (NQN)	LEVEL 1	LEVEL 2	LEVEL 3
Investments:			
Municipal Bonds	\$ --	\$ 391,308,208	\$ --

6. INCOME TAX INFORMATION

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to the timing differences in recognizing taxable market discount, timing differences in recognizing certain gains and losses on investment transactions and the treatment of investments in inverse floating rate securities reflected as financing transactions, if any. To the extent that differences arise that are permanent in nature, such amounts are reclassified within the capital accounts on the Statement of Assets and Liabilities presented in the annual report, based on their federal tax basis treatment; temporary differences do not require reclassification. Temporary and permanent differences do not impact the net asset values of the Funds.

At March 31, 2010, the cost of investments was as follows:

	NEW YORK INVESTMENT QUALITY (NQN)	NEW YORK SELECT QUALITY (NVN)	NEW YORK QUALITY INCOME (NUN)	INSURED NEW YORK PREMIUM INCOME (NNF)

7. MANAGEMENT FEES AND OTHER TRANSACTIONS WITH AFFILIATES

Each Fund's management fee is separated into two components - a fund-level fee, based only on the amount of assets within each individual Fund, and a complex-level fee, based on the aggregate amount of all fund assets managed by the Adviser. This pricing structure enables each Fund's shareholders to benefit from growth in the assets within their respective Fund as well as from growth in the amount of complex-wide assets managed by the Adviser.

The annual fund-level fee for each Fund, payable monthly, is calculated according to the following schedule:

* The complex-level fee component of the management fee for the funds is calculated based upon the aggregate daily managed assets of all Nuveen funds, with such daily managed assets defined separately for each fund in its management agreement, but excluding assets attributable to investments in other Nuveen funds. For the complex-level and fund-level fees, daily managed assets include assets managed by the Adviser that are attributable to financial leverage. For these purposes, financial leverage includes the funds' use of preferred stock and borrowings and investments in the residual interest certificates (also called inverse floating rate securities) in tender option bond (TOB) trusts, including the portion of assets held by a TOB trust that has been effectively financed by the trust's issuance of floating rate securities, subject to an agreement by the Adviser to limit the amount of such assets for determining managed assets in certain circumstances. As of March 31, 2010, the complex-level fee rate was .1867%.

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those of its directors/trustees who are affiliated with the Adviser or to its officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Directors/Trustees has adopted a deferred compensation plan for independent directors/trustees that enables directors/trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from

certain Nuveen advised funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised funds.

For the first ten years of Insured New York Dividend Advantage's (NKO) operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily net assets, for fees and expenses in the amounts and for the time periods set forth below:

8. NEW ACCOUNTING STANDARDS

Accounting for Transfers of Financial Assets

During June 2009, the Financial Accounting Standards Board (FASB) issued changes to the authoritative guidance under generally accepted accounting principles (GAAP) on accounting for transfers of financial assets. The objective of this guidance is to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor's continuing involvement, if any, in transferred financial assets.

This guidance is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period and for interim and annual reporting periods thereafter. Earlier application is prohibited. The recognition and measurement provisions of this guidance must be applied to transfers occurring on or after the effective date. Additionally, the disclosure provisions of this guidance should be applied to transfers that occurred both before and after the effective date of this guidance. At this time, management is evaluating the implications of this guidance and the impact it will have on the financial statement amounts and disclosures, if any.

Fair Value Measurements

On January 21, 2010, FASB issued changes to the authoritative guidance under GAAP for fair value measurements. The objective of this guidance is to provide guidance on how investment assets and liabilities are to be valued and disclosed. Specifically, the amendment requires reporting entities to disclose i) the input and valuation techniques used to measure fair value for both recurring and nonrecurring fair value measurements, for both Level 2 and Level 3 positions, ii) transfers between all levels (including Level 1 and Level 2) on a gross basis (i.e., transfers out must be disclosed separately from transfers in) as well as the reason(s) for the transfer and iii) purchases, sales, issuances and settlements in the Level 3 rollforward must be shown on a gross basis rather than as one net number. The effective date of the amendment is for interim and annual periods beginning after December 15, 2009, however, the requirement to provide the Level 3 activity for purchases, sales, issuances and settlements on a gross basis will be effective for interim and annual periods beginning after December 15, 2010. At this time, management is evaluating the implications of this guidance and the impact it will have to the financial statement amounts and footnote disclosures, if any.

MuniFund Term Preferred Shares

As discussed in the Portfolio Manager's Comments section, during April 2010, Insured New York Tax-Free Advantage (NRK) successfully completed the issuance of \$27.68 million of 2.55%, Series 2015 MuniFund Term Preferred shares ("MTP"). The newly-issued MTP shares trade on the NYSE under the symbol "NRK Pr C."

Auction Rate Preferred Shares Noticed for Redemption

During April 2010, Insured New York Tax-Free Advantage (NRK) noticed for redemption all \$27.0 million of its Auction Rate Preferred shares, at liquidation value, using the proceeds from the issuance of MTP described above.

Investment Policy Changes - Insurance

On May 3, 2010, the Funds' Board of Directors/Trustees approved changes to each Fund's insurance investment policies in response to the continuing challenges faced by municipal bond insurers. The changes to each Fund's investment policies are intended to increase the Fund's investment flexibility in pursuing its investment objective, while retaining the insured nature of its portfolio.

The changes, effective immediately, provide that under normal circumstances, the Funds invest at least 80% of their net assets (as defined in Footnote 7 - Management Fees and Other Transactions with Affiliates) in municipal securities that are covered by insurance guaranteeing the timely payment of principal and interest. For purposes of this 80%, insurers must have a claims paying ability rated at least "BBB-" at the time of purchase by at least one independent rating agency. In addition, each Fund invests at least 80% of its net assets in municipal securities that are rated at least "BBB-" at the time of purchase (based on the higher of the rating of the insurer, if any, or the underlying security) by at least one independent rating agency, or are unrated but judged to be of similar credit quality by the Adviser, or are backed by an escrow or trust account containing sufficient U.S. government or U.S. government agency securities or U.S. Treasury- issued State and Local Government Series securities to ensure timely payment of principal and interest. Inverse floating rate securities whose underlying bonds are covered by insurance are included for purposes of the 80%. Each Fund may also invest up to 20% of its net assets in municipal securities rated at least "BBB-" (based on the higher rating of the insurer, if any, or the underlying bond) or are unrated but judged to be of comparable quality by the Adviser.).

- (a) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation.

Total returns are not annualized.

Total Return Based on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

- (b) After expense reimbursement from Adviser, where applicable. Expense ratios do not reflect the reduction of custodian fee credits earned on the Fund's net cash on deposit with the custodian bank, where applicable.
- (c) The expense ratios reflect, among other things, the interest expense deemed to have been paid by the Fund on the floating rate certificates issued by the special purpose trusts for the self-deposited inverse floaters held by the Fund, as described in Footnote 1 - Inverse Floating Rate Securities.

Reinvest Automatically
Easily and Conveniently

Nuveen makes reinvesting easy. A phone call is all it takes to set up your reinvestment account.

NUVEEN CLOSED-END FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional Fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the greater of the net asset value or 95% of the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. If the Plan Agent begins purchasing Fund shares on the open market while shares are trading below net asset value, but the Fund's shares subsequently trade at or above their net asset value before the Plan Agent is able to complete its purchases, the Plan Agent may cease open-market purchases and may invest the uninvested portion of the distribution in newly-issued Fund shares at a price equal to the greater of the shares' net asset value or 95% of the shares' market value on the last business day immediately prior to the purchase date. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of the shares may increase before purchases are completed, the average purchase price

80 Nuveen Investments

per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBLE

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

Glossary of Terms Used in this Report

- o **AUCTION RATE BOND:** An auction rate bond is a security whose interest payments are adjusted periodically through an auction process, which process typically also serves as a means for buying and selling the bond. Auctions that fail to attract enough buyers for all the shares offered for sale are deemed to have "failed", with current holders receiving a formula-based interest rate until the next scheduled auction.
- o **AVERAGE ANNUAL TOTAL RETURN:** This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment's actual cumulative performance (including change in NAV or market price and reinvested dividends and capital gains distributions, if any) over the time period being considered.
- o **AVERAGE EFFECTIVE MATURITY:** The average of the number of years to maturity of the bonds in a Fund's portfolio, computed by weighting each bond's time to maturity (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions unless an escrow account has been established to redeem the bond before maturity. The market value weighting for an investment in an inverse floating rate security is the value of the portfolio's residual interest in the inverse floating rate trust, and does not include the value of the floating rate securities issued by the trust.
- o **INVERSE FLOATERS:** Inverse floating rate securities, also known as inverse floaters, are created by depositing a municipal bond, typically with a fixed interest rate, into a special purpose trust created by a broker-dealer. This trust, in turn, (a) issues floating rate certificates typically paying short-term tax-exempt interest rates to third parties in amounts equal to some fraction of the deposited bond's par amount or market value, and (b) issues an inverse floating rate certificate

(sometimes referred to as an "inverse floater") to an investor (such as a Fund) interested in gaining investment exposure to a long-term municipal bond. The income received by the holder of the inverse floater varies inversely with the short-term rate paid to the floating rate certificates' holders, and in most circumstances the holder of the inverse floater bears substantially all of the underlying bond's downside investment risk. The holder of the inverse floater typically also benefits disproportionately from any potential appreciation of the underlying bond's value. Hence, an inverse floater essentially represents an investment in the underlying bond on a leveraged basis.

82 Nuveen Investments

- **LEVERAGE-ADJUSTED DURATION:** Duration is a measure of the expected period over which a bond's principal and interest will be paid, and consequently is a measure of the sensitivity of a bond's or bond Fund's value to changes when market interest rates change. Generally, the longer a bond's or Fund's duration, the more the price of the bond or Fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is longer than the duration of the Fund's portfolio of bonds.
- **MARKET YIELD (ALSO KNOWN AS DIVIDEND YIELD OR CURRENT YIELD):** An investment's current annualized dividend divided by its current market price.
- **NET ASSET VALUE (NAV):** A Fund's NAV per common share is calculated by subtracting the liabilities of the Fund (including any Preferred shares issued in order to leverage the Fund) from its total assets and then dividing the remainder by the number of common shares outstanding. Fund NAVs are calculated at the end of each business day.
- **PRE-REFUNDING:** Pre-refunding, also known as advanced refundings or refinancings, is a procedure used by state and local governments to refinance municipal bonds to lower interest expenses. The issuer sells new bonds with a lower yield and uses the proceeds to buy U.S. Treasury securities, the interest from which is used to make payments on the higher-yielding bonds. Because of this collateral, pre-refunding generally raises a bond's credit rating and thus its value.
- **TAXABLE-EQUIVALENT YIELD:** The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.
- **ZERO COUPON BOND:** A zero coupon bond does not pay a regular interest coupon to its holders during the life of the bond. Tax-exempt income to the holder of the bond comes from accretion of the difference between the original purchase price of the bond at issuance and the par value of the bond at maturity and is effectively paid at maturity. The market prices of zero coupon bonds generally are more volatile than the market prices of bonds that pay interest periodically.
