Chicago, IL 60606
(Name and address of agent for service)

Registrant's telephone number, including area code: (312) 917-7700

Date of fiscal year end: October 31

Date of reporting period: April 30, 2011

Form N-CSR is to be used by management investment companies to file reports with the Commission not later than 10 days after the transmission to stockholders of any report that is required to be transmitted to stockholders under Rule 30e-1 under the Investment Company Act of 1940 (17 CFR 270.30e-1). The Commission may use the information provided on Form N-CSR in its regulatory, disclosure review, inspection, and policymaking roles.

A registrant is required to disclose the information specified by Form N-CSR, and the Commission will make this information public. A registrant is not required to respond to the collection of information contained in Form N-CSR unless the Form displays a currently valid Office of Management and Budget ("OMB") control number. Please direct comments concerning the accuracy of the information collection burden estimate and any suggestions for reducing the burden to Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-0609. The OMB has reviewed this collection of information under the clearance requirements of 44 U.S.C. ss. 3507.

ITEM 1. REPORTS TO STOCKHOLDERS.		

#### INVESTMENT ADVISER NAME CHANGE

Effective January 1, 2011, Nuveen Asset Management, the Funds' investment adviser, changed its name to Nuveen Fund Advisors, Inc. ("Nuveen Fund Advisors"). Concurrently, Nuveen Fund Advisors formed a wholly-owned subsidiary, Nuveen Asset Management, LLC, to house its portfolio management capabilities.

#### NUVEEN INVESTMENTS COMPLETES STRATEGIC COMBINATION WITH FAF ADVISORS

On December 31, 2010, Nuveen Investments completed the strategic combination between Nuveen Asset Management, LLC, the largest investment affiliate of Nuveen Investments, and FAF Advisors. As part of this transaction, U.S. Bancorp – the parent of FAF Advisors – received cash consideration and a 9.5% stake in Nuveen Investments in exchange for the long-term investment business of FAF Advisors, including investment management responsibilities for the non-money market mutual funds of the First American Funds family.

The approximately \$27 billion of mutual fund and institutional assets managed by FAF Advisors, along with the investment professionals managing these assets and other key personnel, have become part of Nuveen Asset Management, LLC. With these additions to Nuveen Asset Management, LLC, this affiliate now manages more than \$100 billion of assets across a broad range of strategies from municipal and taxable fixed income to traditional and specialized equity investments.

This combination does not affect the investment objectives or strategies of the Funds in this report. Over time, Nuveen Investments expects that the combination will provide even more ways to meet the needs of investors who work with financial advisors and consultants by enhancing the multi-boutique model of Nuveen Investments, which also includes highly respected investment teams at HydePark, NWQ Investment Management, Santa Barbara Asset Management, Symphony Asset Management, Tradewinds Global Investors and Winslow Capital. Nuveen Investments managed approximately \$206 billion of assets as of March 31, 2011.

Chairman's Letter to Shareholders

#### Dear Shareholders,

In 2010, the global economy recorded another year of recovery from the financial and economic crises of 2008, but many of the factors that caused the downturn still weigh on the prospects for continued improvement. In the U.S., ongoing weakness in housing values has put pressure on homeowners and mortgage lenders. Similarly, the strong earnings recovery for corporations and banks is only slowly being translated into increased hiring or more active lending. Globally, deleveraging by private and public borrowers has inhibited economic growth and that process is far from complete.

Encouragingly, constructive actions are being taken by governments around the world to deal with economic issues. In the U.S., the recent passage of a stimulatory tax bill relieved some of the pressure on the Federal Reserve to promote economic expansion through quantitative easing and offers the promise of sustained economic growth. A number of European governments are undertaking programs that could significantly reduce their budget deficits. Governments across the emerging markets are implementing various steps to deal with global capital flows without undermining international trade and investment.

The success of these government actions could determine whether 2011 brings further economic recovery and financial market progress. One risk associated with the extraordinary efforts to strengthen U.S. economic growth is that the debt of the U.S. government will continue to grow to unprecedented levels. Another risk is that over time there could be inflationary pressures on asset values in the U.S. and abroad, because what happens in the U.S. impacts the rest of the world economy. Also, these various actions are being taken in a setting of heightened global economic uncertainty, primarily about the supplies of energy and other critical commodities. In this challenging environment, your Nuveen investment team continues to seek sustainable investment opportunities and to remain alert to potential risks in a recovery still facing many headwinds. On your behalf, we monitor their activities to assure they maintain their investment disciplines.

As you will note elsewhere in this report, on December 31, 2010, Nuveen Investments completed a strategic combination with FAF Advisors, Inc., the manager of the First American Funds. The combination adds highly respected and distinct investment teams to meet the needs of investors and their advisors and is designed to benefit all fund shareholders by creating a fund organization with the potential for further economies of scale and the ability to draw from even greater talent and expertise to meet those investor needs.

As of the end of June 2011, Nuveen Investments had completed the refinancing of all of the Auction Rate Preferred Securities issued by its taxable closed-end funds and 91% of the MuniPreferred shares issued by its tax-exempt closed-end funds. Please consult the Nuveen Investments web site, www.Nuveen.com, for the current status of this important refinancing program.

As always, I encourage you to contact your financial consultant if you have any questions about your investment in a Nuveen Fund. On behalf of the other members of your Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

Robert P. Bremner
Chairman of the Board
June 21, 2011

Portfolio Managers' Comments

Nuveen Municipal Value Fund, Inc. (NUV) Nuveen Municipal Value Fund 2 (NUW) Nuveen Municipal Income Fund, Inc. (NMI) Nuveen Enhanced Municipal Value Fund (NEV)

Portfolio managers Tom Spalding, Chris Drahn and Steve Hlavin review key investment strategies and the six-month performance of these four national Funds. With 34 years of investment experience at Nuveen, Tom has managed NUV since its inception in 1987, adding portfolio management responsibility for NUW at its inception in 2009. Chris, who has 31 years of financial industry experience, assumed portfolio management responsibility for NMI in January 2011. An eight-year veteran of Nuveen, Steve has been involved in the management of NEV since its inception in 2009, taking on full portfolio management responsibility for this Fund in December 2010.

What key strategies were used to manage the Funds during the six-month reporting period ended April 30, 2011?

After rallying through most of 2010, municipal bond prices declined during this six-month period, impacted by investor concerns about inflation, the federal deficit and the deficit's impact on demand for U.S. Treasury securities. Adding to this market pressure was media coverage of the strained finances of many state and local governments. As a result, money began to flow out of municipal bond funds, as yields rose and valuations declined. Toward the end of this period, we saw the environment in the municipal market improve, as some buyers were attracted by municipal bond valuations and yields, resulting in declining yields and rising valuations.

The municipal bond market also was affected by a significant decline in new tax-exempt issuance during this period. One reason for this decrease was the heavy issuance of taxable municipal debt at the end of 2010 under the Build America Bond (BAB) program. During November and December 2010, taxable BABs issuance nationwide totaled \$31.5 billion, accounting for 34.5% of new bonds in the municipal market. Since interest payments from BABs represent taxable income, we did not view these bonds as appropriate investment opportunities for these Funds. The BAB program expired December 31, 2010, after Congress failed to include legislation extending the program in the tax bill it passed earlier that month. In addition to the BAB program's impact on tax-exempt issuance during the November-December period, borrowers trying to take advantage of the program's favorable terms before its termination at year end accelerated issuance

ratings are investment grade; BB, B, CCC, CC, C and D ratings are below investment grade. Holdings and ratings
may change over time.

Nuveen Investments 5			

that potentially would have come to market as tax-exempt bonds in 2011, choosing instead to issue taxable BABs during the last two months of 2010. Due in part to this, national municipal issuance was down 49% for the first four months of 2011 compared with the same period in 2010.

Because of the constrained tax-exempt municipal bond issuance, we continued to take a bottom-up approach to discovering undervalued sectors and individual credits with the potential to perform well over the long term. During this period, we found value in health care, transportation (specifically tollroads), higher education and tax-supported bonds. In NEV, one of the areas we favored was the "other revenue" sector, where we were actively adding redevelopment agency bonds. The proposed elimination of redevelopment district programs in California, suggested as part of efforts to close gaps in the California state budget, prompted issuers to come to market with their remaining authorizations of redevelopment district bonds. This resulted in heavier supply of these bonds and higher yields at attractive prices. Across all of the Funds, the majority of our purchases were sector-based rather than geographically focused, although we continued to keep our holdings well diversified by state.

During the last months of 2010, some of this investment activity resulted from opportunities created by the provisions of the BAB program. For example, tax-exempt supply was more plentiful in the health care and higher education sectors because, as 501(c)(3) (nonprofit) organizations, hospitals and private universities generally did not qualify for the BAB program and continued to issue bonds in the tax-exempt municipal market. In addition, bonds with proceeds earmarked for refundings, working capital, and private activities were not covered by the BAB program, and this resulted in attractive opportunities in other sectors of the market.

For the most part, NUV, NUW and NMI focused on purchasing longer bonds to take advantage of attractive yields at the longer end of the municipal yield curve. The purchase of longer bonds also provided some protection for the Funds' duration and yield curve positioning in the event that the BAB program was extended and continued to have an impact on tax-exempt issuance, especially at the long end of the curve. In NEV, which was invested-up during the lower rate environment of 2009, we have been working to improve the Fund's yield and reduce its duration, bringing it more in line with our targets. During this period, we actively looked for opportunities to sell some of NEV's longest holdings with lower coupons and lower embedded yields, including industrial development revenue (IDR), housing and hospital bonds. We then reinvested the proceeds from these sales into bonds with shorter durations, higher coupons and better yields. As a result of this activity, we were able to enhance NEV's yield curve positioning and maturity, average coupon and embedded yield as well as take advantage of tax losses that will enable us to offset potential capital gains tax liabilities in the future.

6	Ν	luv	een	In'	ves	tm	en	ts
_	•		0011		, 00			

Some of the cash for new purchases during this period was generated by the proceeds from bond calls and maturing bonds, which we worked to redeploy to keep the Funds as fully invested as possible. NMI also took advantage of strong bids to sell a few holdings at attractive prices, mainly from the health care and IDR sectors, while NEV engaged in the selling described in the previous paragraph.

As of April 30, 2011, all four of these Funds continued to use inverse floating rate securities. We employ inverse floaters for a variety of reasons, including duration management, income enhancement, total return enhancement, and in NEV as a form of leverage. NEV also invested in additional types of derivative instruments1, such as forward interest rate swaps, designed to help shorten its duration. During this period, we gradually added to NEV's derivative positions, all of which remained in place at period end.

How did the Funds perform?

Individual results for these Funds, as well as relevant index and peer group information, are presented in the accompanying table.

Average Annual Total Returns on Net Asset Value\* For periods ended 4/30/11

Fund	6-Month	1-Year	5-Year	10-Year
NUV	-3.78%	-0.24%	3.11%	4.52%
NUW	-5.77%	-0.91%	N/A	N/A
NMI	-2.87%	1.59%	4.07%	4.82%
Standard & Poor's (S&P) National Municipal Bond Index2	-1.99%	1.98%	4.18%	4.94%
Lipper General and Insured Unleveraged Municipal				
Debt Funds Average3	-2.17%	0.76%	3.29%	4.14%
NEV4	-8.37%	-2.57%	N/A	N/A
Standard & Poor's (S&P) National Municipal Bond Index2	-1.99%	1.98%	4.18%	4.94%
Lipper General Leveraged Municipal Debt Funds Average3	-5.81%	0.10%	3.04%	5.25%

For the six months ended April 30, 2011, the cumulative returns on net asset value (NAV) for these four Funds underperformed the return for the Standard & Poor's (S&P) National Municipal Bond Index. For the same period, NUV, NUW and NMI lagged the average return for the Lipper General and Insured Unleveraged Municipal Debt Funds Average and NEV trailed the average return for the Lipper General Leveraged Municipal Debt Funds Average.

Key management factors that influenced the Funds' returns during this period included duration and yield curve positioning, credit exposure and sector allocation. In addition, the use of effective leverage had an impact on the performance of NEV. Leverage is discussed in more detail on page nine.

<sup>\*</sup> Six-month returns are cumulative; all other returns are annualized.

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares.

For additional information, see the individual Performance Overview for your Fund in this report.

- 1 Each Fund may invest in derivative instruments such as forwards, futures, options, and swap transactions. For additional information on the derivative instruments in which each Fund was invested during and at the end of the reporting period, see the Portfolios of Investments, Financial Statements, and Notes to Financial Statements sections of this report.
- 2 The Standard & Poor's (S&P) National Municipal Bond Index is an unleveraged, market value-weighted index designed to measure the performance of the tax-exempt, investment-grade U.S. municipal bond market. This index does not reflect any initial or ongoing expenses and is not available for direct investment.
- 3 Each of the Lipper Municipal Debt Funds Averages shown in this report is calculated using the returns of all closed-end funds in their respective categories for each period as follows: Lipper General and Insured Unleveraged Municipal Debt Funds Average: 6-month, 7 funds; 1-year, 7 funds; 5-year, 6 funds; and 10-year, 6 funds; Lipper General Leveraged Municipal Debt Funds Average: 6-month, 74 funds; 1-year, 73 funds; 5-year, 70 funds; and 10-year, 51 funds. Lipper returns account for the effects of management fees and assume reinvestment of dividends, but do not reflect any applicable sales charges. The Lipper averages are not available for direct investment.
- 4 NEV is a leveraged Fund through investments in inverse floating rate securities, as discussed in more detail on page nine. The remaining three Funds in this report are unleveraged and use inverse floating rate securities for duration management and both income and total return enhancement.

During this period, municipal bonds with shorter maturities generally outperformed other maturity categories, with credits at the longest end of the yield curve posting the weakest returns. The underperformance of longer bonds was due in part to the rise in municipal yields at the longer end of the curve. Among these four Funds, NMI was the most advantageously situated in terms of duration and yield curve positioning, with more exposure to the outperforming shorter end of the yield curve. NEV and NUW, on the other hand, had the longer durations typical of newer Funds that were more recently invested in long-term bonds. Their greater exposure to the underperforming long part of the curve, as well as that of NUV, detracted from the performance of all three Funds for this period. Overall, variations in duration and yield curve positioning among the Funds accounted for the majority of the differences in performance.

As previously mentioned, NEV used derivatives, such as forward interest rate swaps to reduce the duration of the Fund's portfolio. These derivatives had a positive impact on NEV's total return performance for the period.

Credit exposure also played a role in performance during these six months. During the market reversal of late 2010, as the redemption activity in high-yield funds increased and risk aversion mounted, lower-rated credits were negatively impacted. For the period as a whole, bonds rated BBB generally underperformed those rated AAA. All of these Funds tended to be overweighted in bonds rated BBB, which negatively impacted their performance. This was offset to some degree in NMI by the Fund's investment in individual securities that performed well. NEV, NMI and NUW also were hurt by their underweightings in bonds rated AAA.

Holdings that generally helped the Funds' returns included housing, resource recovery and general obligation (GOs) and other tax-supported bonds. In general, these Funds tended to have relatively light exposures to housing (with the exception of NEV) and were somewhat underweighted in GOs, which limited their participation in the performance of these sectors. During this period, pre-refunded bonds, which are often backed by U.S. Treasury securities, also were among the strongest performers, primarily due to their shorter effective maturities and higher credit quality. As of April 30, 2011, both NUV and NMI had good weightings in pre-refunded bonds, while NUW and NEV—as newer Funds—had little to no exposure to these credits.

In contrast, the health care and transportation sectors turned in relatively weaker performance. All four of these Funds, especially NUW, were overweighted in the health care sector, which was generally negative for performance. NEV, however, benefited from strong individual security selection in the health care sector, with a number of its holdings outperforming the sector as a whole. Zero coupon bonds also were among the poorer performers, due largely to their longer maturities.

# IMPACT OF LEVERAGE STRATEGY ON NEV'S PERFORMANCE

One important factor impacting the return of NEV relative to the comparative indexes was the Fund's use of effecti leverage through investments in inverse floating rate securities. This Fund uses leverage because its manager believe that, over time, leveraging provides opportunities for additional income and total return for shareholders. However, use of leverage also can expose shareholders to additional volatility. For example, during periods when the prices of securities held by a Fund generally are declining, the negative impact of these valuation changes on net asset value and total return is magnified by the use of leverage. This is what happened during this reporting period, as the use of leverage had an overall negative impact on the Fund's return.	es f

Dividend and Share Price Information

The monthly dividends of NUV, NUW, NMI and NEV remained stable throughout the six-month reporting period ended April 30, 2011.

Due to normal portfolio activity, shareholders of the following Funds received capital gains and net ordinary income distributions in December 2010 as follows:

		<b>Short-Term Capital Gains</b>
	Long-Term Capital Gains	and/or Ordinary Income
Fund	(per share)	(per share)
NUV	\$0.0210	\$0.0007
NUW	\$0.0193	\$0.0028

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of April 30, 2011, NUV, NMI and NEV had positive UNII balances, based upon our best estimate, for tax purposes and positive UNII balances for financial reporting purposes, while NUW had a positive UNII balance, based upon our best estimate, for tax purposes and a negative UNII balance for financial reporting purposes.

#### SHARE REPURCHASES AND SHARE PRICE INFORMATION

Since the inception of the Funds' repurchase program, the Funds' have not repurchased any of their outstanding shares.

#### SHELF EQUITY PROGRAM

On December 8, 2010, a registration statement filed by, NUV with the Securities and Exchange Commission (SEC) became effective authorizing the Fund to issue an additional 19.6 million shares through a shelf offering. Under this shelf offering program, the Fund, subject to market conditions, may raise additional equity capital from time to

time in varying amounts and offer methods at a net price at or above each Fund's NAV per share.

During the six-month reporting period, NUV sold shares through its shelf offering program at an average premium to NAV per share as shown in the accompanying table.

	Shares Sold through	Premium to NAV
Fund	Shelf Offering	Per Share Sold
NUV	208,955	1.18%

As of April 30, 2011 and during the six-month reporting period, the Funds' share prices were trading at (+) premiums or (-) discounts to their NAVs as shown in the accompanying table.

	4/30/11	Six-Month Average
Fund	(-) Discount	(+) Premium/(-) Discount
NUV	(-)1.41%	(-)2.19%
NUW	(-)2.73%	(-)1.42%
NMI	(-)3.71%	(-)2.88%
NEV	(-)4.13%	(-)5.11%

Overview page.

- Taxable-Equivalent Yield represents the yield that must be earned on a fully taxable investment in order to equal the yield
  - of the Fund on an after-tax basis. It is based on a federal income tax rate of 28%. When comparing the Fund to invest-
  - ments that generate qualified dividend income, the Taxable-Equivalent Yield is lower.
- Ratings shown are the highest of Standard & Poor's Group, Moody's Investor Service, Inc. or Fitch, Inc. AAA includes
  - bonds with an implied AAA rating since they are backed by U.S. Government or agency securities. AAA, AA, A and BBB
  - ratings are investment grade; BB, B, CCC, CC, C and D ratings are below-investment grade. Holdings designated N/R are
  - not rated by any of these national rating agencies.
- 3 Holdings are subject to change.
- 14 Nuveen Investments

NEV Performance OVERVIEW Nuveen Enhanced Municipal Value Fund

Refer to the Glossary of Terms Used in this Report for further definition of the terms used within this Fund's Performance

Overview page.

Taxable-Equivalent Yield represents the yield that must be earned on a fully taxable investment in order to equal the yield

of the Fund on an after-tax basis. It is based on a federal income tax rate of 28%. When comparing the Fund to invest-

ments that generate qualified dividend income, the Taxable-Equivalent Yield is lower.

Ratings shown are the highest of Standard & Poor's Group, Moody's Investor Service, Inc. or Fitch, Inc. AAA includes

bonds with an implied AAA rating since they are backed by U.S. Government or agency securities. AAA, AA, A and BBB

ratings are investment grade; BB, B, CCC, CC, C and D ratings are below-investment grade. Holdings designated N/R are

not rated by any of these national rating agencies.

- 3 Holdings are subject to change
- 4 Excluding investments in derivatives.

- (1) All percentages shown in the Portfolio of Investments are based on net assets.
- Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There
  may be other call provisions at varying prices
  at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
  - Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investor Service, Inc.
- (3) ("Moody's") or Fitch, Inc. ("Fitch") rating.

  Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.
- At or subsequent to the end of the reporting period, this security is non-income producing. Non-income producing security, in the case of a bond, generally

denotes that the issuer has (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal Bankruptcy Court or (3) the Fund's

Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has directed the Fund's custodian to cease accruing additional income on the Fund's records.

N/R Not rated.

(ETM) Escrowed to maturity.

(IF) Inverse floating rate investment.

Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to Financial

(UB) Statements, Footnote 1 – General Information and Significant Accounting Policies, Inverse Floating Rate Securities for more information. See accompanying notes to financial statements.

(1) All percentages shown in the Portfolio of Investments are based on net assets.

Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may (2) be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.

Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investor Service, Inc.

(3) ("Moody's") or Fitch, Inc. ("Fitch") rating.
Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

Investment, or portion of investment, has been pledged to collateralize the net payment obligations for investments in inverse floating rate transactions.

N/R Not rated.	
(IF) Inverse floating rate investment.

- (1) All percentages shown in the Portfolio of Investments are based on net assets.
- Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
  - Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investor Service, Inc.
- (3) ("Moody's") or Fitch, Inc. ("Fitch") rating.
  Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

- Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, which ensure the timely payment of principal
  - and interest. Such investments are normally considered to be equivalent to AAA rated securities.
- Investment, or portion of investment, has been pledged to collateralize the net payment obligations for investments in inverse floating rate transactions.
- For fair value measurement disclosure purposes, investment categorized as Level 3. See Notes to Financial
- (6) Statements, Footnote 1 General Information and Significant Accounting Policies, Investment Valuation for more information.
- At or subsequent to the end of the reporting period, this security is non-income producing. Non-income producing security, in the case of a bond, generally denotes that the issuer has (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal Bankruptcy Court or (3) the Fund's Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has directed the Fund's custodian to cease accruing additional income on the Fund's records.

N/R Not rated.

WI/DD Purchased on a when-issued or delayed delivery basis.

(ETM) Escrowed to maturity.

- (IF) Inverse floating rate investment.
- Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to Financial

  (UB) Statements, Footnote 1 General Information
  and Significant Accounting Policies, Inverse Floating Rate Securities for more information.

  See accompanying notes to financial statements.

- (1) All percentages shown in the Portfolio of Investments are based on net assets.
  - Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption.
- (2) There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.

	Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investor Service
(3)	Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating.
	Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below
	investment grade. Holdings designated N/R are not
	rated by any of these national rating agencies.

- Investment, or portion of investment, has been pledged to collateralize the net payment obligations for investments in derivatives and/or inverse floating rate transactions.
- For fair value measurement disclosure purposes, investment categorized as Level 3. See Notes to Financial Statements, Footnote 1 General Information and Significant Accounting Policies, Investment Valuation for more information.
- At or subsequent to the end of the reporting period, this security is non-income producing. Non-income producing security, in the case of a bond, generally denotes that the issuer has (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal Bankruptcy Court or (3) the Fund's Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has directed the Fund's custodian to cease accruing additional income on the Fund's records.
- Investment valued at fair value using methods determined in good faith by, or at the discretion of, the Board of Trustees.
- Effective date represents the date on which both the Fund and Counterparty commence interest payment accruals on each forward swap contract.
- Other Assets Less Liabilities includes the Value and/or the Net Unrealized Appreciation (Depreciation)
  of derivative instruments as listed within
  Investments in Derivatives.

N/R Not rated.

WI/DD Purchased on a when-issued or delayed delivery basis.

(IF) Inverse floating rate investment.

Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to
(UB) Financial Statements, Footnote 1 – General Information
and Significant Accounting Policies, Inverse Floating Rate Securities for more information.

USD-LIBOR United States Dollar-London Inter-Bank Offered Rate. See accompanying notes to financial statements.

Total Return Based on Market Value is the combination of changes in the market price per share and the effect of (a) reinvested dividend income and reinvested capital gains distribu-

tions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the

following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and

in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Net Asset Value is the combination of changes in net asset value, reinvested dividend income at net asset value and reinvested capital gains

distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be

reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its

net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

Ratios do not reflect the effect of custodian fee credits earned on the Fund's net cash on deposit with the custodian

(b) bank, where applicable.

Total Returns

The expense ratios reflect, among other things, the interest expense deemed to have been paid by the Fund on the

(c) floating rate certificates issued by the special purpose

trusts for the self-deposited inverse floaters held by the Fund, where applicable, as described in Footnote 1 – General Information and Significant Accounting Policies,

Inverse Floating Rate Securities.

Each ratio for Enhanced Municipal Value (NEV) includes the effect of the interest expense paid on borrowings, as (d) described in Footnote 8 – Borrowing Arrangements as follows:

Ratios of Borrowings Interest Expense and Fees to Average Net Assets

Notes to Financial Statements(Unaudited)

#### 1. General Information and Significant Accounting Policies

#### **General Information**

The funds covered in this report and their corresponding New York Stock Exchange ("NYSE") symbols are Nuveen Municipal Value Fund, Inc. (NUV), Nuveen Municipal Value Fund 2 (NUW), Nuveen Municipal Income Fund, Inc. (NMI) and Nuveen Enhanced Municipal Value Fund (NEV) (collectively, the "Funds"). The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end, registered investment companies.

Effective January 1, 2011, the Funds' adviser, Nuveen Asset Management, a wholly-owned subsidiary of Nuveen Investments, Inc. ("Nuveen"), changed its name to Nuveen Fund Advisors, Inc. (the "Adviser"). Concurrently, the Adviser formed a wholly-owned subsidiary, Nuveen Asset Management, LLC (the "Sub-Adviser"), to house its portfolio management capabilities and to serve as the Funds' sub-adviser, and the Funds' portfolio manager became an employee of the Sub-Adviser. This allocation of responsibilities between the Adviser and the Sub-Adviser affects each of the Funds. The Adviser will compensate the Sub-Adviser for the portfolio management services it provides to the Funds from each Fund's management fee.

Each Fund seeks to provide current income from regular federal income tax by investing primarily in a portfolio of municipal obligations issued by state and local government authorities or certain U.S. territories.

#### Significant Accounting Policies

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles ("U.S. GAAP").

#### **Investment Valuation**

Prices of municipal bonds and forward swap contracts are provided by a pricing service approved by the Funds' Board of Directors/Trustees. These securities are generally classified as Level 2 for fair value measurement purposes. When price quotes are not readily available (which is usually the case for municipal bonds) the pricing service establishes a security's fair value using methods that may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. In pricing certain securities, particularly less liquid and lower quality securities, the pricing service may consider information about a security, its issuer, or market activity provided by the Adviser. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs.

Certain securities may not be able to be priced by the pre-established pricing methods as described above. Such securities may be valued by the Funds' Board of Directors/Trustees or its designee at fair value. These securities generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; debt securities that have gone into default and for which there is no current market quotation; a security whose market price is not available from a pre-established pricing

source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of a Fund's net asset value (as may be the case in non-U.S. markets on which the security is primarily traded) or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, is not deemed to reflect the security's fair value. As a general principle, the fair value of a security would appear to be the amount that the owner might reasonably expect to receive for it in a current sale. A variety of factors may be considered in determining the fair value of such securities, which may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs. Regardless of the method employed to value a particular security, all valuations are subject to review by the Funds' Board of Directors/Trustees or its designee.

Refer to Footnote 2 – Fair Value Measurements for further details on the leveling of securities held by the Funds as of the end of the reporting period.

#### **Investment Transactions**

58 Nuveen Investments

Investment transactions are recorded on a trade date basis. Realized gains and losses from transactions are determined on the specific identification method, which is the same basis used for federal income tax purposes. Investments purchased on a when-issued/delayed delivery basis may have

extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. At April 30, 2011, Municipal Income (NMI) and Enhanced Municipal Value (NEV) had outstanding when-issued/delayed delivery purchase commitments of \$429,594 and \$4,890,361, respectively. There were no such outstanding purchase commitments in any of the other Funds.

#### **Investment Income**

Investment income, which reflects the amortization of premiums and includes accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Investment income also reflects paydown gains and losses, if any.

#### Professional Fees

Professional fees presented on the Statement of Operations consist of legal fees incurred in the normal course of operations, audit fees, tax consulting fees and, in some cases, workout expenditures. Workout expenditures are incurred in an attempt to protect or enhance an investment, or to pursue other claims or legal actions on behalf of Fund shareholders.

#### Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all of its net investment income and net capital gains to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions that will enable interest from municipal securities, which is exempt from regular federal income tax, to retain such tax-exempt status when distributed to shareholders of the Funds. Net realized capital gains and ordinary income distributions paid by the Funds are subject to federal taxation.

For all open tax years and all major taxing jurisdictions, management of the Funds has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Open tax years are those that are open for examination by taxing authorities (i.e., generally the last four tax year ends and the interim tax period since then). Furthermore, management of the Funds is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

#### Dividends and Distributions to Shareholders

Dividends from net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders at least annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to shareholders of net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP.

#### **Shelf Offering**

During the six months ended April 30, 2011, Municipal Value (NUV) filed a registration statement with the Securities and Exchange Commission ("SEC") authorizing the Fund to issue an additional 19,600,000 shares through a shelf offering which became effective with the SEC on December 8, 2010.

During the six months ended April 30, 2011, the Fund issued 208,955 shares, receiving offering proceeds, net of offering costs of \$1,878,673. Under this equity shelf program, the Fund, subject to market conditions, may raise additional capital from time to time in varying amounts and offering methods at a net price at or above the Fund's NAV per share.

#### **Shelf Offering Costs**

Costs incurred by Municipal Value (NUV) in connection with the shelf offerings of its shares are recorded as a deferred charge which are amortized over the period such additional shares are sold not to exceed the one-year life of the shelf offering period.

#### **Inverse Floating Rate Securities**

Each Fund is authorized to invest in inverse floating rate securities. An inverse floating rate security is created by depositing a municipal bond, typically with a fixed interest rate, into a special purpose trust created by a broker-dealer. In turn, this trust (a) issues floating rate certificates, in face amounts equal to some fraction of the deposited bond's par amount or market value, that typically pay short-term tax-exempt interest rates to third parties, and (b) issues to a long-term investor (such as one of the Funds) an inverse floating rate certificate (sometimes referred to as an "inverse floater") that represents all remaining or residual interest in the trust. The income received by the inverse floater holder varies inversely with the short-term rate paid to the floating rate certificates' holders, and in most circumstances the inverse floater holder bears substantially all of the underlying bond's downside investment risk and also benefits disproportionately from any potential appreciation of the underlying bond's value. The price of an inverse floating rate security will be more volatile than that of the underlying bond because the interest rate is dependent on not only the fixed coupon rate of the underlying bond but also on the short-term interest paid on the floating rate certificates, and because the inverse floating rate security essentially bears the risk of loss of the greater face value of the underlying bond.

Notes to Financial Statements (Unaudited) (continued)

A Fund may purchase an inverse floating rate security in a secondary market transaction without first owning the underlying bond (referred to as an "externally-deposited inverse floater"), or instead by first selling a fixed-rate bond to a broker-dealer for deposit into the special purpose trust and receiving in turn the residual interest in the trust (referred to as a "self-deposited inverse floater"). The inverse floater held by a Fund gives the Fund the right (a) to cause the holders of the floating rate certificates to tender their notes at par, and (b) to have the broker transfer the fixed-rate bond held by the trust to the Fund, thereby collapsing the trust. An investment in an externally-deposited inverse floater is identified in the Portfolio of Investments as "(IF) – Inverse floating rate investment." An investment in a self-deposited inverse floater is accounted for as a financing transaction. In such instances, a fixed-rate bond deposited into a special purpose trust is identified in the Portfolio of Investments as "(UB) – Underlying bond of an inverse floating rate trust reflected as a financing transaction," with the Fund accounting for the short-term floating rate certificates issued by the trust as "Floating rate obligations" on the Statement of Assets and Liabilities. In addition, the Fund reflects in "Investment Income" the entire earnings of the underlying bond and recognizes the related interest paid to the holders of the short-term floating rate certificates as a component of "Interest expense" on the Statement of Operations.

During the six months ended April 30, 2011, each Fund invested in externally-deposited inverse floaters and/or self-deposited inverse floaters.

Each Fund may also enter into shortfall and forbearance agreements (sometimes referred to as a "recourse trust" or "credit recovery swap") (such agreements referred to herein as "Recourse Trusts") with a broker-dealer by which a Fund agrees to reimburse the broker-dealer, in certain circumstances, for the difference between the liquidation value of the fixed-rate bond held by the trust and the liquidation value of the floating rate certificates issued by the trust plus any shortfalls in interest cash flows. Under these agreements, a Fund's potential exposure to losses related to or on inverse floaters may increase beyond the value of a Fund's inverse floater investments as a Fund may potentially be liable to fulfill all amounts owed to holders of the floating rate certificates. At period end, any such shortfall is recognized as "Unrealized depreciation on Recourse Trusts" on the Statement of Assets and Liabilities.

At April 30, 2011, each Fund's maximum exposure to externally-deposited Recourse Trusts is as follows:

				Ennanced
	Municipal	Municipal	Municipal	Municipal
	Value (NUV)	Value 2 (NUW)	Income (NMI) V	alue (NEV)
Maximum exposure to Recourse Trusts	\$7,500,000	\$23,665,000	\$6,005,000	\$132,635,000

The average floating rate obligations outstanding and average annual interest rate and fees related to self-deposited inverse floaters during the six months ended April 30, 2011, were as follows:

			Enhanced
	Municipal	Municipal	Municipal
	Value	Income	Value
	(NUV)	(NMI)	(NEV)
Average floating rate obligations outstanding	\$38,250,000	\$3,335,000	\$9,116,022

#### Forward Swap Contracts

Each Fund is authorized to enter into forward interest rate swap contracts consistent with their investment objectives and policies to reduce, increase or otherwise alter its risk profile or to alter its portfolio characteristics (i.e. duration, yield curve positioning and credit quality).

Each Fund's use of forward interest rate swap transactions is intended to help the Fund manage its overall interest rate sensitivity, either shorter or longer, generally to more closely align the Fund's interest rate sensitivity with that of the broader market. Forward interest rate swap transactions involve a Fund's agreement with a counterparty to pay, in the future, a fixed or variable rate payment in exchange for the counterparty paying the Fund a variable or fixed rate payment, the accruals for which would begin at a specified date in the future (the "effective date"). The amount of the payment obligation is based on the notional amount of the swap contract and the termination date of the swap (which is akin to a bond's maturity). The value of a Fund's swap commitment would increase or decrease based primarily on the extent to which long-term interest rates for bonds having a maturity of the swap's termination date increases or decreases. Forward interest rate swap contracts are valued daily. The net amount recorded on these transactions for each counterparty is recognized on the Statement of Assets and Liabilities as a component of "Unrealized appreciation or depreciation on forward swaps" with the change during the fiscal period recognized on the Statement of Operations as a component of "Change in net unrealized appreciation (depreciation) of forward swaps."

Each Fund may terminate a swap contract prior to the effective date, at which point a realized gain or loss is recognized. When a forward swap is terminated, it ordinarily does not involve the delivery of securities or other underlying assets or principal, but rather is settled in cash on a net basis. Net realized gains and losses during the fiscal period are recognized on the Statement of Operations as a component of "Net realized gain (loss) from forward swaps." Each Fund intends, but is not obligated, to terminate its forward swaps before the effective date. Accordingly, the risk of loss with respect to the swap counterparty on such transactions is limited to the credit risk associated with a counterparty failing to honor its commitment to pay any realized gain to the Fund upon termination.

During the six months ended April 30, 2011, Enhanced Municipal Value (NEV) entered into forward interest rate swap contracts to reduce the duration of the Fund's portfolio. The average notional amount of forward interest rate swap contracts outstanding during the six months ended April 30, 2011, was as follows:

Enhanced Municipal Value (NEV)

Average notional amount of forward interest rate swap contracts outstanding\* \$14,250,000

Refer to Footnote 3 — Derivative Instruments and Hedging Activities for further details on forward interest rate swap contract activity.

#### Market and Counterparty Credit Risk

In the normal course of business each Fund may invest in financial instruments and enter into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the other party to the transaction to perform (counterparty credit risk). The potential loss could exceed the value of the financial assets recorded on the financial statements. Financial assets, which potentially expose each Fund to counterparty credit risk, consist principally of cash due from counterparties on forward, option and swap transactions, when applicable. The extent of each Fund's exposure to counterparty credit risk in respect to these financial assets approximates their carrying value as recorded on the Statement of Assets and Liabilities. Futures contracts, when applicable, expose a Fund to minimal counterparty credit risk as they are exchange traded and the exchange's clearinghouse, which is counterparty to all exchange traded futures, guarantees the futures contracts against default.

Each Fund helps manage counterparty credit risk by entering into agreements only with counterparties the Adviser believes have the financial resources to honor their obligations and by having the Adviser monitor the financial stability of the counterparties. Additionally, counterparties may be required to pledge collateral daily (based on the daily valuation of the financial asset) on behalf of each Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold. Reciprocally, when each Fund has an unrealized loss, the Funds have instructed the custodian to pledge assets of the Funds as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the valuations fluctuate, either up or down, by at least the predetermined threshold amount.

#### Zero Coupon Securities

Each Fund is authorized to invest in zero coupon securities. A zero coupon security does not pay a regular interest coupon to its holders during the life of the security. Tax-exempt income to the holder of the security comes from accretion of the difference between the original purchase price of the security at issuance and the par value of the security at maturity and is effectively paid at maturity. The market prices of zero coupon securities generally are more volatile than the market prices of securities that pay interest periodically.

#### Custodian Fee Credit

<sup>\*</sup> The average notional amount is calculated based on the outstanding notional at the beginning of the fiscal year and at the end of each fiscal quarter within the current fiscal year.

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by net credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments. Credits for cash balances may be offset by charges for any days on which a Fund overdraws its account at the custodian bank.

#### Indemnifications

Under the Funds' organizational documents, their officers and directors/trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

#### Use of Estimates

Nuveen Investments 61

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results may differ from those estimates.

Financial Statements (Unaudited) (continued)

#### 2. Fair Value Measurements

Fair value is defined as the price that the Funds would receive upon selling an investment or transferring a liability in an orderly transaction to an independent buyer in the principal or most advantageous market of the investment. A three-tier hierarchy is used to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

Level 1 – Quoted prices in active markets for identical securities.

Level 2 – Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 – Significant unobservable inputs (including management's assumptions in determining the fair value of investments).

The inputs or methodologies used for valuing securities are not an indication of the risk associated with investing in those securities. The following is a summary of each Fund's fair value measurements as of April 30, 2011:

Municipal Value (NUV)	Level 1	Level 2	Level 3	Total
Investments:				
Municipal Bonds	\$—	\$1,826,898,272	\$	\$1,826,898,272
Municipal Value 2 (NUW)	Level 1	Level 2	Level 3	Total
Investments:				
Municipal Bonds	\$—	\$195,506,967	\$	\$195,506,967
Municipal Income (NMI)	Level 1	Level 2	Level 3	Total
Investments:				
Municipal Bonds	\$	\$84,627,896	\$25,050	\$84,652,946
Enhanced Municipal Value (NEV)	Level 1	Level 2	Level 3	Total
Investments:				
Municipal Bonds	\$	\$265,700,962	\$222,023	\$265,922,985
Derivatives:				
Forward Swaps*		(703,685)	<del>_</del>	(703,685)
Total	<b>\$</b> —	\$264,997,277	\$222,023	\$265,219,300

<sup>\*</sup> Represents net unrealized appreciation (depreciation).

The following is a reconciliation of the Funds' Level 3 investments held at the beginning and end of the measurement period:

		Enhanced
	Municipal	Municipal
	Income	Value
	(NMI)	(NEV)
	Level 3	Level 3
	Municipal	Municipal
	Bonds	Bonds
Balance at the beginning of period	\$26,021	\$189,235
Gains (losses):		
Net realized gains (losses)	(18,646 )	_
Net change in unrealized appreciation (depreciation)	17,675	(2,860)
Purchases at cost	_	35,648
Sales at proceeds	_	_
Net discounts (premiums)	_	_
Transfers into	_	_
Transfers out of	—	_
Balance at the end of period	\$25,050	\$222,023
Net change in unrealized appreciation (depreciation) during		
the period of Level 3 securities held at April 30, 2011	\$17,675	\$(2,860)

During the six months ended April 30, 2011, the Funds recognized no significant transfers to/from Level 1, Level 2 or Level 3.

#### 3. Derivative Instruments and Hedging Activities

The Funds record derivative instruments at fair value, with changes in fair value recognized on the Statement of Operations, when applicable. Even though the Funds' investments in derivatives may represent economic hedges, they are not considered to be hedge transactions for financial reporting purposes. For additional information on the derivative instruments in which each Fund was invested during and at the end of the reporting period, refer to the Portfolios of Investments, Financial Statements and Footnote 1 - General Information and Significant Accounting Policies.

The following table presents the fair value of all derivative instruments held by the Funds as of April 30, 2011, the location of these instruments on the Statement of Assets and Liabilities, and the primary underlying risk exposure. Enhanced Municipal Value (NEV) invested in derivative instruments during the six months ended April 30, 2011.

## Enhanced Municipal Value (NEV)

Location on the Statement of Assets and Liabilities					
Underlying	Derivative	Asset Derivatives		Liability Derivatives	
Risk Exposure	Instrument	Location	Value	Location	Value
		Unrealized		Unrealized	
Interest Rate	Forward Swaps	appreciation		depreciation	
		on forward swaps*	\$ —	on forward swaps*	\$703,685

<sup>\*</sup> Represents cumulative gross unrealized appreciation (depreciation) of forward swap contracts as reported in the Portfolio of Investments.

The following tables present the amount of net realized gain (loss) and change in net unrealized appreciation (depreciation) recognized for the six months ended April 30, 2011, on derivative instruments, as well as the primary risk exposure associated with each.

	Enhanced Municipal Value	
Net Realized Gain (Loss) from Forward Swaps	(NEV)	
Risk Exposure		
Interest Rate		\$(674,000)
	Enhanced	
	Municipal Value	
Change in Net Unrealized Appreciation (Depreciation) of Forward Swaps	(NEV)	
Risk Exposure		
Interest Rate		\$1,420,477

#### 4. Fund Shares

The Funds did not repurchase and retire any of their outstanding shares during the six months ended April 30, 2011, or the fiscal year ended October 31, 2010.

#### Transactions in shares were as follows:

	Municipal Value (NUV)		Municipal Value	2 (NUW)
	Six Months	Year	Six Months	Year
