Guggenheim Partners Investment Management, LLC and Guggenheim Funds Investment Advisors, LLC are continually updating and expanding shareholder information services on the Trust's website in an ongoing effort to provide you with the most current information about how your Trust's assets are managed and the results of our efforts. It is just one more small way we are working to keep you better informed about your investment in the Trust.

(Unaudited) November 30, 2017

DEAR SHAREHOLDER

We thank you for your investment in the Guggenheim Taxable Municipal Managed Duration Trust (the “Trust”). This report covers the Trust’s performance for the six-month period ended November 30, 2017.

The Trust’s primary investment objective is to provide current income with a secondary objective of long-term capital appreciation. Under normal market conditions, the Trust invests at least 80% of its net assets plus the amount of any borrowings for investment purposes (“Managed Assets”) in a diversified portfolio of taxable municipal securities, and may invest up to 20% of Managed Assets in securities other than taxable municipal securities.

All Trust returns cited—whether based on net asset value (“NAV”) or market price—assume the reinvestment of all distributions. For the six-month period ended November 30, 2017, the Trust provided a total return based on market price of 0.16% and a total return based on NAV of 3.41%. As of November 30, 2017, the Trust’s market price of \$22.51 per share represented a discount of 3.51% to its NAV of \$23.33 per share.

Past performance is not a guarantee of future results. All NAV returns include the deduction of management fees, operating expenses, and all other Trust expenses. The market price of the Trust’s shares fluctuates from time to time, and may be higher or lower than the Trust’s NAV.

Each month of the period, the Trust paid a monthly distribution of \$0.12573 per share. The most recent distribution represents an annualized rate of 6.70% based on the Trust’s closing market price of \$22.51 on November 30, 2017. There is no guarantee of any future distribution or that the current returns and distribution rate will be maintained. The Trust’s distribution rate is not constant and the amount of distributions, when declared by the Trust’s Board of Trustees, is subject to change based on the performance of the Trust. Please see Note 2(d) on page 42 for more information on distributions for the period.

Guggenheim Funds Investment Advisors, LLC (“GFIA” or the “Adviser”) serves as the investment adviser to the Trust. Guggenheim Partners Investment Management, LLC (“GPIM” or the “Sub-Adviser”) serves as the Trust’s investment sub-adviser and is responsible for the management of the Trust’s portfolio of investments. Each of the Adviser and the Sub-Adviser is an affiliate of Guggenheim Partners, LLC (“Guggenheim”), a global diversified financial services firm. We encourage shareholders to consider the opportunity to reinvest their distributions from the Trust through the Dividend Reinvestment Plan (“DRIP”), which is described in detail on page 60 of this report. When shares trade at a discount to NAV, the DRIP takes advantage of the discount by reinvesting the monthly distribution in common shares of the Trust purchased in the market at a price less than NAV. Conversely, when the market price of the Trust’s common shares is at a premium above NAV, the DRIP reinvests participants’ distributions in newly-issued common shares at the greater of NAV per share or 95% of the market price per share. The DRIP provides a cost effective means to accumulate additional shares and enjoy the benefits of compounding returns over time. Since the Trust endeavors to maintain a steady monthly distribution rate, the DRIP effectively provides an income averaging technique, which

DEAR SHAREHOLDER (Unaudited) continued November 30, 2017

causes shareholders to accumulate a larger number of Trust shares when the share price is lower than when the price is higher.

To learn more about the Trust's performance and investment strategy for the semiannual period ended November 30, 2017, we encourage you to read the Questions & Answers section of this report, which begins on page 5.

We are honored that you have chosen the Guggenheim Taxable Municipal Managed Duration Trust as part of your investment portfolio. For the most up-to-date information regarding your investment, please visit the Trust's website at guggenheiminvestments.com/gbab.

Sincerely,

Guggenheim Funds Investment Advisors, LLC
December 31, 2017

4 | GBAB | GUGGENHEIM TAXABLE MUNICIPAL MANAGED DURATION TRUST SEMIANNUAL REPORT

QUESTIONS & ANSWERS (Unaudited) November 30, 2017

Guggenheim Taxable Municipal Managed Duration Trust (the “Trust”) is managed by a team of seasoned professionals at Guggenheim Partners Investment Management, LLC (“GPIM” or the “Sub-Adviser”). This team includes B. Scott Miner, Chairman of Investments and Global Chief Investment Officer; Anne B. Walsh, CFA, JD, Senior Managing Director and Assistant Chief Investment Officer; Jeffrey S. Carefoot, CFA, Senior Managing Director and Portfolio Manager; and Allen Li, CFA, Managing Director and Portfolio Manager. Effective December 1, 2017, James E. Pass no longer serves as a portfolio manager for the Trust. In the following interview, the investment team discusses the market environment and the Trust’s strategy and performance for the six-month period ended November 30, 2017.

What is the Trust’s investment objective and how is it pursued?

The Trust’s primary investment objective is to provide current income with a secondary objective of long-term capital appreciation. The Trust seeks to achieve its investment objectives by investing primarily in a diversified portfolio of taxable municipal securities. Under normal market conditions, the Trust will invest at least 80% of its Managed Assets in taxable municipal securities, including Build America Bonds (“BABs”), which qualify for federal subsidy payments under the American Recovery and Reinvestment Act of 2009 (the “Act”).

Under normal market conditions, the Trust may invest up to 20% of its Managed Assets in securities other than taxable municipal securities, including municipal securities, the interest income from which is exempt from regular federal income tax (sometimes referred to as “tax-exempt municipal securities”); and asset-backed securities (“ABS”), senior loans, and other income-producing securities.

At least 80% of the Trust’s Managed Assets are invested in securities that, at the time of investment, are investment grade quality. The Trust may invest up to 20% of its Managed Assets in securities that, at the time of investment, are below investment grade quality. Securities of below investment grade quality are regarded as having predominantly speculative characteristics with respect to capacity to pay interest and repay principal. The Trust does not invest more than 25% of its Managed Assets in municipal securities in any one state of origin or more than 15% of its Managed Assets in municipal securities that, at the time of investment, are illiquid.

Most of the portfolio is invested in Build America Bonds. Has anything changed in that market?

Most of the Trust’s taxable municipal allocation is currently in BABs. BABs are taxable municipal securities that were created to support the public finance market following the 2009 financial crisis, and also to provide funding for projects that would create jobs. They include bonds issued by state and local governments to finance capital projects such as public schools, roads, transportation infrastructure, bridges, ports, and public buildings. In contrast to traditional municipal bonds, interest received on BABs is subject to federal income tax and may be subject to state income tax. However,

QUESTIONS & ANSWERS (Unaudited) continued November 30, 2017

issuers of Direct Payment BABs are eligible to receive a subsidy from the U.S. Treasury of up to 35% of the interest paid on the bonds, allowing them to issue BABs that pay interest rates that are competitive with the rates typically paid by private bond issuers in the taxable fixed-income market.

Because the relevant provisions of the Act were not extended, bonds issued after December 31, 2010 cannot qualify as BABs. Therefore, the number of BABs available in the market is limited. Nearly \$200 billion in BABs were issued before the program ended in 2010.

BABs have a feature that provides issuers the option to redeem the BABs if the U.S. government reduces the subsidy to the municipality. Most BABs became callable after Congress mandated sequestration in 2013. The subsidy has continued to be cut by about 7% in each of the past several fiscal years, effectively increasing the cost of borrowing for issuers. Nevertheless, the subsidy still in effect remains attractive to issuers, so relatively few BABs have been called.

Since the issuances under the BABs program concluded, gridlock at the federal level has meant state and local issuers have been the only source of municipal bonds. Proposals to reauthorize BABs or enact similar legislation have not been successful. A domestic infrastructure spending could result in some sort of qualified infrastructure bonds, including a program similar to Build America Bonds as a supplement to other programs involving other taxable or tax-exempt municipal bonds.

What were the significant events affecting the economy and market environment over the six-month period ended November 30, 2017?

At period end, the economy was enjoying the lowest unemployment rate since December 2000, the highest small business optimism since 1983, strong corporate earnings growth, and the prospect of a new tax regime that could stimulate growth and business investment. Regulatory relief for banks was also in the offing, alleviating undue burdens on mid-sized lenders. All this positive news prompted the U.S. Federal Reserve (the "Fed") to gradually raise rates toward neutral in 2017, but an overheating labor market could force the Fed to continue on that path in 2018. The fourth quarter of 2017 saw the commencement of the Fed's balance sheet roll-off in October and another rate hike in December, taking the federal funds target to a range of 1.25% to 1.50%. Soft inflation surprised many market participants in 2017, but due to base effects and a tight labor market, core inflation may start to rise. With the unemployment rate approaching 3.5%, Fed hikes may occur at a faster pace in 2018 than policymakers or financial markets currently expect.

While the 2018 economic outlook is positive, the Fed is moving to an increasingly tight policy, and investors need to remain vigilant for late-cycle trends in the business cycle. In the meantime, the reduction in the corporate tax rate to 21% should be good for earnings, and the immediate expensing of capital expenditures could cause a surge in capital spending. However, higher levered segments of the fixed-income market may face negative effects from new rules governing tax deductibility of interest expense above certain limits. Investors must ensure that they are being adequately compensated for taking on credit risk in this environment.

QUESTIONS & ANSWERS (Unaudited) continued November 30, 2017

How did the Trust perform for the six-month period ended November 30, 2017?

All Trust returns cited—whether based on net asset value (“NAV”) or market price—assume the reinvestment of all distributions. For the six-month period ended November 30, 2017, the Trust provided a total return based on market price of 0.16% and a total return based on NAV of 3.41%. As of November 30, 2017, the Trust’s market price of \$22.51 per share represented a discount of 3.51% to its NAV of \$23.33 per share. As of May 31, 2017, the Trust’s market price of \$23.23 per share represented a discount of 0.30% to its NAV of \$23.30 per share.

Past performance is not a guarantee of future results. All NAV returns include the deduction of management fees, operating expenses, and all other Trust expenses. The market price of the Trust’s shares fluctuates from time to time, and may be higher or lower than the Trust’s NAV.

The Trust paid a monthly distribution of \$0.12573. The most recent distribution represents an annualized rate of 6.70% based on the Trust’s closing market price of \$22.51 on November 30, 2017.

There is no guarantee of any future distribution or that the current returns and distribution rate will be maintained. The Trust’s distribution rate is not constant and the amount of distributions, when declared by the Trust’s Board of Trustees, is subject to change based on the performance of the Trust. Please see Note 2(d) on page 42 for more information on distributions for the period.

Why did the Trust accrue excise tax during the six-month period ended November 30, 2017?

As a registered investment company, the Trust is subject to a 4% excise tax that is imposed if the Trust does not distribute by the end of any calendar year at least the sum of (i) 98% of its ordinary income (not taking into account any capital gain or loss) for the calendar year and (ii) 98.2% of its capital gain in excess of its capital loss (adjusted for certain ordinary losses) for a one-year period generally ending on October 31 of the calendar year (unless an election is made to use the trust’s fiscal year). The Trust generally intends to distribute income and capital gains in the manner necessary to minimize (but not necessarily eliminate) the imposition of such excise tax. While the Trust’s income and capital gains can vary significantly from year to year, the Trust seeks to maintain more stable monthly distributions over time. The Trust may retain income or capital gains and pay excise tax when it is determined that doing so is in the best interest of shareholders. Management, in consultation with the Board, evaluates the costs of the excise tax relative to the benefits of retaining income and capital gains, including that such undistributed amounts (net of the excise tax paid) remain available for investment by the Trust and are available to supplement future distributions, which may facilitate the payment of more stable monthly distributions year over year.

QUESTIONS & ANSWERS (Unaudited) continued November 30, 2017

How did other markets perform in this environment for the six-month period ended November 30, 2017?

Index	Total Return
ICE BofA ML Build America Bond Index	3.34%
Bloomberg Barclays Taxable Municipal Index	3.31%
Bloomberg Barclays Municipal Index	0.40%
Bloomberg Barclays U.S. Aggregate Bond Index	0.68%
Bloomberg Barclays U.S. Corporate High Yield Index	2.28%
Credit Suisse Leveraged Loan Index	1.78%
ICE BofA/ML ABS Master BBB-AA Index	1.49%
S&P 500 Index	10.89%

What was notable in the municipal market for the six-month period ended November 30, 2017?

As of November 30, 2017, gross municipal issuance totaled \$374 billion, 13% lower over the same period in 2016 and closer to 10-year averages. The lower volume reflected policy uncertainties, new political landscapes, and fewer refinancing opportunities. Following the period end, issuance in December 2017 reached a record high of \$62.5 billion compared to a 5-year average of \$27.2 billion in December. As of December 31, 2017, gross municipal issuance totaled \$436 billion, 3% lower over the prior year. According to Lipper, municipal funds experienced net inflows of \$18.1 billion in 2017.

Over the last six months, the municipal market continued to digest the progress of a wide range of federal policies, tax reform in particular. Finalized in December, the new tax bill included a provision to eliminate the federal income tax exemption on advanced refunding bonds, which municipal issuers use to refinance debt more than 90 days prior to bonds' respective maturity dates.

In the months prior to January 1, 2018, the effective date of the tax legislation, the municipal market saw a sharp increase in new issue supply, driven by the expected expiration of tax exemption on advanced refunding bonds and uncertainty surrounding tax exemption provisions for private activity bonds most frequently issued by hospitals and universities. These types of bonds have accounted for approximately one-quarter of municipal bond supply in recent years.

The municipal market continued to focus on the Commonwealth of Puerto Rico, whose restructuring affects over \$70 billion of debt, equivalent to greater than four times the debt included in the City of Detroit's bankruptcy that began in 2013. Debt recoveries in Puerto Rico will hinge on legal decisions surrounding the priority of numerous stakeholders' claims to Puerto Rico's available resources. Implications of restructuring proceedings may impact the broader municipal market.

What is attractive about taxable municipals?

Taxable municipal issuance has accounted for roughly 10% of the annual new-issue municipal supply, and in 2017 is expected to total about \$30 billion. As record-low interest rates globally spurred a demand for yield, the percentage of taxable municipal bonds held by non-U.S. investors has doubled

QUESTIONS & ANSWERS (Unaudited) continued November 30, 2017

since 2009. These investors have been drawn by yields that are generally higher than comparable Treasury securities and have default rates and volatility lower than corporate bonds. Taxable municipals also have low correlation to other fixed income sectors, as well as equities. For these reasons, among others, the index of taxable municipals outpaced that of the broader municipal market for the six-month period ended November 30, 2017.

Discuss Trust asset allocation and respective performance for the six-month period ended November 30, 2017.

The Trust's asset allocation changed little over the six-month period. The percentage of the Trust's long-term investments (excluding cash) that was invested in taxable municipals (including BABs) Qualified School Construction Bonds ("QSCBs"), and other taxable municipal securities stayed at about 87%.

The balance of the Trust's Managed Assets, equal to approximately 13% of the Trust's long-term investments, was invested in ABS, bank loans, and high yield corporate bonds, as well as non-taxable municipal securities, such as tax-exempt municipal bonds. This exposure to leveraged credit, including senior floating rate interests and high yield bonds, and to ABS contributed to Trust performance, as these sectors had good returns over the six-month period with low correlation to the Trust's core holdings.

Positively influencing the Trust's return for the period were duration and yield curve positioning, sector allocation, the use of derivatives, and the use of leverage to enhance the Trust's returns. Performance was driven by favorable security selection and lower interest rate sensitivity than the benchmark. Trust duration and credit quality remained stable over the period, helping manage risk. In addition, the Trust held interest rate swaps over the period to help manage the cost of leverage and to manage duration. The Trust continued to focus on A-rated taxable municipals in credit selection. Given increased market volatility and idiosyncratic weakness, the Trust continues to seek attractive risk-adjusted investment opportunities.

Discuss the Trust's duration.

The Sub-Adviser employs investment and trading strategies that seek to maintain the leverage-adjusted duration of the Trust's portfolio to generally less than 10 years. At November 30, 2017, the Trust's duration was approximately seven years. (Duration is a measure of a bond's price sensitivity to changes in interest rates, expressed in years. Duration is a weighted average of the times that interest payments and the final return of principal are received. The weights are the amounts of the payments discounted by the yield to maturity of the bond.)

The Sub-Adviser may seek to manage the duration of the Trust's portfolio through the use of derivative instruments, including U.S. Treasury swaps, credit default swaps, total return swaps, and futures contracts, in an attempt to reduce the overall volatility of the Trust's portfolio to changes in market interest rates. The Sub-Adviser used derivative instruments to manage the duration of the Trust's

QUESTIONS & ANSWERS (Unaudited) continued November 30, 2017

portfolio during the period. The Sub-Adviser may seek to manage the Trust's duration in a flexible and opportunistic manner based primarily on then-current market conditions and interest rate levels. The Trust may incur costs in implementing the duration management strategy, but such strategy will seek to reduce the volatility of the Trust's portfolio.

Discuss the Trust's use of leverage.

Since leverage adds to performance when the cost of leverage is less than the total return generated by investments, the use of leverage contributed to the Trust's total return based on NAV during this period. The Trust utilizes leverage as part of its investment strategy, to finance the purchase of additional securities that provide increased income and potentially greater appreciation potential to common shareholders than could be achieved from a portfolio that is not leveraged. Leverage will not exceed 33.33% of the Trust's Managed Assets.

As of November 30, 2017, the Trust's leverage was approximately 21% of Managed Assets (including the proceeds of leverage), compared with approximately 22% as of May 31, 2017. The Trust currently employs leverage through reverse repurchase agreements with two counterparties and a credit facility with a major bank.

There is no guarantee that the Trust's leverage strategy will be successful. The Trust's use of leverage may cause the Trust's NAV and market price of common shares to be more volatile and could magnify the effect of any losses.

Index Definitions

Indices are unmanaged and reflect no expenses. It is not possible to invest directly in an index.

The ICE BofA/ML Build America Bond Index is designed to track the performance of U.S. dollar-denominated Build America Bonds publicly issued by U.S. states and territories, and their political subdivisions, in the U.S. market.

Bloomberg Barclays Taxable Municipal Index tracks performance of investment-grade fixed income securities issued by state and local governments whose income is not exempt from tax, issued generally to finance a project or activity that does not meet certain "public purpose/ use" requirements.

Bloomberg Barclays Municipal Index is a broad market performance benchmark for the tax-exempt bond market. The bonds included in this index must have a minimum credit rating of at least Baa.

QUESTIONS & ANSWERS (Unaudited) continued November 30, 2017

The Bloomberg Barclays U.S. Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including U.S. Treasuries, government-related and corporate securities, mortgage-backed securities or “MBS” (agency fixed-rate and hybrid adjustable-rate mortgage, or “ARM”, pass-throughs), asset-backed securities (“ABS”), and commercial mortgage-backed securities (“CMBS”) (agency and non-agency).

The Bloomberg Barclays U.S. Corporate High Yield Index measures the U.S. dollar-denominated, high yield, fixed-rate corporate bond market. Securities are classified as high yield if the middle rating of Moody’s, Fitch, and S&P is Ba1/BB +/BB + or below.

The Credit Suisse Leveraged Loan Index is an index designed to mirror the investable universe of the U.S.-dollar-denominated leveraged loan market.

The ICE BofA/ML ABS Master BBB-AA Index is a subset of The BofA/ML U.S. Fixed Rate Asset Backed Securities Index including all securities rated AA1 through BBB3, inclusive.

The Standard & Poor’s (“S&P 500”) Index is a capitalization-weighted index of 500 stocks designed to measure the performance of the broad economy, representing all major industries and is considered a representation of U.S. stock market.

Risks and Other Considerations

Investing involves risk, including the possible loss of principal and fluctuation of value.

* Non-income producing security.

† Value determined based on Level 1 inputs, unless otherwise noted — See Note 4.

†† Value determined based on Level 2 inputs, unless otherwise noted — See Note 4.

††† Value determined based on Level 3 inputs — See Note 4.

1 Security was fair valued by the Valuation Committee at November 30, 2017. The total market value of fair valued securities amounts to \$2,310,061, (cost \$2,686,546) or 0.6% of total net assets.

2 Investment in an affiliated issuer.

3 Rate indicated is the 7 day yield as of November 30, 2017.

4 All or a portion of these securities have been physically segregated in connection with borrowings and reverse repurchase agreements. As of November 30, 2017, the total value of securities segregated was \$260,713,561.

5 Variable rate security. The rate indicated is the rate effective at November 30, 2017. In some instances, the underlying reference rate shown was below the minimum rate earned by the security or has been adjusted by a predetermined factor. The settlement status of a position may also impact the effective rate indicated. In instances where multiple underlying reference rates and spread amounts are shown, the effective rate is based on a weighted average.

6 Security is a 144A or Section 4(a)(2) security. These securities have been determined to be liquid under guidelines established by the Board of Trustees. The total market value of 144A or Section 4(a)(2) securities is \$23,961,116 (cost \$20,800,356), or 5.9% of total net assets.

7 Security is in default of interest and/or principal obligations.

8 Security has no stated coupon. However, it is expected to receive residual cash flow payments on defined deal dates.

9 Term loan interests in the Trust's portfolio generally have variable rates. All or a portion of this security represents unsettled loan positions and may not have a stated coupon rate.

10 Taxable municipal bond issued as part of the Build America Bond program.

11 Payment-in-kind security.

12 Security is a 144A or Section 4(a)(2) security. These securities have been determined to be illiquid and restricted under guidelines established by the Board of Trustees. The total market value of 144A or Section 4(a)(2) illiquid and restricted securities is \$202,267 (cost \$601,534), or less than 0.1% of total net assets — See Note 12.

Edgar Filing: Guggenheim Taxable Municipal Managed Duration Trust - Form N-CSRS

The effective rate shown is based on a weighted average of the underlying reference rates and spread amounts listed.

* Interest rate swap agreements are reported as unrealized gain/loss at period end.

Please refer to the Schedule of Investments for a breakdown of investment type by industry category.

The following is a summary of the significant unobservable input used in the fair valuation of assets and liabilities categorized within the Level 3 of the fair value hierarchy:

Category	Ending Balance at 11/30/2017	Valuation Technique	Unobservable Inputs	Input Range
Assets:				
Common Stocks	\$ 56,865	Enterprise Value	Valuation Multiple	8.9x-8.9x
Common Stocks	34,736	Enterprise Value	Valuation Multiple	7.8x-7.8x
Senior Floating Rate Interests	1,724,710	Model Price	Purchase Price	–
Senior Floating Rate Interests	493,750	Enterprise Value	Valuation Multiple	9.8x-9.8x
Total Assets	\$2,310,061			
Liabilities:				
Unfunded Loan Commitments	\$ 209,202	Model Price	Purchase Price	–

Significant changes in valuation multiples or liquidation values would generally result in significant changes in the fair value of the security.

Transfers between investment levels may occur as the markets fluctuate and/or the availability of data used in an investment's valuation changes. Transfers between valuation levels, if any, are in comparison to the valuation levels at the end of the previous fiscal year, and are effective using the fair value as of the end of the current fiscal period.

For the period ended November 30, 2017, there were no transfers between levels.

See notes to financial statements.

381 GBAB1 GUGGENHEIM TAXABLE MUNICIPAL MANAGED DURATION TRUST SEMIANNUAL
REPORT

FINANCIAL HIGHLIGHTS

continued

November 30, 2017

(a) Based on average shares outstanding.

Total investment return is calculated assuming an initial investment made at the net asset value at the beginning of

(b) the period, reinvestment of all dividends and distribution at net asset value during the period, and redemption on the last day of the period. Transaction fees are not reflected in the calculation of total investment return.

(c) Excluding interest expense, the operating expense ratios for the six months ended November 30, 2017 and the years ended May 31 would be:

November 30,

2017	2017	2016	2015	2014	2013
1.00%	1.00%	0.99%	1.02%	1.02%	1.02%

(d) Calculated by subtracting the Trust's total liabilities (not including the borrowings or reverse repurchase agreements) from the Trust's total assets and dividing by the borrowings.

As a result of the Trust having earmarked or segregated cash or liquid securities to collateralize the transactions or otherwise having covered the transactions, in accordance with releases and interpretive letters issued by the

(e) Securities and Exchange Commission (the "SEC"), the Trust does not treat its obligations under such transactions as senior securities representing indebtedness for purposes of the 1940 Act.

(f) Calculated by subtracting the Trust's total liabilities (not including the borrowings or reverse repurchase agreements) from the Trust's total assets and dividing by the borrowings and reverse repurchase agreements.

See notes to financial statements.

Note 1 – Organization:

Guggenheim Taxable Municipal Managed Duration Trust (the “Trust”) (formerly known as Guggenheim Build America Bonds Managed Duration Trust) was organized as a Delaware statutory trust on June 30, 2010. The Trust is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the “1940 Act”).

The Trust’s primary investment objective is to provide current income with a secondary objective of long-term capital appreciation. There can be no assurance that the Trust will achieve its investment objectives. The Trust’s investment objectives are considered fundamental and may not be changed without shareholder approval.

Note 2 – Accounting Policies:

The Trust operates as an investment company and, accordingly, follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification Topic 946 Financial Services – Investment Companies.

The following significant accounting policies are in conformity with U.S. generally accepted accounting principles (“U.S. GAAP”) and are consistently followed by the Trust. This requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. All time references are based on Eastern Time.

(a) Valuation of Investments

The Board of Trustees of the Trust (the “Board”) has adopted policies and procedures for the valuation of the Trust’s investments (the “Valuation Procedures”). Pursuant to the Valuation Procedures, the Board has delegated to a valuation committee, consisting of representatives from Guggenheim’s investment management, fund administration, legal and compliance departments (the “Valuation Committee”), the day-to-day responsibility for implementing the Valuation Procedures, including, under most circumstances, the responsibility for determining the fair value of the Trust’s securities and/or other assets.

Valuations of the Trust’s securities are supplied primarily by pricing services appointed pursuant to the processes set forth in the Valuation Procedures. The Valuation Committee convenes monthly, or more frequently as needed, to review the valuation of all assets which have been fair valued for reasonableness. The Trust’s officers, through the Valuation Committee and consistent with the monitoring and review responsibilities set forth in the Valuation Procedures, regularly review procedures used and valuations provided by the pricing services.

If the pricing service cannot or does not provide a valuation for a particular investment or such valuation is deemed unreliable, such investment is fair valued by the Valuation Committee.

Equity securities listed on an exchange (New York Stock Exchange (“NYSE”) or American Stock Exchange) are valued at the last quoted sale price as of the close of business on the NYSE, usually 4:00 p.m. Eastern time on the valuation date. Equity securities listed on the NASDAQ market system are valued at the NASDAQ Official Closing Price on the valuation date, which may not necessarily

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued November 30, 2017

represent the last sale price. If there has been no sale on such exchange or NASDAQ on a given day, the security is valued at the closing bid price on that day.

Open-end investment companies (“mutual funds”) are valued at their NAV as of the close of business on the valuation date. Exchange Traded Funds (“ETFs”) and closed-end investment companies are valued at the last quoted sales price. Debt securities with a maturity of greater than 60 days at acquisition are valued at prices that reflect broker-dealer supplied valuations or are obtained from independent pricing services, which may consider the trade activity, treasury spreads, yields or price of bonds of comparable quality, coupon, maturity, and type, as well as prices quoted by dealers who make markets in such securities. Short-term debt securities with a maturity of 60 days or less at acquisition are valued at amortized cost, provided such amount approximates market value. Money market funds are valued at net asset value.

Typically, loans are valued using information provided by an independent third party pricing service which uses broker quotes in a non-active market.

The value of interest rate swap agreements entered into by the Trust are accounted for using the unrealized gain or loss on the agreements that is determined using the spread priced off the previous day’s Chicago Mercantile Exchange (“CME”) price.

Generally, trading in foreign securities markets is substantially completed each day at various times prior to the close of the NYSE. The values of foreign securities are determined as of the close of such foreign markets or the close of the NYSE, if earlier. All investments quoted in foreign currencies are valued in U.S. dollars on the basis of the foreign currency exchange rates prevailing at the close of U.S. business at 4:00 p.m. Eastern time. Investments in foreign securities may involve risks not present in domestic investments. The Valuation Committee will determine the current value of such foreign securities by taking into consideration certain factors which may include those discussed above, as well as the following factors, among others: the value of the securities traded on other foreign markets, ADR trading, closed-end fund trading, foreign currency exchange activity, and the trading prices of financial products that are tied to foreign securities such as World Equity Benchmark Securities. In addition, under the Valuation Procedures, the Valuation Committee and Guggenheim Funds Investment Advisors, LLC (“GFIA”, or the “Adviser”) are authorized to use prices and other information supplied by a third party pricing vendor in valuing foreign securities.

Investments for which market quotations are not readily available are fair-valued as determined in good faith by GFIA, subject to review by the Valuation Committee, pursuant to methods established or ratified by the Board. Valuations in accordance with these methods are intended to reflect each security’s “fair value”. Each such determination is based on a consideration of all relevant factors, which are likely to vary from one pricing context to another. Examples of such factors may include, but are not limited to market prices; sale prices; broker quotes; and models which derive prices based on inputs such as prices of securities with comparable maturities and characteristics, or based on inputs such as anticipated cash flows or collateral, spread over Treasuries, and other information analysis.

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued November 30, 2017

(b) Investment Transactions and Investment Income

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on the identified cost basis. Paydown gains and losses on mortgage and asset-backed securities are treated as interest income. Dividend income is recorded net of applicable withholding taxes on the ex-dividend date and interest income is recorded on an accrual basis. Discounts or premiums on debt securities purchased are accreted or amortized to interest income over the lives of the respective securities using the effective interest method.

(c) When-Issued and Delayed Delivery Transactions

The Trust may engage in when-issued or delayed delivery transactions. The Trust records when-issued securities on the trade date and maintains security positions such that sufficient liquid assets will be available to make payment for the securities purchased. Securities purchased on a when-issued or delayed delivery basis are marked to market daily and begin earning interest on the settlement date. Losses may occur on these transactions due to changes in a market conditions or the failure of counterparties to perform under the contract.

(d) Distributions

The Trust declares and pays monthly distributions to common shareholders. These distributions will consist of investment company taxable income, which generally includes qualified dividend income, ordinary income and short-term capital gains. Any net realized long-term capital gains are distributed annually to common shareholders. To the extent distributions exceed taxable income, the excess will be deemed a return of capital.

Distributions to shareholders are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP.

(e) Swaps

A swap is an agreement to exchange the return generated by one instrument for the return generated by another instrument. The Trust may enter into swap agreements to manage its exposure to interest rates and/or credit risk, to generate income or to manage duration. Swaps are valued daily at current market value and the variation margin is included in the Statement of Assets and Liabilities. Gain or loss is realized on the termination date of the swap and is equal to the difference between the Trust's basis in the swap and the proceeds of the closing transaction, including any fees. Upon termination of a swap agreement, a payable to or receivable from swap counterparty is established on the Statement of Assets and Liabilities to reflect the net gain/loss, including interest income/expense, on terminated swap positions. The line item is removed upon settlement according to the terms of the swap agreement.

Realized gain (loss) upon termination of swap contracts is recorded on the Statement of Operations. Fluctuations in the value of swap contracts are recorded as a component of net change in unrealized appreciation (depreciation) of swap contracts. Net periodic payments received by the Trust are included as part of realized gain (loss) on the Statement of Operations.

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued November 30, 2017

(f) Currency Translation

The accounting records of the Trust are maintained in U.S. dollars. All assets and liabilities initially expressed in foreign currencies are converted into U.S. dollars at prevailing exchange rates. Purchases and sales of investment securities, dividend and interest income, and certain expenses are translated at the rates of exchange prevailing on the respective dates of such transactions.

The Trust does not isolate that portion of the results of operations resulting from changes in the foreign exchange rates on investments from the fluctuations arising from changes in the market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss on investments.

Foreign exchange realized gain or loss resulting from holding of a foreign currency, expiration of a currency exchange contract, difference in exchange rates between the trade date and settlement date of an investment purchased or sold, and the difference between dividends or interest actually received compared to the amount shown in the Trust's accounting records on the date of receipt is shown as net realized gains or losses on foreign currency transactions on the Trust's Statement of Operations.

Foreign exchange unrealized gain or loss on assets and liabilities, other than investments, is shown as unrealized appreciation (depreciation) on foreign currency translation on the Trust's Statement of Operations.

(g) Forward Foreign Currency Exchange Contracts

Forward foreign currency exchange contracts are agreements between two parties to buy and sell currencies at a set price on a future date. Fluctuations in the value of open forward foreign currency exchange contracts are recorded for financial reporting purposes as unrealized appreciation and depreciation by the Trust until the contracts are closed. When the contracts are closed, realized gains and losses are recorded, and included on the Statement of Operations in forward foreign currency transactions.

(h) Indemnifications

Under the Trust's organizational documents, its Trustees and Officers are indemnified against certain liabilities arising out of the performance of their duties to the Trust. In addition, throughout the normal course of business, the Trust enters into contracts that contain a variety of representations and warranties which provide general indemnifications. The Trust's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Trust and/or its affiliates that have not yet occurred. However, based on experience, the Trust expects the risk of loss to be remote.

Note 3 – Investment Advisory Agreement, Sub-Advisory Agreement and Other Agreements:

Pursuant to an Investment Advisory Agreement between the Trust and the Adviser, the Adviser furnishes offices, necessary facilities and equipment, provides administrative services, oversees the activities of Guggenheim Partners Investment Management, LLC ("GPIM" or "Sub-Adviser"), provides personnel including certain officers required for the Trust's administrative management and compensates the officers and trustees of the Trust who are affiliates of the Adviser. As compensation for these services, the Trust pays the Adviser a fee, payable monthly, in an amount

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued November 30, 2017

equal to 0.60% of the Trust's average daily managed assets (net assets applicable to common shareholders plus any assets attributable to financial leverage).

Pursuant to a Sub-Advisory Agreement among the Trust, the Adviser and GPIM, GPIM under the supervision of the Trust's Board of Trustees and the Adviser, provides a continuous investment program for the Trust's portfolio; provides investment research; makes and executes recommendations for the purchase and sale of securities; and provides certain facilities and personnel, including certain officers required for its administrative management and pays the compensation of all officers and trustees of the Trust who are GPIM's affiliates. As compensation for its services, the Adviser pays GPIM a fee, payable monthly, in an annual amount equal to 0.30% of the Trust's average daily managed assets.

For purposes of calculating the fees payable under the foregoing agreements, average daily managed assets means the average daily value of the Trust's total assets minus the sum of its accrued liabilities. Total assets means all of the Trust's assets and is not limited to its investment securities. Accrued liabilities means all of the Trust's liabilities other than borrowings for investment purposes.

Certain officers of the Trust may also be officers, directors and/or employees of the Adviser or GPIM. The Trust does not compensate its officers who are officers, directors and/or employees of the aforementioned firms.

MUFG Investor Services (US), LLC ("MUIS") acts as the Trust's administrator and accounting agent. As administrator and accounting agent, MUIS is responsible for maintaining the books and records of the Trust's securities and cash.

The Bank of New York ("BNY") acts as the Trust's custodian. As custodian, BNY is responsible for the custody of the Trust's assets. For providing the aforementioned services, MUIS and BNY are entitled to receive a monthly fee equal to an annual percentage of the Trust's average daily managed assets subject to certain minimum monthly fees and out of pocket expenses.

Note 4 – Fair Value Measurement:

In accordance with U.S. GAAP, fair value is defined as the price that the Trust would receive to sell an investment or pay to transfer a liability in an orderly transaction with an independent buyer in the principal market, or in the absence of a principal market, the most advantageous market for the investment or liability. U.S. GAAP establishes a three-tier fair value hierarchy based on the types of inputs used to value assets and liabilities and requires corresponding disclosure. The hierarchy and the corresponding inputs are summarized below:

Level 1 — quoted prices in active markets for identical assets or liabilities.

Level 2 — significant other observable inputs (for example quoted prices for securities that are similar based on characteristics such as interest rates, prepayment speeds, credit risk, etc.).

Level 3 — significant unobservable inputs based on the best information available under the circumstances, to the extent observable inputs are not available, which may include assumptions.

The types of inputs available depend on a variety of factors, such as the type of security and the characteristics of the markets in which it trades, if any. Fair valuation determinations that rely on fewer or no observable inputs require greater judgment. Accordingly, fair value determinations for Level 3 securities require the greatest amount of judgment.

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued November 30, 2017

Independent pricing services are used to value a majority of the Trust's investments. When values are not available from a pricing service, they may be computed by the Trust's investment adviser or an affiliate. In any event, values may be determined using a variety of sources and techniques, including: market prices; broker quotes; and models which derive prices based on inputs such as prices of securities with comparable maturities and characteristics or based on inputs such as anticipated cash flows or collateral, spread over Treasuries, and other information and analysis. A significant portion of the Trust's assets and liabilities are categorized as Level 2 or Level 3, as indicated in this report.

Indicative quotes from broker-dealers, adjusted for fluctuations in criteria such as credit spreads and interest rates, may be also used to value the Trust's assets and liabilities, i.e. prices provided by a broker-dealer or other market participant who has not committed to trade at that price. Although indicative quotes are typically received from established market participants, the Trust may not have the transparency to view the underlying inputs which support the market quotations. Significant changes in an indicative quote would generally result in significant changes in the fair value of the security.

Certain fixed income securities are valued by obtaining a monthly indicative quote from a broker-dealer, adjusted for fluctuations in criteria such as credit spreads and interest rates.

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The suitability of the techniques and sources employed to determine fair valuation are regularly monitored and subject to change.

Note 5 – Federal Income Tax Information:

The Trust intends to continue to comply with the requirements of Subchapter M of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies.

The Trust is subject to an excise tax of 4% of the amount by which 98% of the Trust's annual taxable income and 98.2% of net realized gains exceed the distributions from such taxable income and realized gains for the calendar year. As of November 30, 2017, the cost of investments and accumulated unrealized appreciation/depreciation on investments for federal income tax purposes were as follows:

	Gross Tax	Gross Tax	Net Tax
Tax Cost	Unrealized Gain	Unrealized Loss	Unrealized Gain
\$435,404,639	\$71,000,704	\$(1,208,391)	\$69,792,313

The difference between book basis and tax basis unrealized appreciation (depreciation) is primarily attributable to the tax deferral of losses on wash sales, non-real estate investment trust return of capital and collateralized loan obligations.

As of May 31, 2017, (the most recent fiscal year end for federal income tax purposes) tax components of accumulated earnings (excluding paid-in capital) were as follows:

Undistributed	Accumulated	Unrealized
Ordinary Income	Long-Term Gains	Appreciation
\$2,669,212	\$2,732,582	\$69,323,252

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued November 30, 2017

For the year ended May 31, 2017, (the most recent fiscal year end for federal income tax purposes) the tax character of distributions paid to shareholders as reflected in the Statement of Changes in Net Assets was as follows:

Distributions paid from:	2017
Ordinary Income	\$26,927,004
Long-Term Capital Gain	–
	\$26,927,004

Note: For federal income tax purposes, short-term capital gain distributions are treated as ordinary income distributions.

For all open tax years and all major jurisdictions, management of the Trust has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Uncertain tax positions are tax positions taken or expected to be taken in the course of preparing the Trust’s tax returns that would not meet a more—likely—than not threshold of being sustained by the applicable tax authority and would be recorded as a tax expense in the current year. Open tax years are those that are open for examination by taxing authorities (i.e. generally the last four tax year ends and the interim tax period since then).

Note 6 – Investments in Securities:

For the period ended November 30, 2017, the cost of purchases and proceeds from sales of investment securities, excluding government securities, short-term investments and in-kind transactions, were \$14,195,015 and \$13,629,708 respectively.

The Trust is permitted to purchase or sell securities from or to certain affiliated funds under specified conditions outlined in procedures adopted by the Board. The procedures have been designed to ensure that any purchase or sale of securities by the Trust from or to another fund or portfolio that is or could be considered an affiliate by virtue of having a common investment adviser (or affiliated investment advisers), common Trustees and/or common officers complies with Rule 17a-7 of the 1940 Act. Further, as defined under these procedures, each transaction is effected at the current market price to save costs, where permissible. For the period November 30, 2017, the Trust did engage in purchases and sales of securities, pursuant to Rule 17a-7 of the 1940 Act, as follows:

Purchases	Sales	Realized Gain
\$ –	\$3,743,176	\$145,672

Note 7 – Derivatives:

As part of its investment strategy, the Trust utilizes derivative instruments. These investments involve, to varying degrees, elements of market risk and risks in excess of the amounts recognized in the Statement of Assets and Liabilities. Valuation and accounting treatment of these instruments can be found under Accounting Policies in Note 2 of these Notes to Financial Statements.

Derivatives are instruments whose values depend on, or are derived from, in whole or in part, the value of one or more other assets, such as securities, currencies, commodities or indices. Derivative instruments may be used to increase investment flexibility (including to maintain cash reserves while maintaining exposure to certain other assets), for risk management (hedging) purposes, to

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued November 30, 2017

facilitate trading, to reduce transaction costs and to pursue higher investment returns. Derivative instruments may also be used to mitigate certain investment risks, such as foreign currency exchange rate risk, interest rate risk and credit risk. U.S. GAAP requires disclosures to enable investors to better understand how and why a Trust uses derivative instruments, how these derivative instruments are accounted for and their effects on the Trust's financial position and results of operations.

The Trust may utilize derivatives for the following purposes:

Duration: the use of an instrument to manage the interest rate risk of a portfolio.

Hedge: an investment made in order to reduce the risk of adverse price movements in a security, by taking an offsetting position to protect against broad market moves.

(a) Swaps

A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. A Trust utilizing OTC swaps bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty or if the underlying asset declines in value.

Certain standardized swaps are subject to mandatory central clearing and are executed on a multilateral or other trade facility platform, such as a registered exchange. There is limited counterparty credit risk with respect to centrally-cleared swaps as the transaction is facilitated through a central clearinghouse, much like an exchange-traded futures contract. Upon entering into a centrally-cleared swap transaction, the Trust is required to deposit with its clearing broker an amount of cash or securities as an initial margin. Subsequent variation margin payments or receipts are made or received by the Trust, depending on fluctuations in the fair value of the reference entity. For Trusts utilizing interest rate swaps, the exchange bears the risk of loss.

Interest rate swaps involve the exchange by the Trust with another party for its respective commitment to pay or receive a fixed or variable interest rate on a notional amount of principal. Interest rate swaps are generally centrally-cleared, but central clearing does not make interest rate swap transactions risk free.

The following table represents the Trust's use and volume of interest rate swaps on a quarterly basis:

Use	Average	
	Notional	
	Long	Short
Duration, Hedge	\$ –	\$82,000,000

Derivative Investment Holdings Categorized by Risk Exposure

The following is a summary of the location of derivative investments on the Trust's Statement of Assets and Liabilities as of November 30, 2017:

Derivative Investment Type	Asset Derivatives
Interest Rate Contracts	Variation margin on swap agreements

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued November 30, 2017

The following table sets forth the fair value of the Trust's derivative investments categorized by primary risk exposure at November 30, 2017:

Asset Derivative Investments Value	
Swaps Interest	Total Value at
Rate Risk	November 30, 2017
\$ 535,564*	\$ 535,564

* Includes cumulative appreciation (depreciation) on swap agreements as reported on the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.

The following is a summary of the location of derivative investments on the Trust's Statement of Operations for the period ended November 30, 2017:

Derivative Investment Type	Location of Gain (Loss) on Derivatives
Interest Rate Contracts	Net realized gain (loss) on swap agreements
	Net change in unrealized appreciation (depreciation) on swap agreements

The following is a summary of the Trust's realized gain (loss) and change in unrealized appreciation (depreciation) on derivative investments recognized on the Statement of Operations categorized by primary risk exposure for the period ended November 30, 2017:

Realized Gain (Loss) on Derivative Investments		
Recognized on the Statement of Operations		
	Swaps Interest	
Primary Risk Exposure	Rate Contracts	Total
Interest Rate Risk	\$ (159,020)	\$ (159,020)
Net Change in Unrealized		
Appreciation(Depreciation) on Derivative		
Investments		
Recognized on the Statement of Operations		
	Swaps Interest	
Primary Risk Exposure	Rate Contracts	Total
Interest Rate Risk	\$ 620,249	\$ 620,249

In conjunction with the use of derivative instruments, the Trust is required to maintain collateral in various forms. The Trust uses, where appropriate, depending on the financial instrument utilized and the broker involved, margin deposits at the broker, cash and/or securities segregated at the custodian bank, discount notes or the repurchase agreements allocated to the Trust.

The Trust has established counterparty credit guidelines and enters into transactions only with financial institutions of investment grade or better. The Trust monitors the counterparty credit risk.

Note 8 –Offsetting

In the normal course of business, the Trust enters into transactions subject to enforceable master netting arrangements or other similar arrangements. Generally, the right to offset in those agreements allows the Trust to counteract the exposure to a specific counterparty with collateral received or delivered to that counterparty based on the terms of the arrangements. These arrangements provide for the right to liquidate upon the occurrence of an event of default, credit event upon merger or additional termination event.

In order to better define their contractual rights and to secure rights that will help the Trust mitigate their counterparty risk, the Trust may enter into an International Swaps and Derivatives Association,

481 GBAB1 GUGGENHEIM TAXABLE MUNICIPAL MANAGED DURATION TRUST SEMIANNUAL
REPORT

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued November 30, 2017

Inc. Master Agreement (“ISDA Master Agreement”) or similar agreement with their derivative contract counterparties. An ISDA Master Agreement is a bilateral agreement between a Trust and a counterparty that governs OTC derivatives, including foreign exchange contracts, and typically contains, among other things, collateral posting terms and netting provisions in the event of a default and/or termination event. The provisions of the ISDA Master Agreement typically permit a single net payment in the event of a default (close-out netting) or similar event, including the bankruptcy or insolvency of the counterparty.

For derivatives traded under an ISDA Master Agreement, the collateral requirements are typically calculated by netting the mark to market amount for each transaction under such agreement and comparing that amount to the value of any collateral currently pledged by the Trust and the counterparty. For financial reporting purposes, cash collateral that has been pledged to cover obligations of the Trust and cash collateral received from the counterparty, if any, is reported separately on the Statement of Assets and Liabilities as segregated cash with broker/ receivable for variation margin, or payable for swap settlement/variation margin. Generally, the amount of collateral due from or to a counterparty must exceed a minimum transfer amount threshold (e.g., \$300,000) before a transfer is required to be made. To the extent amounts due to the Trust from its counterparties are not fully collateralized, contractually or otherwise, the Trust bears the risk of loss from counterparty nonperformance. The Trust attempts to mitigate counterparty risk by only entering into agreements with counterparties that it believes to be of good standing and by monitoring the financial stability of those counterparties. For financial reporting purposes, the Trust does not offset derivative assets and derivative liabilities that are subject to netting arrangements in the Statement of Assets and Liabilities.

The following table presents derivative financial instruments and secured financing transactions that are subject to enforceable netting arrangements and offset in the Statement of Assets and Liabilities in conformity with U.S. GAAP.

Investment Type	Gross Amounts of Recognized Liabilities ¹	Gross Amounts Offset in the Statement of Assets & Liabilities	Net Amounts of		Net Amount
			Liabilities Presented in the Statement of Assets & Liabilities	Gross Amounts Not Offset in the Statement of Assets & Liabilities	
Reverse Repurchase Agreements	\$59,660,979	\$ –	\$59,660,979	\$(59,660,979)	\$ –

¹ Centrally cleared swaps are excluded from these reported amounts.

The following table presents deposits held by others in connection with derivative investments as of November 30, 2017. The Trust has the right to offset these deposits against any related liabilities outstanding with each counterparty.

Counterparty	Asset Type	Cash Pledged
Bank of America Merrill Lynch	Interest Rate Swaps	\$844,296
Total		\$844,296

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued November 30, 2017

Note 9 – Capital:

Common Shares

The Trust has an unlimited amount of common shares, \$0.01 par value, authorized and 17,416,307 issued and outstanding. Transactions in common shares were as follows:

	Period Ended November 30, 2017	Year Ended May 31, 2017
Beginning Shares	17,416,307	17,416,307
Shares issued through dividend reinvestment	–	–
Ending Shares	17,416,307	17,416,307

Note 10 – Leverage:

Reverse Repurchase Agreements

The Trust may enter into reverse repurchase agreements as part of its financial leverage strategy. Under a reverse repurchase agreement, the Trust temporarily transfers possession of a portfolio instrument to another party, such as a bank or broker—dealer, in return for cash. At the same time, the Trust agrees to repurchase the instrument at an agreed upon time and price, which reflects an interest payment. Such agreements have the economic effect of borrowings. The Trust may enter into such agreements when it is able to invest the cash acquired at a rate higher than the cost of the agreement, which would increase earned income. When the Trust enters into a reverse repurchase agreement, any fluctuations in the market value of either the instruments transferred to another party or the instruments in which the proceeds may be invested would affect the market value of the Trust's assets. As a result, such transactions may increase fluctuations in the market value of the Trust's assets. For the period ended November 30, 2017, the average daily balance for which reverse repurchase agreements were outstanding amounted to \$64,072,626. The weighted average interest rate was 1.82%.

As of November 30, 2017, there was \$59,657,842 in reverse repurchase agreements outstanding, exclusive of accrued interest. As of November 30, 2017, the Trust had outstanding reverse repurchase agreements with various counterparties. Details of the reverse repurchase agreements by counterparty are as follows:

Counterparty	Range of Interest Rates	Maturity Dates	Face Value
Royal Bank of Canada	2.03%	02/28/18	\$36,291,100
BNP Paribas Bank	1.36% - 1.87%*	Open Maturity	23,366,742
			\$59,657,842

* Variable rate security. Rate indicated is the rate effective at November 30, 2017.

The following is a summary of the remaining contractual maturities of the reverse repurchase agreements outstanding as of November 30, 2017 aggregated by asset class of the related collateral pledged by the Trust:

	Overnight and Continuous	Up to 30 days	31 - 90 days	Greater than 90 days	Total
Municipal Bonds	\$23,366,742	\$ –	\$36,291,100	\$ –	\$59,657,842
Total Borrowings	\$23,366,742	\$ –	\$36,291,100	\$ –	\$59,657,842
Gross amount of recognized liabilities for reverse repurchase agreements	\$23,366,742	\$ –	\$36,291,100	\$ –	\$59,657,842

501 GBAB 1 GUGGENHEIM TAXABLE MUNICIPAL MANAGED DURATION TRUST SEMIANNUAL
REPORT

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued November 30, 2017

Borrowings

On February 27, 2015, the Trust entered into a \$125,000,000 credit facility agreement with an approved lender. Under the credit facility, the interest rate on the amount borrowed is based on the 3 month LIBOR plus 85 basis points, and an unused commitment fee of 25 basis points is charged on the difference between the amount available to borrow under the credit agreement and the actual amount borrowed, if the Trust borrows less than 50% available. As of November 30, 2017, there was \$46,509,544 outstanding in connection with the Trust's credit facility. The average daily amount of borrowings on the credit facilities during the period was \$48,946,702 with a related average interest rate of 2.21%. The maximum amount outstanding during the period ended was \$49,509,544. As of November 30, 2017, the total value of securities segregated and pledged as collateral in connection with borrowings was \$79,806,045. The Trust's current credit facility agreement includes usual and customary covenants. These covenants impose on the Trust asset coverage requirements, collateral requirements, investment strategy requirements, and certain financial obligations. These covenants place limits or restrictions on the Trust's ability to (i) enter into additional indebtedness with a party other than the counterparty, (ii) change its fundamental investment policy, or (iii) pledge to any other party, other than to the counterparty, securities owned or held by the Trust over which the counterparty has a lien. In addition, the Trust is required to deliver financial information to the counterparty within established deadlines, maintain an asset coverage ratio (as defined in Section 18(g) of the 1940 Act) greater than 300%, comply with the rules of the stock exchange on which its shares are listed, and maintain its classification as a "closed-end management investment company" as defined in the 1940 Act.

There is no guarantee that the Trust's leverage strategy will be successful. The Trust's use of leverage may cause the Trust's NAV and market price of common shares to be more volatile and can magnify the effect of any losses.

Note 11 – Loan Commitments:

Pursuant to the terms of certain loan agreements, the Trust held unfunded loan commitments as of November 30, 2017. The Trust is obligated to fund these loan commitments at the borrower's discretion. The Trust reserves against such contingent obligations by designating cash, liquid securities, and liquid term loans as a reserve. As of November 30, 2017, the total amount segregated in connection with reverse repurchase agreements and unfunded loan commitments was \$180,907,516.

As of November 30, 2017, the Trust had the following unfunded loan commitments which could be extended at the option of the borrower:

Borrower	Maturity Date	Face Amount	Value
Itron, Inc.	03/17/18	\$ 450,000	\$ –
Lytix, Inc.	08/31/22	26,316	3,125
Solera LLC	03/03/21	2,250,000	206,077
		\$ 2,726,316	\$ 209,202

NOTES TO FINANCIAL STATEMENTS (Unaudited) continued November 30, 2017

Note 12 – Restricted Securities:

The securities below are considered illiquid and restricted under guidelines established by the Board:

Restricted Securities	Acquisition Date	Cost	Value
Highland Park CDO I Ltd. 2006-1A, 1.86% (3 Month USD LIBOR + 40 bps) due 11/25/51	06/08/17	\$ 84,980	\$ 111,057
Schahin II Finance Co. SPV Ltd. 5.88% due 09/25/22	01/18/14	516,554	91,210
		\$ 601,534	\$ 202,267

Note 13 – Subsequent Event:

The Trust evaluated subsequent events through the date the financial statements were available for issue and determined there were no additional material events that would require adjustment to or disclosure in the Trust's financial statements.

** Each officer serves an indefinite term, until his or her successor is duly elected and qualified. The date reflects the commencement date upon which the officer held any officer position with the Trust.

DIVIDEND REINVESTMENT PLAN (Unaudited) November 30, 2017

Unless the registered owner of common shares elects to receive cash by contacting Computershare Trust Company, N.A. (the "Plan Administrator"), all dividends declared on common shares of the Trust will be automatically reinvested by the Plan Administrator for shareholders in the Trust's Dividend Reinvestment Plan (the "Plan"), in additional common shares of the Trust. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by notice if received and processed by the Plan Administrator prior to the dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Some brokers may automatically elect to receive cash on your behalf and may re-invest that cash in additional common shares of the Trust for you. If you wish for all dividends declared on your common shares of the Trust to be automatically reinvested pursuant to the Plan, please contact your broker.

The Plan Administrator will open an account for each common shareholder under the Plan in the same name in which such common shareholder's common shares are registered. Whenever the Trust declares a dividend or other distribution (together, a "Dividend") payable in cash, nonparticipants in the Plan will receive cash and participants in the Plan will receive the equivalent in common shares. The common shares will be acquired by the Plan Administrator for the participants' accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Trust ("Newly Issued Common Shares") or (ii) by purchase of outstanding common shares on the open market ("Open-Market Purchases") on the New York Stock Exchange or elsewhere. If, on the payment date for any Dividend, the closing market price plus estimated brokerage commission per common share is equal to or greater than the net asset value per common share, the Plan Administrator will invest the Dividend amount in Newly Issued Common Shares on behalf of the participants. The number of Newly Issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the Dividend by the net asset value per common share on the payment date; provided that, if the net asset value is less than or equal to 95% of the closing market value on the payment date, the dollar amount of the Dividend will be divided by 95% of the closing market price per common share on the payment date. If, on the payment date for any Dividend, the net asset value per common share is greater than the closing market value plus estimated brokerage commission, the Plan Administrator will invest the Dividend amount in common shares acquired on behalf of the participants in Open-Market Purchases.

If, before the Plan Administrator has completed its Open-Market Purchases, the market price per common share exceeds the net asset value per common share, the average per common share purchase price paid by the Plan Administrator may exceed the net asset value of the common shares, resulting in the acquisition of fewer common shares than if the Dividend had been paid in Newly Issued Common Shares on the Dividend payment date. Because of the foregoing difficulty with respect to Open-Market Purchases, the Plan provides that if the Plan Administrator is unable to invest the full Dividend amount in Open-Market Purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Administrator may cease making Open-Market Purchases and may invest the uninvested portion of the Dividend amount in Newly Issued Common Shares at net asset value per common share at the close of business on the Last Purchase Date provided that, if the net asset value is less than or equal to 95% of the then current market price per common share; the dollar amount of the Dividend will be divided by 95% of the market price on the payment date.

DIVIDEND REINVESTMENT PLAN (Unaudited) continued November 30, 2017

The Plan Administrator maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common shares in the account of each Plan participant will be held by the Plan Administrator on behalf of the Plan participant, and each shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Administrator will forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance with the instruction of the participants.

There will be no brokerage charges with respect to common shares issued directly by the Trust. However, each participant will pay a pro rata share of brokerage commission incurred in connection with Open-Market Purchases. The automatic reinvestment of Dividends will not relieve participants of any Federal, state or local income tax that may be payable (or required to be withheld) on such Dividends.

The Trust reserves the right to amend or terminate the Plan. There is no direct service charge to participants with regard to purchases in the Plan; however, the Trust reserves the right to amend the Plan to include a service charge payable by the participants.

All correspondence or questions concerning the Plan should be directed to the Plan Administrator, Computershare Trust Company, N.A., P.O. Box 30170 College Station, TX 77842-3170: Attention: Shareholder Services Department, Phone Number: (866) 488-3559 or online at www.computershare.com/investor.

TRUST INFORMATION continued November 30, 2017

Privacy Principles of Guggenheim Taxable Municipal Managed Duration Trust for Shareholders

The Trust is committed to maintaining the privacy of its shareholders and to safeguarding its non-public personal information. The following information is provided to help you understand what personal information the Trust collects, how we protect that information and why, in certain cases, we may share information with select other parties.

Generally, the Trust does not receive any non-public personal information relating to its shareholders, although certain non-public personal information of its shareholders may become available to the Trust. The Trust does not disclose any non-public personal information about its shareholders or former shareholders to anyone except as permitted by law or as is necessary in order to service shareholder accounts (for example, to a transfer agent or third party administrator).

The Trust restricts access to non-public personal information about the shareholders to Guggenheim Funds Investment Advisors, LLC employees with a legitimate business need for the information. The Trust maintains physical, electronic and procedural safeguards designed to protect the non-public personal information of its shareholders.

Questions concerning your shares of Guggenheim Taxable Municipal Managed Duration Trust?

· If your shares are held in a Brokerage Account, contact your Broker.

If you have physical possession of your shares in certificate form, contact the Trust's Transfer Agent:

· Computershare Trust Company, N.A., P.O. Box 30170 College Station, TX 77842-3170; (866) 488-3559 or online at www.computershare.com/investor

This report is sent to shareholders of Guggenheim Taxable Municipal Managed Duration Trust for their information. It is not a Prospectus, circular or representation intended for use in the purchase or sale of shares of the Trust or of any securities mentioned in this report.

A description of the Trust's proxy voting policies and procedures related to portfolio securities is available without charge, upon request, by calling the Trust at (866) 392-3004.

Information regarding how the Trust voted proxies for portfolio securities, if applicable, during the most recent 12-month period ended June 30, is also available, without charge and upon request by calling (866) 392-3004, by visiting the Trust's website at guggenheiminvestments.com/gbab or by accessing the Trust's Form N-PX on the U.S. Securities and Exchange Commission's (SEC) website at www.sec.gov.

The Trust files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Trust's Form N-Q is available on the SEC website at www.sec.gov or at guggenheiminvestments.com/gbab. The Trust's Form N-Q may also be viewed and copied at the SEC's Public Reference Room in Washington, DC; information on the operation of the Public Reference Room may be obtained by calling (800) SEC-0330.

Notice to Shareholders

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940, as amended, that the Trust from time to time may purchase shares of its common stock in the open market or in private transactions.

ABOUT THE FUND MANAGERS

Guggenheim Partners Investment Management, LLC

Guggenheim Partners Investment Management, LLC (“GPIM”) is an indirect subsidiary of Guggenheim Partners, LLC, a diversified financial services firm. The firm provides capital markets services, portfolio and risk management expertise, wealth management, and investment advisory services. Clients of Guggenheim Partners, LLC subsidiaries are an elite mix of individuals, family offices, endowments, foundations, insurance companies and other institutions.

Investment Philosophy

GPIM’s investment philosophy is predicated upon the belief that thorough research and independent thought are rewarded with performance that has the potential to outperform benchmark indexes with both lower volatility and lower correlation of returns over time as compared to such benchmark indexes.

Investment Process

GPIM’s investment process is a collaborative effort between various groups including the Portfolio Construction Group, which utilize proprietary portfolio construction and risk modeling tools to determine allocation of assets among a variety of sectors, and its Sector Specialists, who are responsible for security selection within these sectors and for implementing securities transactions, including the structuring of certain securities directly with the issuers or with investment banks and dealers involved in the origination of such securities.
