Table of Contents

VISX, INCORPORATED AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
September 30, 2002
(Unaudited)

1. Basis of Presentation:

We prepared our Condensed Consolidated Interim Financial Statements in conformity with Securities and Exchange Commission rules and regulations. Accordingly, we condensed or omitted certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles. Please read our 2001 Annual Report on Form 10-K to gain a more complete understanding of these interim financial statements.

We included in these interim financial statements all adjustments (consisting primarily only of normal recurring adjustments) necessary to present fairly our results for the interim period. Our interim financial statements have not been audited.

2. Earnings Per Share:

Basic earnings per share (EPS) equals net income (loss) divided by the weighted average number of common shares outstanding. Diluted EPS equals net income (loss) divided by the weighted average number of common shares outstanding plus dilutive potential common shares calculated in accordance with the treasury stock method. The calculation of diluted net loss per share excludes potential common shares if the effect is antidilutive. All amounts in the following table are in thousands, except per share data.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2002	2001	2002	2001
NET INCOME	\$4,469	\$4,760	\$16,888	\$6,678

options
421 1,386 809 1,610

Weighted average common shares and dilutive
potential common shares
52,904 57,141 53,954 58,867

Diluted Earnings Per Share
\$0.08 \$0.08 \$0.31 \$0.11

Edgar Filing: VISX INC - Form 10-Q

At September 30, 2002 and 2001, options for the purchase of 6,356,000 and 4,024,000 shares respectively, were exercisable at weighted average purchase price per share of \$12.77 and \$17.14, and were excluded from the computation of diluted EPS because exercise prices for these options were greater than the average market price of VISX's common stock during these periods and their effect is antidilutive.

5. Share Repurchase Program

On April 4, 2001, our Board of Directors authorized a new Stock Repurchase Program under which up to 10 million shares of VISX common stock may be repurchased. In accordance with the April 4, 2001 authorization and applicable securities laws, through purchases on the open market we repurchased 3,541,700 shares during the first nine months of 2002 and have repurchased 6,644,100 shares cumulatively through September 30, 2002 at a total cost of \$39.1 million and \$86.8 million, respectively. Accordingly, 3.4 million shares remain available as of September 30, 2002 for repurchase under the Board of Directors' April 2001 authorization.

6. Significant Customer and Commitments

In May 2002, Laser Vision Centers, Inc. and TLC Laser Eye Centers, Inc., both customers of ours, announced their business combination was consummated and became effective. The entity's new name is TLC Vision Corporation ("TLC"). The combined company, TLC, accounted for 12% and 19% of total revenues in the third quarter of 2002 and 2001, respectively, and 15% and 17% of total revenues in the first nine months of 2002 and 2001, respectively.

In May 2002, VISX announced that it signed a Letter of Intent with Tracey Technologies, LLC ("Tracey") for exclusive worldwide rights to Tracey's ray tracing technology for use in customized laser vision correction treatments. Additionally, VISX announced that it entered into an exclusive worldwide license agreement for a portfolio of patents held by Luis Ruiz, MD, relating to the treatment of presbyopia with multifocal ablations. During the second quarter of fiscal 2002, VISX made payments of \$650,000 related to these agreements, of which \$150,000 was expensed in connection with research and

Table of Contents

development activities and the balance was capitalized as a prepaid asset. No additional payments were made during the third quarter of 2002. If a final agreement is concluded with Tracey and clinical and regulatory milestones specified in both agreements are achieved, VISX would be committed to make additional payments in the range of \$3 to \$7 million in connection with these two agreements. VISX could be obligated for additional payments for royalties in the future based on any future sales of the associated product.

7. Related Party Transactions

In August 2001, we signed a one-year research and development agreement with Medjet Inc. (Medjet) under which we provided funding to Medjet to pursue new ophthalmic technologies and products. In addition, we signed a merger agreement with Medjet that provided us with a one-year option, for which we paid \$0.5 million, to acquire all outstanding Medjet common stock in a merger transaction for \$2.00 per share in cash. During the third quarter of fiscal 2002, our agreements with Medjet was amended to provide us with up to an additional eleven months to acquire all outstanding Medjet common stock in a merger transaction for \$2.00 per share in cash. The closing of the potential merger was subject to Medjet's stockholder approval and is subject to other customary conditions to closing. In August 2001, we also paid \$1.3 million to purchase from a third party all outstanding shares of Medjet's Series B Convertible Preferred Stock, which are entitled to votes equivalent to 1,040,000 shares of Medjet common stock and vote together with Medjet's common stock. These shares owned by VISX represent 21% of Medjet's voting stock. In connection with these agreements, we also entered into a voting agreement with Dr. Eugene Gordon, founder of Medjet, under which Dr. Gordon agreed to vote all of his shares of common stock in favor of the merger, and agreed to sell all of his stock to VISX in the event that VISX offers to complete the merger. Dr. Gordon currently holds shares representing approximately 32% of Medjet's voting stock. Additionally, VISX acquired warrants from Medjet to purchase 1,320,000 shares of Medjet common stock exercisable at \$0.75 per share. VISX also acquired warrants from a third party to purchase 1,365,000 shares of Medjet common stock exercisable at \$3.50 per share. The warrants expire during the second half of 2004. Under Statement of Financial Accounting Standards No. 133, Accounting for Derivative Instruments and Hedging Activities, the warrants are treated as derivatives and measured at fair value. At each balance sheet date, the warrants are remeasured at fair value and all gains and losses are recorded in the statements of operations. We account for this investment under the equity method prescribed by Accounting Principles Board No. 18, The Equity Method of Accounting for Investments in Common Stock.

Under our R&D agreement with Medjet, we paid approximately \$2.0 million to Medjet to fund research and development work they performed during the first nine months of 2002. We expense payments made to Medjet as research, development and regulatory expense in our financial statements. To exercise our option to acquire Medjet, we would have to pay approximately \$9 million based on the \$2.00 per share purchase price and the number of shares of Medjet common stock, options and warrants outstanding at September 30, 2002.

In November 2002, VISX terminated its merger and research and development agreements with Medjet. In accordance with these agreements, VISX will pay termination fees of \$250,000 in the fourth quarter. As of September 30, 2002, the remaining net book value of the investment in Medjet was approximately \$1.5 million. At this time we do not believe we have an impairment loss, however, we are required under generally accepted accounting principles to review our investment for losses that are other than temporary. We will continue to monitor our investments in Medjet which may result in a charge to earnings in the future for some or all of the \$1.5 million.

Table of Contents

8. New Accounting Pronouncements

On June 29, 2001, the Financial Accounting Standard Board (FASB) approved for issuance Statement of Financial Accounting Standards No. 141, Business Combinations (SFAS 141), and Statement of Financial Accounting Standards No. 142, Goodwill and Intangible Assets (SFAS 142). Major provisions of these statements are as follows:

- (i) All business combinations initiated after June 30, 2001 must use the purchase method of accounting;
- (ii) The pooling of interests method of accounting is prohibited except for transactions initiated before July 1, 2001;
- (iii) Intangible assets acquired in a business combination must be recorded separately from goodwill if they arise from contractual or other legal rights or are separable from the acquired entity and can be sold, transferred, licensed, rented or exchanged, either individually or as part of a related contract, asset or liability;
- (iv) Goodwill and intangible assets with indefinite lives are not amortized but are tested for impairment annually using a fair value approach, except in certain circumstances, and whenever there is an impairment indicator;
- (v) Other intangible assets will continue to be valued and amortized over their estimated lives;
- (vi) In-process research and development will continue to be written off immediately;
- (vii) All acquired goodwill must be assigned to reporting units for purposes of impairment testing and segment reporting;
- (viii) Effective January 1, 2002, existing goodwill will no longer be subject to amortization.

Goodwill arising between June 29, 2001 and December 31, 2001 will not be subject to amortization. Upon adoption of SFAS 142, on January 1, 2002, we no longer are required to amortize goodwill. Adoption of these statements did not have any impact on our financial statements or results of operations as we do not have any goodwill recorded as of the adoption date.

In July 2001, the FASB Emerging Issues Task Force (EITF) reached final consensus on EITF No. 00-25, Vendor Income Statement Characterization of Consideration Paid to a Reseller of the Vendor's Products (EITF 00-25). EITF 00-25 generally requires that consideration, including equity instruments, given to a customer be classified in a vendor's financial statements not as an expense, but as a reduction to revenue up to the amount of cumulative revenue recognized or to be recognized. In November 2001, the EITF reached consensus on EITF No. 01-09,

Accounting for Consideration Given by a Vendor to a Customer or Reseller of the Vendor's Products (EITF 01-09). EITF 01-09 clarifies and modifies certain items discussed in EITF 00-25. We adopted these new standards on January 1, 2002. In accordance with the transition guidance in EITF 00-25, adoption required the reclassification of financial statements for prior periods presented for comparative purposes.

In accordance with EITF 00-25 and EITF 01-09, we have reclassified consideration provided to customers in our statements of operations. This consideration was previously reported as selling, general, and administrative expense. This consideration is now reported as a reduction to license, service and other revenue. The amounts reclassified for the first, second, third and fourth quarters of 2001 are

Table of Contents

\$1,111,000, \$1,121,000, \$1,508,000 and \$810,000, respectively. These reclassifications do not change the amount of net income reported for each period, however revenue and expense are reduced in equal and offsetting amounts in each period. Accordingly, the reclassification of the consideration previously reported as selling, general, and administrative expense reduces our gross profit ratio. Based upon this reclassification, our gross profit ratio decreased to 61% from the previously reported 62% for the three months ended September 30, 2001 and decreased to 65% from the previously reported 66% for the nine months ended September 30, 2001.

In August 2001, the FASB issued Statement of Financial Accounting Standards No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* (SFAS 144). An impairment loss must be recognized if the net book value of long-lived assets exceeds:

- (i) The future cash flows to be generated by these assets, whether through continued operation or sale,
- (ii) The fair value of assets to be distributed to owners in a spin-off, or
- (iii) The fair value of productive assets for which they are exchanged.

This statement applies to long-term leases, certain oil and gas properties, and long-term prepaid assets. It does not apply to goodwill, intangible assets not being amortized, investments in equity securities accounted for under the cost or equity method, and certain other types of long-term assets. The provisions of SFAS 144 became effective for VISX on January 1, 2002. We adopted SFAS 144 effective January 1, 2002, and adoption of this statement did not have any impact on VISX's financial statements or results of operations.

In July 2002, the FASB issued Statement No. 146, *Accounting for Costs Associated with Exit or Disposal Activities* (SFAS 146) and nullifies EITF Issue No. 94-3 *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*. SFAS 146 requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred, whereas EITF No. 94-3 had recognized the liability at the commitment date to an exit plan. VISX is required to adopt the provisions of SFAS 146 effective for exit or disposal activities initiated after December 31, 2002. VISX is currently evaluating the impact of adoption of this statement but does not expect a material impact on its financial position or results of operations.

Reclassifications. Certain reclassifications were made to prior year financial data to conform with current year presentation.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

This Report contains forward-looking statements about expected system sales and rentals, laser upgrade revenue and costs, license revenue, and R&D expenditures for the remainder of 2002. These statements are subject to risks and uncertainties that may cause actual results to differ significantly. The risks and uncertainties include the potential reduction in demand for VISX equipment and upgrades, and the potential decline in demand for procedures caused by the continued weakness in the economy, consumer confidence and stock markets in the United States. These forward-looking statements are estimates reflecting the best judgment of the senior management of VISX, and they involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. This Report, including forward-looking statements contained herein, should therefore be considered in light of various important factors, including those set forth in our 2001 annual report on Form 10-K under the caption "Risk Factors" beginning on page 26, "Legal Proceedings" beginning on page 8, and elsewhere in that report. Moreover, we caution you not to place undue reliance on these forward-looking statements, which speak only as of the date they were made. We do not undertake any obligation to publicly release any revisions to these forward-looking statements to reflect events or circumstances after the date of this report or to reflect the occurrence of unanticipated events.

The laser vision correction industry is evolving rapidly. Economic, market, and technology changes frequently affect VISX and could harm our business in the future. If any of the risks referred to above were to materialize, orders and revenues for the VISX STAR Excimer Laser System (VISX System) and VisionKey® cards could fluctuate or decline. Accordingly, our past results may not be useful in predicting our future results.

Overview

We develop products and procedures to improve people's eyesight using lasers. Our principal product, the VISX System, is designed to correct the shape of a person's eyes to reduce or eliminate the need for eyeglasses or contact lenses. The Food and Drug Administration (FDA) has approved the VISX System for use in the treatment of most types of refractive vision disorders including nearsightedness, farsightedness, and astigmatism. The FDA has approved, under a humanitarian device exemption, the use of VISX's Custom-Contoured Ablation Pattern (C-CAP) method to customize laser vision correction treatments to correct decentered ablations resulting from a previous treatment on any brand of laser. The FDA has also approved our WaveScan Wavefront® System (WaveScan System), which provides a complete refractive analysis of the eye's entire optical system. In the future, we anticipate that doctors will be able to use this analysis to enhance treatments with the VISX System. We sell VisionKey cards to control the use of the VISX System and to collect license fees for the use of our patents.

Table of Contents*System revenues*

System revenues decreased \$3.3 million, to \$10.2 million for the three months ended September 30, 2002 from \$13.5 million for the three months ended September 30, 2001. System revenues decreased \$14.9 million, to \$32.9 million for the nine months ended September 30, 2002 from \$47.8 for the nine months ended September 30, 2001. System revenues include sales of laser systems, upgrades to existing laser systems and WaveScan Systems. We sold fewer laser systems in the third quarter and first nine months of 2002 than in the comparable periods of 2001. We believe the decline, mainly in the U.S., was due primarily to the economic slowdown in the United States. Aggressive pricing tactics by competitors also adversely affected our sales. Our average selling price for laser systems was lower than in the prior year due to the factors discussed above. Upgrade revenue declined \$4.0 million and \$7.6 million in the third quarter and first nine months of 2002, respectively, from the comparable periods of the prior year. The decline in upgrade revenue was due to the fact that approximately 80% of our lasers in active use in the U.S. have already been upgraded. Accordingly, we anticipate that revenue from laser upgrades will decline significantly in coming quarters and that upgrade revenue will be lower for the full year 2002 than in 2001. WaveScan System sales increased \$1.9 million and \$3.0 million in the third quarter and first nine months of 2002, respectively, over the comparable periods of the prior year as we continued to extend our rollout of this new product.

License, service & other revenues

License, service and other revenue decreased \$3.2 million to \$20.3 million for the three months ended September 30, 2002 from \$23.5 million for the three months ended September 30, 2001. License, service and other revenue decreased \$17.1 million to \$70.8 million for the nine months ended September 30, 2002 from \$87.9 million for the nine months ended September 30, 2001. The decreases were attributable primarily to customers in the U.S. purchasing VisionKey® cards for fewer procedures in the third quarter and first nine months of 2002 than in the comparable periods of 2001. The decision to have laser vision correction surgery is influenced by many factors including consumers perception of and confidence in the health of the economy. We believe the weak economy, declines in consumer confidence, and the extended stock market declines in the United States were the principal reasons why our U.S. procedure volume, and the U.S. laser vision correction market as a whole, were lower in the third quarter and first nine months of 2002 than in the same periods of 2001. At present, it is hard to predict when the economy, consumer confidence and stock markets in the U.S. will rebound and provide renewed support for the U.S. laser vision correction market.

COSTS & EXPENSES (000's)	Three Months Ended September 30,			Nine Months Ended September 30,		
	2002	2001	Change	2002	2001	Change

Cost of system revenues

Table of Contents

Cost of system revenues decreased \$3.4 million to \$6.8 million for the three months ended September 30, 2002 from \$10.2 million for the three months ended September 30, 2001. Cost of system revenues decreased \$12.6 million to \$21.9 million for the nine months ended September 30, 2002 from \$34.5 million for the nine months ended September 30, 2001. These declines were due primarily to VISX selling fewer laser systems in the third quarter and first nine months of 2002 than in the comparable periods of 2001. Additionally, cost of upgrade revenues were lower due to reduced laser upgrade revenues in the third quarter and first nine months of 2002 than in the comparable periods of 2001. The gross profit margin on upgrade revenue was higher in 2002 than in 2001 due to new product technologies being introduced.

Cost of license, service and other revenues

Cost of license, service and other revenues increased \$0.8 million to \$5.0 million for the three months ended September 30, 2002 from \$4.2 million for the three months ended September 30, 2001. Cost of license, service and other revenues increased \$0.9 million to \$14.5 million for the nine months ended September 30, 2002 from \$13.6 million for the nine months ended September 30, 2001. The increase was due to higher costs for service due to an increased installed base.

Selling, general, and administrative expenses

Selling, general, and administrative expenses decreased \$3.1 million to \$8.6 million for the three months ended September 30, 2002 from \$11.7 million for the three months ended September 30, 2001. Selling, general, and administrative expenses decreased \$2.1 million to \$30.7 million for the nine months ended September 30, 2002 from \$32.8 million for the nine months ended September 30, 2001. These decreases were due to decreased legal expenses in the third quarter and first nine months of 2002 as the result of \$3.5 million and \$5.0 million of insurance reimbursements received during the third quarter and nine months ended September 30, 2002, respectively. Excluding these reimbursements, legal expenses increased in 2002 over 2001.

Research, development and regulatory expenses

Research, development and regulatory expenses decreased \$0.7 million, to \$4.6 million for the three months ended September 30, 2002 from \$5.3 million for the three months ended September 30, 2001. Research, development and regulatory expenses decreased \$0.9 million to \$13.6 million for the nine months ended September 30, 2002 from \$14.5 million for the three months ended September 30, 2001. We continued investing research and development dollars in our three main areas of focus: new capabilities for the VISX STAR Excimer Laser platform, development of products such as our WaveScan System and wavefront-driven ablations, and research into new technologies. We anticipate that our research, development and regulatory expenses will total approximately \$19 million for 2002.

Interest and other income

Our average balance of cash invested in interest bearing securities was lower in 2002 than in 2001 due to cash used to repurchase our stock. Additionally, our average yields on our portfolio of cash and investments were lower in 2002 compared to 2001. Accordingly, interest income declined in 2002 from 2001.

Litigation settlement 2001

Lawsuits were filed against us in 1998 and thereafter in connection with the activities of Pillar Point Partners (Pillar Point), a former partnership between subsidiaries of VISX and Summit Technologies, Inc. (Summit). The purported class action lawsuits alleged, among other things,

Table of Contents

violations of various state and federal antitrust and unfair competition laws. Other claims involving Pillar Point were filed against VISX, Summit and others at various times. The Pillar Point partnership was dissolved in 1998, and in 2001 we and Summit, now a subsidiary of Alcon, Inc., settled certain of these actions. In connection with the settlements, VISX paid a total of \$37.8 million in one-time payments and related costs and fees. As a result of the settlements, all of the lawsuits have been dismissed with prejudice.

Liquidity and Capital Resources

Cash, cash equivalents and short-term investments and working capital were as follows:

	(000's)	
	September 30, 2002	December 31, 2001
Cash, cash equivalents and short-term investments	\$ 118,259	\$ 123,807
Working capital		
138,915 159,935		

Cash, cash equivalents and short-term investments (cash) decreased by \$5.5 million in the first nine months of 2002 due mainly to \$31.9 million cash provided by operations offset by \$39.1 million paid to repurchase 3.5 million shares of VISX stock on the open market.

Operating activities provided \$31.9 million of cash in the first nine months of 2002, up from \$2.7 million provided by operating activities in the same period of 2001. The following factors that impact cash flow from operations changed between the first nine months of 2002 and 2001.

Net income increased \$10.2 million due mainly to the non-recurring 2001 litigation settlement of \$37.8 million, pre-tax, offset by lower sales in 2002.

Deferred tax assets and prepaid expenses decreased by \$9.4 million in 2002 primarily as a result of a decrease in prepaid taxes carried forward from 2001.

Accounts receivable (net of reserves) declined by \$7.9 million in 2002 due to lower revenues whereas it increased by \$0.9 million in 2001.

On April 4, 2001, our Board of Directors authorized a Stock Repurchase Program under which up to 10 million shares of VISX common stock may be repurchased. Before repurchasing shares we consider a number of factors including market conditions, the market price of the stock, and the number of shares needed for employee benefit plans. As a result, we cannot predict the number of shares that we may repurchase in the future. In accordance with the April 4, 2001 authorization and applicable securities laws, through purchases on the open market, we repurchased 3,541,700 shares during the first nine months of 2002 and have repurchased 6,644,100 shares cumulatively through September 30, 2002 at a total cost of \$39.1 million and \$86.8 million, respectively. Accordingly, 3.4 million shares remain available as of September 30, 2002 for repurchase under the Board of Directors April 2001 authorization.

Purchases of short-term investments represent reinvestment into short-term investments of the proceeds from short-term investments that matured and investment of cash and cash equivalents.

As of September 30, 2002, we did not have any borrowings outstanding nor any credit agreements.

Our normal credit terms granted to customers are net 30 to 60 days. In an effort to promote the growth of the laser vision correction industry and the use of VISX Systems, in certain markets we

Table of Contents

provide long-term financing to customers for their purchase of VISX Systems. We consider a number of factors including industry practice, competition and our evaluation of customers' credit worthiness in determining when to offer such financing.

We believe that our operations will provide sufficient cash flow to meet our working capital and capital equipment needs during the next twelve months. In addition, we have \$118.3 million of cash, cash equivalents and short-term investments as of September 30, 2002 to provide for unforeseen contingencies and to support strategic objectives including the development or acquisition of new technologies and our Stock Repurchase Program.

In August 2001, we signed a one-year research and development agreement with Medjet Inc. ("Medjet") under which we provided funding to Medjet to pursue new ophthalmic technologies and products. In addition, we signed a merger agreement with Medjet that provided us with a one-year option, for which we paid \$0.5 million, to acquire all outstanding Medjet common stock in a merger transaction for \$2.00 per share in cash. During the third quarter of fiscal 2002, our agreements with Medjet was amended to provide us with up to an additional eleven months to acquire all outstanding Medjet common stock in a merger transaction for \$2.00 per share in cash. The closing of the potential merger was subject to Medjet's stockholder approval and is subject to other customary conditions to closing. In August 2001, we also paid \$1.3 million to purchase from a third party all outstanding shares of Medjet's Series B Convertible Preferred Stock, which are entitled to votes equivalent to 1,040,000 shares of Medjet common stock and vote together with Medjet's common stock. These shares owned by VISX represent 21% of Medjet's voting stock. In connection with these agreements, we also entered into a voting agreement with Dr. Eugene Gordon, founder of Medjet, under which Dr. Gordon agreed to vote all of his shares of common stock in favor of the merger, and agreed to sell all of his stock to VISX in the event that VISX offers to complete the merger. Dr. Gordon currently holds shares representing approximately 32% of Medjet's voting stock. Additionally, VISX acquired warrants from Medjet to purchase 1,320,000 shares of Medjet common stock exercisable at \$0.75 per share. VISX also acquired warrants from a third party to purchase 1,365,000 shares of Medjet common stock exercisable at \$3.50 per share. The warrants expire during the second half of 2004. Under Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities", the warrants are treated as derivatives and measured at fair value. At each balance sheet date, the warrants are remeasured at fair value and all gains and losses are recorded in the statements of operations. We account for this investment under the equity method prescribed by Accounting Principles Board No. 18, "The Equity Method of Accounting for Investments in Common Stock".

Under our R&D agreement with Medjet, we paid approximately \$2.0 million to Medjet to fund research and development work they performed during the first nine months of 2002. We expense payments made to Medjet as research, development and regulatory expense in our financial statements. To exercise our option to acquire Medjet, we would have to pay approximately \$9 million based on the \$2.00 per share purchase price and the number of shares of Medjet common stock, options and warrants outstanding at September 30, 2002.

In November 2002, VISX terminated its merger and research and development agreements with Medjet. In accordance with these agreements, VISX will pay termination fees of \$250,000 in the fourth quarter. As of September 30, 2002, the remaining net book value of the investment in Medjet was approximately \$1.5 million. At this time we do not believe we have an impairment loss, however, we are required under generally accepted accounting principles to review our investment for losses that are other than temporary. We will continue to monitor our investments in Medjet which may result in a change to earnings in the future for some or all of the \$1.5 million.

Table of Contents

In May 2002, VISX announced that it signed a Letter of Intent with Tracey Technologies, LLC for exclusive worldwide rights to Tracey's ray tracing technology for use in customized laser vision correction treatments. Additionally, VISX announced that it entered into an exclusive worldwide license agreement for a portfolio of patents held by Luis Ruiz, MD, relating to the treatment of presbyopia with multifocal ablations. During the second quarter VISX made payments of \$650,000 related to these agreements of which \$150,000 was expensed in connection with research and development activities and the balance was capitalized as a prepaid asset. No additional payments were made during the third quarter of 2002. If a final agreement is concluded with Tracey and clinical and regulatory milestones specified in both agreements are achieved, VISX would be committed to make additional payments in the range of \$3 to \$7 million in connection with provisions contained in these two agreements. VISX could be obligated for additional payments for royalty in the future based on future sales of the associated product.

Critical Accounting Policies

We follow generally accepted accounting principles (GAAP) for the United States in preparing our financial statements. As part of this work, we must make many estimates and judgments about future events. These affect the value of the assets and liabilities, contingent assets and liabilities, and revenues and expenses that we report in our financial statements. We believe these estimates and judgments are reasonable and we make them in accordance with our accounting policies based on information available at the time. However, actual results could differ from our estimates and this could require us to record adjustments to expenses or revenues that could be material to our financial position and results of operations in future periods. Our critical accounting policies used in making these estimates and judgments are as follows.

Revenue Recognition

Our revenue is comprised of the following: sale and rental of system equipment and upgrades, service revenue, and license fees and related procedure revenue (procedure revenue). We recognize revenue in accordance with SEC Staff Accounting Bulletin No. 101, Revenue Recognition in Financial Statements (SAB 101). Under this standard, revenue is generally recognized when the following four criteria are met:

- (1) Persuasive evidence of an arrangement exists;
 - (2) Delivery has occurred or services have been rendered;
 - (3) Our selling price is fixed or determinable; and
 - (4) Collectibility is reasonably assured.
- All of our sales are documented by contract or purchase orders specifying sales prices and terms.

Within the U.S. we directly handle the sale and installation of our systems and recognize revenue on these products after we have completed installation of systems at a customer's site. At this point we accrue an estimate of the cost of warranty service to be provided in the future. Outside the U.S. our standard terms are FOB VISX and we sell exclusively through independent, third party distributors who are generally responsible for all marketing, sales, installation, training and warranty labor coverage for our products. Accordingly, we recognize sales revenue when we ship systems for customers outside the U.S. and accrue an estimate of the cost of parts that we are obligated to provide under warranty. Sales revenue includes revenue recognized under sales type lease agreements. Under rental or operating lease

Table of Contents

agreements for systems, rental revenue is recognized in accordance with, and over the term of the agreement. For customers who purchase service contracts, we recognize service revenue over the term of the contract. For customers without service contracts, we recognize service revenue when we provide service. We record spare parts revenue upon shipment of the parts. We recognize license revenue when we ship VisionKey® cards and when we receive payments from third party licensees.

We assess the credit worthiness of all customers in connection with their purchases. We recognize revenue only when collectibility is reasonably assured. If this is not the case, then we record revenue only as payments are received.

Accounts Receivable

Customers are evaluated for credit worthiness, and we recognize revenue when collectibility is reasonably assured. At the end of each accounting period, we estimate the reserves necessary for receivables that will ultimately not be collectible from customers. To develop this estimate we review all receivables and identify those accounts with problems. For these problem accounts, we estimate individual, specific reserves based on our analysis of the payment history, operations and finances of each account. For all other accounts, we review historical bad debt trends, general and industry specific economic trends, customer concentrations, and current payment patterns to estimate the reserve necessary to provide for payment defaults that cannot be specifically identified but can be expected with reasonable probability to occur in the future. We face two particular challenges in estimating these reserves: concentration of credit with certain large customers and the potential for significant change in the overall health of the national economies in the markets we serve. Unexpected deterioration in the health of either a large customer or a national economy could lead to a material adverse impact on the collectibility of our accounts receivable and our future operating results.

Inventories

Inventories consist of purchased parts, subassemblies and finished systems and are stated at the lower of cost or market, using the first-in, first-out method. We regularly review our inventory on hand plus on order and compare this to our estimate of demand over the following 12 months. Based on this analysis, we reduce our inventory valuation for excess and obsolete items. Changes in competition, the economy, and technology can lead to variation in demand for our products. If the change in demand is significant, we may need to further reduce the inventory valuation. All inventory write-downs result in a new cost basis and are charged to cost of revenues, accordingly any inventory write-down would impact our reported cost of revenues.

Legal Contingencies

We are involved in a variety of legal proceedings including those concerning intellectual property rights, claims that we violated antitrust laws, and class actions filed under federal securities laws. In cases brought against us, we must assess the probability of an adverse decision. If we believe it probable that we will lose in our defense and we can reasonably estimate the loss, we must accrue an estimate of the potential loss. Currently we do not believe it is probable that we will lose cases currently pending and, accordingly, have not accrued any reserves for legal settlements. However, the results of these complex legal proceedings are very difficult to predict with certainty. In addition, because a number of the proceedings have issues in common, an adverse determination in one proceeding could lead to adverse determinations in one or more of the other pending proceedings. Adverse determinations in any of these proceedings could limit our ability to collect equipment and use fees in certain markets, could give rise to significant monetary damages, or could prevent us from manufacturing and selling our

Table of Contents

laser system, and therefore could have a material adverse effect on our business, financial position and results of operations.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

There were no material changes during the nine months ended September 30, 2002 to our exposure to market risk for changes in interest rates and foreign currency exchange rates.

Item 4. Disclosure Controls and Procedures

VISX management, including the Chief Executive Officer and Chief Financial Officer, have conducted an evaluation of the effectiveness of disclosure controls and procedures pursuant to Exchange Act Rule 13a-14. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures are effective in ensuring that all material information required to be filed in this quarterly report has been made known to them in a timely fashion. There have been no significant changes in internal controls, or in factors that could significantly affect internal controls, subsequent to the date the Chief Executive Officer and Chief Financial Officer completed their evaluation.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

Overview

VISX is involved in a variety of legal proceedings that affect its business. These include proceedings relating to patents and intellectual property rights, proceedings relating to claims that VISX's activities have violated antitrust laws and other litigation proceedings. For a complete description of legal proceedings, see VISX's annual report on Form 10-K for the year ended December 31, 2001 and our quarterly reports on Form 10-Q for the quarters ended March 31, 2002 and June 30, 2002. During the quarter ended September 30, 2002, there were no material developments with respect to such previously existing proceedings and no new material proceedings not previously disclosed, except as follows.

Patent Litigation: WaveLight

In March 2002, VISX filed a lawsuit in Duesseldorf, Germany against WaveLight Laser Technologie AG and its senior manager, Max Reindl, alleging infringement of VISX's German Patent No. P3481164.8. In September 2002, VISX and WaveLight entered into Settlement and License Agreements. Under the Agreements, VISX licensed its patents relating to refractive excimer lasers in the United States and international markets to WaveLight. As consideration, WaveLight will pay a royalty to VISX for each procedure performed in the United States using a WaveLight refractive laser and, in addition, WaveLight will pay a royalty to VISX for international equipment sales.

In September 2002, pursuant to the terms of the Agreements, the parties filed a stipulated order dismissing the patent infringement action filed by VISX against WaveLight and Mr. Reindl in Germany.

Patent Litigation: Nidek

Table of Contents

In August 2000, Nidek filed an action in the Tokyo District Court in Japan against VISX's Japanese subsidiary and others alleging infringement of Nidek's Japanese Patent No. 2,809,959 (the '959 patent'). VISX thereafter initiated two proceedings in the Japanese Patent Office (JPO) challenging the validity of the '959 patent. In November 2001 and January 2002, the Tokyo District Court and JPO, respectively, held that the '959 patent is invalid. Nidek appealed both of these decisions to the Tokyo High Court and stated that it may attempt to amend the claims of the '959 patent. On June 19, 2002, the JPO in the second proceeding issued a Notice of Reasons for Invalidation of the '959 patent based on additional grounds.

In October 2002, Nidek filed with the JPO an Argument to rebut these additional grounds for invalidity and a Request for Correction of the '959 patent claims found invalid by the JPO. A final decision by the JPO in the second proceeding is expected after the Tokyo High Court rules on Nidek's appeal of the JPO decision of invalidation in the first proceeding.

Antitrust Class Actions And Litigation Involving Pillar Point Partners

In June 1998, VISX, VISX Partner, Inc., Summit Technology, Inc. (now Summit Autonomous Inc.) and Summit Partner, Inc. (the parties), entered into a Settlement and Dissolution Agreement which dissolved Pillar Point Partners. The Dissolution Agreement provided that Pillar Point would remain in existence thereafter for the sole purpose of winding up its affairs and defending or settling litigation in which it was a party. In August 2002, the parties and Pillar Point Partners entered into a Confirmation Agreement providing that Pillar Point had wound up its affairs, that all litigation to which it was a party had been terminated and that Pillar Point no longer existed for any purpose.

Securities Class Action

In August 2002, the United States Court of Appeals for the Ninth Circuit affirmed the district court's dismissal of the securities fraud class action against VISX and the individual defendants in the case captioned *in re VISX Inc. Securities Litigation* (No. C-00-0649-CRB). The plaintiffs in these actions purported to represent a class of all persons who purchased VISX's common stock between March 1, 1999 and February 22, 2000. The complaint alleged that the defendants made misleading statements in violation of the federal securities laws, including Section 10(b) of the Securities Exchange Act of 1934.

Item 5. Other Information

In accord with Section 10A(i)(2) of the Securities Exchange Act of 1934, and as added by Section 202 of the Sarbanes-Oxley Act of 2002, VISX is responsible for listing the non-audit services approved by VISX's Audit Committee (the Committee) to be performed by KPMG LLP, VISX's independent auditor. Non-audit services are defined in the law as services other than those provided in connection with an audit or a review of the financial statements of VISX. The non-audit services approved by the Audit Committee in the second and third quarters are each considered by VISX to be audit-related services that closely relate to the financial audit process. Each of the services has been approved in accord with a pre-approval from the Committee's Chairman pursuant to delegated authority by the Committee.

During the quarterly period covered by this filing, the Committee approved additional engagements of KPMG LLP for the following non-audit service: tax return preparation, non-audit accounting services, and tax matter consultations concerning federal and state taxes.

CERTIFICATIONS

I, Elizabeth H. Davila, certify that:

1. I have reviewed this quarterly report on Form 10-Q of VISX, Incorporated;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - c) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - d) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
