LITHIUM TECHNOLOGY CORPORATION AND SUBSIDIARY (DEVELOPMENT STAGE COMPANIES)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

MARCH 31, 2001

1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles applicable to interim periods. In the opinion of management, all adjustments (consisting only of normal recurring accruals) considered necessary for a fair presentation have been included. These financial statements should be read in conjunction with the Company's audited financial statements included in the Company's Annual Report on Form 10-KSB filed with the Securities and Exchange Commission for the year ended December 31, 2000. Operating results for the three months ended March 31, 2001 are not necessarily indicative of the results that may be expected for the year ending December 31, 2001 or any interim period.

2. HISTORY OF THE BUSINESS

Lithium Technology Corporation and its wholly-owned subsidiary, Lithion Corporation, collectively referred to as "LTC", are pre-production stage companies in the process of commercializing unique, solid-state, lithium polymer rechargeable batteries. LTC is engaged in technology development activities and pilot line manufacturing operations to further advance this battery technology and also holds various patents relating to such batteries. LTC is developing innovative lithium polymer batteries for Hybrid Electric Vehicle (HEV) applications.

The date of inception of LTC's development stage is July 21, 1989. At that time, LTC exchanged its capital stock for all of the capital stock of Lithion and an operating company in a reverse acquisition. The operating company was divested in November 1993. The accumulated deficit associated with the operating company of \$6,865,000 has been segregated from LTC's deficit accumulated during the development stage in the accompanying consolidated financial statements.

On January 19, 2000, LTC and Pacific Lithium Limited ("PLL") of Auckland, New Zealand signed an Agreement and Plan of Merger (the "Merger Agreement") to merge their respective companies (the "Merger"). On October 2, 2000, PLL domesticated into the U.S. and became a private Delaware corporation pursuant to the provisions of Section 388 of the Delaware Corporation Law (the "Domestication") and changed its name to Ilion Technology Corporation ("Ilion"). Ilion intends to consummate an Initial Public Offering in the United States and NASDAQ listing of Ilion (the "Ilion IPO") as soon as practicable depending upon market conditions and other factors. The Merger will be completed after the

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

consummation of the Ilion IPO and the approval of the Merger by the LTC stockholders, assuming the remaining closing conditions are met. A meeting of the LTC stockholders to approve the Merger will be held as soon as practicable after the Ilion IPO.

The closing conditions to the Merger must be met by February 28, 2002 or either LTC or Ilion may terminate the Merger Agreement provided that the terminating party has not prevented the consummation of the Merger by a breach of the Merger Agreement by such party. Accordingly, both the Ilion IPO and the approval of the Merger by the LTC Stockholders must be completed by February 28, 2002 and the remaining closing conditions must be met by such date. There can be no assurance that Ilion will be able to

8

9

consummate the Ilion IPO by February 28, 2002. There can also be no assurance that if the Ilion IPO is completed by February 28, 2002 that the Merger will be approved by the LTC stockholders by such date.

Pursuant to the terms of a Bridge Loan Financing Agreement entered into as of November 29, 1999 (the "Bridge Loan"), Ilion has agreed to advance working capital to LTC. Ilion has advanced a total of \$4,011,000 as of March 31, 2001.

The Bridge Loan Agreement does not contain a maximum of the amount of funding that may be advanced under such agreement. Accordingly, there is no maximum amount of notes that may be issued to Ilion. The amount of the notes will be related to the working capital advances made by Ilion to LTC and the length of time until the Merger is completed.

If Ilion breaches the Merger Agreement, and the Merger Agreement is terminated as a result, prior to February 28, 2002, the date the Merger Agreement expires, Ilion would have the right to convert the Bridge Loan into shares of LTC common stock at the conversion price of \$0.10 per share. In this event, the conversion could result in Ilion holding an ownership percentage greater than 50%, depending on the amount of Bridge Loans outstanding on the date of conversion. In addition, LTC would need to find alternative sources of capital or be forced to curtail technology development expenditures which, in turn, will delay, and could prevent, the completion of LTC's commercialization process.

If the Merger does not occur by February 28, 2002 because the closing conditions have not been met by such date, including the failure of condition of the Ilion IPO or the approval of the Merger by LTC's stockholders, and Ilion has not breached the Merger Agreement, Ilion would have the right to convert the Bridge Loans into shares of LTC common stock at a conversion price of \$0.10 per share. This conversion could result in Ilion holding an ownership percentage greater than 50%, depending on the amount of Bridge Loans outstanding on the date of conversion. In addition, in this instance, Ilion would be issued three year warrants to purchase 7.5 million shares of LTC common stock exercisable at \$0.15 per share and Ilion would have a first option to purchase LTC's technologies and processes if LTC sells, goes into receivership, liquidation or the like. Ilion would also have the right and option to purchase LTC's pilot plant and equipment at book value as of the date of the Merger Agreement.

In connection with the Bridge Loan, LTC has granted Ilion a non-exclusive worldwide license to use LTC's thin film technology and manufacturing methods solely as it relates to lithium-ion polymer

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

batteries. Pursuant to the licensing agreement, Ilion will pay to LTC a royalty equal to the higher of one percent of the net sales price of each licensed product manufactured, sold or otherwise disposed of during the term of the licensing agreement or the rate that applies to any license agreement entered into subsequent to October 1, 1999. The funds advanced by Ilion to LTC under the Bridge Loan Financing Agreement will be deemed as an advance payment of royalty fees due under the licensing agreement. All improvements developed by LTC or Ilion during the course of the licensing agreement will be owned by Ilion. As of March 31, 2001, no royalties have been earned under this agreement.

9

10

3. OPERATIONS AND LIQUIDITY DIFFICULTIES AND MANAGEMENT'S PLANS TO OVERCOME:

The accompanying consolidated financial statements of the Company have been prepared on a going concern basis, which contemplates the continuation of operations, realization of assets and liquidation of liabilities in the ordinary course of business. Since its inception, the Company has incurred substantial operating losses and expects to incur additional operating losses over the next several years. Since December 1993, operations have been financed primarily through the use of proceeds from the sale of convertible debt and private placements of common stock. Continuation of the Company's operations in 2001 is dependent upon Ilion's ability to make additional advances under the Bridge Loan Financing Agreement and, ultimately, the closing of the merger described herein. These conditions raise substantial doubt about LTC's ability to continue as a going concern. The accompanying consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

MANAGEMENT'S PLANS - LTC is in the late stages of developing and producing innovative rechargeable solid state lithium polymer batteries. LTC has worked closely with selected portable electronics Original Equipment Manufacturers ("OEMs") over the past several years, exploring various notebook computer, PDA and wireless handset applications. However, based on emerging market opportunities and as part of the strategy of merging into Ilion, LTC has now refocused its unique wide footprint cell manufacturing technology and market activities to concentrate on large, high-pulse power battery applications, including Hybrid Electric Vehicles (HEVs) and energy storage devices for the rapidly growing distributed power market. In September 2000, LTC completed the first working prototype lithium-ion polymer HEV battery, complete with electronics. A second generation prototype HEV battery was completed in January 2001. LTC has not yet delivered a prototype HEV battery for testing by a third party. All improvements to LTC's technology contained in the prototype HEV batteries are owned by Ilion pursuant to the terms of the licensing agreement between LTC and Ilion entered into in connection with the Bridge Loan.

Prior to changing its focus to developing batteries for HEVs, LTC delivered limited quantities of prototype batteries and component cells for evaluation to selected battery pack integrators and portable electronics OEMs. LTC has an experienced management team and a strong technical staff with relevant experience in battery technology and applications, thin-film manufacturing, capital raising, and global marketing, sales and strategic alliances.

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

Management's operating plan seeks to minimize LTC's capital requirements, but commercialization of LTC's battery technology will require substantial amounts of additional capital. LTC expects that technology development and operating and production expenses will increase significantly as it continues to advance its battery technology and develop products for commercial applications. LTC's working capital and capital requirements will depend upon numerous factors, including, without limitation, the progress of LTC's technology development program, the levels and resources that LTC devotes to the development of manufacturing and marketing capabilities, technological advances, the status of competitors and the ability of LTC, including Ilion subsequent to the merger, to establish collaborative arrangements with other companies to provide an expanded capacity to market and manufacture battery products.

Beginning in October 1999, Ilion has provided working capital for LTC. Management is depending on the Bridge Loan Agreement funding from Ilion to meet LTC's obligations through the next year. In 2001, Ilion reduced the amount of funding it has been providing to LTC on a monthly basis. Ilion has indicated that it has reduced its operating expenses throughout Ilion and indicated in March 2001 that it intended to fund LTC at \$100,000 per month under the Bridge Loan Agreement. Ilion and LTC subsequently entered into discussions regarding funds required by LTC to meet its operating expenses and in April 2001 Ilion agreed to support an LTC monthly operating budget of \$150,000 and subject to Ilion's review and reconciliation of LTC's past due payables, agreed to effect payment of LTC's outstanding payables over a three month period.

10

11

If Ilion does not provide the monthly funding required by LTC or does not forward funds to meet LTC's outstanding payables, LTC will be forced to further curtail its current operations, substantially reduce the number of LTC employees, and take other measures to reduce its operating expenditures.

If Ilion breaches the Merger Agreement, and the Merger Agreement is terminated as a result, prior to February 28, 2002, the date the Merger Agreement expires, Ilion would have the right to convert the Bridge loans into shares of LTC common stock at a conversion price of \$0.10 per share. In this event, the conversion could result in Ilion holding an ownership percentage greater than 50%, depending on the amount of Bridge Loans outstanding on the date of conversion. In addition, LTC would need to find alternative sources of capital or be forced to curtail technology development expenditures which, in turn, will delay, and could prevent, the completion of LTC's commercialization process.

If the Merger does not occur by February 28, 2002 because the closing conditions have not been met by such date, including the failure of condition of the Ilion IPO or the approval of the Merger by LTC's Stockholders, and Ilion has not breached the Merger Agreement, Ilion would have the right to convert the Bridge Loans into shares of LTC common stock at a conversion price of \$0.10 per share. This conversion could result in Ilion holding an ownership percentage greater than 50%, depending on the amount of Bridge Loans outstanding on the date of conversion. In addition, in this instance, Ilion would be issued three year warrants to purchase 7.5 million shares of LTC common stock exercisable at \$0.15 per share and Ilion would have a first option to purchase LTC's technologies and processes if LTC sells, goes into receivership, liquidation or the like. Ilion would also have the right and option to purchase LTC's pilot plant and equipment at book value as

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

of the date of the Merger Agreement.

LTC believes that provided Ilion advances the needed working capital to LTC until the consummation of the Merger, LTC will have sufficient capital resources to meet its needs and satisfy its obligations through the date of the Merger. LTC does not currently have sufficient cash to meet all of its operating needs, pay its outstanding payables or to achieve all its development and production objectives. There can be no assurance that funding will continue to be provided by Ilion in the amounts necessary to meet all of LTC's obligations. If Ilion does not provide the needed working capital to LTC or if the Merger is not consummated, LTC will assess all available alternatives including the suspension of operations and possibly liquidation, auction, bankruptcy, or other measures.

4. PROPERTY AND EQUIPMENT

Property and equipment at March 31, 2001 are summarized as follows:

Laboratory equipment	\$1,376,000
Furniture and office equipment	106,000
Leasehold improvements	48,000

	\$1,530,000
Less: Accumulated depreciation and amortization	1,194,000

	\$ 336,000
	=====

5. SUBSEQUENT EVENTS

In April and May of 2001, Ilion advanced an additional \$301,000 to the Company for working capital under the Bridge Loan, bringing the total Bridge Loan to \$4,312,000 as of May 15, 2001.

In April, 2001, the Company extended the expiration date of the Company's outstanding warrants until the earlier of (i) the date three business days prior to the closing of the Merger or (ii) the original termination date set forth in the warrant, provided however, if there is no registration statement registering the underlying

11

12

warrant shares effective within ninety days prior to the original warrant termination date, the original warrant termination date is extended to the date three business days prior to the closing of the Merger.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

The following discussion and analysis should be read in conjunction with the financial statements and notes thereto appearing elsewhere in this report.

GENERAL AND PLAN OF OPERATION

LTC is a pre-production stage company in the process of commercializing a unique, solid-state, lithium polymer rechargeable battery. LTC is engaged in technology development activities and pilot line manufacturing operations to further advance this battery technology and also holds various patents relating

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

to such batteries. LTC is developing innovative lithium polymer batteries for Hybrid Electric Vehicle (HEV) applications.

On January 19, 2000, LTC and Pacific Lithium Limited ("PLL") of Auckland, New Zealand signed an Agreement and Plan of Merger (the "Merger Agreement") to merge their respective companies (the "Merger"). On October 2, 2000, PLL domesticated into the U.S. and became a private Delaware corporation pursuant to the provisions of Section 388 of the Delaware Corporation Law (the "Domestication") and changed its name to Ilion Technology Corporation ("Ilion"). Ilion intends to consummate an Initial Public Offering in the United States and NASDAQ listing of Ilion (the "Ilion IPO") as soon as practicable depending upon market conditions and other factors. The Merger will be completed after the consummation of the Ilion IPO and the approval of the Merger by the LTC stockholders, assuming the remaining closing conditions are met. A meeting of the LTC stockholders to approve the Merger will be held as soon as practicable after the Ilion IPO.

The closing conditions to the Merger must be met by February 28, 2002 or either LTC or Ilion may terminate the Merger Agreement provided that the terminating party has not prevented the consummation of the Merger by a breach of the Merger Agreement by such party. Accordingly, both the Ilion IPO and the approval of the Merger by the LTC Stockholders must be completed by February 28, 2002 and the remaining closing conditions must be met by such date. There can be no assurance that Ilion will be able to consummate the Ilion IPO by February 28, 2002. There can also be no assurance that if the Ilion IPO is completed by February 28, 2002 that the Merger will be approved by the LTC stockholders by such date.

Pursuant to the terms of a Bridge Loan Financing Agreement entered into as of November 29, 1999 (the "Bridge Loan"), Ilion has agreed to advance working capital to LTC. Ilion has advanced a total of \$4,011,000 as of March 31, 2001.

The Bridge Loan Agreement does not contain a maximum of the amount of funding that may be advanced under such agreement. Accordingly, there is no maximum amount of notes that may be issued to Ilion. The amount of the notes will be related to the working capital advances made by Ilion to LTC and the length of time until the Merger is completed.

If Ilion breaches the Merger Agreement, and the Merger Agreement is terminated as a result, prior to February 28, 2002, the date the Merger Agreement expires, Ilion would have the right to convert the Bridge Loan into shares of LTC common stock at the conversion price of \$0.10 per share. In this event, the conversion could result in Ilion holding an ownership percentage greater than 50%, depending on the amount of Bridge Loans outstanding on the date of conversion. In addition, LTC would need to find alternative sources of capital or be forced to curtail technology development expenditures which, in turn, will delay, and could prevent, the completion of LTC's commercialization process.

12

13

If the Merger does not occur by February 28, 2002 because the closing conditions have not been met by such date, including the failure of condition of the Ilion IPO or the approval of the Merger by LTC's stockholders, and Ilion has not breached the Merger Agreement, Ilion would have the right to convert the Bridge Loans into shares of LTC common stock at a conversion price of \$0.10 per share. This conversion could result in Ilion holding an ownership percentage greater than 50%, depending on the amount of Bridge Loans outstanding on the date of conversion. In addition, in this instance, Ilion would be issued three year warrants to purchase 7.5 million shares of LTC common stock exercisable at \$0.15 per share and Ilion would have a first option to purchase LTC's technologies and processes if LTC sells, goes into receivership, liquidation or the like. Ilion would also have the right and option to purchase LTC's pilot plant and equipment at book value as of the date of the Merger Agreement.

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

In connection with the Bridge Loan, LTC has granted Ilion a non-exclusive worldwide license to use LTC's thin film technology and manufacturing methods solely as it relates to lithium-ion polymer batteries. Pursuant to the licensing agreement, Ilion will pay to LTC a royalty equal to the higher of one percent of the net sales price of each licensed product manufactured, sold or otherwise disposed of during the term of the licensing agreement or the rate that applies to any license agreement entered into subsequent to October 1, 1999. The funds advanced by Ilion to LTC under the Bridge Loan Financing Agreement will be deemed as an advance payment of royalty fees due under the licensing agreement. All improvements developed by LTC or Ilion during the course of the licensing agreement will be owned by Ilion. As of March 31, 2001, no royalties have been earned under this agreement.

At March 31, 2001, Ilion held \$4,011,000 of convertible notes convertible into 40,110,000 shares of Common Stock at a conversion price of at \$.10 (which are only convertible in the event of a default or if the Merger does not close by February 28, 2002), which would represent approximately 44% of LTC's outstanding Common Stock upon conversion. Additional notes may be issued by LTC to Ilion under the Bridge Loan convertible into shares of Common Stock at a conversion price of \$.10 per share and LTC may issue to Ilion warrants to purchase 7,500,000 shares of LTC Common Stock exercisable at \$0.15 per share. The notes will not be converted into LTC Common Stock and the warrants will not be issued to Ilion if the Merger is completed. The percentage ownership of LTC that Ilion will own if there is a default under the Bridge Loan or in the event the Merger is not closed will depend on the amount of funds advanced by Ilion to LTC.

Until the closing of the Merger, LTC and Ilion are working together in leveraging their combined vertical integration capabilities and patented/proprietary technologies encompassing: (1) access to lithium reserves; (2) advanced carbonate and electrode materials; (3) composite cell structures; (4) unique substrate handling manufacturing processes; (5) large battery assemblies; and (6) lithium recycling. The two companies are targeting global market opportunities involving HEV batteries, portable electronics, and stationary large battery applications. Ilion has also established joint venture manufacturing and distribution relationships with selected partners around the world. The first such joint venture, with Eldor Corporation of Italy, regarding manufacturing and distribution of lithium-ion batteries for portable electronics applications worldwide, was signed in August, 2000. In November 2000, Ilion entered into a joint venture agreement with Powercell Corporation. Pursuant to the agreement, Ilion and Powercell formed Proteus Power LLC, which is owned 75% by Ilion and 25% by Powercell, to develop and manufacture lithium-ion based energy storage devices for (1) the management and enhancement of electricity reliability and power quality (excluding devices under 50 kW), (2) the electric vehicle market (excluding HEVs) and (3) the renewable energy market, which includes wind and solar energy. LTC continues to provide technology support to Ilion in large footprint cell structures, large battery assemblies and manufacturing process scale-up for all applications.

The new combined entity is expected to have a unique position in the lithium polymer battery market, providing a proprietary vertical integration capability that would range from high grade lithium materials to reinforced composite battery structures, with low cost, high yield thin film manufacturing processes. This combination of technologies, capabilities and people - coupled with the selected joint venture partners for global manufacturing and distribution - will enable the new company to become a low cost provider of high quality and high performance

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

technologies include rapidly emerging markets for large rechargeable lithium batteries such as HEVs and stationary applications, as well as the more traditional portable electronics applications.

For a complete description of the terms of the Merger with Ilion, including Amendment No. 4 that was entered into on February 2, 2001, and the Bridge Financing provided by Ilion, see the Company's Form 10-KSB for the year ended December 31, 2000.

LTC has been unprofitable since inception, expects to incur substantial operating losses over the next few years and needs significant additional financing to continue the development and commercialization of its technology. LTC does not expect to generate any significant revenues from operations during the fiscal year ending December 31, 2001.

If the Merger with Ilion is not consummated, LTC will assess all available alternatives including the suspension of operations and possibly liquidation, auction, bankruptcy, or other measures.

LIQUIDITY, CAPITAL RESOURCES, AND FINANCIAL CONDITION

The Company has financed its operations since inception primarily with convertible debt and private placements of common stock and has raised approximately \$18.4 million, including \$4,011,000 from Ilion as of March 31, 2001.

At March 31, 2001, the Company had cash and cash equivalent of \$47,000, fixed assets of \$336,000 and other assets of \$21,000. The Company's total liabilities were \$4,652,000 consisting of accounts payable, accrued salaries, and a note payable in the amount of \$641,000 and convertible promissory notes payable to Ilion in the amount of \$4,011,000. The Company had a working capital deficit of \$594,000 on March 31, 2001 as compared to a working capital deficit of \$380,000 on December 31, 2000.

The Company's cash and cash equivalents decreased by approximately \$5,000 from December 31, 2000 to March 31, 2001. The working capital and cash decrease is attributable primarily to the decrease in bridge loan financing from Ilion.

The Company's stockholders' deficiency was \$4,248,000 at March 31, 2001, after giving effect to an accumulated deficit of \$51,931,000 which consisted of \$45,066,000 accumulated deficit during the development stage from July 21, 1989 through March 31, 2001 and \$6,865,000 accumulated deficit from prior periods. The Company expects to incur substantial operating losses as it continues its commercialization efforts.

Pursuant to the terms of a Bridge Loan, Ilion has agreed to advance working capital to the Company until the closing of the Merger. Ilion has advanced a total of \$4,011,000 through March 31, 2001, convertible into 40,110,000 shares of Company common stock at a conversion price of \$.10 per share, which would represent approximately 44% of LTC's outstanding common stock upon conversion. Ilion has agreed to advance to the Company ongoing funds required by the Company for ongoing employee, operating and administrative expenses excluding capital expenses.

In 2001, Ilion reduced the amount of funding it has been providing to LTC on a monthly basis. Ilion has indicated that it has reduced its operating expenses throughout Ilion and indicated in March 2001 that it intended to fund LTC at \$100,000 per month under the Bridge Loan Agreement. Ilion and LTC subsequently entered into discussions regarding funds required by LTC to meet its operating expenses and in April 2001 Ilion agreed to support an LTC monthly operating budget of \$150,000 and subject to Ilion's review and reconciliation of LTC's

Edgar Filing: LITHIUM TECHNOLOGY CORP - Form 10QSB

past due payables, agreed to effect payment of LTC's outstanding payables over a three month period.

14

15

During 2001, LTC has taken measures to curtail its operating and administrative expenses. If Ilion does not provide the monthly funding required by LTC or does not forward funds to meet LTC's outstanding payables, LTC will be forced to further curtail its current operations, substantially reduce the number of LTC employees, and take other measures to reduce its operating expenditures.

LTC believes that provided Ilion advances the needed working capital to LTC until the consummation of the Merger, LTC will have sufficient capital resources to meet its needs and satisfy its obligations through the date of the Merger. LTC does not currently have sufficient cash to meet all of its operating needs, pay its outstanding payables or to achieve all its development and production objectives. There can be no assurance that funding will continue to be provided by Ilion in the amounts necessary to meet all of LTC's obligations. If Ilion does not provide the needed working capital to LTC or if the Merger is not consummated, LTC will assess all available alternatives including the suspension of operations and possibly liquidation, auction, bankruptcy, or other measures.

RESULTS OF OPERATIONS

The Company had no revenues from commercial operations for the three months ended March 31, 2001 and 2000. Engineering, research and development expenses were \$417,000 for the three months ended March 31, 2001 compared to \$346,000 for the three months ended March 31, 2000. The increase of \$71,000 was due primarily to increased lab supplies and consulting expenses.

General and administrative expenses were \$250,000 for the three months ended March 31, 2001 compared to \$512,000 for the three months ended March 31, 2000. The decrease of \$262,000 was due primarily to decreased legal and accounting expenses as well as Company-wide efforts to decrease all non-essential administrative expenses.

Interest expense for the three months ended March 31, 2001 was \$1,000 (net of interest income of \$2,000), compared to \$3,000 of interest income with no interest expense for the three months ended March 31, 2000. The decrease in interest income for the comparable periods is attributable to a decrease in cash balances.

SAFE HARBOR STATEMENT

The Private Securities Litigation Reform Act of 1995 provides a "safe harbor" for certain forward-looking statements. Statements contained in this report that are not historical facts are forward-looking statements that involve risks and uncertainties that could cause actual results to differ materially from those stated in the forward-looking statements. Factors that could cause actual results to differ materially include, among others: general economic conditions, changes in laws and government regulations, fluctuations in demand for the Company's products, the consummation of the Merger with Ilion and continued financing of LTC by Ilion.
