Muni Intermediate Duration
Fund, Inc.

Semi-Annual Report
November 30, 2004

Muni Intermediate Duration Fund, Inc. seeks to provide shareholders with high current income exempt from federal income taxes by investing primarily in a portfolio of municipal obligations, the interest on which, in the opinion of bond counsel to the issuer, is exempt from federal income taxes.

This report, including the financial information herein, is transmitted to shareholders of Muni Intermediate Duration Fund, Inc. for their information. It is not a prospectus. The Fund has leveraged its Common Stock and intends to remain leveraged by issuing Preferred Stock to provide the Common Stock shareholders

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

with a potentially higher rate of return. Leverage creates risks for Common Stock shareholders, including the likelihood of greater volatility of net asset value and market price of shares of the Common Stock, and the risk that fluctuations in the short-term dividend rates of the Preferred Stock may affect the yield to Common Stock shareholders. Past performance results shown in this report should not be considered a representation of future performance. Statements and other information herein are as dated and are subject to change.

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities is available (1) without charge, upon request, by calling toll-free 1-800-MER-FUND (1-800-637-3863); (2) at www.mutualfunds.ml.com; and (3) on the Securities and Exchange Commission's Web site at <http://www.sec.gov>. Information about how the Fund voted proxies relating to securities held in the Fund's portfolio during the most recent 12-month period ended June 30 is available (1) at www.mutualfunds.ml.com; and (2) on the Securities and Exchange Commission's Web site at <http://www.sec.gov>.

Muni Intermediate Duration Fund, Inc.

The Benefits and Risks of Leveraging

Muni Intermediate Duration Fund, Inc. utilizes leveraging to seek to enhance the yield and net asset value of its Common Stock. However, these objectives cannot be achieved in all interest rate environments. To leverage, the Fund issues Preferred Stock, which pays dividends at prevailing short-term interest rates, and invests the proceeds in long-term municipal bonds. The interest earned on these investments, net of dividends to Preferred Stock, is paid to Common Stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share net asset value of the Fund's Common Stock. However, in order to benefit Common Stock shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Stock shareholders. If either of these conditions change, then the risks of leveraging will begin to outweigh the benefits.

To illustrate these concepts, assume a fund's Common Stock capitalization of \$100 million and the issuance of Preferred Stock for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are approximately 3% and

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

long-term interest rates are approximately 6%, the yield curve has a strongly positive slope. The fund pays dividends on the \$50 million of Preferred Stock based on the lower short-term interest rates. At the same time, the fund's total portfolio of \$150 million earns the income based on long-term interest rates. Of course, increases in short-term interest rates would reduce (and even eliminate) the dividends on the Common Stock.

In this case, the dividends paid to Preferred Stock shareholders are significantly lower than the income earned on the fund's long-term investments, and therefore the Common Stock shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Stock will be reduced or eliminated completely. At the same time, the market value of the fund's Common Stock (that is, its price as listed on the New York Stock Exchange) may, as a result, decline. Furthermore, if long-term interest rates rise, the Common Stock's net asset value will reflect the full decline in the price of the portfolio's investments, since the value of the fund's Preferred Stock does not fluctuate. In addition to the decline in net asset value, the market value of the fund's Common Stock may also decline.

As a part of its investment strategy, the Fund may invest in certain securities whose potential income return is inversely related to changes in a floating interest rate ("inverse floaters"). In general, income on inverse floaters will decrease when short-term interest rates increase and increase when short-term interest rates decrease. Investments in inverse floaters may be characterized as derivative securities and may subject the Fund to the risks of reduced or eliminated interest payments and losses of invested principal. In addition, inverse floaters have the effect of providing investment leverage and, as a result, the market value of such securities will generally be more volatile than that of fixed-rate, tax-exempt securities. To the extent the Fund invests in inverse floaters, the market value of the Fund's portfolio and the net asset value of the Fund's shares may also be more volatile than if the Fund did not invest in such securities. As of November 30, 2004, none of the Fund's total net assets were invested in inverse floaters.

Swap Agreements

The Fund may also invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements may be used to obtain exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom the Fund has entered into the swap will default on its obligation to pay the Fund and the risk that the Fund will not be able to meet its obligations to pay the other party to the agreement.

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

A Letter From the President

Dear Shareholder

As we ended the current reporting period, several topics weighed heavily on investors' minds. Among them were questions about economic growth, corporate earnings, interest rates and inflation, politics, the price of oil and terrorism - all issues that are worth addressing here.

While the pace of economic expansion slowed somewhat between the first and second quarters of 2004, gross domestic product reaccelerated in the third quarter and is expected to approach 4% for the year. The generally favorable economic environment has benefited American corporations, which continued to post strong earnings. Although the extraordinary results seen in 2004 are likely to moderate in 2005, solid productivity, improved revenue growth and cost discipline all point to a vital corporate sector.

In terms of inflation and interest rates, the Federal Reserve Board has signaled its confidence in the economic recovery by increasing the Federal Funds target rate five times since June 2004, from 1% to 2.25% as of the December 14 Federal Open Market Committee meeting. Inflation, for its part, has remained fairly subdued.

While the re-election of President Bush was generally viewed as business-friendly, the rising price of oil continued to be a concern for consumers and corporations. But even having exceeded \$50 per barrel recently, the situation is far from the crisis proportions we saw in the 1980s. Lastly, but importantly, terrorism and geopolitical tensions are unwelcome realities we are forced to live with today. Historically, however, the financial effects of any single event tend to be short-lived.

Amid the uncertainty, the Lehman Brothers Municipal Bond Index posted a 12-month return of +4.07% and a six-month return of +4.30% as of November 30, 2004. Long-term bond yields were volatile, but ultimately little changed, over the past year.

The key during uncertain times is to remain focused on the big picture. Investment success comes not from reacting to short-term volatility, but from maintaining a long-term perspective and adhering to the disciplines of asset allocation, diversification and rebalancing. We encourage you to work with your financial advisor to ensure these time-tested techniques are incorporated into your investment plan.

Finally, after 35 years in the asset management business, it is with great satisfaction and some nostalgia that I embark on my retirement, effective January 1, 2005. The industry has evolved significantly over the past three and a half decades, and I am privileged to have been a part of it. I wish you continued success as you pursue your investment goals and, as always, I thank you for allowing Merrill Lynch Investment Managers to be a part of your financial life.

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

Sincerely,

(Terry K. Glenn)
Terry K. Glenn
President and Director

MUNI INTERMEDIATE DURATION FUND, INC., NOVEMBER 30, 2004

A Discussion With Your Fund's Portfolio Manager

The Fund outperformed its comparable Lipper category average and was effectively able to enhance yield while preserving net asset value in a volatile interest rate environment.

Describe the recent market environment relative to municipal bonds.

Over the past six months, long-term bond yields declined as their prices, which move in the opposite direction, increased. The rise in bond prices came as somewhat of a surprise, as the economy generally continued to improve. Gross domestic product growth was recently estimated at 3.7% for the third quarter of 2004, up from 3.4% in the second quarter. However, recent improvements in domestic business activity have been offset by modest inflation measures.

For its part, the Federal Reserve Board (the Fed) raised its short-term interest rate target to 1.25% in June, the first change in more than a year. In its accompanying statement, the Fed called for a "measured" approach to interest rate increases, removing much of the earlier concern that it might embark on a dramatic series of increases. The prospect for a more moderate tightening sequence helped support higher bond prices, despite additional Fed rate increases in August, September, November and December, which raised the Federal Funds target rate to 2.25%. Long-term Treasury bond yields stood at 5% at period-end, a decline of 29 basis points (.29%) over the past six months. The 10-year Treasury note yield was 4.35%, 23 basis points lower than six months earlier.

The municipal bond market benefited from a generally supportive technical environment throughout the six-month period. Consequently, while tax-exempt bond yields followed the same pattern as their taxable counterparts, yield volatility was more subdued than in the Treasury market. Long-term revenue bond yields, as measured by the Bond Buyer Revenue Bond Index, fell 19 basis points over the six months. As reported by Municipal Market Data, AAA-rated issues maturing in 30 years saw their yields decline 26 basis points to 4.76% over the past six months, while yields on 10-year, AAA-rated issues declined 29 basis points to 3.66%.

During the period, more than \$175 billion in new long-term tax-exempt bonds was underwritten, a decline of nearly 12% versus the same six months a year ago. The declining supply trend allowed tax-exempt bond prices to register significant gains over the six months.

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

Relative to Treasury issues, long-term tax-exempt bond yield ratios have remained in the 88% - 93% range, above their recent historic average of 85% - 88%. These attractive yield ratios should continue to attract both traditional and non-traditional investors to the tax-exempt market.

How did the Fund perform during the period in light of the existing market conditions?

For the six-month period ended November 30, 2004, the Common Stock of Muni Intermediate Duration Fund, Inc. had net annualized yields of 5.67% and 6.32%, based on a period-end per share net asset value of \$15.19 and a per share market price of \$13.64, respectively, and \$.432 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +7.98%, based on a change in per share net asset value from \$14.52 to \$15.19, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, exceeded the +6.34% average return of the Lipper General Municipal Debt Funds (Leveraged) category for the six-month period. (Funds in this Lipper category invest primarily in municipal debt issues rated in the top four credit-rating categories. These funds can be leveraged via use of debt, preferred equity and/or reverse repurchase agreements.) The Fund's outperformance is attributed to our focus on enhancing yield, with credit selection driven by our team of 12 full-time credit analysts. Entering the period, the Fund was overweight in the high yield portion of the market, that being credit spreads. These issues enjoyed strong performance during the period as investors became increasingly comfortable assuming risk. Owning these higher-yielding bonds helped boost the portfolio's yield and total return as municipal credit spreads tightened. In addition, the advance refunding of two bonds in the portfolio benefited performance as these holdings realized a significant increase in their market values.

MUNI INTERMEDIATE DURATION FUND, INC., NOVEMBER 30, 2004

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock can vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

Portfolio activity during the past six months was focused on reducing the Fund's exposure to spread product - the lower-quality, higher-yielding portion of the market that had performed so well. In particular, we trimmed the Fund's exposure to credits rated BBB and below, as these securities have significantly outperformed the

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

broader market over the past 18 months. The proceeds from the sales were reinvested in the high-grade market, where we believe relative value exists.

Purchases during the period were concentrated on California and New Jersey tax-exempt bonds, both of which we found to be inexpensive on a relative basis. In California, we increased exposure by purchasing insured unified school district bonds, which have the potential to be refunded. When a bond is refunded, the price will increase significantly as the effective maturity is reduced to the first call date. In New Jersey, an increase in the supply of municipal bonds caused a temporarily weak technical market, offering us a compelling buying opportunity.

We also started to rebalance the Fund's maturity exposure during the period, moving further out on the municipal yield curve. The curve is extremely steep by historical standards, making the 15-year to 20-year segments quite expensive. The Fund had been concentrated in the 15-year to 20-year range since its inception. However, as these segments outperformed the rest of the curve, we have taken the opportunity to shift into longer maturities, favoring the 23-year to 28-year portions of the curve.

For the six-month period ended November 30, 2004, the Fund's Auction Market Preferred Stock (AMPS) had an average yield of 1.10% for Series M7, 1.09% for Series T7, 1.12% for Series W7, 1.14% for Series TH7 and 1.13% for Series F7. These attractive funding levels, in combination with the steep municipal yield curve, continued to provide a significant income benefit to the Fund's Common Stock shareholders from the leveraging of Preferred Stock. While the Fed is likely to continue raising short-term interest rates, the increases are expected to be gradual and should not have an immediate material impact on the positive advantage leverage has had on the Fund's Common Stock yield. However, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield on the Fund's Common Stock. At the end of the period, the Fund's leverage amount, due to AMPS, was 33.03% of total net assets. (For a more complete explanation of the benefits and risks of leveraging, see page 2 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

At period end, our primary focus was on maintaining the portfolio's current yield and protecting the Fund's net asset value in case of a future rise in interest rates. We expect the economy to continue to strengthen over the next several quarters, pushing interest rates slightly higher. Against this backdrop, we will continue to reduce our exposure to spread product and, within three to six months, expect to have established a neutral portfolio weighting in this area of the market.

Robert A. DiMella, CFA
Vice President and Portfolio Manager

MUNI INTERMEDIATE DURATION FUND, INC., NOVEMBER 30, 2004

Notes to Financial Statements

1. Significant Accounting Policies:

Muni Intermediate Duration Fund, Inc. (the "Fund") is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end management investment company. The Fund's financial statements are prepared in conformity with U.S. generally accepted accounting principles, which may require the use of management accruals and estimates. Actual results may differ from these estimates. These unaudited financial statements reflect all adjustments, which are, in the opinion of management necessary to present a fair statement of the results for the interim period. The Fund determines and makes available for publication the net asset value of its Common Stock on a daily basis. The Fund's Common Stock is listed on the New York Stock Exchange under the symbol MUI. The following is a summary of significant accounting policies followed by the Fund.

(a) Valuation of investments--Municipal bonds are traded primarily in the over-the-counter market and are valued at the last available bid price in the over-the-counter market or on the basis of values as obtained by a pricing service. Pricing services use valuation matrixes that incorporate both dealer-supplied valuations and valuation models. The procedures of the pricing service and its valuations are reviewed by the officers of the Fund under the general direction of the Board of Directors. Such valuations and procedures will be reviewed periodically by the Board of Directors of the Fund. Financial futures contracts and options thereon, which are traded on exchanges, are valued at their closing prices as of the close of such exchanges. Options written or purchased are valued at the last sale price in the case of exchange-traded options. In the case of options traded in the over-the-counter market, valuation is the last asked price (options written) or the last bid price (options purchased). Swap agreements are valued by quoted fair values received daily by the Fund's pricing service. Short-term investments with a remaining maturity of 60 days or less are valued at amortized cost, which approximates market value, under which method the investment is valued at cost and any premium or discount is amortized on a straight line basis to maturity. Investments in open-end investment companies are valued at their net asset value each business day. Securities and other assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors of the Fund.

(b) Derivative financial instruments--The Fund may engage in various portfolio investment strategies both to increase the return of the Fund and to hedge, or protect, its exposure to interest rate movements and movements in the securities markets. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract.

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

* Financial futures contracts--The Fund may purchase or sell financial futures contracts and options on such futures contracts. Futures contracts are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Upon entering into a contract, the Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

* Options--The Fund may write covered call options and purchase call and put options. When the Fund writes an option, an amount equal to the premium received by the Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enters into a closing transaction), the Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received).

MUNI INTERMEDIATE DURATION FUND, INC., NOVEMBER 30, 2004

Notes to Financial Statements (continued)

Written and purchased options are non-income producing investments.

* Forward interest rate swaps--The Fund may enter into forward interest rate swaps. In a forward interest rate swap, the Fund and the counterparty agree to make periodic net payments on a specified notional contract amount, commencing on a specified future effective date, unless terminated earlier. When the agreement is closed, the Fund records a realized gain or loss in an amount equal to the value of the agreement.

(c) Income taxes--It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

(d) Security transactions and investment income--Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Interest income is recognized on the accrual basis. The Fund amortizes all premiums and discounts on debt securities.

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

(e) Offering expenses--Direct expenses relating to the public offering of the Fund's Common and Preferred Stock were charged to capital at the time of issuance of the shares.

(f) Dividends and distributions--Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.

2. Investment Advisory Agreement and Transactions with Affiliates: The Fund has entered into an Investment Advisory Agreement with Fund Asset Management, L.P. ("FAM"). The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly-owned subsidiary of Merrill Lynch & Co., Inc. ("ML & Co."), which is the limited partner.

FAM is responsible for the management of the Fund's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Fund. For such services, the Fund pays a monthly fee at an annual rate of .55% of the Fund's average daily net assets, including proceeds from the issuance of Preferred Stock. FAM has contractually agreed to waive a portion of its fee during the first seven years of the Fund's operations ending July 31, 2010, as follows:

	Fee Waiver (As a Percentage of Average Daily Net Assets)
Years 1 through 5	.15%
Year 6	.10%
Year 7	.05%
Year 8 and thereafter	.00%

FAM has not agreed to waive any portion of its fee beyond July 31, 2010.

For the six months ended November 30, 2004, FAM earned fees of \$2,355,368, of which \$642,373 was waived.

For the six months ended November 30, 2004, the Fund reimbursed FAM \$9,147 for certain accounting services.

Certain officers and/or directors of the Fund are officers and/or directors of FAM, PSI, and/or ML & Co.

3. Investments:

Purchases and sales of investments, excluding short-term securities, for the six months ended November 30, 2004 were \$267,669,201 and \$289,118,722, respectively.

4. Stock Transactions:

The Fund is authorized to issue 200,000,000 shares of stock, including Preferred Stock, par value \$.10 per share, all of which were initially classified as Common Stock. The Board of Directors is authorized, however, to reclassify any unissued shares of stock

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

without approval of holders of Common Stock.

MUNI INTERMEDIATE DURATION FUND, INC., NOVEMBER 30, 2004

Notes to Financial Statements (concluded)

Common Stock

Shares issued and outstanding during the six months ended November 30, 2004 remained constant and during the period August 1, 2003 to May 31, 2004 increased by 37,975,000 from shares sold and 52,953 from reinvestment of dividends.

Preferred Stock

Auction Market Preferred Stock are redeemable shares of Preferred Stock of the Fund, with a par value of \$.10 per share and liquidation preference of \$25,000 per share, plus accrued and unpaid dividends, that entitle their holders to receive cash dividends at an annual rate that may vary for the successive dividend periods. The yield in effect at November 30, 2004 was Series M7, 1.60%; Series T7, 1.68%; Series TH7, 1.69%; Series W7, 1.55%; and Series F7, 1.70%.

Shares issued and outstanding during the six months ended November 30, 2004 remained constant and during the period August 1, 2003 to May 31, 2004 increased by 11,400 from issuance of Preferred Stock.

The Fund pays commissions to certain broker-dealers at the end of each auction at an annual rate ranging from .25% to .375%, calculated on the proceeds of each auction. For the six months ended November 30, 2004, Merrill Lynch, Pierce, Fenner & Smith Incorporated, an affiliate of FAM, earned \$327,424 as commissions.

5. Subsequent Event:

The Fund paid a tax-exempt income dividend to holders of Common Stock in the amount of \$.072000 per share on December 29, 2004 to shareholders of record on December 15, 2004.

In addition, the Fund paid to holders of Common Stock an ordinary income dividend in the amount of \$.177831 per share and a long-term capital gain dividend in the amount of \$.010072 per share on December 29, 2004 to shareholders of record on December 15, 2004.
