Fair Value Measurements - Various inputs are used in determining the fair value of investments, which are as

follows:

Level 1 - price quotations in active markets/exchanges for identical securities

Level 2 - other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are

not

active, inputs other than quoted prices that are observable for the assets or liabilities (such as

interest rates,

yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other

market-

corroborated inputs)

Level 3 - unobservable inputs based on the best information available in the circumstances, to the

extent

observable inputs are not available (including the Fund's own assumptions used in determining the

fair value of

investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated
