Company Press Release

CNOOC LIMITED TARGETED 19% YOY PRODUCTION GROWTH OFFSHORE CHINA IN 2005

(Hong Kong, February 2, 2005) - CNOOC Limited (NYSE: CEO, SEHK: 883, "CNOOC Limited" or the "Company") today announced its business strategy and development plan for 2005.

CNOOC Limited's net production volume offshore China targeted for 2005 is approximately 141-146 million BOE (barrels of oil equivalent), approximately a 19% year-on-year increase over 118-123 million BOE in 2004. Its Indonesian unit is expected to report a net entitlement volume of approximately 19 million BOE (at WTI US\$27.4/bbl).

Year 2005 will be a significant year for CNOOC Limited in terms of production growth. Sixteen projects now under development are expected to come on stream between 2005 and 2006, of which nine are expected to be completed in 2005, the largest number of wells planned for completion in a given year in the Company's history. The Company's 2005 capital budget supports the growth as capital expenditure for development activities is budgeted at approximately US\$2200 million, representing a 33% year-on-year increase. The capital expenditure for exploration activities is expected to remain at the level of approximately US\$260 million. The exploration program will focus on new exploration plays, including deepwater prospects offshore China, targeting to achieve a reserve replacement ratio of approximately 150%.

CNOOC Limited is committed to maintain its all-in production costs in the top quartile among global peers albeit recent global trend of increasing upstream cost and "over-heating" of the Chinese economy. "We will continue to maintain our competitive cost structure and take all necessary measures to ease the upward pressure," commented Yang Hua, the CFO and Senior Vice President of the Company.

The Company will further implement its natural gas strategy and be the leading gas supplier in coastal China. Expected completion of acquisition of Gorgon equity interests, together with the Tangguh acquisition and the NWS acquisition, will further secure LNG supply with natural gas production increase. The Company's grip on China's pioneer LNG projects could further strengthen its leadership in LNG imports and its dominance in coastal China natural gas market.

"CNOOC Limited's sustainable growth platform remains stable. We will continue to focus on production and reserves growth, maintaining competitive cost structure, and implementing our natural gas strategy. The management continues to be confident of the growing future of the Company," commented Mr. Fu Chengyu, Chairman and Chief Executive Officer of the Company.

Notes to Editors:

CNOOC LIMITED - BACKGROUND

Edgar Filing: CNOOC LTD - Form 6-K

1

Incorporated in Hong Kong in August 1999, CNOOC Limited (SEHK: 883; NYSE: CEO) is the dominant producer of crude oil and natural gas offshore China. It is also one of the largest independent crude oil and gas exploration and production companies in the world.

As of December 31, 2003, CNOOC Limited's net proved reserves were 2.1 billion barrels-of-oil-equivalent (BOE). Its daily production for the first half ended June 30, 2004 was 365,771 BOE (unaudited).

CNOOC Limited is currently engaged in exploration, development and production in four major areas offshore China, which cover Bohai Bay, Western South China Sea, Eastern South China Sea and East China Sea. It is also one of the largest offshore crude oil producers in Indonesia.

The Company has about 2,447 employees.

CNOOC LIMITED - Relationship with its parent company, CNOOC

CNOOC Limited, incorporated in Hong Kong, is a 70.64% held subsidiary of China National Offshore Oil Corporation ("CNOOC"). CNOOC Limited is the sole vehicle through which CNOOC carries out oil and gas exploration, development, production and selling activities offshore China and internationally.

CNOOC, the parent company, is involved in the administrative, research and services functions for the People's Republic of China's offshore petroleum industry as well as other mid- or down-stream petroleum projects.
