Name: Jacob Meldgaard

Title: Chief Executive Officer

Interim report for the first quarter 2013

In the first quarter of 2013, TORM realized a positive EBITDA of USD 36 million and a loss before tax of USD 16 million. "The seasonally strong first quarter in the product tanker segment was the best we have seen since the beginning of the financial crisis. TORM positioned itself well to take advantage of the market improvements, and we saw the positive effects of TORM's restructured time charter fleet and the cost program. Cash flow from operations after interest was positive," says CEO Jacob Meldgaard.

- EBITDA for the first quarter of 2013 was a gain of USD 36 million compared to an EBITDA of USD -7 million in the first quarter of 2012. The first quarter of 2013 had net mark-to-market non-cash adjustments of USD 0 million, compared to a positive impact of USD 11 million in the same period of 2012. The result before tax for the first quarter of 2013 was a loss of USD 16 million, compared to a loss of USD 79 million in the same period of 2012. Cash flow from operating activities after interest was positive with USD 11 million in the first quarter of 2013, compared to USD -57 million in the same period of 2012.
- In the first quarter of 2013, the product tanker freight rates were as expected at seasonally high levels. In addition to arbitrage opportunities, the unusually cold weather in North Asia and increased Australian import demand following recent refinery capacity adjustments resulted in the highest quarterly freight rates in four years. The freight rates continued to be volatile.
- The freight rates in all bulk segments started at historically low levels in the seasonally weak January. Later in the first quarter of 2013, freight rates for Panamax and Handymax increased mainly due to the South American grain season and mineral activity from the US Gulf.
- TORM's cost program has led to a 14% reduction of administration costs to USD 14 million in the first quarter of 2013, compared to USD 17 million in the same period of 2012.
- The book value of the fleet excl. assets held for sale was USD 1,923 million as of 31 March 2013. Based on broker valuations, TORM's fleet had a market value of USD 1,161 million as of 31 March 2013. In accordance with IFRS, TORM estimates the fleet's total long-term earning potential each quarter based on discounted future cash flow. The estimated value of the fleet as of 31 March 2013 supports the carrying amount.
- Net interest-bearing debt amounted to USD 1,871 million in the first quarter of 2013, compared to USD 1,868 million as at 31 December 2012.
- As of 31 March 2013, cash totaled USD 17 million and undrawn credit facilities amounted to USD 53 million. TORM has no newbuilding order book and therefore no CAPEX commitments related hereto.
- Equity amounted to USD 255 million as at 31 March 2013, equivalent to USD 0.4 per share (excluding treasury shares), giving TORM an equity ratio of 11%.
-

By 31 March 2013, TORM had covered 9% of the remaining tanker earning days in 2013 at USD/day 15,012 and 2% of the earning days in 2014 at USD/day 15,001. 61% of the remaining bulk earning days in 2013 are covered at USD/day 11,711 and 30% of the 2014 earning days at USD/day 17,513.

- For the full year 2013, TORM forecasts a total positive EBITDA of USD 80-110 million and a loss before tax of USD 100-130 million. This includes the write-down of USD 5 million from the sale of five vessels as reported in announcement no. 8 dated 22 April 2013. The forecasts are before any potential further vessel sales and impairment charges. TORM expects to remain in compliance with the financial covenants for 2013. In addition, TORM expects to be operational cash flow positive after interest payment. The uncertainties and sensitivities about freight rates and asset prices may have an effect on the Company's compliance with the financial covenants. As 17,924 earning days for 2013 are unfixed as at 31 March 2013, a change in freight rates of USD/day 1,000 will impact the profit before tax by USD 18 million.

Conference call

TORM will be hosting a conference call for financial analysts and investors at 3 pm CET today. Please dial in 10 minutes before the conference is due to start on +45 3271 4607 (from Europe) or +1 887 491 0064 (from the USA). The presentation can be downloaded from www.torm.com.

Results

The result before depreciation (EBITDA) for the first quarter of 2013 was a gain of USD 36 million, compared to a loss of USD 7 million in the same period of 2012. The first quarter of 2013 had net mark-to-market non-cash adjustments of USD 0 million, compared to a positive impact of USD 11 million in the same period of 2012. The results for the first quarter of 2013 were not impacted by sale of vessels, whereas there was a negative impact of USD 16 million from sale of vessels in the corresponding period of 2012. The result before tax for the first quarter of 2013 was a loss of USD 16 million, compared to a loss of USD 79 million in the same period of 2012.

The Tanker Division reported an operating profit of USD 15 million in the first quarter of 2013, compared to an operating loss of USD 42 million in the same period last year.

The Bulk Division had an operating loss in the first quarter of 2012 of USD 11 million, compared to an operating profit of USD 3 million in the first quarter of 2012.

Outlook and coverage

For the full year 2013, TORM forecasts a total positive EBITDA of USD 80-110 million and a loss before tax of USD 100-130 million. This includes the write-down of USD 5 million from the sale of five vessels as reported in announcement no. 8 dated 22 April 2013. The forecasts are before potential further vessel sales and impairment charges. TORM expects to remain in compliance with the financial covenants for 2013. In addition, TORM expects to be operating cash flow positive after interest payment. The uncertainties and sensitivities about freight rates and asset prices may have an effect on the Company's compliance with the financial covenants.

Forecasts for 2013	Total, USD million
EBITDA	80 to 110
Profit before tax	-100 to -130
A change in freight rates of USD/day 1,000 impacts forecasts by	USD ±18 million

As at 31 March 2013, TORM had covered 9% of the remaining earning days in 2013 in the Tanker Division at USD/day 15,012 and 61% of the remaining earning days in the Bulk Division at USD/day 11,711. The table below shows the figures for the period from 1 April to 31 December 2013. 2014 and 2015 are full year figures.

Fair value of freight rate contracts that are mark-to-market in the income statement (USD m):

Contracts not included above	0.0
Contracts included above	1.2

Note: Actual no. of days can vary from projected no. of days primarily due to vessel sales and delays of vessel deliveries. T/C-in days at fixed rate do not include effects from profit split arrangements. T/C-in days at floating rate determine rates at entry of each quarter, and then TORM will receive approx. 10% profit/loss compared to this rate.

Tanker Division

In the first quarter of 2013, the product tanker freight rates were as expected at seasonally high levels. In addition arbitrage opportunities and for instance the unusually cold weather in North Asia resulted in the highest quarterly freight rates in four years, despite high volatility.

In the West, the first quarter started positively with an open gasoline arbitrage from Europe to the US and a tight tonnage supply. The result was the highest freight rates in four years with MRs ranging between USD/day 13-25,000 on a round trip basis. The market was curbed in March as refinery maintenance in the US Gulf reduced the export of diesel and the shift to summer grade gasoline led to a draw on inventories. The weak domestic demand in Europe and the US opened up the naphtha arbitrage from Europe to the Far East leading to higher LR demand.

In the East, the MR markets started out on a high level driven by the unusually cold weather in North Asia and increased Australian import demand following recent refinery capacity adjustments. However, reduced activity and incoming tonnage drove the market back below USD/day 10,000 later in the first quarter of 2013. MR freight rates rebounded following the end of the refinery maintenance period. The refinery maintenance also affected the transport demand positively for LRs out of the Arabian Gulf and India. Furthermore, 13 LR2 vessels or approx. 10% of the fleet cleaned up from trading in the relatively weaker dirty market adding to the available tonnage supply. In the second half of the quarter, LR freight rates picked up as the above-mentioned naphtha arbitrage from West to East resulted in a higher ton-mile factor.

The global product tanker fleet grew by 1% in the first quarter of 2013, and the tonnage oversupply has been diminishing (source: Maersk Broker).

The Tanker Division was well-positioned to take advantage of the gradual market improvements and achieved LR2 spot rates of USD/day 14,245 in the first quarter of 2013, which was 32% higher than in the first quarter last year. The LR1 spot rates were at USD/day 16,796, up by 34% year-on-year, and TORM's largest segment (MR) was at USD/day 17,647, up by 23% year-on-year. The Handysize spot rates were at USD/day 15,231, up by 19% year-on-year.

The Tanker Division's operating profit for the first quarter of 2013 was USD 15 million, compared to a loss of USD 42 million in the same period of 2012. There were net mark-to-market effects of USD 0 million.

1) Spot rates = Time Charter Equivalent Earnings for all charters with less than 6 months' duration = Gross freight income less bunker, commission and port expenses.

2) TCE = Time Charter Equivalent Earnings = Gross freight income less bunker, commission and port expenses.

3) Operating expenses are related to owned vessels.

Bulk Division

The freight rates in all bulk segments started at historically low levels in the seasonally weak January. Later in the first quarter of 2013, freight rates for Panamax and Handymax increased to approx. USD/day 9,000 mainly due to the South American grain season and mineral activity from the US Gulf.

In the Atlantic spot market, the freight rates for Panamax fluctuated between USD/day 4,000 and USD/day 11,000 in the first quarter of 2013. The market improved in anticipation of the South American grain season and the port congestion in particular Brazil and Argentina, reaching up to 50-60 days. The Handymax market gradually improved to approx. USD/day 10,000 driven by petcoke and mineral cargoes from the US Gulf.

The Pacific spot market started under pressure with freight rates for Handymax vessels at USD/day 3-4,000 for round voyages as Indonesia was negatively affected by the monsoon season and logistical disruptions. The improvements in the Atlantic had positive spill-over effects on the Panamax and Handymax segments in the Pacific due to increased period charter activity.

The number of newbuilding deliveries in the first quarter of 2013 was below estimates with 31 Capesize, 79 Panamax and 72 Handymax vessels being delivered (source: Platou).

TORM's Panamax time charter equivalent (TCE) earnings in the first quarter of 2013 were USD/day 6,149 or 48% below the same period in 2012. The realized TCE earnings for Handymax during the first quarter of 2013 were USD/day 7,504, which is 41% lower than in the same period of 2012. The earnings were negatively impacted by positioning voyages that will contribute positively in the second quarter of 2013.

The Bulk Division's operating loss for the first quarter of 2013 was USD 11 million, compared to a gain of USD 3 million in the same period of 2012. Unrealized non-cash mark-to-market effects were USD 0 million in the first quarter of 2013, compared to USD 10 million in the corresponding period of 2012.

1) TCE = Time Charter Equivalent Earnings = Gross freight income less bunker, commissions and port expenses.

2) Operating expenses are related to owned vessels.

Fleet development

No sale or purchase of vessels was concluded in the first quarter of 2013, and TORM did not order any new vessels in this period. TORM's owned fleet consists of 65 product tankers and two dry bulk vessels. As of 31 March 2013, TORM has no newbuilding order book and therefore no CAPEX commitments related hereto.

TORM's operated fleet as at 31 March 2013 is shown in the table below. In addition to the 67 owned vessels, TORM had chartered-in five product tankers and eight bulk vessels on longer time charter contracts (minimum one year contracts) and 20 bulk vessels on shorter time charter contracts (less than one year contracts). Another 19 product tankers were either in pool or under commercial management with TORM.

Notes on the financial reporting

Accounting policies

The interim report for the period 1 January – 31 March 2013 is presented in accordance with IAS 34 "Interim Financial Reporting" as adopted by the EU and additional Danish disclosure requirements for interim reports of listed companies. The interim report has been prepared using the accounting policies as for the Annual Report for 2012. The accounting policies are described in more detail in the Annual Report for 2012. The interim report of the first quarter of 2013 is unaudited, in line with the normal practice.

Income statement

The gross profit for the first quarter of 2013 was USD 50 million, compared to USD 27 million for the corresponding period in 2012.

The first quarter of 2013 was not impacted by sale of vessels, compared to a loss of USD 16 million from sale of vessels for the corresponding period of 2012.

Administrative costs in the first quarter of 2013 were USD 14 million, compared to USD 17 million in the first quarter of 2012, as a result of the Company's cost program.

The result before depreciation (EBITDA) for the first quarter of 2013 was a gain of USD 36 million, compared to a loss of USD 7 million for the corresponding period of 2012.

Depreciation in the first quarter of 2013 was USD 32 million, USD 2 million lower than in the first quarter of 2012. This decrease was primarily due to fewer owned vessel than the previous year.

The primary operating result for the first quarter of 2013 was a gain of USD 4 million, compared to a loss of USD 41 million in the same quarter of 2012.

The first quarter of 2013 had net mark-to-market non-cash adjustments of USD 0 million. The first quarter of 2012 had positive mark-to-market non-cash adjustments of USD 11 million.

The first quarter of 2013 had financial expenses of USD 21 million, compared to USD 41 million in the same period of 2012 incl. extraordinary restructuring costs of USD 22 million.

The result after tax was a loss of USD 16 million in the first quarter of 2013, as against a loss of USD 79 million in the first quarter of 2012.

Assets

Total assets were down from USD 2,355 million as at 31 December 2012 to USD 2,311 million as at 31 March 2013. The book value of the fleet excl. assets held for sale was USD 1,923 million as of 31 March 2013. Based on broker valuations, TORM's fleet excl. assets held for sale had a market value of USD 1,161 million as of 31 March 2013. TORM estimates the fleet's total long-term earning potential each quarter based on future discounted cash flow in

accordance with IFRS requirements. The estimated value for the fleet as at 31 March 2013 supports the book value.

Debt

Net interest-bearing debt was USD 1,871 million as at 31 March 2013, compared to USD 1,868 million as at 31 December 2012.

As at 31 March 2012, TORM was in compliance with its financial covenants. TORM expects to remain in compliance with the financial covenants for 2013. The uncertainties and sensitivities about freight rates and asset prices may have an effect on the Company's compliance with the financial covenants.

Equity

Equity declined in the first quarter of 2013 from USD 267 million as at 31 December 2012 to USD 255 million as at 31 March 2013 primarily due to the net loss during the period. Equity as a percentage of total assets was 11% as at 31 March 2013, which is at par with 31 December 2012.

TORM held 6,711,792 treasury shares as at 31 March 2013, equivalent to 1.0% of the Company's share capital. This is the same level as of 31 December 2012.

Liquidity

As of 31 March 2013, cash totaled USD 17 million and undrawn credit facilities amounted to USD 53 million. TORM has no newbuilding order book and therefore no CAPEX commitments related hereto.

Post balance sheet events

As stated in company announcement no. 8 dated 22 April 2013, TORM has entered into an agreement to sell five MR product tankers to a company controlled by Oaktree Capital Management (Oaktree). The sale is a consequence of the specific option rights, which one bank group exercised in connection with the Restructuring Agreement (cf. announcement no. 31 dated 2 October 2012). Oaktree will place the five vessels under TORM's commercial management in a revenue sharing scheme and utilize TORM's integrated operating platform for technical management. TORM retains an upside potential through a profit split mechanism if Oaktree generates a return above a specified threshold. The five vessels will be delivered to Oaktree during 2013. The transaction leads to write-down of approximately USD 5 million which will be recognized in the financial statements in the second quarter of 2013.

As stated in company announcement no. 9 dated 24 April 2013, CFO and member of the Executive Board of TORM Roland M. Andersen has tendered his resignation. He will continue his normal duties on the Executive Board and leave the Company latest by the end of October 2013.

Please also refer to "note 6 - Post balance sheet date events".

Financial calendar

TORM's second quarter report for 2013 will be published on 15 August 2013. TORM's financial calendar can be found at www.torm.com/investor-relations.

About TORM

TORM is one of the world's leading carriers of refined oil products as well as a significant player in the dry bulk market. The Company operates a fleet of approximately 120 modern vessels in cooperation with other respected shipping companies sharing TORM's commitment to safety, environmental responsibility and customer service.

TORM was founded in 1889. The Company conducts business worldwide and is headquartered in Copenhagen, Denmark. TORM's shares are listed on NASDAQ OMX Copenhagen (ticker: TORM) and on NASDAQ in New York (ticker: TRMD). For further information, please visit www.torm.com.

Safe Harbor statements as to the future

Matters discussed in this release may constitute forward-looking statements. Forward-looking statements reflect our current views with respect to future events and financial performance and may include statements concerning plans, objectives, goals, strategies, future events or performance, and underlying assumptions and statements other than statements of historical facts. The forward-looking statements in this release are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, management's examination of historical operating trends, data contained in our records and other data available from third parties. Although TORM believes that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond our control, TORM cannot guarantee that it will achieve or accomplish these expectations, beliefs or projections.

Important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include the strength of the world economy and currencies, changes in charter hire rates and vessel values, changes in demand for "tonne miles" of oil carried by oil tankers, the effect of changes in OPEC's petroleum production levels and worldwide oil consumption and storage, changes in demand that may affect attitudes of time charterers to scheduled and unscheduled dry-docking, changes in TORM's operating expenses, including bunker prices, dry-docking and insurance costs, changes in the regulation of shipping operations, including requirements for double hull tankers or actions taken by regulatory authorities, potential liability from pending or future litigation, domestic and international political conditions, potential disruption of shipping routes due to accidents and political events or acts by terrorists.

Risks and uncertainties are further described in reports filed by TORM with the US Securities and Exchange Commission, including the TORM Annual Report on Form 20-F and its reports on Form 6-K. Forward-looking statements are based on management's current evaluation, and TORM is only under an obligation to update and change the listed expectations to the extent required by law.

Statement by the Board of Directors and Executive Management

The Board and Management have today discussed and adopted this interim report for the period 1 January – 31 March 2013.

This interim report is unaudited and was prepared in accordance with the International Financial Reporting Standards for Interim Financial Reporting, IAS 34, as adopted by the EU and additional disclosure of listed Danish companies.

We believe the accounting practices used are reasonable, and that this interim report gives a true and accurate picture of the Group's assets, debt, financial position, results and cash flow.
