The information contained in these shareholder letters represent the opinions of Van Eck Global and may differ from other persons. This information is not intended to be a forecast of future events, a guarantee of future results or investment advice. The information contained herein regarding each index has been provided by the relevant index provider. Also, unless otherwise specifically noted, any discussion of the Funds' holdings and the Funds' performance, and the views of Van Eck Global are as of June 30, 2013, and are subject to change.

MARKET VECTORS HARD ASSETS ETFs

Dear Shareholder:
Market Vectors continues to be an industry leader in offering exchange-traded funds (ETFs) for a wide range of hard assets producer stocks.
As the chart below shows, the debt levels of developed countries, in particular France, Italy, Japan and the U.S., are huge.
Source: IMF - World Economic Outlook Database. Not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue.
Hard assets, including precious metals, can provide diversification away from the long-term risk inherent in significant debt levels of developed countries.
While debt levels appear to rise inexorably, so too does our need for, and consumption of, energy ¹ .
We offer a number of energy-oriented ETFs which, by focusing, for example, on alternative fuel sources and support services, provide their shareholders with opportunities to diversify away from traditional fossil fuel production.
Market Vectors Global Alternative Energy ETF (GEX) invests in companies whose technologies are involved wit solar power, bio energy, wind power, hydro power and geothermal energy.
Market Vectors Oil Services ETF (OIH) invests in 25 of the largest U.S. listed, publicly traded oil services companies.
Market Vectors Solar Energy ETF (KWT) invests in companies principally engaged in solar power, for example, photovoltaic (PV), solar thermal and solar lighting, together with related products and services.

nMarket Vectors Unconventional Oil & Gas ETF (FRAK), based on the theme of unconventional energy production, invests in companies exploiting such fuel sources as coalbed methane (CBM), coal seam gas (CSG), shale oil, shale

gas, tight natural gas, tight oil and tight sands.

Market Vectors Uranium+Nuclear Energy ETF (NLR) invests in companies around the world engaged in the nuclear energy business.

Going forward, we will, as always, continue to seek out and evaluate the most attractive opportunities for you as a shareholder, and we encourage you to stay in touch with us through the videos, email subscriptions and podcasts available on our website (www.marketvectorsetfs.com).

MARKET VECTORS HARD ASSETS ETFs

On the following pages, you will find the performance record of each of the funds for the six-month period ending June 30, 2013. You will also find their financial statements. We value your continuing confidence in us and look forward to helping you meet your investment goals in the future.

Jan F. van Eck Trustee and President Market Vectors ETF Trust

July 30, 2013

MANAGEMENT DISCUSSION

Hard Assets Market Overview

The RogersTM-Van Eck Hard Assets Producer Index[‡](RVEIT), which includes equities of the world's largest and most prominent hard assets producers, remains the most comprehensive index in the hard assets producer space. For the six-month period ending June 30, 2013, the index returned -6.01%.

The table below shows average sector weightings within this index and the total return of each sector for the six-month period ending June 30, 2013.

RVEIT Sector Average Six
Sector Month
Weighting Total
Return

		for Period
		Ending
		June 30, 2013
Energy	41.66%	0.56%
Agriculture	31.88%	0.92%
Base/Industrial Metals	12.46%	-23.21%
Precious metals	5.99%	-46.87%
Alternatives	4.20%	7.26%
Paper & Forest Products	4.19%	8.90%

Source: Van Eck Global; FactSet; S-Network Global Indexes, LLC. Past performance is no guarantee of future results; current performance may be lower or higher than the performance data quoted.

All sectors - except for metals (both base/industrial and precious) - had positive returns over the half year. The two largest sectors by average weight, energy and agriculture, respectively, which together accounted for nearly three quarters of the index, both had positive returns. Despite their significantly smaller aggregate average weighting, the underperformance in the two metals sectors alone, led, in particular, by both steel and gold companies, took the performance of the index into negative territory.

Just over half of the suite of twelve Market Vectors Hard Assets ETFs posted negative total returns during the six-month period, while the Market Vectors Global Alternative Energy ETF and the Market Vectors Solar Energy ETF posted very strong performances. However, both the Market Vectors Gold Miners ETF and the Market Vectors Junior Gold Miners ETF posted significant negative total returns during the period.

Source: Van Eck Global. Past performance is no guarantee of future results; current performance may be lower or higher than the performance data quoted.

Agribusiness

The sector's weak performance was driven, in large part, by the vicissitudes of the weather. While food product companies led contribution to performance in the sector, their positive contribution was more than offset by the poor performance of chemical companies engaged in agribusiness. Geographically, the most positive contributions to returns came from the United States and Japan, while the most negative came from Canada, Germany and Chile.

Coal

Coal stocks continued to decline in the first half of 2013, not least because of both environmental concerns and the substitution of natural gas for coal as a fuel in the United States, and reduced growth estimates for China². In the first quarter of 2013 alone, at 245.1 million short tons, coal production in the United States was 8.0% lower than it was in the comparable period last year³. And, indeed, the two countries contributing most to the sector's poor performance were the United States and China.

Global Alternative Energy

Global alternative energy stocks performed strongly in the first half of 2013, with a major contribution to overall performance from companies in the semiconductor and semiconductor equipment industry. The greatest contribution came from companies in the United States with by far the largest average weighting in the segment. But there was also a useful contribution from companies in Denmark. From a total return perspective, small-cap companies in the sectors performed particularly well.

Gold Miners

The first six months of 2013 saw some strong reactions to news coming from the Federal Reserve⁴, concerns over costs⁵ and capital spending at the mining companies (sometimes accompanied by large writedowns⁶), and a significant

price decline in the price of gold itself over the first six months of 2013⁷. None of these helped gold stocks over the period, with junior miners affected more than their established peers. While both large and junior Canadian gold mining stocks were hard hit, junior miners in Australia also had a particularly tough first half year.

MARKET VECTORS HARD ASSETS ETFs

Oil Services

Together with energy in general, oil services stocks produced a positive return in the first half of 2013. Uncertainties in the oil market, not least from the continuing unrest in such countries as Egypt and Syria, contributed to oil's strength, with the supply side still subject to geopolitical threat.⁸ While Egypt may not produce much oil itself, the Suez Canal does pass through it, and it is also one of the most important Arab nations in the region that produces a third of the world's oil.⁹ Crude oil production in the United States increased significantly in April and May, reaching production levels not seen since 1992.¹⁰ And, in March, the U.S. Energy Information Administration was forecasting that, later in 2013, monthly domestic United States crude oil production would exceed imports for the first time since 1995.¹¹

Rare Earth and Strategic Metals

While China continues to be both the world's largest producer and consumer of rare earths, its efforts to shore up the prices for these elements through various measures, including export controls, forced consolidation in the industry and a continuing crackdown on both their illegal production and export, have, in general, not been very effective. Consequently, rare earth prices overall remained depressed during the first half of 2013. This, coupled with concerns about possible oversupply as a couple of rare earth projects started to come on stream, were among some of the reasons behind the sector's poor performance.

Hard Assets Producers

As in 2012, paper and forest products, together with alternatives, were the strongest performers on an absolute basis in the first six months of 2013. And while the energy and agriculture sectors had the highest average weightings in the index, and both provided positive total returns, taken together the performance of these four sectors was not able successfully to counterbalance the severely negative contribution to performance from both the precious and base/industrial metals sectors.

Solar Energy

As did global alternative energy stocks, solar energy stocks performed very strongly in the first six months of 2013, providing the second highest total return of any Market Vectors Hard Assets ETF for the period. In the United States, the solar market was strong. In the first quarter of 2013, the United States installed 723 megawatts¹² of solar power (a

record result for the first quarter of any year), with installations projected to reach a figure of 4.3 gigawatts in 2013¹³. Within the sector, the highest contribution to returns came from companies producing semiconductors and semiconductor equipment, with the vast majority coming from companies in the United States, and only a very small proportion coming from China. There was, however, a useful contribution to performance from Norway. In addition to having the highest average weighting in the sector, small-cap companies also made the most significant contribution to its overall performance.

Steel

Based as it is on the demand for automobiles, construction and manufacturing, the demand for steel is particularly sensitive to uncertainties over global growth, with growth in Europe and China, in particular, important factors. (China is both the largest producer and largest consumer of steel.¹⁴) In addition, excess capacity remains a major issue in the steel industry.¹⁵ The industry as a whole performed poorly in the first six months of 2013. The largest negative contribution to performance geographically came from Brazil, followed by the United States and the United Kingdom respectively.

Unconventional Oil and Gas

Unconventional energy companies performed well in the first six months of 2013, particularly those in the United States. It is estimated that 80% of wells in the United States are now non-vertical. Demand for natural gas among industrial consumers in the United States was strong in the first five months of the year, up 4.0% compared with the same period last year. Historically low natural gas prices and better economic prospects have both been contributory factors. While off the top, the price of natural gas at the end of the half remained above its level at the start of the year. Within the United States, the amount of crude oil extracted from the shale fields has increased with shale now constituting 30% of oil and 40% of natural gas production. Even though Canadian stocks constituted on average just over 18% of the fund by weight, they vastly underperformed their peers in the United States (on average over 80% of the fund by weight) during the half year, and actually provided a very small negative contribution to the fund's overall strong performance.

Uranium and Nuclear Energy

Performance in the sector in the first half of 2013 was nearly flat. While companies in Japan and France contributed positively to returns, these were largely offset by negative contributions to returns from Australia, Canada and Poland. The performance of small-cap companies was a particular drag on returns. Nuclear power is estimated to generate around 11% of the world's electricity. According to the World Nuclear Association, at the end of the half, there were 432 operable reactors, 68 under construction and 162 planned.¹⁹

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the Fund. An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made. Results reflect past performance and do not guarantee future results.

* since 8/31/07				

Index data prior to March 18, 2013 reflects that of the DAXglobal® Agribusiness Index (DXAG). From March 18, 2013 forward, the index data reflects that of the Market Vectors® Global Agribusiness Index (MVMOOTR). All Index history reflects a blend of the performance of the aforementioned Indexes AND IS

NOT INTENDED FOR ANY THIRD PARTY USE.

Commencement date for the Market Vectors Agribusiness ETF (MOO) was 8/31/07.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (8/31/07) to the first day of secondary market trading in shares of the Fund (9/5/07), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 0.55% / Net Expense Ratio 0.55%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.56% of the Fund's average daily net assets per year until at least May 1, 2014. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in cash. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Market Vectors® Global Agribusiness Index (MVMOOTR) is a modified capitalization-weighted index designed to 2track the movements of securities of companies engaged in the agriculture business that are traded on leading global exchanges.

Market Vectors® Global Agribusiness Index (MVMOOTR) is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Solactive AG to maintain and calculate MVMOOTR. Solactive AG uses its best efforts to ensure that MVMOOTR is calculated correctly. Irrespective of its obligations towards Market Vectors Index Solutions GmbH, Solactive AG has no obligation to point out errors in MVMOOTR to third parties. Market Vectors Agribusiness ETF is not sponsored, endorsed, sold or promoted by Market Vectors Index Solutions GmbH and Market Vectors Index Solutions GmbH makes no representation regarding the advisability of investing in the Fund.

During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in cash. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Ardour Global IndexSM (Extra Liquid) (AGIXLT) is a rules-based, global capitalization-weighted, float adjusted ²index intended to give investors a means of tracking the overall performance of a global universe of listed companies engaged in the alternative energy industry.

"Ardour Global Indexes^M, LLC", "ARDOUR GLOBAL INDEXI (Extra Liquid)", and "ARDOUR - XII" are service marks of Ardour Global IndexesSM, LLC and have been licensed for use by Van Eck Associates Corporation in connection with Market Vectors Global Alternative Energy ETF (GEX). Market Vectors Global Alternative Energy ETF is not sponsored, endorsed, sold or promoted by Ardour Global IndexesSM, LLC and Ardour Global IndexesSM, LLC makes no representation regarding the advisability of investing in the Fund. AGIXLT is calculated by Dow Jones Indexes. The Fund, based on the AGIXLT, is not sponsored, endorsed, sold or promoted by Dow Jones Indexes, and Dow Jones Indexes makes no representation regarding the advisability of investing in the Fund.

PERFORMANCE COMPARISON

(unaudited)

Total Return	Share Price ¹	NAV	GDM ²
Six Months	(47.21)%	(47.11)%	(46.98)%
One Year	(44.75)%	(44.73)%	(44.39)%
Five Year	(12.42)%	(12.35)%	(11.86)%
Life* (annualized)	(6.03)%	(6.02)%	(5.52)%
Life* (cumulative)	(35.78)%	(35.75)%	(33.27)%
* since 5/16/06			

Commencement date for the Market Vectors Gold Miners ETF (GDX) was 5/16/06.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (5/16/06) to the first day of secondary market trading in shares of the Fund (5/22/06), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 0.53% / Net Expense Ratio 0.53%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.53% of the Fund's average daily net assets per year until at least May 1, 2014. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

NYSE Arca Gold Miners Index (GDM) is a modified capitalization-weighted index comprised of publicly traded companies involved primarily in the mining for gold.

NYSE Arca Gold Miners Index (GDM), a trademark of NYSE Euronext or its affiliates (NYSE Euronext), is licensed for use by Van Eck Associates Corporation in connection with Market Vectors Gold Miners ETF (GDX). Market Vectors Gold Miners ETF is not sponsored, endorsed, sold or promoted by NYSE Euronext and NYSE Euronext makes no representation as to the accuracy and/or completeness of GDM or results to be obtained by any person from using GDM in connection with trading the Fund.

Life* (cumulative)	2.09 %	1.21 %	1.47	%
* since 2/14/12				

Commencement date for the Market Vectors Unconventional Oil & Gas ETF (FRAK) was 2/14/2012.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (2/14/12) to the first day of secondary market trading in shares of the Fund (2/15/12), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 1.15% / Net Expense Ratio 0.54%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.54% of the Fund's average daily net assets per year until at least May 1, 2014. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Market Vectors® Global Unconventional Oil & Gas Index (MVFRAKTR) is a rules-based, modified ²capitalization-weighted, float-adjusted index intended to track the overall performance of companies involved in the exploration, development, extraction, production and/or refining of unconventional oil and natural gas.

Market Vectors® Global Unconventional Oil & Gas Index (MVFRAKTR) is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Solactive AG to maintain and calculate MVFRAKTR. Solactive AG uses its best efforts to ensure that MVFRAKTR is calculated correctly. Irrespective of its obligations towards Market Vectors Index Solutions GmbH, Solactive AG has no obligation to point out errors in MVFRAKTR to third parties. Market Vectors Unconventional Oil & Gas ETF is not sponsored, endorsed, sold or promoted by Market Vectors Index Solutions GmbH and Market Vectors Index Solutions GmbH makes no representation regarding the advisability of investing in the Fund.

Life* (cumulative)	(54.37)	7)%	(54.3)	1)%	(54.03)	5)%
* since 8/13/07						

Commencement date for the Market Vectors Uranium+Nuclear Energy ETF (NLR) was 8/13/07.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (8/13/07) to the first day of secondary market trading in shares of the Fund (8/15/07), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 0.70% / Net Expense Ratio 0.60%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.60% of the Fund's average daily net assets per year until at least May 1, 2014. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

DAXglobal[®] Nuclear Energy Index (DXNE) is a modified capitalization-weighted index intended to track the ²movements of securities of companies engaged in the nuclear energy industry that are traded on leading global exchanges.

DAXglobal[®] Nuclear Energy Index (DXNE), a trademark of Deutsche Börse AG, is licensed for use by Van Eck Associates Corporation in connection with Market Vectors Uranium+Nuclear Energy ETF (NLR). Market Vectors Uranium+Nuclear Energy ETF is not sponsored, endorsed, sold or promoted by Deutsche Börse AG and Deutsche Börse AG makes no representation as to the accuracy and/or completeness of DXNE or results to be obtained by any person using DXNE in connection with trading the Fund.

MARKET VECTORS ETF TRUST

EXPLANATION OF EXPENSES

(unaudited)

Hypothetical \$1,000 investment at beginning of period

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, January 1, 2013 to June 30, 2013.

Actual Expenses

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period" to estimate the expenses paid on your account during the period.

Hypothetical Example for Comparison Purposes

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on your Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as program fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

During the period ended June 30, 2013, transfers of securities from Level 1 to Level 2 were \$25,350,852. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

During the period ended June 30, 2013, transfers of securities from Level 1 to Level 2 were \$2,063,999. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

Total	\$1,072,562,132	\$318,406,541	\$ 8,943,115	\$1,399,911,788

During the period ended June 30, 2013, transfers of securities from Level 1 to Level 2 were \$11,939,448 and transfers of securities from Level 2 to Level 1 were \$21,671,500. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the period ended June 30, 2013:

	Common Stoc		
	Australia	China/Hong Kong	South Africa
Balance as of December 31, 2012	\$-	\$5,795,817	\$-
Realized gain (loss)	(125,236)	_	(54,197,471)
Net change in unrealized appreciation (depreciation)	(8,813,012)	(1,804,928)	54,624,105
Purchases	2,586,686	_	61,589,943
Sales	(703,740)	_	(62,016,577)
Transfers in and/or out of level 3	12,007,518	_	_
Balance as of June 30, 2013	\$4,952,216	\$3,990,889	_

During the period ended June 30, 2013, transfers of securities from Level 3 to Level 1 were valued at \$0. These transfers resulted primarily from increased trading activity.

Total	\$80,300,624	\$65,063,960	\$ -	\$145,364,584

During the period ended June 30, 2013, transfers of securities from Level 1 to Level 2 were \$10,534,616. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

† Security fully or partially on loan. Total market value of securities on loan is \$4,023,351. Indicates a fair valued security which has not been valued utilizing an independent quote, but has been valued

pursuant to guidelines established by the Board of Trustees. The aggregate value of fair valued securities is \$40,084,716 which represents 36.7% of net assets.

Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from

Reg registration securities offered and sold outside of the United States. Such a security cannot be sold in the United S States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant

States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.

Security exempt from registration under Rule 144A of the Securities Act of 1933, as amended, or otherwise 144A restricted. These securities may be resold in transactions exempt from registration, unless otherwise noted, and the value amounted to \$370,878, or 0.3% of net assets.

During the period ended June 30, 2013, transfers of securities from Level 1 to Level 2 were \$60,053 and transfers from Level 2 to Level 1 were \$189,996. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the period ended June 30, 2013:

	Common Sto	cks
	Spain	
Balance as of December 31, 2012	\$ -	
Realized gain (loss)	230	
Net change in unrealized appreciation (depreciation)	(26,244)
Purchases	_	
Sales	(1,328)
Transfers in and/or out of level 3	27,342	
Balance as of June 30, 2013	\$ -	

Transfers from Level 2 to Level 3 resulted primarily from limited trading activity.

- (c) Not annualized
- (d) Annualized

See Notes to Financial Statements

reinvestment of any dividends and distributions at net asset value on the dividend/distributions payment date and a redemption on the last day of the period. The return does not reflect the deduction of taxes that a shareholder would pay on Fund dividends/distributions or the redemption of Fund shares.

On July 1, 2013, the Fund effected a 1 for 3 reverse share split (See Note 14). Per share data for all periods have been adjusted to reflect the split.

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

June 30, 2013 (unaudited)

Note 1–Fund Organization–Market Vectors ETF Trust (the "Trust") is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company. The Trust was incorporated in Delaware as a statutory trust on March 15, 2001. The Trust operates as a series fund, and as of June 30, 2013, offers fifty three investment portfolios, each of which represents a separate series of the Trust.

These financial statements relate only to the following investment portfolios: Agribusiness ETF, Coal ETF, Global Alternative Energy ETF, Gold Miners ETF, Junior Gold Miners ETF, Oil Services ETF, Rare Earth/Strategic Metals ETF, RVE Hard Assets Producers ETF, Solar Energy ETF, Steel ETF, Unconventional Oil & Gas ETF and Uranium+Nuclear Energy ETF (each a "Fund" and, together, the "Funds"). Each Fund was created to provide investors with the opportunity to purchase a security representing a proportionate undivided interest in a portfolio of securities consisting of substantially all of the common stocks in substantially the same weighting, in an index sponsored, licensed or managed by the NYSE Euronext, Deutsche Börse AG, Ardour Global Indexes, LLC, S-Network Global Indexes, LLC and Market Vectors Index Solutions GmbH, a wholly owned subsidiary of the Adviser.

The Funds' commencement of operations dates and their respective indices are presented below:

Fund	Commencement of Operations	Index
Agribusiness ETF	August 31, 2007	Market Vectors Global Agribusiness Index*(a)
Coal ETF	January 10, 2008	Market Vectors Global Coal Index*
Global Alternative Energy ETF	May 03, 2007	Ardour Global Index SM (Extra Liquid)
Gold Miners ETF	May 16, 2006	NYSE Arca Gold Miners Index
Junior Gold Miners ETF	November 10, 2009	Market Vectors Global Junior Gold Miners Index*
Oil Services ETF	December 20, 2011	Market Vectors US Listed Oil Services 25 Index*
Rare Earth/Strategic Metals ETF	October 27, 2010	Market Vectors Global Rare Earth/Strategic Metals Index*
RVE Hard Assets Producers ETF	August 29, 2008	Rogers TM –Van Eck Hard Assets Producers Index
Solar Energy ETF	April 21, 2008	Market Vectors Global Solar Energy Index*(b)
Steel ETF	October 10, 2006	NYSE Arca Steel Index
Unconventional Oil & Gas ETF	February 14, 2012	Market Vectors Global Unconventional Oil & Gas Index*
Uranium+Nuclear Energy ETF	August 13, 2007	DAXglobal® Nuclear Energy Index

^{*} Published by Market Vectors Index Solutions GmbH.

- (a) Prior to March 18, 2013, the index for Agribusiness ETF was DAXglobal® Agribusiness Index.
- (b) Prior to March 18, 2013, the index for Solar Energy ETF was Ardour Solar Energy Index SM.

Note 2–Significant Accounting Policies—The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The following is a summary of significant accounting policies followed by the Funds.

61

Security Valuation—The Funds value their investments in securities and other assets and liabilities carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price.

Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively A.traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, whose values may be affected by market direction or events occurring before the Funds' pricing time (4:00 p.m. Eastern Standard Time) but after the last close of the securities' primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by the Board of Trustees, considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant ADR's and futures contracts. The Funds may also fair value securities in other situations, such as, when a particular foreign market is closed but the Fund is open. Short-term obligations with

NOTES TO FINANCIAL STATEMENTS

(continued)

more than sixty days remaining to maturity are valued at market value. Short-term obligations with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at net asset value and are considered to be Level 1 in the fair value hierarchy. Forward foreign currency contracts are valued at the spot currency rate plus an amount ("points"), which reflects the differences in the interest rates between the U.S. and foreign markets and are classified as Level 2 in the fair value hierarchy. Securities for which quotations are not available are stated at fair value as determined by the Pricing Committee of Van Eck Associates Corporation (the "Adviser") appointed by the Board of Trustees. The Pricing Committee provides oversight of the Funds' valuation policies and procedures, which are approved by the Funds' Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from broker dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments for which market prices are not readily available. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of its investments on a recurring basis which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assume the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 - Quoted prices in active markets for identical securities.

Level 2 - Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 - Significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

A summary of the inputs, the levels used to value the Funds' investments, and transfers between levels are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds' Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

Federal Income Taxes—It is each Fund's policy to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

Dividends and Distributions to Shareholders—Dividends to shareholders from net investment income and distributions from net realized capital gains, if any, are declared and paid annually. Income dividends and capital gain distributions are determined in accordance with U.S. income tax regulations, which may differ from such amounts determined in accordance with GAAP.

Currency Translation—Assets and liabilities denominated in foreign currencies and commitments under foreign currency contracts are translated into U.S. dollars at the closing prices of such currencies each business day. Purchases and sales of investments are translated at the exchange rates prevailing when such investments are acquired or sold. Foreign denominated income and expenses are translated at the exchange rates prevailing when D. accrued. The portion of realized and unrealized gains and losses on investments that result from fluctuations in foreign currency exchange rates is not separately disclosed in the financial statements. Recognized gains or losses attributable to foreign currency fluctuations on foreign currency denominated assets, other than investments, and

liabilities are recorded as net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statement of Operations.

Restricted Securities—The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the **E.** securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included at the end of each Fund's Schedule of Investments.

Use of Derivative Instruments—The Funds may make investments in derivative instruments, including, but not limited to, options, futures, swaps and other derivatives relating to foreign currency transactions. A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. Derivative instruments may be privately negotiated contracts (often referred to as over-the-counter ("OTC") derivatives) or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments at specified terms on a specified date, or to exchange interest payment

F. streams or currencies based on a notional or contractual amount. Derivative instruments may involve a high degree of financial risk. The use of derivative instruments also involves the risk of loss if the Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates or currency prices. Investments in derivative instruments also include the risk of default by the counterparty, the risk that the investment may not be liquid and the risk that a small movement in the price of the underlying security or benchmark may result in a disproportionately large movement, unfavorable or favorable, in the price of the derivative instruments. The Funds held no derivative instruments during the period ended June 30, 2013.

Forward Foreign Currency Contracts—The Funds are subject to foreign currency risk in the normal course of pursuing its investment objectives. The Funds may buy and sell forward foreign currency contracts to settle purchases and sales of foreign denominated securities or to hedge foreign denominated assets. Realized gains and losses from forward foreign currency contracts, if any, are included in net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statements of Operations. The Funds may incur additional risk from investments in forward foreign currency contracts if the counterparty is unable to fulfill its obligation or there are unanticipated movements of the foreign currency relative to the U.S. dollar. The Funds held no forward foreign currency contracts during the period ended June 30, 2013.

Offsetting Assets and Liabilities—In the ordinary course of business, the Funds enter into transactions subject to enforceable master netting agreements or other similar agreements. Generally, the right of setoff in those G. agreements allows the Funds to set off any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. The Funds may pledge or receive cash and/or securities as collateral for derivative instruments and securities lending.

The following tables below present both gross and net information about the derivative instruments and securities lending transactions eligible for offset in the Statement of Assets and Liabilities, subject to master netting agreement or similar agreement, as well as financial collateral received or pledged (including cash collateral) as of June 30, 2013. Collateral is disclosed up to 100% of the net amount of market value or unrealized gain/loss for the respective financial instruments. In general, collateral received or pledged exceeds the net amount of the unrealized gain/loss. Refer to the Schedules of Investments and Statements of Assets and Liabilities for collateral received or pledged as of June 30, 2013.

Offsetting Financial Assets and Derivative Assets as of June 30, 2013:

Fund Description

		Gross Amounts of Recognized Assets	Gross Amounts Offset in the Statement of Assets and Liabilities	Net Amounts of Assets Presented in the Statement of Assets and Liabilities	Instruments and Cash	Net Amount

NOTES TO FINANCIAL STATEMENTS

(continued)

Other–Security transactions are accounted for on trade date. Transactions in certain securities may take longer than the customary settlement cycle to be completed. The counterparty is required to collateralize such trades with cash in excess of the market value of the transaction, which is held at the custodian and marked to market daily. Realized gains and losses are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recognized upon notification of the ex-dividend date. Interest income, including amortization of premiums and discounts, is accrued as earned.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.

Note 3–Investment Management and Other Agreements–The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of 0.50% of each Fund's average daily net assets (except for Oil Services ETF). The management fee rate for Oil Services ETF is 0.35%. The Adviser has agreed, at least until May 1, 2014, to voluntarily waive or limit its fees and to assume as its own expense certain expenses otherwise payable by the Funds so that each Fund's total annual operating expenses does not exceed the expense caps, excluding interest expense, trading expenses, taxes and extraordinary expenses, listed in the table below.

The current expense caps and the amounts waived by the Adviser for the period ended June 30, 2013 are as follows:

Fund	Expense Cap	Waiver of	Expenses Assumed		
	r	Management Fees	by the Adviser		
Agribusiness ETF	0.56 %	\$ -	\$ -		
Coal ETF	0.59	29,229	_		
Global Alternative Energy ETF	0.62	40,353	_		
Gold Miners ETF	0.53	5,227	_		
Junior Gold Miners ETF	0.56	_	_		
Oil Services ETF	0.35	212,164	_		
Rare Earth / Strategic Metals ETF	0.57	66,966	_		
RVE Hard Assets Producers ETF	0.49	132,091
