MARKET VECTORS INDUSTRY AND BROAD-BASED U.S. ETFs

(unaudited)

Dear Shareholder:

We are pleased to present this semi-annual report for the seven industry exchange-traded funds (ETFs) and one broad-based U.S. equity ETF of the Market Vectors ETF Trust for the six-month period ended March 31, 2014.

**Market Vectors Wide Moat ETF Continues to Grow**

In barely two years, Market Vectors Wide Moat ETF (MOAT) - launched on April 24, 2012, which seeks to track, before fees and expenses, the Morningstar® Wide Moat Focus Index<sup>SM1</sup> - has attracted \$640.2 million in assets under management (AUM), an increase of 76% over the past six months.

**Wide Moat Investing: An Impressive Batting Average**

Batting average is a measure of outperformance versus a benchmark over different time periods. When applied to investing, it indicates how often an investment strategy has outperformed a benchmark through various periods of time. The Morningstar® Wide Moat Focus Index<sup>SM</sup> features an impressive batting average measured against the S&P 500® Index<sup>2</sup>, particularly over long-term holding periods. In other words, the Wide Moat Index outperformed the S&P over 71% of the time if held for a year.

Source: Morningstar, FactSet. Batting Average is measured by dividing the number of periods a portfolio or investment strategy outperforms a benchmark by the total number of periods.

Not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue. Past performance is no guarantee of future results; current performance may be lower or higher than the performance data quoted. Index performance is not illustrative of fund performance. Investors cannot invest directly in an Index.

Wide Moat investing continues to provide core, long-term strategic access to the broad U.S. equities market. As we speak with investors, we continue to emphasize the long-term, rather than short-term, potential of Wide Moat investing as illustrated by its batting average.

1

MARKET VECTORS INDUSTRY AND BROAD-BASED U.S. ETFs

To subscribe to monthly updates on MOAT and for more information on Morningstar's approach, please visit our Wide Moat page at [www.vaneck.com/special/moat](http://www.vaneck.com/special/moat). We also offer quarterly MOAT conference calls.

We will, as always, continue to seek out and evaluate the most attractive opportunities for you as a shareholder. We encourage you stay in touch with us through the videos, email subscriptions, and blogs available on our website ([www.vaneck.com](http://www.vaneck.com)). And should you have any questions, please contact us at 1.888.MKT.VCTR or visit [www.marketvectorsetfs.com](http://www.marketvectorsetfs.com).

Thank you for participating in the Market Vectors ETF Trust. On the following pages, you will find the performance record of each of the funds for the six months ended March 31, 2014. You will also find their financial statements. We value your continuing confidence in us and look forward to helping you meet your investment goals in future.

*Jan F. van Eck  
Trustee and President  
Market Vectors ETF Trust*

*April 14, 2014*

Represents the opinions of the investment adviser. Past performance is no guarantee of future results. Not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue.

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the Fund. An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made. Results reflect past performance and do not guarantee future results.

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

The Morningstar® Wide Moat Focus Index<sup>SM</sup> is a rules-based, equal-weighted index intended to offer exposure to the 20 most attractively priced companies with sustainable competitive advantages according to Morningstar's equity research team. Prior to April 24, 2012, Market Vectors Wide Moat ETF had no operating history.

<sup>2</sup>The S&P 500® Index consists of 500 widely held common stocks covering industrial, utility, financial, and transportation sectors.

2

**Management Discussion** (unaudited)

The entire suite of eight Market Vectors Industry and Broad-Based U.S. ETFs realized positive performance in the six months ended March 31, 2014. The Market Vectors Pharmaceutical ETF posted an impressive total return of 22.87%, with the Market Vectors Semiconductor ETF not far behind providing a total return of 16.13%. Both funds outperformed the S&P 500® Index's 12.51% gain over the same period.

Source: Van Eck Global. Returns based on NAV. The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Funds reflects temporary waivers of expenses and/or fees. Had the Funds incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the Funds will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than performance data quoted.

**Broad-Based U.S. ETF**

*Wide Moat*

For the period, Market Vectors Wide Moat ETF underperformed the S&P 500 by 3.49%. This underperformance was driven substantially by its exposure to Weight Watchers International, Inc., which was deprived of any "moat" rating, dropped from the index and removed from the portfolio just before the end of the first quarter of 2014. Top contributing sectors were health care and financials. In the former, Allergan, Inc. (sold by end of period), Eli Lilly and Company (sold by end of period), and Intuitive Surgical, Inc. (sold by end of period) all contributed strongly to the sector's performance. In the latter, The Bank of New York Mellon Corp. (sold by end of period) and Franklin Resources, Inc. (5.1% of Fund net assets) were the top performers in the sector. Apart from Weight Watchers International, Inc. (sold by end of period), the top detractors from Fund performance for the period were Kinder Morgan, Inc. (sold by end of period), C.H. Robinson Worldwide, Inc. (4.9% of Fund net assets), and Western Union Company (4.8% of Fund net assets).

MARKET VECTORS INDUSTRY AND BROAD-BASED U.S. ETFs

**Industry ETFs**

*Bank and Brokerage*

In December 2013, the Federal Reserve (the “Fed”) announced the start of its “taper” program with a reduction of \$10 billion in its monthly bond purchases. And, on March 19, 2014, while it announced the third such reduction of \$10 billion, it did reconfirm its commitment to low interest rates.<sup>1</sup> The continuation of historically low interest rates over the last six months has continued to be a boon for both bank and brokerage stocks, although some of the larger U.S. banks are still failing to clear the hurdles of the Fed’s “stress tests” U.S. companies made the largest contribution to the Fund’s performance. While contributions to return from Germany, Japan and the U.K. all detracted from performance, overall contributions to return from all the other six countries were positive.

*Biotech*

As the six month period drew to a close, biotech stocks took a severe hit in the market, not least on the back of Gilead Sciences, Inc. (12.0% of Fund net assets) being asked by Democrats in the U.S. House of Representatives to explain the pricing (\$84,000) of its new hepatitis C treatment drug Sovaldi<sup>3</sup>. However, the Fund posted a total return for the entire period of nearly 10%. U.S. companies contributed by far the most to total return, but there were small contributions from both Ireland and the Netherlands. Illumina, Inc. (4.4% of Fund net assets), Gilead Sciences, Inc. (12.0% of Fund net assets) and Biogen Idec Inc. (8.9% of Fund net assets) all made significant contributions to the Fund’s overall performance.

*Environmental Services*

Environmental services companies have benefited historically from both overall economic growth and that of both the home-building and construction industries. Now, in addition, consumer preferences regarding environmental and sustainability issues, social awareness and both regulation and legislation<sup>4</sup> are being seen as creating potential opportunities for the industry. While U.S. stocks accounted for the majority of the Fund’s total return, a sizeable proportion of it also came from French company Veolia Environnement SA (9.9% of Fund net assets), with the single Canadian stock in the Fund making only a very small negative contribution to overall return. Small-cap companies made the greatest contribution to the Fund’s total return.

*Gaming*

The gaming industry continues to enjoy strong performance both in the U.S. and abroad. In 2013, gross winnings (total “take” less payouts and excluding expenses) were around \$440 billion. Although gaming is global, and the two centers of Las Vegas to Macau dominate the industry, Macau, the only place in China to gamble legally, now dwarfs Las Vegas. In 2013, Macau’s gambling revenue was some \$45 billion<sup>6</sup>, in contrast to \$6.5 billion<sup>7</sup> for Las Vegas. In February 2014 alone, Macau’s gaming revenue was \$4.8 billion<sup>8</sup>. Stocks from the U.S. and Hong Kong (gaming companies in Macau) were, by far, the most significant contributors to the Fund’s overall performance.

#### *Pharmaceutical*

Despite continuing discussion, inside and outside the industry, about both viable future business models and markets<sup>9</sup>, the pharmaceutical industry performed well in the first six months of the Fund’s financial year. This led the Fund to post a notable total return for the period of 22.87%. All countries contributed positively, with the U.S. contributing most substantially to the Fund’s overall performance. In the coming few years, as a number of blockbuster drugs come off patent, and the ways are opened to generics<sup>10</sup>, the industry may start to face some interesting challenges.

*Retail*

The six-month period ended March 31, 2014 brought with it positive performance and the Fund returned a creditable 8.41%. Although consumer spending was volatile<sup>11</sup> during the year, the U.S. retail industry saw sales rise 3.7%<sup>12</sup> in 2013. Consumer confidence (as measured by Conference Board Consumer Confidence Index<sup>®</sup>), rose, with ups and downs, from 79.7<sup>13</sup> to 82.3<sup>14</sup>, over the course of the period. And, despite the severe winter weather, retail sales rebounded in February, recording an uptick of approximately 0.2%<sup>15</sup>. While retail drug stores and health care distributors made by far the greatest contributions to total return, automotive, internet and home improvement retail all also contributed positive small percentages to the Fund's overall performance.

*Semiconductor*

The global semiconductor industry continued to return market-beating performance in 2013. Sales exceeded \$300 billion for the first time ever<sup>16</sup>, with memory, in particular, dynamic random-access memory (DRAM), leading growth<sup>17</sup>. While revenue growth leveled off in the fourth quarter of the year<sup>18</sup>, a worldwide sales figure of \$26.3 billion<sup>19</sup> was recorded for January 2014 alone, an 8.8% increase from January 2013. Although contributing the most to the Fund's total return, the industry's strong positive performance over the period was not restricted to the U.S., with stocks from Taiwan, Singapore and the U.K., in that order, all making positive contributions.

† All Fund assets referenced are Total Net Assets as of March 31, 2014.

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, associated with an investment in the Fund. An index's performance is not illustrative of the Fund's performance. Indices are to be made.

## BANK AND BROKERAGE ETF (RKH)

## PERFORMANCE COMPARISON

March 31, 2014 (unaudited)

Total Return	Share Price <sup>1</sup>	NAV	MVRKHTR <sup>2</sup>
Six Months	7.01 %	8.66 %	8.58 %
One Year	19.62 %	21.18 %	20.90 %
Life* (annualized)	25.68 %	25.85 %	25.52 %
Life* (cumulative)	68.37 %	68.88 %	67.90 %

*\*since 12/20/11*

**Commencement date for the Market Vectors Bank and Brokerage ETF was 12/20/11.**

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, <sup>1</sup>for the period from commencement (12/20/11) to the first day of secondary market trading in shares of the Fund (12/21/11), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

**The performance data quoted represents past performance. Past performance is not a guarantee of future results.**

Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

**Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting [marketvectorsetfs.com](http://marketvectorsetfs.com).**

Gross Expense Ratio 1.14% / Net Expense Ratio 0.35%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.35% of the Fund's average daily

net assets per year until at least February 1, 2015. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Market Vectors US Listed Bank and Brokerage 25 Index (the "Index") is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Solactive to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards Market Vectors Index Solutions GmbH, Solactive AG has no obligation to point out errors in the Index to third parties. Market Vectors Bank and Brokerage ETF (the "Fund") is not sponsored, endorsed, sold or promoted by Market Vectors Index Solutions GmbH and Market Vectors Index Solutions GmbH makes no representation regarding the advisability of investing in the Fund.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Market Vectors US Listed Bank and Brokerage 25 Index (MVRKHTR) is a rules based, modified capitalization weighted, float adjusted index intended to give investors a means of tracking the overall performance of the largest<sup>2</sup> and the most liquid common stocks and depositary receipts of U.S. exchange-listed companies engaged primarily on a global basis that derive the majority of their revenues from banking, which includes a broad range of financial services such as investment banking, brokerage services and corporate lending to large institutions.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

NYSE Arca Environmental Services Index (AXENV) is a trademark of NYSE Euronext or its affiliates (NYSE Euronext), is licensed for use by Van Eck Associates Corporation. NYSE Euronext neither sponsors nor endorses the Fund and makes no representation as to the accuracy and/or completeness of AXENV or results to be obtained by any person from using the AXENV in connection with trading of the Fund.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

NYSE Arca Environmental Services Index (AXENV) is a modified equal dollar-weighted index comprised of 2 publicly traded companies that are involved in the management, removal and storage of consumer waste and industrial byproducts and related environmental services.

## GAMING ETF (BJK)

## PERFORMANCE COMPARISON

March 31, 2014 (unaudited)

<b>Total Return</b>	<b>Share Price<sup>1</sup></b>	<b>NAV</b>	<b>MVBJKTR<sup>2</sup></b>
Six Months	9.84 %	9.60 %	9.65 %
One Year	29.99 %	29.86 %	30.47 %
Five Years	30.33 %	30.30 %	30.91 %
Life* (annualized)	6.69 %	6.66 %	7.56 %
Life* (cumulative)	49.26 %	49.06 %	57.00 %

\*since 1/22/08

*Index data prior to September 24, 2012 reflects that of the S-Network Global Gaming Index (WAGRT). From September 24, 2012 forward, the index data reflects that of the Market Vectors Global Gaming Index (MVBJKTR). All Index history reflects a blend of the performance of the aforementioned Indexes AND IS NOT INTENDED FOR ANY THIRD PARTY USE.*

**Commencement date for the Market Vectors Gaming ETF was 1/22/08.**

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (1/22/08) to the first day of secondary market trading in shares of the Fund (1/24/08), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

**The performance data quoted represents past performance. Past performance is not a guarantee of future results.**

Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

**Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by**

visiting [marketvectorsetfs.com](http://marketvectorsetfs.com).

Gross Expense Ratio 0.73% / Net Expense Ratio 0.65%

Van Eck Associates Corporation (the “Adviser”) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.65% of the Fund’s average daily net assets per year until at least February 1, 2015. During such time, the expense limitation is expected to continue until the Fund’s Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in cash. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Market Vectors Global Gaming Index (the “Index”) is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Solactive AG to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards Market Vectors Index Solutions GmbH, Solactive AG has no obligation to point out errors in the Index to third parties. Market Vectors Gaming ETF (the “Fund”) is not sponsored, endorsed, sold or promoted by Market Vectors Index Solutions GmbH and Market Vectors Index Solutions GmbH makes no representation regarding the advisability of investing in the Fund.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Market Vectors Global Gaming Index (MVBKTR) is a rules based index intended to give investors a means of tracking the overall performance of the largest and most liquid companies in the global gaming industry that generate at least 50% of their revenues from casinos and hotels, sports betting (including internet gambling and racetracks) and lottery services as well as gaming services, gaming technology and gaming equipment.

MARKET VECTORS ETF TRUST

EXPLANATION OF EXPENSES

(unaudited)

**Hypothetical \$1,000 investment at beginning of period**

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, October 1, 2013 to March 31, 2014.

**Actual Expenses**

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled “Expenses Paid During the Period.”

**Hypothetical Example for Comparison Purposes**

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on your Fund’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as program fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Expenses are equal to the Fund's annualized expense ratio (for the six months ended March 31, 2014) multiplied by  
 \* the average account value over the period, multiplied by the number of days in the most recent fiscal half year  
 divided by the number of days in the fiscal year (to reflect the one-half year period).

\*\* Assumes annual return of 5% before expenses

<b>Total</b>	\$28,682,191	\$58,937,034	\$ –	\$87,619,225

During the period ended March 31, 2014, transfer of securities from Level 2 to Level 1 were \$327,479. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2) which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

(a) Commencement of operations

Total return is calculated assuming an initial investment made at the net asset value at the beginning of period,

- (b) reinvestment of any dividends and distributions at net asset value on the dividend/distributions payment date and a redemption at the net asset value on the last day of the period. The return does not reflect the deduction of taxes that a shareholder would pay on Fund dividends/distributions or the redemption of Fund shares.

(c) Not annualized

(d) Annualized

# On February 14, 2012, the Fund effected a share split as described in the Notes to Financial Statements. Per share data has been adjusted to give effect to the share split (see Note 10).

See Notes to Financial Statements

## MARKET VECTORS ETF TRUST

## NOTES TO FINANCIAL STATEMENTS

March 31, 2014 (unaudited)

**Note 1—Fund Organization**—Market Vectors ETF Trust (the “Trust”) is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company. The Trust was incorporated in Delaware as a statutory trust on March 15, 2001. The Trust operates as a series fund, and as of March 31, 2014, offers fifty-eight investment portfolios, each of which represents a separate series of the Trust.

These financial statements relate only to the following investment portfolios: Bank and Brokerage ETF, Biotech ETF, Environmental Services ETF, Gaming ETF, Pharmaceutical ETF, Retail ETF, Semiconductor ETF and Wide Moat ETF, (each a “Fund” and, together, the “Funds”). Each Fund was created to provide investors with the opportunity to purchase a security representing a proportionate undivided interest in a portfolio of securities consisting of substantially all of the common stocks in substantially the same weighting, in an index published by the NYSE Euronext, Morningstar, or Market Vectors Index Solutions GmbH, a wholly-owned subsidiary of Van Eck Associates Corporation (the “Adviser”).

The Funds’ commencement of operations dates and their respective indices are presented below:

<b>Fund</b>	<b>Commencement of Operations</b>	<b>Index</b>
Bank and Brokerage ETF	December 20, 2011	Market Vectors US Listed Bank and Brokerage 25 Index*
Biotech ETF	December 20, 2011	Market Vectors US Listed Biotech 25 Index*
Environmental Services ETF**	October 10, 2006	NYSE Arca Environmental Services Index
Gaming ETF**	January 22, 2008	Market Vectors Global Gaming Index*
Pharmaceutical ETF	December 20, 2011	Market Vectors US Listed Pharmaceutical 25 Index*
Retail ETF	December 20, 2011	Market Vectors US Listed Retail 25 Index*
Semiconductor ETF	December 20, 2011	Market Vectors US Listed Semiconductor 25 Index*
Wide Moat ETF ***	April 24, 2012	Morningstar® Wide Moat Focus Index <sup>SM</sup>

\* Published by Market Vectors Index Solutions GmbH

\*\* Effective January 1, 2012, the Fund changed its fiscal year end from December 31 to September 30.

**Note 2—Significant Accounting Policies**—The preparation of financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The following is a summary of significant accounting policies followed by the Funds.

**Security Valuation**—The Funds value their investments in securities and other assets and liabilities carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price.

Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, whose values may be affected by market direction or events occurring before the Funds' pricing time (4:00 p.m. Eastern Standard Time) but after the last close of the securities' primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by

- A. the Board of Trustees, considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant ADR's and futures contracts. The Funds may also fair value securities in other situations, such as, when a particular foreign market is closed but the Fund is open. Short-term obligations with more than sixty days remaining to maturity are valued at market value. Short-term obligations with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at net asset value and are considered to be Level 1 in the fair value hierarchy. Forward foreign currency contracts are valued at the spot currency rate plus an amount ("points"), which reflects the differences in the interest rates between the U.S. and foreign markets and are classified as Level 2 in the fair value hierarchy. Securities for which quotations are not available are stated at fair value as determined by the Pricing Committee of the Adviser appointed by the Board of Trustees. The Pricing Committee provides oversight of the Funds' valuation policies and

40

procedures, which are approved by the Funds' Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from securities dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments for which market prices are not readily available. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of its investments on a recurring basis which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assume the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 - Quoted prices in active markets for identical securities.

Level 2 - Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 - Significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

A summary of the inputs, the levels used to value the Funds' investments, and transfers between levels are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds' Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

**Federal Income Taxes**—It is each Fund's policy to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

**Dividends and Distributions to Shareholders**—Dividends to shareholders from net investment income and distributions from net realized capital gains, if any, are declared and paid annually by each Fund (except Bank and Brokerage ETF and Pharmaceutical ETF which are paid quarterly). Income dividends and capital gain distributions are determined in accordance with U.S. income tax regulations, which may differ from such amounts determined in accordance with GAAP.

D.

**Currency Translation**—Assets and liabilities denominated in foreign currencies and commitments under foreign currency contracts are translated into U.S. dollars at the closing prices of such currencies each business day. Purchases and sales of investments are translated at the exchange rates prevailing when such investments are acquired or sold. Foreign denominated income and expenses are translated at the exchange rates prevailing when accrued. The portion of realized and unrealized gains and losses on investments that result from fluctuations in foreign currency exchange rates is not separately disclosed in the financial statements. Recognized gains or losses attributable to foreign currency fluctuations on foreign currency denominated assets, other than investments, and liabilities are recorded as net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statements of Operations.

**Restricted Securities**—The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are

41

## MARKET VECTORS ETF TRUST

## NOTES TO FINANCIAL STATEMENTS

March 31, 2014 (continued) (unaudited)

registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included at the end of each Fund's Schedule of Investments.

**Repurchase Agreements**—The Funds may enter into repurchase agreements with financial institutions, deemed to be creditworthy by the Adviser, to generate income from their excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which a Fund acquires securities from a seller, subject to resale to the seller at an agreed upon price and date. A Fund, through its custodian/securities lending agent, takes possession of securities collateralizing the repurchase agreement. Pursuant to the terms of the repurchase agreement, such securities must have an aggregate market value greater than or equal to the terms of the repurchase price plus accrued interest at all times. If the value of the underlying securities falls below the value of the repurchase price plus accrued interest, the Funds will require the seller to deposit additional collateral by the next business day. If the request for additional collateral is not met, or the seller defaults on its repurchase obligation, the Funds maintain their right to sell the underlying securities at market value and may claim any resulting loss against the seller. Repurchase agreements held as of March 31, 2014 are reflected in the Schedules of Investments.

**Use of Derivative Instruments**—The Funds may make investments in derivative instruments, including, but not limited to, options, futures, swaps and other derivatives relating to foreign currency transactions. A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. Derivative instruments may be privately negotiated contracts (often referred to as over-the-counter (“OTC”) derivatives) or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount. Derivative instruments may involve a high degree of financial risk. The use of derivative instruments also involves the risk of loss if the Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates or currency prices. Investments in derivative instruments also include the risk of default by the counterparty, the risk that the investment may not be liquid and the risk that a small movement in the price of the underlying security or benchmark may result in a disproportionately large movement, unfavorable or favorable, in the price of the derivative instruments. The Funds held no derivative instruments during the period ended March 31, 2014.

**Offsetting Assets and Liabilities**—In the ordinary course of business, the Funds enter into transactions subject to enforceable master netting agreements or other similar agreements. Generally, the right of setoff in those agreements allows the Funds to set off any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. The Funds may pledge or receive cash and/or securities as collateral for derivative instruments, securities lending and repurchase agreements. For financial reporting purposes, the Funds do not offset securities lending or repurchase agreement assets and liabilities subject to enforceable master netting agreements or other similar agreements in the Statements of Assets and Liabilities. Collateral held at March 31, 2014 is presented in the Schedules of Investments.

The tables below present both gross and net information about the derivative instruments, securities lending transactions and repurchase agreements eligible for offset in the Statements of Assets and Liabilities, subject to master netting agreement or similar agreement, as well as financial collateral received or pledged (including cash

collateral and margin) as of March 31, 2014. Collateral is disclosed up to 100% of the net amount of unrealized gain/loss or market value of the respective financial instruments. In general, collateral received or pledged exceeds the net amount of the unrealized gain/loss or market value of financial instruments. Refer to the Schedules of Investments and Statements of Assets and Liabilities for collateral received or pledged as of March 31, 2014, as well as related disclosures in Note 9 (Securities Lending) and Note 2F (Repurchase Agreements).

Fund	Description	Gross		Net Amounts of Assets Presented in the Statements of Assets and Liabilities	Financial Instruments and Cash Collateral Received*	Net Amount
		Amounts Recognized Assets	Offset in the Statements of Assets and Liabilities			
Bank and Brokerage ETF	Securities Lending	\$609,835	\$ —	\$609,835	\$(609,835 )	\$ —

	Repurchase Agreements	1,130,339	—	1,130,339	(1,130,339 )	—
Semiconductor ETF	Securities Lending	5,250,341	—	5,250,341	(5,250,341 )	—
	Repurchase Agreements	5,390,006	—	5,390,006	(5,390,006 )	—

\* Gross amounts not offset in the Statements of Assets and Liabilities

**Other**—Security transactions are accounted for on trade date. Transactions in certain securities may take longer than the customary settlement cycle to be completed. The counterparty is required to collateralize such trades with cash in excess of the market value of the transaction, which is held at the custodian and marked to market daily. Realized gains and losses are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recognized upon notification of the ex-dividend date/rate. Interest income, including amortization of premiums and discounts, is accrued as earned.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.

**Note 3—Investment Management and Other Agreements**—The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of 0.35% of each Fund's average daily net assets (except for annual rates of 0.45% for Wide Moat ETF, 0.50% for Environmental Services ETF and Gaming ETF). The Adviser has agreed, at least until February 1, 2015, to voluntarily waive or limit

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

its fees and to assume as its own expense certain expenses otherwise payable by the Funds so that each Fund's total annual operating expenses does not exceed the expense caps (excluding interest expense, trading expenses, taxes and extraordinary expenses) listed in the table below.

The expense caps and the amounts waived/assumed by the Adviser for the period ended March 31, 2014, are as follows:

<b>Fund</b>	<b>Expense Cap</b>	<b>Waiver of Management Fees</b>	<b>Expenses Assumed by the Adviser</b>
Bank and Brokerage ETF	0.35 %	\$ 26,623	\$33,460
Biotech ETF	0.35	109,337	—
Environmental Services ETF	0.55	45,933	—
Gaming ETF	0.65	29,796	—
Pharmaceutical ETF	0.35	99,701	—
Retail ETF	0.35	60,687	—
Semiconductor ETF	0.35	122,255	—
Wide Moat ETF	0.49	5,691	—

In addition, Van Eck Securities Corporation, an affiliate of the Adviser, acts as the Funds' Distributor. Certain officers and a Trustee of the Trust are officers, directors or stockholders of the Adviser and Distributor.

**Note 4—Investments**—For the period ended March 31, 2014, the cost of purchases and proceeds from sales of investments other than U.S. government obligations and short-term obligations (excluding in-kind transactions described in Note 6) were as follows:

March 31, 2014 (continued) (unaudited)

<b>Fund</b>	<b>Cost of Investments Purchased</b>	<b>Proceeds from Investments Sold</b>
Bank and Brokerage ETF	\$ 1,618,232	\$ 152,234
Biotech ETF	81,807,632	41,585,250
Environmental Services ETF	1,178,919	1,965,557
Gaming ETF	16,028,281	12,655,640
Pharmaceutical ETF	41,302,759	25,647,166
Retail ETF	2,917,596	811,289
Semiconductor ETF	34,638,705	17,616,376
Wide Moat ETF	1,832,739	49,151,178

**Note 5—Income Taxes**—As of March 31, 2014, for Federal income tax purposes, the identified cost of investments owned, net unrealized appreciation (depreciation), gross unrealized appreciation, and gross unrealized depreciation of investments were as follows:

<b>Fund</b>	<b>Cost of Investments</b>	<b>Gross Unrealized Appreciation</b>	<b>Gross Unrealized Depreciation</b>	<b>Net Unrealized Appreciation (Depreciation)</b>
Bank and Brokerage ETF	\$15,057,096	\$1,575,656	\$(329,332 )	\$1,246,324
Biotech ETF	551,362,866	59,941,895	(9,888,645 )	50,053,250
Environmental Services ETF	18,985,762	2,766,401	(572,456 )	2,193,945
Gaming ETF	68,353,945	22,202,023	(2,936,743 )	19,265,280
Pharmaceutical ETF	266,455,099	48,055,525	(575,723 )	47,479,802
Retail ETF	26,149,251	353,410	(1,440,279 )	(1,086,869 )
Semiconductor ETF	341,584,783	6,595,219	(4,201,829 )	2,393,390
Wide Moat ETF	613,348,410	31,873,028	(4,131,763 )	27,741,265

The tax character of dividends paid to shareholders during the period ended September 30, 2013 was as follows:

<b>Fund</b>	<b>Ordinary Income</b>
Bank and Brokerage ETF	\$920,773

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

Biotech ETF	486,956
Environmental Services ETF	315,200
Gaming ETF	2,349,400
Pharmaceutical ETF	8,761,804
Retail ETF	695,015
Semiconductor ETF	6,734,656
Wide Moat ETF	673,200

The tax character of current year distributions will be determined at the end of the current fiscal year.

On December 22, 2010, the Regulated Investment Company Modernization Act of 2010 (the “Act”) was enacted, which changed various technical rules governing the tax treatment of regulated investment companies. The changes are generally effective for taxable years beginning after the date of enactment. One of the more prominent changes addresses capital loss carryforwards. Under the Act, each Fund will be permitted to carry forward capital losses incurred in taxable years beginning after the date of enactment for an unlimited period. However, any losses incurred during those future taxable years will be required to be utilized prior to the losses incurred in pre-enactment taxable years, which carry an expiration date. As a result of this ordering rule, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital loss carryforwards will retain their character as either short-term or long-term capital losses rather than being considered all short-term as permitted under previous regulation.

At September 30, 2013, the Funds had capital loss carryforwards available to offset future capital gains, as follows:

Fund	Post-Effective- No Expiration Long-Term Capital Losses	Post Effective- No Expiration Short-Term Capital Losses	<b>Amount Expiring</b> in the Year Ended September 30,		
			2018	2017	2016
Environmental Services ETF	\$ 567,693	\$ –	\$479,375	\$6,445,705	\$2,110,133
Retail ETF	–	1,846	–	–	–

The Funds recognize the tax benefits of uncertain tax positions only where the position is “more-likely-than-not” to be sustained assuming examination by applicable tax authorities. Management has analyzed the Funds’ tax positions, and has

concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on return filings for open tax years (tax years ended 2010-2012), or expected to be taken in the Funds' current tax year. The Funds do not have exposure for additional years that might still be open in certain foreign jurisdictions. Therefore, no provision for income tax is required in the Funds' financial statements.

The Funds recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statements of Operations. During the period ended March 31, 2014, the Funds did not incur any interest or penalties.

**Note 6—Capital Share Transactions**—As of March 31, 2014, there were an unlimited number of capital shares of beneficial interest authorized by the Trust with no par value. Shares are issued and redeemed by the Funds only in Creation Units, consisting of at least 50,000 shares, or multiples thereof. The consideration for the purchase or redemption of Creation Units of the Funds generally consists of the in-kind contribution or distribution of securities constituting the Funds' underlying index plus a small amount of cash. For the period ended March 31, 2014, the Funds had in-kind contributions and redemptions as follows:

<b>Fund</b>	<b>In-Kind Contributions</b>	<b>In-Kind Redemptions</b>
Bank and Brokerage ETF	\$—	\$1,386,140
Biotech ETF	216,027,292	149,429,093
Environmental Services ETF	2,538,984	1,968,158
Gaming ETF	27,456,477	4,551,274
Pharmaceutical ETF	51,865,093	47,213,756
Retail ETF	41,811,379	64,699,697
Semiconductor ETF	967,866,317	949,609,932
Wide Moat ETF	717,541,932	433,624,231

**Note 7—Concentration of Risk**—The investment objective of each Fund is to seek investment results that correspond generally to the price and yield performance, before fees and expenses, of its underlying index, as indicated in the name of each Fund. The Adviser uses a “passive” or index approach to achieve each Fund's investment objective by investing in a portfolio of securities that generally replicates the Funds' index. Each of the Funds is classified as a non-diversified fund under the 1940 Act. Non-diversified funds generally hold securities of fewer issuers than diversified funds and may be more susceptible to the risks associated with these particular issuers, or to a single economic, political or regulatory occurrence affecting these issuers. The Funds may purchase securities on foreign exchanges. Securities of foreign issuers involve special risks and considerations not typically associated with investing in U.S. issuers. These risks include devaluation of currencies, currency controls, less reliable information about issuers, different securities transaction clearance and settlement practices, future adverse political and economic developments and local/regional conflicts. These risks are heightened for investments in emerging market countries. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of comparable U.S. issuers.

**Note 8—Trustee Deferred Compensation Plan**—The Trust has a Deferred Compensation Plan (the “Plan”) for Trustees under which the Trustees can elect to defer receipt of their trustee fees until retirement, disability or termination from the Board of Trustees. The fees otherwise payable to the participating Trustees are deemed invested in shares of the Funds as directed by the Trustees.

The expense for the Plan is included in “Trustees’ fees and expenses” in the Statements of Operations. The liability for the Plan is shown as “Deferred Trustee fees” in the Statements of Assets and Liabilities.

**Note 9—Securities Lending**—To generate additional income, each of the Funds may lend its securities pursuant to a securities lending agreement with The Bank of New York Mellon, the securities lending agent and also the Funds’ custodian. Each Fund may lend up to 33% of its investments requiring that the loan be continuously collateralized by cash, U.S. government or U.S. government agency securities, shares of an investment trust or mutual fund, or any combination of cash and such securities at all times equal to at least 102% (105% for foreign securities) of the market value plus accrued interest on the securities loaned. During the term of the loan, the Funds will continue to receive any dividends or amounts equivalent thereto, on the securities loaned while receiving a fee from the borrower or earning interest on the investment of the cash collateral. The Funds may pay reasonable finders’, administrative and custodial fees in connection with a loan of its securities and shares the interest earned on the collateral and borrowing fees received with the securities lending agent. Securities lending income is disclosed as such in the Statements of Operations. The collateral for securities loaned is

## MARKET VECTORS ETF TRUST

## NOTES TO FINANCIAL STATEMENTS

March 31, 2014 (continued) (unaudited)

recognized in the Schedules of Investments and the Statements of Assets and Liabilities. The cash collateral is maintained on the Funds' behalf by the lending agent and is invested in the Bank of New York Overnight Government Fund, the Bank of New York Institutional Cash Reserve, or repurchase agreements collateralized by obligations of the U.S. Treasury and/or Government Agencies. Loans are subject to termination at the option of the borrower or the Funds. Upon termination of the loan, the borrower will return to the lender securities identical to the securities loaned. The Funds bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of the securities fail financially. As of March 31, 2014, the loans outstanding and the collateral received are included in value of securities on loan and collateral for securities loaned, respectively, in the Statements of Assets and Liabilities.

**Note 10—Share Split**—On January 27, 2012, the Board of Trustees of the Market Vectors ETF Trust approved a split of the shares for Bank and Brokerage ETF, Biotech ETF, Pharmaceutical ETF, and Retail ETF. The share splits took place for shareholders of record as of the close of business on February 10, 2012, and were paid on February 13, 2012. Each Fund's shares began trading on a split-adjusted basis on February 14, 2012. Biotech ETF and Retail ETF split its shares three-for-one. Bank and Brokerage ETF and Pharmaceutical ETF split its shares two-for-one.

**Note 11—Bank Line of Credit**—Certain Funds may participate in a \$200 million committed credit facility (the "Facility") to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of the Funds at the request of the shareholders and other temporary or emergency purposes. The Funds have agreed to pay commitment fees, pro rata, based on the unused but available balance. Interest is charged to the Funds at rates based on prevailing market rates in effect at the time of borrowings. During the period ended March 31, 2014, the following Funds borrowed under this Facility:

<b>Fund</b>	<b>Days Outstanding</b>	<b>Average Daily Loan Balance</b>	<b>Average Interest Rate</b>	<b>Outstanding Loan Balance as of March 31, 2014</b>
Bank and Brokerage ETF	1	\$387,932	1.48 %	\$—
Biotech ETF	90	1,379,580	1.54	—
Gaming ETF	82	259,945	1.50	315,436
Pharmaceutical ETF	164	800,861	1.54	758,015
Semiconductor ETF	82	750,549	1.54	—
Wide Moat ETF	138	850,723	1.54	1,817,736

**Note 12—Custodian Fees**—The Funds have entered into an expense offset agreement with the custodian wherein they receive a credit toward the reduction of custodian fees whenever there are uninvested cash balances. The Funds could have invested their cash balances elsewhere if they had not agreed to a reduction in fees under the expense offset agreement with the custodian. For the period ended March 31, 2014, the Funds did not have any expense offsets to reduce custodian fees.

**Note 13—Subsequent Events**—The Funds have evaluated events and transactions for potential recognition or disclosure through the date the financial statements were issued.

The following dividends from net investment income were declared and paid subsequent to March 31, 2014:

<b>Fund</b>	<b>Ex-Date</b>	<b>Record Date</b>	<b>Payable Date</b>	<b>Per Share</b>
Bank and Brokerage ETF	4/1/14	4/3/14	4/7/14	\$0.3732
Pharmaceutical ETF	4/1/14	4/3/14	4/7/14	\$0.3982

This report is intended for the Funds' shareholders. It may not be distributed to prospective investors unless it is preceded or accompanied by a Market Vectors ETF Trust (the "Trust") Prospectus and Summary Prospectus, which includes more complete information. An investor should consider the investment objective, risks, and charges and expenses of the Funds carefully before investing. The prospectus and summary prospectus contains this and other information about the investment company. Please read the prospectus and summary prospectus carefully before investing.

Additional information about the Trust's Board of Trustees/Officers and a description of the policies and procedures the Trust uses to determine how to vote proxies relating to portfolio securities are provided in the Statement of Additional Information. The Statement of Additional Information and information regarding how the Trust voted proxies relating to portfolio securities during the most recent twelve month period ending June 30 is available, without charge, by calling 1.888.MKT.VCTR, or by visiting [marketvectorsetfs.com](http://marketvectorsetfs.com), or on the Securities and Exchange Commission's website at <http://www.sec.gov>.

The Trust files its complete schedule of portfolio holdings with the Securities and Exchange Commission for the first and third quarters of each fiscal year on Form N-Q. The Trust's Form N-Qs are available on the Commission's website at <http://www.sec.gov> and may be reviewed and copied at the Commission's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling 1.202.942.8090. The Funds' complete schedules of portfolio holdings are also available by calling 1.888.MKT.VCTR or by visiting [marketvectorsetfs.com](http://marketvectorsetfs.com).

MARKET VECTORS INTERNATIONAL ETFs

(unaudited)

Dear Shareholder:

On January 21 of this year we launched our family of four quality-based exchange-traded funds (ETFs), the latest additions to our suite of Market Vectors International ETFs.

Powered by indices from MSCI, our new ETFs introduce an approach that invests in financially strong— quality —companies. While we have offered country-specific and regional equity funds for years, we have not had a broad-based solution to international and emerging markets. For us, it has been about finding the right approach, one that is very pragmatic in its selection of country and security exposure and more realistically addresses the markets in a way a rational, prudent investor might.

However, in a time when international and emerging markets are volatile, it is more important than in past years for investors to be selective in how they approach these markets. Their long-term potential is too great to ignore. But that does not mean it has to be a case of all or nothing. MSCI's methodology for defining quality screens companies that have historically provided high return on equity, strong earnings growth and maintained low debt.

Countless academic studies and articles have researched the factor of quality in investing and have identified it as a potential driver of outperformance of traditional market indexes. While there is, of course, no guarantee these companies can maintain their historical characteristics, these attributes may indicate a level of strength relative to others companies in the markets and offer a shrewd way to approach these markets.

Market Vectors MSCI International Quality ETF (QXUS) and Market Vectors MSCI Emerging Markets Quality ETF (QEM), benefit from the application of MSCI's quality screens to broad international and emerging markets.

MSCI Emerging Markets Quality Index<sup>1</sup> – Total Return since Inception

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

Source: MSCI. Not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue. Past performance is no guarantee of future results; current performance may be lower or higher than the performance data quoted. Index performance is not illustrative of fund performance. Investors cannot invest directly in an Index.

1

MARKET VECTORS INTERNATIONAL ETFs

But quality screens can also be applied for dividend-oriented strategies, as they are for Market Vectors MSCI International Quality Dividend ETF (QDXU) and Market Vectors MSCI Emerging Markets Quality Dividend ETF (QDEM). Constituents in the MSCI high dividend yield indices are quality growth companies that offer a higher dividend yield relative to their respective parent (broad market) indices and a track record of providing sustainable and consistent dividend payouts.

MSCI Emerging Markets High Dividend Yield Index<sup>2</sup> – Total Return since Inception

Source: MSCI. Not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue. Past performance is no guarantee of future results; current performance may be lower or higher than the performance data quoted. Index performance is not illustrative of fund performance. Investors cannot invest directly in an Index.

These new funds are just the four latest additions to Market Vectors' already robust group of international and emerging markets offerings. And Market Vectors continues to be an industry leader in offering both single-country and region-specific equity ETFs.

We will continue to look for further ways to enhance your access to the markets you choose and seek out the most attractive opportunities for you as a shareholder in the international space. Please stay in touch with us through our website ([www.vaneck.com](http://www.vaneck.com)) on which we offer videos, email subscriptions, blogs and educational literature, all of which are designed to keep you up to date with your investment in Market Vectors ETFs.

On the following pages, you will find the performance record of each of the funds for the period ending March 31, 2014. You will also find their financial statements. We value your continuing confidence in us and look forward to helping you meet your investment goals in the future.

*Jan F. van Eck  
Trustee and President  
Market Vectors ETF Trust*

*April 14, 2014*

Represents the opinions of the investment adviser. Past performance is no guarantee of future results. Not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue.

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the Fund. An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made. Results reflect past performance and do not guarantee future results.

The MSCI Emerging Markets Quality Index aims to capture the performance of quality growth stocks selected from the Parent Index, MSCI Emerging Markets, by identifying stocks with high-quality scores based on three main fundamental variables: high return on equity, stable year-over-year earnings growth, and low financial leverage.

The MSCI Emerging Markets High Dividend Yield Index is designed to reflect the performance of equities in the Parent Index (MSCI Emerging Markets) with dividend yields that are higher than the average dividend yield of the Parent Index that are deemed by MSCI (Index Provider) to be both sustainable and persistent. The Index also applies quality screens and reviews 12-month past performance to omit stocks with potentially deteriorating fundamentals that could force companies to cut or reduce dividends.

3

MARKET VECTORS INTERNATIONAL ETFs

**Management Discussion** (unaudited)

Despite trading for just over two months, each of the four Market Vectors MSCI Quality ETFs realized positive performance for the period from inception, January 21, 2014, to March 31, 2014. While economic recovery in Europe<sup>i</sup> continued through this period, the crisis in the Ukraine, and Russia's involvement, also continued to cast a shadow.

*MSCI Emerging Markets Quality*

South Africa was the single largest positive contributor to the Fund's total return, while Russia was the single largest detractor from performance. On a sector basis, information technology companies made the greatest positive contribution and energy companies the greatest negative contribution.

*MSCI Emerging Markets Quality Dividend*

As with the Market Vectors MSCI Emerging Markets Quality ETF, South Africa was the single largest positive contributor to the Fund's total return, while Russia was the single largest detractor from performance. Likewise, information technology companies made the greatest positive contribution and energy companies the greatest negative contribution.

*MSCI International Quality*

Switzerland was the single largest positive contributor to the Fund's total return, while once again Russia was the single largest performance detractor. On a sector basis, health care companies made the greatest positive contribution and consumer discretionary companies the greatest negative contribution.

*MSCI International Quality Dividend*

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

France was the single largest positive contributor to the Fund's total return, while the U.K. was the single largest detractor from performance. On a sector basis, energy companies made the greatest positive contribution and telecommunication services companies the greatest negative contribution.

MSCI EMERGING MARKETS QUALITY ETF (QEM)

PERFORMANCE COMPARISON

March 31, 2014 (unaudited)

Total Return	Share Price <sup>1</sup>	NAV	M1EFQU <sup>2</sup>
Life* (cumulative)	2.05%	2.89%	2.87%
<i>* since 1/21/2014</i>			

**Commencement date for the Market Vectors Emerging Markets Quality ETF was 1/21/14.**

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (1/21/14) to the first day of secondary market trading in shares of the Fund (1/24/14), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

**The performance data quoted represents past performance. Past performance is not a guarantee of future results.**

Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

**Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting [marketvectorsetfs.com](http://marketvectorsetfs.com).**

Gross Expense Ratio 3.89% / Net Expense Ratio 0.50%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.50% of the Fund's average daily net assets per year until at least February 1, 2015. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

MSCI Emerging Markets Quality Index (the “Index”) is the exclusive property and a trademark of MSCI and has been licensed for use for certain purposes by Van Eck Associates Corporation for Market Vectors Emerging Markets Quality ETF (the “Fund”) based on the Index. The Fund is not sponsored, endorsed, sold or promoted by MSCI, and MSCI makes no representation regarding the advisability of trading in the Fund.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

MSCI Emerging Markets Quality Index (M1EFQU) is modified capitalization weighted and aims to capture the performance of quality growth stocks selected from the Parent Index (MSCI Emerging Markets Index), by identifying stocks with high quality scores based on three main fundamental variables: high return on equity, stable year-over-year earnings growth and low financial leverage. The Index reweights the selected quality growth stocks from the parent index to emphasize stocks with high quality scores.

MSCI EMERGING MARKETS QUALITY DIVIDEND ETF (QDEM)

PERFORMANCE COMPARISON

March 31, 2014 (unaudited)

Total Return	Share Price <sup>1</sup>	NAV	M1EFDY <sup>2</sup>
Life* (cumulative)	1.84%	2.12%	2.35%
<i>* since 1/21/2014</i>			

**Commencement date for the Market Vectors Emerging Markets Quality Dividend ETF was 1/21/14.**

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (1/21/14) to the first day of secondary market trading in shares of the Fund (1/24/14), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

MSCI Emerging Markets High Dividend Yield Index (M1EFDY) is modified capitalization weighted and is designed to reflect the performance of equities in the Parent Index (MSCI Emerging Markets Index) with dividend yields that are higher than average dividend yield of the Parent Index that are deemed by the Index Provider to be both sustainable and persistent.

MSCI INTERNATIONAL QUALITY ETF (QXUS)

PERFORMANCE COMPARISON

March 31, 2014 (unaudited)

Total Return	<b>Share Price<sup>1</sup></b>	NAV	<b>M1WDUQU<sup>2</sup></b>
Life* (cumulative)	2.23%	2.49%	2.57%
	<i>* since 1/21/2014</i>		

**Commencement date for the Market Vectors International Quality ETF was 1/21/14.**

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (1/21/14) to the first day of secondary market trading in shares of the Fund (1/24/14), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

**The performance data quoted represents past performance. Past performance is not a guarantee of future results.**

Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

**Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting [marketvectorsetfs.com](http://marketvectorsetfs.com).**

Gross Expense Ratio 2.15% / Net Expense Ratio 0.45%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.45% of the Fund's average daily net assets per year until at least February 1, 2015. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

MSCI ACWI ex USA Quality Index (the “Index”) is the exclusive property and a trademark of MSCI and has been licensed for use for certain purposes by Van Eck Associates Corporation for Market Vectors International Quality ETF (the “Fund”) based on the Index. The Fund is not sponsored, endorsed, sold or promoted by MSCI, and MSCI makes no representation regarding the advisability of trading in the Fund.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

MSCI ACWI ex USA Quality Index (M1WDUQU) is modified capitalization and aims to capture the performance of quality growth stocks selected from the Parent Index (MSCI ASWI ex USA Quality Index) by identifying stocks<sup>2</sup> with high quality scores based on three main fundamental variables: high return on equity, stable year-over-year earnings growth and low financial leverage. The Index reweights the selected quality growth stocks from the parent index to emphasize stocks with high quality scores.

MARKET VECTORS ETF TRUST

EXPLANATION OF EXPENSES

(unaudited)

**Hypothetical \$1,000 investment at beginning of period**

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the period, October 1, 2013 to March 31, 2014, assuming the Funds commenced operations on October 1, 2013.

**Actual Expenses**

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period."

**Hypothetical Example for Comparison Purposes**

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on your Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as program fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

	Beginning Account Value October 1, 2013	Ending Account Value March 31, 2014	Annualized Expense Ratio During Period	Expenses Paid During the Period* October 1, 2013- March 31, 2014

# Indicates a fair valued security which has not been valued utilizing an independent quote, but has been valued pursuant to guidelines established by the Board of Trustees. The aggregate value of fair valued securities is \$9,262,490 which represents 90.1% of net assets.

Reg S Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. Such a security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.

144A Security exempt from registration under Rule 144A of the Securities Act of 1933, as amended, or otherwise restricted. These securities may be resold in transactions exempt from registration, unless otherwise noted, and the value amounted to \$70,175, or 0.7% of net assets.

Net investment income	0.10
Net realized and unrealized gain on investments	1.35
Total from investment operations	1.45
Net asset value, end of period	\$51.63
Total return (b)	2.89 % <sup>(c)</sup>
Ratios/Supplemental Data	
Net assets, end of period (000's)	\$5,163
Ratio of gross expenses to average net assets	3.89 % <sup>(d)</sup>
Ratio of net expenses to average net assets	0.50 % <sup>(d)</sup>
Ratio of net expenses, excluding interest expense, to average net assets	0.50 % <sup>(d)</sup>
Ratio of net investment income to average net assets	1.08 % <sup>(d)</sup>
Portfolio turnover rate	0 % <sup>(c)</sup>
	<b>MSCI Emerging Markets Quality Dividend ETF For the Period January 21, 2014 (a) through March 31, 2014</b>
Net asset value, beginning of period	\$50.08
Income from investment operations:	
Net investment income	0.14
Net realized and unrealized gain on investments	0.92
Total from investment operations	1.06
Net asset value, end of period	\$51.14
Total return (b)	2.12 % <sup>(c)</sup>

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

Ratios/Supplemental Data

Net assets, end of period (000's)	\$5,114
Ratio of gross expenses to average net assets	3.40 % <sup>(d)</sup>
Ratio of net expenses to average net assets	0.50 % <sup>(d)</sup>
Ratio of net expenses, excluding interest expense, to average net assets	0.50 % <sup>(d)</sup>
Ratio of net investment income to average net assets	1.49 % <sup>(d)</sup>
Portfolio turnover rate	0 % <sup>(c)</sup>

(a) Commencement of operations

Total return is calculated assuming an initial investment made at the net asset value at the beginning of period,

- (b) reinvestment of any dividends and distributions at net asset value on the dividend/distributions payment date and a redemption at the net asset value on the last day of the period. The return does not reflect the deduction of taxes that a shareholder would pay on Fund dividends/distributions or the redemption of Fund shares.

(c) Not annualized

(d) Annualized

## MARKET VECTORS ETF TRUST

## NOTES TO FINANCIAL STATEMENTS

March 31, 2014 (unaudited)

**Note 1–Fund Organization**–Market Vectors ETF Trust (the “Trust”) is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company. The Trust was incorporated in Delaware as a statutory trust on March 15, 2001. The Trust operates as a series fund, and as of March 31, 2014, offers fifty-eight investment portfolios, each of which represents a separate series of the Trust.

These financial statements relate only to the following investment portfolios: MSCI Emerging Markets Quality ETF, MSCI Emerging Markets Quality Dividend ETF, MSCI International Quality ETF and MSCI International Quality Dividend ETF, (each a “Fund” and, together, the “Funds”). Each Fund was created to provide investors with the opportunity to purchase a security representing a proportionate undivided interest in a portfolio of securities consisting of substantially all of the common stocks in substantially the same weighting, in an index licensed, managed and published by MSCI, Inc.

The Funds’ commencement of operations dates and their respective Indices are presented below:

Fund	Commencement of Operations	Index
MSCI Emerging Markets Quality ETF	January 21, 2014	MSCI Emerging Markets Quality Index
MSCI Emerging Markets Quality Dividend ETF	January 21, 2014	MSCI Emerging Markets High Dividend Yield Index
MSCI International Quality ETF	January 21, 2014	MSCI ACWI ex USA Quality Index
MSCI International Quality Dividend ETF	January 21, 2014	MSCI ACWI ex USA High Dividend Quality Index

**Note 2–Significant Accounting Policies**–The preparation of financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The Funds are investment companies and are following accounting and reporting requirements of Accounting Standard Codification (“ASC”) 946 *Financial Services – Investment Companies*.

The following is a summary of significant accounting policies followed by the Funds.

**Security Valuation**—The Funds value their investments in securities and other assets and liabilities carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price.

Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, whose values may be affected by market direction or events occurring before the Funds' pricing time (4:00 p.m. Eastern Standard Time) but after the last close of the securities' primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by the Board of Trustees, considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant

- A. ADR's and futures contracts. Participatory Notes are fair valued using the current market value of the underlying equity investments. The Funds may also fair value securities in other situations, such as, when a particular foreign market is closed but the Fund is open. Short-term obligations with more than sixty days remaining to maturity are valued at market value. Short-term obligations with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at net asset value and are considered to be Level 1 in the fair value hierarchy. Forward foreign currency contracts are valued at the spot currency rate plus an amount ("points"), which reflects the differences in the interest rates between the U.S. and foreign markets and are classified as Level 2 in the fair value hierarchy. Securities for which quotations are not available are stated at fair value as determined by the Pricing Committee of Van Eck Associates Corporation (the "Adviser") appointed by the Board of Trustees. The Pricing Committee provides oversight of the Funds' valuation policies and procedures, which are approved by the Funds' Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from securities, dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial

instruments for which market prices are not readily available. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of its investments on a recurring basis which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assume the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 - Quoted prices in active markets for identical securities.

Level 2 - Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 - Significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

A summary of the inputs, the levels used to value the Funds' investments, and transfers between levels are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds' Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

**Federal Income Taxes**—It is each Fund's policy to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

**C. Dividends and Distributions to Shareholders**—Dividends to shareholders from net investment income and distributions from net realized capital gains, if any, are declared and paid quarterly by each Fund. Income dividends

and capital gain distributions are determined in accordance with U.S. income tax regulations, which may differ from such amounts determined in accordance with GAAP.

**Currency Translation**—Assets and liabilities denominated in foreign currencies and commitments under foreign currency contracts are translated into U.S. dollars at the closing prices of such currencies each business day. Purchases and sales of investments are translated at the exchange rates prevailing when such investments are acquired or sold. Foreign denominated income and expenses are translated at the exchange rates prevailing when **D.** accrued. The portion of realized and unrealized gains and losses on investments that result from fluctuations in foreign currency exchange rates is not separately disclosed in the financial statements. Recognized gains or losses attributable to foreign currency fluctuations on foreign currency denominated assets, other than investments, and liabilities are recorded as net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statements of Operations.

**Restricted Securities**—The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the **E.** securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included at the end of each Fund's Schedule of Investments.

**Use of Derivative Instruments**—The Funds may make investments in derivative instruments, including, but not limited to, options, futures, swaps and other derivatives relating to foreign currency transactions. A derivative is an **F.** instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors.  
Derivative

## MARKET VECTORS ETF TRUST

## NOTES TO FINANCIAL STATEMENTS

March 31, 2014 (unaudited) (continued)

instruments may be privately negotiated contracts (often referred to as over-the-counter (“OTC”) derivatives) or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount. Derivative instruments may involve a high degree of financial risk. The use of derivative instruments also involves the risk of loss if the Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates or currency prices. Investments in derivative instruments also include the risk of default by the counterparty, the risk that the investment may not be liquid and the risk that a small movement in the price of the underlying security or benchmark may result in a disproportionately large movement, unfavorable or favorable, in the price of the derivative instruments. The Funds held no derivative instruments during the period ended March 31, 2014.

**Repurchase Agreements**—The Funds may enter into repurchase agreements with financial institutions, deemed to be creditworthy by the Adviser, to generate income from their excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which a Fund acquires securities from a seller, subject to resale to the seller at an agreed upon price and date. A Fund, through its custodian/securities lending agent, takes possession of securities collateralizing the repurchase agreement. Pursuant to the terms of the **G.** repurchase agreement, such securities must have an aggregate market value greater than or equal to the terms of the repurchase price plus accrued interest at all times. If the value of the underlying securities falls below the value of the repurchase price plus accrued interest, the Funds will require the seller to deposit additional collateral by the next business day. If the request for additional collateral is not met, or the seller defaults on its repurchase obligation, the Funds maintain their right to sell the underlying securities at market value and may claim any resulting loss against the seller. As of March 31, 2014, the Funds held no repurchase agreements.

**Participatory Notes**—The Funds may invest in Participatory Notes (“P-Notes”) issued by banks or broker-dealers and designed to offer a return linked to the performance of a particular underlying equity security or market. P-Notes **H.** can have the characteristics or take the form of various instruments, including, but not limited to, certificates or warrants. The Funds are entitled to receive any dividends paid in connection with the underlying security, however, generally do not receive voting rights.

**Other**—Security transactions are accounted for on trade date. Transactions in certain securities may take longer than the customary settlement cycle to be completed. The counterparty is required to collateralize such trades with cash in excess of the market value of the transaction, which is held at the custodian and marked to market daily. Realized **I.** gains and losses are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recognized upon notification of the ex-dividend date/rate. Interest income, including amortization of premiums and discounts, is accrued as earned.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.

**Note 3—Investment Management and Other Agreements**—The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of 0.50% from MSCI Emerging Markets Quality ETF and MSCI Emerging Markets Quality Dividend ETF's average daily net assets, and 0.45% from MSCI International Quality ETF and MSCI International Quality Dividend ETF's average daily net assets. The Adviser has agreed, at least until February 1, 2015, to voluntarily waive or limit its fees and to assume as its own expense certain expenses otherwise payable by the Funds so that each Fund's total annual operating expenses does not exceed the expense caps, excluding interest expense, listed in the table below.

The expense caps and the amounts waived/assumed by the Adviser for the period ended March 31, 2014, are as follows:

Fund	Expense Cap	Waiver of Management Fees	Expenses Assumed by the Adviser
MSCI Emerging Markets Quality ETF	0.50 %	\$4,672	\$26,997
MSCI Emerging Markets Quality Dividend ETF	0.50	4,597	22,052
MSCI International Quality ETF	0.45	8,498	23,501
MSCI International Quality Dividend ETF	0.45	4,229	21,806

In addition, Van Eck Securities Corporation, an affiliate of the Adviser, acts as the Funds' Distributor. Certain officers and a Trustee of the Trust are officers, directors or stockholders of the Adviser and Distributor.

**Note 4—Investments**—For the period ended March 31, 2014, the cost of purchases and proceeds from sales of investments other than U.S. government obligations and short-term obligations (excluding in-kind transactions described in Note 6) were as follows:

Fund	Cost of Investments Purchased	Proceeds from Investments Sold
MSCI Emerging Markets Quality ETF	\$ 5,065,468	\$16,735
MSCI Emerging Markets Quality Dividend ETF	5,047,070	14,581
MSCI International Quality ETF	10,166,336	138,785
MSCI International Quality Dividend ETF	5,198,919	61,720

**Note 5—Income Taxes**—As of March 31, 2014, for Federal income tax purposes, the identified cost of investments owned, net unrealized appreciation (depreciation), gross unrealized appreciation, and gross unrealized depreciation of investments were as follows:

Fund	Cost of Investments	Gross Unrealized Appreciation	Gross Unrealized Depreciation	Net Unrealized Appreciation (Depreciation)
MSCI Emerging Markets Quality ETF	\$ 5,048,336	\$ 267,072	\$ (144,842 )	\$ 122,230
MSCI Emerging Markets Quality Dividend ETF	5,032,198	205,971	(132,234 )	73,737
MSCI International Quality ETF	10,045,468	385,317	(234,554 )	150,763
MSCI International Quality Dividend ETF	5,136,482	162,815	(199,200 )	(36,385 )

The Funds recognize the tax benefits of uncertain tax positions only where the position is “more-likely-than-not” to be sustained assuming examination by applicable tax authorities. Management has analyzed the Funds’ tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions expected to be taken in the Funds’ current tax year. Therefore, no provision for income tax is required in the Funds’ financial statements.

The Funds recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statements of Operations. During the period ended March 31, 2014, the Funds did not incur any interest or penalties.

**Note 6—Capital Share Transactions**—As of March 31, 2014, there were an unlimited number of capital shares of beneficial interest authorized by the Trust with no par value. Shares are issued and redeemed by the Funds only in

Creation Units, consisting of at least 100,000 shares, or multiples thereof. The consideration for the purchase or redemption of Creation Units of the Funds generally consists of the in-kind contribution or distribution of securities constituting the Funds' underlying index plus a small amount of cash. For the period ended March 31, 2014, the Funds had no in-kind contributions or redemptions.

**Note 7—Concentration of Risk**—The investment objective of each Fund is to seek investment results that correspond generally to the price and yield performance, before fees and expenses, of its underlying index, as indicated in the name of each Fund. The Adviser uses a “passive” or index approach to achieve each Fund’s investment objective by investing in a portfolio of securities that generally replicates the Funds’ index. Each of the Funds is classified as a non-diversified fund under the 1940 Act. Non-diversified funds generally hold securities of fewer issuers than diversified funds and may be more susceptible to the risks associated with these particular issuers, or to a single economic, political or regulatory occurrence affecting these issuers. The Funds may purchase securities on foreign exchanges. Securities of foreign issuers involve special risks and considerations not typically associated with investing in U.S. issuers. These risks include devaluation of currencies, currency controls, less reliable information about issuers, different securities transaction clearance and settlement practices, future adverse political and economic developments and local/regional conflicts. These risks are heightened for investments in emerging market countries. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of comparable U.S. issuers.

Investments in P-Notes involve certain risks in addition to those associated with a direct investment in the underlying foreign companies or foreign securities markets whose return they seek to replicate. For instance, there can be no assurance that the trading price of a P-Note will equal the underlying value of the foreign company or foreign securities market that it seeks to replicate. P-Notes constitute direct, general and unsecured contractual obligations of the banks or broker-dealers that issue them, which therefore subject the Funds to counterparty risk. The Funds are relying on the creditworthiness of the counterparty issuing the P-Note and have no rights under a P-Note against the issuer of the underlying security.

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

March 31, 2014 (unaudited) (continued)

As a result of recent events involving Ukraine and the Russian Federation, the United States and the European Union have imposed sanctions on certain Russian individuals and companies. These sanctions do not currently impact the Funds. Additional economic sanctions may be imposed or other actions may be taken that may adversely affect the value and liquidity of the Russian-related issuers' held by the Funds.

**Note 8—Trustee Deferred Compensation Plan**—The Trust has a Deferred Compensation Plan (the “Plan”) for Trustees under which the Trustees can elect to defer receipt of their trustee fees until retirement, disability or termination from the Board of Trustees. The fees otherwise payable to the participating Trustees are deemed invested in shares of the Funds as directed by the Trustees.

The expense for the Plan, if any, is included in “Trustees’ fees and expenses” in the Statements of Operations. The liability for the Plan, if any, is shown as “Deferred Trustee fees” in the Statements of Assets and Liabilities.

**Note 9—Securities Lending**—To generate additional income, each of the Funds may lend its securities pursuant to a securities lending agreement with The Bank of New York Mellon, the securities lending agent and also the Funds’ custodian. Each Fund may lend up to 33% of its investments requiring that the loan be continuously collateralized by cash, U.S. government or U.S. government agency securities, shares of an investment trust or mutual fund, or any combination of cash and such securities at all times equal to at least 102% (105% for foreign securities) of the market value plus accrued interest on the securities loaned. During the term of the loan, the Funds will continue to receive any dividends or amounts equivalent thereto, on the securities loaned while receiving a fee from the borrower or earning interest on the investment of the cash collateral. The Funds may pay reasonable finders’, administrative and custodial fees in connection with a loan of its securities and shares the interest earned on the collateral and borrowing fees received with the securities lending agent. The cash collateral is maintained on the Funds’ behalf by the lending agent and is invested in the Bank of New York Overnight Government Fund, the Bank of New York Institutional Cash Reserve, or repurchase agreements collateralized by obligations of the U.S. Treasury and/or Government Agencies. Loans are subject to termination at the option of the borrower or the Funds. Upon termination of the loan, the borrower will return to the lender securities identical to the securities loaned. The Funds bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of the securities fail financially. As of March 31, 2014, the Funds had no securities on loan.

**Note 10—Bank Line of Credit**—Certain Funds may participate in a \$200 million committed credit facility (the “Facility”) to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of the Funds at the request of the shareholders and other temporary or emergency purposes.

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

The Funds have agreed to pay commitment fees, pro rata, based on the unused but available balance. Interest is charged to the Funds at rates based on prevailing market rates in effect at the time of borrowings. During the period ended March 31, 2014, the following Funds borrowed under this Facility:

Fund	Days Outstanding	Average Daily Loan Balance	Average Interest Rate
MSCI Emerging Markets Quality ETF	3	\$116,110	1.47 %
MSCI Emerging Markets Quality Dividend ETF	2	470,000	1.47
MSCI International Quality ETF	2	313,931	1.47
MSCI International Quality Dividend ETF	7	100,384	1.46

As of March 31, 2014, the Funds had no outstanding loan balances.

**Note 11–Custodian Fees**–The Funds have entered into an expense offset agreement with the custodian wherein they receive a credit toward the reduction of custodian fees whenever there are uninvested cash balances. The Funds could have invested their cash balances elsewhere if they had not agreed to a reduction in fees under the expense offset agreement with the custodian. For the period ended March 31, 2014, the Funds did not have any expense offsets to reduce custodian fees.

**Note 12–Subsequent Event Review**–The Funds have evaluated subsequent events and transactions for potential recognition or disclosure through the date the financial statements were issued.

The following dividends from net investment income were declared and paid subsequent to March 31, 2014:

Fund	Ex-Date	Record Date	Payable Date	Per Share
MSCI Emerging Markets Quality ETF	4/1/2014	4/3/2014	4/7/2014	\$0.1024
MSCI Emerging Markets Quality Dividend ETF	4/1/2014	4/3/2014	4/7/2014	\$0.1368
MSCI International Quality ETF	4/1/2014	4/3/2014	4/7/2014	\$0.3168
MSCI International Quality Dividend ETF	4/1/2014	4/3/2014	4/7/2014	\$0.3500

MARKET VECTORS ETF TRUST

APPROVAL OF INVESTMENT MANAGEMENT AGREEMENTS

(unaudited)

At a meeting held on September 11, 2013 (the “Meeting”), the Board of Trustees (the “Board”) of Market Vectors ETF Trust (the “Trust”), including all of the Trustees that are not interested persons of the Trust (the “Independent Trustees”), approved an investment management agreement between the Trust and Van Eck Associates Corporation (the “Adviser”) (the “Investment Management Agreement”) with respect to the MSCI Emerging Markets Quality Dividend ETF, MSCI Emerging Markets Quality ETF, MSCI International Quality Dividend ETF and MSCI International Quality ETF (each, a “Fund” and together, the “Funds”).

The Board’s approval of the Investment Management Agreement was based on a comprehensive consideration of all of the information available to the Trustees and was not the result of any single factor. Some of the factors that figured particularly in the Trustees’ deliberations and how the Trustees considered those factors are described below, although individual Trustees may have evaluated the information presented differently, giving different weights to various factors.

In advance of each of the Meeting, the Trustees received materials from the Adviser, including expense information for other funds. The Adviser provided the Trustees with information regarding, among other things, the various aspects of each Fund’s proposed investment program, fee arrangements and service provider arrangements. The Independent Trustees’ consideration of the Investment Management Agreement was based, in part, on information obtained through discussions with management of the Funds and the Adviser at the Meeting, information obtained at other meetings of the Trustees and/or based on their review of the materials provided by the Adviser, including the background and experience of the portfolio managers and others proposed to be involved in the management of the Funds. The Trustees also considered the terms and scope of services that the Adviser would provide under the Investment Management Agreement, including the Adviser’s commitment to waive certain fees and/or pay expenses of each of the Funds to the extent necessary to prevent the operating expenses of each of the Funds from exceeding agreed upon limits for a period of at least one year following the effective date of each Fund’s respective registration statement.

In addition, the Trustees were given data on the exchange-traded fund market and expense ratios of other funds. The Trustees considered the benefits, other than the fees under the Investment Management Agreement, that the Adviser would receive from serving as adviser to each Fund, including any it may receive from providing administrative services to each of the Funds and from an affiliate of the Adviser serving as distributor to each Fund. The Trustees did not consider historical information about the cost of the services provided by the Adviser or the profitability of each of the Funds to the Adviser because the Funds had not yet commenced operations. In addition, because the Funds had not yet commenced operations, the Trustees could not consider the historical performance or the quality of services previously provided to each of the Funds, although they concluded that the nature, quality, and extent of the services to be provided by the Adviser were appropriate based on the Trustees’ knowledge of the Adviser and its personnel and

the operations of the other series of the Trust.

The Independent Trustees were advised by and met in executive session with their independent counsel at the Meeting as part of their consideration of the Investment Management Agreement.

In voting to approve the Investment Management Agreement, the Trustees, including the Independent Trustees, concluded that the terms of the Investment Management Agreement are reasonable and fair in light of the services to be performed, the fees paid by certain other funds, expenses to be incurred and such other matters as the Trustees considered relevant in the exercise of their reasonable judgment. The Trustees further concluded that the Investment Management Agreement is in the interest of each Fund and such Fund's shareholders.

39

This report is intended for the Funds' shareholders. It may not be distributed to prospective investors unless it is preceded or accompanied by a Market Vectors ETF Trust (the "Trust") Prospectus and Summary Prospectus, which includes more complete information. An investor should consider the investment objective, risks, and charges and expenses of the Funds carefully before investing. The prospectus and summary prospectus contains this and other information about the investment company. Please read the prospectus and summary prospectus carefully before investing.

Additional information about the Trust's Board of Trustees/Officers and a description of the policies and procedures the Trust uses to determine how to vote proxies relating to portfolio securities are provided in the Statement of Additional Information. The Statement of Additional Information and information regarding how the Trust voted proxies relating to portfolio securities during the most recent twelve month period ending June 30 is available, without charge, by calling 1.888.MKT.VCTR, or by visiting [marketvectorsetfs.com](http://marketvectorsetfs.com), or on the Securities and Exchange Commission's website at <http://www.sec.gov>.

The Trust files its complete schedule of portfolio holdings with the Securities and Exchange Commission for the first and third quarters of each fiscal year on Form N-Q. The Trust's Form N-Qs are available on the Commission's website at <http://www.sec.gov> and may be reviewed and copied at the Commission's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling 1.202.942.8090. The Funds' complete schedules of portfolio holdings are also available by calling 1.888.MKT.VCTR or by visiting [marketvectorsetfs.com](http://marketvectorsetfs.com).
