Semi-Annual Report

This report provides management's discussion of fund performance for ACM Managed Dollar Income Fund (the "Fund") for the semi-annual reporting period ended March 31, 2004.

Investment Objective and Policies

This closed-end fund is designed for investors who seek high current income and capital appreciation. To achieve this objective, it invests primarily in high-yielding, U.S. and non-U.S. fixed income securities, denominated in U.S. dollars, that we expect to benefit from improving economic and credit fundamentals.

Investment Results

The following table shows how the Fund performed over the past six— and 12-month periods ended March 31, 2004. For comparison, we have included a composite benchmark consisting of 65% of the J.P. Morgan Emerging Markets Bond Index Plus (JPM EMBI+), a standard measure of the performance of a basket of unmanaged emerging market debt securities, and 35% of the Credit Suisse First Boston High Yield (CSFBHY) Index, a standard measure of the performance of a basket of unmanaged U.S. high yield debt securities. We compare the Fund's performance to this composite benchmark because it more closely resembles the composition of the Fund's portfolio.

INVESTMENT RESULTS*
Periods Ended March 31, 2004

	Ret	urns
	6 Months	12 Months
ACM Managed Dollar Income Fund (NAV)	11.85%	31.72%
J.P. Morgan Emerging Markets Bond Index Plus	8.71%	23.64%

Credit Suisse First Boston

High Yield Index	8.65%	22.86%
Composite: 65%/35% (65% JPM EBMI+/35%		
CSFBHY Index)	8.69%	23.37%

* The Fund's investment results are for the periods shown and are based on the net asset value (NAV) of the Fund as of March 31, 2004. Performance assumes reinvestment of distributions and does not account for taxes. All fees and expenses related to the operation of the Fund have been deducted. Past performance is no guarantee of future results.

The indices do not reflect fees and expenses associated with the active management of a mutual fund portfolio. The unmanaged J.P. Morgan Emerging Markets Bond Index Plus (JPM EMBI+) is comprised of dollar-denominated

ACM MANAGED DOLLAR INCOME FUND o 1

restructured sovereign bonds; a large percentage of the index is made up of Brady bonds. The unmanaged Credit Suisse First Boston High Yield (CSFBHY) Index is a measure of lower-rated, fixed income, non-convertible U.S. dollar-denominated securities meeting certain criteria developed by Credit Suisse designed to enable the index to reflect the high yield market. Investors cannot invest directly in an index, and its results are not indicative of any specific investment, including ACM Managed Dollar Income Fund.

For the six-month period ended March 31, 2004, the Fund outperformed its composite benchmark. During this time, the Fund benefited primarily from its emerging market debt holdings, individual security selection and its ability to leverage. The Fund's holdings in Brazil and Turkey, as well as its overweight position in Ecuador and underweight position in Mexico, contributed positively to performance. Contributing positively within the Fund's high yield sector was its overweight position in finance as well as the Fund's security investments in metals, gaming/leisure, airlines and the health care industries. The Fund was also aided by avoiding negative credit issues during the period under review.

Detracting from the Fund's performance during the six-month period ended March 31, 2004 was the Fund's overweight position in Russia, which did not perform as well as the JPM EMBI+. Also detracting modestly from performance, relative to the CSFBHY Index, were the Fund's high yield holdings. Media wireless and media cable securities, as well as the Fund's underweight position in utilities, which performed well during the period, dampened performance. In addition, the Fund's underweight position in higher risk CCC high yield holdings, which outperformed during the period, also detracted from relative performance.

Market Review and Investment Strategy

During the semi-annual reporting period, both emerging market debt and high yield securities posted strong returns, albeit moderated from the unsustainable pace of the previous six-month period. High yield corporate securities continued to benefit from a stronger economy and improving credit fundamentals. The decline in the ratio of downgrades to upgrades in the past year reflected the improvement in credit fundamentals. Additionally, yield-seeking investors in a low-rate environment helped to drive high yield prices higher, despite strong issuance. For the six-month period ended March 31, 2004, the CSFBHY

Index posted a 8.65% return, as spreads compressed 104 basis points to 495 basis points over comparable duration Treasuries. Furthermore, the lower quality sectors of the high yield market outperformed the higher quality tiers, although that trend began to reverse late in the period. Nominal returns in high yield were stronger in the third quarter of 2003 than the first quarter of 2004 however, as escalating geopolitical tensions and concerns about the sustainability of the U.S. economic recovery due to a weak job market began to surface. By industry, finance, metals/minerals, cable, utilities and automotive outperformed. Underperforming sectors included the airline industry, telecommunications, wireless communications, broadcasting and the food & drug sector.

2 o ACM MANAGED DOLLAR INCOME FUND

The emerging debt market, as measured by the JPM EMBI+, posted a solid 8.71% return for the six-month period ended March 31, 2004. This market benefited from ample global liquidity and a low interest rate environment. Additionally, supply was very limited, while investor demand remained strong. The Latin countries outpaced non-Latin countries, posting returns of 10.00% versus 6.93%, respectively. Individual countries outperforming within the emerging market debt class included Ecuador at 40.05%, Turkey at 16.50%, Venezuela at 14.07% and Brazil at 12.39%.

Within the high yield sector, as spread dispersion among industries narrowed during the period under review, our strategy turned more toward specific issuer selection and diversifying the Fund's holdings across industry sectors. One of the Fund's largest industry overweight positions continued to be wireless communications. Within the wireless sector, we were focused on rural providers with the following characteristics: those that have less competition, those that are less affected by the implementation of number portability and those that have improved balance sheets as a result of recent capital-market transactions. We continued to underweight the utilities industry due to anticipated low demand growth, forecasted high gas prices and continued capacity additions. Although some individual utility issuers represented a substantial weighting in the index, we have taken a conservative approach, investing only in issues that we believed have good asset protection and sufficient financial liquidity.

Within the Fund's emerging market debt allocation, we maintained an overweight position in Russia as credit statistics continued to improve. Russia, which was recently upgraded by Standard & Poor's (S&P) to BB+ and is rated Baa3 by Moody's Investors Service, has strong gross domestic product momentum and little need to issue new debt. The country is also benefiting from high oil prices and President Putin's appointment of a pro-reform government. Additionally, we increased the Fund's holdings in Ecuador and Turkey. Ecuador benefited from higher oil prices and greater output, significant structural reforms and engagement with the International Monetary Fund (IMF). S&P raised Turkey's rating to B+ from B during the reporting period, crediting the government's efforts to comply with targets set by the IMF and its resolve to implement reforms. As a result, we added to the Fund's position in Turkey. We also decreased the Fund's holdings in Mexico as a result of stalled growth due to poor external demand, mainly from the U.S., and loss of competitiveness in Mexico's manufacturing sector. Lastly, we reduced the Fund's duration exposure in Brazil due to concerns over fundamentals, inflation worries and Brazil's Central Bank's possible inability to continue reducing interest rates. Political scandal and subsequent missteps have caused the Lula administration to lose much of the political goodwill it had in 2003. In addition, we have

reduced the Fund's leverage and scaled back the interest rate duration of the Fund due to the prospect of tighter monetary policy in the U.S.

20 o ACM MANAGED DOLLAR INCOME FUND

- * Represents entire or partial securities out on loan.
- + See Note F for securities lending information.
- (a) Coupon changes periodically based upon a predetermined schedule. Stated interest rate in effect at March 31, 2004.
- (b) A position, or portion of the underlying securities has been segregated by the Fund for the written call options outstanding at March 31, 2004. The value of these securities amounted to \$1,572,060\$ at March 31, 2004.
- (c) Positions, or portions thereof, with an aggregate market value of \$66,732,041 have been segregated to collateralize reverse repurchase agreements.
- (d) Security is exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At March 31, 2004, the aggregate market value of these securities amounted to \$81,736,198 or 44.6% of net assets.
- (e) Indicates a security that has a zero coupon that remains in effect until a predetermined date at which time the stated coupon rate becomes effective until final maturity.

- (f) Security is in default and is non-income producing.
- (g) Illiquid security, valued at fair market value (see Note A).
- (h) One contract relates to principal amount of \$1.00.
- (i) Non-income producing security.

Glossary of Terms:

DCB - Debt Conversion Bond

FLIRB - Front Loaded Interest Reduction Bond

FRN - Floating Rate Note

VRN - Variable Rate Note

ACM MANAGED DOLLAR INCOME FUND o 25

Notes to Financial Statements ______

NOTES TO FINANCIAL STATEMENTS March 31, 2004 (unaudited)

NOTE A

Significant Accounting Policies

ACM Managed Dollar Income Fund, Inc. (the "Fund") was incorporated under the laws of the State of Maryland on August 10, 1993 and is registered under the Investment Company Act of 1940 as a non-diversified, closed-end management investment company. The financial statements have been prepared in conformity with accounting principles generally accepted in the United States, which requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund.

1. Security Valuation

In accordance with Pricing Policies adopted by the Board of Directors of the Fund (the "Pricing Policies") and applicable law, portfolio securities are valued at current market value or at fair value. The Board of Directors has

\$ 8,539,234 _____

delegated to Alliance Capital Management, L.P. (the "Adviser"), subject to the Board's continuing oversight, certain responsibilities with respect to the implementation of the Pricing Policies. Pursuant to the Pricing Policies, securities for which market quotations are readily available are valued at their current market value. In general, the market value of these securities is determined as follows:

Securities listed on a national securities exchange or on a foreign securities exchange are valued at the last sale price at the close of the exchange or foreign securities exchange. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices on such day. If no bid or asked prices are quoted on such day, then the security is valued in good faith at fair value in accordance with the Pricing Policies. Securities listed on more than one exchange are valued by reference to the principal exchange on which the securities are traded; securities not listed on an exchange but traded on The Nasdaq Stock Market, Inc. ("NASDAQ") are valued in accordance with the NASDAQ Official Closing Price; listed put or call options are valued at the last sale price. If there has been no sale on that day, such securities will be valued at the closing bid prices on that day; open futures contracts and options thereon are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuations, the last available closing settlement price is used; securities traded in the over-the-counter market, (but excluding securities traded on NASDAQ) are valued at the mean of the current bid and asked prices as reported by the National Quotation Bureau or other comparable sources; U.S. Government securities and other debt instruments having 60 days or less remaining until maturity are valued at amortized cost if their original maturity was 60 days or less, or by amortizing their fair value as of the 61st day prior to maturity if their original term to maturity exceeded 60 days; fixed-income securities, including

26 o ACM MANAGED DOLLAR INCOME FUND

Notes to Financial Statements

mortgage backed and asset backed securities, may be valued on the basis of prices provided by a pricing service or at a price obtained from one or more of the major broker/dealers. In cases where broker/dealer quotes are obtained, the Pricing Policies provide that the Adviser may establish procedures whereby changes in market yields or spreads are used to adjust, on a daily basis, a recently obtained quoted price on a security; and OTC and other derivatives are valued on the basis of a quoted bid price or spread from a major broker/dealer in such security.

Securities for which market quotations are not readily available are valued at fair value in accordance with the Pricing Policies. The Fund fair values a security that it holds when a significant event (e.g., an earthquake or a major terrorist attack) occurs after the time that the latest market quotation was established, and, as a result, such market quotation cannot be said to represent the current market value of the security as of the time the Fund prices its shares. Fair valuing securities is imprecise, and there is no assurance that the Fund could dispose of the security at the price used for determining the Fund's net asset value.

2. Taxes

It is the Fund's policy to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its investment company taxable income and net realized gains, if any, to shareholders. Therefore, no provisions for federal income or excise taxes are required.

3. Investment Income and Investment Transactions

Interest income is accrued daily. Dividend income is recorded on the ex-dividend date. Investment transactions are accounted for on the date the securities are purchased or sold. Investment gains and losses are determined on the identified cost basis. The Fund accretes discounts as adjustments to interest income. Additionally, the Fund amortizes premiums on debt securities for financial statement reporting purposes only.

4. Dividends and Distributions

Dividends and distributions to shareholders are recorded on the ex-dividend date. Income and capital gains distributions are determined in accordance with federal tax regulations and may differ from those determined in conformity with accounting principles generally accepted in the United States. To the extent these differences are permanent, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require such reclassification.

5. Repurchase Agreements

The Fund's custodian or designated subcustodian will take control of securities as collateral under repurchase agreements and determine on a daily basis that the value of such securities are sufficient to cover the value of the repurchase agree-

ACM MANAGED DOLLAR INCOME FUND o 27

Notes to Financial Statements

ments. If the seller defaults and the value of collateral declines, or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of collateral by the Fund may be delayed or limited.

NOTE B

Advisory, Administrative Fees and Other Transactions with Affiliates

Under the terms of an Investment Advisory Agreement, the Fund pays the Adviser an advisory fee at an annual rate of .75 of 1% of the average adjusted weekly net assets of the Fund. Such fee is accrued daily and paid monthly.

Under the terms of a Shareholder Inquiry Agency Agreement with Alliance Global Investor Services, Inc. (AGIS), a wholly-owned subsidiary of the Adviser, the Fund reimburses AGIS for costs relating to servicing phone inquiries on behalf of the Fund. During the six months ended March 31, 2004, the Fund reimbursed to AGIS \$265.

Under the terms of an Administration Agreement, the Fund pays Princeton Administrators, L.P. (the "Administrator") a fee at an annual rate of .15 of 1% of the average adjusted weekly net assets of the Fund. Such fee is accrued daily and paid monthly. The Administrator prepares certain financial and regulatory reports for the Fund and provides clerical and other services.

NOTE C

Investment Transactions

Purchases and sales of investment securities (excluding short-term investments) for the six months ended March 31, 2004, were as follows:

	Purchases	Sales	
	=========	=========	
Investment securities (excluding			
U.S. government securities)	\$ 105,489,923	\$ 105,496,524	
U.S. government securities	-0-	-0-	

At March 31, 2004, the cost of investments for federal income tax purposes was substantially the same as the cost for financial reporting purposes. Accordingly, gross unrealized appreciation and gross unrealized depreciation (excluding written options and swap contracts) are as follows:

Gross unrealized appreciation	\$	42,004,342
Gross unrealized depreciation		(14,237,366)
Net unrealized appreciation	\$	27,766,976
	==	

1. Option Transactions

For hedging and investment purposes, the Fund may purchase and write (sell) put and call options on U.S. and foreign government securities and foreign currencies that are traded on U.S. and foreign securities exchanges and over-the- counter markets.

28 o ACM MANAGED DOLLAR INCOME FUND

Notes to Financial Statements

The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of the premium and a change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by the premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Fund writes an option, the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are recorded by the Fund on the expiration date as realized gains from options

written. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium received is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium received is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium received reduces the cost basis of the security or currency purchased by the Fund. In writing an option, the Fund bears the market risk of an unfavorable change in the price of the security or currency underlying the written option. Exercise of an option written by the Fund could result in the Fund selling or buying a security or currency at a price different from the current market value.

Transactions in written options for the six months ended March 31, 2004 were as follows:

	Number of		
	Contracts	Premiums	
	(000)	Re	eceived
	========	====	
OPTIONS OUTSTANDING AT			
SEPTEMBER 30, 2003	-0-	\$	-0-
Options written	8,588		156 , 898
Options terminated in closing purchase			
transactions	-0-		-0-
Options expired	(7,068)		(129,918)
OPTIONS OUTSTANDING AT			
MARCH 31, 2004	1,520	\$	26,980
	=========	====	

2. Swap Agreements

The Fund may enter into swaps on sovereign debt obligations to hedge its exposure to interest rates and credit risk or for investment purposes. A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. The payment flows are usually netted against each other, with the difference being paid by one party to the other.

ACM MANAGED DOLLAR INCOME FUND o 29

Notes to Financial Statements

Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net interest payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore the Fund considers the creditworthiness of each counterparty to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying securities.

The Fund records a net receivable or payable on a daily basis for the net interest income or expense expected to be received or paid in the interest period. Net interest received or paid on these contracts is recorded as interest income (or as an offset to interest income). Fluctuations in the value of swap contracts are recorded for financial statement purposes as a component of net change in unrealized appreciation/depreciation of investments. Realized gains and/or losses from terminated swap contracts are included in net realized gain or loss on investment transactions.

The Fund may enter into credit default swaps. A sell/(buy) in a credit default swap provides, upon the occurrence of a credit event, as defined in the swap agreement, for the Fund to buy/(sell) from/(to) the counterparty at par and take/(deliver) the principal amount (the "Notional Amount") of the referenced obligation. During the term of the swap agreement, the Fund receives/(pays) semi-annual fixed interest payments from/(to) the respective counterparty, calculated at the agreed upon interest rate applied to the Notional Amount.

Credit default swaps may involve greater risks than if a Fund had invested in the referenced obligation directly. Credit default swaps are subject to general market risk, liquidity risk and credit risk. If the Fund is a buyer and no credit event occurs, it will lose its investment. In addition, the value of the referenced obligation received by the Fund as a seller if a credit event occurs, coupled with the periodic payments previously received, may be less than the full notional value it pays to the buyer, resulting in a loss of value to the Fund.

3. Reverse Repurchase Agreements

Under a reverse repurchase agreement, the Fund sells securities and agrees to repurchase them at a mutually agreed upon date and price. At the time the Fund enters into a reverse repurchase agreement, it will establish a segregated account with the custodian containing liquid assets having a value at least equal to the repurchase price.

For the six months ended March 31, 2004, the average amount of reverse repurchase agreements outstanding was \$62,862,826 and the daily weighted average annual interest rate was 0.9310%.

30 o ACM MANAGED DOLLAR INCOME FUND

Notes to Financial Statements

NOTE D

Capital Stock

There are 300,000,000 shares of \$.01 par value common stock authorized of which 22,625,536 shares were issued and outstanding at March 31, 2004. During the six months ended March 31, 2004 and the year ended September 30, 2003, the Fund issued 84,915 and 182,814 shares, respectively, in connection with the Fund's dividend reinvestment plan.

NOTE E

Risks Involved in Investing in the Fund

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will affect the value of the Fund's investments in fixed-income debt securities such as bonds or notes. Increases in interest rates may cause the value of the Fund's investments to decline.

Concentration of Risk

Investing in securities of foreign companies and foreign governments involves special risks which include the possibility of future political and economic developments which could adversely affect the value of such securities. Moreover, securities of many foreign companies and foreign governments and their markets may be less liquid and their prices more volatile than those of comparable U.S. companies and the United States government.

The Fund invests in the Sovereign Debt Obligations of countries that are considered emerging market countries at the time of purchase. Therefore, the Fund is susceptible to governmental factors and economic and debt restructuring developments adversely affecting the economics of these emerging market countries. In addition, these debt obligations may be less liquid and subject to greater volatility than debt obligations of more developed countries.

NOTE F

Securities Lending

The Fund has entered into a securities lending agreement with AG Edwards & Sons, Inc. (the "Lending Agent"). Under the terms of the agreement, the Lending Agent, on behalf of the Fund, administers the lending of portfolio securities to certain broker-dealers. In return, the Fund receives fee income from the lending transactions or it retains a portion of interest on the investment of any cash received as collateral. The Fund also continues to receive dividends or interest on the securities loaned. Unrealized gain or loss on the value of the securities loaned that may occur during the term of the loan will be reflected in the accounts of the Fund. All loans are continuously secured by collateral exceeding the value of the securities loaned. All collateral consists of either cash or U.S. Government securities. The Lending Agent may invest the cash collateral received in accordance with the investment restrictions of the Fund in one or

ACM MANAGED DOLLAR INCOME FUND o 31

Notes to Financial Statements

more of the following investments: U.S. Government or U.S. Government agency obligations, bank obligations, corporate debt obligations, asset-backed securities, structured products, repurchase agreements and an eligible money market fund. The Lending Agent will indemnify the Fund for any loss resulting from a borrower's failure to return a loaned security when due. As of March 31, 2004, the Fund had loaned securities with a value of \$2,006,678 and received cash collateral of \$2,084,190, which was invested in a money market fund as included in the portfolio of investments. For the six months ended March 31, 2004, the Fund earned fee income of \$8,530, which is included in interest

income in the accompanying statement of operations.

NOTE G

Distributions to Shareholders

The tax character of distributions to be paid for the year ended September 30, 2004 will be determined at the end of the current fiscal year. The tax character of distributions paid to shareholders during the fiscal years ended September 30, 2003 and September 30, 2002 were as follows:

	2003	2002
	=========	=========
Distributions paid from:		
Ordinary income	\$ (18,177,141)	\$ (18,835,190)
Total taxable distributions	(18,177,141)	(18,835,190)
Tax return of capital	-0-	(730,704)
Total distributions paid	\$ (18,177,141)	\$ (19,565,894)

As of September 30, 2003, the components of accumulated earnings/(deficit) on a tax basis were as follows:

	==========
Total accumulated earnings/(deficit)	\$(123,155,006)
Unrealized appreciation/(depreciation)	23,183,747 (b)
Accumulated capital and other losses	(146,463,599) (a)
Undistributed ordinary income	\$ 124 , 846

- (a) On September 30, 2003, the Fund had a net capital loss carryforward of \$146,463,599 of which \$57,455,739 expires in the year 2007, \$24,635,181 expires in the year 2008, \$10,899,598 expires in the year 2009, \$33,249,705 expires in 2010 and \$20,223,376 expires in the year 2011. To the extent future capital gains are offset by capital loss carryforwards, such gains will not be distributed.
- (b) The difference between book-basis and tax-basis unrealized appreciation/(depreciation) is attributable primarily to the tax deferral of losses on wash sales and the difference between book and tax amortization methods for premium.

32 o ACM MANAGED DOLLAR INCOME FUND

Notes to Financial Statements

NOTE H

Legal Proceedings

As has been previously reported in the press, the Staff of the U.S. Securities and Exchange Commission ("SEC") and the Office of the New York Attorney General

("NYAG") have been investigating practices in the mutual fund industry identified as "market timing" and "late trading" of mutual fund shares. Certain other regulatory authorities have also been conducting investigations into these practices within the industry and have requested that Alliance Capital Management L.P. ("Alliance Capital"), the Fund's Adviser, provide information to them. Alliance Capital has been cooperating and will continue to cooperate with all of these authorities. The shares of the Fund are not redeemable by the Fund, but are traded on an exchange at prices established by the market. Accordingly, the Fund and its shareholders are not subject to the market timing and late trading practices that are the subject of the investigations mentioned above or the lawsuits described below. Please see below for a description of the agreements reached by Alliance Capital and the SEC and NYAG in connection with the investigations mentioned above.

In addition, numerous lawsuits have been filed against Alliance Capital and certain other defendants in which plaintiffs make claims purportedly based on or related to the same practices that are the subject of the SEC and NYAG investigations referred to above. Some of these lawsuits name the Fund as a party. Management of the Fund's Adviser believes that these private lawsuits are not likely to have a material adverse effect on the results of operations or financial condition of the Fund.

On December 18, 2003, Alliance Capital confirmed that it had reached terms with the SEC and the NYAG for the resolution of regulatory claims relating to the practice of "market timing" mutual fund shares in some of the AllianceBernstein Mutual Funds. The agreement with the SEC is reflected in an Order of the Commission ("SEC Order"). The agreement with the NYAG is subject to final, definitive documentation. Among the key provisions of these agreements are the following:

(i) Alliance Capital agreed to establish a \$250 million fund (the "Reimbursement Fund") to compensate mutual fund shareholders for the adverse effects of market timing attributable to market timing relationships described in the SEC Order. According to the SEC Order, the Reimbursement Fund is to be paid, in order of priority, to fund investors based on (i) their aliquot share of losses suffered by the fund due to market timing, and (ii) a proportionate share of advisory fees paid by such fund during the period of such market timing;

ACM MANAGED DOLLAR INCOME FUND o 33

Notes to Financial Statements

- (ii) Alliance Capital agreed to reduce the advisory fees it receives from some of the AllianceBernstein long-term, open-end retail funds, commencing January 1, 2004, for a period of at least five years; and
- (iii) Alliance Capital agreed to implement changes to its governance and compliance procedures. Additionally, the SEC Order contemplates that Alliance Capital's registered investment company clients, including the Fund, will introduce governance and compliance changes.

The shares of the Fund are not redeemable by the Fund, but are traded on an exchange at prices established by the market. Accordingly, the Fund and its shareholders are not subject to the market timing practices described in the

SEC Order and are not expected to participate in the Reimbursement Fund. Since the Fund is a closed-end fund, it will not have its advisory fee reduced pursuant to the terms of the agreements mentioned above.

ACM MANAGED DOLLAR INCOME FUND o 35

Financial Highlights

(a) As required, effective October 1, 2001, the Fund has adopted the provisions of the AICPA Audit and Accounting Guide, Audits of Investment Companies, and began amortizing premium on debt securities for financial statement reporting purposes only. The effect of this change for the year ended

statement reporting purposes only. The effect of this change for the year ended September 30, 2002 was to decrease net investment income per share by \$0.01, decrease net realized and unrealized loss on investment by \$0.01 and decrease the ratio of net investment income to average net assets from 10.91% to 10.81%. Per share, ratios and supplemental data for periods prior to October 1, 2001 have not been restated to reflect this change in presentation.

(b) Based on average shares outstanding.

(c) Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed for purposes of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods. Total investment return calculated for a period of less than one year is not annualized.

(d) Annualized.

(e) Net of interest expense of .33%, .51%, .97%, 1.62%, 1.61%, and 1.35%, respectively, on borrowings.

Summary of General Information

SUMMARY OF GENERAL INFORMATION

Shareholder Information

The daily net asset value of the Fund's shares is available from the Fund's Transfer Agent by calling (800) 426-5523. The Fund also distributes its daily net asset value to various financial publications or independent organizations such as Lipper Analytical Services, Inc., Morningstar, Inc. and Bloomberg. Daily market prices for the Fund's shares are published in the New York Stock Exchange Composite Transaction section of newspapers each day. The Fund's NYSE trading symbol is "ADF." Weekly comparative net asset value (NAV) and market price information about the Fund is published each Monday in The Wall Street Journal, each Sunday in The New York Times and each Saturday in Barron's and other newspapers in a table called "Closed-End Funds."

Dividend Reinvestment Plan

Pursuant to the Fund's Dividend Reinvestment Plan shareholders whose shares are registered in their own names may elect to have all distributions reinvested automatically in additional shares of the Fund by Equiserve Trust Company, N.A., as agent under the Plan. Shareholders whose shares are held in the name of a broker or nominee should contact the broker or nominee for details. All distributions to investors who elect not to participate in the Plan will be aid by check mailed directly to the record holder by or under the direction of Equiserve Trust Company, N.A. For questions concerning Shareholder account information, or if you would like a brochure describing the Dividend Reinvestment Plan, please call Equiserve Trust Company, N.A. at (800) 219-4218.
