**JDA Software to Acquire i2 Technologies**

Dear Valued JDA Customers,

I am pleased to inform you that JDA Software Group, Inc. has today entered into a definitive merger agreement with i2 Technologies, Inc., through which our company will acquire all of the outstanding equity of i2. The deal is currently scheduled to close during the first quarter of 2010.

JDA had initially announced our intent to acquire i2 in August 2008 and we were greatly disappointed that the impact of the global financial crisis prevented us from closing the deal last year. We believed at the time and still do today that this merger is the right move for both JDA and i2 as it creates a powerful company with the market's largest and most experienced team of supply chain professionals capable of innovating in the fields of planning, optimization and execution.

With the conditions in the financial markets stabilizing, we are now pleased to re-engage with i2 and have a high degree of certainty in our ability to successfully move forward with finalizing the acquisition. We would like to share with you some of the reasons influencing our actions:

**Help Our Customers Succeed in the New Normal.** The challenges of the global financial crisis continue to be at the forefront of corporate thinking worldwide and have most likely had some impact on how your company operates. The merger of JDA and i2 will establish a company with the greatest potential for innovation and service targeted at improving business results in what many believe is the new normal business environment. Our combined resources, talents and track record create a platform for accelerated innovation, expanded service and support, and improved delivery of customer results.

**Gain More from Your Current Investment.** The combination of our companies creates new scale and capabilities that will allow us to offer a comprehensive array of services designed to maximize your value from JDA solutions. The combined company will be able to provide unrivalled traditional implementation services, education services, technical services, managed services and support services including on demand solutions; all with deep domain expertise. This flexibility and scale will also create efficiencies that will allow us to deliver unmatched value whether provided by our on-shore expertise or our substantial offshore presence.

**Accelerate Solution Innovation.** JDA and i2 are proud of our reputations for innovation and thought leadership. Combining our resources and talents into a single organization will allow for greater scale to take planning, optimization and execution to the next level. While creating innovations capable of bringing new levels of optimization to your business, we will maintain our focus on investment protection, ensuring that you can maximize your value from our solutions with the minimum of disruption and cost.

**Provide Financial Leverage for Additional Economies of Scale.** By becoming a more formidable Tier 1/Tier 2 solutions provider, the combined company will be positioned to achieve superior financial results through synergies and economies of scale. These savings will support our long-term investment in the future of your products.
