Table of Contents

**FULL HOUSE RESORTS, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

1. BASIS OF PRESENTATION

The interim consolidated financial statements of Full House Resorts, Inc. and subsidiaries (collectively, the Company) included herein reflect all adjustments that are, in the opinion of management, necessary to present fairly the financial position and results of operations for the interim periods presented. Certain information normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America has been omitted pursuant to the interim financial information rules and regulations of the United States Securities and Exchange Commission.

These unaudited interim consolidated financial statements should be read in conjunction with the annual audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K filed March 27, 2009, for the year ended December 31, 2008, from which the balance sheet information as of that date was derived. Certain minor reclassifications to amounts previously reported have been made to conform to the current period presentation, none of which affected previously reported net income or earnings per share. The results of operations for the periods ended September 30, 2009, are not necessarily indicative of the results to be expected for the year ending December 31, 2009. Events through November 9, 2009, the date the financial statements were issued, were evaluated by management to determine if adjustments to or disclosure in these interim consolidated financial statements were necessary (Note 11).

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, including Stockman's Casino (Stockman's). Gaming Entertainment (Michigan), LLC (GEM), a 50%-owned investee of the Company that is jointly owned by RAM Entertainment, LLC (RAM), has been consolidated pursuant to the guidance in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (Codification) Topic 810, *Consolidation*. The Company accounts for its investment in Gaming Entertainment (Delaware), LLC (GED) (Note 3) using the equity method of accounting because the Company is not the primary beneficiary. All material intercompany accounts and transactions have been eliminated.

On January 1, 2009, the Company adopted Codification Topic 810, *Consolidation*, (Topic 810) which establishes accounting and reporting standards for the non-controlling or minority interest in a subsidiary and for the deconsolidation of a subsidiary. Among the effects of Topic 810 is the determination of net income (loss) without a deduction attributable to the non-controlling (or minority) interest in a consolidated subsidiary and the relocation of such non-controlling interest to the stockholders' equity section of the balance sheet. The determination of income (loss) per share remains unchanged based on net income attributable to the Company, which excludes the portion allocated to the non-controlling interest. The adoption of Topic 810 did not have any other effect on the Company's consolidated financial statements for the periods presented.

2. SHARE-BASED COMPENSATION

For the three months ended September 30, 2009 and 2008, the Company recognized share-based compensation expense of \$33,346 and \$223,959, respectively, related to the amortization of restricted stock grants in prior years and stock grants in July 2008, which is included in selling, general and administrative expenses. For the nine months ended September 30, 2009 and 2008, share-based compensation expense recognized was \$275,892 and \$644,593, respectively. At September 30, 2009, the Company had deferred share-based compensation of \$50,083.

Table of Contents**3. INVESTMENT IN UNCONSOLIDATED JOINT VENTURE**

The Company's investment in unconsolidated joint venture is comprised of a 50% ownership interest in GED, a joint venture between the Company and Harrington Raceway Inc (HRI). GED has a management agreement with Harrington Raceway and Casino (Harrington) (formerly known as Midway Slots and Simulcast), which is located in Harrington, Delaware. GED has no non-operating income or expenses, is treated as a partnership for income tax purposes and consequently recognizes no federal or state income tax provision. As a result, income from operations for GED is equal to net income for each period presented, and there are no material differences between its income for financial and tax reporting purposes.

Under the terms of the joint venture agreement, as restructured in 2007, the Company receives the greater of 50% of GED's member distribution as currently prescribed under the joint venture agreement, or a 5% growth rate in its 50% share of GED's prior year member distribution through the expiration of the GED management contract in August 2011.

As of the balance sheet dates presented, the Company's assets and liabilities related to its investment in GED consisted of an account receivable from HRI of \$399,361 as of December 31, 2008 and \$613,994 as of September 30, 2009. The investment in GED was \$161,325 and \$117,906 as of September 30, 2009, and December 31, 2008, respectively, included in deposits and other.

On June 19, 2009, HRI filed a demand for arbitration with the American Arbitration Association disputing the formula used for computing the minimum annual increase in the Company's share of the management fee (Note 9). An unaudited summary for GED's operations follows:

	Three months ended September 30,		Nine months ended September 30,	
	2009	2008	2009	2008
Management fee revenues	\$ 1,824,854	\$ 1,891,311	\$ 5,846,612	\$ 6,072,794
Net income	1,691,963	1,796,144	5,436,532	5,770,416
Net income attributable to Full House Resorts:	\$ 845,982	\$ 898,072	\$ 2,718,266	\$ 2,885,208

4. FAIR VALUE MEASUREMENTS

The carrying value of the Company's cash and cash equivalents and accounts payable approximate fair value because of the short maturity of those instruments. As discussed above and Note 5, substantially all of the Company's receivables are carried at estimated fair value. The estimated values of the Company's debt approximate their recorded values based on the interest rates offered to the Company for loans of the same or similar remaining maturities.

On January 1, 2008, the Company adopted the methods of fair value accounting described in Codification Topic 820, *Fair Value Measurements and Disclosures* (Topic 820), to value its financial assets that were previously carried at estimated fair value. The adoption of Topic 820 in the first quarter of 2008 did not have any effect on the Company's previously used fair value estimation methodology or on net income.

In April 2009, the FASB issued clarification, which is now included in Codification Topic 320, *Investments-Debt and Equity Securities* (Topic 320), to amend the other-than-temporary impairment guidance for debt securities and presentation and disclosure requirements relative to other-than-temporary impairments of debt and equity securities held as investments. Topic 320 was adopted in the second quarter of 2009 and also did not have a significant effect on the consolidated financial statements.

Table of Contents

Due to the absence of observable market quotes on the Company's notes receivable from tribal governments (Note 5), the fair values of the Company's financial assets that are recorded and subsequently measured at estimated fair value are estimated using only Level 3 inputs from among the three levels of the fair value hierarchy set forth in Topic 820. Such Level 3 inputs are based primarily on management's estimates of expected cash flow streams, future interest rates, casino opening dates and discount rates.

The estimated casino opening dates used in the valuations take into account project-specific circumstances such as ongoing litigation, the status of required regulatory approval processes, construction activity and other factors. Factors considered in the determination of an appropriate discount rate include discount rates typically used by gaming industry investors and appraisers to value individual casino properties in the appropriate regions, and discount rates produced by the widely-accepted Capital Asset Pricing Model (CAPM). The following key assumptions are used in the CAPM:

S&P 500, average benchmark investment returns (medium-term horizon risk premiums);

Risk free investment return equal to the trailing 10-year average for 90-day treasury bills;

Investment beta factor equal to the average of a peer group of similar entities in the hotel and gaming industry;

Project-specific adjustments based on the status of the project (*i.e.*, litigation, regulatory approvals, tribal politics, *etc.*), and typical size premiums for micro-cap and low-cap companies.

5. NOTES RECEIVABLE, TRIBAL GOVERNMENTS

The Company has notes receivable related to advances made to, or on behalf of, tribes to fund tribal operations and development expenses related to potential casino projects. Repayment of these notes is conditioned upon the development of the projects, and ultimately, the successful operation of the facilities. Subject to such condition, the Company's agreements with the tribes provide for the reimbursement of these advances plus applicable interest, if any, either from the proceeds of any outside financing of the development, the actual operation itself or in the event that the Company does not complete the development, from the revenues of any tribal gaming operation following completion of development activities undertaken by others.

As of September 30, 2009, and December 31, 2008, notes receivable from tribal governments were as follows:

	September 30, 2009	December 31, 2008
Contractual (stated) amount		
FireKeepers Development Authority	\$ 5,000,000	\$ 5,000,000
Other	1,280,475	1,281,329
	\$ 6,280,475	\$ 6,281,329
Estimated fair value of notes receivable related to tribal casino projects:		
FireKeepers Development Authority	\$ 4,682,420	\$ 4,097,002
Other	974,103	1,017,765
	\$ 5,656,523	\$ 5,114,767

On May 6, 2008, the FireKeepers Development Authority (the Authority) closed on the sale of \$340.0 million of Senior Secured Notes and a \$35.0 million equipment financing facility to fund the development and construction of the Authority's FireKeepers Casino in Michigan. On the same date, GEM received a payment of approximately \$9.3 million on its notes receivable from the Authority which resulted in an increase in the estimated fair value of the notes receivable of approximately \$1.8 million recorded as an unrealized gain in the first quarter of 2008. The remaining \$5.0 million, including interest at prime plus 1% accrued from August 5, 2009, is to be paid 180 days

following the opening of the casino, subject to there being adequate funds remaining in the construction disbursement account. If there are insufficient funds to repay the remaining balance, the Authority will be obligated to repay the balance in 60 monthly installments beginning 180 days following the opening of the casino, with interest at prime plus 1%. The estimated net realizable value of the Michigan receivable has been classified as short term, as management believes it will be collected within the next twelve months. The FireKeepers Casino opened on August 5, 2009. Although certain distributions (including a minimum guaranteed monthly payments to the Tribe of \$50,000, a preferred payment to the Tribe of \$200,000 and repayment of loan principal to be paid out of the Tribe's share of net revenues) will be paid from net revenue prior to the payment to the Company of the management fee, the Company believes the property will generate sufficient revenues to pay the management fee equal to 26% of net revenues on a monthly basis.

Table of Contents

As of September 30, 2009, management's expected opening date for the Montana casino remains the second quarter of 2011. The site for the Northern Cheyenne Tribe project was approved for gaming by the Secretary of the Interior as of October 28, 2008, and the required consent of the Governor of Montana was received as of July 30, 2009.

In March 2008, management announced that the Company was no longer pursuing the Nambé Pueblo project. However, the Pueblo tribe has acknowledged its obligation to repay reimbursable development advances of approximately \$661,600 plus interest at prime plus 2%, out of any future gaming revenues, if any. Management currently believes that the Nambé Pueblo intends to develop a slot machine operation with approximately 200 devices, which would be attached to its travel center and provide the Pueblo tribe with the financial wherewithal to repay the amounts owed to the Company. In September 2009, we were notified that the Pueblo had secured financing from a third-party source. The tribe has restated its intent to repay the development advances from the gaming revenue once the slot machine operation commences operations. Construction is expected to commence in late 2009 with a timeline of approximately eight months. With due consideration to the foregoing factors, management has estimated the fair value of the note receivable from the Nambé Pueblo at \$430,467 as of September 30, 2009.

During the second quarter of 2008, management formally approved and began executing a plan to sell land purchased for the development of the Manuelito project. As a result, as of June 30, 2008, the land was classified as a current asset characterized as held for sale and adjusted to its then estimated net realizable value of \$45,000, resulting in an impairment loss of \$85,000 recognized in the second quarter of 2008. During the second quarter of 2009, the Company recognized an additional \$30,000 impairment loss, reflecting a decline of estimated net realizable value. During the current quarter ended September 30, 2009, the Company increased the value of the land to \$19,669 and recognized a gain of \$4,669 as a result of the October 15, 2009, sale of the Manuelito land to an unrelated third party for \$24,500 less closing costs of \$4,831 (Note 11).

The following table summarizes the changes in the estimated fair value of notes receivable from tribal governments, determined using Level 3 estimated fair value inputs, from January 1, 2009, to September 30, 2009:

	Total	FireKeepers Development Authority	Other tribes
Balances, January 1, 2009	\$ 5,114,767	\$ 4,097,002	\$ 1,017,765
Other	(854)		(854)
Unrealized gains included in earnings	542,610	585,418	(42,808)
Balances, September 30, 2009	\$ 5,656,523	\$ 4,682,420	\$ 974,103

6. CONTRACT RIGHTS

At September 30, 2009 and December 31, 2008, contract rights consist of the following:

	Cost	Accumulated Amortization	Carrying value
September 30, 2009			
FireKeepers project, initial cost	\$ 4,155,213	\$ (98,934)	\$ 4,056,279
FireKeepers project, additional	13,210,373	(1,056,697)	12,153,676
Other projects	159,194		159,194
	\$ 17,524,780	\$ (1,155,631)	\$ 16,369,149

Table of Contents

		Accumulated	Carrying
December 31, 2008	Cost	Amortization	Value
FireKeepers project, initial cost	\$ 4,155,213	\$	\$ 4,155,213
FireKeepers project, additional	13,210,373	(729,228)	12,481,145
Other projects	159,194		159,194
	\$ 17,524,780	\$ (729,228)	\$ 16,795,552

7. LONG-TERM DEBT

At September 30, 2009 and December 31, 2008, long-term debt consists of the following:

	September 30, 2009	December 31, 2008
Long-term debt to joint venture affiliate:		
Promissory note, expected to mature in 2010, interest at 1% above the prime rate of 4.25% as of December 31, 2008 and no interest as of September 30, 2009	\$ 5,774,032	\$ 3,137,600
Less current portion	(5,774,032)	
	\$	\$ 3,137,600

Long-term debt to joint venture affiliate. On October 9, 2009, effective September 30, 2009, an agreement was reached between the Company and RAM (GEM Financial Resolution) clarifying the treatment of the following items:

Reimbursable amounts funded by the members, due from the Michigan tribe before the RAM buy-in as the prior agreements were silent on reimbursements to members.

Non-reimbursable amounts funded by the Company, related to the Michigan tribe, as the prior agreements were unclear if these were reimbursable by GEM to the Company.

Repayments of disproportionate advances by the Company as prior agreements were unclear as to what percentages would be used regarding repayment.

As a result of this member agreement modification, payables due from GEM to each member were adjusted to reflect a total payable due to RAM of \$8.5 million, including \$2.7 reported as equity, and a total payable due to FHR of \$11.9 million, including \$2.7 reported as equity, resulting in the recognition of a net pre-tax gain of \$1.4 million, which was recorded in September 2009. The net pre-tax gain is distributed gross on the statements of operations for the periods ended September 30, 2009, as a \$2.1 million charge characterized as a member agreement modification offset by a \$3.5 million credit attributable to the non-controlling interest. In addition, the GEM members agreed that distributions to the members will be made on a 50/50 basis to both members until such time RAM's member payable has been fully repaid and thereafter 70% to the Company and 30% to RAM until such time as the remaining payable to the Company has been repaid. Thereafter, distributions to members will be made on a 50/50 basis. Also, no further interest accruals will be made on any member payables. As a result of the GEM Financial Resolution, the Company has reclassified the debt to joint venture affiliate of \$5.8 million as current portion of long-term debt with the balance of the RAM payable classified as joint venture equity (Note 11).

Long-term debt, other:

Edgar Filing: FULL HOUSE RESORTS INC - Form 10-Q

	September 30, 2009	December 31, 2008
Reducing revolving loan, initial \$16.0 million limit on January 31, 2007, due January 31, 2022, interest at 2.1% above the five year LIBOR/Swap rate, adjusted annually (7.24% at September 30, 2009 and 7.39% at December 31, 2008)	\$ 725,264	\$ 2,469,275
Promissory note to Peters Family Trust, \$1.25 million on January 31, 2007, paid in full as of June 30, 2009, interest at a fixed annual rate of 7.44%		822,588
	725,264	3,291,863
Less current portion		(225,224)
	\$ 725,264	\$ 3,066,639

Table of Contents

Reducing Revolving Loan (the Revolver). The maximum committed amount under the Revolver was increased from \$8.1 million to \$8.9 million, based upon the amendment to the Revolver dated June 25, 2009, and the repayment terms were amended (as discussed below). The maximum amount permitted to be outstanding under the Revolver decreased \$312,000 on July 1, 2009, and any outstanding amounts above such reduced maximum must be repaid. Effective January 1, 2010, based upon the amendment to the Revolver, the maximum amount permitted to be outstanding decreases \$329,000 semiannually on January 1 and July 1 of each year and any outstanding amounts above such reduced maximum must be repaid on each such date. Draws on the Revolver are payable over 15 years at a variable interest rate based on the five year LIBOR/Swap rate plus 2.1%. This rate adjusts annually based on the funded debt to EBITDA ratio of Stockman's with adjustments based on the five-year LIBOR/Swap rates. Stockman's assets are pledged as collateral for the loan. The Revolver also contains certain customary financial representations and warranties and requires that Stockman's maintain specified financial covenants, including a fixed charge coverage ratio, a funded debt to EBITDA ratio and a minimum tangible net worth. In addition, the Revolver provides restrictions on certain distributions and capital expenditures by Stockman's, and also provides for customary events of default including payment defaults and covenant defaults. Management is not aware of any covenant violations through the date of this filing (Note 11).

During the first quarter of 2008, proceeds from the sale of the Holiday Inn Express in Fallon, Nevada were applied against outstanding balances payable on the Revolver. The outstanding balance was reduced from \$10.9 million to \$3.9 million and the Company's availability under the Revolver increased to approximately \$4.8 million. In addition, periodic payment requirements were reduced on a pro-rata basis. As of June 30, 2009, the Company funded \$722,110 from the Revolver to pay off the amount due on the Peters Family Trust Promissory Note (details noted below). As of September 30, 2009, there are no additional required principal payments due on the Revolver until July 2021. The Company had \$7.8 million of availability under its revolving credit line as of September 30, 2009.

Green Acres. On May 6, 2008, in conjunction with the financing of the FireKeepers Casino, the Company applied the proceeds of the \$9.3 million tribal receivable reimbursement to pay off the remaining balance of the \$9.5 million Green Acres liability.

Peters Family Trust Promissory Note. On June 30, 2009, the Company paid off the Peters promissory note of \$722,110 plus \$4,477 in accrued interest with a drawdown of the Revolver. The original amount of the promissory note was \$1.25 million, payable to the seller of Stockman's in 60 monthly installments of principal and interest and was secured by a second lien in the real estate of Stockman's. Effective July 9, 2009, the second lien in the real estate of Stockman's was released.

Scheduled maturities of long-term debt (including obligations to joint venture affiliate) are as follows:

Annual periods ending September 30,	
2010	\$ 5,774,032
2011	
2012	
2013	
2014	
Thereafter	725,264
	\$ 6,499,296

The long term debt due to joint venture affiliate is expected to mature in 2010, and there are no required principal payments due on the Revolver until July 2021.

Table of Contents**8. SEGMENT REPORTING**

The Company is composed of three primary business segments. The following tables reflect selected segment information for the three and nine months ended September 30, 2009 and 2008. The operations segment includes the Stockman's Casino operation in Fallon, Nevada, and included the operation of the Holiday Inn Express until February 2008 when it was sold. Accordingly, the operating results of the hotel are reported as discontinued operations in the accompanying statements of operations, and are therefore excluded from the table below. The development/management segment includes costs associated with tribal casino development projects and the Michigan and Delaware joint ventures. The Corporate segment includes general and administrative expenses of the Company.

Selected statement of operations data (excluding discontinued operations in 2008) for the three months ended September 30,

9. CONTINGENCIES

Economic conditions and related risks and uncertainties. The United States is currently experiencing a widespread recession accompanied by, among other things, weakness in the commercial and investment banking systems resulting in reduced credit and capital financing availability, and highly curtailed gaming and other recreational activities and general discretionary consumer spending, and is also engaged in war, all of which are likely to continue to have far-reaching effects on economic conditions in the country for an indeterminate period. The effects and duration of these conditions and related risks and uncertainties on the Company's future operations and cash flows, including its access to capital or credit financing, cannot be estimated at this time, but may likely be significant.

Uninsured cash deposits. The Company frequently has cash on deposit substantially in excess of federally-insured limits, and the risk of losses related to such concentrations may be increasing as a result of recent economic developments described in the preceding paragraph. However, the extent of loss, if any, to be sustained as a result of any future failure of a bank or other financial institution is not subject to estimation at this time.

Legal matters. On June 19, 2009, HRI initiated arbitration against the Company regarding its Management Reorganization Agreement dated June 18, 2007. The dispute arose over the proper calculation of the member distribution to the Company under the agreement. Specifically, HRI seeks a ruling that the quarterly calculation of the baseline member distribution payable to the Company should be based on the prior year's management fee paid to the Company, exclusive of the compounding multiplier set forth in the agreement. Management has engaged counsel and is contesting the claim. At this stage of the dispute, based in part on counsel's advice, the Company is unable to predict the outcome or estimate the minimum amount of potential loss, if any, and accordingly, has made no provision for this matter.

Table of Contents

10. STOCK REPURCHASE PLAN

In 2008, the Company announced a stock repurchase plan (the Repurchase Plan) to repurchase up to \$2,000,000 of shares of its common stock in the open market or in privately negotiated transactions from time to time, in compliance with Rule 10b-18 of the Securities and Exchange Act of 1934, through April 30, 2009. Under the Repurchase Plan, the Company repurchased 1,356,595 shares for the treasury at a weighted average-price per share of \$1.22, costing \$1,654,075, (including commissions and other related transaction costs). The Repurchase Plan did not obligate the Company to acquire any specified number or value of common stock, and it has expired.

11. SUBSEQUENT EVENTS

On October 13, 2009, the Company made a \$500,000 voluntary principal payment on its revolving credit line reducing the outstanding balance to \$225,264. After this transaction, the availability under the revolving credit line is \$8.3 million.

The Company made distributions from GEM to its members on October 9, 2009, for \$1.7 million per member and on October 28, 2009, for \$1.1 million per member as repayment of debt due to joint venture affiliate per the GEM Financial Resolution (Note 7).

On October 15, 2009, the Company sold the land originally purchased for the Manuelito development, which was classified under deposits and other at September 30th, 2009, with a value of \$19,669, for \$24,500 less closing costs of \$4,831.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Safe harbor provision

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, relating to our financial condition, profitability, liquidity, resources, business outlook, market forces, corporate strategies, contractual commitments, legal matters, capital requirements and other matters. The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. We note that many factors could cause our actual results and experience to change significantly from the anticipated results or expectations expressed in our forward-looking statements. When words and expressions such as: believes, expects, anticipates, estimates, plans, intends, objectives, goals, aims, projects, forecasts, may, could, should, might, likely, enable, or similar words or expressions are used in this Form 10-Q, and statements containing phrases such as in our view, there can be no assurance, although no assurance can be given, or there is no way to anticipate with certainty, forward-looking statements are being made.

Various risks and uncertainties may affect the operation, performance, development and results of our business and could cause future outcomes to change significantly from those set forth in our forward-looking statements, including the following factors:

- our growth strategies;
- our development and potential acquisition of new facilities;
- risks related to development and construction activities;
- anticipated trends in the gaming industries;
- patron demographics;
- general market and economic conditions;
- access to capital and credit, including our ability to finance future business requirements;
- the availability of adequate levels of insurance;
- changes in federal, state, and local laws and regulations, including environmental and gaming license legislation and regulations;
- regulatory approvals;
- competitive environment;
- risks, uncertainties and other factors described from time to time in this and our other SEC filings and reports.

We undertake no obligation to publicly update or revise any forward-looking statements as a result of future developments, events or conditions. New risk factors emerge from time to time and it is not possible for us to predict all such risk factors, nor can we assess the impact of all such risk factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ significantly from those forecast in any forward-looking statements.

Overview

We manage and/or invest in gaming-related opportunities. The Company continues to actively investigate, individually and with partners, new business opportunities. We own and operate Stockman's Casino in Fallon, Nevada. In addition, we are a non-controlling 50%-investor in Gaming Entertainment Delaware, LLC ("GED"), a joint venture

with Harrington Raceway Inc. (HRI). GED has a management contract through August 2011 with Harrington Casino at the Delaware State Fairgrounds in Harrington, Delaware. We also own 50% of Gaming Entertainment Michigan, LLC (GEM), a joint venture with RAM Entertainment, LLC (RAM), that we control and, therefore, consolidate in our consolidated financial statements. RAM is a privately-held investment company. GEM has a management agreement with the Nottawaseppi Huron Band of Potawatomi Indians for the development and management of the FireKeepers Casino near Battle Creek, Michigan. The FireKeepers Casino commenced construction in May 2008 and opened on August 5, 2009. In addition, the Company has a development agreement and a management agreement (subject to National Indian Gaming Commission (NIGC) approval), with the Northern Cheyenne Nation of Montana for the development and management of a gaming facility to be built approximately 28 miles north of Sheridan, Wyoming.

Table of Contents

Economic conditions and related risks and uncertainties

The United States is currently experiencing a widespread recession accompanied by, among other things, weakness in the commercial and investment banking systems resulting in reduced credit and capital financing availability, and highly curtailed gaming and other recreational activities and general discretionary consumer spending, and is also engaged in war, all of which are likely to continue to have far-reaching effects on economic conditions in the country for an indeterminate period. The effects and duration of these conditions and related risks and uncertainties on the Company's future operations and cash flows, including its access to capital or credit financing, cannot be estimated at this time, but may likely be significant.

Critical accounting estimates and policies

Although our financial statements necessarily make use of certain accounting estimates by management, we believe that, except as discussed below, no matters that are the subject of such estimates are so highly uncertain or susceptible to change as to present a significant risk of a material impact on our financial condition or operating performance except as discussed in the following paragraphs.

The significant accounting estimates inherent in the preparation of our financial statements primarily include management's fair value estimates related to notes receivable from tribal governments, and the related evaluation of the recoverability of our investments in contract rights. Various assumptions, principally affecting the timing and, to a lesser extent, the probability of completing our various projects under development and getting them open for business, and other factors underlie the determination of these significant estimates. The process of determining significant estimates is fact- and project-specific and takes into account factors such as historical experience and current and expected legal, regulatory and economic conditions. We regularly evaluate these estimates and assumptions, particularly in areas, if any, where changes in such estimates and assumptions could have a material impact on our results of operations, financial position and, generally to a lesser extent, cash flows. Where recoverability of these assets or planned investments are contingent upon the successful development and management of a project, we evaluate the likelihood that the project will be completed, the prospective market dynamics and how the proposed facilities should compete in that setting in order to forecast future cash flows necessary to recover the recorded value of the assets or planned investment. In most cases, we engage independent valuation consultants to assist management in preparing and periodically updating market and/or feasibility studies for use in the preparation of forecasted cash flows. We review our conclusions as warranted by changing conditions.

Assets related to tribal casino projects

We account for the advances made to tribes as in-substance structured notes at estimated fair value in accordance with the guidance contained in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (Codification) Topic 320, *Investments-Debt and Equity Securities* and Topic 820, *Fair Value Measurements and Disclosures*.

Because our right to recover our advances and development costs with respect to Indian gaming projects is limited to, and contingent upon, the future net revenues of the proposed gaming facilities, we evaluate the financial opportunity of each potential service arrangement before entering into an agreement to provide financial support for the development of an Indian project. This process includes (1) determining the financial feasibility of the project assuming the project is built, (2) assessing the likelihood that the project will receive the necessary regulatory approvals and funding for construction and operations to commence, and (3) estimating the expected timing of the various elements of the project including commencement of operations. When we enter into a service or lending arrangement, management has concluded, based on feasibility analyses and legal reviews, that there is a high probability that the project will be completed and that the probable future economic benefit is sufficient to compensate us for our efforts in relation to the perceived financial risks. In arriving at our initial conclusion of probability, we consider both positive and negative evidence. Positive evidence ordinarily consists not only of project-specific advancement or progress, but the advancement of similar projects in the same and other jurisdictions, while negative evidence ordinarily consists primarily of unexpected, unfavorable legal, regulatory or political developments such as adverse actions by legislators, regulators or courts. Such positive and negative evidence is reconsidered at least quarterly. No asset, including notes receivable or contract rights, related to an Indian casino project is recorded on our books unless it is considered probable that the project will be built and will result in an economic benefit sufficient for

us to recover the asset.

Table of Contents

In initially assessing the financial feasibility of the project, we analyze the proposed facilities and their location in relation to market conditions, including customer demographics and existing and proposed competition for the project. Typically, independent consultants are also hired to prepare market and financial feasibility reports. These reports are reviewed by management and updated periodically as conditions change.

We also consider the status of the regulatory approval process including whether:

- the Federal Bureau of Indian Affairs (BIA) recognizes the tribe;

- the tribe has the right to acquire land to be used as a casino site;

- the Department of the Interior has put the land into trust as a casino site;

- the tribe has a gaming compact with the state government;

- the NIGC has approved a proposed management agreement; and

- other legal or political obstacles exist or are likely to occur.

The development phase of each relationship commences with the signing of the respective agreements and continues until the casinos open for business. Thereafter, the management phase of the relationship, governed by the management contract, typically continues for a period of between five to seven years. We make advances to the tribes, recorded as notes receivable, primarily to fund certain portions of the projects, which bear no interest or below market interest until operations commence. Repayment of the notes receivable and accrued interest is only required if the casino is successfully opened and distributable profits are available from the casino operations. Under the management agreement, we typically earn a management fee calculated as a percentage of the net income of the gaming facility. In addition, repayment of the loans and the manager's fees are subordinated to certain other financial obligations of the respective operations. Generally, the order of priority of payments from the casinos' cash flows is as follows:

- a certain minimum monthly priority payment to the tribe;

- repayment of various senior debt associated with construction and equipping of the casino with interest accrued thereon;

- repayment of various debt with interest accrued thereon due to us;

- management fee to us;

- other obligations; and

- the remaining funds distributed to the tribe.

Notes receivable

We account for and present our notes receivable from and management contracts with the tribes as separate assets. Under the contractual terms, the notes do not become due and payable unless and until the projects are completed and operational. However, if our development activity were to be terminated prior to completion, we generally would retain the right to collect on our notes receivable in the event a casino project is completed by another developer. Because we ordinarily do not consider the stated rate of interest on the notes receivable to be commensurate with the risk inherent in these projects (prior to commencement of operations), the estimated fair value of the notes receivable is generally less than the amount advanced. At the date of each advance, the difference between the estimated fair value of the note receivable and the actual amount advanced is recorded as either an intangible asset (contract rights), or if the rights were acquired in a separate, unbundled transaction, expensed as period costs of retaining such rights.

Subsequent to its effective initial recording at estimated fair value using Level 3 inputs, which are defined in Codification Topic 820, *Fair Value Measurements and Disclosures* (Topic 820), as unobservable inputs that reflect management's estimates about the assumptions that market participants would use in pricing an asset or liability, the note receivable portion of the advance is adjusted to its current estimated fair value at each balance sheet date, also using Level 3 inputs.

Table of Contents

Due to the absence of observable market quotes on our notes receivable from tribal governments, management develops inputs based on the best information available, including internally-developed data, such as estimates of future interest rates, discount rates and casino opening dates as discussed below.

The estimated fair value of our notes receivable related to tribal casino projects make up approximately 10.7% of our total assets, and are the only assets in our financial statements that are reported at estimated fair value. Changes in the estimated fair value of our notes receivable are reported as unrealized gains (losses), which affect reported net income, but do not affect cash flows.

The following table reflects selected key assumptions and information used to estimate the fair value of the notes receivable for all projects at September 30, 2009 and December 31, 2008:

	September 30, 2009	December 31, 2008
Aggregate face amount of the notes receivable	\$ 6,280,475	\$ 6,281,329
Estimated years until opening of casino:		
FireKeepers		.75
Montana	1.75	1.75
Discount rate:		
FireKeepers	19%	17%
Montana	27%	23%
Estimated probability of the Montana casino opening as expected and collecting the receivable from FireKeepers:		
FireKeepers	99%	96%
Montana	70%	70%

For the portion of the notes not repaid prior to the commencement of operations, management estimates that the stated interest rates during the loan repayment terms will be commensurate with the inherent risk at that time. The estimated probability rates have been re-evaluated and modified accordingly, based on project-specific risks such as delays of regulatory approvals for the projects and review of the financing environment. The estimated casino opening dates used in the valuations take into account project-specific circumstances such as ongoing litigation, the status of required regulatory approvals, construction periods and other factors.

Factors that we consider in arriving at a discount rate include discount rates typically used by gaming industry investors and appraisers to value individual casino properties outside of Nevada and discount rates produced by the widely accepted Capital Asset Pricing Model, or CAPM, using the following key assumptions:

S&P 500, 10 and 15-year average benchmark investment returns (medium-term horizon risk premiums);

Risk-free investment return equal to the trailing 10-year average for 90-day Treasury Bills;

Investment beta factor equal to the unlevered five-year average for the hotel/gaming industry; and

Project-specific adjustments based on typical size premiums for micro-cap and low-cap companies using 10 and 15-year averages, and the status of outstanding required regulatory approvals and/or litigation, if any.

Table of Contents

Management believes that under the circumstances, essentially three critical dates and events that impact the project specific discount rate adjustment when using CAPM are: (1) the date that management completes its feasibility assessment and decides to invest in the opportunity; (2) the date that construction financing has been obtained after all legal obstacles have been removed; and (3) the date that operations commence.

We do not adjust notes receivable to an estimated fair value that exceeds the face value of the note plus accrued interest, if any. Due to the uncertainties surrounding the projects, no interest income is recognized in the consolidated financial statements during the development period, but changes in estimated fair value of the notes receivable are recorded as unrealized gains or losses in our statement of operations.

Upon opening of the casino, the difference, if any, between the then-recorded estimated fair value of the notes receivable, subject to any appropriate impairment adjustments made pursuant to Codification Topic 310, *Receivables*, and the amount contractually due under the notes would be amortized into income using the effective interest method over the remaining term of the note.

Contract rights

Contract rights are recognized as intangible assets related to the acquisition of the management agreements and periodically evaluated for impairment based on the estimated cash flows from the management contract on an undiscounted basis and amortized using the straight-line method over the lesser of seven years or contractual lives of the agreements, typically beginning upon commencement of casino operations. In the event the carrying value of the intangible assets were to exceed the undiscounted cash flow, the difference between the estimated fair value and carrying value of the assets would be charged to operations.

The cash flow estimates for each project were developed based upon published and other information gathered pertaining to the applicable markets. We have many years of experience in making these estimates and also utilize independent appraisers and feasibility consultants to assist management in developing our estimates. The cash flow estimates are initially prepared (and periodically updated) primarily for business planning purposes with the tribes and are secondarily used in connection with our impairment analysis of the carrying value of contract rights, land held for development, and other capitalized costs, if any, associated with our tribal casino projects. The primary assumptions used in estimating the undiscounted cash flow from the projects include the expected number of Class III gaming devices, table games, and poker tables, and the related estimated win per unit per day (WPUD). Generally, within reasonably possible operating ranges, our impairment decisions are not particularly sensitive to changes in these assumptions because estimated cash flows greatly exceed the carrying value of the related intangibles and other capitalized costs. We believe that the primary competitors to our Michigan project are the Four Winds Casino in southwestern Michigan, five northern Indiana riverboats and three downtown Detroit casinos, whose published WPUD has consistently averaged above the \$255 used in our undiscounted cash flow analysis. In addition, our market analysis assumes the development of another Native American casino of approximately equal size by the Gun Lake Tribe approximately 75 miles to the northwest of our facility. Our Michigan project is located approximately 100 miles west of Detroit and approximately 100 driving miles northeast of Four Winds Casino, which opened in August 2007 near New Buffalo, Michigan.

Table of Contents**Summary of assets related to tribal casino projects**

At September 30, 2009, and December 31, 2008, long-term assets associated with tribal casino projects are summarized as follows, with notes receivable presented at their estimated fair value:

	September 30, 2009	December 31, 2008
Michigan project:		
Notes receivable, tribal governments	\$ 4,682,420	\$ 4,097,002
Contract rights, net	16,209,955	16,636,358
	20,892,375	20,733,360
Other projects:		
Notes receivable, tribal governments	974,103	1,017,765
Contract rights, net	159,194	159,194
	1,133,297	1,176,959
	\$ 22,025,672	\$ 21,910,319

As previously noted, the FireKeepers project comprises the majority of long-term assets related to Indian casino projects. We have an approved management agreement with the FireKeepers Development Authority, (the Authority), for the development and operation of the FireKeepers Casino, which provides that we will receive, only from the operations and financing of the project, reimbursement for all advances we have made to the Authority and a management fee equal to 26% of the net revenues of the casino (defined effectively as net income prior to management fees) for a period of seven years commencing upon opening. As of September 30, 2009 GEM had earned \$3.6 million in management fee income related to August 2009 and \$2.2 million related to September 2009 FireKeepers Casino earnings. The terms of an amended management agreement were approved by the NIGC in April 2008. In May 2008, in connection with the funding of project financing, \$9.3 million of the notes receivable was repaid, which resulted in an increase in the estimated fair value of the notes receivable of approximately \$1.8 million, which was recorded as an unrealized gain in the first quarter of 2008. The remaining \$5.0 million of the note receivable plus interest at prime plus 1% is expected to be repaid by February 1, 2010, provided there are sufficient funds remaining in the construction disbursement account. If there are insufficient funds remaining in the construction disbursement account, the balance becomes payable in 60 equal monthly installments beginning February 1, 2010, plus interest at prime plus 1%. The net realizable value of the Michigan receivable has been classified as short term, as management believes it is collectible within the next twelve months.

In connection with the Authority's financing of the FireKeepers Casino development, GEM funded its portion of the financing costs totaling \$2.1 million which was recorded as additional contract rights related to the FireKeepers project in the second quarter of 2008. The financing costs were funded equally by the Company and RAM.

On August 5, 2009, the FireKeepers Casino commenced operations. FireKeepers Casino is located at Exit 104 directly off Interstate 94 in Battle Creek, Michigan. FireKeepers has a 107,000 square foot gaming floor with 2,680 slot machines, 78 table games, a 120-seat poker room and a bingo hall. In addition, the property features five restaurants including a 70-seat fine dining signature restaurant, a 300-seat buffet and 150-seat 24-hour cafe, as well as approximately 3,000 parking spaces including an enclosed 2,080-space parking garage attached to the casino.

Presently, we are not obligated to fund the construction phase of our Northern Cheyenne project in Montana. The recent unprecedented global contraction in available credit significantly decreases the likelihood that financing could be obtained on favorable terms if at all for the Montana project this year. However, we believe that credit markets will improve sufficiently in order for the Montana tribe to fund the project when we are expected to commence construction in the second quarter of 2010. The Northern Cheyenne Tribal government has been replaced and we are

in the process of engaging them in dialogue concerning the proposed project. It has taken much longer than expected to engage the new tribal government in revitalizing the project. We recently met with the new tribal leadership on July 23, 2009. If the Montana tribe is unable to obtain funding on acceptable terms, we believe we could either sell our rights to the Montana project, find a partner with funding, or abandon the Montana project and have our receivables reimbursed from the gaming operations, if any, developed by another party. However, if we were to discontinue the Montana project, the related receivables and intangibles would then be evaluated for impairment.

At September 30, 2009, the notes receivable from Indian tribes have been discounted approximately \$623,952 below the contractual value of the notes and the related contract rights are valued substantially below the anticipated cash flow from the management fees of the projects.

Table of Contents

In March 2008, we announced that we are no longer pursuing the Nambé Pueblo project. No tribal advances or payment of costs have been made since January 2008. Pursuant to the terms of the development agreement, the Pueblo has recognized its obligation to reimburse all of the Company's development advances for the project. To date, we have advanced \$661,600 for the development of the project, all of which is expected to be reimbursed by the Pueblo on yet to be negotiated terms. The estimated fair value of the receivable from the Pueblo is now based on the assumption that the Pueblo will develop a smaller scope project and will repay the advances over a five-year period after the project opens with interest at prime plus 2%. However, the collectability ultimately depends on the successful development and operation of the project, which we have no influence over, and accordingly, we have discounted the payment stream using a 23% discount rate. In March 2009, the Company entered into an agreement to assist the Nambé Pueblo in finding suitable financing up to \$12.0 million for their proposed slot parlor. In September 2009, we were notified that the Pueblo had secured financing from a third-party source. The Pueblo has restated its intent to repay the development advances from the proceeds of the gaming facility. Construction is expected to commence in November 2009 with a timeline of approximately eight months.

During the second quarter of 2008, management formally approved and began executing a plan to sell land purchased for the development of the Manuelito project. As a result, as of June 30, 2008, the land was classified as a current asset held for sale and adjusted to its then estimated net realizable value of \$45,000, resulting in an impairment loss of \$85,000 recognized in the second quarter of 2008. During the second quarter of 2009, the Company recognized an additional \$30,000 impairment loss as a result of the decline in the estimated net realizable value. During the current quarter ended September 30, 2009, the Company increased the value of the land to \$19,669 and recognized a gain before tax of \$4,669 as a result of the October 15, 2009 sale of the Manuelito land for \$24,500 less closing costs of \$4,831.

Advances to tribes are expected to be repaid prior to commencement of operations, or within the repayment term of typically between five and seven years, commencing 30 to 180 days after the opening of the project. At September 30, 2009, we estimate the following potential exposure resulting from a project not reaching completion:

		Nambé Pueblo	Northern Cheyenne Tribe	Total
September 30, 2009	FireKeepers			
Notes receivable	\$ 4,682,420	\$ 430,467	\$ 543,636	\$ 5,656,523
Contract rights	16,209,955		159,194	16,369,149
Total	\$ 20,892,375	\$ 430,467	\$ 702,830	\$ 22,025,672

Amortization of contract rights is expected to be provided on a straight-line basis over the contractual lives of the assets. The contractual lives may include, or not begin until after a development period and/or the term of the subsequent management agreement. Because the development period may vary based on evolving events, the estimated contractual lives may require revision in future periods. The FireKeepers casino opened on August 5, 2009, and as a result, the contract rights associated with the FireKeepers project began being amortized in the third quarter of 2009 on a straight-line basis over the seven year term of the GEM management agreement.

Due to the financing and development arrangement for the Michigan project through GEM, a 50%-owned joint venture, we believe we were exposed to the majority of risk of economic loss from the joint venture's activities. Therefore, in accordance with Codification Topic 810, *Consolidation*, we consider the joint venture to be a variable interest entity that requires consolidation in our financial statements.

Results of continuing operations**Three Months Ended September 30, 2009, Compared to Three Months Ended September 30, 2008**

Operating revenues. For the three months ended September 30, 2009, total operating revenues from continuing operations increased \$5.5 million, or 224%, as compared to the prior year. The increase is primarily due to \$5.8 million of management fees from FireKeepers related to August and September 2009, and is offset by a decrease in casino and food and beverage revenues of \$220,506, or 12% and \$55,951, or 11%, respectively, primarily due to

continued economic weakness in the Northern Nevada market.

Operating costs and expenses. For the three months ended September 30, 2009, total operating costs and expenses increased \$533,771, or 18%, as compared to the prior year, primarily consisting of an increase in depreciation and amortization of \$355,321, or 116% and selling, general and administrative expenses of \$222,073, or 15%, offset by reduced food and beverage expenses of \$107,664, or 18%. The increase in depreciation and amortization was due to \$386,284 of GEM gaming rights amortization, which commenced with the FireKeepers opening. The increase in selling, general and administrative expense was primarily due to increases at the corporate level explained below. The reduction in casino and food and beverage expenses is due to lower casino play and revenue and general cost reduction efforts.

Table of Contents

Project development costs. For the three months ended September 30, 2009, project development costs increased \$45,732 or 73%, as compared to the prior year, due to an increase of \$35,667, or 71% at the corporate level and \$9,375 related to GEM, or 82%. The higher project development costs at the corporate level and GEM are related to new business development and travel expenses.

Selling, general and administrative expense. For the three months ended September 30, 2009, selling, general and administrative expenses increased \$222,073, or 15%, as compared to the prior period mainly due to corporate level incentive cash compensation accruals resulting from the successful opening of the FireKeepers Casino of \$414,875 offset by a decrease in stock compensation expense due to certain grants becoming fully amortized of \$190,613, or 85% as compared to the prior year period.

Operating gains. For the three months ended September 30, 2009, operating gains decreased by \$1.9 million, or 129%. The decrease is primarily due to the GEM Financial Resolution clarifying the treatment of certain reimbursables and repayments (See Note 7 to the consolidated financial statements) of \$2.1 million (which, after netting a \$3.5 million credit allocated to the non-controlling interest resulted in a net pre-tax gain of \$1.4 million). The member agreement modification was offset in operating gains by an increased unrealized gain on notes receivable of \$111,285 or 81% and increase in equity in net income of unconsolidated joint venture of \$87,807, or 6%. The unrealized gain on notes receivable has increased due to the opening of FireKeepers in early August 2009 as well as the approaching opening dates of the Montana project and Nambe Pueblo slot parlor.

Other income (expense). For the three months ended September 30, 2009, other income increased by \$153,625, or 172% primarily due the increase of interest income of \$79,652, or 240% and a decreased interest expense of \$73,973, or 60%. The increase in interest income results from the interest recorded on the tribal receivable from the FireKeepers casino and the decrease in interest expense is related to the reduction of outstanding debt on the Company's revolving line of credit.

Income taxes. For the three months ended September 30, 2009, the estimated effective annual income tax rate applied to the quarter is approximately 36%, compared to 41% for the same period in 2008. The decrease in the estimated effective annual tax rate applied to the comparable quarter in the prior year is due primarily to the member agreement modification of \$2.1 million during 2009.

Non-controlling interest. For the three months ended September 30, 2009, the net loss attributable to non-controlling interest in consolidated joint venture increased by \$718,483, or 760%. The increase is attributable to the net loss in GEM of \$1.6 million, 50% of which the Company consolidates. The GEM net loss was due primarily to a \$7.0 million loss relating to the GEM Financial Resolution (See Note 7 to the consolidated financial statements), offset by approximately \$5.8 million in management income.

Nine Months Ended September 30, 2009, Compared to Nine Months Ended September 30, 2008

Operating revenues. For the nine months ended September 30, 2009, total operating revenues from continuing operations increased \$5.2 million or 70%, as compared to the prior year, primarily due to the \$5.8 million in management fee income related to the FireKeepers casino which opened in August 2009, offset by decreases in food and beverage revenues of \$302,141, or 19% and casino revenues of \$229,788, or 4%. We believe the decrease in food and beverage activity is consistent with the general economic weakness and increased competition. The decrease in casino revenues is primarily due to continued economic weakness in the Northern Nevada market.

Operating costs and expenses. For the nine months ended September 30 2009, total operating costs and expenses decreased \$136,260, or 1% as compared to the prior year, primarily due to a decrease in food and beverage expenses of \$298,308 or 17% and casino expenses of \$114,635 or 6%. The reduction in food and beverage expenses is primarily due to a reduction in net allocations of \$148,810 due to the method of allocation, a decrease in cost of goods sold of \$102,815 or 15% and a reduction of labor and related expenses of \$38,577 or 4% over the prior year period. The reduction in casino expenses is primarily due to a reduction in slot participation and conversion expenses of \$57,588 or 16% and a decrease in gaming taxes of \$25,279 or 6%.

Table of Contents

Project development costs. For the nine months ended September 30, 2009, project development costs increased \$6,114 or 5%, as compared to the prior year, due to an increase of \$37,010 or 72% at the corporate level, offset by lower project development expenses related to GEM of \$40,008, or 45%. The increase in project development costs at the corporate level in the current year is related to new business development.

Selling, general and administrative expense. For the nine months ended September 30, 2009, selling, general and administrative expenses decreased \$61,051, or 1%, as compared to the 2008 period mainly due to decreased selling, general and administrative expenses at Stockmans of \$101,309, or 7% and at the corporate level of \$37,678, or 1%, offset by increases at GEM of \$80,175, or 26%. The decrease in Stockmans expenses was mostly due to a decrease in labor and related expenses of \$78,397, or 10% and a decrease in equipment rental expense of \$49,790 or 96%, as compared to the prior year period. The decrease at the corporate level was primarily related to the decrease in labor and related expenses and the increase at GEM was primarily related to an increase of corporate management and accounting related fees.

Operating gains. For the nine months ended September 30, 2009, operating gains decreased by \$3.5 million, or 65%. The decrease is primarily due to the GEM Financial Resolution clarifying reimbursables and repayments (See Note 7 to the consolidated financial statements) of \$2.1 million (which, after netting a \$3.5 million credit allocated to the non-controlling interest resulted in a net pre-tax gain of \$1.4 million). Also, the unrealized gain on notes receivables was lower than last year by \$1.4 million, primarily due to a gain for GEM in the prior year of \$1.6 million, as a result of repayment of \$9.3 million of the tribal receivable.

Other income (expense). For the nine months ended September 30, 2009, other income increased by \$244,762, or 84% primarily due to the decrease of interest expense of \$225,197, or 54% due to the reduction in interest expense related to the reduction of outstanding debt on the Company's revolving line of credit.

Income taxes. For the nine months ended September 30, 2009, the effective income tax rate is approximately 38%, compared to 40% for the same period in 2008. The decrease in the estimated effective annual tax rate applied to the comparable quarter in the prior year is due primarily to the member agreement modification of \$2.1 million during 2009.

Non-controlling interest. For the nine months ended September 30, 2009, the net loss attributable to non-controlling interest in consolidated joint venture increased by \$1.4 million, or 294%. The increase is attributable to the net loss in GEM of \$1.9 million, 50% of which the Company consolidates, as compared to net income in the prior year. The GEM net loss was due primarily to a \$7.0 million loss relating to the GEM Financial Resolution (See Note 7 to the consolidated financial statements), offset by approximately \$5.8 million in management income.

Liquidity and capital resources

The United States is currently experiencing a widespread recession accompanied by, among other things, instability in the investment and commercial banking systems, reduced credit availability and highly curtailed gaming and other recreational activities, and it is also engaged in war. The effects and duration of these conditions and related risks and uncertainties on the Company's future operations and cash flows cannot be estimated at this time but may be significant.

Subject to the future unknown effects of the foregoing uncertainty about credit availability and other economic factors affecting casino gaming activity, we believe that our casino development projects currently in progress will likely be constructed and ultimately, will achieve profitable operations; however, no assurance can be made that this will occur or how long it will take. If our casino development projects currently in progress are not completed, or upon completion, if we fail to successfully compete within a reasonable timeframe in the highly competitive and currently declining market for gaming activities, we may lack the funds to compete for and develop future gaming or other business opportunities.

Table of Contents

The FireKeepers casino, Delaware joint venture and Stockman's Casino operation are currently our primary source of recurring income and significant positive cash flow. GEM began earning management fees from FireKeepers Casino in the third quarter of 2009, with the first payments being made in September. Distributions from the Delaware operation are governed by the terms of the applicable joint venture agreement and management reorganization agreement. We expect to continue receiving management fees as currently prescribed under the joint venture agreement, with a minimum guaranteed growth factor over the prior year of 5% in years 2009 through August 2011.

On a consolidated basis for the nine months ended September 30, 2009, cash provided by operations increased by \$3.5 million from the same period in 2008. Cash provided by investing activities decreased by \$14.0 million from the same nine-month period of last year, primarily due to the cash proceeds generated from the sale of the Holiday Inn Express in February 2008 of \$7.0 million and the \$9.3 million payment received by GEM on its notes receivable from the Authority in May 2008, offset by \$2.1 million used to acquire contract rights related to GEM. Cash used in financing activities decreased \$14.2 million, primarily due to the repayment of long-term debt in 2008, also associated with the sale of the Holiday Inn Express. As of September 30, 2009, the Company had approximately \$7.8 million in cash and availability on its revolving credit facility.

Our future cash requirements include funding the remaining near and long-term cash requirements of our development expenses for the Montana project, selling, general and administrative expenses, capital expenditures primarily at Stockman's and debt service. Subject to the economic uncertainties discussed above, we believe that adequate financial resources will be available to execute our current growth plan from a combination of operating cash flows and external debt and equity financing. However, continued downward pressure on cash flow from operations due to, among other reasons, the adverse effects of the current economic environment and/or the lack of available funding sources due to, among other reasons, the recent unprecedented global contraction in available credit increases uncertainty with respect to our development and growth plans.

On May 6, 2008, the Authority closed on the sale of \$340.0 million of Senior Secured Notes and a \$35.0 million equipment financing facility to fund the development and construction of the tribe's FireKeepers Casino in Michigan. On the same date, GEM received a payment of approximately \$9.3 million on its notes receivable from the Authority, with the remaining \$5.0 million, plus interest at prime plus 1%, to be paid by February 1, 2010, subject to there being adequate funds remaining in the construction disbursement account. If there are insufficient funds to repay the remaining balance, the Authority will be obligated to repay the balance in 60 monthly installments beginning February 1, 2010, plus interest at prime plus 1%. On the same day, GEM funded \$2.1 million in financing costs on behalf of the Authority, as required by the management agreement, which was recorded as additional gaming rights related to the Michigan project. The Company and RAM each contributed one-half of the funds to GEM for GEM to make this funding. The FireKeepers Casino commenced operations on August 5, 2009.

Long-term debt includes a reducing revolving loan from Nevada State Bank. The maximum committed amount under the Revolver was increased from \$8.1 million to \$8.9 million, based upon the amendment to the Revolver dated June 25, 2009 and the repayment terms were amended (as discussed below). The maximum amount permitted to be outstanding under the Revolver decreased \$312,000 on July 1, 2009. Effective January 1, 2010, based upon the amendment to the Revolver, the maximum amount permitted to be outstanding decreases \$329,000 semiannually on January 1 and July 1 of each year and any outstanding amounts above such reduced maximum must be repaid on each such date. The reducing revolving loan is payable over 15 years at a variable interest rate based on the five-year LIBOR/Swap rate plus 2.1%. This rate, which was 7.24% and 7.39% per annum as of September 30, 2009 and September 30, 2008, adjusts annually based on the funded debt to EBITDA ratio of Stockman's, with adjustments based on the five-year LIBOR/Swap rate occurring every five years. The balance on the loan as of September 30, 2009 was \$725,264. In addition, periodic payment requirements were reduced on a pro-rate basis, with no required principal payments until July 2021. The Company had \$7.8 million of availability under its revolving credit line as of September 30, 2009.

The loan agreement with Nevada State Bank also contains customary financial representations and warranties and requires that Stockman's maintain specified financial covenants, including a fixed charge coverage ratio, a funded debt to EBITDA ratio and a minimum tangible net worth. In addition, the loan agreement limits the amount of distributions from and capital expenditures by Stockman's. The loan agreement also provides for customary events of default

including payment defaults and covenant defaults.

Table of Contents

On June 30, 2009 the Company paid off the Peters promissory note of \$722,110 plus \$4,477 in accrued interest with a drawdown of the Revolver. The original amount of the promissory note was \$1.25 million, payable to the seller of Stockman's, was payable in 60 monthly installments of principal and interest and was secured by a second lien in the real estate of Stockman's. Effective July 9, 2009 the second lien in the real estate of Stockman's was released.

As of September 30, 2009, the Company held \$6.9 million with Nevada State Bank, a subsidiary of Zions Bancorporation, including balances of \$2.6 million which sweep into an outside U. S. Government money market account. The Street.com rated Zions C- in their October 5, 2009 rating stating the institution offers fair financial security, is currently stable, and will likely remain relatively healthy as long as the economic environment avoids the extremes of inflation or deflation. In a prolonged period of adverse economic or financial conditions, however, this institution may encounter difficulties maintaining its financial stability.

FireKeepers project

GEM, our FireKeepers Casino joint venture, has the exclusive right to arrange the financing and provide casino management services to the Michigan tribe in exchange for a management fee of 26% of net revenues (defined effectively as net income before management fees) for seven years commencing upon opening of the FireKeepers Casino. The terms of our management agreement were approved by the NIGC in December 2007 and a revised management agreement was approved in April 2008 to incorporate the terms of the project financing.

In 2007, GEM acquired all of Green Acres' interests in the FireKeepers project for \$10.0 million. GEM's members equally funded an initial deposit of \$500,000 in the second quarter of 2007, and the remaining balance was paid in May 2008. The repayment was funded with \$9.3 million of proceeds received from a partial payment on the notes receivable related to the FireKeepers project, which was tied to the construction financing for the project. The remaining \$5.0 million of notes receivable from the Authority, plus interest at prime plus 1%, are now expected to be paid from the construction disbursement account by February 1, 2010. However, if there are insufficient funds in the construction disbursement account, the Authority is obligated to repay the \$5.0 million in 60 equal monthly installments, with interest at prime plus 1%, beginning February 1, 2010. The net realizable value of the Michigan receivable has been classified as short term, as the Company believes it is collectible within the next twelve months.

In 2002, in exchange for funding a portion of the development costs, RAM advanced us \$2.4 million, which was partially convertible into a capital contribution to the GEM joint venture upon federal approval of the land into trust application and federal approval of the management agreement with the Authority, subsequently, RAM exercised its conversion option on its \$2.4 million loan to the Company. As a result, \$2.0 million of the loan was converted to a capital contribution to the GEM joint venture, and the loan balance of \$381,260, plus \$611,718 of accrued interest on the original loan, became a liability of GEM. At September 30, 2009, GEM's total liabilities to RAM including accrued interest were approximately \$5.8 million, which bear no interest effective September 30, 2009, and are expected to be repaid by 2010. For the nine month period ending September 30, 2009, FHR had loaned \$978,400 and RAM had loaned \$978,400 to GEM to fund current operating expenses.

The FireKeepers Casino commenced operations on August 5, 2009. FireKeepers Casino is located at Exit 104 directly off Interstate 94 in Battle Creek, Michigan. FireKeepers has a 107,000 square foot gaming floor with 2,680 slot machines, 78 table games, a 120-seat poker room and a bingo hall. In addition, the property features five restaurants including a 70-seat fine dining signature restaurant, a 300-seat buffet and 150-seat 24-hour cafe, as well as approximately 3,000 parking spaces including an enclosed 2,080-space parking garage attached to the casino. Although certain distributions (including a minimum guaranteed monthly payments to the Tribe of \$50,000, a preferred payment to the Tribe of \$200,000 and repayment of loan principal to be paid out of the Tribe's share of net revenues) will be paid from net revenue prior to the payment to the Company of the management fee, the Company believes the property will generate sufficient revenues to pay the management fee equal to 26% of net revenues on a monthly basis.

Table of Contents

On October 9, 2009, effective September 30, 2009, an agreement was reached between the Company and RAM (GEM Financial Resolution) clarifying the treatment of the following items:

Reimbursable amounts funded by the members, due from the Michigan tribe before the RAM buy-in as the prior agreements were silent on reimbursements to members.

Non-reimbursable amounts funded by the Company, related to the Michigan tribe, as the prior agreements were unclear if these were reimbursable by GEM to the Company.

Repayments of disproportionate advances by the Company as prior agreements were unclear as to what percentages would be used regarding repayment.

As a result, payables due from GEM to each member were adjusted to reflect a total payable due to RAM of \$8.5 million, including \$2.7 reported as equity, and a total payable due to FHR of \$11.9 million, including \$2.7 reported as equity, resulting in the recognition of a net pre-tax gain \$1.4 million, which was recorded in September 2009. The net pre-tax gain is distributed gross on the statements of operations for the periods ended September 30, 2009, as a \$2.1 million charge characterized as a member agreement modification offset by a \$3.5 million credit attributable to the non-controlling interest. In addition, the GEM members agreed that distributions to the members will be made on a 50/50 basis to both members until such time RAM's member payable has been fully repaid and thereafter 70% to the Company and 30% to RAM until such time as the remaining payable to the Company has been repaid. Thereafter, distributions to members will be made on a 50/50 basis. Also, no further interest accruals will be made on any member's payables. As a result of the GEM member agreement, the Company has reclassified the due to joint venture affiliate of \$5.8 million as current portion of long-term debt with the balance of the RAM payable classified as joint venture equity (Note 11).

Other projects

In 2005, we entered into development and management agreements with the Montana tribe for a proposed casino to be built approximately 28 miles north of Sheridan, Wyoming. The Montana tribe currently operates the Charging Horse casino in Lame Deer, Montana, consisting of 100 gaming devices, a 300-seat bingo hall and restaurant. As part of the agreements, we have committed on a best efforts basis to arrange financing for the costs associated with the development and furtherance of this project up to \$14.0 million. The site for the Northern Cheyenne Tribe project was approved for gaming by the Secretary of the Interior as of October 28, 2008, and the required consent of the Governor of Montana was received as of July 30, 2009. As of September 30, 2009, our advances to the Northern Cheyenne Tribe total \$672,082. Our agreements with the tribe provide for the reimbursement of these advances either from the proceeds of the financing of the development, the actual operation itself or, in the event that we do not complete the development, from the revenues of the tribal gaming operation undertaken by others. As of September 30, 2009, management's estimate of the opening date for the Montana casino is the second quarter of 2011. We are in negotiation with the new tribal leadership to determine the proper size and scope of the gaming facility with regard for the current economic conditions and availability of funding.

In 2005, we signed gaming development and management agreements with the Nambé Pueblo of New Mexico to develop a 50,000 square foot facility including gaming, restaurants, entertainment and other amenities as part of the Pueblo's multi-phased master plan of economic development. In March 2008, management announced that the Company was no longer pursuing the Nambé Pueblo project. Pursuant to the terms of the development agreement, the Pueblo has recognized the obligation to reimburse all of the Company's development advances for the project. The Company currently has advanced \$661,600 for the development of the project, all of which is expected to be reimbursed by the Pueblo on yet to be negotiated terms. The receivable from the Pueblo is valued based on the present value of a five-year collection period and a 23% discount rate. The collectability ultimately depends on the quality and timing of the project development, which we are monitoring but have no influence over. In September 2009, we were notified that the Pueblo had secured financing from a third-party source for their proposed slot parlor. The Pueblo has restated its intent to repay the development advances from the proceeds of the gaming facility. Construction is expected to commence in November 2009 with an expected timeline of approximately eight months.

Table of Contents

Additional projects are considered based on their forecasted profitability, development period, regulatory and political environment and the ability to secure the funding necessary to complete the development, among other considerations. As part of our agreements for tribal developments, we typically fund costs associated with projects which may include legal, civil engineering, environmental, design, training, land acquisition and other related advances while assisting the tribes in securing financing for the construction of the project. The majorities of these costs are advanced to the tribes and are reimbursable to us, pursuant to management and development agreements, as part of the financing of the project's development. While each project is unique, we forecast these costs when determining the feasibility of each opportunity. Such agreements to finance costs associated with the development and furtherance of projects are typical in this industry and have become expected of tribal gaming developers.

Our agreements with the various Indian tribes contain limited waivers of sovereign immunity and, in many cases, provide for arbitration to enforce the agreements. Generally, our only recourse for collection of funds under these agreements is from revenues, if any, of prospective casino operations.

Presently, we are not obligated to fund the construction phase of our Northern Cheyenne project in Montana. The FireKeepers casino development financing has been secured by the Tribe. The recent unprecedented global contraction in available credit significantly decreases the likelihood that financing could be obtained on favorable terms if at all for the Montana project this year. However, we believe that credit markets will improve sufficiently in order for the Montana tribe to fund the project when we are expected to commence construction in the second quarter of 2010. The Northern Cheyenne Tribal government has been replaced and we are in the process of engaging them in dialogue concerning the proposed project. If the Montana tribe is unable to obtain funding on acceptable terms, we believe we could either sell our rights to the Montana project, find a partner with funding, or abandon the Montana project and have our receivables reimbursed from the gaming operations, if any, developed by another party. However, if we were to discontinue the Montana project, the related receivables and intangibles would then be evaluated for impairment. At September 30, 2009, the notes receivable from Indian tribes have been discounted approximately \$623,952 below the contractual value of the notes and the related contract rights are valued substantially below the anticipated cash flow from the management fees of the projects.

Seasonality

We believe that our casino operations, including Stockman's and FireKeepers Casino, and our estimates of completion for projects in development may be affected by seasonal factors, including holidays, adverse weather and travel conditions. Our cash flow from GED is affected by our management agreement with Harrington where GED's second quarter cash flow has been reduced by a rebate of management fees which forms the basis of GED's on-going cash flow according to the amended management agreement. Accordingly, our results of operations may fluctuate from year to year and the results for any year may not be indicative of results for future years.

Regulation and taxes

We and our casino projects are subject to extensive regulation by state and tribal gaming authorities. We will also be subject to regulation, which may or may not be similar to current state regulations, by the appropriate authorities in any jurisdiction where we may conduct gaming activities in the future. Changes in applicable laws or regulations could have an adverse effect on us.

The gaming industry represents a significant source of tax revenues to regulators. From time to time, various federal legislators and officials have proposed changes in tax law, or in the administration of such law, affecting the gaming industry. It is not possible to determine the likelihood of possible changes in tax law or in the administration of such law. Such changes, if adopted, could have a material adverse effect on our future financial position, results of operations and cash flows.

Off-balance sheet arrangements

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Table of Contents

Item 3. Quantitative and qualitative disclosures about market risk

Market risk is the risk of loss from changes in market rates or prices, such as interest rates and commodity prices. We are exposed to market risk in the form of changes in interest rates and the potential impact such changes may have on our variable rate debt. We have not invested in derivative based financial instruments.

Our cash and cash equivalents are not subject to significant interest rate risk due to the short maturities of these instruments. As of September 30, 2009, the carrying value of our cash and cash equivalents approximates fair value. However, we have cash on deposit with financial institutions substantially in excess of federally-insured limits, and the risk of losses related to such concentrations may be increasing as a result of economic developments.

Of our total outstanding debt of approximately \$6.5 million at September 30, 2009, only \$725,264 of the entire balance is subject to variable interest rates, which averaged 7.2% during the current quarter. The applicable interest rate is based on the prime lending rate or the five-year LIBOR/Swap rate; and therefore, the interest rate will fluctuate as the index lending rate changes. Based on our outstanding variable rate debt at September 30, 2009, a hypothetical 100 basis point (1%) change in rates would result in an annual interest expense change of approximately \$7,253. At this time, we do not anticipate that either inflation or interest rate variations will have a material impact on our future operations.

Item 4(T). Controls and Procedures

Evaluation of Disclosure Controls and Procedures As of September 30, 2009, we completed an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rule 13a-15(e) and 15d-15(e)). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective at a reasonable assurance level in timely alerting them to material information relating to us which is required to be included in our periodic Securities and Exchange Commission filings.

Changes in Internal Control Over Financial Reporting There have been no changes during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

On June 19, 2009, Harrington Raceway, Inc. filed a demand for arbitration, disputing the formula for computing the minimum payment of our share of the management fee pursuant to the Management Reorganization Agreement dated June 18, 2007. The demand for arbitration does not contain a traditional claim for relief, commonly called a "Prayer for Relief", and does not specify whether it seeks damages, a specific dollar amount, or whether it seeks merely a declaration concerning the formula. No formal response is required; however, through legal counsel we have appeared in the matter and intend to vigorously defend the proceeding. It is too early in the proceedings in light of the lack of a demand for a remedy in the demand for arbitration to determine whether there is or the extent of any liability. A hearing date has been fixed for February 16 and 17, 2010.

Item 6. Exhibits

- 10.1 Amendment to Reducing Revolving Loan Agreement dated as of the 25th day of June, 2009, by and between the Company and Nevada State Bank, incorporated by reference to Exhibit 10.1, to the Company's Form 8-K filed on July 1, 2009.
- 10.2 Amendment to Reducing Revolving Promissory Note dated as of the 25th day of June, 2009, by and between the Company and Nevada State Bank, incorporated by reference to Exhibit 10.2, to the Company's Form 8-K filed on July 1, 2009.
- 31.1 Certification of principal executive officer pursuant to 18 U.S.C. section 1350, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002*
- 31.2 Certification of principal financial officer pursuant to 18 U.S.C. section 1350, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002*
- 32.1 Certification of principal executive officer pursuant to 18 U.S.C. section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002*
- 32.2 Certification of principal financial officer pursuant to 18 U.S.C. section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002*
