SECTION 7 Regulation FD

Item 7.01 Regulation FD

AAM's Full Year 2009 update:

AAM's full year sales in 2009 were approximately \$1.5 billion.

AAM's content-per-vehicle was \$1,403 for the full year 2009. AAM's content-per-vehicle is measured by the dollar value of its product sales supporting GM's North American light truck and SUV programs and Chrysler's Heavy Duty Dodge Ram pickup trucks.

AAM expects to report a profit in the fourth quarter of 2009.

AAM has filed a U.S. tax refund claim under the Worker, Homeownership, and Business Assistance Act of 2009. Applicable provisions of the Act allow AAM to carryback its 2008 net operating loss 5 years (from 2 previously) to 2003. AAM's refund claim related to this special 5-year carryback election is \$48.8 million.

AAM's cash and liquidity update:

AAM expects to report positive free cash flow for the fourth quarter of 2009.

- o AAM defines free cash flow to be net cash provided by (or used in) operating activities less capital expenditures net of proceeds from the sales of equipment and dividends paid.
- o AAM believes free cash flow is a meaningful measure as it is commonly utilized by management and investors to assess the ability to generate cash flow from business operations to repay debt and return capital to stockholders. Other companies may calculate free cash flow differently.

As of December 31, 2009, AAM had approximately \$481 million of liquidity, consisting of available cash, short-term investments and committed borrowing capacity on AAM's U.S. credit facilities, including the GM Second Lien Term Credit Facility. This compares to a committed liquidity position of approximately \$370 million at September 30, 2009.

AAM's capital spending update:

Full Year 2009:

AAM's full year capital spending in 2009 was approximately \$141 million.

Full Year 2010:

AAM expects full year capital spending in 2010 to approximate 4%-5% of sales.
