GSK is changing Results and strategic priorities 2009

---

GSK is changing Dear Shareholder I am pleased to report that GSK has made significant progress to transform its business model and we are confident that the company's long-term prospects are improving. We are focused on delivering three strategic priorities to deliver more growth, reduce risk and improve the long-term financial performance on a sustainable basis for shareholders. To be a successful and sustainable business we must also fulfil our social responsibilities. We are doing this by making our company more responsible, more flexible and more open. Strategic priorities o Grow a diversified global business - We are diversifying our business to create a more balanced product portfolio and move away from a reliance on traditional white pill/ western markets . We are investing in key growth areas such as Emerging Markets, Japan, Vaccines and our Consumer Healthcare business. o Deliver more products of value - We aim to sustain an industry-leading pipeline of products, ensuring that they demonstrate value for healthcare providers. Our R&D strategy is built around focusing on the best science, diversifying through externalisation of research, and improving the returns on investment. o Simplify the operating model - GSK is a large and complex organisation. We are transforming our operating model to reduce complexities, improve efficiency and reduce costs. The world of GSK ([www.gsk.com/annualreport](http://www.gsk.com/annualreport)) To demonstrate the progress we are making against these priorities and the further measures we have taken to operate with responsibility and integrity, we have created the world of GSK, a website that contains stories from around the globe. I hope you find them interesting and helpful in explaining the changes we are making at GSK. Andrew Witty Chief Executive Officer To find out more visit us at [www.gsk.com](http://www.gsk.com)
