**EMISPHERE TECHNOLOGIES, INC.**

**NOTES TO CONDENSED FINANCIAL STATEMENTS**

**1. Nature of Operations and Liquidity**

**Nature of Operations.** Emisphere Technologies, Inc. ( Emisphere , our , us , the Company or we ) is a biopharmaceutical company that focuses on our improved delivery of therapeutic molecules and pharmaceutical compounds using its Eligen® Technology. These molecules and compounds could be currently available or are in pre-clinical or clinical development.

Our core business strategy is to develop oral forms of drugs that are not currently available or have poor bioavailability in oral form, either alone or with corporate partners, by applying the Eligen® Technology to those drugs. Typically, the drugs that we target have received regulatory approval, have demonstrated safety and efficacy, and are currently available on the market. Since inception, we have no product sales from these product candidates. However, in November 2009 the Company launched its first commercially available product, oral Eligen® B12 (100mcg), which had been specifically developed to help improve Vitamin B12 absorption and bioavailability with a patented formulation.

**Liquidity.** As of June 30, 2010, we had approximately \$0.7 million in cash and restricted cash, approximately \$22.2 million in working capital deficiency, a stockholders' deficit of approximately \$73.4 million and an accumulated deficit of approximately \$468.8 million. Our net loss and operating loss for the three months ended June 30, 2010 were approximately \$13.7 million and \$3.1 million, respectively and \$32.2 million and \$6.1 million, respectively for the six months ended June 30, 2010.

On July 29, 2010, we issued a promissory note (the July 2010 MHR Note ) to MHR Institutional Partners IIA LP and MHR Institutional Partners II LP (together, MHR ) in the principal amount of \$525,000. The July 2010 MHR Note provides for an interest rate of 15% per annum, with the entire principal amount due and payable on October 27, 2010 (the Maturity Date ). The Maturity Date will be accelerated, in certain circumstances, to the date that is two business days following the receipt by the Issuer of at least \$1,000,000 aggregate cash proceeds from third parties, whether in connection with certain financing transactions, commercial transactions or otherwise. The obligations under the July 2010 MHR Note are secured in accordance with the terms of the Amendment (the Amendment ) to the Pledge and Security Agreement whereby Emisphere and MHR amended that certain Pledge and Security Agreement, dated as of September 26, 2005 (the Security Agreement ) to extend the terms of the Security Agreement other than the intellectual property licensed to Novartis Pharma AG ( Novartis ) pursuant to the Master Agreement and Amendment dated June 4, 2010 by and between Emisphere and Novartis, as further described below, to include the principal, interest and other obligations provided under the July 2010 MHR Note. In accordance with the terms of that certain 11.00% Senior Secured Convertible Note issued by the Emisphere to MHR and due September 26, 2012, MHR also provided a written consent to allow for the issuance of the Note and related obligations provided under the Amendment.

In April 2005, the Company entered into an amended and restated employment agreement with its then Chief Executive Officer, Dr. Michael M. Goldberg, for services through July 31, 2007. On January 16, 2007, the Board of Directors terminated Dr. Goldberg's services. On April 26, 2007, the Board of Directors held a special hearing at which it determined that Dr. Goldberg's termination was for cause. On March 22, 2007, Dr. Goldberg, through his counsel, filed a demand for arbitration asserting that his termination was without cause and seeking \$1,048,000 plus attorney's fees, interest, arbitration costs and other relief alleged to be owed to him in connection with his employment agreement with the Company. During the arbitration, Dr. Goldberg sought a total damage amount of at least \$9,223,646 plus interest. On February 11, 2010, the arbitrator issued the final award in favor of Dr. Goldberg for a total amount of approximately \$2,333,115 as full and final payment for all claims, defenses, counterclaims, fees and related matters. The Company opposed Dr. Goldberg's petition to confirm the arbitration award. On July 12, 2010 the award was confirmed by the court. As of August 10, 2010, the Company adjusted its estimate of costs to settle this matter to approximately \$2.6 million to account for potential additional interest costs on the settlement amount and additional legal fees. Dr. Goldberg has proposed an order of settlement in the amount of approximately \$2.6 million and seeks to have a final order entered August 16, 2010.

## **Table of Contents**

On June 4, 2010, we entered into a Master Agreement and Amendment with Novartis (the "Novartis Agreement"). Pursuant to the Novartis Agreement, the Company was released and discharged from its obligations under the Novartis Note in exchange for (1) the reduction of future royalty and milestone payments up to an aggregate amount of \$11.0 million due the Company under the Research Collaboration and Option Agreement, dated as of December 3, 1997, as amended on October 20, 2000, and the License Agreement, dated as of March 8, 2000, for the development of an oral salmon calcitonin product for the treatment of osteoarthritis and osteoporosis.; (2) the right for Novartis to evaluate the feasibility of using Emisphere's Eligen® Technology with two new compounds to assess the potential for new product development opportunities; and (3) other amendments to the Research Collaboration and Option Agreement and License Agreement. As of the date of the Novartis Agreement, the outstanding principal balance and accrued interest of the Novartis Note was approximately \$13.0 million.

We anticipate that we will continue to generate significant losses from operations for the foreseeable future, and that our business will require substantial additional investment that we have not yet secured. As such, we anticipate that our existing cash resources, including the amounts provided by MHR in connection with the July 2010 MHR Note but not accounting for an approximately \$2.6 million arbitration award in favor of the Company's former CEO, will enable us to continue operations through approximately August 31, 2010 or earlier if unforeseen events arise that negatively affect our liquidity. Further, we have significant future commitments and obligations. These conditions raise substantial doubt about our ability to continue as a going concern. Consequently, the audit opinion issued by our independent registered public accounting firm relating to our financial statements for the year ended December 31, 2009 contained a going concern explanatory paragraph. We are pursuing new as well as enhanced collaborations and exploring other financing options, with the objective of minimizing dilution and disruption.

Our plan is to raise capital when needed and/or to pursue product partnering opportunities. We expect to continue to spend substantial amounts on research and development, including amounts spent on conducting clinical trials for our product candidates. Expenses will be partially offset with income-generating license agreements or operating revenue, if possible. Further, we will not have sufficient resources to develop fully any new products or technologies unless we are able to raise substantial additional financing on acceptable terms or secure funds from new or existing partners. We cannot assure that financing will be available when needed, or on favorable terms or at all. If additional capital is raised through the sale of equity or convertible debt securities, the issuance of such securities would result in dilution to our existing stockholders. Our failure to raise capital before August 31, 2010 will adversely affect our business, financial condition and results of operations, and could force us to reduce or cease our operations. No adjustment has been made in the accompanying financial statements to the carrying amount and classification of recorded assets and liabilities should we be unable to continue operations.

## **2. Basis of Presentation**

The condensed balance sheet at December 31, 2009 was derived from audited financial statements but does not include all disclosures required by accounting principles generally accepted in the United States of America. The other information in these condensed financial statements is unaudited but, in the opinion of management, reflects all adjustments necessary for a fair presentation of the results for the periods covered. All such adjustments are of a normal recurring nature unless disclosed otherwise. These condensed financial statements, including notes, have been prepared in accordance with the applicable rules of the Securities and Exchange Commission and do not include all of the information and disclosures required by accounting principles generally accepted in the United States of America for complete financial statements. These condensed financial statements should be read in conjunction with the financial statements and additional information as contained in our Annual Report on Form 10-K for the year ended December 31, 2009.

## **3. Stock-Based Compensation Plans**

On April 20, 2007, the stockholders of the Company approved the 2007 Stock Award and Incentive Plan (the "2007 Plan"). The 2007 Plan provides for grants of options, stock appreciation rights, restricted stock, deferred stock, bonus stock and awards in lieu of obligations, dividend equivalents, other stock-based awards and performance awards to executive officers and other employees of the Company, and non-employee directors, consultants and others who provide substantial service to us. The 2007 Plan provides for the issuance of an aggregate 3,275,334 shares as follows: 2,500,000 new shares, 374,264 shares remaining and transferred from the Company's 2000 Stock Option Plan (the

2000 Plan ) (which was then replaced by the 2007 Plan) and 401,070 shares remaining and transferred from the Company's Stock Option Plan for Outside Directors (the Directors Stock

7

---

**Table of Contents**

Plan ). In addition, shares canceled, expired, forfeited, settled in cash, settled by delivery of fewer shares than the number underlying the award, or otherwise terminated under the 2000 Plan will become available for issuance under the 2007 Plan.

Prior to the adoption of the 2007 Plan, the Company granted stock-based compensation to employees under the 2000 Plan and the 2002 Broad Based Plan (the 2002 Plan ), and to non-employee directors under the Directors Stock Plan. The Company also has grants outstanding under various expired and terminated stock plans, including the 1991 Stock Option Plan, the 1995 Non-Qualified Stock Option Plan, the Deferred Directors Compensation Stock Plan and Non-Plan Options. In January 2007, the Directors Stock Plan expired.

As of June 30, 2010, shares available for future grants under the Plans amounted to 1,533,398.

Total compensation expense recorded during the six months ended June 30, 2010 for share-based payment awards was \$0.55 million, of which \$0.06 million is included in research and development and \$0.49 million is included in general and administrative expenses in the condensed statement of operations for the six months ended June 30, 2010. Total compensation expense recorded during the six months ended June 30, 2009 for share-based payment awards was \$1.01 million, of which \$0.06 million is included in research and development and \$0.95 million is included in general and administrative expenses in the condensed statement of operations for the six months ended June 30, 2009. At June 30, 2010, total unrecognized estimated compensation expense related to non-vested stock options granted prior to that date was \$0.7 million, which is expected to be recognized over a weighted-average period of approximately two years. No options were exercised in the six months ended June 30, 2010 or 2009. No tax benefit was realized due to a continued pattern of operating losses.

During the six months ended June 30, 2010, the Company granted options for 502,750 shares with a weighted average exercise price of \$1.48.

**4. Inventories**

Inventories are stated at the lower of cost or market determined by the first in, first out method. Inventories consist principally of finished goods at June 30, 2010 and December 31, 2009.

**5. Fixed Assets**

Equipment and leasehold improvements, net, consists of the following:

	<b>Useful Lives in Years</b>	<b>June 30, 2010</b>	<b>December 31, 2009</b>
		(in thousands)	
Equipment	<b>3-7</b>	\$ 1,370	\$ 1,370

	<b>\$ 5,852</b>	<b>\$ 4,975</b>

**8. Notes Payable**

Notes payable consist of the following:

	<b>June 30, 2010</b>	<b>December 31, 2009</b>
	<b>(in thousands)</b>	
MHR Convertible Notes	\$ 13,826	\$ 13,076
MHR Promissory Notes	496	
Novartis Note		12,588
	<b>\$ 14,322</b>	<b>\$ 25,664</b>

**MHR Convertible Notes.** The MHR Convertible Notes are due on September 26, 2012, bear interest at 11% and are secured by a first priority lien in favor of MHR Institutional Partners IIA L.P. (together with its affiliates, MHR ) on substantially all of our assets (the MHR Notes ). Interest is payable in the form of additional Convertible Notes issued monthly through March 31, 2007 and then semi-annually beginning June 30, 2008, rather than in cash and we would have the right to call the MHR Notes after September 26, 2010 if certain conditions are satisfied. If those conditions are not satisfied; the Company will forfeit the right to call the MHR Notes after September 26, 2010. The MHR Notes are convertible, at the sole discretion of MHR or any assignee thereof through September 25, 2010, into shares of our common stock at a price per share of \$3.78. If certain conditions are not met and the Company subsequently forfeits its right to call the MHR Notes after September 26, 2010, the MHR Notes will continue to be convertible, at the sole discretion of MHR or any assignee thereof through September 25, 2012. At June 30, 2010, the MHR Notes were convertible into 6,319,856 shares of our common stock. In connection with the convertible note transaction, we amended MHR's then existing warrants to purchase 387,374 shares of our common stock to provide for additional anti-dilution protection. MHR was also granted the option to purchase warrants for up to an additional 617,211 shares of our common stock (the Warrant Purchase Option ) at a price per warrant equal to \$0.01 per warrant for each of the first 67,084 warrants and \$1.00 per warrant for each additional warrant. This option was exercised by MHR in April 2006. See Note 8 for a further discussion of the liability related to these warrants.

The book value of the MHR Notes is comprised of the following:

	<b>June 30, 2010</b>	<b>December 31, 2009</b>
	(in thousands)	
Face Value of the notes	\$ 23,889	\$ 22,616
Discount (related to the embedded conversion feature)	(686)	(793)
Discount (related to the warrant purchase option)	(6,791)	(7,848)
Discount (related to 2010 debt modification)	(1,808)	
Lender's financing costs	(778)	(899)
	<b>\$ 13,826</b>	<b>\$ 13,076</b>

## Table of Contents

The debt discount, lenders finance costs, deferred financing costs and amounts attributed to derivative instruments are being amortized to interest expense over the life of the MHR Notes using an interest method to yield an effective interest rate of 43.5%.

In connection with the MHR financing, the Company agreed to appoint a representative of MHR (the MHR Nominee ) and another person (the Mutual Director ) to its Board of Directors. Further, the Company amended its certificate of incorporation to provide for continuity of the MHR Nominee and the Mutual Nominee on the Board, as described therein, so long as MHR holds at least 2% of the outstanding common stock of the Company.

The MHR Notes provide for various events of default. On May 5, 2006, we received an executed waiver from MHR providing for a temporary waiver of defaults, which were not payment-related, under the Loan Agreement. We have received extensions of such waiver from time to time, the latest being received August 12, 2010 and is in effect through August 17, 2011; as such the MHR Notes have been classified as long-term. Effective January 1, 2009, the Company adopted the provisions of the Financial Accounting Standards Board Accounting Codification Topic 815-40-15-5, Evaluating Whether an Instrument Involving a Contingency is Considered Indexed to an Entity's Own Stock ( FASB ASC 815-40-15-5 ). Under FASB ASC 815-40-15-5, the conversion feature embedded in the MHR notes have been bifurcated from the host contract and accounted for separately as a derivative. The bifurcation of the embedded derivative increased the amount of debt discount thereby reducing the book value of the MHR Notes and increasing prospectively the amount of interest expense to be recognized over the life of the MHR Notes.

**Novartis Note.** The Convertible Promissory Note due originally on December 1, 2009, was issued by us to Novartis on December 1, 2004 (the Novartis Note ), in accordance with and pursuant to the terms and conditions therein. The Novartis Note was issued in a private placement transaction pursuant to Section 4(2) of the Securities Act in connection with a new research collaboration option relating to the development of PTH-1-34. The Novartis Note accrued interest at a rate of 7%. The Novartis Note was originally due December 1, 2009. On November 30, 2009, Novartis agreed to extend the maturity date to February 26, 2010. On February 23, 2010, Novartis agreed to extend the maturity date to May 26, 2010. And on May 27, 2010, Novartis agreed to a further extension through June 4, 2010. On June 4, 2010, the Company and Novartis entered into a Master Agreement and Amendment (the Novartis Agreement ). Pursuant to the Novartis Agreement, the Company was released and discharged from its obligations under the Novartis Note in exchange for (1) the reduction of future royalty and milestone payments up to an aggregate amount of \$11.0 million due the Company under the Research Collaboration and Option Agreement, dated as of December 3, 1997, as amended on October 20, 2000, and the License Agreement, date as of March 8, 2000, for the development of an oral salmon calcitonin product for the treatment of osteoarthritis and osteoporosis.; (2) the right for Novartis to evaluate the feasibility of using Emisphere's Eliger® Technology with two new compounds to assess the potential for new product development opportunities; and (3) other amendments to the Research Collaboration and Option Agreement and License Agreement. As of the date of the Novartis Agreement, the outstanding principal balance and accrued interest of the Novartis Note was approximately \$13.0 million. The Company recognized the full value of the debt released as consideration for the transfer of the rights and other intangibles to Novartis and deferred the related revenue in accordance with applicable accounting guidance for the sale of rights to future revenue until the earnings process has been completed based on achievement of certain milestones or other deliverables.

**June 2010 MHR Promissory Notes.** In connection with the Novartis Agreement, the Company and MHR Institutional Partners IIA, LP (together with its affiliates, as applicable, MHR ) entered into a Letter Agreement (the MHR Letter Agreement ) and MHR, the Company and Novartis entered into an agreement (the Non-Disturbance Agreement ), which Non-Disturbance Agreement was a condition to Novartis' execution of the Novartis Agreement. Pursuant to the MHR Letter Agreement, MHR agreed to the limit certain rights and courses of action that it would have available to it as a secured party under the Senior Secured Term Loan Agreement and Pledge and Security Agreement ( Loan and Security Agreement ) between MHR and the Company. MHR also consented to the Novartis Agreement, which consent is required under the Loan and Security Agreement, and MHR also agreed to enter into a comparable agreement at some point in the future in connection with another potential Company transaction (the Future Transaction Agreement ). The MHR Letter Agreement also provides for the Company to reimburse MHR for its legal fees incurred in connection with the Non-Disturbance Agreement for up to \$500,000 and up to \$100,000 in legal expenses incurred by MHR in connection the Future Transaction Agreement. The reimbursements are to be paid in the

form of non-interest bearing promissory notes issued on the effective date of the MHR Letter Agreement. As such, the Company issued to MHR non-interest promissory notes for \$500,000 and \$100,000 on June 8, 2010. The Company received documentation that MHR expended more than the \$500,000

**Table of Contents**

of legal fees in connection with the Non-Disturbance Agreement and consequently recorded the issuance of the \$500,000 promissory note and a corresponding charge to financing expenses. The Company has not yet received any documentation or communication that indicates MHR has spent any legal fees in connection with the Future Transaction Agreement. Therefore, the issuance of the \$100,000 promissory note was recorded as a prepaid expense. The promissory notes are due June 4, 2012. The Company imputed interest at its incremental borrowing rate of 10%, and discounted the face amounts of the \$500,000 and \$100,000 promissory notes by \$87,000 and \$18,000, respectively.

Additionally, as consideration for its consent, limitation of rights, and pledge to enter into the Future Transaction Agreement, the Company granted MHR warrants to purchase 865,000 shares of its Common Stock. See Note 9 for more information on the MHR Novartis Note Warrants. The Company determined that the modification of the MHR Convertible Debt agreement was not a substantial modification in accordance with ASC 470-50, Modifications and Extinguishments. As such, the warrants issued to MHR were recorded as a debt discount to the MHR Convertible Debt and are being amortized to interest expense over the remaining term of the debt.

**9. Derivative Instruments**

Derivative instruments consist of the following:

	<b>June 30, 2010</b>	<b>December 31, 2009</b>
	(in thousands)	
Elan Warrants	\$	\$ 394
MHR Convertible Note	12,031	4,591
MHR warrants	761	213
August 2007 Equity financing warrants	666	141
August 2009 equity financing warrants	13,857	5,092
August 2009 equity financing warrants to placement agent		349
June 2010 MHR Warrants	1,851	
	\$ 29,166	\$ 10,780

**Elan Warrant.** In connection with a restructuring of debt in March 2005, we issued to Elan Corporation, plc ( Elan ) a warrant to purchase up to 600,000 shares of our common stock at an exercise price of \$3.88 (the Elan Warrant ). The Elan Warrant provides for adjustment of the exercise price upon the occurrence of certain events, including the issuance by Emisphere of common stock or common stock equivalents that have an effective price that is less than the exercise price of the warrant. The anti-dilution feature of the Elan Warrant was triggered in connection with the August 2007 financing, resulting in an adjustment to the exercise price to \$3.76. The anti-dilution feature of the Elan Warrant was triggered again in connection with the August 2009 financing, resulting in an adjustment to the exercise price to \$0.4635. The Company adopted the provisions of FASB ASC 815-40-15-5 effective January 1, 2009. Under FASB ASC 815-40-15-5, the Elan Warrant is not considered indexed to the Company's own stock and, therefore, does not meet the scope exception in FASB ASC 815-10-15 and thus needs to be accounted for as a derivative liability. On April 20, 2010, Elan notified the Company of its intention to exercise the Elan Warrant using the cashless exercise provision. The Company issued 518,206 shares of common stock to Elan in accordance with the terms of the cashless exercise provision on April 21, 2010. After the cashless exercise, the Elan Warrant is no longer outstanding. The Company calculated the fair value of the Elan warrants on April 21, 2010 using the Black-Scholes option pricing model. The assumptions used in computing the fair value as of April 21, 2010 are a closing stock price of \$3.40, expected volatility of 89.91% over the remaining contractual life of four months and a risk-free rate of 0.16%. The fair value of the Elan warrants increased by \$0.6 million and \$1.4 million during the three and six months ended June 30, 2010, respectively, which has been recognized in the accompanying statements of operations. The fair value of the derivative liability at April 21, 2010 of \$1.8 million was reclassified to additional paid-in-capital.

**Embedded Conversion Feature of MHR Convertible Notes.** The MHR Convertible Notes contain a provision whereby, the conversion price is adjustable upon the occurrence of certain events, including the issuance by Emisphere of common stock or common stock equivalents at a price which is lower than the current conversion price of the MHR Notes and lower than the current market price. However, the adjustment provision does not

**Table of Contents**

become effective until after the Company raises \$10 million through the issuance of common stock or common stock equivalents at a price which is lower than the current conversion price of the MHR Notes and lower than the current market price during any consecutive 24 month period. The Company adopted the provisions of FASB ASC 815-40-15-5 effective January 1, 2009. Under FASB ASC 815-40-15-5, the embedded conversion feature is not considered indexed to the Company's own stock and, therefore, does not meet the scope exception in FASB ASC 815-10-15 and thus needs to be accounted for as a derivative liability. The liability has been presented as a non-current liability to correspond with its host contract, the MHR Notes. The fair value of the embedded conversion feature is estimated, at the end of each quarterly reporting period, using the Black-Scholes option pricing model. The assumptions used in computing the fair value as of June 30, 2010 are a closing stock price of \$3.14, expected volatility 107.56% over the remaining term of two years and three months and a risk-free rate of 0.61%. The fair value of the embedded conversion feature increased by \$3.4 million and \$7.4 million during the three and six months ended June 30, 2010, respectively, which has been recognized in the accompanying statements of operations. The embedded conversion feature will be adjusted to fair value for each future period it remains outstanding.

**MHR Warrants.** In connection with the exercise in April 2006 of the Warrant Purchase Option discussed in Note 8 above, the Company issued warrants for 617,211 shares to MHR for proceeds of \$0.6 million. The MHR 2006 Warrants have an original exercise price of \$4.00 and are exercisable through September 26, 2011. The MHR 2006 Warrants have the same terms as the August 2007 equity financing warrants (see below), with no limit upon adjustments to the exercise price. The anti-dilution feature of the MHR 2006 Warrants was triggered in connection with the August 2007 equity financing, resulting in an adjusted exercise price of \$3.76. Based on the provisions of FASB ASC 815, Derivatives and Hedging, the MHR 2006 Warrants have been determined to be an embedded derivative instrument which must be separated from the host contract. The MHR 2006 Warrants contain the same potential cash settlement provisions as the August 2007 equity financing warrants and therefore they have been accounted for as a separate liability. The fair value of the warrants is estimated, at the end of each quarterly period, using the Black-Scholes option pricing model. The assumptions used in computing the fair value as of June 30, 2010 are a closing stock price of \$3.14, expected volatility of 100% over the remaining term of one year and three months and a risk-free rate of 0.32%. The fair value of the MHR warrants increased by \$0.1 million and \$0.5 million during the three and six months ended June 30, 2010, respectively, which has been recognized in the accompanying statements of operations. The MHR warrants will be adjusted to estimated fair value for each future period they remain outstanding. See Note 8 for a further discussion of the MHR Note.

**August 2007 Equity Financing Warrants.** In connection with the August 2007 offering, Emisphere sold warrants to purchase up to 400,000 shares of common stock (the 2007 Warrants). Of these 400,000 warrants, 91,073 were sold to MHR. Each of the 2007 Warrants were issued with an exercise price of \$3.948 and expire on August 21, 2012. The 2007 Warrants provide for certain anti-dilution protection as provided therein. Under the terms of the 2007 Warrants, we have an obligation to make a cash payment to the holders of the warrants for any gain that could have been realized if the holders exercise the warrants and we subsequently fail to deliver a certificate representing the shares to be issued upon such exercise by the third trading day after such warrants have been exercised. Accordingly, the 2007 Warrants have been accounted for as a liability. The fair value of the 2007 Warrants is estimated, at the end of each quarterly reporting period, using the Black-Scholes option pricing model. The warrants were accounted for with an initial value of \$1.0 million on August 22, 2007. The assumptions used in computing the fair value as of June 30, 2010 are a closing stock price of \$3.14, expected volatility of 108.88% over the remaining term of two years and two months and a risk-free rate of 1.02%. The fair value of the 2007 Warrants increased by \$0.2 million and \$0.5 million during the three and six months ended June 30, 2010, respectively, and the fluctuations have been recorded in the statements of operations. The 2007 Warrants will be adjusted to estimated fair value for each future period they remain outstanding.

**August 2009 Equity Financing Investors Warrants.** In connection with the August 2009 offering, Emisphere sold warrants to purchase 6.4 million shares of common stock (the 2009 Warrants), consisting of warrants to purchase 3.7 million shares of common stock to MHR and warrants to purchase 2.7 million shares of common stock to other unaffiliated investors (the 2009 Investor Warrants). The 2009 Warrants were issued with an exercise price of \$0.70 and expire on August 21, 2014. Under the terms of the 2009 Warrants, we have an obligation to make a cash payment

to the holders of the warrants for any gain that could have been realized if the holders exercise the warrants and we subsequently fail to deliver a certificate representing the shares to be issued upon such exercise by the third trading day after such warrants have been exercised. Accordingly, the 2009 Warrants have been accounted for as a liability. The fair value of the 2009 Warrants is estimated, at the end of each quarterly reporting period, using the

**Table of Contents**

Black-Scholes option pricing model. The assumptions used in computing the fair value as of June 30, 2010 are a closing stock price of \$3.14, expected volatility of 94.03% over the remaining term of four years and two months and a risk-free rate of 1.79%. The fair value of the 2009 Warrants increased by \$3.7 million and \$9.8 million for the three and six months ended June 30, 2010, respectively and the fluctuation has been recorded in the statements of operations. The 2009 Warrants will be adjusted to estimated fair value for each future period they remain outstanding. On May 13, 2010, the BAM Opportunity Fund LP ( BAM ) notified the Company of its intention to exercise its 2009 Investor Warrant to purchase up to 1,342,857 shares of the Company's common stock at an exercise price of \$0.70, using the cashless exercise provision. The Company issued 1,005,213 shares of common stock to BAM in accordance with the terms of the cashless exercise provision on May 18, 2010. The Company calculated the fair value of the 1,342,857 million exercised warrants on May 13, 2010 using the Black-Scholes option pricing model. The assumptions used in computing the fair value as of May 13, 2010 are a closing stock price of \$2.88, expected volatility of 93.1% over the remaining contractual life of four years and four months and a risk-free rate of 2.27%. The fair value of the 1.3 exercised warrants increased by \$0.6 million and \$2.3 million during the three and six months ended June 30, 2010, respectively, which has been recognized in the accompanying statements of operations. The fair value of the derivative liability at May 13, 2010 of \$3.3 million was reclassified to additional paid-in-capital. The fair value calculation for the 2009 Investor Warrants was adjusted to reflect the 2009 Investor Warrants outstanding as of June 30, 2010. Subsequent to the quarter ended June 30, 2010, MOG Capital, LLC ( MOG Capital ) notified the Company of its intention to exercise its 2009 Investor Warrant to purchase up to 1,342,857 shares of the Company's common stock at an exercise price of \$0.70, using the cashless exercise provision. The Company issued an aggregate 961,724 shares to MOG Capital in accordance with the terms of the cashless exercise provision. After this cashless exercise, 2009 Investor Warrants to purchase up to 3,729,323 shares of common stock, in the aggregate, remain outstanding.

**August 2009 Equity Financing Placement Agent Warrants.** In connection with the August 2009 offering, Emisphere issued to Rodman & Renshaw, LLC (the Placement Agent ), as part of the compensation for acting as placement agent for the August 2009 financing, warrants to purchase 504,000 shares of common stock (the Placement Agent Warrants ). The Placement Agent Warrants were issued with an exercise price of \$0.875 and expire on October 1, 2012. Under the terms of the warrants, we have an obligation to make a cash payment to the holders of the warrants for any gain that could have been realized if the holders exercise the warrants and we subsequently fail to deliver a certificate representing the shares to be issued upon such exercise by the third trading day after such warrants have been exercised. Accordingly, the Placement Agent Warrants have been accounted for as a liability. On April 1, 2010, the Placement Agent notified the Company of its intention to exercise a portion of the Placement Agent Warrants using the cashless exercise provision. The Company issued 297,636 shares of common stock to the Placement Agent in accordance with the terms of the cashless exercise provision on April 5, 2010. After this cashless exercise, Placement Agent Warrants to purchase 37,800 share of common stock remained outstanding. On April 28, 2010, the Placement Agent notified the Company of its intention to exercise the remaining outstanding portion of the Placement Agent Warrants using the cashless exercise provision. The Company issued an additional 27,192 shares of common stock to the purchase agent on April 30, 2010. After this cashless exercise, the Placement Agent Warrants are no longer outstanding. The Company calculated the fair value of the 466,200 Placement Agent Warrants on April 2, 2010 using the Black-Scholes option pricing model. The assumptions used in computing the fair value as of April 2, 2010 are a closing stock price of \$2.40, expected volatility of 104.70% over the remaining contractual life of two years and six months and a risk-free rate of 1.11%. The fair value of the 466,200 Placement Agent Warrants increased by \$32 thousand and \$0.6 million during the three and six months ended June 30, 2010, respectively, which has been recognized in the accompanying statements of operations. The fair value of the derivative liability from the 466,200 Placement Agent Warrants at April 2, 2010 of \$0.9 million was reclassified to additional paid-in-capital. The Company calculated the fair value of the 37,800 Placement Agent Warrants on April 29, 2010 using the Black-Scholes option pricing model. The assumptions used in computing the fair value as of April 29, 2010 are a closing stock price of \$3.05, expected volatility of 107.10% over the remaining contractual life of two years and five months and a risk-free rate of 1.11%. The fair value of the 37,800 Placement Agent Warrants increased by \$3 thousand and \$46 thousand during the three and six months June 30, 2010, respectively, which has been recognized in the accompany statements of operations. The fair value of the derivative liability from the 37,800 Placement Agent

Warrants at April 29, 2010 of \$0.1 million was reclassified to additional paid-in-capital.

**June 2010 MHR Warrants.** In connection with the Novartis Agreement, the Company and MHR entered into the MHR Letter Agreement and MHR, the Company and Novartis entered into the Non-Disturbance Agreement, which agreement was a condition to Novartis' execution of the Novartis Agreement. Pursuant to the MHR Letter

**Table of Contents**

Agreement, MHR agreed to the limit certain rights and courses of action that it would have available to it as a secured party under the Loan and Security Agreement. MHR also consented to the Novartis Agreement, which consent is required under the Loan and Security Agreement, as well as MHR's agreement to enter into the Future Transaction Agreement in connection with another potential Company transaction. As consideration for its consent and limitation of rights, the Company granted MHR warrants to purchase 865,000 shares of its Common Stock. The warrants are exercisable at \$2.90 per share and will expire on August 21, 2014. The Novartis Note warrants provide for certain anti-dilution protection as provided therein. We have an obligation to make a cash payment to the holders of the warrants for any gain that could have been realized if the holders exercise the warrants and we subsequently fail to deliver a certificate representing the shares to be issued upon such exercise by the third trading day after such warrants have been exercised. Accordingly, the Novartis Note warrants have been accounted for as a liability. Their fair value is estimated, at the end of each quarterly reporting period, using the Black-Scholes option pricing model. The Company estimated the fair value of the warrants on the date of grant using the Black-Scholes option pricing model to be \$1.9 million which was recorded as a debt discount to the MHR Convertible Notes (see Note 8). The assumptions used in computing the fair value of the warrants were a closing stock price of \$3.15, expected volatility of 93.22% over the term of 4.2 years and a risk free rate of 1.02%. The assumptions used in computing the fair value as of June 30, 2010 are a closing stock price of \$3.14, expected volatility of 93.95% over the remaining term of 4.2 years and a risk-free rate of 1.02%. The three and six months change in fair value of the MHR warrants was insignificant.

**10. Net loss per share**

The following table sets forth the information needed to compute basic earnings per share:

	<b>Three Months Ended June 30,</b>		<b>Six Months Ended June 30,</b>	
	<b>2010</b>	<b>2009</b>	<b>2010</b>	<b>2009</b>
	(in thousands except per share data)		(in thousands except per share data)	
Basic net loss	\$ (13,704)	\$ (4,187)	\$ (32,170)	\$ (9,604)
Weighted average common shares outstanding	43,338,432	30,341,078	42,711,367	30,341,078
Basic net loss per share	\$ (0.32)	\$ (0.14)	\$ (0.75)	\$ (0.32)

For the six months ended June 30, 2010 and 2009, certain potential shares of common stock have been excluded from diluted loss per share because the exercise price was greater than the average market price of our common stock, and therefore, the effect on diluted loss per share would have been anti-dilutive. The following table sets forth the number of potential shares of common stock that have been excluded from diluted net loss per share because their effect was anti-dilutive:

	<b>As of June 30,</b>	
	<b>2010</b>	<b>2009</b>
Options to purchase common shares	3,187,116	3,962,139
Outstanding warrants	6,954,391	2,972,049
Novartis convertible note payable		7,537,921
MHR note payable	6,319,856	5,664,381
	16,461,363	20,136,490

**11. Commitments and Contingencies**

*Commitments.* At the beginning of 2009 we had leased approximately 80,000 square feet of office space at 765 Old Saw Mill River Road, Tarrytown, NY for use as administrative offices and laboratories. The lease for our administrative and laboratory facilities had been set to expire on August 31, 2012. However, on April 29, 2009, the Company entered into a Lease Termination Agreement (the Agreement ) with BMR-Landmark at Eastview, LLC, a Delaware limited liability company ( BMR ) pursuant to which the Company and BMR terminated the lease of space at 765 Old Saw Mill River Road in Tarrytown, NY. Pursuant to the Agreement, the Lease was terminated effective as of April 1, 2009. The Agreement provided that the Company make the following payments to BMR: (a) \$1 million, paid upon execution of the Agreement, (b) \$0.5 million, paid six months after the execution date of the Agreement, and (c) \$0.75 million, payable twelve months after the execution date of the Agreement. Initial and six months payments were made on schedule. Although the final payment was due originally on April 29, 2010, on

## **Table of Contents**

March 17, 2010 the Company and BMR agreed to amend the Agreement (the *Amendment*). According to the Amendment, the final payment was modified as follows: the Company will pay Eight Hundred Thousand Dollars (\$800,000), as follows: (i) Two Hundred Thousand Dollars (\$200,000) within five (5) days after the Execution Date and (ii) One Hundred Thousand Dollars (\$100,000) on each of the following dates: July 15, 2010, August 15, 2010, September 15, 2010, October 15, 2010, November 15, 2010, and December 15, 2010.

We continue to lease office space at 240 Cedar Knolls Road, Cedar Knolls, NJ under a non-cancellable operating lease expiring in 2013.

On April 6, 2007, the Board of Directors appointed Michael V. Novinski to the position of President and Chief Executive Officer. Pursuant to his appointment, the Company has entered into a three year employment agreement with Mr. Novinski. Mr. Novinski's employment agreement renews automatically in one year increments unless either party notifies the other at least 60 days prior to the date of expiration of their intention to terminate. If Mr. Novinski's contract is terminated without cause by the Board of Directors or at any time by the executive for good reason as defined in his contract, we are obligated to make severance payments to Mr. Novinski.

In April 2005, the Company entered into an amended and restated employment agreement with its then Chief Executive Officer, Dr. Michael M. Goldberg, for services through July 31, 2007. On January 16, 2007, the Board of Directors terminated Dr. Goldberg's services. On April 26, 2007, the Board of Directors held a special hearing at which it determined that Dr. Goldberg's termination was for cause. On March 22, 2007, Dr. Goldberg, through his counsel, filed a demand for arbitration asserting that his termination was without cause and seeking \$1,048,000 plus attorney's fees, interest, arbitration costs and other relief alleged to be owed to him in connection with his employment agreement with the Company. During the arbitration, Dr. Goldberg sought a total damage amount of at least \$9,223,646 plus interest. On February 11, 2010, the arbitrator issued the final award in favor of Dr. Goldberg for a total amount of approximately \$2,333,115 as full and final payment for all claims, defenses, counterclaims, fees and related matters. The Company opposed Dr. Goldberg's petition to confirm the arbitration award. On July 12, 2010 the award was confirmed by the court. As of August 10, 2010, the Company adjusted its estimate of costs to settle this matter to \$2.6 million to account for potential additional interest costs on the settlement amount and additional legal fees. Dr. Goldberg has proposed an order of settlement in the amount of approximately \$2.6 million and seeks to have a final order entered August 16, 2010.

The Company evaluates the financial consequences of legal actions periodically or as facts present themselves and books accruals to account for its best estimate of future costs accordingly.

**Contingencies.** In the ordinary course of business, we enter into agreements with third parties that include indemnification provisions which, in our judgment, are normal and customary for companies in our industry sector. These agreements are typically with business partners, clinical sites, and suppliers. Pursuant to these agreements, we generally agree to indemnify, hold harmless, and reimburse indemnified parties for losses suffered or incurred by the indemnified parties with respect to our product candidates, use of such product candidates, or other actions taken or omitted by us. The maximum potential amount of future payments we could be required to make under these indemnification provisions is unlimited. We have not incurred material costs to defend lawsuits or settle claims related to these indemnification provisions. As a result, the estimated fair value of liabilities relating to these provisions is minimal. Accordingly, we have no liabilities recorded for these provisions as of June 30, 2010.

In the normal course of business, we may be confronted with issues or events that may result in a contingent liability. These generally relate to lawsuits, claims, environmental actions or the action of various regulatory agencies. If necessary, management consults with counsel and other appropriate experts to assess any matters that arise. If, in our opinion, we have incurred a probable loss as set forth by accounting principles generally accepted in the U.S., an estimate is made of the loss and the appropriate accounting entries are reflected in our financial statements. After consultation with legal counsel, we do not anticipate that liabilities arising out of currently pending or threatened lawsuits and claims will have a material adverse effect on our financial position, results of operations or cash flows.

### **Restructuring Expense**

On December 8, 2008, as part of our efforts to improve operational efficiency we decided to close our research and development facilities in Tarrytown to reduce costs and improve operating efficiency which resulted in a

**Table of Contents**

restructuring charge of approximately \$3.8 million in the fourth quarter, 2008. On April 29, 2009, the Company entered into the Lease Termination Agreement with BMR, and credited the restructuring charge \$0.35 million in accordance with the terms of the Agreement. On March 17, 2010 the Company and BMR amended the Agreement as described in this Note (above). Consequently, the restructuring liability was readjusted to reflect the terms of the Amendment accordingly.

Adjustments to the restructuring liability are as follows (\$ thousands):

	<b>Liability at December 31, 2009</b>	<b>Cash Payments</b>	<b>Adjustment to the Liability</b>	<b>Liability at June 30, 2010</b>
Lease restructuring expense	\$ 750	\$ (200)	\$ 50	\$ 600

**12. Income Taxes**

The Company is primarily subject to United States federal and New Jersey state income tax. The Company's policy is to recognize interest and penalties related to income tax matters in income tax expense. As of December 31, 2009 and June 30, 2010, the Company had no accruals for interest or penalties related to income tax matters. For the three months ended June 30, 2010 and 2009, the effective income tax rate was 0%. The difference between the Company's effective income tax rate and the Federal statutory rate of 35% is attributable to state tax benefits and tax credits offset by changes in the deferred tax valuation allowance.

**13. New Accounting Pronouncements**

In October 2009, the FASB issued ASU 2009-13, *Multiple-Deliverable Revenue Arrangements*, (amendments to FASB ASC Topic 605, *Revenue Recognition*) (ASU 2009-13). ASU 2009-13 requires entities to allocate revenue in an arrangement using estimated selling prices of the delivered goods and services based on a selling price hierarchy. The amendments eliminate the residual method of revenue allocation and require revenue to be allocated using the relative selling price method. ASU 2009-13 should be applied on a prospective basis for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, with early adoption permitted. The adoption of ASU 2009-13 did not have a material impact on the Company's results of operations or financial condition.

In April 2010, the FASB issued ASU 2010-17, *Revenue Recognition - Milestone Method* (ASU 2010-17). ASU 2010-17 provides guidance on the criteria that should be met for determining whether the milestone method of revenue recognition is appropriate. A vendor can recognize consideration that is contingent upon achievement of a milestone in its entirety as revenue in the period in which the milestone is achieved only if the milestone meets all criteria to be considered substantive. The following criteria must be met for a milestone to be considered substantive. The consideration earned by achieving the milestone should 1. be commensurate with either the level of effort required to achieve the milestone or the enhancement of the value of the item delivered as a result of a specific outcome resulting from the vendor's performance to achieve the milestone; 2. be related solely to past performance; and 3. be reasonable relative to all deliverables and payment terms in the arrangement. No bifurcation of an individual milestone is allowed and there can be more than one milestone in an arrangement. Accordingly, an arrangement may contain both substantive and nonsubstantive milestones. ASU 2010-17 is effective on a prospective basis for milestones achieved in fiscal years, and interim periods within those years, beginning on or after June 15, 2010. The adoption of ASU 2010-17 did not have a material impact on the Company's results of operations or financial condition.

Management does not believe there would have been a material effect on the accompanying financial statements had any other recently issued, but not yet effective, accounting standards been adopted in the current period.

**14. Fair Value**

In accordance with FASB ASC 820, *Fair Value Measurements and Disclosures*, the following table represents the Company's fair value hierarchy for its financial assets and liabilities measured at fair value on a recurring basis as of June 30, 2010 and December 31, 2009:

**Table of Contents**

	<b>Level 2 June 30, 2010 (\$ thousands)</b>	<b>Level 2 December 31, 2009 (\$ thousands)</b>
Derivative instruments (short term)	\$ 17,135	\$ 6,189
Derivative instruments (long term)	12,031	4,591
Total	\$ 29,166	\$ 10,780

Some of the Company's financial instruments are not measured at fair value on a recurring basis but are recorded at amounts that approximate fair value due to their liquid or short-term nature, such as cash and cash equivalents, receivables and payables.

We have determined that it is not practical to estimate the fair value of our notes payable because of their unique nature and the costs that would be incurred to obtain an independent valuation. We do not have comparable outstanding debt on which to base an estimated current borrowing rate or other discount rate for purposes of estimating the fair value of the notes payable and we have not been able to develop a valuation model that can be applied consistently in a cost efficient manner. These factors all contribute to the impracticability of estimating the fair value of the notes payable. At June 30, 2010, the carrying value of the notes payable and accrued interest was \$13.8 million. The MHR Convertible Notes, which are due on September 26, 2012, yield an effective interest rate of 43.5%. Refer to Note 8 of these financial statements for more information about the Company's notes payable.

**15. Sale of Patents**

On February 8, 2008, the Company sold to MannKind Corporation (MannKind) certain patents and a patent application relating to diketopiperazine technology for a total purchase price of \$2.5 million. An initial payment of \$1.5 million was received in February 2008 and recognized as other income. An additional \$0.5 million was paid in May 2009 with the remaining \$0.5 million payment to be made no later than October 5, 2010. We will recognize as revenue the additional amounts due from MannKind when payment becomes reasonably assured.

**16. Subsequent Events**

**July 2010 MHR Promissory Note.** On July 29, 2010, we issued a promissory note (the July 2010 MHR Note) to MHR Institutional Partners IIA LP and MHR Institutional Partners II LP (together, MHR) in the principal amount of \$525,000. The July 2010 MHR Note provides for an interest rate of 15% per annum, with the entire principal amount due and payable on October 27, 2010 (the Maturity Date). The Maturity Date will be accelerated, in certain circumstances, to the date that is two business days following the receipt by the Issuer of at least \$1,000,000 aggregate cash proceeds from third parties, whether in connection with certain financing transactions, commercial transactions or otherwise. MHR may, at its option, apply the amount of any payment of principal or interest on account of this July 2010 MHR Note as consideration for the purchase of any securities that may, from time to time, be issued by the Company to the MHR for value. The obligations under the July 2010 MHR Note are secured in accordance with the terms of the Amendment (the Amendment) to the Pledge and Security Agreement whereby Emisphere and MHR amended that certain Pledge and Security Agreement, dated as of September 26, 2005 (the Security Agreement) to extend the terms of the Security Agreement other than the intellectual property licensed to Novartis pursuant to the Master Agreement and Amendment dated June 4, 2010 by and between Emisphere and Novartis, to include the principal, interest and other obligations provided under the July 2010 MHR Note. In accordance with the terms of that certain 11.00% Senior Secured Convertible Note issued by the Emisphere to MHR and due September 26, 2012, MHR also provided a written consent to allow for the issuance of the Note and related obligations provided under the Amendment.

Subsequent to the quarter ended June 30, 2010, MOG Capital, LLC (MOG Capital) notified the Company of its intention to exercise its 2009 Investor Warrant to purchase up to 1,342,857 shares of the Company's common stock at an exercise price of \$0.70, using the cashless exercise provision. The Company issued an aggregate 961,724 shares to

MOG Capital in accordance with the terms of the cashless exercise provision. After this cashless exercise, 2009 Investor Warrants to purchase up to 3,729,323 shares of common stock, in the aggregate, remain outstanding.

**Table of Contents**

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

**SAFE HARBOR CAUTIONARY STATEMENT**

Certain statements in this Management's Discussion and Analysis of Financial Conditions and Results of Operations and elsewhere in this report as well as statements made from time to time by our representatives may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward looking statements include (without limitation) statements regarding planned or expected studies and trials of oral formulations that utilize our Eligen® Technology; the timing of the development and commercialization of our product candidates or potential products that may be developed using our Eligen® Technology; the potential market size, advantages or therapeutic uses of our potential products; variation in actual savings and operational improvements resulting from restructurings; and the sufficiency of our available capital resources to meet our funding needs. We do not undertake any obligation to publicly update any forward-looking statement, whether as a result of new information, future events, or otherwise, except as required by law. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements to be materially different from any future results or achievements expressed or implied by such forward-looking statements. Such factors include the factors described under Part II, Item 1A. Risk Factors and other factors discussed in connection with any forward looking statements.

**General**

Emisphere Technologies, Inc. is a biopharmaceutical company that focuses on a unique and improved delivery of therapeutic molecules or nutritional supplements using its Eligen® Technology. These molecules could be currently available or are under development. Such molecules are usually delivered by injection; in many cases, their benefits are limited due to poor bioavailability, slow on-set of action or variable absorption. In those cases, our technology may increase the benefit of the therapy by improving bioavailability or absorption or by increasing the onset of action. The Eligen® Technology can be applied to the oral route of administration as well other delivery pathways, such as buccal, rectal, inhalation, intra-vaginal or transdermal. The Eligen® Technology can make it possible to orally deliver certain therapeutic molecules without altering their chemical form or biological integrity. Eligen® delivery agents, or carriers, facilitate or enable the transport of therapeutic molecules across the mucous membranes of the gastrointestinal tract, to reach the tissues of the body where they can exert their intended pharmacological effect.

Since our inception in 1986, substantial efforts and resources have been devoted to understanding the Eligen® Technology and establishing a product development pipeline that incorporated this technology with selected molecules. Since 2007, Emisphere has undergone many positive changes. A new senior management team, led by Michael V. Novinski, was hired; the Eligen® Technology was reevaluated and our corporate strategy was refocused on commercializing the Eligen® Technology as quickly as possible, building high-value partnerships and reprioritizing the product pipeline. Spending was redirected and aggressive cost control initiatives were implemented. These changes resulted in redeployment of resources to programs, one of which, yielded the introduction of our first commercial product during 2009. We continue to develop potential product candidates in-house and we demonstrated and enhanced the value of the Eligen® Technology as evident in the progress made by our development partners Novo Nordisk A/S (Novo Nordisk) and Novartis Pharma AG (Novartis) on their respective product development programs. Further development, exploration and commercialization of the technology entail risk and operational expenses. However, we have made significant progress on refocusing our efforts on strategic development initiatives and cost control and continue to aggressively seek to reduce non-strategic spending.

The application of the Eligen® Technology is potentially broad and may provide for a number of opportunities across a spectrum of therapeutic modalities or nutritional supplements. During the second quarter 2010, we continued to develop our product pipeline utilizing the Eligen® Technology with prescription and nonprescription product candidates. We prioritized our development efforts based on overall potential returns on investment, likelihood of success, and market and medical need. Our goal is to implement our Eligen® Technology to enhance overall healthcare, including patient accessibility and compliance, while benefiting the commercial pharmaceutical marketplace and driving company valuation. Investments required to continue developing our product pipeline may be partially paid by income-generating license arrangements whose value tends to increase as product candidates move

from pre-clinical into clinical development. It is our intention that incremental investments that may be required to fund our research and development will be approached incrementally in order to minimize disruption or dilution.

## **Table of Contents**

We plan to attempt to expand our current collaborative relationships to take advantage of the critical knowledge that others have gained by working with our technology. We will also continue to pursue product candidates for internal development and commercialization. We believe that these internal candidates must be capable of development with reasonable investments in an acceptable time period and with a reasonable risk-benefit profile.

Our product pipeline includes prescription and medical foods candidates. We reported progress on our planned second product, a higher dose, medical food formulation of Eligen® B12 for use by B12 deficient individuals. Our recently completed clinical trial showed that high dose Eligen® B12 1000mcg can efficiently and quickly restore Vitamin B12 levels in deficient individuals compared to the current standard of care. During July 2010, we announced that we are engaged in ongoing discussions with a potential licensee for our high dose oral Eligen® B12 1000mcg as a Medical Food for individuals with B12 deficiency. In addition, we are evaluating other potential licensees as well as the possibility of marketing the product without a partner. As a medical food, Emisphere's Eligen® B12 (1000 mcg) is designed as a specially formulated and processed oral formulation for the specific dietary management of patients under medical supervision who, because of a limited or impaired capacity to absorb Vitamin B12, have a diagnosed Vitamin B12 deficiency. It is planned to be available early in 2011. It is estimated that as many as 10 million people in the U.S. and over 100 million people worldwide may be B12 deficient. Oral Eligen® B12 and the foregoing statements have not been evaluated by the Food and Drug Administration. Oral Eligen® B12 is not intended to diagnose, treat, cure, or prevent any disease.

Previously, the Company had announced interim data from the recently completed study demonstrated that its high-dose oral Eligen® B12 (1000mcg) given to individuals with low B12 levels restores normal B12 serum concentrations. Normal levels of serum B12 were achieved by all study participants who had taken Eligen® B12 (1000mcg) 15 days into the 90-day study when the first blood samples were taken. These data, in Abstract Number 8370, were presented at the Experimental Biology 2010 Conference in Anaheim, California. In this open-label, randomized, 90-day study, serum cobalamin (B12) and holotranscobalamin (active B12) were collected and measured at Baseline, Day 15, Day 31, Day 61 and Day 91. A total of 49 study participants were enrolled (26 on IM injection and 23 on oral) and received either nine 1000mcg intramuscular injections of Vitamin B12 or once daily tablets of oral Eligen® B12 (1000 mcg). The results from the interim analysis showed that serum cobalamin and active B12 returned to the normal range with both products and normalization was maintained. With participants in the oral Eligen® B12 (1000mcg) group showing the ability to rapidly achieve normalized serum and active B12 levels, the study illustrates the potential of the Eligen® Technology and of the high dose, oral Eligen® B12 (1000mcg) formulation to offer a much needed medical food alternative to painful and inconvenient IM injections.

On the prescription side, our licensees include Novartis, which is using our drug delivery technology in combination with salmon calcitonin, parathyroid hormone, and human growth hormone. During June 2010, we announced that we entered into an expanded relationship with Novartis pursuant to which Novartis has cancelled the Company's Convertible Promissory Note (the "Novartis Note"). The Novartis Note was originally issued to Novartis on December 1, 2004 in connection with the Research Collaboration and Option License Agreement between the parties of that date and was originally due December 1, 2009. Previously, Novartis had agreed to extend the maturity date to June 4, 2010. In connection with the cancellation of the Novartis Note, the parties agreed to modify the royalty and milestone payment schedule for the Research Collaboration and Option Agreement and License Agreement between the parties for the development of an oral salmon calcitonin product for the treatment of osteoarthritis and osteoporosis. Additionally, we have granted Novartis the right to evaluate the feasibility of using Emisphere's Eligen® Technology with two new compounds to assess the potential for new product development opportunities. If Novartis chooses to develop oral formulations of these new compounds using the Eligen® Technology, the parties will negotiate additional agreements. In that case, Emisphere could be entitled to receive development milestone and royalty payments in connection with the development and commercialization of these potentially new products.

Novartis' most advanced program is testing an oral formulation of calcitonin to treat osteoarthritis and osteoporosis. Novartis is conducting two Phase III clinical studies for osteoarthritis and one Phase III clinical study for osteoporosis. Now that these Phase III studies are fully enrolled, over 5,500 clinical study patients used the Eligen® Technology during 2009 and continue to use it during 2010. During July 2010, we announced that Novartis Pharma AG and its license partner Nordic Bioscience a/s (the "Sponsor") reported the following in connection with their Phase III Study

2302 in osteoarthritis assessing the safety and efficacy of oral calcitonin in the treatment of osteoarthritis of the knee. This study incorporates Emisphere's unique and proprietary Eligen® Drug Delivery Technology for the improved oral absorption of salmon calcitonin. An independent Data Monitoring Committee

**Table of Contents**

( DMC ) conducted a futility analysis of one-year data for all patients enrolled in this two-year study, including assessments of safety and efficacy parameters. The DMC concluded that although there is no reason to stop Study 2302 because of safety concerns, there is no reason to continue the study for efficacy. The DMC also concluded that the final decision whether to continue Study 2302 rests with the Sponsor. A parallel two-year Phase III Study 2301 in osteoarthritis assessing the safety and efficacy of oral calcitonin in the treatment of osteoarthritis of the knee is still in progress. In December 2009, the DMC conducted a futility analysis of one-year data for all patients enrolled in this two-year study, including assessments of safety and efficacy parameters, and recommended to continue with such Study. The Sponsor currently intends to continue the clinical program of oral calcitonin in osteoarthritis, including both Phase III Study 2301 and Phase III Study 2302. Novartis and Nordic Bioscience will continue to work together to assess next steps once the final data of Study 2301 is available. This data is expected to be available in the fourth quarter, 2010. Additionally, the Sponsor currently intends to continue the clinical program of oral calcitonin in osteoporosis. Previously, in its quarterly earnings report for the period ended June 30, 2010, Novartis stated that oral calcitonin for the treatment of osteoporosis is planned to file with the regulatory authorities during 2011.

During April 2010, we announced the publication of a research study entitled, "Investigation of the Direct Effect of Salmon Calcitonin on Human Osteoarthritic Chondrocytes," by Nordic Bioscience in the April 5, 2010 edition of the publication BMC Musculoskeletal Disorders. Oral salmon calcitonin, which uses Emisphere's proprietary Eligen® Technology, is currently being studied in osteoarthritis and osteoporosis by Novartis Pharma AG and Nordic Bioscience. The study was conducted in vitro on cartilage samples obtained from female patients undergoing total knee arthroplasty surgery for the treatment of osteoarthritis. The article describes the growth promoting effects of salmon calcitonin on these cartilage samples. The study shows that treatment with pharmacological concentrations of calcitonin increases synthesis of both proteoglycan (proteins and sugars which interweave with collagen) and collagen type II – the key components of articular cartilage. This research is unique and significant as it represents the first work to look chiefly at the ability of salmon calcitonin to stimulate cartilage synthesis. These findings provide evidence to substantiate the theory that calcitonin may exert a positive effect on joint health through its dual action of promoting both bone and cartilage formation.

During December 2009, we announced a meta-analysis published in the December 2009 edition of Rheumatology Reports examining independent evidence of the analgesic action of the hormone calcitonin. This publication restated the potential of calcitonin in filling a significant unmet need for alternative treatments for persistent musculoskeletal pain. Scientists from Nordic Bioscience were involved in the preparation of this meta-analysis. Non-malignant musculoskeletal pain is the most common clinical symptom that causes patients to seek medical attention and is a major cause of disability in the world. Musculoskeletal pain can arise from a variety of common conditions including osteoarthritis, rheumatoid arthritis, osteoporosis, surgery, low back pain and bone fracture. The meta-analysis, conducted by researchers at the Center for Sensory-Motor Interaction in the Department of Health Science and Technology at Aalborg University in Denmark, examined independent pre-clinical and clinical studies spanning nearly 45 years of the possible intrinsic analgesic properties of calcitonin, with special focus on the challenges in the musculoskeletal system. The authors concluded that well-designed clinical trials should be conducted to further validate evidence of calcitonin's analgesic action and its promising potential role in the management of musculoskeletal pain. The effects of calcitonin on clinical pain conditions have received increasing attention in the past decades, although a consensus on mechanism-of-action and potential indications has not been reached. The analgesic activity of oral salmon calcitonin has been shown in several controlled prospective double-blind studies; besides pain management in osteoporosis, calcitonin has shown analgesic action in painful conditions such as phantom limb pain, diabetic neuropathy, complex regional pain syndrome, adhesive capsulitis, rheumatoid arthritis, vertebral crush fractures, spondylitis, tumor metastasis, cancer pain, migraine, Paget's disease of bone as well as post-operative pain. An ideal treatment with an optimal efficacy, safety and convenience profile is not available for the musculoskeletal pain associated with such conditions as osteoporosis and osteoarthritis. This review of the literature highlights the clear unmet medical need that could be addressed by Emisphere's oral salmon calcitonin product.

Novartis is also engaged in research using the Eligen® Technology and PTH-1-34 to develop a safe and effective oral formulation of PTH for the treatment of postmenopausal osteoporosis, PTH is produced by the parathyroid glands

to regulate the amount of calcium and phosphorus in the body. When used therapeutically, it increases bone density and bone strength to help prevent fractures. It is approved to treat osteoporosis, a disease associated with a gradual thinning and weakening of the bones that occurs most frequently in women after menopause. Untreated postmenopausal osteoporosis can lead to chronic back pain, disabling fractures, and lost mobility. Novartis

## **Table of Contents**

conducted a Phase I study in postmenopausal women to determine the safety and tolerability of oral PTH-1-34, a combination of human PTH-1-34 and Emisphere's delivery agent 5-CNAC, for the treatment of postmenopausal osteoporosis. The study was designed to assess the bioavailability profile of increasing doses of PTH-1-34 combined with different amounts of 5-CNAC administered orally. The results, from the single-center, partially-blinded, incomplete cross-over study were presented October 19, 2009 in a poster session at the 73rd Annual Scientific Meeting of the American College of Rheumatology in Philadelphia. Study results demonstrated that a single dose of the novel oral parathyroid hormone PTH-1-34, which utilizes Emisphere's proprietary Eligen® Drug Delivery Technology and absorption-enhancing carrier molecule 5-CNAC, achieved potentially therapeutically relevant exposure and safety profiles similar to those of the currently available injectable formulation in healthy postmenopausal women.

During April 2010, we announced that Novartis Pharma AG initiated a second Phase I trial for an oral PTH-1-34 which uses Emisphere's Eligen® Technology, and is in development for the treatment of postmenopausal osteoporosis. The study is a partially blinded, placebo controlled, active comparator study to explore the safety, tolerability, pharmacokinetics and pharmacodynamics in postmenopausal women after daily oral doses of PTH-1-34. The study has two parts (A and B) and will enroll a total of approximately up to 120 postmenopausal women. In Part A of the trial, ascending doses of oral PTH-1-34 using the Eligen® Technology will be tested for safety, tolerability and pharmacokinetics and compared to Forsteo®. In Part B, in addition to safety and tolerability of oral PTH-1-34 using the Eligen® Technology, pharmacodynamic responses will be measured by bone biomarker levels and bone mineral density, and compared to Forsteo®. The first patient was enrolled in April.

Research using the Eligen® Technology and GLP-1, a potential treatment for Type 2 Diabetes is being conducted by Novo Nordisk A/S (Novo Nordisk) and by Dr. Christoph Beglinger, M.D., of the Clinical Research Center, Department of Biomedicine Division of Gastroenterology, and Department of Clinical Pharmacology and Toxicology at University Hospital in Basel, Switzerland. We had previously conducted extensive tests on oral insulin for Type 1 Diabetes and concluded that a more productive pathway is to move forward with GLP-1 and its analogs, an oral form of which might be used to treat Type 2 Diabetes and related conditions. Consequently, on June 21, 2008 we entered into an exclusive Development and License Agreement with Novo Nordisk focused on the development of oral formulations of Novo Nordisk's proprietary GLP-1 receptor agonists.

During January 2010, we announced that Novo Nordisk had initiated its first Phase I clinical trial with a long-acting oral GLP-1 analogue (NN9924). This milestone released a \$2 million payment to Emisphere, whose proprietary Eligen® Technology is used in the formulation of NN9924. GLP-1 (Glucagon-Like Peptide-1) is a natural hormone involved in controlling blood sugar levels. It stimulates the release of insulin only when blood sugar levels become too high. GLP-1 secretion is often impaired in people with Type 2 Diabetes. The aim of this trial, which is being conducted in the UK, is to investigate the safety, tolerability and bioavailability of NN9924 in healthy volunteers. The trial will enroll approximately 155 individuals and results from the trial are expected in 2011. There are many challenges in developing an oral formulation of GLP-1, in particular obtaining adequate bioavailability. NN9924 addresses some of these key challenges by utilizing Emisphere's Eligen® Technology to facilitate absorption from the gastrointestinal tract.

Our other product candidates in development are in earlier or preclinical research phases, and we continue to assess them for their compatibility with our technology and market need. Our intent is to seek partnerships with pharmaceutical and biotechnology companies for certain of these products. We plan to expand our pipeline with product candidates that demonstrate significant opportunities for growth. During March 2010, Emisphere and Alchemia Ltd. (ASX:ACL) announced that they would join efforts to develop an oral formulation of the anti-coagulant drug fondaparinux with Emisphere's Eligen® Technology. Fondaparinux, an anti-coagulant used for the prevention of deep vein thrombosis, is marketed in injectable form as Arixtra® by GlaxoSmithKline. Arixtra® has been off patent since 2002 but, due to the complexity of its synthesis, there is currently no approved generic or alternative source of commercial scale active pharmaceutical ingredient (API). Alchemia has developed a novel, patent protected, synthesis for the manufacture of fondaparinux at commercial scale. In March 2009, Alchemia's manufacturing and U.S. marketing partner, Dr Reddy's Laboratories (NYSE: RDY) submitted an ANDA to the U.S. FDA for a generic version of the injectable form of fondaparinux. We believe an oral formulation of fondaparinux

could dramatically increase the market potential for fondaparinux. Based on what we know from our experience with other chemically-related anti-coagulants, the profile of fondaparinux should fit very well with the Eligen® Technology given its half life and safety profile. Although developing an oral formulation of an injectable compound is always challenging, this project could produce substantial benefits for the medical community. The

**Table of Contents**

combination of Emisphere's delivery technology and Alchemia's fondaparinux may ultimately allow us to bring an oral anti-coagulant to market in an accelerated fashion. Alchemia has already seen preclinical data suggesting that enhanced levels of oral absorption can be achieved for fondaparinux. If the dose formulated with the Eligen® Technology can be successfully optimized, it could open up a host of medically and commercially compelling opportunities for fondaparinux. Alchemia plans to evaluate a number of different formulations initially in order to optimize oral bioavailability and pharmacokinetics, with the aim of then rapidly moving into human clinical studies.

By expanding our relationship with Novartis and settling the Novartis Note on non-dilutive terms (see Note 8 to the Financial Statements contained in this quarterly report) the Company strengthened its Balance Sheet and enhanced the potential future value of its Eligen® Technology through the potential future additional development and commercialization of potentially new products by Novartis. By focusing on improving operational efficiency, we have strengthened our financial foundation while maintaining our focus on advancing and commercializing the Eligen® Technology. By closing our research and development facility in Tarrytown, NY and utilizing independent contractors to conduct essential research and development, we reduced our annual cash burn from operating activities to approximately \$8 million per year. Additionally, we have accelerated the commercialization of the Eligen® Technology in a cost effective way and gained operational efficiencies by tapping into more advanced scientific processes independent contractors can provide.

**Results of Operations**

*Three Months Ended June 30, 2010 Compared to Three Months Ended June 30, 2009:*

	2010	Three Months Ended June 30, 2009 (in thousands)	Change
Revenue	\$ 39	\$	\$ 39
Operating expenses	\$ 3,156	\$ 2,998	\$ 158
Operating loss	\$ (3,117)	\$ (2,998)	\$ (119)
Other income (expense)	\$ (10,587)	\$ (1,189)	\$ (9,398)
Net loss	\$ (13,704)	\$ (4,187)	\$ (9,517)

Revenue increased \$0.04 million for the three months ended June 30, 2010 compared to the same period last year due to commercial sales of low dose Eligen® B-12.

Operating expenses increased \$0.16 million or 5% for the three months ended June 30, 2010 in comparison to the same period last year. Details of these changes are highlighted in the table below:

	(in thousands)
Decrease in human resources costs	\$ (673)
Decrease in professional fees	(13)
Increase in occupancy costs	2
Decrease in clinical costs	(72)
Decrease in depreciation and amortization	(21)
Increase in other costs	935
	\$ 158

Human resource costs decreased \$673 thousand, or 37%, due primarily to a \$70 thousand decrease from a reduction in personnel in 2010 and a \$631 thousand reduction in non-cash compensation, partially offset by the receipt of a refund in workers compensation insurance during 2009.

Professional fees decreased \$13 thousand, or 1%, due primarily to a net decrease in legal fees.

Occupancy costs increased \$2 thousand, or 2%, due to higher common area maintenance costs.

Clinical costs decreased \$72 thousand, or 22%, due primarily to a decrease in clinical trial costs related to B-12 as the trial nears completion.

**Table of Contents**

Depreciation and amortization costs decreased \$21 thousand, or 22%, due to the write off of certain equipment in connection with the closure of the Tarrytown facility as a result of our fixed asset audit in the fourth quarter of 2009. Other costs increased \$935 thousand, or 174%, due primarily to the receipt of \$779 thousand proceeds from the sale of fixed asset equipment in 2009 and an increase of \$220 thousand in estimated costs to settle outstanding lawsuits during 2010; partially offset by a \$63 thousand reduction in expenses associated with the abandonment of the Tarrytown NY facility during 2009.

Our principal operating costs include the following items as a percentage of total operating expenses:

	<b>Three Months Ended June 30,</b>	
	<b>2010</b>	<b>2009</b>
Human resource costs, including benefits	36%	61%
Professional fees for legal, intellectual property, accounting and consulting	38%	40%
Occupancy for our laboratory and operating space	3%	3%
Clinical costs	8%	11%
Depreciation and amortization	2%	3%
Other	13%	-18%

Other expense increased \$9.4 million for the three months ended June 30, 2010 in comparison to the same period last year primarily due to a \$8.2 million increase in the fair value of derivative instruments due to relative changes in stock price during the three months ended June 30, 2010 compared to the three months period ended June 30, 2009; an increase of \$0.7 million in interest expense and a decrease of \$0.5 million in other income due to the receipt of a \$0.5 million installment payment on the sale of a patent to MannKind during the three months ended June 30, 2009.

As a result of the above factors, we had a net loss of \$13.7 million for the three months ended June 30, 2010, compared to a net loss of \$4.2 million for the three months ended June 30, 2009.

*Six Months Ended June 30, 2010 Compared to Six Months Ended June 30, 2009:*

	<b>2010</b>	<b>Six Months Ended June 30, 2009</b>	<b>Change</b>
		(in thousands)	
Revenue	\$ 51	\$	\$ 51
Operating expenses	\$ 6,176	\$ 7,657	\$ (1,481)
Operating loss	\$ (6,125)	\$ (7,657)	\$ 1,532
Other income (expense)	\$ (26,045)	\$ (1,947)	\$ (24,098)
Net loss	\$ (32,170)	\$ (9,604)	\$ (22,566)

Revenue increased \$0.05 million for the six months ended June 30, 2010 compared to the same period last year due to commercial sales of low dose Eligen<sup>®</sup> B-12.

Operating expenses decreased \$1.6 million or 21% for the six months ended June 30, 2010 in comparison to the same period last year. Details of these changes are highlighted in the table below:

	(in thousands)
Decrease in human resources costs	\$ (374)
Decrease in professional fees	(908)
Decrease in occupancy costs	(822)
Decrease in clinical costs	(522)
Decrease in depreciation and amortization	(157)
Increase in other costs	1,302

\$ (1,481)

Human resource costs decreased \$374 thousand, or 12%, due primarily to a \$460 thousand decrease in non-cash compensation and a \$79 thousand decrease from reduction in personnel, offset by the award of a \$150 thousand special bonus to the Company's CEO and a \$15 thousand increase in employee benefits.

23

---

**Table of Contents**

Professional fees decreased \$908 thousand, or 30%, due primarily to a \$597 thousand decrease in legal fees primarily in connection with the completion of the arbitration with the Company's former CEO; a \$252 thousand decrease in consulting costs and \$59 thousand decrease from other professional fees.

Occupancy costs decreased \$822 thousand, or 82%, due to the closure of our laboratory facilities in Tarrytown, NY. Clinical costs decreased \$522 thousand, or 57%, due primarily to a \$247 thousand decrease in clinical trial costs and a \$132 thousand decrease in outside lab fees associated with the completion of analytical testing programs related to the B-12 program; a \$103 thousand decrease in lab supplies and a \$57 thousand decrease in repairs and maintenance of laboratory equipment as a result of closure of the Tarrytown NY facility in 2009.

Depreciation and amortization costs decreased \$157 thousand, or 51%, due to the sales of laboratory equipment and the write off of certain equipment in connection with the closure of the Tarrytown facility.

Other costs increased \$1.3 million, or 194%, due primarily to the receipt of \$822 thousand proceeds from the sale of fixed asset equipment in 2009, an increase of \$220 thousand in estimated costs to settle outstanding lawsuit and a \$353 thousand credit adjustment to restructuring expense taken during the first quarter 2009 in connection with the closure of the Tarrytown facility.

Our principal operating costs include the following items as a percentage of total operating expenses:

	<b>Six Months Ended June 30,</b>	
	<b>2010</b>	<b>2009</b>
Human resource costs, including benefits	44%	41%
Professional fees for legal, intellectual property, accounting and consulting	34%	39%
Occupancy for our laboratory and operating space	3%	13%
Clinical costs	6%	12%
Depreciation and amortization	3%	4%
Other	10%	-9%

Other expense increased \$24.1 million for the six months ended June 30, 2010 in comparison to the same period last year primarily due to a \$22.3 million increase in the fair value of derivative instruments due to the issuance of new warrants which are required to be accounted for as a derivative instruments and to relative changes in stock price during the six months ended June 30, 2010 and June 30, 2009 respectively; an increase of \$1.1 million in interest expense and a decrease of \$0.7 million in other income due primarily from a \$0.5 installment payment on the sale of patent to MannKind and \$0.2 million decrease in sublease income in connection with the closure of our Tarrytown facility during 2009.

As a result of the above factors, we had a net loss of \$32.2 million for the six months ended June 30, 2010, compared to a net loss of \$9.6 million for the six months ended June 30, 2009.

**Liquidity and Capital Resources**

Since our inception in 1986, we have generated significant losses from operations and we anticipate that we will continue to generate significant losses from operations for the foreseeable future. As of June 30, 2010, our accumulated deficit was approximately \$468.8 million and our stockholders deficit was approximately \$73.4 million. Our net loss and operating loss was \$13.7 million and \$3.1 million, respectively for the three months ended June 30, 2010 compared to a net loss and net operating loss of \$4.2 million and \$3.0 million, respectively for the three months ended June 30, 2009. Our net loss and net operating loss for the six months ended June 30, 2010 were \$32.2 million and \$6.1 million respectively compared to \$9.6 million and \$7.7 million, respectively for the six months ended June 30, 2009.

On July 29, 2010, we issued a promissory note (the "Note") to MHR Institutional Partners IIA LP and MHR Institutional Partners II LP (together, "MHR") in the principal amount of \$525,000. The Note provides for an interest rate of 15% per annum, with the entire principal amount due and payable on October 27, 2010 (the "Maturity Date"). The Maturity Date will be accelerated, in certain circumstances, to the date that is two business

## **Table of Contents**

days following the receipt by the Issuer of at least \$1,000,000 aggregate cash proceeds from third parties, whether in connection with certain financing transactions, commercial transactions or otherwise. The obligations under the Note are secured in accordance with the terms of the Amendment (the "Amendment") to the Pledge and Security Agreement whereby Emisphere and MHR amended that certain Pledge and Security Agreement, dated as of September 26, 2005 (the "Security Agreement") to extend the terms of the Security Agreement other than the intellectual property licensed to Novartis pursuant to the Master Agreement and Amendment dated June 4, 2010 by and between Emisphere and Novartis, to include the principal, interest and other obligations provided under the Note. In accordance with the terms of that certain 11.00% Senior Secured Convertible Note issued by the Emisphere to MHR and due September 26, 2012, MHR also provided a written consent (the "Consent") to allow for the issuance of the Note and related obligations provided under the Amendment.

In April 2005, the Company entered into an amended and restated employment agreement with its then Chief Executive Officer, Dr. Michael M. Goldberg, for services through July 31, 2007. On January 16, 2007, the Board of Directors terminated Dr. Goldberg's services. On April 26, 2007, the Board of Directors held a special hearing at which it determined that Dr. Goldberg's termination was for cause. On March 22, 2007, Dr. Goldberg, through his counsel, filed a demand for arbitration asserting that his termination was without cause and seeking \$1,048,000 plus attorney's fees, interest, arbitration costs and other relief alleged to be owed to him in connection with his employment agreement with the Company. During the arbitration, Dr. Goldberg sought a total damage amount of at least \$9,223,646 plus interest. On February 11, 2010, the arbitrator issued the final award in favor of Dr. Goldberg for a total amount of approximately \$2,333,115 as full and final payment for all claims, defenses, counterclaims, fees and related matters. The Company opposed Dr. Goldberg's petition to confirm the arbitration award. On July 12, 2010 the award was confirmed by the court. As of August 10, 2010, the Company adjusted its estimate of costs to settle this matter to \$2.6 million to account for potential additional interest costs on the settlement amount and additional legal fees. Dr. Goldberg has proposed an order of settlement in the amount of approximately \$2.6 million and seeks to have a final order entered August 16, 2010.

On June 4, 2010, we entered into a Master Agreement and Amendment with Novartis (the "Novartis Agreement"). Pursuant to the Novartis Agreement, we were released and discharged from its obligations under the Novartis Note in exchange for (1) the reduction of future royalty and milestone payments up to an aggregate amount of \$11.0 million due the Company under the Research Collaboration and Option Agreement, dated as of December 3, 1997, as amended on October 20, 2000, and the License Agreement, date as of March 8, 2000, for the development of an oral salmon calcitonin product for the treatment of osteoarthritis and osteoporosis.; (2) the right for Novartis to evaluate the feasibility of using Emisphere's Eligen® Technology with two new compounds to assess the potential for new product development opportunities; and (3) other amendments to the Research Collaboration and Option Agreement and License Agreement. As of the date of the Novartis Agreement, the outstanding principal balance and accrued interest of the Novartis Note was approximately \$13.0 million.

We have limited capital resources and operations to date have been funded primarily with the proceeds from collaborative research agreements, public and private equity and debt financings and income earned on investments. As of June 30, 2010 total cash was \$0.7 million including restricted cash of \$0.26 million. The change in cash relates to the net loss offset by changes in accounts payable and non-cash items. We anticipate that we will continue to generate significant losses from operations for the foreseeable future, and that our business will require substantial additional investment that we have not yet secured. As such, we anticipate that our existing cash resources, including the amounts provided by MHR in connection with the July 2010 MHR Note but not accounting for an approximately \$2.6 million arbitration award in favor of the Company's former CEO, will enable us to continue operations through approximately August 31, 2010 or earlier if unforeseen events arise that negatively affect our liquidity. However, this expectation is based on the current operating plan that could change as a result of many factors and additional funding may be required sooner than anticipated. These conditions raise substantial doubt about our ability to continue as a going concern. The audit reports prepared by our independent registered public accounting firms relating to our financial statements for the years ended December 31, 2009, 2008 and 2007 include an explanatory paragraph expressing substantial doubt about our ability to continue as a going concern.

Our business will require substantial additional investment that has not yet been secured. While our plan is to raise capital when needed and/or to pursue partnering opportunities, we cannot be sure how much we will need to spend in order to develop, market and manufacture new products and technologies in the future. We expect to continue to spend substantial amounts on research and development, including amounts spent on conducting clinical trials for our product candidates. Further, we will not have sufficient resources to develop fully any new products or

## **Table of Contents**

technologies unless we are able to raise substantial additional financing on acceptable terms or secure funds from new or existing partners. We cannot assure that financing will be available on favorable terms or at all. Additionally, these conditions may increase the cost to raise capital and/or result in further dilution. Our failure to raise capital when needed would adversely affect our business, financial condition and results of operations, and could force us to reduce or cease our operations.

However, we have implemented aggressive cost control initiatives and management processes to extend our cash runway. The Company realized a critical milestone in its cost control plan which will contribute to meeting its cash burn target of between \$7 and \$8 million per year. We are also pursuing new as well as enhanced collaborations and exploring other financing options, with the objective of minimizing dilution and disruption.

### **Off-Balance Sheet Arrangements**

As of June 30, 2010, we had no off-balance sheet arrangements, other than operating leases. There were no changes in significant contractual obligations during the three months ended June 30, 2010.

### **Critical Accounting Estimates**

Please refer to the Company's Annual Report on Form 10-K filed with the SEC on March 25, 2010 for detailed explanations of its critical accounting estimates which have not changed significantly during the period ended June 30, 2010.

### **New Accounting Pronouncements**

In October 2009, the FASB issued ASU 2009-13, *Multiple-Deliverable Revenue Arrangements*, (amendments to FASB ASC Topic 605, *Revenue Recognition*) (ASU 2009-13). ASU 2009-13 requires entities to allocate revenue in an arrangement using estimated selling prices of the delivered goods and services based on a selling price hierarchy. The amendments eliminate the residual method of revenue allocation and require revenue to be allocated using the relative selling price method. ASU 2009-13 should be applied on a prospective basis for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, with early adoption permitted. The adoption of ASU 2009-13 did not have a material impact on the Company's results of operations or financial condition.

In April 2010, the FASB issue ASU 2010-17, *Revenue Recognition - Milestone Method* (ASU 2010-17). ASU 2010-17 provides guidance on the criteria that should be met for determining whether the milestone method of revenue recognition is appropriate. A vendor can recognize consideration that is contingent upon achievement of a milestone in its entirety as revenue in the period in which the milestone is achieved only if the milestone meets all criteria to be considered substantive. The following criteria must be met for a milestone to be considered substantive. The consideration earned by achieving the milestone should 1. Be commensurate with either the level of effort required to achieve the milestone or the enhancement of the value of the item delivered as a result of a specific outcome resulting from the vendor's performance to achieve the milestone. 2, Related solely to past performance. 3. Be reasonable relative to all deliverables and payment terms in the arrangement. No bifurcation of an individual milestone is allowed and there can be more than one milestone in an arrangement. Accordingly, an arrangement may contain both substantive and nonsubstantive milestones. ASU 2010-17 is effective on a prospective basis for milestones achieved in fiscal years, and interim periods within those years, beginning on or after June 15, 2010. The adoptions of ASU 2010-17 did not have a material impact on the Company's results of operations or financial condition.

Management does not believe there would have been a material effect on the accompanying financial statements had any other recently issued, but not yet effective, accounting standards been adopted in the current period.

### **ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

***Fair Value of Warrants and Derivative Liabilities.*** At June 30, 2010, the estimated fair value of derivative instruments was \$29.2 million. We estimate the fair values of these instruments using the Black-Scholes option pricing model which takes into account a variety of factors, including historical stock price volatility, risk-free interest rates, remaining maturity and the closing price of our common stock. We believe that the assumption that

**Table of Contents**

has the greatest impact on the determination of fair value is the closing price of our common stock. The following table illustrates the potential effect of changes in the assumptions used to calculate fair value:

	<b>Derivatives</b> (in thousands)
25% increase in stock price	\$ 9,282
50% increase in stock price	18,827
5% increase in assumed volatility	739
25% decrease in stock price	(8,419)
50% decrease in stock price	(16,448)
5% decrease in assumed volatility	(760)

**ITEM 4T. CONTROLS AND PROCEDURES****Evaluation of Disclosure Controls and Procedures**

The Company's senior management is responsible for establishing and maintaining a system of disclosure controls and procedures (as defined in Rule 13a-15 and 15d-15 under the Securities Exchange Act of 1934 (the "Exchange Act")) designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including its principal executive officer or officers and principal financial officer or officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

The Company has evaluated the effectiveness of the design and operation of its disclosure controls and procedures under the supervision of and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, as of the end of the period covered by this report. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures are effective.

**Changes in Internal Control over Financial Reporting**

There have been no changes in our internal control over financial reporting during the three month period ended June 30, 2010 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**PART II****ITEM 1. LEGAL PROCEEDINGS**

In April 2005, the Company entered into an amended and restated employment agreement with its then Chief Executive Officer, Dr. Michael M. Goldberg, for services through July 31, 2007. On January 16, 2007, the Board of Directors terminated Dr. Goldberg's services. On April 26, 2007, the Board of Directors held a special hearing at which it determined that Dr. Goldberg's termination was for cause. On March 22, 2007, Dr. Goldberg, through his counsel, filed a demand for arbitration asserting that his termination was without cause and seeking \$1,048,000 plus attorney's fees, interest, arbitration costs and other relief alleged to be owed to him in connection with his employment agreement with the Company. During the arbitration, Dr. Goldberg sought a total damage amount of at least \$9,223,646 plus interest. On February 11, 2010, the arbitrator issued the final award in favor of Dr. Goldberg for a total amount of approximately \$2,333,115 as full and final payment for all claims, defenses, counterclaims, fees and related matters. The Company opposed Dr. Goldberg's petition to confirm the arbitration award. On July 12, 2010 the award was confirmed by the court. As of August 10, 2010, the Company adjusted its estimate of costs to settle this matter to \$2.6 million to account for potential additional interest costs on the settlement amount and additional legal fees. Dr. Goldberg has proposed an order of settlement in the amount of approximately \$2.6 million and seeks to have a final order entered August 16, 2010.

## **Table of Contents**

### **ITEM 1A. RISK FACTORS**

*The following risk factors should be read carefully in connection with evaluating our business and the forward-looking statements that we make in this Report and elsewhere (including oral statements) from time to time. Any of the following risks could materially and adversely affect our business, our operating results, our financial condition and the actual outcome of matters as to which forward-looking statements are made in this Report. Our business is subject to many risks, which are detailed further in our Annual Report on Form 10-K, including:*

*Financial Risks*

We have a history of operating losses and we may never achieve profitability. If we continue to incur losses or we fail to raise additional capital or receive substantial cash inflows from our partners by June 2010, we may be forced to cease operations.

As of June 30, 2010, we had approximately \$0.7 million in cash and restricted cash, approximately \$22.2 million in working capital deficiency, a stockholders' deficit of approximately \$73.4 million and an accumulated deficit of approximately \$468.8 million. Our net loss and operating loss for the three months ended June 30, 2010 were approximately \$13.7 million and \$3.1 million, respectively and \$32.2 million and \$6.1 million, respectively for the six months ended June 30, 2010. Since our inception in 1986, we have generated significant losses from operations. We anticipate that we will continue to generate significant losses from operations for the foreseeable future, and that our business will require substantial additional investment that we have not yet secured. These conditions raise substantial doubt about our ability to continue as a going concern. The audit reports prepared by our independent registered public accounting firms relating to our financial statements for the years ended December 31, 2007, 2008 and 2009, respectively included an explanatory paragraph expressing substantial doubt about our ability to continue as a going concern.

On July 29, 2010, we issued a promissory note (the "Note") to MHR in the principal amount of \$525,000. The Note provides for an interest rate of 15% per annum, with the entire principal amount due and payable on October 27, 2010. We anticipate that our existing capital resources, including the amounts provided by MHR in connection with the Note will enable us to continue operations through approximately August 31, 2010, or earlier if unforeseen events or circumstances arise that negatively affect our liquidity. If we fail to raise additional capital or obtain substantial cash inflows from existing partners prior to August 31, 2010, we will be forced to cease operations.

We anticipate that we will continue to generate significant losses from operations for the foreseeable future, and that our business will require substantial additional investment that we have not yet secured. As such, we anticipate that our existing cash resources, including the amounts provided by MHR in connection with the July 2010 MHR Note but not accounting for an approximately \$2.6 million arbitration award in favor of the Company's former CEO, will enable us to continue operations through approximately August 31, 2010 or earlier if unforeseen events arise that negatively affect our liquidity. Further, we have significant future commitments and obligations. These conditions raise substantial doubt about our ability to continue as a going concern. Consequently, the audit opinion issued by our independent registered public accounting firm relating to our financial statements for the year ended December 31, 2009 contained a going concern explanatory paragraph. We are pursuing new as well as enhanced collaborations and exploring other financing options, with the objective of minimizing dilution and disruption.

While our plan is to raise capital when needed and/or to pursue product partnering opportunities, we cannot be sure how much we will need to spend in order to develop, market, and manufacture new products and technologies in the future. We expect to continue to spend substantial amounts on research and development, including amounts spent on conducting clinical trials for our product candidates. Further, we will not have sufficient resources to develop fully any new products or technologies unless we are able to raise substantial additional financing or to secure funds from new or existing partners. We cannot assure you that financing will be available when needed, or on favorable terms or at all. The current economic environment combined with a number of other factors pose additional challenges to the Company in securing adequate financing under acceptable terms. If additional capital is raised through the sale of equity or convertible debt securities, the issuance of such securities would result in dilution to our existing stockholders. Additionally, these conditions

may increase the costs to raise capital. Our failure to raise capital when needed would adversely

28

---

**Table of Contents**

affect our business, financial condition, and results of operations, and could force us to reduce or discontinue operations.

The audit opinion issued by our independent registered public accounting firm relating to our financial statements for the year ended December 31, 2009 contained a going concern explanatory paragraph.

We may not be able to meet the covenants detailed in the Convertible Notes with MHR Institutional Partners IIA LP, which could result in an increase in the interest rate on the Convertible Notes and/or accelerated maturity of the Convertible Notes, which we would not be able to satisfy.

Our stock was de-listed from NASDAQ.

*Risks Related to our Business*

Our business will suffer if we fail or are delayed in developing and commercializing an improved oral form of Vitamin B12.

We are highly dependent on the clinical success of our product candidates.

We are highly dependent upon collaborative partners to develop and commercialize compounds using our delivery agents.

Our collaborative partners control the clinical development of certain of our drug candidates and may terminate their efforts at will.

Our product candidates are in various stages of development, and we cannot be certain that any will be suitable for commercial purposes.

Our collaborative partners are free to develop competing products.

Our business will suffer if we cannot adequately protect our patent and proprietary rights.

We may be at risk of having to obtain a license from third parties making proprietary improvements to our technology.

We are dependent on third parties to manufacture and, in some cases, test our products.

We are dependent on our key personnel and if we cannot recruit and retain leaders in our research, development, manufacturing, and commercial organizations, our business will be harmed.

*Risks Related to our Industry*

Our future business success depends heavily upon regulatory approvals, which can be difficult to obtain for a variety of reasons, including cost.

We may face product liability claims related to participation in clinical trials for future products.

We are subject to environmental, health and safety laws and regulations for which we incur costs to comply.

We face rapid technological change and intense competition.

*Other Risks*

Provisions of our corporate charter documents, Delaware law, our financing documents and our stockholder rights plan may dissuade potential acquirers, prevent the replacement or removal of our current management and members of our Board of Directors and may thereby affect the price of our common stock.

## **Table of Contents**

Our stock price has been and may continue to be volatile.

Future sales of common stock or warrants, or the prospect of future sales, may depress our stock price.

For a more complete listing and description of these and other risks that the Company faces, please see our Annual Report for 2009 on Form 10-K as filed with the SEC on March 25, 2010.

## **ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

On April 5, 2010, Rodman & Renshaw, LLC ( Rodman ) notified the Company of its intention to exercise part of its warrants to purchase 504,000 shares of common stock at an exercise price of \$0.875, using the cashless exercise provision. The Company issued 297,636 shares of common stock to Rodman on April 5, 2010. On April 30, 2010, Rodman notified the Company of its intention to exercise the remaining outstanding portion of the Warrant using the cashless exercise provision. The Company issued an additional 27,192 shares of common stock to the purchase agent on April 30, 2010. After this cashless exercise, the August 2009 Equity Financing Placement Agent Warrants are no longer outstanding.

On April 20, 2010, Elan Corporation, plc ( Elan ) notified the Company of its intention to exercise its Warrant to purchase up to 600,000 shares of the Company's common stock at an exercise price of \$0.4635 (as adjusted pursuant to the terms of the warrant) using the cashless exercise provision. On April 21, 2010, the Company issued 518,206 shares of common stock to Elan. After the cashless exercise, the Elan Warrant is no longer outstanding.

On May 13, 2010, the BAM Opportunity Fund LP ( BAM ) notified the Company of its intention to exercise its warrant to purchase up to 1,342,857 shares of the Company's common stock, originally issued in August 2009 at an exercise price of \$0.70, using the cashless exercise provision. The Company issued 1,005,213 shares of common stock to BAM on May 18, 2010.

On July 21, 2010, MOG Capital, LLC ( MOG Capital ) notified the Company of its intention to exercise part of its warrant to purchase up to 1,342,857 shares of the Company's common stock originally issued in August 2009 at an exercise price of \$0.70, using the cashless exercise provision. The Company issued 6,000 shares to MOG Capital on July 26, 2010. On July 23, 2010, MOG notified the Company of its intention to exercise the remaining outstanding portion of its warrant using the cashless exercise provision. The Company issued an additional 955,724 shares of common stock to MOG on July 28, 2010. After such cashless exercises, August 2009 Warrants originally issued in August 2009 to purchase 3,729,323 shares of common stock, in the aggregate, remained outstanding.

For these issuances, the Company is relying on the exemption from federal registration under Section 4(2) of the Securities Act of 1933, as amended.
