Message from the Managements

We are pleased to present the outline of operation and financial results for Makita's 99th interim period, ended September 30, 2010.

Consolidated Operating Result as Interim Period

During the six months (the period) ended September 30, 2010, housing starts remained weak and the economic recovery was slow in Japan and the United States. However, in Western Europe, economic conditions recovered strongly in Germany and other countries in the euro area. Business conditions in Asia were steady, mainly led by the strong and continued growth of the Chinese economy. In emerging countries, the economies have generally been expanding. Capital investments and personal spending were very active, especially in Central and South America.

The demand for power tools remained weak in Japan and the United States, while it recovered steadily in Western Europe and grew strongly in many emerging countries supported by the economic growth of these countries.

Under such circumstances, in the development side, Makita continuously expanded its product lines, including those of power tools, rechargeable tools and gardening equipment through the development of smaller and lighter tools or tools with lower noise and vibration. In the production side, Makita responded quickly and flexibly to the change in demand, by increasing the production volume urgently in the Chinese plants which was reduced last year for inventory level adjustment. In the sales side, we also stepped up efforts to maintain and improve the structure of our sales and after-sale service based on direct communication with customers, which remains one of our group's fortes.

Recovery in overseas demand supported the first increase both in interim net sales and profits in two years

In our consolidated financial results for the period, consolidated net sales increased by 12.7% to 133,807 million yen compared to the same period of the previous year, supported mainly by the strong demand for power tools in the overseas market, although appreciation of the yen value against major foreign currencies had some negative impact. Operating income increased 46.9% to 21,843 million yen (operating income ratio: 16.3%). This increase was mainly due to the increased sales and the improvement in the ratio of cost of sales resulting from the increased production volume. Income before income taxes increased by 25.9% to 21,751 million yen (income before income taxes ratio: 16.3%). Net income attributable to Makita Corporation increased by 42.4% to 15,122 million yen (net income attributable to Makita Corporation ratio: 11.3%).

Net sales by region are as follows:

Net sales in Japan increased by 6.5% to 22,182 million yen compared to the same period of the previous year. This increase was because sales of lithium-ion battery products and pneumatic tools were strong, although the market conditions remained severe.

Net sales in Europe increased by 10.4% to 57,028 million yen due to the steady demand in Germany and other countries in Western Europe and the market recovery in Eastern Europe and Russia.

Net sales in North America increased only by 3.8% to 18,472 million yen. This increase was because housing starts remained weak in the United States and no strong economic recovery has been seen.

Net sales in Asia increased 32.1% to 11,388 million yen supported by the demand recovery in Southeast Asian countries.

Net sales in other regions grew strongly mainly due to economic recovery resulting from the increased natural resource prices. Net sales in Central and South America increased by 30.1% to 9,622 million yen; sales in Oceania increased by 20.7% to 7,888 million yen; and sales in the Middle East and Africa increased by 23.4% to 7,227 million yen.

Table of Contents

Outlook for the year ending March 31, 2011 and Issue to be Addressed

Although modest demand recovery is expected in Europe, the conditions of the construction market in Japan and the United States will remain severe. In Asia and other emerging countries, the power tool market is expected to expand supported by strong demand of low-priced products. The exchange market is unpredictable, considering the movement in Renminbi and the lowest-ever U.S. dollar value. Thus, the business environment for Makita is expected to remain severe.

Under these circumstances, Makita aims to establish high brand recognition and become a Strong Company capable of acquiring and maintaining the top market share as an international total supplier of power tools for professional use, pneumatic tools, gardening equipment and other tools in each international region. To achieve these objectives, we will strive to reinforce its R&D and product development activities to deliver more user-friendly, earth-conscious power tools and gardening equipment. We will also strengthen the technical development of compact engines. The global production organizations will be strengthened to respond to changes in demand conditions. In addition, we will put focus on maintaining and strengthening a sales and after-sales service structure that leads the industry both in the domestic and overseas markets.

The Interim Cash Dividends of 15 Yen Per Share

Makita's basic policy on the distribution of profits is to maintain a dividend payout ratio of at least 30%, with a lower limit on annual cash dividends of 18 yen per share.

For the interim period under review, Makita declared to pay a dividend of 15 yen per share, as announced in April 2010.

Based on its dividend policy, Makita's board of directors will decide on proposals for the dividend for the end of the fiscal year at their meeting to approve the financial statements after they are finalized near the end of April 2011. Their proposals will be presented for discussion and final approval at the Ordinary General Meeting of Shareholders.

We look forward to the continuing support and cooperation of our shareholders.

November 2010

Masahiko Goto

President, Representative Director
&

Chief Executive Officer

Feature Section

n Makita Environmental Preservation Effort

Makita's environmental policy places emphasis on conducting a wide range of biodiversity-conscious environmental protection activities.

As part of efforts to reduce environmental burden of our operations, our Okazaki Plant (Aichi Prefecture) purifies waste water in its water treatment facility before discharging the waste water to public water. In the purification course, waste water is purified in compliance with requirements set by law and ordinance, and in accordance with directives of the Yahagi River Basin Water Quality Preservation Association, and our self-imposed voluntary standards which are stricter than those regulatory requirements and directives. We are committed to preservation of quality of river and sea water, aiming to contribute to environmental preservation. We also supported the 10th Conference of the Parties to the Convention on Biological Diversity (COP10) held in Nagoya this October, advocating its purport.

n Environmentally-friendly 36V Lithium-Ion Battery Gardening Equipment Series Launched

In April 2010, we launched the Gardening equipment Series operating with 36V lithium-ion batteries. This Series emits no exhaust gas, features lower noise and vibrations, and provides strong power comparable to that of engine-powered equipment. It is suitable for use in residential areas, public facilities, resort facilities and other places where considerations for neighbors are necessary.

While most gardening equipment in the market use engines because of their power requirement and portability, we provide to users four-stroke engine products that emit far less toxic exhaust gas than two-stroke engine products and newly launched lithium-ion battery products. We will continue the development of environmentally-friendly products.

n Strengthening of Global Network

We are establishing and expanding our distribution network to ensure, as an international total supplier of power tools for professional use, that customers around the world can use our products safely for long years.

In June 2010, we completed a new office building of the sales subsidiary in Switzerland. The new office building in Switzerland has larger office and warehouse spaces than the former site. The service system was reinforced in order to respond to customers' needs more accurately. Facilities to improve our customer service are also provided, including a product show room space and a training space. In May 2010, we opened a representative office in St. Petersburg, the second largest city in Russia, as an after-sales service site.

In the future, we will continue our efforts to improve customer satisfaction and establish high brand recognition by maintaining and further reinforcing our best sales and after-sales service structure in the industry.

n Exhibition in the DIY Show

Makita exhibited in the JAPAN DIY HOMECENTER SHOW 2010 held at Makuhari Messe International Convention Hall (Chiba City) from August 26 to 28, 2010, following last years. DIY-related products available in the market were exhibited in this trade show. 438 companies exhibited in the trade show this year, with about 80,000 visitors. The Makita booth also had a great number of visitors.

Many visitors experienced our products in the Makita booth and admired, among others, the powerful performance of our compact rechargeable circular saw (HS300DW). It was a great opportunity to be able to appeal the advantages of Makita products by offering visitors personal experience to use Makita products.

 Total volume of shares traded: 102,532 thousand shares

Basic policy regarding profit distribution and to repurchases of its outstanding shares

Makita's basic policy on the distribution of profits was established in the fiscal year ended March 31, 2004 is to maintain a dividend payout ratio of 30% or greater, with a lower limit on annual cash dividends of 18 yen per share. However, in the event special circumstances arise, computation of the amount of dividends will be based on net income attributable to Makita Corporation after certain adjustments. With respect to repurchases of its outstanding shares, Makita aims to implement a flexible capital policy, augment the efficiency of its capital employment, and thereby boost shareholder profit. Also Makita continues to consider execution of own share repurchases in light of trends in stock prices.
