Forward-Looking Statements

The information presented or incorporated by reference in this Annual Report on Form 10-K under the headings Item 1. Business and Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934. These statements are often identified by such forward-looking terminology as expect, intent, look, believe, anticipate, estimate, project, seek, may, will, would, could, should, trend, target, and goal or similar statements. Such terms and include, but are not limited to those relating to the adequacy and amount of available liquidity and capital resources to the Bank, the Company's liquidity and capital requirements, changes in the size of the Bank's loan portfolio, the recovery of the valuation allowance on deferred tax assets, the amount and mix of the Bank's non-performing assets and the adequacy of the allowance there for, future losses on non-performing assets, the amount of interest-earning assets, the amount and mix of brokered and other deposits (including the Company's ability to renew brokered deposits), the availability of alternate funding sources, the payment of dividends, the future outlook for the Company, and the Company's and the Bank's compliance with regulatory standards generally (including the Bank's status as well-capitalized), and supervisory agreements, individual capital requirements or other supervisory directives or requirements to which the Company or the Bank are expressly subject, specifically. A number of factors could cause actual results to differ materially from the Company's assumptions and expectations. These include but are not limited to the adequacy and marketability of real estate securing loans to borrowers, possible legislative and regulatory changes, including changes in the degree and manner of regulatory supervision, the ability of the Company and the Bank to establish and adhere to plans and policies relating to, among other things, capital, business, non-performing assets, loan modifications, documentation of loan loss allowance and concentrations of credit that are satisfactory to the OTS in accordance with the terms of the Company and Bank supervisory agreements and to otherwise manage the operations of the Company and the Bank to ensure compliance with other requirements set forth in the supervisory agreements; the ability of the Company and the Bank to obtain required consents from the OTS under the supervisory agreements or other directives; adverse economic, business and competitive developments such as shrinking interest margins, reduced collateral values, deposit outflows and reduced demand for financial services and loan products; changes in accounting policies and guidelines, or monetary and fiscal policies of the federal government or tax laws; international economic developments; changes in credit or other risks posed by the Company's loan and investment portfolios; technological, computer-related or operational difficulties; adverse changes in securities markets; results of litigation; collateral advance rates and policies of the FHLB; costs associated with alternate funding sources; or other significant uncertainties. Additional factors that may cause actual results to differ from the Company's assumptions and expectations include those set forth in this Form 10-K. All forward-looking statements are qualified by, and should be considered in conjunction with, such cautionary statements. For additional discussion of the risks and uncertainties applicable to the Company, see the Risk Factors section of this Form 10-K.

PART I

ITEM 1. BUSINESS

General

HMN Financial, Inc. (HMN or the Company) is a stock savings bank holding company that owns 100% of Home Federal Savings Bank (the Bank). The Bank has a community banking philosophy and operates retail banking and loan production facilities in Minnesota and Iowa. The Bank has one wholly owned subsidiary, Osterud Insurance Agency, Inc. (OIA) which offers financial planning products and services. HMN has another wholly owned subsidiary, Security Finance Corporation (SFC) which acts as an intermediary for the Bank in completing certain real estate transactions. The Company was incorporated in Delaware in 1994.

As a community-oriented financial institution, the Company seeks to serve the financial needs of communities in its market area. The Company's business involves attracting deposits from the general public and businesses and using such deposits to originate or purchase one-to-four family residential, commercial real estate, and multi-family mortgage loans as well as consumer, construction, and commercial business loans. The Company also invests in mortgage-backed and related securities, U.S. government agency obligations and other permissible investments. The executive offices of the Company are located at 1016 Civic Center Drive Northwest, Rochester, Minnesota 55901. Its telephone number at that address is (507) 535-1200. The Company's website is located at www.hmnf.com. Information contained on the Company's website is expressly not incorporated by reference into this Form 10-K.

Market Area

The Company serves the southern Minnesota counties of Fillmore, Freeborn, Houston, Mower, Olmsted and Winona and portions of Steele, Dodge, Goodhue and Wabasha through its corporate office located in Rochester, Minnesota and its ten branch offices located in Albert Lea, Austin, La Crescent, Rochester, Spring Valley and Winona, Minnesota. The portion of the Company's southern Minnesota market area consisting of Rochester and the contiguous communities is composed of primarily urban and suburban communities, while the balance of the Company's southern Minnesota market area consists primarily of rural areas and small towns. Primary industries in the Company's southern Minnesota market area include manufacturing, agriculture, health care, wholesale and retail trade, service industries and education. Major employers include the Mayo Clinic, Hormel Foods (a food processing company), and IBM. The Company's market area is also the home of Winona State University, Rochester Community and Technical College, University of Minnesota - Rochester, Winona State University - Rochester Center and Austin's Riverland Community College.

The Company serves Dakota County, in the southern portion of the Minneapolis and St. Paul metropolitan area, from its office located in Eagan, Minnesota. Major employers in this market area include Delta Airlines, Cenex Harvest States (cooperative), Flint Hills Resources LP (oil refinery), Unisys Corp (computer software) and West Group, a Thomson Reuters business (legal research).

The Company serves the Iowa counties of Marshall and Tama through its branch offices located in Marshalltown and Toledo, Iowa. Major employers in the area are Swift & Company (pork processors), Fisher Controls International (valve and regulator manufacturing), Lennox Industries (furnace and air conditioner manufacturing), Iowa Veterans Home (hospital care), Marshall Community School District (education), Marshall Medical & Surgical Center (hospital care) and Meskwaki Casino (gaming operations).

Based upon information obtained from the U.S. Census Bureau for 2009 (the last year for which information is available), the population of the six primary counties in the Bank's southern Minnesota market area was estimated as follows: Fillmore 20,838; Freeborn 31,002; Houston 19,244; Mower 38,215; Olmsted 143,962; and Winona 49,436. For these same six counties, the median household income from the U.S. Census Bureau for 2008 (the last year for which information is available) ranged from \$45,155 to \$66,993. The population of Dakota County was 396,500 and the median household income was \$71,988. With respect to Iowa, the population of Marshall County was 39,259 and the population of Tama County was 17,377. The median household income of these two counties ranged from \$44,615 to \$47,298.

The Company also serves a diverse high net worth customer base primarily in the seven county metropolitan area of Minneapolis and St. Paul from its private banking office, located in Edina, Minnesota. The Company serves a

Table of Contents

similar group of individuals and businesses in Olmsted County from its private banking office located in Rochester, Minnesota.

Lending Activities

General. Historically, the Company has originated 15 and 30 year fixed rate mortgage loans secured by one-to-four family residences for its loan portfolio. Over the past 10 years, the Company has focused on managing interest rate risk and increasing interest income by increasing its investment in shorter term and generally higher yielding commercial real estate, commercial business and construction loans, while reducing its investment in longer term one-to-four family real estate loans. The Company continues to originate 15 and 30 year fixed rate mortgage loans and some shorter term fixed rate loans. The shorter term fixed and adjustable rate loans are placed into portfolio, while the majority of the 15 and 30 year fixed rate mortgage loans are sold in the secondary mortgage market. Mortgage interest rates were at historical lows in 2010 and very few 15 and 30 year loans were placed into portfolio as most were sold into the secondary market in order to manage the Company's interest rate risk position. The Company also offers an array of consumer loan products that include both open and closed end home equity loans. Home equity lines of credit have adjustable interest rates based upon the prime rate, as published in the Wall Street Journal, plus a margin. Refer to Notes 4 and 5 of the Notes to Consolidated Financial Statements in the Annual Report for more information on the loan portfolio (incorporated by reference in Item 8 of Part II of this Form 10-K).

Edgar Filing: HMN FINANCIAL INC - Form 10-K

Table of Contents

The following table illustrates the interest rate maturities of the Company's loan portfolio at December 31, 2010. Loans which have adjustable or renegotiable interest rates are shown as maturing in the period during which the contract is due. Scheduled repayments of principal are reflected in the year in which they are scheduled to be paid. The schedule does not reflect the effects of possible prepayments or enforcement of due-on-sale clauses.

During Years Ending December 31, (1)	One-to-four family		Real Estate Multi-family and Commercial		Construction or Development		Consumer		Commercial Business		Total

(1) Includes demand loans, loans having no stated maturity and overdraft loans.

The total amount of loans due after December 31, 2011 that have predetermined interest rates is \$219.9 million, while the total amount of loans due after such date that have floating or adjustable interest rates is \$305.4 million. At December 31, 2010, construction or development loans were \$10.7 million for one-to-four family dwellings, \$3.9 million for multi-family and \$0.7 million for nonresidential.

Table of Contents

The aggregate amount of loans and extensions of credit that the Bank is permitted to make to any one borrower is generally limited to 15% of unimpaired capital and surplus. In addition to the 15% limit, the Bank is permitted to lend an additional amount equal to 10% of unimpaired capital and surplus if the additional amount is fully secured by readily marketable collateral having a current market value of at least 100% of the loan or extension of credit. Similarly, the Bank is permitted to lend additional amounts equal to the lesser of 30% of unimpaired capital and surplus or \$30 million for certain residential development loans. Applicable law establishes a number of rules for combining loans to separate borrowers. Loans or extensions of credit to one person may be attributed to other persons if: (i) the proceeds of a loan or extension of credit are used for the direct benefit of the other person; or (ii) a common enterprise is deemed to exist between persons. At December 31, 2010, based upon the 15% limitation, the Bank's regulatory limit for loans to one borrower was approximately \$13.7 million. At December 31, 2010, excluding loans subject to an exception to the 15% lending limit, loans to two borrowers exceeded the current 15% limitation, by \$216,000 and \$434,000, respectively. These loans are not considered to be a violation of the regulatory lending limit requirements as they were within the Bank's lending limit when originated and the Bank is making efforts to bring these loans into compliance with the current lending limit. As of December 31, 2010, other loans also exceeded the 15% limit but were subject to additional limits referenced above. At December 31, 2010, the Bank's largest aggregate amount of loans to one borrower totaled \$24.4 million. All of the loans for the largest borrower were performing in accordance with their terms and the borrower had no affiliation with the Bank other than its relationship as a borrower.

All of the Bank's lending is subject to its written underwriting standards and to loan origination procedures. Decisions on loan applications are made on the basis of detailed applications and property valuations determined by an independent appraiser. The loan applications are designed primarily to determine the borrower's ability to repay. The more significant items on the application are verified through the use of credit reports, financial statements, tax returns or confirmations.

One-to-four family loans that are equal to or less than the conforming/saleable loan dollar limits as established by FHLMC/FNMA may be approved by a Market President or designated underwriter. This limit was \$417,000 for both 2010 and 2009. Loans up to and including \$500,000, need the approval of one of the above personnel and a Loan Committee Member. Loans over \$500,000 need approval from the Board of Directors or its Executive Committee. The Bank's individual commercial loan officers have the authority to approve loans that meet the guidelines established by the Bank's commercial loan policy for loans up to \$250,000 based on their individual delegated aggregate relationship authority. Individual delegated aggregate relationship authority varies by loan officer, with the highest individual authorities being \$250,000. The aggregate relationship amount is determined by the total customer credit commitments outstanding plus the new loan request amount. The Business Banking Department Managers can approve loans up to a \$500,000 aggregate relationship. The Chief Commercial Credit Officer and Limited Committee (consisting of the lender and the Business Banking Department Manager) or the Chief Credit Officer and Limited Committee have approval authorities for \$1.0 million aggregate and \$2.0 million aggregate, respectively. New relationship loan requests greater than \$2.0 million to our internal loan limit to one borrower of \$4.5 million, or existing loan relationship requests greater than \$2.0 million to \$7.5 million, are approved by the Senior Loan Committee. Any loan requests greater than these limits must be approved by the Bank's Board of Directors or its Executive Loan Committee.

The Bank generally requires title insurance on its mortgage loans, as well as fire and extended coverage casualty insurance in amounts at least equal to the principal amount of the loan or the value of improvements on the property. The Bank also requires flood insurance to protect the property securing its interest when the property is located in a flood plain.

One-to-Four Family Residential Real Estate Lending. At December 31, 2010, the Company's one-to-four family real estate loans, consisting of both fixed rate and adjustable rate loans, totaled \$128.5 million, a decrease of \$16.1 million, from \$144.6 million at December 31, 2009. The decrease in the one-to-four family loans in 2010 is the result of selling more of the loans that were originated into the secondary market, instead of placing them into the portfolio, in order to reduce the Company's interest rate risk position. The Company's short term

Table of Contents

strategy is to continue to sell the majority of the loans originated into the secondary market at least until market interest rates increase from their current levels.

The Company offers conventional fixed rate one-to-four family loans that have maximum terms of 30 years. In order to manage interest rate risk, the Company typically sells the majority of fixed rate loan originations with terms to maturity of 15 years or greater that are eligible for sale in the secondary market. The interest rates charged on the fixed rate loan products are based on the secondary market delivery rates, as well as other competitive factors. The Company also originates fixed rate loans with terms up to 30 years that are insured by the Federal Housing Authority (FHA), Veterans Administration, Minnesota Housing Finance Agency or Iowa Finance Authority.

The Company also offers one-year adjustable rate mortgages (ARMs) at a margin (generally 275 to 375 basis points) over the yield on the Average Monthly One Year U.S. Treasury Constant Maturity Index for terms of up to 30 years. The ARM loans offered by the Company allow the borrower to select (subject to pricing) an initial period of one year, three years, or five years between the loan origination and the date the first interest rate change occurs. The ARMs generally have a 200 basis point annual interest rate change cap and a lifetime cap of 600 basis points over or under the initial rate. The Company's originated ARMs do not permit negative amortization of principal, generally do not contain prepayment penalties and are not convertible into fixed rate loans. Because of the low interest rate environment that has existed over the last couple of years, a limited number of ARM loans have been originated as consumers have opted for the longer term fixed rate loans.

In underwriting one-to-four family residential real estate loans, the Company evaluates the borrower's credit history; ability to make principal, interest and escrow payments; the value of the property that will secure the loan; and debt to income ratios. Properties securing one-to-four family residential real estate loans made by the Company are appraised by independent appraisers. The Company originates residential mortgage loans with loan-to-value ratios up to 95% for owner-occupied homes and up to 90% for non-owner occupied homes; however, private mortgage insurance is generally required to reduce the Company's exposure to 80% of value or less on most loans. In addition, all non-owner occupied properties must be self supporting using the debt service ratio requirements, which usually requires approximately a 50% down payment on one-to-four family dwellings. The Company generally seeks to underwrite its loans in accordance with secondary market or FHA standards.

The Company's residential mortgage loans customarily include due-on-sale clauses giving it the right to declare the loan immediately due and payable in the event that, among other things, the borrower sells or otherwise disposes of the property subject to the mortgage.

Fixed rate loans in the Company's portfolio include both growing equity mortgages (GEM) loans and conventional fixed rate loans. The GEM loans require payments that increase after the first year. Under the GEM loans, the monthly payments required for the first year are established based on a 30-year amortization schedule. Depending upon the program selected, the payments may increase in the succeeding years by amounts ranging from 0% to 6.2%. Most of the GEM loans originated by the Company provide for at least four annual payment increases over the first five years of the loan. The increased payments required under GEM loans are applied to principal and have the effect of shortening the term to maturity; the GEM loans do not permit negative amortization. The Company currently offers one GEM product with a contractual maturity of approximately 15 years. The GEM loans are generally priced based upon loans with similar contractual maturities. The GEMs were targeted to consumers who anticipated future increases in income and who wanted an amortization schedule of less than 30 years. Low mortgage interest rates over the past several years have eliminated the demand for GEM loans as consumers have opted for shorter term fixed rate loans and none of these loans have been originated in the past three years. The decreased originations of GEM loans over the past several years has mitigated the risks associated with increasing loan payment amounts in a weakening economy with lower home values as those borrowers that have taken out these loans in the past have had time to build equity in their homes to offset a portion of the decline in value.

Table of Contents

Commercial Real Estate and Multi-Family Lending. The Company originates permanent commercial real estate and multi-family loans secured by properties located primarily in its market area. It also purchases a limited amount of participations in commercial real estate and multi-family loans originated by third parties on properties outside of its market area. The commercial real estate and multi-family loan portfolio includes loans secured by motels, hotels, apartment buildings, churches, ethanol plants, manufacturing plants, office buildings, business facilities, shopping malls, nursing homes, golf courses, restaurants, warehouses and other non-residential building properties primarily located in the upper Midwestern portion of the United States.

Permanent commercial real estate and multi-family loans are generally originated for a maximum term of 10 years and may have longer amortization periods with balloon maturity features. The interest rates may be fixed for the term of the loan or have adjustable features that are tied to the prime rate or another published index. Commercial real estate and multi-family loans are generally written in amounts up to 80% of the lesser of the appraised value of the property or the purchase price and generally have a debt service coverage ratio of at least 120%. The debt service coverage ratio is the ratio of net cash from operations to debt service payments. The Company may originate construction loans secured by commercial or multi-family real estate, or may purchase participation interests in third party originated construction loans secured by commercial or multi-family real estate.

Appraisals on commercial real estate and multi-family real estate properties are performed by independent appraisers prior to the time the loan is made. For transactions less than \$250,000, the Company may use an internal valuation. All appraisals on commercial and multi-family real estate are reviewed and approved by a commercial loan officer, credit manager, commercial department manager or a qualified third party. The Bank's underwriting procedures require verification of the borrower's credit history, income and financial statements, banking relationships and income projections for the property. The commercial loan policy generally requires personal guarantees from the proposed borrowers. An initial on-site inspection is generally required for all collateral properties for loans with balances in excess of \$250,000. Independent annual reviews are performed for aggregate commercial lending relationships that exceed \$500,000. The reviews cover financial performance, documentation completeness and accuracy of loan risk ratings.

Multi-family and commercial real estate loans generally present a higher level of risk than loans secured by one-to-four family residences. This greater risk is due to several factors, including the concentration of principal in a limited number of loans and borrowers, the effects of general economic conditions on income producing properties and the increased difficulty of evaluating and monitoring these types of loans. Furthermore, the repayment of loans secured by multi-family and commercial real estate is typically dependent upon the successful operation of the related real estate project. If the cash flow from the project is reduced (for example, if leases are not obtained or renewed), the borrower's ability to repay the loan may be impaired. At December 31, 2010, \$36.7 million of loans in the commercial real estate portfolio were nonperforming, with the largest two relationships being an \$5.9 million loan secured by a residential development in Minnesota and a \$5.0 million loan secured by an alternative fuel plant in Nebraska.

Construction Lending. The Company makes construction loans to individuals for the construction of their residences and to builders for the construction of one-to-four family residences. It also makes a very limited number of loans to builders for houses built on speculation. Construction loans also include commercial real estate loans.

Almost all loans to individuals for the construction of their residences are structured as permanent loans. These loans are made on the same terms as residential loans, except that during the construction phase, which typically lasts up to twelve months, the borrower pays interest only. Generally, the borrower also pays a construction fee at the time of origination equal to the origination fee plus other costs associated with processing the loan. Residential construction loans are underwritten pursuant to the same guidelines used for originating residential loans on existing properties. Construction loans to builders or developers of one-to-four family residences generally carry terms of one year or less and may permit the payment of interest from loan proceeds.

Table of Contents

Construction loans to owner occupants are generally made in amounts up to 95% of the lesser of cost or appraised value, but no more than 90% of the loan proceeds can be disbursed until the building is completed. The Company generally limits the loan-to-value ratios on loans to builders to 80%. Prior to making a commitment to fund a construction loan, the Company requires a valuation of the property, financial data, and verification of the borrower's income. The Company obtains personal guarantees for substantially all of its construction loans to builders. Personal financial statements of guarantors are also obtained as part of the loan underwriting process. Construction loans are generally located in the Company's market area.

Construction loans are obtained principally through continued business from builders and developers who have previously borrowed from the Bank, as well as referrals from existing customers and walk-in customers. The application process includes a submission to the Bank of accurate plans, specifications and costs of the project to be constructed. These items are used as a basis to determine the appraised value of the subject property to be built. At December 31, 2010, construction loans totaled \$15.3 million, of which one-to-four family residential totaled \$10.7 million, multi-family residential totaled \$3.9 million and commercial real estate totaled \$0.7 million.

The nature of construction loans makes them more difficult to evaluate and monitor, especially in a market where home prices have been declining. The risk of loss on a construction loan is dependent largely upon the accuracy of the initial estimate of the property's value upon completion of the project, experience of the builder, and the estimated cost (including interest) of the project. If the estimate of value proves to be inaccurate, the Company may be confronted, at or prior to the maturity of the loan, with a project having a value that is insufficient to assure full repayment and/or the possibility of having to make substantial investments to complete and sell the project. Because defaults in repayment may not occur during the construction period, it may be difficult to identify problem loans at an early stage. In these cases, the Company may be required to modify the terms of the loan.

Consumer Lending. The Company originates a variety of consumer loans, including home equity loans (open-end and closed-end), automobile, mobile home, lot loans, loans secured by deposit accounts and other loans for household and personal purposes.

Consumer loan terms vary according to the type and value of collateral, length of contract and creditworthiness of the borrower. The Company's consumer loans are made at fixed or adjustable interest rates, with terms up to 20 years for secured loans and up to five years for unsecured loans.

The Company's home equity loans are written so that the total commitment amount, when combined with the balance of any other outstanding mortgage liens, may not exceed 95% of the appraised value of the property or an internally established market value. Internal market values are established using current market data, including tax assessment values and recent sales data, and are typically lower than third party appraised values. The closed-end home equity loans are written with fixed or adjustable rates with terms up to 15 years. The open-end home equity lines are written with an adjustable rate with a 10-year draw period that requires interest only payments followed by a 10-year repayment period that fully amortizes the outstanding balance. The consumer may access the open-end home equity line either by making a withdrawal at the Bank or writing a check on the home equity line of credit account. Open and closed-end equity loans, which are generally secured by second mortgages on the borrower's principal residence, represented 88.9% of the Company's consumer loan portfolio at December 31, 2010.

The underwriting standards employed by the Company for consumer loans include a determination of the applicant's payment history on other debts and ability to meet existing obligations and payments on the proposed loan. Although creditworthiness of the applicant is of primary consideration, the underwriting process also includes a comparison of the value of the security, if any, in relation to the proposed loan amount. Consumer loans may entail greater credit risk than do residential mortgage loans, particularly in the case of consumer loans that are unsecured or are secured by rapidly depreciable assets, such as automobiles or mobile homes. In these cases, any repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment

Table of Contents

of the outstanding loan balance as a result of the greater likelihood of damage, loss or depreciation. In addition, consumer loan collections are dependent on the borrower's continuing financial stability, and thus are more likely to be affected by adverse personal circumstances. Furthermore, the application of various federal and state laws, including bankruptcy and insolvency laws, may limit the amount that can be recovered on such loans. At December 31, 2010, \$0.2 million of the consumer loan portfolio was non-performing compared to \$4.1 million at December 31, 2009.

Commercial Business Lending. The Company maintains a portfolio of commercial business loans to borrowers associated with the real estate industry as well as to retail, manufacturing operations and professional firms. The Company's commercial business loans generally have terms ranging from six months to five years and may have either fixed or variable interest rates. The Company's commercial business loans generally include personal guarantees and are usually, but not always, secured by business assets such as inventory, equipment, leasehold interests in equipment, fixtures, real estate and accounts receivable. The underwriting process for commercial business loans includes consideration of the borrower's financial statements, tax returns, projections of future business operations and inspection of the subject collateral, if any. The Company also purchases participation interests in commercial business loans originated outside of the Company's market area from third party originators. These loans generally have underlying collateral of inventory or equipment and repayment periods of less than ten years.

Unlike residential mortgage loans, which generally are made on the basis of the borrower's ability to make repayment from his or her income, and which are secured by real property with more easily ascertainable value, commercial business loans are of higher risk and typically are made on the basis of the borrower's ability to make repayment from the cash flow of the borrower's business. As a result, the availability of funds for the repayment of commercial business loans may be substantially dependent on the success of the business itself. Furthermore, the collateral securing the loans may depreciate over time, may be difficult to appraise and may fluctuate in value based on the success of the business. At December 31, 2010, \$26.3 million of loans in the commercial business loan portfolio were non-performing compared to \$17.8 million at December 31, 2009.

Originations, Purchases and Sales of Loans and Mortgage-Backed and Related Securities

Real estate loans are generally originated by the Company's salaried and commissioned loan officers. Loan applications are taken in all branch and loan production offices.

The Company originates both fixed and adjustable rate loans, however, its ability to originate loans is dependent upon the relative customer demand for loans in its markets. Demand for adjustable rate loans is affected by the interest rate environment and the number of adjustable rate loans remained low in 2010 due to the low long term fixed mortgage rates that existed during the year. The Company originated for its portfolio \$5.5 million of one-to-four family adjustable rate loans during 2010, a decrease of \$5.8 million, from \$11.3 million in 2009. The Company also originated for its portfolio \$7.6 million of fixed rate one-to-four family loans during 2010, a decrease of \$3.5 million, from \$11.1 million for 2009.

During the past several years, the Company has focused its portfolio loan origination efforts on commercial real estate, commercial business and consumer loans because these loans have terms to maturity and adjustable interest rate characteristics that are generally more beneficial to the Company in managing interest rate risk than single family fixed rate conventional loans. The Company originated \$72.5 million of multi-family and commercial real estate, commercial business and consumer loans (which excludes commercial real estate loans in construction or development) during 2010, a decrease of \$20.5 million, from originations of \$93.0 million for 2009. The decrease in originations reflects the reduced demand for credit as a result of the difficult economic environment that existed in 2010.

In order to supplement loan demand in the Company's market area and geographically diversify its loan portfolio, the Company purchases participations in real estate loans from selected sellers, with yields based upon then-current market rates. The Company reviews and underwrites all loans purchased to ensure that they meet the

Table of Contents

Company's underwriting standards and the seller generally continues to service the loans. The Company purchased \$10.2 million of loans during 2010, an increase of \$3.6 million, from \$6.6 million during 2009. Purchases were increased in 2010 as a result of the reduced local commercial loan demand. The purchased commercial real estate and commercial business loans have terms and interest rates that are similar in nature to the Company's originated commercial and business portfolio. Refer to Notes 4 and 5 of the Notes to Consolidated Financial Statements in the Annual Report to Security Holders for the year ended December 31, 2010 for more information on purchased loans (incorporated by reference in Item 8 of Part II of this Form 10-K).

The Company has some mortgage-backed and related securities that are held, based on investment intent, in the available for sale portfolio. The Company did not purchase any mortgage-backed securities in 2010 or 2009. No mortgage-backed securities were purchased in 2010 as debt instruments issued by federal agencies such as Fannie Mae and Freddie Mac became more appealing to purchase due to their shorter duration given the low interest rate environment that existed in 2010. The Company did not sell any mortgage backed securities in 2010 and sold \$98,000 in mortgage backed securities in 2009. See Investment Activities.

Table of Contents

Classified Assets and Delinquencies

Classification of Assets. Federal regulations require that each savings institution evaluate and classify its assets on a regular basis. In addition, in connection with examinations of savings institutions, the Office of Thrift Supervision (OTS) and the Federal Deposit Insurance Corporation (FDIC) examiners may identify problem assets and, if appropriate, require them to be classified with an adverse rating. There are three adverse classifications: substandard, doubtful and loss. Assets classified as substandard have one or more defined weaknesses and are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful have the weaknesses of those classified as substandard, with additional characteristics that make collection in full on the basis of currently existing facts, conditions and values questionable, and there is a high possibility of loss. An asset classified as loss is considered uncollectible and of such little value that continuance as an asset on the balance sheet of the institution is not warranted. Assets classified as substandard or doubtful require the institution to establish prudent specific allowances for loan losses. If an asset, or portion thereof, is classified as loss, the institution must either establish specific allowances for loan losses in the amount of 100% of the portion of the asset classified as loss, or charge off such amount. If an institution does not agree with an OTS or FDIC examiner's classification of an asset, it may appeal the

Table of Contents

determination to the OTS District Director or the appropriate FDIC personnel, depending on the regulator. On the basis of management's review of its assets, at December 31, 2010, the Bank classified a total of \$134.5 million of its loans and other assets as follows:

	One-to-Four	Real Estate Construction or	Commercial and	Consumer	Commercial Business	Other Assets	Total
<i>(Dollars in thousands)</i>	Family	Development	Multi-family	Consumer	Business	Assets	Total
Substandard	\$ 14,209	6,003	38,883	197	17,439	11,301	88,032
Doubtful	1,081	2,397	9,089	51	6,675	3,636	22,929
Loss	333	32	10,435	58	11,260	1,458	23,576
Total	\$ 15,623	8,432	58,407	306	35,374	16,395	134,537

The Bank's classified assets consist of non-performing loans and loans and other assets of concern discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations (incorporated by reference in Item 7 of Part II of this Form 10-K). At December 31, 2010, these asset classifications were materially consistent with those of the OTS and FDIC.

Delinquency Procedures. Generally, the following procedures apply to delinquent one-to-four family real estate loans. When a borrower fails to make a required payment on a loan, the Company attempts to cure the delinquency by contacting the borrower. A late notice is sent on all loans over 16 days delinquent. Additional written and verbal contacts are made with the borrower between 30 and 60 days after the due date. If the loan is contractually delinquent 90 days, the Company sends a 30-day demand letter to the borrower and after the loan is contractually delinquent 120 days, institutes appropriate action to foreclose on the property. If foreclosed, the property is sold at a sheriff's sale and may be purchased by the Company. Delinquent commercial real estate and commercial business loans are generally handled in a similar manner. The Company's procedures for repossession and sale of consumer collateral are subject to various requirements under state consumer protection laws.

Real estate acquired by the Company as a result of foreclosure is typically classified as real estate in judgment for six to twelve months and thereafter as real estate owned until it is sold. When property is acquired by foreclosure or deed in lieu of foreclosure, it is recorded at the lower of cost or estimated fair value, less the estimated cost of disposition as real estate owned. After acquisition, all costs incurred in maintaining the property are expensed. Costs relating to the development and improvement of the property, however, are capitalized to the extent of fair value less disposition cost.

The following table sets forth the Company's loan delinquencies by loan type, amount and percentage of type at December 31, 2010 for loans past due 60 days or more.

	Loans Delinquent For:						Total Delinquent		
	60-89 Days			90 Days and Over			Loans

Loans delinquent for 90 days and over are non-accruing and are included in the Company's non-performing asset total at December 31, 2010.

Table of Contents

Investment Activities

The Company and the Bank utilize the available for sale securities portfolio in virtually all aspects of asset/liability management. In making investment decisions, the Investment-Asset/Liability Committee considers, among other things, the yield and interest rate objectives, the credit risk position, and the Bank's liquidity and projected cash flow requirements.

Securities. Federally chartered savings institutions have the authority to invest in various types of liquid assets, including United States Treasury obligations, securities of various federal agencies, certain certificates of deposit of insured banks and savings institutions, certain bankers' acceptances, repurchase agreements and federal funds. Subject to various restrictions, the holding company of a federally chartered savings institution may also invest its assets in commercial paper, investment grade corporate debt securities and mutual funds whose assets conform to the investments that a federally chartered savings institution is otherwise authorized to make directly.

The investment strategy of the Company and the Bank has been directed toward a mix of high-quality assets (primarily government agency obligations) with short and intermediate terms to maturity. At December 31, 2010, the Company did not own any investment securities of a single issuer that exceeded 10% of the Company's stockholder's equity other than U.S. government agency obligations.

The Bank invests a portion of its liquid assets in interest-earning overnight deposits of the Federal Home Loan Bank of Des Moines (FHLB). Other investments include high grade medium-term (up to four years) federal agency notes, and a variety of other types of mutual funds that invest in adjustable rate mortgage-backed securities, asset-backed securities, repurchase agreements and U.S. Treasury and agency obligations. The Company invests in the same type of investment securities as the Bank and may also invest in taxable and tax exempt municipal obligations and corporate equities such as preferred and common stock. Refer to Note 3 of the Notes to Consolidated Financial Statements in the Annual Report to Security Holders for the year ended December 31, 2010 for additional information regarding the Company's securities portfolio (incorporated by reference in Item 8 of Part II of this Form 10-K).

(1) Yields are computed on a tax equivalent basis.

(2) Callable U.S. government agency securities maturity date based on first available call date if security is anticipated to be called.

Mortgage-Backed and Related Securities. In order to supplement loan production and achieve its asset/liability management goals, the Company invests in mortgage-backed and related securities. All of the mortgage-backed and related securities owned by the Company are issued, insured or guaranteed either directly or indirectly by a U.S. Government Agency. The Company had \$33.5 million of mortgage-backed and related securities classified as available for sale at December 31, 2010, compared to \$53.6 million at December 31, 2009 and \$77.3 million at December 31, 2008. The decrease in mortgage backed securities in 2010 and 2009 is the result of fewer purchases by the Company and normal repayments. In 2008, more mortgage-backed securities were purchased due to the superior yield to comparable agency debt instruments with similar durations available in the market. The collateralized mortgage obligations (CMOs) in the Company's portfolio are issued by U.S. Government agencies and are not supported by subprime mortgages.

The contractual maturities of the mortgage-backed and related securities portfolio without any prepayment assumptions at December 31, 2010 are as follows:

	Dec. 31, 2010				Balance Outstanding
	5 Years or Less	5 to 10 Years	10 to 20 Years	Over 20 Years	
<i>(Dollars in thousands)</i> Securities available for sale:					
Federal Home Loan Mortgage Corporation	\$ 11,844	6,430	0	0	18,274
Federal National Mortgage Association	6,175	7,317	0	0	13,492

Edgar Filing: HMN FINANCIAL INC - Form 10-K

Collateralized Mortgage Obligations	0	396	1,269	75	1,740
Total	\$ 18,019	14,143	1,269	75	33,506

Weighted average yield	6.36%	3.08%	5.50%	4.00%	4.34%
------------------------	-------	-------	-------	-------	-------

At December 31, 2010, the Company did not have any non-agency mortgage-backed or related securities in excess of 10% of its stockholders' equity.

CMOs are securities derived by reallocating the cash flows from mortgage-backed securities or pools of mortgage loans in order to create multiple classes, or tranches, of securities with coupon rates and average lives that differ from the underlying collateral as a whole. The term to maturity of any particular tranche is dependent upon the prepayment speed of the underlying collateral as well as the structure of the particular CMO. Although a significant proportion of the Company's CMOs are in tranches which have been structured (through the use of cash flow priority and support tranches) to give somewhat more predictable cash flows, the cash flow and, therefore, the value of CMOs is subject to change.

At December 31, 2010, the Company had \$1,000 invested in CMOs that have floating interest rates that change either monthly or quarterly, compared to \$5,000 at December 31, 2009 and \$10,000 at December 31, 2008.

Table of Contents

Mortgage-backed and related securities can serve as collateral for borrowings and, through sales and repayments, as a source of liquidity. In addition, mortgage-backed and related securities available for sale can be sold to respond to changes in economic conditions.

Sources of Funds

General. The Bank's primary sources of funds are retail, internet and brokered deposits, payments of loan principal, interest earned on loans and securities, repayments and maturities of securities, borrowings, sales of preferred shares and other funds provided from operations.

Deposits. The Bank offers a variety of deposit accounts to retail and commercial customers having a wide range of interest rates and terms. The Bank's deposits consist of passbook, negotiable order of withdrawal (NOW), money market, non-interest bearing checking and certificate accounts (including individual retirement accounts). The Bank relies primarily on competitive pricing policies and customer service to attract and retain these deposits.

The variety of deposit accounts offered by the Bank has allowed it to be competitive in obtaining funds and to respond with flexibility to changes in consumer demand. As customers have become more interest rate conscious, the Bank has become more susceptible to short-term fluctuations in deposit flows. The Bank manages the pricing of its deposits in keeping with its asset/liability management, profitability and growth objectives. Based on its experience, the Bank believes that its passbook and NOW accounts are relatively stable sources of deposits. However, the ability of the Bank to attract and maintain certificate deposits and money market accounts, and the rates paid on these deposits, has been and will continue to be significantly affected by market conditions. The decrease in deposits in 2010 and 2009 are the direct result of the Bank decreasing the amount of outstanding loans in order to improve capital ratios. Brokered deposits decreased \$103.1 million and \$91.8 million in 2010 and 2009, respectively, as the proceeds from loan payoffs were used to pay off the outstanding brokered deposits that matured during the year. Pursuant to an OTS directive, the Bank cannot renew any existing brokered deposits or accept any new brokered deposits without prior consent of the OTS.

The following table sets forth the savings flows at the Bank during the periods indicated.

<i>(Dollars in thousands)</i>	Year Ended December 31,		
	2010	2009	2008
Opening balance	\$ 796,011	880,505	888,118

⁽¹⁾ Deposits from governmental and other public entities.

For additional information regarding the composition of the Bank's deposits, see Note 10 of the Notes to Consolidated Financial Statements in the Annual Report to Security Holders for the year ended December 31, 2010 (incorporated by reference in Item 8 of Part II of this Form 10-K). For additional information on certificate maturities and the impact on the Company's liquidity see Management's Discussion and Analysis of Financial Condition and Results of Operations -Liquidity and Capital Resources of the Annual Report to Security Holders for the year ended December 31, 2010 (incorporated by reference in Item 7 of Part II of this Form 10-K).

Borrowings. The Bank's other available sources of funds include advances from the FHLB and other borrowings from the Federal Reserve Bank (FRB). As a member of the FHLB of Des Moines, the Bank is required to own capital stock in the FHLB and is authorized to apply for advances. Each FHLB credit program has its own interest rate, which may be fixed or variable, and range of maturities. The FHLB may prescribe the acceptable uses for these advances, as well as limitations on the size of the advances and repayment provisions. Consistent with its asset/liability management strategy, the Bank has utilized FHLB advances from time to time to fund loan demand and extend the term to maturity of its liabilities. The Bank also uses short-term FHLB and FRB borrowings to offset short term cash needs due to deposit outflows or loan fundings. At December 31, 2010, the Bank had \$122.5 million of FHLB advances and no FRB borrowings outstanding. On such date, the Bank had a collateral pledge arrangement with the FHLB pursuant to which the Bank may borrow up to an additional \$31.8 million for liquidity purposes. The Bank also had the ability to draw additional borrowings of \$66.0 million from the FRB based upon the loans that were pledged as collateral at December 31, 2010. Refer to the information on pages 20 and 21 under the caption Liquidity and Capital Resources in the Annual Report to Security Holders for the year ended December 31, 2010 and Note 11 of the Notes to Consolidated Financial Statements in the Annual Report for more information on FHLB advances and FRB borrowings (incorporated by reference in Items 7 and 8 of Part II of this Form 10-K).

Service Corporations of the Bank

As a federally chartered savings bank, the Bank is permitted by OTS regulations to invest up to 2% of its assets in the stock of, or loans to, service corporation subsidiaries, and may invest an additional 1% of its assets in service corporations where these additional funds are used for inner-city or community development purposes. In addition to investments in service corporations, federal institutions are permitted to invest an unlimited amount in operating subsidiaries engaged solely in activities in which a federal savings bank may engage directly.

OIA is the Bank's sole subsidiary. OIA is a Minnesota corporation that was organized in 1983 and operated as an insurance agency until 1986 when its assets were sold. OIA remained inactive until 1993 when it began offering credit life insurance, annuity and mutual fund products to the Bank's customers and others. OIA now offers a variety of financial planning products and services.

Table of Contents

Competition

The Bank faces strong competition both in originating real estate, commercial and consumer loans and in attracting deposits. Competition in originating loans comes primarily from mortgage bankers, commercial banks, credit unions and other savings institutions which have offices in the Bank's market area and those that operate through Internet banking operations throughout the United States. The Bank competes for loans principally on the basis of the interest rates and loan fees it charges, the types of loans it originates and the quality of services it provides to borrowers. Competition for deposits is principally from mutual funds, securities firms, commercial banks, credit unions and other savings institutions located in the same communities and those that operate through Internet banking operations throughout the United States. The ability of the Bank to attract and retain deposits depends on its ability to provide an investment opportunity that satisfies the requirements of investors as to rate of return, liquidity, risk, convenience and other factors. The Bank competes for these deposits by offering a variety of deposit accounts at competitive rates, convenient business hours and a customer oriented staff.

Other Corporations Owned by the Company

HMN has one other wholly owned subsidiary, SFC, which acts as an intermediary for the Bank in completing certain real estate transactions.

Employees

At December 31, 2010, the Company had a total of 225 employees, including part-time employees. None of the employees of the Company or its subsidiaries are represented by any collective bargaining unit. Management considers its employee relations to be good.

Regulation and Supervision

The banking industry is highly regulated. As a savings and loan holding company, the Company is presently subject to regulation by the Office of Thrift Supervision (OTS). The Bank, a federally-chartered savings association, is also subject to extensive regulation and examination by the OTS, which is the Bank's primary federal regulator. The FDIC also has authority to regulate the Bank. Subsidiaries of the Company and the Bank may also be subject to state regulation and/or licensing in connection with certain insurance and investment activities. The Company and the Bank are subject to numerous laws and regulations. These laws and regulations impose restrictions on activities, set minimum capital requirements, impose lending and deposit restrictions and establish other restrictions. References in this section to applicable statutes and regulations are brief and incomplete summaries only. You should consult the statutes and regulations for a full understanding of the details of their operation. Changes in statutes, regulation or regulatory policies applicable to the Bank or the Company, including interpretation or implementation thereof, could have a material effect on the Company's business.

The Dodd-Frank Wall Street Reform and Consumer Protection Act

On July 21, 2010, the President signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act). This new law will significantly change the current regulatory structure for financial institutions and their holding companies and affect the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act (i) restructured the federal bank regulatory structure and abolishes the OTS; (ii) created a new consumer protection agency called the Bureau of Consumer Financial Protection (the BCFP); (iii) provided the U.S. Department of the Treasury, FDIC and the Federal Reserve Board (FRB) orderly liquidation powers to close large financial (including non-bank) institutions; (iv) established a new Financial Stability Oversight Council (FSOC) to identify and respond to emerging risks throughout the financial system; (v) adopted new standards for the mortgage industry; (vi) established new federal regulation of the derivatives market; (vii) restricts proprietary trading by depository

Table of Contents

institutions and their holding companies; (viii) requires large, complex financial companies to prepare plans for their wind up; (ix) established new regulation of the securitization market requiring enhanced disclosure and retention of risk requirements; (x) places strict limits on interchange fees charged by depository institutions to retailers; (xi) established new and enhanced compensation and corporate governance oversight for the financial services industry; (xii) adopted new federal hedge fund regulation; (xiii) established new fiduciary duties and regulation of broker dealers, investment companies and investment advisors; (xiv) requires the federal banking agencies to adopt new and enhanced capital standards for all depository institutions and, for the first time, requires specific capital standards for savings and loan holding companies; (xv) significantly narrows the scope of federal preemption for national banks and federal thrifts; and (xvi) places a moratorium on ownership of industrial loan and credit card banks by non-financial companies. The Dodd-Frank Act requires various federal agencies to adopt a broad range of new implementing rules and regulations, and to prepare numerous studies and reports for Congress. The federal agencies are given significant discretion in drafting the implementing rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act may not be known for many months or years.

Holding Company Regulation

An entity that owns a savings association is a savings and loan holding company (SLHC). If a holding company owns more than one savings association, it is a multiple SLHC; if it owns only one savings association, it is a unitary SLHC. The Company is a unitary SLHC. The Home Owners Loan Act (HOLA) historically limited multiple SLHCs and their non-association subsidiaries to financial activities and services and to activities authorized for bank holding companies, but unitary SLHCs, in the past, were not subject to restrictions on the activities that could be conducted by holding companies or their affiliates.

In November of 1999, the Gramm-Leach-Bliley Act (the GLB Act) was signed into law. The GLB Act made significant changes to laws regulating the financial services industry. Changes included (i) prohibitions on new unitary SLHCs from engaging in non-financial activities or affiliating with non-financial entities; and (ii) modifications to the Federal Home Loan Bank System. Unitary SLHCs, such as the Company, that were in existence or had an application filed with the OTS on or before May 4, 1999, are not subject to the new restrictions on unitary SLHCs. As a result, the GLB Act did not affect the Company's ability to control non-financial firms or engage in non-financial activities. The Dodd-Frank Act provides that the OTS be transferred to other agencies on or about July 21, 2011, and the OTS will be abolished 90 days later. The FRB will supervise and regulate all savings and loan holding companies, including the Company, that were formerly regulated by the OTS. The Dodd-Frank Act also codifies the FRB's so-called "source of strength" doctrine. While the OTS has suggested the SLHCs were to serve as a "source of support", the OTS has not had a formal policy. The source of strength doctrine requires financial institution holding companies, such as the Company, to provide financial assistance to their subsidiary financial institutions in the event of financial distress. The FRB is expected to issue rules on the source of strength doctrine in 2012.

Acquisitions by Savings and Loan Holding Companies. Acquisition of a savings association or a savings and loan holding company is generally subject to OTS approval and the public must have an opportunity to comment on the proposed acquisition. Without prior approval from the OTS, the Company may not acquire, directly or indirectly, control of another savings association.

Examination and Reporting. Under HOLA and OTS regulations, the Company, as a SLHC, must file periodic reports with the OTS. In addition, the Company must comply with OTS record keeping requirements and is subject to holding company examination by the OTS. The OTS may take enforcement action if the activities of a SLHC constitute a serious risk to the financial safety, soundness or stability of a subsidiary savings association. Beginning on July 21, 2011, the FRB will become responsible for examining and regulating the Company and the Company will file periodic reports with the FRB.

Table of Contents

Affiliate Transactions. The Bank, as a holding company subsidiary that is a depository institution, is subject to both qualitative and quantitative limitations on transactions with the Company and the Company's other subsidiaries. See Transactions with Affiliates and Insiders .

Capital Adequacy. The Company has entered into a Supervisory Agreement with the OTS effective February 22, 2011. The Supervisory Agreement requires that the Company (i) submit a capital plan by May 31, 2011 (and thereafter the plan shall be updated on an annual basis commencing January 31, 2012) for approval by the OTS (the Capital Plan), which must include a proposed minimum tangible equity capital ratio commensurate with the Company's consolidated risk profile, projections demonstrating the Company's ability to attain and maintain the minimum tangible equity capital ratio, including detailed scenarios to stress-test such ratio; (ii) not declare, make or pay any cash dividends on any of its stock or make any other capital distributions or purchase or redeem any of its stock without the prior consent of the OTS; (iii) not incur any debt or pay any interest or principal payments thereon, increase any current lines of credit or guarantee the debt of any entity without the prior consent of the OTS; (iv) comply with existing notification requirements pursuant to the applicable rules and regulations of the OTS with respect to changes in directors and certain executive officers; (v) not make any golden parachute payment unless such payment complies with the applicable rules and regulations of the FDIC; and (vi) not enter into any new contractual arrangement or renew or revise any existing contractual arrangement related to compensation or benefits with any director or certain executive officers without the prior consent of the OTS, with any such arrangement to comply with all applicable rules and regulations of the OTS and FDIC. In addition, beginning in July 2015, for the first time SLHCs, including the Company, will be subject to formal capital requirements. As such, the Company will be required to hold capital in the same amount and of the same type that is required for insured depository institutions. The Bank is already subject to various capital requirements. See Capital Requirements .

Bank Regulation

As a federally-chartered savings association, the Bank is subject to regulation and supervision by the OTS. Federal law authorizes the Bank, as a federal savings association, to conduct, subject to various conditions and limitations, business activities that include: accepting deposits and paying interest on them; making and buying loans secured by residential and other real estate; making a limited amount of consumer loans; making a limited amount of commercial loans; investing in corporate obligations, government debt securities, and other securities; and offering various banking, trust, securities and insurance agency services to its customers.

Savings associations are expected to conduct lending activities in a prudent, safe and sound manner. The OTS regulates the safety and soundness of the Bank by enforcing statutory limits on the Bank's lending and investment powers. OTS regulations set aggregate limits on certain types of loans including commercial business, commercial real estate, and consumer loans. OTS regulations also establish limits on loans to a single borrower. As of December 31, 2010, the Bank's lending limit to one borrower was approximately \$13.7 million. A federal savings association generally may not invest in noninvestment-grade debt securities. A federal savings association may establish subsidiaries to conduct any activity the association is authorized to conduct and may establish service corporation subsidiaries for limited preapproved activities.

The Bank entered into a Supervisory Agreement with the OTS effective February 22, 2011. The Supervisory Agreement requires that the Bank (i) submit an updated business plan by May 31, 2011 (and thereafter the plan shall be updated on an annual basis commencing January 31, 2012) for approval by the OTS (the Business Plan), including strategies to ensure that the Bank has the financial and personnel resources necessary to implement the Business Plan and maintain compliance with applicable regulatory capital requirements, plans to improve the Bank's core earnings and achieve profitability, financial projections and strategies to stress-test and adjust earnings forecasts based on results of operations, economic conditions and quality of the Bank's loan portfolio; (ii) submit a detailed plan to reduce the Bank's level of problem assets which must address quarterly targets for the level of problem assets as a percentage of Tier 1 (Core) Capital plus the allowance for loan and lease losses (ALLL) and a description of methods for attaining such targets as well as specific workout plans for certain adversely classified loans (generally those in excess of \$1,000,000); (iii) revise its loan modification policy; (iv) revise its program for identifying, monitoring and controlling risk associated with concentrations of credit; (v) revise its documentation of its policies and procedures relating to the calculation of ALLL; (vi) not

Table of Contents

declare or pay any dividends or make any other capital distributions without at least 30 days prior written notice to, and approval of, the OTS; (vii) not increase its total assets during any quarter in excess of the net interest credited on deposit liabilities during the prior quarter without the consent of the OTS; and (viii) not enter into any significant arrangement or contract with a third party service provider without the prior consent of the OTS. The Supervisory Agreement also provides that the Bank is subject to restrictions on changes in directors and certain executive officers, golden parachute payments and employment and compensatory arrangements as applicable to the Company pursuant to the Company's Supervisory Agreement.

The Dodd-Frank Act provides that the OTS powers will be transferred to other agencies on or about July 21, 2011, and the OTS will be abolished 90 days later. As a result, the OCC will be the Bank's primary safety and soundness regulator. Rulemaking with respect to consumer financial protection functions will be transferred to the BCFP and examination and enforcement of consumer protection and safety and soundness requirements will be with the OCC. At least initially, the OCC will be implementing and enforcing existing OTS regulations, opinions and enforcement actions.

Qualified Thrift Lender Test. Savings associations, including the Bank, must be qualified thrift lenders (QTLs). A savings association generally satisfies the QTL requirement if at least 65% of a specified asset base consists of things such as loans to small businesses and loans to purchase or improve domestic residential real estate. Savings associations may qualify as QTLs in other ways. Savings associations that do not qualify as QTLs are subject to significant restrictions on their operations. If the Bank fails to meet QTL requirements, the Bank and the Company would face certain limitations, including limits on the Company's ability to control non-financial firms. As of December 31, 2010, the Bank met the QTL test.

OTS Assessments. HOLA authorizes the OTS to charge assessments to recover the costs of examining savings associations, holding companies, and their affiliates. The assessment is done semi-annually, and is based on three factors: 1) asset size; 2) condition; and 3) complexity of the institution. The Bank's and the Company's OTS assessments for the year ended December 31, 2010, were approximately \$395,000. While all SHLCs are subject to examination fees from the OTS, the FRB has not assessed fees for its examination function. Accordingly, the Company may see its assessments drop for the oversight of the Company. The National Bank Act authorizes the OCC to fund the expenses of its operations through assessments. It is expected that the OCC will collect semiannual assessments from federally-chartered savings associations.

Transactions with Affiliates and Insiders. Savings associations, like banks, are subject to affiliate and insider transaction restrictions. The restrictions prohibit or limit a savings association from extending credit to, or entering into certain transactions with affiliates, principal stockholders, directors and executive officers of the savings association and its affiliates. The term "affiliate" generally includes a holding company, such as the Company, and any company under common control with the savings association. Federal law limits transactions between the Bank and any one affiliate to 10% of the Bank's capital and surplus and with all affiliates in the aggregate to 20%. In addition, the federal law governing unitary savings and loan holding companies prohibits the Bank from making any loan to any affiliate whose activity is not permitted for a subsidiary of a bank holding company. This law also prohibits the Bank from making any equity investment in any affiliate that is not its subsidiary. The Bank is currently in compliance with these requirements.

Dividend Restrictions. Federal law limits the ability of a depository institution, such as the Bank, to pay dividends or make other capital distributions. The Bank, as a subsidiary of a savings and loan holding company, must file a notice with the OTS before payment of a dividend or approval of a proposed capital distribution by its board of directors and must obtain prior approval from the OTS if it fails to meet certain regulatory conditions. The Bank did not declare or distribute any dividends to the Company in 2010. In addition, the Supervisory Agreement states that the Bank may not declare or pay any dividends or make any other capital distributions without at least 30 days prior written notice to, and approval of, the OTS.

The Bank is the primary source of cash for the Company. At December 31, 2010, the Company had \$2.0 million in cash and other assets that could readily be turned into cash. The Company deferred the payment on the outstanding preferred stock that was due on February 15, 2011 in order to preserve cash for potential future needs. If the Bank does not obtain regulatory approval for any future dividends from the Bank to the Company, the

Table of Contents

Company may be required to find other sources of liquidity for the payment of preferred dividends, expenses and other needs beyond 2011.

Deposit Insurance

The FDIC insures the deposits of the Bank through the Deposit Insurance Fund (DIF). The DIF is funded by assessments of FDIC members such as the Bank. The FDIC applies a risk-based system for setting deposit insurance assessments. Under the risk-based assessment system, an institution's insurance assessments vary according to the level of capital the institution holds and the degree to which it is the subject of supervisory concern.

The Dodd-Frank Act instituted three significant changes that will modify the way DIF is managed by the FDIC and capitalized. Some of the changes will not impact the Bank or the Company as they only apply to insured depository institutions with more than \$10 billion in assets. The changes to DIF are as follows: (i) the FDIC must modify the assessment base on which deposit insurance is determined by assessing based on the average total consolidated assets of an insured depository institution minus the sum of average tangible equity of the insured depository institution during the assessment period, which increases the assessment burden on larger banks (which tend to rely more heavily on non-deposit liabilities than smaller banks); (ii) the DIF reserve ratio floor is raised from 1.15% to 1.35% (complete implementation of the higher reserve ratio is to be fully implemented by September 30, 2020, offsetting for the impact of deposit insurance assessments on institutions with less than \$10 billion in consolidated assets, meaning that assessments on larger institutions will be responsible for the 20 basis point increase); and (iii) a requirement that the FDIC pay dividends to insured depository institutions whenever the DIF exceeds a reserve ratio of 1.35% is repealed. In December 2009, the Bank was required to make a prepayment of \$5.0 million, which represented an estimate of FDIC assessments for the fourth quarter of 2009 and for the years 2010, 2011 and 2012. This amount was set up as a prepaid expense at December 31, 2009 and is being expensed quarterly as the FDIC charges are assessed. The amount of prepaid deposit insurance expense remaining at December 31, 2010 is approximately \$2.7 million. During 2010, the Bank was assessed approximately \$1.8 million for the DIF.

In addition to deposit insurance assessments, the FDIC is authorized to collect assessments against insured deposits to be paid to the Financing Corporation (FICO) to service the FICO debt incurred in the 1980's. The FICO assessment rate is adjusted quarterly. In 2010, the Bank paid a FICO assessment of approximately \$80,000.

Other Deposit Insurance-Related Issues

On October 14, 2008, the FDIC announced a temporary program designed to maintain liquidity in the U.S. banking system. The FDIC referred to the program as the Temporary Liquidity Guarantee Program (TLGP) and it had two parts. Participation in both parts of the TLGP was voluntary, and the Company chose to participate in both parts. The first part of the program called the Transaction Account Guarantee Program (TAGP) provided unlimited FDIC insurance coverage on non-interest bearing transaction accounts through December 31, 2010. The second part of the program called the Debt Guarantee Program (DGP) allowed the Company to issue debt securities fully guaranteed by the FDIC. The DGP and a related guarantee facility expired in 2010. Neither the Company nor the Bank issued debt under the DGP or its related facility.

Both parts of the TLGP are funded through assessments on participating institutions. During 2010, neither the Company nor the Bank paid premiums on the DGP as neither issued any guaranteed debt, but the Bank did pay premiums of approximately \$54,000 relating to its participation in the TAGP.

The Dodd-Frank Act provided for an extension of parts of the TAGP through December of 2012. The Dodd-Frank Act's version of the TAGP includes a more restrictive definition of noninterest-bearing transaction account than was used previously by the FDIC. The revised TAGP covers only those transaction accounts that bear no interest and certain trust accounts that provide for payment of any interest earned to state legal aid programs. Finally, unlike the FDIC's previous TAGP, the Bank cannot opt out of participation.

Table of Contents

The Dodd-Frank Act also repeals the existing prohibition on banks paying interest on business checking accounts. One year from enactment, or July 21, 2011, banks will be able to pay interest on business checking accounts. It is too early to know what, if any, impact this will have on the Bank.

Capital Requirements

The federal bank regulatory agencies, including the OTS, have a risk-based capital framework in place. The regulators use a combination of risk-based guidelines and leverage ratios to evaluate capital adequacy.

The following table sets forth the current regulatory requirement for capital ratios for savings associations as compared with the Bank's capital ratios at December 31, 2010:

	Core or Tier 1 Capital to Adjusted Total Assets	Tangible Capital to Assets	Core or Tier 1 Capital to Risk- Weighted Assets	Total Capital to Risk-Weighted Assets
Regulatory Minimum	3.00% ⁽¹⁾	1.50%	4.00%	8.00%
The Bank's Actual	7.60%	7.60%	9.72%	10.97%

(1) Savings associations are required to maintain a leverage ratio of 4.00% or more to be considered adequately capitalized.

Capital Categories and Prompt Corrective Action

The Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA) created a statutory framework that increased the importance of meeting applicable capital requirements. FDICIA established five capital categories: 1) well-capitalized; 2) adequately capitalized; 3) undercapitalized; 4) significantly undercapitalized; and 5) critically undercapitalized. The activities in which a depository institution may engage and regulatory responsibilities of federal bank regulatory agencies vary depending upon whether an institution is well-capitalized, adequately capitalized or undercapitalized. Undercapitalized institutions are subject to various restrictions such as limitations on dividends and growth. A depository institution's category depends upon where its capital levels are in relation to relevant capital measures, which include a risk-based capital measure and certain other factors. The federal banking agencies (including the OTS and OCC) adopted regulations that implement this statutory framework. Under these regulations, an institution is generally treated as well-capitalized if its ratio of total capital to risk-weighted assets is 10.00% or more, its ratio of core capital to risk-weighted assets is 6.00% or more, its ratio of core capital to adjusted total assets (leverage ratio) is 5.00% or more, and it is not subject to any federal supervisory order or directive to meet a specific capital level. In order to be adequately capitalized, an institution must have a total risk-based capital ratio of not less than 8.00%, a Tier 1 risk-based capital ratio of not less than 4.00%, and a leverage ratio of not less than 4.00%. Any institution that is neither well-capitalized nor adequately capitalized will be considered undercapitalized. At December 31, 2010, the Bank was considered well-capitalized.

The Bank has been informed by the OTS that it intends to impose an Individual Minimum Capital Requirement (IMCR) for the Bank. An IMCR requires a bank to establish and maintain levels of capital greater than those generally required for a bank to be classified as well-capitalized. The Bank has not been informed by the OTS of the timing or capital levels that may be required. The proposed IMCR is not expected to affect the Bank's status as well-capitalized within the meaning of the OTS regulations.

Other Regulations and Examination Authority

The FDIC has adopted regulations to protect the DIF and depositors, including regulations governing the deposit insurance of various forms of accounts. Federal regulation of depository institutions is intended for the protection of depositors, and not for the protection of stockholders or other creditors. In addition, federal law requires that in any liquidation or other resolution of any FDIC-insured depository institution, claims for administrative expenses

Table of Contents

of the receiver and for deposits in U.S. branches (including claims of the FDIC as subrogee of the insured institution) shall have priority over the claims of general unsecured creditors.

The OTS may sanction any OTS-regulated bank that does not operate in accordance with OTS regulations, policies and directives. The FDIC has additional authority to terminate insurance of accounts, after notice and hearing, upon a finding that the insured institution is or has engaged in any unsafe or unsound practice that has not been corrected, is operating in an unsafe or unsound condition, or has violated any applicable law, regulation, rule, or order of or condition imposed by the FDIC.

Federal Home Loan Bank (FHLB) System

The Bank is a member of the FHLB of Des Moines, which is one of the 12 regional Federal Home Loan Banks (FHBs). The primary purpose of the FHBs is to provide funding to their saving association members in support of the home financing credit function of the members. Each FHB serves as a reserve or central bank for its members within its assigned region. FHBs are funded primarily from proceeds derived from the sale of consolidated obligations of the FHLB System. FHBs make loans or advances to members in accordance with policies and procedures established by the board of directors of the FHB. These policies and procedures are subject to the regulation and oversight of the Federal Housing Financing Board. All advances from an FHB are required to be fully secured by sufficient collateral as determined by the FHB. Long-term advances are required to be used for residential home financing and small business and agricultural loans.

As a member, the Bank is required to purchase and maintain stock in the FHLB of Des Moines. As of December 31, 2010, the Bank had \$6.7 million in FHLB stock, which was in compliance with this requirement. The Bank receives dividends on its FHLB stock. In 2010, the dividend rate was 2.0%. Over the past five calendar years, dividends have averaged approximately 3.20%.

Federal Reserve Regulation

Under Federal Reserve Board regulations, the Bank is required to maintain reserves against transaction accounts (primarily interest-bearing and noninterest-bearing checking accounts). Historically, reserves generally have been maintained in cash or in noninterest-bearing accounts, thereby effectively increasing an institution's cost of funds. These regulations generally require that the Bank maintain reserves against net transaction accounts. The reserve levels are subject to adjustment by the Federal Reserve Board. The policy of not paying interest on reserves was changed on October 6, 2008. The Federal Reserve Board will utilize the rate of interest paid on reserves to conduct monetary policy. A savings association, like other depository institutions maintaining reservable accounts, may, under certain conditions, borrow from the Federal Reserve Bank discount window.

Numerous other regulations promulgated by the Federal Reserve Board or the OTS affect the business operations of the Bank. These include regulations relating to privacy, equal credit access, electronic fund transfers, collection of checks, lending and savings disclosures, and availability of funds.

Community Reinvestment Act

The Community Reinvestment Act (CRA) requires financial institutions regulated by the federal financial supervisory agencies to ascertain and help meet the credit needs of their delineated communities, including low-to moderate-income neighborhoods within those communities, while maintaining safe and sound banking practices. The regulatory agency assigns one of four possible ratings to an institution's CRA performance and is required to make public an institution's rating and written evaluation. The four possible ratings of meeting community credit needs are outstanding, satisfactory, needs improvement and substantial noncompliance. Under regulations that apply to all CRA performance evaluations after July 1, 1997, many factors play a role in assessing a financial institution's CRA performance. The institution's regulator must consider its financial capacity and size, legal impediments, local economic conditions and demographics, including the competitive environment in which it operates. The evaluation does not rely on absolute standards, and the institutions are not required to perform specific activities or to provide specific amounts or types of credit. The Bank maintains a CRA statement for

Table of Contents

public viewing, as well as an annual CRA highlights document. These documents describe the Bank's credit programs and services, community outreach activities, public comments and other efforts to meet community credit needs. The Bank's last CRA exam was November 28, 2007 and the Bank received a "satisfactory" rating under the Intermediate Small Savings Association criteria.

Bank Secrecy Act

The Bank Secrecy Act (BSA) requires financial institutions to verify the identity of customers, keep records and file reports that are determined to have a high degree of usefulness in criminal, tax and regulatory matters, and to implement counter-money laundering programs and compliance procedures. The impact on Bank operations from the BSA depends on the types of customers served by the Bank.

Troubled Asset Relief Program Capital Purchase Program

On October 3, 2008, the federal government enacted the Emergency Economic Stabilization Act of 2008 (EESA). EESA was enacted to provide liquidity to the U.S. financial system and lessen the impact of accelerating economic problems. The EESA included broad authority. The centerpiece of the EESA was the Troubled Asset Relief Program (TARP). EESA's broad authority was interpreted to allow the U.S. Treasury to purchase equity interests in both healthy and troubled financial institutions. The equity purchase program is commonly referred to as the Capital Purchase Program (CPP). The Company elected to participate in the CPP and sold preferred stock to the U.S. Treasury in December 2008. As a participant in the CPP, the Company is subject to the regulatory requirements of the EESA, as amended, and the interim final rule published on June 15, 2009, C.F.R. Part 30, TARP Standards for Compensation and Corporate Governance (IFR). Among other things, current executive compensation and corporate governance requirements (i) prohibit any bonus, retention award or incentive compensation to our five most highly compensated employees unless it is in the form of long-term restricted common stock that does not vest in the first two years after it is issued and that cannot be transferred except as permitted under a schedule based on the Company's redemption of the preferred stock; (ii) prohibit payment of severance for any reason to our executive officers and any of the next five most highly compensated employees; (iii) require us to recover from our executive officers and the next 20 most highly compensated employees any bonus, retention award or incentive compensation when based on materially inaccurate earnings, revenues, gains or other criteria, (iv) require us to permit a non-binding stockholder vote on executive pay; (v) required Treasury to conduct a review of bonuses, retention awards and other compensation paid to our executive officers and the next 20 most highly compensated employees to determine whether such payments were inconsistent with the EESA and TARP or were otherwise contrary to the public interest and to seek their recovery if so; (vi) prohibit incentive compensation to executive officers that encourages unnecessary and excessive risks that threaten the value of our Company; (vii) require adoption of an excessive or luxury expenditures policy that sets forth written standards applicable to the Company and its employees regarding excessive expenditures for entertainment events, office and facilities renovations, aviation or other transportation services and other similar items, activities or events; (viii) prohibit tax gross ups to any executive officer or the next 20 most highly compensated employees; and (ix) require our compensation committee to periodically review employee compensation plans in light of the risks posed to the Company and take steps to limit those risks. These restrictions apply to us so long as Treasury holds any of our securities (unless it holds only our warrants). The Company deferred the payment on the outstanding preferred stock that was due on February 15, 2011 in order to preserve cash for potential future needs. Under the terms of the certificate of designations for the preferred stock, dividend payments may be deferred without default, but the dividend is cumulative and, if the Company fails to pay dividends for six quarters, whether or not consecutive, the Treasury will have the right to appoint two representatives to the Company's board of directors.

Table of Contents

EXECUTIVE OFFICERS

Officers are chosen by and serve at the discretion of the Board of Directors of the Company and the Bank. There are no family relationships among any of the directors or officers of the Company and the Bank. The business experience of each executive officer of both the Company and the Bank is set forth below.

Bradley C. Krehbiel, age 52. Mr. Krehbiel has been a director of the Company since November 2009 and he has been President of the Bank since January 2009 and President of the Company since April 2010. Prior to that, he had been the Executive Vice President of the Bank since 2004. Mr. Krehbiel joined the Bank as Vice President of Business Banking in 1998. Prior to his employment at the Bank, Mr. Krehbiel held several positions in the financial services industry, including six years as a private banking consultant.

Jon J. Eberle, age 45. Mr. Eberle is Chief Financial Officer, Senior Vice President and Treasurer of the Company and the Bank. Mr. Eberle has held such positions since 2003. Prior to that he served as a Vice President since 2000 and as the Controller since 1998. From 1994 to 1998, he served as the Director of Internal Audit for the Company and the Bank. Prior to his employment at the Bank, Mr. Eberle worked for six years as a certified public accountant with a national accounting firm.

Lawrence D. McGraw, age 47. Mr. McGraw is the Chief Credit Officer and Senior Vice President of the Bank. Mr. McGraw has held such positions since February 2010. Prior to his employment at the Bank, Mr. McGraw served as Regional President and Chief Banking Officer of United Prairie Bank from January 2005 until February 2010. He also served as the President and Chief Executive Officer of their Owatonna location from January 2001 to January 2005. Prior to his tenure with United Prairie Bank, Mr. McGraw held various positions with Farmers and Merchants Savings Bank, Waukon State Bank and the FDIC.

Dwain C. Jorgensen, age 62. Mr. Jorgensen has served as Senior Vice President of Technology, Facilities and Compliance of the Company and Bank since 2007. From 1998 to 2007, he served as Senior Vice President of Operations of the Company and the Bank. From 1989 to 1998, he served as Vice President, Controller and Chief Accounting Officer of the Company and the Bank. From 1983 to 1989, Mr. Jorgensen was an Assistant Vice President and Operations Officer for the Bank.

Susan K. Kolling, age 59. Ms. Kolling has been a director of the Company since 2001. Ms. Kolling served as a Vice President of the Bank from 1992 to 1994 and has served as a Senior Vice President of the Bank and the Company since 1995. In addition, from 1997 to 2003, Ms. Kolling was an owner of Kolling Family Corp. which does business as Valley Home Improvement, a retail lumber yard. Ms. Kolling became a director of Kolling Family Corp. in 2004.

Available Information

The Company's website is www.hmnf.com. The Company makes available, free of charge, through its website its annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) of the Securities Exchange Act of 1934, as soon as reasonably practicable after it electronically files these materials with, or furnishes them to, the Securities and Exchange Commission (the SEC). Information contained on the Company's website is expressly not incorporated by reference into this Form 10-K.

ITEM 1A. RISK FACTORS

Like all financial companies, the Company's business and results of operations are subject to a number of risks, many of which are outside of the Company's control. In addition to the other information in this report, readers

Table of Contents

should carefully consider that the following important factors, among others, could materially impact the Company's business and future results of operations.

Our allowance for loan losses may prove to be insufficient to absorb losses or adequately reflect at any given time the inherent risk of loss in our loan portfolio.

Our non-performing assets remained at an elevated level in 2010 at \$84.5 million, or 9.59% of loans receivable at December 31, 2010 and \$77.4 million, or 7.47% of total assets at December 31, 2009. The elevated level of non-performing loans was primarily due to the weakened economy and the continued difficulties in the real estate markets we primarily serve. If the economy and/or the real estate markets continue to remain weak, these assets may not perform according to their terms and the value of the collateral may be insufficient to pay any remaining loan balance. If this occurs, we may experience losses or an increased risk of loss in our loan portfolio, which could have a negative effect on our results of operations. Like all financial institutions, we maintain an allowance for loan losses to provide for loans in our portfolio that may not be repaid in their entirety. We believe that our allowance for loan losses is maintained at a level adequate to absorb probable losses inherent in our loan portfolio as of the corresponding balance sheet date. However, our allowance for loan losses may not be sufficient to cover actual loan losses or the inherent risk of loss in our loan portfolio, and future provision for loan losses could materially adversely affect our operating results.

In evaluating the adequacy of our allowance for loan losses, we consider numerous quantitative factors, including our historical charge-off experience, growth of our loan portfolio, changes in the composition of loan portfolio and the volume of delinquent and classified loans. In addition, we use information about specific borrower situations, including their financial position and estimated collateral values, to estimate the risk and amount of loss for those borrowers. We also consider many qualitative factors, including general and economic business conditions, duration of the current business cycle, current general market collateral valuations, specific valuation reserves already established, trends apparent in any of the factors we take into account and other matters, which are, by nature, more subjective and fluid. Our estimates of the risk of loss and amount of loss on any loan are complicated by the significant uncertainties surrounding our borrowers' abilities to successfully execute their business models through changing economic environments, competitive challenges and other factors. Because of the degree of uncertainty and susceptibility of these factors to change, our actual losses and estimates of risk of loss inherent in our loan portfolio may vary from our current estimates. Such variances may materially and adversely affect our financial condition and results of operations.

Federal regulators, as an integral part of their examination process, periodically review our allowance for loan losses and may require us to increase our allowance for loan losses by recognizing additional provisions for loan losses charged to expense, or to decrease our allowance for loan losses by recognizing loan charge-offs. Any such additional provisions for loan losses or charge-offs, as required by these regulatory agencies, could have a material adverse effect on our financial condition and results of operations.

The Company has concentrations in commercial business and commercial real estate loans, increasing the risk in its loan portfolio.

In order to enhance the yield and shorten the term-to-maturity of its loan portfolio, the Company expanded its commercial business and commercial real estate lending during the past 10 years. Much of the increase in the Company's commercial real estate portfolio over this period was in land development loans, while many of the Company's commercial business loans were made to borrowers associated with the real estate industry. Commercial business and commercial real estate loans generally, and land development loans in particular, present a higher level of risk than loans secured by one-to-four family residences. This greater risk is due to several factors, including the concentration of principal in a limited number of loans and borrowers, the effects of general economic conditions on income producing properties and the increased difficulty of evaluating and monitoring these types of loans.

Furthermore, the repayment of loans secured by commercial real estate is typically dependent upon the successful operation of the related real estate project. If the cash flow from the project is reduced (for example, if leases are not obtained or renewed or properties intended for resale are not developed and sold), the borrower's ability to repay the loan and the underlying collateral may be impaired.

Table of Contents

Commercial business loans to businesses that are dependant on the cash flow generated by the sale or leasing of real estate are similarly impacted. The Company's commercial business and commercial real estate loan portfolios have experienced difficulties in recent years, which has adversely affected the Company's results of operations and financial condition. At December 31, 2010, the Company classified \$68.1 million of loans as non-performing, of which \$63.0 million related to commercial business and commercial real estate loans. The level of non-performing loans increased our loan loss provision and had a negative impact on our earnings. The Company may experience actual losses in respect of these non-performing loans and further increases in the level of non-performing loans in our loan portfolio that may require further increases in our provision for loan losses.

Declines in home values have decreased our loan originations and increased delinquencies and defaults, including in our commercial business and commercial real estate loans.

Declines in home values in our markets have adversely impacted and may continue to impact our results from operations. Like all financial institutions, the Company is subject to the effects of any economic downturn, and in particular, the significant decline in home values. More stringent lending standards implemented by the mortgage industry has made it more difficult for borrowers with marginal credit to qualify for a mortgage. This, along with overall weakness in the economy, has reduced the demand for single family homes and their corresponding value and has resulted in a decrease in new home equity loan originations and increased delinquencies and defaults in both the consumer home equity loan and residential real estate loan portfolios. The decline in the value of single family homes has also significantly impacted the delinquencies and defaults of our commercial real estate loans due to the decrease in estimated value of the underlying collateral and the inability of such commercial borrowers to generate cash flows from the related real estate development, which is often contingent upon the sale of such property. In the current environment, sales of these properties has been, and is anticipated to continue to be difficult. Commercial business loans to businesses that are dependant on the cash flow generated by the sale or renting of residential real estate are similarly impacted.

Regional economic changes in the Company's markets have adversely impacted, and may continue to adversely impact, results from operations.

Like all financial institutions, the Company is subject to the effects of any economic downturn, and in particular a significant decline in home values and reduced commercial development in the Company's markets has had a negative effect on results of operations. The Company's success depends primarily on the general economic conditions in the counties in which the Company conducts business, and in the southern Minnesota and northern Iowa areas in general. Unlike larger financial institutions that are more geographically diversified, the Company provides banking and financial services to customers primarily in the southern Minnesota counties of Fillmore, Freeborn, Houston, Mower, Olmsted and Winona and portions of Steele, Dodge, Goodhue and Wabasha counties, as well as Marshall and Tama counties in Iowa. The local economic conditions in these market areas have a significant impact on the Company's ability to originate loans, the ability of the borrowers to repay these loans and the value of the collateral securing these loans. A significant decline in the general economic conditions caused by inflation, recession, unemployment or other factors beyond the Company's control can affect and has affected these local economic conditions and adversely affected the Company's financial condition and results of operations. The Company has a significant amount of commercial business and commercial real estate loans and decreases in tenant occupancy and development home sales have had a negative effect on the ability of many of the Company's borrowers to make timely repayments of their loans and the value of the collateral held as security for these loans, which has adversely impacted the Company's earnings.

Because of the limited size of the Company, losses on a few large loans or lending relationships can cause significant volatility in earnings.

Due to the Company's limited size, individual loan amounts can be large relative to the Company's earnings for a particular period. If one or a few relatively large loans become non-performing in a period and the Company is required to increase its loss reserves, or to write off principal or interest relative to such loans, the operating results for that period could be significantly adversely affected. The effect on results of operations for any given period from a change in the performance of a small number of loans may be disproportionately larger than the

Table of Contents

impact of such loans on the quality of the Company's overall loan portfolio. In 2009, our internal loan limits were lowered to \$4.5 million per borrower. However, existing borrowers with relationships over that limit were grandfathered in and it will take time to reduce the size of all existing relationships below the new limit. The Bank's largest borrowing relationship had outstanding loans totaling \$24.4 million at December 31, 2010.

The Company may not be able to meet its cash flow needs on a timely basis at a reasonable cost, and its cost of funds for banking operations may significantly increase as a result of general economic conditions, interest rates and competitive pressures.

Liquidity is the ability to meet cash flow needs on a timely basis and at a reasonable cost. The liquidity of the Bank is used to make loans and to repay deposit and borrowing liabilities as they become due, or are demanded by customers and creditors. Many factors affect the Bank's ability to meet liquidity needs, including variations in the markets served by its network of offices, its mix of assets and liabilities, reputation and standing in the marketplace and general economic conditions.

The Bank's primary source of funding is retail deposits, gathered through its network of fourteen banking offices. Wholesale funding sources principally consist of borrowing lines from the FHLB of Des Moines and the Federal Reserve Bank and brokered and internet certificates of deposit obtained from the national market. Pursuant to an OTS directive, the Bank may not renew existing brokered deposits or accept new brokered deposits without the consent of the OTS. Borrowings from the FHLB are subject to the FHLB's credit policies and procedures relating to the valuation of the loans securing advances as well as the amount of funds the FHLB will loan to the Bank. The current collateral pledged to secure advances may no longer be acceptable, the formulas for determining the excess pledged collateral may change or the Bank's credit rating with the FHLB could decrease. In these cases, the Bank may not have sufficient collateral to pledge or borrowing capacity to meet its funding needs and may be required to rely upon alternate funding sources, such as the Federal Reserve Bank, which bear higher borrowing costs. The Bank's securities and loan portfolios also provide a source of contingent liquidity that could be accessed in a reasonable time period through sales.

Significant changes in general economic conditions, market interest rates, competitive pressures or otherwise, could cause the Bank's deposits to decrease relative to overall banking operations, and it would have to rely more heavily on borrowings in the future, which are typically more expensive than deposits.

The Bank actively manages its liquidity position and monitors it using cash flow forecasts. Changes in economic conditions, including consumer savings habits and availability or access to borrowed funds and the brokered deposit market, subject to OTS approval, and the internet deposit market could potentially have a significant impact on the Company's liquidity position, which in turn could materially impact its financial condition, results of operations and cash flows.

The Company's primary source of cash is dividends from the Bank and, pursuant to the Bank's Supervisory Agreement, the Bank is restricted from paying dividends to the Company without obtaining prior consent of the OTS. At December 31, 2010, the Company had \$2.0 million in cash and other assets that could readily be turned into cash. Primarily, the Company requires cash for the payment of expenses and dividends on the Company's series A preferred stock. On February 15, 2011, the Company suspended payment of dividends on its series A preferred stock in order to preserve cash and liquidity at the Company, which is expected to continue through 2011. Failure to obtain OTS approval for any future dividends from the Bank to the Company could cause the Company to require other sources of liquidity for the payment of deferred preferred dividends, expenses and other needs beyond 2011. Further information about the Company's liquidity position is available on page 20 in the "Liquidity and Capital Resources" section of the Annual Report to Security Holders for the year ended December 31, 2010.

Table of Contents

We may be required to raise additional capital in the future, but that capital may not be available when it is needed.

We are required by federal regulatory authorities to maintain adequate levels of capital to support our operations. Based on operating performance, regulatory requirements or other capital demands, we may at some point need to raise additional capital. Under the Company's Supervisory Agreement, the Company must submit a capital plan by May 31, 2011 for approval by the OTS. The capital plan must include a proposed minimum tangible equity capital ratio commensurate with the Company's consolidated risk profile and projections demonstrating the Company's ability to attain and maintain such ratio. The Bank has been informed by the OTS that it intends to impose an individual minimum capital requirement (IMCR). An IMCR typically requires a bank to establish and maintain levels of capital greater than those generally required for a bank to be classified as well-capitalized. The Bank has not been informed by the OTS of the timing or capital levels that may be required. We are in the process of formulating the required capital plan for submission to the OTS. We cannot predict at this time what steps may be necessary in order to address our consolidated and Bank capital requirements. To date, we have reduced the asset size of the Bank in order to enhance its capital position.

If we find it necessary to raise capital through the issuance of additional shares of our common stock or other equity securities, it would dilute the ownership interests of existing stockholders and may dilute the per share book value of our common stock. New investors may also have rights, preferences and privileges senior to our current stockholders which may adversely impact our current stockholders.

Our ability to raise additional capital, if needed, will depend on conditions in the capital markets at that time, which are outside of our control, and on our financial performance. Accordingly, we may not be able to raise additional capital, if needed, on favorable economic terms, or other terms acceptable to us. We may also find it necessary to consider and evaluate other alternatives to meet applicable capital requirements, including sales of assets or other forms of recapitalization. If we cannot raise additional capital when needed or otherwise satisfactorily address our capital needs as they arise, our ability to maintain or expand our operations, our ability to meet any Company capital plan or Bank IMCR, operate without additional regulatory or other restrictions, and our operating results, could be materially adversely affected.

The Company and the Bank are subject to the restrictions and conditions of the Supervisory Agreements with the Office of Thrift Supervision (OTS). Failure to comply with the Supervisory Agreements could result in enforcement actions against us, including the imposition of monetary penalties.

The Company and the Bank each entered into Supervisory Agreements with the OTS effective February 22, 2011. The Supervisory Agreements supersede the memoranda of understanding between the Company and the Bank and the OTS dated December 9, 2009. In accordance with the Company's Supervisory Agreement, we must submit a two year capital plan by May 31, 2011 to the OTS upon which the OTS may make comments, and to which the OTS may require revisions. We must operate within the parameters of the final capital plan and are required to monitor and submit periodic reports on our compliance with the plan. Also under the Company's Supervisory Agreement, without the consent of the OTS, we may not incur or issue any debt, guarantee the debt of any entity, declare or pay any cash dividends or repurchase any of our capital stock, enter into any new contractual arrangement or renew or extend any existing arrangement relating to compensation or benefits with any director or executive officer, or make any golden parachute payments.

The Bank's Supervisory Agreement with the OTS primarily relates to the Bank's financial performance and credit quality issues. In accordance with the Bank's Supervisory Agreement, the Bank must submit a two year business plan and the OTS may make comments upon, and require revisions to, such plan. The Bank must operate within the parameters of the final business plan and is required to monitor and submit periodic reports on its compliance with the plan. The Bank must also submit a problem asset reduction plan that the OTS may make comments upon, and require revisions to. The Bank must operate within the parameters of the final problem asset plan and is required to monitor and submit periodic reports on its compliance with the plan. The Bank must also revise its loan modification policies and their programs for identifying, monitoring and controlling risk associated with concentrations of credit and improve its documentation of the allowance for loan and lease losses. In addition,

Table of Contents

without the consent of the OTS, the Bank may not declare or pay any cash dividends, materially increase the total assets of the Bank, enter into any new contractual arrangement or renew or extend any existing arrangement related to compensation or benefits with any directors or officer, make any golden parachute payments, or enter into any significant contracts with a third party service provider.

If the Company or the Bank fails to comply with the terms of their respective agreements, the OTS could take enforcement action against us, including the imposition of monetary penalties or the issuance of a cease and desist order requiring corrective action.

In addition, the OTS has indicated that it intends to impose individual minimum capital requirements (IMCR) on the Bank. An IMCR typically requires a bank to establish and maintain levels of capital greater than those generally required for a bank to be classified as well-capitalized. The Bank has not been informed by the OTS of the timing or capital levels that may be required. The proposed IMCR is not expected to affect the Bank's status as well-capitalized within the meaning of OTS regulations.

Federal banking supervision and new or revised tax, accounting and other laws, regulations, rules and standards could significantly impact strategic initiatives, results of operations and financial condition.

The financial services industry is highly regulated and laws and regulations may sometimes impose significant limitations on operations. These limitations, and sources of potential liability for the violation of such laws and regulations, are described in Item 1 of Part I of this report under the heading Business Regulation and Supervision. These regulations, along with the currently existing tax and accounting laws, regulations, rules and standards, control the methods by which financial institutions conduct business; implement strategic initiatives, as well as past, present, and contemplated tax planning; and govern financial disclosures. These laws, regulations, rules, and standards are constantly evolving and may change significantly over time. The nature, extent, and timing of the adoption of significant new laws, changes in existing laws, or repeal of existing laws may have a material impact on the Company's results of operations and financial condition, the effects of which are impossible to predict at this time. In recent years, the Bank has reduced its asset size, primarily in the commercial loan area, in order to enhance its capital position and ratios. Further, pursuant to the Bank's Supervisory Agreement, the Bank is prohibited from increasing its total assets during any quarter in excess of an amount equal to net interest credited on deposit liabilities during the previous quarter without the prior consent of the OTS. This limitation on the Bank's growth may have a significant impact on the Company's and the Bank's strategic initiatives, results of operations and financial condition.

On July 21, 2010, the President signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act). This new law will significantly change the current bank regulatory structure and affect the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act requires various federal agencies to adopt a broad range of new implementing rules and regulations, and to prepare numerous studies and reports for Congress. The federal agencies are given significant discretion in drafting the implementing rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act may not be known for many months or years.

Certain provisions of the Dodd-Frank Act are expected to have a near term impact on the Company. For example, the new law provides that the OTS, which currently is the primary federal regulator for the Company and the Bank, will cease to exist one year from the date of the new law's enactment. The Office of the Comptroller of the Currency, which is currently the primary federal regulator for national banks, will become the primary federal regulator for federal thrifts. The Board of Governors of the Federal Reserve System will supervise and regulate all savings and loan holding companies that were formerly regulated by the Office of Thrift Supervision, including the Company. Also effective one year after the date of enactment is a provision of the Dodd-Frank Act that eliminates the federal prohibitions on paying interest on demand deposits, thus allowing businesses to have interest bearing checking accounts. Depending on competitive responses, this significant change to existing law could have an adverse impact on the Company's interest expense. It is difficult to predict at this time what specific impact the

Table of Contents

Dodd-Frank Act and the yet to be written implementing rules and regulations will have on community banks. However, it is expected that at a minimum they will increase our operating and compliance costs and could increase our interest expense.

Our participation in the Capital Purchase Program (CPP) under the Troubled Asset Relief Program (TARP) imposes restrictions on us affecting our capital stock and our compensation practices that may be adverse, and greater restriction is possible in the future.

As a participant in the U.S. Treasury's CPP program, we issued \$26 million of series A preferred stock to the Treasury in December 2008. Among other limitations, we are subject to certain restrictions relating to distributions on or repurchase of our common stock. Prior to the earlier of December 23, 2011, or the date on which all of the series A preferred stock has been redeemed or Treasury has transferred all of the shares of series A preferred stock to third parties that are not affiliates of Treasury, we may not, without the consent of Treasury, declare or pay a dividend or make any distribution on our common stock, other than regular quarterly cash dividends of not more than \$0.25 per share, the amount of the last quarterly cash dividend per share declared on our common stock prior to October 14, 2008, as adjusted for any stock split, stock dividend, reverse stock split, reclassification or similar transaction; dividends payable solely in shares of our common stock; and dividends or distributions in connection with a stockholders' rights plan or rights of a class or series of our stock that expressly provides that it ranks junior to the series A preferred stock as to dividends and liquidation. So long as any shares of our series A preferred stock remain outstanding, unless all accrued and unpaid dividends for all prior dividend periods have been paid or are contemporaneously declared and paid in full on our series A preferred stock, we may not pay or declare any dividend on our common stock or other junior stock, other than a dividend payable solely in common stock. In addition, prior to the earlier of December 23, 2011, or the date on which all of the series A preferred stock has been redeemed or Treasury has transferred all of the shares of series A preferred stock to third parties that are not affiliates of Treasury, we may not, without the consent of Treasury, redeem, purchase or acquire any shares of our common stock or other capital stock or other equity securities, or any trust preferred securities that we issued, other than for limited exceptions. These restrictions limit our ability to manage our capital resources generally and, specifically, to return capital to our common stockholders, and may adversely affect the value of an investment in our common stock. In February 2011, the Company suspended payment of regular quarterly cash dividends on its series A preferred stock following discussions with the OTS in order to preserve cash for potential future needs. Further, pursuant to the Company's Supervisory Agreement, the Company may not declare or pay any cash dividends, including those on the series A preferred stock, without the consent of the OTS. The Company intends to re-evaluate the deferral of these dividend payments periodically in consultation with the OTS, taking into account the Company's financial condition, applicable legal restrictions and other relevant factors. Under the terms of the series A preferred stock, the Company is required to pay dividends on a quarterly basis at a rate of 5% for the first five years, after which the dividend rate automatically increases to 9%. Dividend payments on the series A preferred stock may be deferred without default, but the dividend is cumulative and, if the Company fails to pay dividends for six quarters, whether or not consecutive, the Treasury will have the right to appoint two representatives to the Company's board of directors.

As a CPP participant, we are also subject to various executive compensation and corporate governance restrictions that limit our flexibility in determining appropriate compensation for our senior executive officers and other more highly compensated employees and may adversely affect the attraction and retention of management and other key employees. Among other things, the current restrictions (i) prohibit any bonus, retention award or incentive compensation to our five most highly compensated employees unless it is in the form of long-term restricted common stock that does not vest in the first two years after it is issued and that cannot be transferred except as permitted under a schedule that is based on our redemption of the preferred stock, (ii) prohibit payment of severance for any reason to our executive officers and any of the next five most highly compensated employees, (iii) require us to recover from our executive officers and the next 20 most highly compensated employees any bonus, retention award or incentive compensation when based on materially inaccurate earnings, revenues, gains or other criteria, (iv) require us to permit a non-binding stockholder vote on executive pay, (v) required Treasury to conduct a review of bonuses, retention awards and other compensation paid to our executive officers and the next 20 most highly compensated employees to determine whether such payments were

Table of Contents

inconsistent with the amended law or TARP or were otherwise contrary to the public interest and to seek their recovery if not, (vi) prohibit incentive compensation to executive officers that encourage unnecessary and excessive risks that threaten the value of our company, and require our compensation committee to periodically review employee compensation plans in light of the risks posed to the Company and take steps to limit those risks. These restrictions apply to us so long as Treasury holds any of our securities (unless it holds only our warrants). Treasury is required to adopt regulations requiring each recipient of CPP funds to meet appropriate standards for executive compensation and corporate governance, including those listed above. The Supervisory Agreements entered into by the Company and the Bank also impose limitations on entry into, or amendment of, certain compensatory and employment arrangements with directors and executive officers. Please see Item 1 Business Regulation and Supervision Bank Regulation of this Form 10-K for additional information.

The securities purchase agreement with Treasury permits Treasury unilaterally to modify the agreement to the extent required to comply with any changes after its execution in applicable federal statutes. Whether by means of the foregoing, the exercise of general oversight powers or otherwise, additional, more restrictive legislative or regulatory changes are possible in the future with which we would be obligated to comply and which may affect adversely our operations, the ownership of our capital stock, our financial condition and results of operations, our management and other aspects of our business.

Changes in interest rates could negatively impact the Company's results of operations.

The earnings of the Company are primarily dependent on net interest income, which is the difference between interest earned on loans and investments and interest paid on interest-bearing liabilities such as deposits and borrowings. Interest rates are highly sensitive to many factors, including government monetary and fiscal policies and domestic and international economic and political conditions. Conditions such as inflation, recession, unemployment, money supply, government borrowing and other factors beyond management's control may also affect interest rates. If the Company's interest-earning assets mature, reprice or prepay more quickly than interest-bearing liabilities in a given period, a decrease in market interest rates could adversely affect net interest income. Likewise, if interest-bearing liabilities mature or reprice, or, in the case of deposits, are withdrawn by the account holder, more quickly than interest-earning assets in a given period, an increase in market interest rates could adversely affect net interest income. Given the Company's mix of assets and liabilities as of December 31, 2010, a falling interest rate environment would negatively impact the Company's results of operations. The effect on our deposits of decreases in interest rates generally lags the effect on our assets. The lagging effect of deposit rate changes is primarily due to the Bank's deposits that are in the form of certificates of deposit, which do not reprice immediately when the federal funds rate changes.

Fixed rate loans increase the Company's exposure to interest rate risk in a rising rate environment because interest-bearing liabilities would be subject to repricing before assets become subject to repricing. Adjustable rate loans decrease the risks to a lender associated with changes in interest rates but involve other risks. As interest rates rise, the payment by the borrower rises to the extent permitted by the terms of the loan, and the increased payment increases the potential for default. At the same time, for secured loans, the marketability of the underlying collateral may be adversely affected by higher interest rates. In a declining interest rate environment, there is likely to be an increase in prepayment activity on loans as the borrowers refinance their loans at lower interest rates. Under these circumstances, the Company's results of operations could be negatively impacted.

Changes in interest rates also can affect the value of loans, investments and other interest-rate sensitive assets including mortgage servicing rights, and the Company's ability to realize gains on the sale or resolution of assets. This type of income can vary significantly from quarter-to-quarter and year-to-year based on a number of different factors, including the interest rate environment. An increase in interest rates that adversely affects the ability of borrowers to pay the principal or interest on loans may lead to an increase in non-performing assets and increased loan loss reserve requirements that could have a material adverse effect on the Company's results of operations.

Table of Contents

Changes in interest rates or prepayment speeds could negatively impact the value of capitalized mortgage servicing rights.

The capitalization, amortization and impairment of mortgage servicing rights are subject to significant estimates. These estimates are based upon loan types, note rates and prepayment speed assumptions. Changes in interest rates or prepayment speeds may have a material effect on the net carrying value of mortgage servicing rights. In a declining interest rate environment, prepayment speed assumptions will increase and result in an acceleration in the amortization of the mortgage servicing rights as the assumed underlying portfolio declines and also may result in impairment as the value of the mortgage servicing rights declines.

The extended disruption of vital infrastructure could negatively impact the Company's results of operations and financial condition.

The Company's operations depend upon, among other things, its technological and physical infrastructure, including its equipment and facilities. Extended disruption of its vital infrastructure by fire, power loss, natural disaster, telecommunications failure, computer hacking and viruses, terrorist activity or the domestic and foreign response to such activity, or other events outside of the Company's control, could have a material adverse impact either on the financial services industry as a whole, or on the Company's business, results of operations, and financial condition.

Strong competition within the Company's market area may limit profitability.

The Company faces significant competition both in attracting deposits and in the origination of loans, as described under the heading Business Competition. Mortgage bankers, commercial banks, credit unions and other savings institutions, which have offices in the Bank's market area have historically provided most of the Company's competition for deposits and loans; however, the Company also competes with financial institutions that operate through Internet banking operations throughout the United States. In addition, and particularly in times of high interest rates, the Company faces additional and significant competition for funds from money market and mutual funds, securities firms, commercial banks, credit unions and other savings institutions located in the same communities and those that operate through Internet banking operations throughout the United States. Many competitors have substantially greater financial and other resources than the Company. Moreover, the Company may face increased competition in the origination of loans if competing thrift institutions convert to stock form, because such converting thrifts would likely seek to invest their new capital into loans. Finally, credit unions do not pay federal or state income taxes and are subject to fewer regulatory constraints than savings banks and as a result, they may enjoy a competitive advantage over the Company. The Bank competes for loans principally on the basis of the interest rates and loan fees it charges, the types of loans it originates and the quality of services it provides to borrowers. This competitive strategy places significant competitive pressure on the prices of loans and deposits.

Our reputation and its attributes are key assets of our business. Our recent operating performance, elevated level of non-performing assets and enhanced regulatory scrutiny and associated adverse publicity could adversely affect the perception of our customers and prospective customers in our markets, our employees, investors and other stakeholders.

Loss of large checking and money market deposit customers could increase cost of funds and have a negative effect on results of operations.

The Company has a number of large deposit customers that maintain balances in checking and money market accounts at the Bank. At December 31, 2010 there were \$66 million in checking and money market accounts of customers that have relationship balances greater than \$5 million. The ability to attract and retain these types of deposits has a positive effect on the Company's net interest margin as they provide a relatively low cost of funds to the Company compared to certificates of deposits or advances. If these depositors were to withdraw these funds and the Bank was not able to replace them with similar types of deposits, the Bank's cost of funds would increase and the Company's results of operation would be negatively impacted.

We are subject to the Community Reinvestment Act and fair lending laws, and failure to comply with these laws could lead to material penalties.

Table of Contents

The Community Reinvestment Act (CRA) and fair lending laws and regulations impose nondiscriminatory lending requirements on financial institutions. The Department of Justice and other federal agencies are responsible for enforcing these laws and regulations. A successful challenge to an institution's performance under the CRA or fair lending laws and regulations could result in a wide variety of sanctions, including the required payment of damages and civil money penalties, injunctive relief, imposition of restrictions on mergers and acquisitions activity, and restrictions on expansion activity. Private parties may also have the ability to challenge an institution's performance under fair lending laws in private class action litigation.

The USA Patriot Act and Bank Secrecy Act may subject us to large fines for non-compliance.

The USA Patriot and Bank Secrecy Acts require financial institutions to develop programs to prevent financial institutions from being used for money laundering and terrorist activities. If these activities are detected, financial institutions are obligated to file suspicious activity reports with the U.S. Treasury Department's Office of Financial Crimes Enforcement Network. These rules require financial institutions to establish procedures for identifying and verifying the identity of customers seeking to open new financial accounts. Failure to comply with these regulations could result in fines or sanctions. In recent years, several banking institutions have received large fines for non-compliance with these laws and regulations. Although the Company has developed policies and procedures designed to ensure compliance, regulators may take enforcement action against the Company in the event of noncompliance.

We operate in a highly regulated environment and may be adversely affected by changes in federal and state laws and regulations, including changes that may restrict our ability to foreclose on single-family home loans and offer overdraft protection.

The Company and the Bank are subject to extensive examination, supervision and comprehensive regulation by federal bank regulatory agencies. Banking regulations are primarily intended to protect depositors' funds, federal deposit insurance funds, and the banking system as a whole, and not holders of our common stock. These regulations affect our lending practices, capital structure, investment practices, dividend policy, and growth, among other things. Congress and federal regulatory agencies continually review banking laws, regulations, and policies for possible changes. Changes to statutes, regulations, or regulatory policies, including changes in interpretation or implementation of statutes, regulations, or policies, could affect us in substantial and unpredictable ways. Such changes could subject us to additional costs, limit the types of financial services and products we may offer, restrict mergers and acquisitions, investments, access to capital, the location of banking offices, or increase the ability of non-banks to offer competing financial services and products, among other things. Failure to comply with laws, regulations or policies could result in sanctions by regulatory agencies, civil money penalties and/or reputational damage, which could have a material adverse effect on our business, financial condition and results of operations. While we have policies and procedures designed to prevent any such violations, there can be no assurance that such violations will not occur.

Congress and state legislatures continue to debate new laws related to mortgage lending and loan foreclosure. Bills placing limits on foreclosure sales or otherwise modifying foreclosure procedures to the benefit of borrowers and the detriment of lenders may be enacted by either Congress or the States of Minnesota and Iowa in the future. These laws may further restrict our collection efforts on one-to-four single-family loans.

Changes to federal law and regulations may also limit the Bank's flexibility on financial products and fees which could result in additional operational costs and a reduction in our non-interest income.

Further, our regulators have significant discretion and authority to prevent or remedy unsafe or unsound practices or violations of laws by financial institutions and holding companies in the performance of their supervisory and enforcement duties. Examples include limits on payment of dividends by banks and regulations governing compensation. Regulation of dividends would limit the liquidity of the Company and limits on compensation may adversely affect our ability to attract and retain employees. See page 36 for a discussion of risks related to the Company's and the Bank's Supervisory Agreements to which we have become subject and page 37 for risks relating to the adoption of the Dodd-Frank Act.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The Company leases its corporate office in Rochester, Minnesota and owns the buildings and land for 9 of its 14 full service branches. The remaining five full service branches and one loan origination office are leased. These leased offices are located at 1016 Civic Center Drive NW, Rochester, Minnesota, 3900 55th Street NW, Rochester, Minnesota and 2805 Dodd Road, Suite 160, Eagan, Minnesota. Leased private banking offices are located at 5201 Eden Avenue, Suite 170, Edina, Minnesota and 100 1st Ave Bldg., Suite 200, Rochester, Minnesota. The Company's loan origination office is located at 50 14th Avenue East, Suite 100, Sartell, Minnesota. The Bank uses all properties and they are all located in Minnesota, except for the two full service branches located in Iowa.

ITEM 3. LEGAL PROCEEDINGS

From time to time, the Bank and the Company are involved as plaintiff or defendant in various legal proceedings arising in the normal course of business. While the ultimate outcome of these various legal proceedings cannot be predicted with certainty, it is the opinion of management that the resolution of these legal actions should not have a material effect on the Company's consolidated financial condition or results of operations.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures. An evaluation was carried out under the supervision and with the participation of the Company's management, including the Bank's President, our Principal Executive Officer and our Chief Financial Officer, our Principal Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on that evaluation, the Principal Executive Officer and Principal Financial Officer have concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms.

Management's Annual Report on Internal Control over Financial Reporting. The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Internal control over financial reporting includes those policies and procedures that pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company; provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are only being made in accordance with authorizations of management and directors of the Company; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Any control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. The design of a control system inherently has limitations, and the benefits of controls must be weighed against their costs. Additionally, controls can be circumvented by the individual acts of some persons by collusion of two or more people, or by management override of the control. Therefore, no assessment of a cost-effective system of internal controls can provide absolute assurance that all control issues and instances of fraud, if any, will be detected.

Under the supervision and with the participation of management, including the Principal Executive Officer and Principal Financial Officer, the Company conducted an evaluation of the effectiveness of its internal control over financial reporting based on the framework in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on the Company's evaluation under this framework, the Company's management concluded that the Company's internal control over financial reporting was effective as of December 31, 2010. The independent registered public accounting firm that audited the Company's financial statements incorporated into this Form 10-K, has issued the following attestation report on the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

HMN Financial, Inc.:

We have audited HMN Financial, Inc.'s internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). HMN Financial, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management Report. Our responsibility is to express an opinion on HMN Financial, Inc.'s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, HMN Financial, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of HMN Financial, Inc. as of December 31, 2010 and 2009, and the related consolidated statements of loss, stockholders' equity and comprehensive loss, and cash flows for each of the years in the three-year period ended December 31, 2010, and our report dated March 4, 2011 expressed an unqualified opinion on those consolidated financial statements.
