**SECURITIES VALUATION**

Investments in securities are valued each business day as of the close of regular trading on the New York Stock Exchange, which is usually 4:00 p.m. (Eastern Time). Securities which are traded on a national or foreign securities exchange are valued at the last reported sales price, except that securities listed on The Nasdaq Stock Market, Inc. ( Nasdaq ) are valued at the Nasdaq Official Closing Price ( NOCP ), and if no NOCP is available, then at the last reported sales price. If no sales price is shown on the Nasdaq, the bid price will be used. In the absence of any sale of securities listed on the Nasdaq, and in the case of other securities, including U.S. Government obligations, but excluding debt securities maturing in 60 days or less, the price will be deemed stale and the valuations will be determined in accordance with the Fund's Fair Valuation Procedures.

Certain fixed income securities with maturities exceeding 60 days are valued based on available market quotations received from an independent pricing service approved by the Trust's Board of Trustees which may utilize both transaction data and market information such as yield, prices of securities of comparable quality, coupon rate, maturity, type of issue, trading characteristics and other market data. If valuations are not available from the pricing service or values received are deemed not representative of market value, values will be obtained from a third party broker-dealer or determined based on the Fund's Fair Value Procedures.

Certain investments which are not valued using any of the methods discussed above, are valued at their fair value, as determined by procedures established in good faith and approved by the Board of Trustees.

The valuation techniques used by the Fund to measure fair value are consistent with the market approach, income approach and/or cost approach, where applicable, for each security type.

**WHEN-ISSUED TRANSACTIONS**

The Fund may purchase securities on a forward commitment or when-issued basis. The Fund records a when-issued transaction on the trade date and will segregate assets to cover its obligation by confirming the availability of qualifying assets having a value sufficient to make payment for the securities purchased. Securities purchased on a when-issued basis are marked-to-market daily and the Fund begins earning interest on the settlement date. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract.

**TERM LOANS**

The Fund may invest in term loans. The loans are marked-to-market daily and the Fund begins earning interest when the loans are funded. The loans pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. The Fund assumes the credit risk of the borrower and there could be potential loss to the Fund in the event of default by the borrower.

As of January 31, 2011, the Fund had unfunded loan commitments of \$1,849,000.

**FAIR VALUATION MEASUREMENTS**

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.
